Compliance Requirements Two provisions related to the Wage Rate Requirements are included in ARRA. The first requires that funded projects comply with the requirements of 40 USC 3141–3144, 3146, and 3147. The second provides that 49 USC 24405 shall also apply to the funded projects. The first provision mandates compliance with the Wage Rate Requirements generally. The second provision also mandates compliance the Wage Rate Requirements through 49 USC 24405(c), which provides that the secretary of transportation shall require as a condition of making any grant that uses rights-of-way owned by a railroad that the applicant agree to comply with the standards of 49 USC 24312 with respect to the project in the same manner that Amtrak is required to comply with those standards for construction work financed under an agreement made under 49 USC 24308(a). The 49 USC 24312 provides that Amtrak shall ensure that laborers and mechanics employed by contractors and subcontractors in construction work financed under an agreement made under 49 USC 24308 will be paid wages not less than those prevailing on similar construction in the locality, as determined by the secretary of labor under 40 USC 3141–3144, 3146, and 3147 and that wages in a collective bargaining agreement negotiated under the Railway Labor Act are deemed to comply with 40 USC 3141–3144, 3146, and 3147. The 49 USC 24308 authorizes Amtrak to enter into agreements with rail carriers or regional transportation authorities to use facilities of and have services provided by the carrier or authority under terms on which the parties agree.

FRA has concluded that the two Wage Rate Requirements can be reconciled in a manner that allows the HSIPR program to be implemented in a way that is both reasonable and consistent with current practices. For projects that use or propose to use rights-of-way owned by a railroad, the specific provisions of 49 USC 24405(c) apply and recipients are required to comply with the standards of 49 USC 24312 (prevailing wages) in the same manner that Amtrak is required to comply with those standards for construction projects

it might undertake. Wages specified in a collective bargaining agreement negotiated under the Railway Labor Act would be deemed to comply with Wage Rate Requirements for these projects. For projects that do not propose to use rights-of-way owned by a railroad, normal Wage Rate Requirements apply and there would be no specific exemption for wages arrived at through a collective bargaining agreement negotiated under the Railway Labor Act. Wage rates on these projects would have to meet the secretary of labor's prevailing wage standards as described above (see June 23, 2009, *Federal Register* (74 FR 29927)).

See Part 4, 20.001 Wage Rate Requirements Cross-Cutting Section.

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.327 RAILROAD CROSSING ELIMINATION

I. PROGRAM OBJECTIVES

The purpose of the Railroad Crossing Elimination (RCE) Program is to fund highway-rail or pathway-rail grade crossing improvement projects that focus on improving the safety and mobility of people and goods. The RCE Program provides a federal funding opportunity to improve American rail infrastructure, to enhance rail safety, improve the health and safety of communities, eliminate highway-rail and pathway-rail grade crossings that are frequently blocked by trains, and reduce the impacts that freight movement and railroad operations may have on underserved communities. Discretionary grant awards, funded through the RCE Program, will support projects that improve safety, economic strength and global competitiveness, equity, and climate and sustainability, consistent with the U.S. Department of Transportation's (DOT) strategic goals.

II. PROGRAM PROCEDURES

The RCE Program will be implemented, as appropriate and consistent with law, in alignment with the priorities in Executive Order 14052, *Implementation of the Infrastructure Investments and Jobs Act* (86 FR 64355), which are to invest efficiently and equitably, promote the competitiveness of the U.S. economy, improve job opportunities by focusing on high labor standards, strengthen infrastructure resilience to all hazards including climate change, and to effectively coordinate with State, local, Tribal, and territorial government partners.

Federal Railroad Administration (FRA) will make awards for projects through grant agreements and/or cooperative agreements. Grant agreements are used when FRA does not expect to have substantial Federal involvement in carrying out the funded activity. Cooperative agreements allow for substantial Federal involvement in carrying out the agreed upon investment, including technical assistance, review of interim work products, and increased program oversight. The term "grant" is used throughout this document and is intended to reference funding awarded through a grant agreement or a cooperative agreement. Funds will be made available to grantees on a reimbursable basis. Applicants must certify that their expenditures are allowable, allocable, reasonable, and necessary to the approved project before seeking reimbursement from FRA. Additionally, the grantee is expected to expend matching funds at the required percentage concurrent with Federal funds throughout the life of the project. See an example of standard terms and conditions for FRA grant awards at: <https://www.fra.dot.gov/eLib/Details/L19057>. The standard terms and conditions are subject to revision.

Source of Governing Requirements

Section 22305 of the Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117–58, November 15, 2021), codified at 49 U.S.C. 22909, authorizes the RCE Program. The RCE Program is funded through the advanced appropriation in Division J of IIJA.

The 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program, as supplemented by the terms and conditions of the annual grant agreements.

Availability of Other Program Information

Additional information concerning this Program is available at <https://railroads.dot.gov/grants-loans/competitive-discretionary-grant-programs/railroad-crossing-elimination-grant-program>

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	N	Y	N	N	N	N

A. Activities Allowed or Unallowed

The following Highway-Rail or Pathway-Rail Grade Crossing Improvement Projects that focus on improving the safety and mobility of people and goods are eligible for funding under 49 U.S.C. 22909(d).

1. Grade separation or closure, including through the use of a bridge, embankment, tunnel, or combination thereof;

2. Track relocation;
3. The improvement or installation of protective devices, signals, signs, or other measures to improve safety, provided that such activities are related to a separation or relocation project described in paragraph (1) or (2);
4. Other means to improve the safety and mobility of people and goods at highway-rail grade crossings (including technological solutions);
5. A group of related projects described in paragraphs (1) through (4) that would collectively improve the mobility of people and goods; or
6. The planning, environmental review, and design of an eligible project described in paragraphs (1) through (5).

G. Matching, Level of Effort, Earmarking

1. Matching

The Federal share of total costs for RCE Program projects shall not exceed 80 percent. The estimated total cost of a project must be based on the best available information, including engineering studies, studies of economic feasibility, and environmental analyses. Additionally, in preparing estimates of total project costs, applicants may use FRA's cost estimate guidance, "Capital Cost Estimating: Guidance for Project Sponsors," which is available at: <https://www.fra.dot.gov/Page/P0926>.

The minimum 20 percent non-Federal share may be comprised of public sector funding (*e.g.*, state, or local) or private sector funding. FRA will not consider any Federal financial assistance or any non-Federal funds already expended (or otherwise encumbered) prior to the award period of performance start date toward the matching requirement, unless compliant with 2 CFR part 200 (*i.e.*, approved pre-agreement costs). In-kind contributions, including the donation of services, materials, and equipment, may be credited as a project cost, in a uniform manner consistent with 2 CFR 200.306. In addition, applicants may count costs incurred for Preliminary Engineering associated with Highway-Rail Grade Crossing and Pathway-Rail Grade Crossing Improvement Projects as part of the total project costs. Such costs are eligible as non-Federal share or for reimbursement, even if they were incurred before project selection for award, consistent with 49 U.S.C. 22909(g). Such costs must have been incurred no earlier than November 15, 2021 and must be otherwise compliant with 2 CFR part 200 and the requirements of this RCE Program.

2. Level of Effort

DEPARTMENT OF TRANSPORTATION**ASSISTANCE LISTING 20.500 FEDERAL TRANSIT – CAPITAL INVESTMENT GRANTS (Fixed Guideway Capital Investment Grants)****ASSISTANCE LISTING 20.507 FEDERAL TRANSIT – FORMULA GRANTS (Urbanized Area Formula Program)****ASSISTANCE LISTING 20.525 STATE OF GOOD REPAIR GRANTS PROGRAM****ASSISTANCE LISTING 20.526 BUSES AND BUS FACILITIES FORMULA, COMPETITIVE, AND LOW OR NO EMISSIONS PROGRAMS (Buses and Bus Facilities Program)****I. PROGRAM OBJECTIVES***Fixed Guideway Capital Investment Grants (Section 5309)*

The objective of the Fixed Guideway Capital Investment Grants program (5309 program) is to provide funds for construction of new or extended fixed guideway systems, corridor-based bus rapid transit systems, and core capacity improvement projects that increase capacity by at least 10 percent in existing fixed guideway corridors that are at capacity today or will be in ten years. In addition, the Pilot Program for Transit-Oriented Development (TOD) Planning provides funding for corridor-level comprehensive planning and site-specific planning activities conducted in conjunction with new fixed guideway or core capacity improvement projects. The Expedited Project Delivery (EPD) Pilot Program aims to expedite funding of new fixed guideway capital projects, small starts projects, or core capacity improvement projects and to encourage innovative partnerships and funding mechanisms.

Urbanized Area Formula Program (Section 5307)

The objective of the Urbanized Area Formula Program (5307 program) is to assist in financing the planning, acquisition, construction, preventive maintenance, and improvement of facilities and equipment in public transportation services. Operating expenses are also eligible under the 5307 program in urbanized areas with populations of less than 200,000 and, under some limited exceptions, to some urbanized areas with population of 200,000 and above.

State of Good Repair Grants Program (Section 5337)

The objective of the State of Good Repair Grants program (5337 program) is to provide financial assistance for replacement, maintenance, and rehabilitation projects for existing fixed guideway (including rail, bus rapid transit, and passenger ferries) and high intensity motorbus (buses operating in high-occupancy vehicle (HOV) lanes) systems to maintain public transportation systems in a state of good repair so that they operate safely, efficiently, reliably, and sustainably and offer balanced transportation choices that help to improve mobility, reduce congestion, and encourage economic development. The 5337(f) Competitive Grants for Rail Vehicle

Replacement is a set-aside discretionary grant program to assist in funding the replacement of rail rolling stock.

Buses & Bus Facilities Program (Section 5339)

The Buses and Bus Facilities Program, contains three subprograms, the Buses and Bus Facilities Formula Program (5339(a)), the Buses and Bus Facilities Competitive Program (5339(b)), and the Low or No Emissions Grant Program (5339(c)). The objective of the Buses and Bus Facilities Formula program (5339 program) is to provide financial assistance to states and transit agencies through a statutory formula to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. The Buses and Bus Facilities Competitive Grant Program provides funding to states and transit agencies through a competitive process to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. The Low or No Emissions Grant Program provides funding to states and transit agencies through a competitive process for the purchase or lease of zero-emission and low-emission transit buses as well as acquisition, construction, and leasing of required supporting facilities.

II. PROGRAM PROCEDURES

Federal transit law under Chapter 53 of Title 49, US Code, authorizes the Urbanized Area Formula program (49 USC 5307), the Capital Investment Grants program (49 USC 5309), the Grants for Buses and Bus Facilities program (49 USC 5339, including the Grants for Buses and Bus Facilities formula program (5339(a)), the competitive buses and bus facilities program (5339(b)), and the Low or No Emission Grants program (5339(c))), the State of Good Repair Grants program (49 USC 5337) and the Competitive Grants for Rail Vehicle Replacement Program (49 USC 5337(f); Bipartisan Infrastructure Law Pub. L. No. 117-58 §30016). The pilot program for TOD Planning is authorized by Section 20005(b) of the Moving Ahead for Progress in the 21st Century Act (MAP-21; Pub. L. No. 112-141, July 6, 2012). The EPD Pilot Program is authorized by Section 3005(b) of the Fixing America's Surface Transportation Act (FAST Act; Pub. L. No. 114-94, December 4, 2015).

Grants are awarded to public agencies on approval of applications for specific programs or projects submitted to the Federal Transit Administration (FTA). FTA monitors the progress of those projects through on-site inspections, telephone contacts, correspondence, quarterly or annual progress and financial status reports, and, where applicable, Triennial Reviews.

FTA is required to perform reviews and evaluations of 49 USC 5307 grant activities at least every three years. The most recent FTA Triennial Review Workshop Workbook provides guidance to FTA staff and recipients on the conduct of triennial reviews and is available at <https://www.transit.dot.gov/fy22-comprehensive-review-guide>. These reviews are conducted with specific reference to compliance with statutory and administrative requirements and consistency of program activities with (1) the approved program of projects and (2) the planning process required under 49 USC 5303. Copies of these triennial reviews are available from the regional offices. Regional office addresses and telephone numbers are available on the FTA website listed below.

Source of Governing Requirements

The programs in this cluster are authorized by 49 USC 5307, 5309, 5337, and 5339, as well as Section 20005(b) of MAP-21 and Section 3005(b) of FAST and the Bipartisan Infrastructure Law Section 30016 (Public Law 117-58 also known as the Infrastructure Investment and Jobs Act) authorizes the Competitive Rail Vehicle Replacement Grant Program (49 U.S.C. 5337(f)). Program regulations are at 49 CFR parts 601 through 665.

Availability of Other Program Information

Additional information is available on the FTA website at [Grant Programs | FTA \(dot.gov\)](https://www.fta.dot.gov/grant-programs)

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	Y	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Generally, under all programs, unless otherwise specified below, capital activities, as defined in 49 USC 5302(3), are eligible activities, including preventive maintenance and certain expenses related to crime prevention and security (49 USC 5307(a), 5309(b), 5337(b), and 5339(a)).

- b. Under the 5307 program, operating assistance is eligible for all urbanized areas under 200,000 in population, and certain urbanized areas with a population greater than 200,000 in population under limited exceptions are eligible, as well as planning expenses are eligible for all urbanized areas (49 USC 5307(a)(2)). Additional flexibility for reimbursing operating expenses for all 5307 recipients has been extended in response to the COVID-19 public health emergency. FTA allowed all recipients of 5307 formula funds to use apportioned funds for operating expenses related to the emergency, beginning January 20, 2020, regardless of the size of the transit system or urbanized area. Additional detail and Frequently Asked Questions available at:
- FTA Formula Funding Under Emergency Relief Program
<https://www.transit.dot.gov/frequently-asked-questions-fta-grantees-regarding-coronavirus-disease-2019-covid-19>
 - CARES, CRRSAA & Emergency Relief Funding Requirements
<https://www.transit.dot.gov/frequently-asked-questions-fta-grantees-regarding-coronavirus-disease-2019-covid-19#CARESER>
- c. Under the 5307 program, human resources and workforce development activities, including training, and training provided at the National Transit Institute or through a state-contracted training provider (49 USC 5314 (b) and (c)).
- d. Under the 5337 program, the only capital projects authorized are projects that develop and implement a transit asset management plan and projects that maintain, rehabilitate, and replace transit assets for high intensity fixed guideway and motorbus systems in a state of good repair (49 USC 5337(b)).
- e. Under the 5339 program, the only capital projects authorized are bus, bus facilities, and bus-related equipment projects (49 USC 5339(a)).
- f. Under the 5339 program, workforce development (49 USC 5314(b)).
- g. Under the 5309 program, for projects awarded before October 1, 2012, the only capital projects authorized are those for
- (1) bus and bus facilities;
 - (2) new fixed guideways, including Small Starts;
 - (3) fixed guideway modernization; or
 - (4) corridor improvements (49 USC 5309(b)(1) through (b)(4)).
- h. Under the 5309 program, for projects awarded on or after October 1, 2012,

the only capital projects authorized are those for

- (1) new or extended fixed guideway capital projects;
- (2) corridor-based bus rapid transit projects; or
- (3) core capacity improvement projects (49 USC 5309(b)).

- i. Under the Pilot Program for TOD Planning, only corridor-level comprehensive planning and site-specific planning associated with a new fixed guideway or core capacity improvement transit capital project as defined in federal public transportation law (49 USC 5309(a)) is allowable (Section 20005(b) of MAP-21).
- j. Under the EPD Pilot Program, only new or extended fixed guideway capital projects, small start projects, or core capacity improvement projects are eligible for funding that use a public-private partnership and will be operated and maintained by employees of an existing public transportation provider (Section 3005(b) of the FAST Act).

2. *Activities Unallowed*

- a. Under the 5309 and 5337 programs, the following:
 - (1) Mobility management;
 - (2) Operating expenses; and
 - (3) Alternatives analysis, including planning (49 USC 5309(b) and 5337).
- b. Under the 5307 program, operating assistance in areas over 200,000, unless under certain limited exceptions ([49 USC 5307\(a\)\(2\)](#)).
- c. Under the 5339 program, preventive maintenance, and rail-related activities (49 USC 5339).

H. **Period of Performance**

OMB Uniform Guidance section 200.343(b) requires nonfederal entities to liquidate all obligations incurred under the federal award not later than 90 calendar days after the end date of the period of performance as specified in the terms and conditions of the federal award unless the federal awarding agency or pass-through entity authorizes an extension.

FTA Circular 5010.1E describes Period of Performance as “the time during which the recipient or subrecipient may incur new obligations to carry out the scope of work authorized under the Grant or Cooperative Agreement. FTA, or the pass-through entity, must include the start and end dates of the period of performance in the Grant or

Cooperative Agreement, regardless of whether pre-award authority has been exercised. The start date is the Federal Award Date of an Award (5010.1E(I)(5)(a)(111)).”

Typically, for traditional programs an award for preventative maintenance or operating activities is not meant to be an open, ongoing award. These awards should contain no more than three apportionment fiscal years of funding. The award may be amended multiple times to account for the three fiscal years of funding allocated to the recipient. Any request may only be for the immediately preceding year and/or current year activities.

For CARES Act, CRRSAA, and formula (5307 and 5311) programs under Emergency Relief, all expenses must be incurred on or after January 20, 2020. Grants for operating assistance and preventive maintenance using CARES Act or CRRSAA funds may cover a period of time that corresponds to the expected spend-down rate of the funds, and the agency may establish the end of the period of performance of the grant accordingly.

I. Procurement and Suspension and Debarment

Recipients must use qualifications-based selection procedures (Brooks Act or an equivalent qualifications-based requirement of a state) when acting as contracting agencies to procure engineering and design-related services for construction of a transit project (49 USC 5325(b)(1)).

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.509 FORMULA GRANTS FOR RURAL AREAS AND TRIBAL TRANSIT PROGRAM

I. PROGRAM OBJECTIVES

The objectives of the Formula Grants for Rural Areas (Section 5311) program are to initiate, improve, or continue public transportation service in rural areas by providing financial assistance for operating, planning, administrative expenses, and the acquisition, construction, and improvement of facilities and equipment. In addition, Section 5311(f) specifically provides for the support of rural intercity bus service. The Rural Transit Assistance Program (RTAP), Section 5311(b)(3), provides additional funding for training, technical assistance, research, and related support services to support rural transit service.

II. PROGRAM PROCEDURES

A. State Agencies

The Federal Transit Administration (FTA) annually publishes formula apportionments to the states in a *Federal Register* notice published within 10 days after the Department of Transportation (DOT) Appropriations Act is signed into law. The governor of each state designates a state agency to administer the program. The state is responsible for fair distribution of the funds in the state, including Indian reservations. The state may also provide transit service directly or through contracts with private operators. The state describes its procedures for administering the program in a state management plan. The state applies to FTA for approval of a program of projects, usually annually, and reports annually to FTA on financial status and revisions to the program of projects. The state agency may be the recipient on behalf of Indian tribes that are subrecipients, but federally recognized tribes may also elect to apply to FTA as a direct recipient. FTA monitors compliance with federal requirements through administrative “State Management Reviews,” generally every three years.

B. Appalachian Development Public Transportation Assistance Program

The Appalachian Development Public Transportation Assistance Program is a formula program under the Section 5311 program that provides additional funding to support public transportation in the Appalachian region. There are 13 eligible states that receive an allocation under this provision. Recipients may use these funds for any purpose that is eligible under Section 5311.

C. Tribal Transit Program

The Tribal Transit Program (TTP) under the 5311 program includes both formula and competitive components. Federally recognized Tribes are eligible direct recipients and apply directly to FTA. Under the competitive program, funds are made available annually on a competitive basis through a Notice of Funding Opportunity (NOFO). Recipients of TTP funds may use these funds for any purpose that is eligible under Section 5311.

D. Subrecipients

Except for the TTP, the state selects subrecipients and monitors their compliance with federal requirements. FTA does not directly monitor the subrecipients but checks the state's procedures for monitoring subrecipients during the State Management Review. The state may impose program criteria in addition to those imposed by the FTA and may require additional reports from subrecipients. These state requirements are included in the State Management Plan.

Source of Governing Requirements

This program is authorized by 49 USC 5311. Program regulations are in 49 CFR parts 601 through 665. Note that certain exceptions or dollar thresholds in these rules may exclude many rural transit activities. In referring to the program, FTA uses the term "rural" to include both rural and small urban areas (all areas not included in the urbanized areas designated by the US Bureau of the Census).

Availability of Other Program Information

Information about the program may be found on the FTA website at <http://www.fta.dot.gov/>. Program Guidance and Application Instructions are contained in FTA Circulars, which may be found on the website.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N

Y	Y	Y	N	Y	N	N	Y	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Local transportation service (transit service available to the public) in a rural area (49 USC 5311(d)).
- b. Support of intercity bus transportation (49 USC 5311(f)).
- c. Coordination of public transportation assisted under this section with transportation service assisted by other United States government sources is permitted and encouraged (49 USC 5311(b)).
- d. Planning, operating, and capital projects (49 USC 4911(b)(1)).
- e. Job access and reverse commute projects, and the acquisition of public transportation services, including service agreements with private providers of public transportation (49 USC 5311(b)(1)).
- f. RTAP funds may be used to provide training, technical assistance, research and related support services for providers of rural public transit and related services (49 USC 5311(b)(3)).

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.513 ENHANCED MOBILITY OF SENIORS AND INDIVIDUALS WITH DISABILITIES

ASSISTANCE LISTING 20.516 JOB ACCESS AND REVERSE COMMUTE PROGRAM

ASSISTANCE LISTING 20.521 NEW FREEDOM PROGRAM

I. PROGRAM OBJECTIVES

Enhanced Mobility of Seniors and Individuals with Disabilities (5310 Program)

The objective of the 5310 formula and discretionary program is to enhance mobility for seniors and persons with disabilities by providing funds for programs that serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

Job Access and Reverse Commute (JARC) Program

The objectives of the JARC program are to improve access to transportation services to employment and employment-related activities for welfare recipients and eligible low-income individuals and to transport residents of urbanized areas and nonurbanized areas to suburban employment opportunities. Under this program, FTA provides financial assistance for transportation services planned, designed, and carried out to meet the transportation needs of welfare recipients and eligible low-income individuals, and of reverse commuters regardless of income.

New Freedom Program

The New Freedom program aims to provide additional tools to overcome barriers facing Americans with disabilities seeking integration into the work force and full participation in society. Lack of adequate transportation is a primary barrier to work for individuals with disabilities. The New Freedom program seeks to reduce barriers to transportation services and expand the transportation mobility options available to people with disabilities beyond the requirements of the ADA.

II. PROGRAM PROCEDURES

The Moving Ahead for Progress in the 21st Century Act (MAP-21) (Pub. L. No. 112-141) combined the Capital Assistance program for Elderly Persons and Persons with Disabilities (Assistance Listing 20.513) and the New Freedom program (Assistance Listing 20.521) into the 5310 program.

Effective with the passage of MAP-21 (October 1, 2012), the JARC, and New Freedom programs were repealed and no additional grants were awarded. Section 3006(b) of the Fixing America's Surface Transportation (FAST) Act (Pub. L. No. 114-94) (49 USC 5310 note) created a discretionary component to the previously formula-only 5310 program. This pilot program for

innovative coordinated access and mobility provides funding for efforts that improve the coordination of transportation services with nonemergency medical care for the transportation disadvantaged. Funding is intended for organizations that focus on coordinated transportation solutions.

FTA annually publishes formula apportionments in a *Federal Register* notice published within ten days after the Department of Transportation (DOT) Appropriations Act is signed into law. In the case of the 5310 program, the governor of each state designates a state agency to administer the program. In addition, the governor of each state is required to designate a state agency to administer the program for urbanized areas with a population between 50,000 and 199,999 and nonurbanized areas. The governor must also designate a designated recipient to administer the program for urbanized areas with a population of 200,000 or more. In the case of the JARC and New Freedom programs, the governor (1) designated a state agency to administer the program in nonurbanized areas and in urbanized areas with populations between 50,000 and 199,999; and (2) in consultation with responsible local officials and public transportation providers, designated a recipient to administer the program for the large, urbanized area(s). The state agencies and designated recipients (large, urbanized areas) are responsible for fair distribution of the funds. State agencies or their designated recipients must describe their procedures for administering the program in a state management plan (SMP), or, for those JARC and New Freedom designated recipients serving large, urbanized areas, a program management plan (PMP).

State agencies and designated recipients apply to FTA for approval of a program of projects, usually annually, and report annually to FTA on financial status and revisions to their program of projects. Federal transit law requires that projects selected for funding under the 5310, JARC, and New Freedom programs be included in a locally developed, coordinated public transit-human services transportation plan, and that the plan be developed through a process that includes seniors and individuals with disabilities, as well as representatives of public, private, and nonprofit transportation and human services providers and members of the general public.

FTA monitors compliance with federal requirements through administrative “State Management Reviews,” in which a state agency is generally reviewed every three years. Designated recipients who also receive FTA financial assistance under the Urbanized Area Formula program (Assistance Listing 20.507) are also subject to an FTA “Triennial Review.”

Subrecipients

State agencies and designated recipients select subrecipients and monitor their compliance with federal requirements. FTA does not directly monitor the subrecipients but checks the state agency and designated recipient’s procedures for monitoring during the State Management Review and Triennial Review. The state agency and designated recipient may impose program criteria in addition to those imposed by FTA and may require additional reports from subrecipients. These state and designated recipient’s requirements are included in the SMP or PMP.

Source of Governing Requirements

The 5310 formula program is authorized by 49 USC 5310, the pilot program for innovative coordinated access and mobility is authorized by Section 3006(b) of the FAST Act (49 USC 5310 note), the JARC program was authorized by 49 USC 5316, and the New Freedom program was authorized by 49 USC 5317. Program regulations are in 49 CFR parts 601 through 665.

Availability of Other Program Information

Additional information about the programs may be found on the FTA website at <https://www.transit.dot.gov/funding/grants/grant-programs>. Program guidance for the JARC, New Freedom, and 5310 programs are contained in FTA Circulars 9050.1, 9045.1, and 9070.1, respectively. Current FTA circulars can be found at <https://www.transit.dot.gov/regulations-and-guidance/fta-circulars/final-circulars>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	Y	N	N	Y	N	N	Y	N

A. Activities Allowed or Unallowed

1. Under the 5310 program:
 - a. For awards prior to October 1, 2012, funds are available only for capital expenses (and associated administrative, planning, and technical assistance) to support the provision of transportation services to meet the special needs of elderly individuals and individuals with disabilities. Operating expenses are not allowed.
 - b. For awards on or after October 1, 2012, funds are available for operating and capital expenses for transportation services that address the needs of seniors and individuals with disabilities (49 USC 5310(b)(1)).
 - c. For awards on or after December 27, 2020, under the Coronavirus Response and Relief Supplemental Appropriations Act 2021 (CRRSAA) or FY 2021 and prior appropriations, funds must be used for operating expenses unless the recipient has certified that it has not furloughed any employees. Funds can be used for either operating or capital expenses if the recipient has certified that it has not furloughed any employees.
2. Under the JARC program, funds may be used for capital, planning, and operating expenses (and associated administrative, planning, and technical assistance) that support access to jobs and reverse commute projects (49 USC 5316(b)).
3. “Access to jobs” projects are defined as projects relating to the development and maintenance of transportation services designed to transport welfare recipients and eligible low-income individuals to and from jobs and activities related to their employment, including:
 - a. Transportation projects to finance planning, capital, and operating costs of providing access to jobs under Chapter 53 of 49 USC;
 - b. Promoting public transportation by low-income workers, including the use of public transportation by workers with nontraditional work schedules;
 - c. Promoting the use of transit vouchers for welfare recipients and eligible low-income individuals; and
 - d. Promoting the use of employer-provided transportation, including the transit pass benefit program under section 132 of the Internal Revenue Code of 1986, as amended (49 USC 5316(a)(1)).
4. “Reverse commute” projects are defined as public transportation projects designed to transport residents of urbanized areas and other-than-urbanized areas to suburban employment opportunities, including any projects to:

- a. Subsidize the costs associated with adding reverse commute bus, train, carpool, van routes, or service from urbanized areas and other-than-urbanized areas to suburban workplaces;
 - b. Subsidize the purchase or lease by a nonprofit organization or public agency of a van or bus dedicated to shuttling employees from their residences to a suburban workplace; or
 - c. Otherwise facilitate the provision of public transportation services to suburban employment opportunities (49 USC 5316(a)(4)).
5. Under the New Freedom program, funds are available for capital and operating expenses (and associated administrative, planning, and technical assistance) that support new public transportation services beyond those required by the ADA and new public transportation alternatives beyond those required by the ADA designed to assist individuals with disabilities with accessing transportation services, including transportation to and from jobs and employment support services (49 USC 5317(b)(1)).

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.527 PUBLIC TRANSPORTATION EMERGENCY RELIEF PROGRAM

I. PROGRAM OBJECTIVES

The objective of the Public Transportation Emergency Relief Program (49 USC 5324) is to assist public transit operators affected by a declared emergency or a major disaster in preparing for, responding to, recovering from, and reducing vulnerabilities to emergencies and major disasters.

II. PROGRAM PROCEDURES

The Public Transportation Emergency Relief Program provides operating assistance and capital funding to aid recipients and subrecipients in restoring public transportation service, and in repairing and reconstructing public transportation assets to a state of good repair as expeditiously as possible following an emergency declared by a governor or major disaster declared by the president under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

Grants are awarded to public agencies on approval of applications for specific projects submitted to the Federal Transit Administration (FTA), US Department of Transportation. FTA monitors the progress of those projects through on-site inspections, telephone contacts, correspondence, and quarterly progress, and financial status reports.

FTA determines the terms and conditions applicable to recipients of Emergency Relief funds and publishes the applicable requirements in the *Federal Register* at the time of the allocation of funds. In general, recipients of Emergency Relief are required to comply with the program requirements of 49 USC 5307, including an evaluation of grant activities at least every three years by FTA. The most recent FTA Triennial Review Workshop Workbook provides guidance to FTA staff and recipients on the conduct of triennial reviews and is available at <https://www.transit.dot.gov/funding/grantee-resources/triennial-reviews/triennial-reviews>. These reviews are conducted with specific reference to compliance with statutory and administrative requirements and consistency of program activities with (1) the approved program of projects and (2) the planning process required under 49 USC 5303. Copies of these triennial reviews are available from the regional offices. Regional office addresses and telephone numbers are available on the FTA website listed below.

Grants for emergency operations, emergency protective measures, emergency repairs, permanent repairs and resiliency projects are made under 49 USC 5324. Grants to address an emergency also can be made using 49 USC 5307 or 49 USC 5311 funds.

Source of Governing Requirements

The Public Transportation Emergency Relief Program is authorized by 49 USC 5324. Program regulations are at 49 CFR Part 602. Applicable program requirements associated with the federal transit programs are at 49 CFR parts 601 through 665.

Availability of Other Program Information

Additional information is available on the FTA website at <http://www.fta.dot.gov/emergencyrelief>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A. Activities Allowed or Unallowed

FY20/FY21 Special Circumstance: COVID-19 Response and Recovery

The following additional eligibilities were extended to unobligated funding in the Urbanized Area Formula (49 USC 5307) and Formula Grants for Rural Areas (49 USC 5311) programs for emergency expenses as authorized by 49 USC 5324.

- a. Administrative leave for transit agency employees who were idled due to the coronavirus pandemic.
- b. Operating costs for meal delivery and similar non-transit uses of federally assisted vehicles.

- c. All operating and capital expenses provided at up to 100 percent federal share, at the option of the recipient, for all recipients of eligible FTA formula funds, regardless of Urbanized Area or fleet size.

Additional detail and Frequently Asked Questions available at:

- (1) FTA Formula Funding Under Emergency Relief Program
<https://www.transit.dot.gov/frequently-asked-questions-fta-grantees-regarding-coronavirus-disease-2019-covid-19>
- (2) CARES, CRRSAA & ER Funding Requirements
[Frequently Asked Questions from FTA Grantees Regarding Coronavirus Disease 2019 \(COVID-19\) | FTA \(dot.gov\)](#)

1. *Activities Allowed Under 5324*

- a. Capital activities, as defined in 49 USC 5302(3), to protect, repair, reconstruct, or replace equipment and facilities of a public transportation system operating in the United States or on an Indian reservation that the secretary of transportation determines are in danger of suffering serious damage, or has suffered serious damage, as a result of an emergency (49 USC 5324(b)).
- b. Eligible operating costs of public transportation equipment and facilities in an area directly affected by an emergency, relating to:
 - (1) Evacuation services;
 - (2) Rescue operations;
 - (3) Temporary public transportation service; or
 - (4) Reestablishing, expanding, or relocating public transportation route service before, during, or after an emergency (49 USC 5324(a)(1)).

2. *Activities Not Allowed*

- a. Heavy maintenance, defined as work that would usually be done by a public transit agency to repair damage normally expected from seasonal or occasional events; or those that can reasonably be accommodated by a transit system's routine maintenance, emergency, or contingency program, and does not rise to the level of serious damage.
- b. Project costs for which the recipient has received funding from another source, including but not limited to insurance proceeds and FTA and other federal grants.

- c. Except for FTA-approved resilience projects, projects that change the function of the original infrastructure.
- d. Reimbursement of lost revenue due to disruptions caused by an emergency or major disaster.
- e. Project costs associated with replacement or replenishment of damaged or lost material that is not the property of the affected applicant and not incorporated into a public transportation system, such as stockpiled materials or items awaiting installation.

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.532 PASSENGER FERRY GRANT PROGRAM, ELECTRIC OR LOW-EMITTING FERRY PILOT PROGRAM, AND FERRY SERVICE FOR RURAL COMMUNITIES PROGRAM

I. PROGRAM OBJECTIVES

This program is comprised of several subprograms as follows:

Passenger Ferry Grant Program (49 U.S.C. 5307(h))

The objective of the Passenger Ferry Grant Program is to assist in financing of capital projects for the purchase, construction, replacement, or rehabilitation of ferries, terminals, and related facilities and equipment.

The Electric and Low-Emitting Ferry Pilot Program (IIJA§71102)

The objective of the Electric and Low-Emitting Ferry Pilot Program is to assist in financing of capital projects for the purchase of electric or low-emitting ferry vessels that reduce emissions by using alternative fuels or on-board energy storage systems and related charging infrastructure to reduce emissions or produce zero onboard emissions under normal operation.

The Ferry Service for Rural Communities Program (IIJA§71103)

The objective of the Ferry Service for Rural Communities Program is to assist in financing of capital, operating and planning assistance to ensure basic essential ferry service is provided to rural areas.

II. PROGRAM PROCEDURES

Federal transit law under Chapter 53 of Title 49, US Code, authorizes the Passenger Ferry Grant program (49 USC 5307(h), the Electric or Low-Emitting Ferry Pilot Program (IIJA§71102) and the Ferry Service for Rural Communities (IIJA§71103).

Grants are awarded to public agencies on approval of applications for specific programs or projects submitted to the Federal Transit Administration (FTA). FTA monitors the progress of those projects through on-site inspections, telephone contacts, correspondence, quarterly or annual progress and financial status reports, and, where applicable, Triennial Reviews.

Source of Governing Requirements

The Passenger Ferry Grant Program is authorized by 49 U.S.C. Section 5307(h).

The Electric or Low-Emitting Ferry Pilot Program is authorized by Division J of the Bipartisan Infrastructure Law (enacted as the Infrastructure Investment and Jobs Act, Pub. L. 117-58).

The Ferry Service for Rural Communities is authorized by Division J of the Bipartisan Infrastructure Law (enacted as the Infrastructure Investment and Jobs Act, Pub. L. 117-58).

Availability of Other Program Information

Additional information is available on the FTA website at [Grant Programs | FTA \(dot.gov\)](https://www.fta.dot.gov/Grant-Programs)

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	Y	N	Y	Y	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Under the Passenger Ferry Program (5307(h)): Capital activities, as defined in 49 U.S.C. 5307(h) provides competitive funding for projects that support passenger ferry systems in urbanized areas, such as ferry vessels, terminals, and related infrastructure.
- b. Under the Electric or Low-Emitting Ferry Pilot Program (IIJA § 71102): Capital activities, as defined in Division J of the Bipartisan Infrastructure Law for the purchase of electric or low-emitting ferry vessels that reduce emissions by using alternative fuels or on-board energy storage systems and related charging infrastructure to reduce emissions or produce zero onboard emissions under normal operation.
- c. Under the Rural Ferry Program (IIJA§71103): Capital, operating, and planning activities, as defined in 49 U.S.C. 5311, for rural ferry service that operated a regular schedule anytime during the five-year period ending March 1, 2020.

2. *Activities Unallowed*

- a. Under the Passenger Ferry Grant and Electric or Low-Emitting Ferry Pilot Program: Any project under the Passenger Ferry or Low-Emitting Ferry programs that does not include the purchase, construction, replacement, or rehabilitation of ferries, terminals, related infrastructure, or related equipment is not eligible.

H. Period of Performance

FTA Circular 5010.1E describes Period of Performance as “the time during which the recipient or subrecipient may incur new obligations to carry out the scope of work authorized under the Grant or Cooperative Agreement. FTA, or the pass-through entity, must include the start and end dates of the period of performance in the Grant or Cooperative Agreement, regardless of whether pre-award authority has been exercised. The start date is the Federal Award Date of an Award (5010.1E(I)(5)(a)(111)).”

I. Procurement and Suspension and Debarment

Recipients must use qualifications-based selection procedures (Brooks Act or an equivalent qualifications-based requirement of a state) when acting as contracting agencies to procure engineering and design-related services for construction of a transit project (49 USC 5325(b)(1)).

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.533 ALL STATIONS ACCESSIBILITY PROGRAM

I. PROGRAM OBJECTIVES

The objective of the All Stations Accessibility Program (ASAP) is to assist in financing capital and planning projects to upgrade the accessibility of legacy rail fixed guideway public transportation systems for people with disabilities, including those who use wheelchairs, by increasing the number of existing stations or facilities for passenger use that meet or exceed the new construction standards of Title II of the Americans with Disabilities Act of 1990 (42 U.S.C. 12131 et seq.).

II. PROGRAM PROCEDURES

Division J of the Bipartisan Infrastructure Law (enacted as the Infrastructure Investment and Jobs Act, Pub. L. 117-58) established the All Stations Accessibility Program (ASAP).

Grants are awarded to public agencies on approval of applications for specific projects submitted to the Federal Transit Administration (FTA). FTA monitors the progress of those projects through on-site inspections, telephone contacts, correspondence, quarterly or annual progress and financial status reports, and, where applicable, triennial reviews.

Source of Governing Requirements

The All Stations Accessibility Program is authorized by Division J of the Bipartisan Infrastructure Law (enacted as the Infrastructure Investment and Jobs Act, Pub. L. 117-58).

Availability of Other Program Information

Additional information is available on the FTA website at [Grant Programs | FTA \(dot.gov\)](https://www.fta.dot.gov/grant-programs)

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	Y	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Capital activities, as defined in Division J of the Bipartisan Infrastructure Law to repair, improve, modify, retrofit, or relocate infrastructure of stations or facilities for passenger use. Eligible costs are limited to project costs associated with the accessibility improvements. Capital projects are limited to those that, upon completion, will meet or exceed the standards for new construction under Title II of the Americans with Disabilities Act of 1990 (42 U.S.C. 12131 et seq.), as incorporated into Appendix A of 49 CFR part 37.
- b. Planning activities, as defined in Division J of the Bipartisan Infrastructure Law to develop or modify a plan for pursuing public transportation accessibility projects, assessments of accessibility, or assessments of planned modifications to stations or facilities for passenger use projects, or programs of projects in an eligible area.

2. *Activities Unallowed*

- a. Capital activities that are not associated with the accessibility improvement of a public transportation station or facility that was already constructed or where construction began prior to January 25, 1992, or for commuter rail stations already constructed or where construction began prior to October 7, 1991, that were not identified as key stations and remain not accessible to or usable by persons with disabilities, including wheelchair users.

Preventative maintenance or repair activities for elements of existing accessible stations or passenger facilities that are otherwise subject to the ongoing maintenance requirements under 49 CFR § 37.161(a) are not eligible.

- b. Operating assistance is not eligible.

- c. Bus-related activities are not eligible.
- d. All rolling stock and vehicle procurement activities are ineligible.

H. Period of Performance

FTA Circular 5010.1E describes Period of Performance as “the time during which the recipient or subrecipient may incur new obligations to carry out the scope of work authorized under the Grant or Cooperative Agreement. FTA, or the pass-through entity, must include the start and end dates of the period of performance in the Grant or Cooperative Agreement, regardless of whether pre-award authority has been exercised. The start date is the Federal Award Date of an Award (5010.1E(I)(5)(a)(111)).”

I. Procurement and Suspension and Debarment

Recipients must use qualifications-based selection procedures (Brooks Act or an equivalent qualifications-based requirement of a state) when acting as contracting agencies to procure engineering and design-related services for construction of a transit project (49 USC 5325(b)(1)).

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.534 COMMUNITY PROJECT FUNDING CONGRESSIONALLY DIRECTED SPENDING

I. PROGRAM OBJECTIVES

Community Project Funding, also known as Congressionally Directed Spending, is made available to assist in financing Transit Infrastructure Grant projects for the purposes and amounts specified by Congress in accordance with Public Transportation Law (Chapter 53 of Title 49 of the United States Code).

II. PROGRAM PROCEDURES

Community Project Funding (CPF) is appropriated and allocated from the General Fund for Transit Infrastructure Grants on an annual basis and at the discretion of Congress. The total funding amounts are specified in the Consolidated Appropriations Act corresponding with each fiscal year, if applicable, and the list of projects are found in the accompanying Joint Explanatory Statement (JES).

Grants for Community Project Funding projects are awarded through Federal Transit Administration's (FTA's) Transit Award Management System, FTA's electronic grant award system, after consultation with FTA's Regional offices. FTA monitors the progress of projects through on-site inspections, telephone contacts, correspondence, quarterly or annual progress and financial status reports, and, where applicable, Triennial Reviews. FTA is required to perform reviews and evaluations in accordance with 49 USC 5307(f)(2) at least every three years. 49 U.S.C. §5338 provides the statutory basis for FTA's oversight responsibilities and the funding available to undertake oversight activities. In addition, 49 U.S.C. §5338 authorizes FTA to provide technical assistance to correct deficiencies found during oversight reviews and to promote overall recipient compliance. The most recent FTA Triennial Review Workshop Workbook provides guidance to FTA staff and recipients on the conduct of triennial reviews. These reviews are conducted with specific reference to compliance with statutory and administrative requirements and consistency of program activities with (1) the approved program of projects and (2) the planning process required under 49 USC 5303. Copies of these triennial reviews are available from the regional offices. Regional office addresses and telephone numbers are available on the FTA website listed below.

Source of Governing Requirements

Community Projects are carried out in accordance with Public Transportation Law (Chapter 53 of Title 49 of the United States Code). The total funding amounts are specified in the Consolidated Appropriations Act corresponding with each fiscal year, if applicable, and the list of projects are found in the accompanying Joint Explanatory Statement (JES).

Availability of Other Program Information

Additional information is available on the FTA website at <https://www.transit.dot.gov/grant-programs/community-project-fundingcongressionally-directed-spending>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	Y	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. For the specified projects, activities that are eligible under FTA’s authorizing statutes in Federal law (Chapter 53 of Title 49, United States Code) are eligible for reimbursement.

2. *Activities Unallowed*

- a. Any activity ineligible under Chapter 53 of Title 49 of the United States Code, as well as any activity not included as part of the specified projects.

H. Period of Performance

FTA Circular 5010.1E describes Period of Performance as “the time during which the recipient or subrecipient may incur new obligations to carry out the scope of work authorized under the Grant or Cooperative Agreement. FTA, or the pass-through entity, must include the start and end dates of the period of performance in the Grant or Cooperative Agreement, regardless of whether pre-award authority has been exercised. The start date is the Federal Award Date of an Award (5010.1E(I)(5)(a)(111)).”

I. Procurement and Suspension and Debarment

Recipients must use qualifications-based selection procedures (Brooks Act or an equivalent qualifications-based requirement of a state) when acting as contracting agencies to procure engineering and design-related services for construction of a transit project (49 USC 5325(b)(1)).

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.600 STATE AND COMMUNITY HIGHWAY SAFETY

ASSISTANCE LISTING 20.611 INCENTIVE GRANT PROGRAM TO PROHIBIT RACIAL PROFILING

ASSISTANCE LISTING 20.616 NATIONAL PRIORITY SAFETY PROGRAMS

I. PROGRAM OBJECTIVES

The objective of the highway traffic safety grant programs is to provide a coordinated national highway safety program to reduce traffic crashes, deaths, injuries, and property damage.

II. PROGRAM PROCEDURES

The Highway Safety Act of 1966 established a formula grant program for states to save lives and prevent injuries due to road traffic crashes. To qualify for Section 402 funding, states must submit by July 1 every year for NHTSA approval an annual Highway Safety Plan (HSP) that identifies highway safety problems; establishes performance targets; documents an evidence-based enforcement plan; and describes strategies and projects, supported by data, to reduce traffic crashes. The Fixing America's Surface Transportation (FAST Act), (Pub. L. No. 114-94), amended NHTSA's highway safety grant program (23 USC 402) and the National Priority Safety program grants (23 USC 405).

No changes were made to the contents of the HSPs. The FAST Act restored (with some changes) the racial profiling data collection grant authorized under the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, Pub. L. No. 109-59 (Section 1906). The National Priority Safety programs, which is considered one program, was authorized by the Moving Ahead for Progress in the 21st Century (Map-21 Pub. L. No. 112-141). The areas covered by the National Priority programs are Occupant Protection, Impaired Driving, Ignition Interlock, State Traffic Safety Information System Improvements, Motorcyclist Safety, Distracted Driving, and Graduated Drivers Licensing. The FAST Act added new grants, including 24/7 Sobriety program grants, Nonmotorized Grants, and Racial Profiling Data Collection Grants.

Source of Governing Requirements

Programs are authorized under 23 USC Chapter 4 (Highway Safety), Pub. L. No. 109-59, Fixing America's Surface Transportation (FAST) Act, Pub. L. No. 114-94, and the Bipartisan Infrastructure Law, Pub. L. No. 117-58. Implementing regulations are in 23 CFR Part 1300.

Availability of Other Program Information

The National Highway Traffic Safety Administration maintains a website that provides program laws, regulations, and other general information (<http://www.nhtsa.dot.gov>). Program procedures have been published in the [Federal Register Vol. 83, No. 17](#) (Assistance Listings 20.600, 20.611, and 20.616).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	Y	N	N	Y	Y	N

A. Activities Allowed or Unallowed

Funds must be expended as specified in the grantee’s highway safety plan.

1. *Activities allowed or allowed with specific conditions*

a. Purchase of the following types of equipment is subject to compliance with any applicable standards and performance specifications and inclusion on the applicable Conforming Products List (CPL) established by NHTSA, the Research and Innovative Technology Administration (RITA), the American College of Surgeons, or by other nationally recognized standard-setting agencies or by state standards and performance specifications, as long as they are at least as stringent as applicable national standards and performance specifications:

- (1) Police traffic enforcement, speed-measuring devices, such as Radars, Lidars, and Across the Road devices. (A comprehensive list of such devices can be found online at

<https://www.theiacp.org/resources/document/iacp-radarlidar-testing>);

(2) Alcohol testing devices and costs for re-certification of such devices;

- c. Travel for out-of-state individuals benefiting the host state's highway safety program.
- f. For State and Community Highway Safety (Assistance Listing 20.600) funds, supplementing demonstration projects implemented under Section 403 (23 USC 402(g)(2)).
- g. Cooperating with neighboring states for highway safety purposes that benefit all participating states (23 USC 402(c)).
- h. Advertising space.

2. *Activities Unallowed*

- a. Highway construction, maintenance or design, construction or reconstruction of permanent facilities, highway safety appurtenances, office furnishings and fixtures, and purchase of land.
- b. Truck scales, traffic signal preemption systems, automated traffic enforcement systems radars, and the impaired driving funds under National Priority Safety programs (Assistance Listing 20.616) speed measuring devices.
- c. Research costs, expenses to defray activities of federal agencies, alcoholic beverages for consumption purposes or techniques for determining driver impairment, entertainment costs, and commercial drivers' compliance requirements.
- d. No federal funds may be used for any activity specifically designed to urge or influence a state or local legislator to favor or oppose the adoption of any specific legislative proposal pending before any state or local legislative body. Such activities include both direct and indirect (e.g., grassroots) lobbying activities, with one exception. This does not preclude a state official whose salary is supported with NHTSA funds to engage in direct contact with state or local legislative officials, in accordance with customary state practice, even if it urges legislative officials to favor or oppose the adoption of a specific pending legislative proposal (23 CFR Part 1200, Appendix A) and (23 CFR Part 1300, Appendix A).

B. Allowable Costs/Cost Principles

Costs charged to federal funds under sections 402, 405, and 1906 must comply with the cost principles in 2 CFR Part 200.

G. Matching, Level of Effort, Earmarking**1. Matching**

- a. States receiving State and Community Highway Safety grants (Section 402) are required to contribute at least 20 percent, or the applicable sliding scale rate, as stated in the grant award, of the total cost of the program. States are required to pay at least 50 percent, or the applicable sliding scale rate, as stated in the grant award, of the costs for planning and administration (Indian nations and territories are 100 percent federally funded) (23 USC 120(b) and 402(d); 23 CFR section 1200.13(a)), 23 CFR 1300.13(a) (Assistance Listing 20.600).
- b. States receiving grants National Priority Safety programs are required to contribute at least 20 percent of the total cost of the program (territories and Indian nations are 100 percent federally funded) (23 USC 402(d); 23 CFR section 1200.20(f)), 23 CFR section 1300.20(f) (Assistance Listing 20.616).
- c. Additional matching requirements may be specified in the grantee's highway safety plan to limit the maximum federal share of an ambulance, helicopter, AED, or aircraft to 25 percent.

2. Level of Effort**2.1 Level of Effort – *Maintenance of Effort***

For the State and Community Highway Safety program (Assistance Listing 20.600) and the National Priority Safety programs (Assistance Listing 20.616), as authorized by the FAST Act, a state must maintain its aggregate expenditures from all other sources at or above the average level of such expenditures in fiscal years 2014 and 2015 for activities for Occupant Protection, State Traffic Safety Information System Improvements, and Impaired Driving Countermeasures (23 USC 405(a)(1)(H); 23 CFR sections 1200.21(d)(5), 1200.22(f), and 1200.23(d)(2)), 1300.21(d)(5), 1300.22(c), and 1300.23(d)(2).

2.2 Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

- a. At least 40 percent of federal funds apportioned to a state under State and Community Highway Safety (Assistance Listing 20.600) for any fiscal year shall be expended by or for the political subdivisions of the state in carrying out local highway safety programs (23 USC 402(b)(1)(C); 23 CFR Part 1200, Appendix E) and 1300 Appendix C.
- b. The federal costs for planning and administration under State and Community Highway Safety (Assistance Listing 20.600) shall not exceed 15 percent of the funds received by the state. The federal costs for planning and administration under State and Community Highway Safety (Assistance Listing 20.600) shall not exceed 5 percent of the funds received by the Indian nations (23 CFR section 1200.13(a)) and 23 CFR section 1300). In accordance with 23 USC 120(i), the federal share payable for projects in the US Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands shall be 100 percent (23 CFR 1300.13(a)).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable
- d. *HS-217, Highway Safety Plan Cost Summary (OMB No. 2127-0003)*
- e. *Federal-Aid Reimbursement Voucher (OMB No. 2127-0003)*

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

M. Subrecipient Monitoring

NHTSA Regional Offices monitor the states' highway safety offices and the state offices monitor their subrecipients. The Regional Offices routinely conduct on-site monitoring

and reviews that involve oversight of the highway safety office activities and their oversight of the subrecipients.

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.708 NATURAL GAS DISTRIBUTION INFRASTRUCTURE SAFETY AND MODERNIZATION GRANT PROGRAM

I. PROGRAM OBJECTIVES

The Infrastructure Investment and Jobs Act (IIJA) provides funding for Pipeline And Hazardous Materials Safety Administration's (PHMSA) Natural Gas Distribution Infrastructure Safety and Modernization (NGDISM) Grant Program. NGDISM grant program funds are available for municipalities or community-owned utilities (not including for-profit entities) to repair, rehabilitate, or replace natural gas distribution pipeline system or portions thereof, or to acquire equipment to reduce incidents and fatalities and avoid economic losses.

The program seeks to reduce the risk profile of the existing pipeline systems including pipe prone to leakage, the potential of pipeline project creating jobs, the potential for benefitting disadvantaged rural and urban communities, and to realize positive economic impact or growth.

II. PROGRAM PROCEDURES

On November 15, 2021 the President signed the Bipartisan Infrastructure Law which is the most significant investment in our nation's infrastructure in more than half a century. This includes the Pipeline and Hazardous Materials Safety Administrations (PHMSA) first ever Natural Gas Distribution Infrastructure Safety and Modernization (NGDISM) grant program. The legislation designated \$200 million a year in grant funding with a total of \$1 billion in grant funding over the next five years.

The grant funding is to be made available to a municipality or community owned utility (not including for-profit entities) to repair, rehabilitate, or replace its natural gas distribution pipeline systems or portions thereof or to acquire equipment to (1) reduce incidents and fatalities and (2) to avoid economic losses.

Source of Governing Requirements

The program was authorized by IIJA (Pub. L. 117-58), Statute 1443.

Availability of Other Program Information

PHMSA maintains a website with current program information: [Natural Gas Distribution Infrastructure Safety and Modernization Grants | PHMSA \(dot.gov\)](#)

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a

direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

Y	Y	N	N	Y	N	N	Y	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. PHMSA’s NGDISM grants will provide funding to municipality- or community-owned utilities (Not including for-profit entities) to repair, rehabilitate, or replace their natural gas distribution pipeline system or portions thereof, or to acquire equipment needed to (a) reduce incidents and fatalities and
- b. avoid economic losses. Activities allowed will be specified in the grant agreement. Examples of allowable projects: purchase of leak detection equipment, installation of new pipelines or repair and replace leak-prone pipelines.

L. Reporting

1. **Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement –Not Applicable*
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs –Applicable*
- c. *SF-425, Federal Financial Report – Applicable*

3. Special Reporting

Not Applicable.

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L of the 2023 for audit guidance.

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.816 MARITIME ADMINISTRATION MARINE HIGHWAY GRANT PROGRAM

I. PROGRAM OBJECTIVES

The Secretary, in accordance with 46 U.S.C. 55601, established a marine highway transportation grant program to implement projects or components of designated Marine Highway Projects that provide a coordinated and capable alternative to landside transportation or that promote marine highway transportation. The primary goal of the Marine Highway Grant Program (MHP) is to expand the use of the nation's navigable waters to relieve landside congestion, reduce air emissions, and generate other public benefits by increasing the efficiency of the surface transportation system, and Marine Highway Grants will be awarded to further this purpose.

MHP is to develop public-private partnerships and create Marine Highway Projects (services) on Designated Marine Highways. By creating a new mode of transport, the MHP creates options for shippers. Moving freight from highways and railways reduce congestion, emissions, road maintenance, increases resiliency, and provides other public benefits.

II. PROGRAM PROCEDURES

The Marine Highway Program Office (Program Office) follows a three-step approach when supporting investment opportunities for marine highway transportation services. The first step is designation of a Marine Highway Route by the Secretary. The Department accepts Marine Highway Route Designation requests at any time from Route Sponsors. Once a Route is designated, the second step is designation as a Marine Highway Project by the Secretary. Marine Highway Projects represent concepts for new services or expansions of existing marine highway services on designated Marine Highway Routes that use documented vessels and mitigate landside congestion or promote marine highway transportation. United States Maritime Administration (MARAD) announces by notice in the Federal Register open season periods to allow Project Applicants opportunities to submit Marine Highway Project Designation applications. A Project Applicant must receive a Project Designation to then become eligible for Marine Highway Grant funding for that Project, the third step referenced above. Marine Highway Grant funding is provided to successful public and private sector applicants as funds are appropriated by Congress.

The MHP is funded by annual appropriations and in FY 2023 additional funding is provided to fund grant awards under the Infrastructure Investment and Jobs Act. MHP will be implementing priorities set forth in Executive Order 14052, Implementation of the Infrastructure Investment and Jobs Act (86 FR 64335), which are to invest efficiently and equitably, promote the competitiveness of the U.S. economy, improve job opportunities by focusing on high labor standards, strengthen infrastructure resilience to all hazards including climate change, coordinate effectively with State, local, Tribal, and territorial governments, and support the Administration's Justice40 Initiative goal that 40% of the overall benefits from Federal investments in climate and clean energy flow to disadvantaged communities.

Source of Governing Requirements

This program is authorized by [46 USC Chapter 55601](#).

<https://www.maritime.dot.gov/grants-finances/marine-highways/project-designation>

The Marine Highway Module of the Port Planning & Investment Toolkit was created in cooperation with the American Association of Port Authorities (AAPA). The toolkit is intended to provide US ports with a common framework and examples of best practices when planning, evaluating, and funding/financing freight transportation, facility, and other port-related improvement projects. The Marine Highway Module is available at https://www.maritime.dot.gov/sites/marad.dot.gov/files/2020-10/PPIT%20Marine%20Highway%20Module%20Final%20200831_ADA_wappendices.pdf.

Program related questions may be directed to Timothy Pickering, Operations Development Manager at 202-366-0704 (direct), or by e-mail at timothy.pickering@dot.gov.

Questions related to compliance requirements may be directed to Tracey Ford, Director, MARAD, Office of Federal Assistance Education & Engagement at 202-366-0321 (direct), or by e-mail at Tracey.Ford@dot.gov.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N

Y	Y	N	N	N	Y	N	Y	N	Y	N	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

Marine Highway Grants can be made for the development and expansion of port and landside infrastructure and the development and expansion of documented vessels. (46 USC 55601(b) (1) and (3)).

2. *Activities Unallowed*

a. In general, federal funds cannot be expended for:

- (1) equipment, vessels, or improvements for the movement of purely bulk products,
- (2) planning efforts related to marketing studies, and
- (2) costs incurred before the execution of the grant agreement unless such costs are approved in advance. by the MARAD.

B. Allowable Costs/Cost Principles

Costs charged to federal funds under the MHP must comply with the cost principles administered pursuant to the “Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards” found at 2 CFR Part 200, as adopted by the Department at 2 CFR Part 1201. Additionally, all applicable federal laws and regulations will apply to projects that receive Marine Highway Grants and any other requirements or restrictions on the use of federal funding.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Program* -Not Applicable.
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting – Applicable

- a. **Title of Report:** Quarterly Project Progress Report and Recertification
PRA Number: OMB Control No. 2133-0541
Reporting Cycle: The Quarterly Project Progress Reports and Recertifications are to be signed and submitted on or before the 20th day of the first month of each calendar year quarter and until the end of the budget period, the Recipient shall submit to MARAD a Quarterly Project Progress Report and Recertification in the format and with the content described in exhibit section. If the date of this agreement is in the final month of a calendar year quarter, then the Recipient shall submit the first Quarterly Project Progress Report and Recertification in the second calendar year quarter that begins after the date of this agreement.
Authoritative Requirement: See Grant Agreement General Terms and Conditions Article 7 Progress and Financial Reporting and requirements of 2 CFR 200.329 (b).
Blank Copy of the Report: A link to the blank copy of the reporting template is not available. The auditor must request this information from MARAD or the non-federal entity.
Report Instructions: See Exhibit Section of the Grant Agreement. A link to the instructions is not available.
Report Corrections: Reports corrections are to be resubmitted timely to the MARAD contacts listed in the Grant Agreement. In addition, per 2 CFR 200.334 Retention of requirement for records, the non-federal entity is required to maintain all records. The auditor should request copies of the report including those reports resubmitted by the non-federal entity when reviewing this information.

Key Line Item(s)

(1) Exhibit H, 6 (f) Project Cost- Information reported is consistent with financial records obtained in the non-federal entity's financial management system.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions**1. Wage Rate Requirements**

See Part 4, 20.001 Wage Rate Requirements Cross-Cutting Section for audit guidance.

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 20.823 MARITIME ADMINISTRATION – PORT INFRASTRUCTURE DEVELOPMENT PROGRAM

I. PROGRAM OBJECTIVE

Port Infrastructure Development Program (PIDP) was established to make grants to improve port facilities at coastal seaports.

PIDP was established under 46 USC 50302 and amended under the National Defense Authorization Act (NDAA) for Fiscal Year 2022 (Pub. L. 117-81, December 27, 2021), and is now codified at 46 U.S.C. 54301. The statute authorizes the Department of Transportation (“Department” or “DOT”) to establish a port and intermodal improvement program to improve the safety, efficiency, or reliability of the movement of goods through ports and intermodal connections to ports. To carry out a project under this program, the Department may provide financial assistance, including grants, to port authorities or commissions or their subdivisions and agents for port and intermodal infrastructure-related projects.

II. PROGRAM PROCEDURES

PIDP is implementing priorities of Executive Order 14052, Implementation of the Infrastructure Investment and Jobs Act (86 FR 64335). These priorities requires the program to invest efficiently and equitably, promote the competitiveness of the U.S. economy, improve job opportunities by focusing on high labor standards, strengthen infrastructure resilience to all hazards including climate change, coordinate effectively with State, local, Tribal, and territorial governments, and support the Administration’s Justice40 Initiative goal that 40% of the overall benefits from Federal investments in climate and clean energy flow to disadvantaged communities.

PIDP eligible projects must be located either within the boundary of a port, or outside the boundary of a port and directly related to port operations or to an intermodal connection to a port. These projects can be either capital and planning projects, or emission projects.

Grants are awarded to public agencies on approval of applications submitted to the Maritime Administration (MARAD). MARAD monitors the progress of those projects through on-site inspections, telephone contacts, correspondence, quarterly progress and financial status and reports.

Source of Governing Requirements

PIDP Program was established under
[46 USC 54301: Port infrastructure development program \(house.gov\)](#)

[Executive Order 14052, Implementation of the Infrastructure Investment and Jobs Act \(86 FR 64335\)](#)

[Executive Order 14008, Tackling the Climate Crisis at Home and Abroad \(86 FR 7619\)](#)

[Executive Order 13985, Advancing Racial Equity and Support for Underserved Communities Through the Federal Government \(86 FR 7009\)](#)

[Executive Order 14025, Worker Organizing and Empowerment \(86 FR 22829\)](#)

Availability of Other Program Information

<https://www.maritime.dot.gov/ports/port-infrastructure-development-program>

Program related questions may be directed to Robert Bouchard, Director, Office of Port Infrastructure Development, at 202-366-5076 (direct) or by e-mail at Robert.Bouchard@dot.gov.

Questions related to compliance requirements may be directed to Tracey Ford, Director, MARAD, Office of Federal Assistance Education & Engagement at 202-366-0321 (direct) or by e-mail at Tracey.Ford@dot.gov.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.”

A	B	C	E	F	G	H	I	J	L	M	Y
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	Y	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Capital projects used to improve the safety, efficiency, or reliability of: (1) the loading and unloading of goods at the port, such as for marine terminal equipment; (2) the movement of goods into, out of, around, or within a port, such as for highway or rail infrastructure, (3) intermodal facilities, freight intelligent transportation systems, and digital infrastructure systems; operational improvements, including projects to improve port resilience; or environmental and emissions mitigation measures, including projects for— port electrification or electrification master planning; harbor craft or equipment replacements or retrofits; development of port or terminal microgrids; provision of idling reduction infrastructure; purchase of cargo handling equipment and related infrastructure; worker training to support electrification technology; installation of port bunkering facilities from ocean-going vessels for fuels; electric vehicle charging or hydrogen refueling infrastructure for drayage and medium or heavy-duty trucks and locomotives that service the port and related grid upgrades; or other related port activities, including charging infrastructure, electric rubber-tired gantry cranes, and anti-idling technologies.
- b. Planning projects used for developmental phase activities (such as planning, feasibility analysis, revenue forecasting, environmental review, permitting, and preliminary engineering and design work), in addition to port planning activities such as development of master plans, electrification master planning, and planning to address a port's ability to withstand probable occurrence or recurrence of an emergency or major disaster; however, DOT seeks projects that propose to move into the construction phase within the grant's period of performance.
- c. Projects used for emission mitigation measures that provide for the use of shore power for vessels to which sections 46 USC 3507 and 46 USC 3508 apply, if such grants meet the other requirements set out in this notice.

2. *Activities Unallowed*

- a. In general, federal funds cannot be expended for:
 - (1) Construction, reconstruction, recondition, recording, or purchase of a vessel, unless the Secretary determines such vessel is necessary for a project that possess environmental and emission measures (See FY 2022 NOFO - Section C.3.a.(IV)) and is not already receiving assistance under 46 U.S.C. chapter 537. In addition, the program will not fund any project within a small shipyard (as defined in 46 U.S.C. 54101).

- (2) Improvements to Federally owned facilities are ineligible under the FY 2022 funding.
- (3) As required by Section 3501 of the NDAA, this program will not fund the purchase or installation of fully automated cargo handling equipment or the installation of terminal infrastructure that is designed for fully automated cargo handling equipment, if the Secretary determined such equipment would result in a net loss of good jobs or reduction in the quality of jobs within the port or port terminal.
- (4) Improvements for the movement of purely bulk products,
- (5) Planning efforts related to marketing studies,
- (6) Costs incurred before the execution of the grant agreement unless such costs are approved in advance.

B. Allowable Costs/Cost Principles

Costs charged to federal funds under PIDP must comply with the cost principles administered pursuant to the “Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards” found at 2 CFR Part 200, as adopted by the Department at 2 CFR Part 1201.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Program* -Not Applicable.
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting –

- a. **Title of Report:** Quarterly Project Progress Report and Recertifications
PRA Number: OMB Control No. 2133-0552
Reporting Cycle: The Quarterly Project Progress Reports and Recertifications are to be signed and submitted on or before the 20th day of the first month of each calendar year quarter and until the end of the budget period, the Recipient shall submit to MARAD a Quarterly Project Progress Report and Recertification in the format and with the content described in exhibit section. If

the date of this agreement is in the final month of a calendar year quarter, then the Recipient shall submit the first Quarterly Project Progress Report and Recertification in the second calendar year quarter that begins after the date of this agreement.

Authoritative Requirement: See Grant Agreement General Terms and Conditions Article 6 General Reporting and requirements of 2 CFR 200.329 (b).

Blank Copy of the Report: A link to the blank copy of the reporting template is not available. The auditor must request this information from MARAD or the non-federal entity.

Report Instructions See Exhibit Section of the Grant Agreement. No link can be provided.

Report Corrections: Reports corrections are to be resubmitted timely to the MARAD contacts listed in the Grant Agreement. In addition, per 2 CFR 200.334 Retention of requirement for records, the non-federal entity is required to maintain all records. The auditor should request copies of the report including those reports resubmitted by the non-federal entity when reviewing this information.

Key Line Item(s)

(1) Exhibit D, 2 (f) Project Cost- Information reported is consistent with financial records obtained in the non-federal entity's financial management system.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

See Part 4, 20.001 Wage Rate Requirements Cross-Cutting Section for audit guidance.

DEPARTMENT OF TRANSPORTATION

ASSISTANCE LISTING 23.003 APPALACHIAN DEVELOPMENT HIGHWAY SYSTEM

I. PROGRAM OBJECTIVES

The purpose of the Federal-Aid Highway Program is to assist the states in providing for construction, preservation, and improvement of highways and bridges on eligible Federal-Aid routes, (including the National Highway System (NHS) - an integrated, interconnected transportation system important to interstate commerce and travel), and for other special purpose programs and projects. This program also provides for the construction and improvement of highways in the District of Columbia, Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands and the U.S. Virgin Islands. The Infrastructure Investment and Jobs Act (IIJA) also known as the Bipartisan Infrastructure Law (BIL) is a once-in-a-generation investment in infrastructure that will help grow the economy, enhance U.S. competitiveness, create jobs, and build safe, resilient, and equitable transportation future. It was determined that dividing the Highway Planning and Construction Cluster into separate compliance supplements would be more beneficial for auditing purposes. The IIJA includes additional complex requirements that would affect the single audit since each program has unique requirements. BIL provides the basis for the Federal Highway Administration (FHWA) programs and activities through September 30, 2026. It makes an investment of \$350 billion in highway programs. This includes the largest dedicated bridge investment since the construction of the Interstate Highway System. New programs under the BIL focus on key infrastructure priorities including rehabilitating bridges in critical need of repair, reducing carbon emissions, increasing system resilience, removing barriers to connecting communities, and improving mobility and access to economic opportunity. BIL also continues to focus the program on safety and performance-based investment and on accelerating project delivery through expedited environmental review and elimination of duplicate processes.

II. PROGRAM PROCEDURES

Prior to fiscal year (FY) 2013, the Appalachian Development Highway System (ADHS) was a cost-to-complete program (i.e., funding was provided over time to complete the approved initial construction/upgrading of the system) authorized by Section 201 of the Appalachian Regional Development Act of 1965. The Moving Ahead for Progress in the 21st Century Act (MAP-21) (Pub. L. No. 112-141) did not provide dedicated funding for the ADHS but did make ADHS activities eligible under the NHPP and STBG programs. The Fixing America's Surface Transportation (FAST) Act (Pub. L. No. 114-94) provided states through FY 2050 the authority to select a state share of up to 100 percent for the cost of constructing highways and access roads on the ADHS. The Appalachian Regional Commission (ARC) has programmatic oversight responsibilities, which include approval of the location of the corridors and of state-generated estimates of the cost to complete the ADHS. The FHWA has project-level oversight responsibilities for the ADHS program. If the location, scope, and character of proposed ADHS projects are in agreement with the latest approved cost-to-complete estimate and all state requirements have been satisfied, FHWA authorizes the work with the ADHS, STBG, and/or NHPP funds. FHWA provides oversight for the design and construction of the ADHS (23 USC 106(g)(5)(B)).

Source of Governing Requirements

The primary sources of program requirements for highway construction projects are 23 USC (Highways). Implementing regulations are found in 23 CFR (Highways) and 49 CFR (Transportation). The ADHS program requirements are found in 40 U.S.C. 14322, 14523, 14524, and 14525.

Availability of Other Program Information

FHWA program laws, regulations, and other general information can be found at <http://www.fhwa.dot.gov/>, Bipartisan Infrastructure Law, Legislation, Regulations and Guidance - Resources | Federal Highway Administration (dot.gov).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N”. See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	Y	Y	N	Y	N	N	Y	Y

A. Activities Allowed or Unallowed

ADHS funds may be used only for work included in the ADHS cost estimate approved by the ARC. The project will improve, on a continuing rather than a temporary basis, the opportunities for employment, the average level of income, or the economic and social

development of the area served by the project. A project must implement the Development Plan of the Appalachian State in which it is located, and it must have been identified by the state in its annual Strategy Statement (Sections 225 and 303). ARC grants that are administered for the Commission by a basic federal agency must also meet the applicable requirements of that agency.

F. Equipment and Real Property Management

For equipment, States will use State procedures in accordance with 2 CFR 200.313.

The state and LPA subrecipients shall charge at a minimum, fair market value for the sale, use, lease, or lease renewal of real property acquired with federal funds. Tribal governments are not subject to 23 USC 156 and fall under tribal self-governance provisions and 2 CFR Part 200.

Replacement of Publicly Owned Real Property

Federal funds may be used to reimburse the reasonable costs actually incurred for the functional replacement of publicly owned and publicly used real property provided that FHWA concurs that it is in the public interest. The cost of increases in capacity and other betterments are not eligible except (1) if necessary to replace utilities; (2) to meet legal, regulatory, or similar requirements; or (3) to meet reasonable prevailing standards for the type of facility being replaced (23 CFR section 710.509).

G. Matching, Level of Effort, Earmarking

1. Matching

- a. In general, the Commission expects a recipient of an ARC grant to contribute its own resources to a project to the extent it is able to do so and to seek additional non-ARC funding assistance in a diligent manner. The Appalachian Regional Development Act imposes matching requirements on ARC grants. In addition to these statutory match requirements, however, the individual Appalachian States set forth in their Annual Strategy Statements their own cost sharing and matching requirements, which may be more restrictive than the statutory limits in a particular instance.
- b. Generally, ARC grants are limited to 50% of project costs. For projects in ARC-designated distressed counties, this limit can be raised to 80%. For projects in ARC-designated at-risk counties, this limit can be raised to 70%. For projects located in ARC-designated competitive counties (those that are approaching national economic norms), funding is usually limited to 30% of project costs. ARC funding is usually not available for projects located in ARC-designated attainment counties (those that have attained or exceeded national economic norms).

- c. Local Development District (LDD) administrative grants may be funded at 50%, wherever the LDD is physically located, except that a state may request that the ARC participation be raised to as much as 75% for an LDD that includes a distressed county or counties within its service area and 70% for an LDD that includes an at-risk county or counties within its service area.
- d. The restrictions on projects in competitive and attainment counties may be waived by the Commission upon a showing of (1) the existence of a significant pocket of distress in the part of the county in which the project is carried out or (2) the existence of a significant potential benefit from the project in one or more areas of the region outside the designated economically strong county in which the project is carried out. Waiver requests are made by the State Alternate representing the potential grantee, and such requests must be approved by the Federal Co- Chairman and State Alternates.
- e. Special matching rules apply to projects that are carried out in more than one county. If there is a distressed county in a project and at least half the counties are distressed, the project may be funded at up to 80% of project costs. If at least half the counties are in some combination of distressed and at-risk, ARC assistance can be the higher of 70% of project costs or the average percentage applicable to the various counties in the project. If fewer than half the counties are distressed, ARC assistance can be the higher of 50% of project costs or the average percentage applicable to the various counties in the project. If there is no competitive county or attainment county in a project, and at least half the counties are at-risk, the project may be funded at up to 70% of project costs. All other projects shall be funded at the average percentage applicable to the various counties in the project; except that the portion of a project, which is attributable to an attainment county in a project not including a distressed county, shall be considered ineligible for ARC assistance and may not be considered for matching purposes.
- f. A limited amount of discretionary authority is made available to the Commission under Section 302 of the ARDA (40 U.S.C. 14321). Annually, the Commission allocates this authority to the Co-Chairmen's Committee and among the Appalachian States. The authority can be used to raise the statutory limits on ARC funding in projects implementing special regional initiatives approved by the Commission. It can also be used, with the approval of the Co-Chairmen's Committee, in instances of emergency economic distress. The discretionary authority, however, cannot be used to eliminate the funding restrictions on projects in competitive and attainment counties.
- g. Donations of funds, materials, and services by a person or local government may be credited towards a recipient's matching share.

Donated materials and services must meet the eligibility requirements of the project 2 CFR 200.306.

- h. The value of land provided by recipients or subrecipients for highway purposes is eligible for a credit towards the non-Federal share of project costs. The value of the donated land shall not include any increase or decrease in value of donated land caused by the project. The value of donated land shall be based on the fair market value of the land, established as of the earlier of (1) the date on which the donation becomes effective, or (2) the date on which equitable title to the land vests in the State.

2. **Level of Effort** – Not Applicable

3. **Earmarking** – Not Applicable

I. **Procurement and Suspension and Debarment**

Administration of Contracts for Construction

In general, recipients and subrecipients must award construction contracts on the basis of the lowest responsive bid submitted by a bidder meeting the contracting agency's criteria for responsibility. Competitive bidding is required unless the contracting agency is able to demonstrate that some other method is more cost effective or that an emergency exists.

For construction contracts, bidding documents must be advertised for at least three weeks, unless a shorter period is justified in the project files. Recipients may not negotiate with the potential contractors during the time between bid opening and contract award (such negotiations would be noted in the contract files). Awards must be made to the lowest responsible bidder. If the award was made to a bidder other than the low bidder, then the project files must contain justification.

N. **Special Tests and Provisions**

1. **Wage Rate Requirements**

See Part 4, 20.001 Wage Rate Requirements Cross-Cutting Section.

2. **Quality Assurance Program**

Compliance Requirements A State DOT or LPA must have a quality assurance (QA) program, approved by FHWA, for construction projects on the NHS to ensure that materials and workmanship conform to approved plans and specifications. Verification sampling must be performed by qualified testing personnel employed by the State DOT, or by its designated agent, excluding the contractor (23 CFR sections 637.201, 637.205, 637.207, and 637.209).

Audit Objectives Determine whether the recipient or subrecipient are following a QA program approved by FHWA.

Suggested Audit Procedures

- a. Obtain an understanding of the recipient's QA program.
- b. Verify that the QA program has been approved by FHWA.
- c. Review documentation of test results on a sample basis to verify that proper tests are being taken in accordance with the QA program.
- d. Verify that verification sampling activities are performed by qualified testing personnel employed by the agency, or by its designated agent, excluding the contractor.

3. Contractor Recoveries

Compliance Requirements When a State recovers funds from highway contractors for project overcharges due to bid-rigging, fraud, or anti-trust violations or otherwise recovers compensatory damages, the state-aid project involved shall be credited with the state share of such recoveries (Tennessee v. Dole 749 F.2d 331 (6th Cir. 1984); 57 Comp. Gen. 577 (1978); 47 Comp. Gen. 309 (1967)).

Audit Objectives Determine whether the proper credit was made to the state share of a project when recoveries of funds are made.

Suggested Audit Procedures

- a. Determine the extent to which the state has recovered overcharges and other compensatory damages on state-aid projects through appropriate interviews and a review of legal, claim, and cash receipt records.
- b. Review a sample of cash receipts and verify that appropriate credit is reflected in billings to the federal government.

4. Value Engineering

Compliance Requirements Recipients are required to establish a value engineering (VE) program and ensure that a VE analysis is performed on all applicable highway construction projects. The program should include procedures to approve or reject recommendations and for monitoring to ensure that resulting, approved recommendations are incorporated into the plans, specifications, and estimate. Applicable projects are (a) projects located on the NHS with an estimated total project cost of \$50 million or more that utilize federal highway program funding; (b) bridge projects located on the NHS with an estimated total cost of \$40 million or more that utilize federal highway program funding; and (c) any other projects that the FHWA determines to be appropriate. Projects utilizing the design-build method of construction do not require a VE analysis (23 USC

106(e)(5)). Critical elements of VE programs include identification of a state VE coordinator; establishment of a VE policy, and documented VE procedures, including requirements to identify applicable projects, verify required VE analyses are completed on State DOT and subrecipient projects; and monitor, assess, and report on the performance of the VE program (23 USC 106(e); 23 CFR Part 627).

Audit Objectives Determine whether established VE programs include VE policies and procedures, documented analyses conducted for applicable projects, evaluations of VE recommendations, and incorporation of approved recommendations into the plans, specifications, and estimate for the project.

Suggested Audit Procedures

- a. Verify that the State DOT established a VE program in accordance with state requirements.
- b. Review a sample of applicable projects to ensure that a VE analysis was conducted, recommendations were evaluated, and approved recommendations were incorporated into the design of the project, and that the results of the analysis and recommendations implemented were documented in accordance with the established VE program's policies and procedures.

5. Utilities

Compliance Requirements Recipients are required to develop policies and procedures pertaining to the use, accommodation and/or relocation of public and private utility facilities on highway rights-of way. Recipients are required to develop, maintain, and obtain FHWA approval of their Utility Accommodation Policy (UAP) (23 CFR section 645.215). Expenses incurred for relocating utility facilities necessitated by highway construction projects using federal highway program funds are eligible for reimbursement from FHWA provided these costs were incurred in a manner consistent with state laws or FHWA regulations, whichever is more restrictive (23 CFR section 645.103(d)).

Plan, specification and estimate (PS&E) packages for projects must have a utility agreement or statement verifying the appropriate coordination with all utilities on the project occurred prior to FHWA construction authorization. Each agreement or statement should specify that the utility use and occupancy of the right-of-way or any required utility work will be completed prior to the highway construction, or there were conditions specified allowing for the utility work to be coordinated with and completed in coordination with the highway construction schedule (23 CFR section 635.309(b)).

Utility agreements, permits, and supporting documentation define the conditions and provisions for accomplishing and reimbursing utility companies for utility relocation work that was required due to a federal highway program funded project. The agreements and supporting documentation, and the state requirements they reference, require that:

- a. There must be itemized cost estimates for the proposed utility work (23 CFR section 645.113(c));

- b. The utility agreement was approved prior to the utility incurring any costs or conducting any work that would be eligible for reimbursement (23 CFR section 645.113(g)(3));
- c. Reimbursement of utility costs will occur after the work is completed (23 CFR section 645.107(a));
- d. The utility incurred the costs and billings submitted verifying the work was completed in accordance with the utility agreement (23 CFR section 645.113(a-f) and 23 CFR section 645.117); and
- e. Billed costs were eligible for reimbursement (23 CFR section 645.117).

Audit Objectives Determine whether the agreements, supporting documentation, and reimbursement for the adjustment and/or relocation of utility facilities on state-aid highway projects were accomplished in a manner which complies with state laws and FHWA regulations.

Suggested Audit Procedures

- a. Verify that the State DOT has a current UAP approved by FHWA.
- b. Review a sample of PS&E packages on projects using federal highway program funds to verify that there is a utility agreement or statement confirming that the appropriate coordination with all utilities on the project has occurred prior to FHWA construction authorization.
- c. Review a sample of utility agreements and supporting documentation to verify required supporting material was prepared and that costs reimbursed met the requirements of the agreements.

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.011 COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS CAPITAL MAGNET FUND

I. PROGRAM OBJECTIVES

The Capital Magnet Fund (CMF) is administered by the Community Development Financial Institutions Fund (CDFI Fund). Through the CMF, the CDFI Fund provides financial assistance (FA) grants to Community Development Financial Institutions (CDFIs) and to qualified Nonprofit Organizations that have the development or management of affordable housing as one of their principal purposes. Capital Magnet Fund Applicants must be (1) a certified CDFI; or (2) a non-profit organization operating with a principal purpose of developing or managing affordable housing solutions

II. PROGRAM PROCEDURES

A. Overview

CMF is a competitive grant program established to “attract private capital for and increase investment in (1) the development, preservation, rehabilitation, or purchase of affordable housing for primarily extremely low-, very low-, and low-income families; and (2) economic development activities, or community service facilities, such as day care centers, workforce development centers, and health care clinics, which in conjunction with affordable housing activities implement a concerted strategy to stabilize or revitalize a low-income area or underserved rural area.”

B. Subprograms/Program Elements

CMF provides Awards through a competitive application, evaluation, and selection process. After selection, each CMF Award Recipient enters into an Assistance Agreement, which includes Performance Goals and other Terms and Conditions.

Source of Governing Requirements

CMF was established through the Housing and Economic Recovery Act of 2008 Pub. L. No 110-289 (July 30, 2008) codified at 12 CFR Part 1807.

Availability of Other Program Information

Additional information on the CMF is available on the CDFI Fund website at <https://www.cdfifund.gov/programs-training/programs/cmf>. A template of the assistance agreement is available on the CDFI Fund website at: <https://www.cdfifund.gov/programs-training/programs/cmf/closing-disbursement-step>. If there are specific questions regarding the programs, the CDFI Fund may be contacted via telephone at (202) 653-0421 or by e-mail at cdfihelp@cdfi.treas.gov.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program and the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See Part 1, “Safe Harbor Status” for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or	Allowable Costs/Cost	Cash Manageme	Eligibility	Equipment and	Matching, Level of	Period Of	Procurement and	Program Income	Reporting	Subrecipien	Special Tests and
Y	N	N	Y	N	N	Y	N	Y	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Section 3.2 of the terms and conditions in the assistance agreement prescribes the specific authorized activities for CMF award Recipients. A link to the Assistance Agreement can be found under the Availability of Other Program Information section. (12 CFR sections 1807.300 and 1807.301).

E. Eligibility

1. Eligibility for Individuals

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

The CMF assistance agreement identifies a Service Area, or the geographic area approved by the CDFI Fund, in which the Recipient must use the CMF Award. The states listed in the geographic areas table in Schedule 1 of the assistance agreement comprise the allowable geographic areas for the location of Affordable

Housing and/or Community Service Facilities/physical structures resulting from the Recipient's Affordable Housing Activities and/or Economic Development Activities. Recipient shall use no less than 85% of its CMF Award to finance and/or support Affordable Housing Activities and/or Economic Development Activities resulting in Affordable Housing and/or Community Service Facilities/physical structures, financed and/or supported with the CMF Award, that are located in its Service Area.

3. Eligibility for Subrecipients

The Recipient shall not distribute the CMF Award to any Affiliate or Subsidiary, or distribute the CMF Award in any manner that would create a Subrecipient relationship (as defined in the Uniform Administrative Requirements), without the CDFI Fund's prior written consent.

H. Period of Performance

The CMF Period of Performance begins with the Announcement Date and continues until the end of the Affordability Period of the last Project funded by the Recipient under the CMF assistance agreement, when all the conditions in Section 9.11 of the CMF assistance agreement have been met, or such other time established by the CDFI Fund in writing.

The Period of Performance consists of an Investment Period and an Affordability Period. The Investment Period begins with the Effective Date in the assistance agreement and ends no earlier than the fifth year anniversary of the Effective Date, or such other period as may be established in writing by the CDFI Fund. The authoritative requirement for the period of performance is codified in 12 CFR 1807.902.

The following is critical information:

1. **Commitment Date(s):** The Recipient shall have committed for use all of its CMF Award by no later than the applicable date(s) set forth in Schedule 1 of the assistance agreement.
2. **Initial Disbursement Date:** Three (3) years after the Effective Date of the assistance agreement, the Recipient shall make an initial disbursement of its CMF Award to at least one Affordable Housing or Economic Development Activity Project.
3. **Project Completion Date:** Five (5) years after the Effective Date of the assistance agreement, unless otherwise determined in writing by the CDFI Fund, the Recipient shall achieve Project Completion with respect to all Projects financed/supported by its entire CMF Award.

J. Program Income

Program Income authorized uses, restrictions and requirements for reinvestment are described under Sections 3.8 and 3.9 of the assistance agreement. The CMF program income follows the addition method for program income. Principal and equity repayments of the CMF Award earned during the Investment Period must be reinvested by the Recipient. Program Income generated from earned interest on the CMF Award must be used by the Recipient solely to further the objectives of its mission. Program Income that is returned and made available to the Recipient due to CMF Award becoming unrestricted from Loan Loss Reserves or Loan Guarantees shall be deemed to be Program Income earned in the form of principal and equity repayments of the CMF Award.

Program Income requirements and/or timeframes differ between award years. Starting with the 2017 award year, Schedule 1 of the assistance agreement indicates Section 3.8(a) or (b) as applicable. Generally, however, if the Recipient ends a fiscal year with a principal and equity repayment Program Income balance of \$100,000 or greater, requirements to reinvest Program Income are triggered.

The following is critical information:

1. The Recipient must have committed any amount in excess of the \$100,000 threshold within 12 months of the end of the Recipient's fiscal year in which the \$100,000 balance was achieved; and
2. The Recipient must have completed any projects supported with Program Income within 36 months from the time the Program Income was omitted to the Project.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Performance Progress Report (PPR) (OMB Control Number 1559-0036) – The Recipient must submit a Performance Progress Report (PPR) in the Awards Management Information System (AMIS) database once a year, three (3) months after the Recipient's Period of Performance End Date. The PPR is used to report on the Recipient's use of the CMF Award towards meeting its Performance Goals, affordable housing outcomes, and the Recipient's overall performance. The CMF performance report covers: the Investment Period for the CMF Award

and the Affordability Period for each Project. Please review Schedule 1-C in the Assistance Agreement for information regarding the due dates for the report. . The authoritative requirement for submission of the PPR is codified in 12 CFR 1807.902.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the PPR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the PPR in AMIS to determine the report approval status. The auditor will review the most recent version of the report in the AMIS.

Key Line Items - The following line items contain critical information:

1. *Total Amount Committed to Date* - Recipients must commit the entirety of the CMF Award by the stated Commitment Deadline as stipulated under Section 3 of the assistance agreement.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.012 NATIVE INITIATIVES PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Native Initiatives Program also referred to as the Native American Community Development Financial Institutions Program (NACA Program) is to promote economic revitalization and community development through financial and technical assistance to Native Community Development Financial Institutions (CDFIs)..

II. PROGRAM PROCEDURES

A. Overview

The NACA Program is administered by the Community Development Financial Institutions Fund (CDFI Fund), Department of the Treasury. Through the NACA Program, the CDFI Fund provides two types of monetary awards to CDFIs—financial assistance (FA) awards and technical assistance (TA) awards. In order to be eligible to apply for assistance, entities must meet, or propose to meet, specific CDFI eligibility criteria (12 CFR sections 1805.200 and 1805.201). CDFIs include entities such as banks, credit unions, depository institution holding companies, loan funds, and venture capital funds, among others.

An organization must be a Certified CDFI as of the date of the Notice of Funds Availability (NOFA). At least 50% of the organization's activities must serve Native Americans, Alaska Natives, and/or Native Hawaiian communities in order to be eligible to apply for a FA award through the NACA Program. Organizations that are Emerging CDFIs or Sponsoring Entities may only apply for a TA award through the NACA Program and are not required to be certified as a CDFI to be eligible for a TA award.

Through the Native American CDFI Assistance Program (NACA Program), FA awards are made to Native CDFIs. These competitive awards are made in the form of loans, grants, equity investments, deposits, and credit union shares. By multiplying the impact of federal investment, Native CDFIs are able to pursue a variety of goals, from small business creation to affordable housing development, as well as other community development pursuits. Healthy Food Financing Initiative – FA awards are also offered for Native CDFIs that are interested in expanding their healthy food financing activities.

The NACA Program also provides TA awards to Native CDFIs, Emerging Native CDFIs, and Sponsoring Entities. These competitive awards are made in the form of grants.

Recipients may use TA awards to increase their capacity to serve their communities and/or to create, or become Certified CDFIs.

B. Subprograms/Program Elements

The CDFI Fund provides FA and TA awards through the NACA Program to help certified and emerging Native CDFIs sustain and expand their services, and build their technical capacity. FA and TA awards are provided through an annual competitive nationwide evaluation and selection process as referenced in the NOFA. The latest version of the NACA Program NOFA can be found on the CDFI Fund website at: <https://www.cdfifund.gov/programs-training/programs/native-initiatives/apply-step>.

After selection, each NACA Program award Recipient enters into an assistance agreement, which includes Performance Goals and Measures (PG&Ms) and other terms and conditions. A template of the assistance agreement can be found on the CDFI Fund website at https://www.cdfifund.gov/sites/cdfi/files/2022-01/FY2021_CDFIProgram_NACAProgram_FA_Assistance_Agreement_Template.pdf

Source of Governing Requirements

The NACA Program is authorized by the Community Development Banking and Financial Institutions Act of 1994 (Section 101 of Pub. L. No. 103-325, 108 Stat 2164, September 23, 1994.). The NACA Program implementing regulations are codified at 12 CFR Part 1805.

Note: All capitalized terms used herein but not defined have such definitions as specified in the [CDFI Program's Interim Rule](#), NOFA, or applicable assistance agreement.

Availability of Other Program Information

Additional information on the NACA Program is available on the CDFI Fund website at <https://www.cdfifund.gov/programs-training/programs/native-initiatives/compliance-step>. A template of the Assistance Agreement is available on the CDFI Fund website at https://www.cdfifund.gov/sites/cdfi/files/2022-01/FY2021_CDFIProgram_NACAProgram_FA_Assistance_Agreement_Template.pdf. If there are specific questions regarding the programs, the CDFI Fund may be contacted via telephone at (202) 653-0421 or by e-mail at cdfihelp@cdfi.treas.gov.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program

supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	N	N	Y	N	N

A. Activities Allowed or Unallowed

Section 3.7 of the terms and conditions in the assistance agreement prescribes the specific authorized activities of FA awards for each NACA Program award Recipient (12 CFR sections 1805.300 and 1805.301).

1. *Activities Allowed*

a. Financial Assistance- The Recipient must use the Financial Assistance (including Base-FA, HFFI-FA, DF-FA, and PPCFA) to support its activities in the following areas:

- (1) Financial Products (provided, however, HFFI-FA may not be used to fund loan purchases, loan refinancing, or any type of financing for prepared food outlets).
- (2) Financial Services (Regulated Institutions only; HFFI-FA may not be used to provide Financial Services).
- (3) Development Services.
- (4) Loan Loss Reserves.
- (5) Capital Reserves (Regulated Institutions only; DF-FA may not be used for Capital Reserves).
- (6) Direct Administrative Expenses.

- b. Technical Assistance - The Recipient must use the Technical Assistance to support activities in the following areas:
 - (1) Compensation (Personal Services);
 - (2) Compensation (Fringe);
 - (3) Training and Education;
 - (4) Travel;
 - (5) Professional Services;
 - (6) Equipment;
 - (7) Supplies; and
 - (8) Incorporation costs (Sponsoring Entities only).
2. *Activities Unallowed*
 - a. NACA Program Award Recipients may not distribute assistance to an affiliate or subsidiary without the prior consent of the CDFI Fund (12 CFR section 1805.302(b)).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Performance Progress Report (PPR) (OMB Control Number 1559-0036) – (12 CFR 1805) - Recipients submit the PPR in the Awards Management Information System (AMIS) database once a year, three (3) months after the Recipient's Period of Performance End Date. The PPR is used to determine if the Recipient is in compliance with the applicable Performance Goals and Measures in its Assistance Agreement. The PG&Ms are specific to each Recipients assistance agreement. Additional guidance for completing the compliance reports is available on the NACA Program on the [Compliance Resources and Reporting section](#) page in the [Annual Compliance Reports Performance Progress Report \(PPR\) and Financial Audit Statement Data Points](#) document starting on page 2.

The Recipient has the ability to print copies of the PPR from its AMIS account if needed by the Auditor. The authoritative requirement for submission of the PPR is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the PPR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the PPR in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS

Key Line Items - The following line item contains critical information (items not numbered in the report):

1. *Performance Goals and Measures (PG&M)* - The PG&M’s identified are specific to each Recipient’s assistance agreement and generally only include 2-3 PG&Ms. The data reported for the Period of Performance for each required PG&M should meet or exceed the required benchmarks as outlined in the assistance agreement.

Transaction Level Report (TLR) and Consumer Loan Report (CLR) (OMB Control Number 1559-0027) – The TLR is applicable to FA Award Recipients only. The CLR is applicable to banks and credit unions who are FA Award Recipients that originated consumer loans during the Period of Performance. Both reports are due 180 days after the Recipient’s Period of Performance End Date. The reports are used to collect compliance and performance data and provide transactional information on an organization’s portfolio. The reports require reporting on newly originated loans and investments closed as of a Recipient’s fiscal year end. The guidance for completing the reports can be found in the [CDFI TLR Data Point Guidance](#) available on the CDFI Fund website. Auditors should request copies of the TLR from the Recipient’s AMIS account. The authoritative requirement for submission of the TLR/CLR is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the TLR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the TLR in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS

Key Line Items- The following line items contain critical information for the TLR:

1. *Column C - TLR Submission Year* - Submission year is the current data year.
2. *Column D - Date Originated* - Reporting date is within the reporting period.
3. *Column E* - Original Loan/Investment Amount
4. *Column I* - Interest Rate.
5. *Column K* - Points.
6. *Column L* - Origination Fees.
7. *Column O* - Term.
8. *Column AH* - Annual Gross Revenue from Business Operations at Time of Loan/Investment Origination.

Key Line Items - The following line items contain critical information for the CLR:

1. *Column E* - Total Originated Amount –Reported amount is accurate and the ratio of the total amount and the total number is equal to 1.
2. *Column F* - Total Originated Number – Reported number is accurate and the ratio of the total amount and the total number is equal to 1.
3. *Column B* - Fiscal Year – Reported value is equal to the value of the current data year.

Uses of Award Report (UOA) (OMB Control Number 1559-0032) – Recipients submit the UOA in the AMIS database once a year, three (3) months after the Recipients Period of Performance End Date. Additional guidance for completing the compliance reports is available on the NACA Program website on the [Compliance Resources and Reporting](#) section page in the [Uses of Award \(UOA\) Report Data Points Description and Related Guidance and Financial Audit Statement Data Points](#) document starting on page 2. The authoritative requirement for submission of the UOA is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the UOA has been unlocked for revisions the Recipient has five (5) business days to

make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the UOA in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS

Key Line Items - The following line items contain critical information (items not numbered in the report):

1. *Advances of FA Funds held in interest-bearing accounts.*
2. *Amount of Interest earned.*
3. *Interest earned in excess of \$500 has been remitted to the Department of Health & Human Services.*
4. *Category of Activity - Total Dollar Amount* – The total dollar amount of the activity expended during the Period of Performance.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

Recipients that received assistance in the form of a loan are required to submit both performance and financial reports for the Period of Performance designated in the assistance agreement. However, this does not relieve the borrower of the requirement to file financial reports on these loans or otherwise comply with program requirements until the loan is repaid to the CDFI Fund.

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.015 RESOURCES AND ECOSYSTEMS SUSTAINABILITY, TOURIST OPPORTUNITIES, AND REVIVED ECONOMIES OF THE GULF COAST STATES (Gulf RESTORE)

I. PROGRAM OBJECTIVES

The objectives of the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012 (RESTORE Act) programs are to restore and protect the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, coastal wetlands, and economy of the Gulf Coast Region.

II. PROGRAM PROCEDURES

The RESTORE Act established the Gulf Coast Restoration Trust Fund (Trust Fund) to hold 80 percent of the administrative and civil penalties paid by parties responsible for the Deepwater Horizon oil spill after July 6, 2012, plus interest on investments. Amounts in the Trust Fund are allocated among the five grant programs: Direct Component, Comprehensive Plan Component, Spill Impact Component, the National Oceanic and Atmospheric Administration RESTORE Act Science Program, and a Centers of Excellence Research Grants Program. The Department of the Treasury (Treasury) is responsible for administering the Direct Component and the Centers of Excellence Research Grants Program.

Through the Direct Component, Treasury makes grants for ecological and economic restoration of the Gulf Coast Region. Thirty-five (35) percent of the penalties paid into the Trust Fund is used for grants to support eligible activities proposed by the states of Alabama, Louisiana, Mississippi, and Texas; the Florida counties of Bay, Charlotte, Citrus, Collier, Dixie, Escambia, Franklin, Gulf, Hernando, Hillsborough, Jefferson, Lee, Levy, Manatee, Monroe, Okaloosa, Pasco, Pinellas, Santa Rosa, Sarasota, Taylor, Wakulla, and Walton; and the Louisiana Coastal Zone parishes of Ascension, Assumption, Calcasieu, Cameron, Iberia, Jefferson, Lafourche, Livingston, Orleans, Plaquemines, St. Bernard, St. Charles, St. James, St. John the Baptist, St. Martin, St. Mary, St. Tammany, Tangipahoa, Terrebonne, and Vermilion. Each state, county, and parish has a defined share of the amount of the Direct Component. Recipients may choose to make subawards to complete eligible activities if approved by Treasury.

Through the Centers of Excellence Research Grants program, Treasury awards grants to the five Gulf Coast states (Alabama, Florida, Louisiana, Mississippi, and Texas) for the establishment of Centers of Excellence focused on science, technology, and monitoring in at least one of five disciplines listed in the RESTORE Act. The states select these Centers through a competitive process and fund the research work through subawards. Each state has an equal share of the Centers of Excellence Research Grants Program trust fund allocation.

This Compliance Supplement covers only Treasury's grants to the states, counties, and parishes under the Direct Component and grants to states under the Centers of Excellence Research Grants Program, which, at the state recipient level does not include research activity. However, subawards under the Centers of Excellence Research Grants Program will be audited as part of the R&D Cluster in Part 5 of the Supplement.

Source of Governing Requirements

The primary sources of requirements for the programs are the RESTORE Act (Subtitle F of Pub. L. No. 121-141), (33 USC 1321(t) and 33 USC 1321 note), and Treasury’s implementing regulations at 31 CFR Part 34.

RESTORE Act statute: <https://www.govinfo.gov/content/pkg/BILLS-112hr4348enr/pdf/BILLS-112hr4348enr.pdf> (See pages 184 - 203)

This document details information that is contained in the authorizing statute.

33 USC 1321: <https://www.govinfo.gov/content/pkg/USCODE-2011-title33/pdf/USCODE-2011-title33-chap26-subchapIII-sec1321.pdf> (See pages 1 - 21)

This document provides the definitions associated with RESTORE Act programs.

31 CFR Part 34: <https://www.govinfo.gov/content/pkg/CFR-2022-title31-voll1/pdf/CFR-2022-title31-voll1-part34.pdf> (See page 1 - 17)

This document provides the implementing regulations for RESTORE Act programs.

Availability of Other Program Information

Other program information regarding grants under the RESTORE Act is available at the Treasury’s website at <https://home.treasury.gov/policy-issues/financial-markets-financial-institutions-and-fiscal-service/restore-act>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	N	Y	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed in the Direct Component*

All activities must be included in, and conform to, the description in the recipient's grant agreement, and may include the following:

- a. Restoration and protection of the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, and coastal wetlands of the Gulf Coast Region;
- b. Mitigation of damage to fish, wildlife, and natural resources;
- c. Implementation of a federally-approved marine, coastal, or comprehensive conservation management plan, including fisheries monitoring;
- d. Workforce development and job creation;
- e. Improvements to or on state parks located in coastal areas affected by the Deepwater Horizon oil spill;
- f. Infrastructure projects benefitting the economy or ecological resources, including port infrastructure;
- g. Coastal flood protection and related infrastructure;
- h. Promotion of tourism in the Gulf Coast Region, including promotion of recreational fishing;
- i. Promotion of the consumption of seafood harvested from the Gulf Coast Region;
- j. Planning assistance;
- k. administrative costs; and

1. The nonfederal share of the cost of any project or program authorized by federal law that is an eligible activity under the RESTORE Act (31 CFR sections 34.2, 34.200, and 34.201).
2. *Activities Unallowed for the Direct Component*

Activities that were included in any claim for compensation presented after July 6, 2012, to the Oil Spill Liability Trust Fund authorized by 26 USC 9509 (31 CFR section 34.200(a)(3)). Information on the Oil Spill Liability Trust Fund can be found at www.uscg.mil/npfc.

B. Allowable Costs/Cost Principles

Costs incurred for administrative duties of the Alabama Gulf Coast Recovery Council are not allowed to the extent those duties were performed by public officials and employees who are not subject to the ethics laws of the state of Alabama (31 CFR section 34.302(a)).

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

Not Applicable

3. Earmarking

Effective May 3, 2019, Treasury issued a final rule to revise the method by which the statutory 3 percent limitation on administrative costs is applied under the Direct Component, Comprehensive Plan Component, and Spill Impact Component under the RESTORE Act. Through this revision, the 3 percent limit on administrative costs may be applied to the total amounts of funds received by a recipient under each of the three components either on a grant-by-grant or on an aggregate basis as described in 31 CFR 34.204, Limitations on administrative costs and administrative expenses.

Administrative costs, for purposes of this limitation, are defined as indirect costs for administration incurred by the Gulf Coast states, coastal political subdivisions, and coastal zone parishes that are allocable to activities authorized under the Act. Administrative costs do not include that portion of indirect costs that are identified specifically with, or readily assignable to, facilities as defined in 2 CFR section 200.414. The 3 percent limitation does not apply to the administrative costs of subrecipients (31 CFR sections 34.2 and 34.204). The instructions and tools for calculating allowable costs are available on the Treasury RESTORE Act

website at <https://home.treasury.gov/policy-issues/financial-markets-financial-institutions-and-fiscal-service/restore-act>.

I. Procurement and Suspension and Debarment

1. When awarding contracts under the Direct Component, a recipient may give preference to individuals and companies that reside in, are headquartered in, or are principally engaged in business in the state of project execution (31 CFR section 34.305(b)).
2. Under the Direct Component, the acquisition of land, or interests in land, can only be from a willing seller (31 CFR section 34.803(f)).
3. The Infrastructure Investment and Jobs Act (“IIJA”), Pub. L. No. 117-58, includes the Build America, Buy America Act (“the Act”). Pub. L. No. 117-58, §§ 70901-52, which requires that no later than May 14, 2022, 180 days after the enactment of the IIJA, the head of each covered Federal agency shall ensure that “none of the funds made available for a Federal financial assistance program for infrastructure, including each deficient program, may be obligated for a project unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States.”

On February 17, 2023, the Treasury Office of Gulf Coast Restoration (OGCR) posted its final waiver entitled, “Public Interest General Applicability Waiver from Application of Section 70914(a) of the Build America, Buy America Act to the RESTORE Act, Direct Component Infrastructure Projects That Were in the Funding Pipeline by May 14, 2022” on its website and cross-posted it on the MadeinAmerica.gov website, which is a centralized waiver transparency website managed by GSA.

This new waiver covers new obligations by Treasury for infrastructure projects under the RESTORE Act, Direct Component program made on or after February 17, 2023, to either (a) make new grants for infrastructure projects under the RESTORE Act, Direct Component or (b) monetary amendments to existing Direct Component grants for infrastructure projects. The waiver only covers new obligations if the proposed infrastructure project in the new grant or the infrastructure project in the amendment to the existing grant was already in the eligible entity’s funding pipeline by May 14, 2022, the effective date of the Buy America Preference requirements.

Treasury considers a new grant or monetary amendment to an existing grant for an infrastructure project to be covered by this waiver if, as of May 14, 2022, the eligible entity had already undertaken substantial public engagement, as required by Treasury’s implementing regulations at 31 CFR 34.303, related to the eligible entity’s selection and approval of that particular infrastructure activity for inclusion in the entity’s regulatory-required Multiyear Implementation Plan. The RESTORE Act, which authorized the Direct Component program, established the

Multiyear Implementation Plan as a prerequisite for applying for a Direct Component grant.

OGCR will put in the Remarks section of each Notice of Award (NOA) whether the Act applies. Auditors should review the NOA to determine if the Act applies.

L. Reporting

1. Financial Reporting

a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable

c. *SF-425, Federal Financial Report (semi-annual)* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

N. Special Tests and Provisions

1. Wage Rate Requirements

Under the Direct Component, for contracts that exceed \$2,000 that are for the construction, alteration, or repair of treatment works as defined at 33 USC 1292(2), all laborers and mechanics employed by contractors and subcontractors must be paid wages at rates not less than those prevailing for the same type of work on similar construction in the immediate locality, as determined by the secretary of labor, in accordance with the Wage Rate Requirements (33 USC 1372).

See Wage Rate Requirements Cross-Cutting Section (page 4-20.001-4).

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.016 EQUITABLE SHARING PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Equitable Sharing Program (Program) is to foster greater law enforcement cooperation among state, local, tribal, and federal law enforcement agencies. State and local law enforcement agencies can request federally forfeited funds or tangible assets through the Program based on their qualitative and quantitative contributions to an investigation resulting in federal forfeiture. Equitably shared funds must be used by law enforcement agencies for law enforcement purposes only.

II. PROGRAM PROCEDURES

A. Overview

The Program is managed by the Treasury Executive Office for Asset Forfeiture (TEOAF), which reports to the Department of the Treasury's Office of Terrorism and Financial Intelligence (TFI). TEOAF manages the Treasury Forfeiture Fund, which is the receipt account for non-tax federal forfeitures made by Treasury and Department of Homeland Security law enforcement agencies. State, local, or tribal law enforcement agencies that assist in federal investigations resulting in forfeiture may seek a portion of the federally forfeited funds in an amount commensurate with their efforts resulting in the forfeiture.

A law enforcement agency seeking a share of federally forfeited funds must meet eligibility requirement of being a law enforcement agency, must file an annual Equitable Sharing Agreement and Certification (ESAC) form, and must be in compliance with program requirements at the time of payment. The payment must bear a reasonable relationship to the level of the recipient agency's participation in the total law enforcement effort resulting in the forfeiture.

Shared funds may be used for a variety of law enforcement purposes, including but not limited to training, equipment, accounting services, joint law enforcement/public safety operations, drug, gang and other prevention or awareness programs.

Equitable sharing funds are considered federal financial assistance as defined in 2 Code of Federal Regulations (CFR) section 200.40. Equitable sharing payments are classified as "Direct Payment for Specified Use" in the Catalog of Federal Domestic Financial Assistance.

Source of Governing Requirements

The Equitable Sharing Program is authorized by 31 USC Section 9705(a)(1)(G) and (b)(4); 18 USC Section 981(e)(2); 19 USC Section 1616a(c); and 21 USC Section 881(e)(1)(A) and (e)(3). The specific program requirements are implemented by guidelines, set forth in the *Joint Department of Justice/Department of Treasury Guide to Equitable Sharing for State, Local, and*

Tribal Law Enforcement Agencies (Guide) (July 2018). Also, periodically, updates to policies impacting the Treasury Equitable Sharing program may be included in public notices issued by DOJ called “DOJ Wires,” which are available here: <https://www.justice.gov/criminal-mlars/equitable-sharing-program>.

Availability of Other Program Information

More details regarding the Program, including the *Guide* are available at www.treasury.gov/resource-center/terrorist-illicit-finance/Pages/Equitable-Sharing.aspx, as well as the Department of Justice website at <https://www.justice.gov/criminal-mlars/equitable-sharing-program>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	Y	Y	N	Y	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. *Financial Assistance*- Section V.A through V.B of the *Guide* sets forth examples of the authorized activities and uses of shared funds. The ESAC form, and *Guide* in general, sets forth the general terms and conditions for

a recipient of shared funds. Specifically, shared funds may be used for permissible law enforcement expenses that supplement, and not supplant, law enforcement resources.

- b. Transfer of Tangible Assets- Section V.D of the Guide sets forth requirements pertaining to tangible assets or, rarely, real property transferred to a state or local agency in lieu of forfeited proceeds.

B. Allowable Costs/Cost Principles

As a direct payment for specified use, these funds are considered federal financial assistance and are subject to only the following sections of the *Code of Federal Regulations*, Title 2, Subtitle A, Chapter II, Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (“2 CFR”): Subpart A – Acronyms and Definitions; Subpart B – General Provisions (excluding Sections 200.111 to 200.113); Subpart D – Post Federal Award Requirements (only sections 200.303 – Internal Controls and 200.331 to 333 – Subrecipient Monitoring in the limited case of where a cash transfer is permitted); and Subpart F – Audit Requirements. All other provisions of 2 CFR, including 2 CFR sections 200.400 to 200.476, are inapplicable to the Program. Although 2 CFR sections 200.400 to 200.475 are not applicable, the *Guide*, sections V.B.1, 2, and 3, detail allowable and unallowable uses of federal equitable sharing funds. Note that there may be specific exceptions for use of shared funds, so the *Guide* should be consulted for details. The *Guide’s* policies on the use and administration of equitable sharing funds may also be updated at any time through the issuance of updated guidance.

E. Eligibility

1. Eligibility for Recipient State or Local Law Enforcement Agencies

Recipients of shared funds must meet the eligibility requirements set forth in the *Guide*, sections 1.B, II, and III. Generally, this means they must be in compliance with all applicable civil rights requirements, must be deemed a law enforcement agency (determined by Treasury or Department of Justice (DOJ)), must be in compliance with program requirements, and must have had some participation in the investigation resulting in the forfeiture for which it is seeking funds.

2. Eligibility for Individuals

Not Applicable

3. Eligibility for Groups of Individuals or Area of Service Delivery

Not Applicable

4. Eligibility for Subrecipients

Transfer of cash from one recipient to another is not permitted except in rare circumstances where TEOAF has granted a waiver. In that case, the subrecipient monitoring requirements of 2 CFR 200.331 to 333 would apply.

F. Equipment and Real Property Management

See *Guide*, Section V.C for Program-specific requirements.

G. Matching, Level of Effort, Earmarking**1. Matching**

Not applicable

2. Level of Effort

Agencies may supplement, not supplant, their appropriated funds. See *Guide*, sections I.C and V for Program-specific requirements.

3. Earmarking

The *Guide*, Section V.A.2, states that agencies may earmark funds already received from and on hand but may not budget or commit funds not yet awarded or received.

I. Procurement and Suspension and Debarment

1. *Procurement* – Although 2 CFR sections 200.317 to 200.327 are not applicable, the *Guide*, Section VI.A.3, requires agencies to follow their jurisdiction's procurement policies.
2. *Suspension and Debarment* – 2 CFR sections 180.200 to 225 are applicable.

L. Reporting

See *Guide*, Section VII for Program-specific requirements. The *Guide*, Section VII, details the annual reporting requirements for equitable sharing fund through the submission of the annual ESAC form. Agencies report on the ESAC the amount of funds received and how they were expended in general categories such as equipment and training.

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Program* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

The DOJ also manages its own Equitable Sharing Program under Assistance Listing 16.922. Funds from each program must be maintained and managed separately.

DEPARTMENT OF THE TREASURY**ASSISTANCE LISTING 21.019 CORONAVIRUS RELIEF FUND****I. PROGRAM OBJECTIVES**

Note: Recipients of Coronavirus Relief Fund (CRF) payments are subject to a limited subset of the requirements in the Uniform Administrative Requirements, Cost Principles, and Audit Requirements, (2 CFR Part 200). Specifically, recipients are subject to Subpart A- Acronyms and Definitions, 2 CFR Parts 200.111 through 200.113 relative to recipients' use of the English language, establishing a conflict of interest policy, and mandatory disclosure requirements, 2 CFR 200.303 regarding internal controls, 2 CFR Parts 200.331 through 200.333 regarding subrecipient monitoring and management, and 2 CFR Part 200, Subpart F regarding audit requirements. Also FAQ B. 7 and B. 8 in the [Coronavirus Relief Fund Program Guidance](#) provides that direct payments are made to state, territorial, Tribal, and certain eligible local governments in order to cover:

1. Necessary expenditures incurred due to the public health emergency with respect to Coronavirus Disease 2019 (COVID-19);
2. Costs that were not accounted for in the government's most recently approved budget as of March 27, 2020; and
3. Costs that were incurred during the period that begins on March 1, 2020 and ends on December 31, 2021 for State and local governments, and ends on December 31, 2022 for Tribal governments.

On December 27, 2020, the Consolidated Appropriations Act, 2021, Pub. L. No.116-260 codified at 42 USC 801(d)(3), was signed into law. Division N, Title X, Section 1001 of the Consolidated Appropriations Act, 2021, codified at 42 USC 801(d)(3), extended the period for which primary recipients may incur eligible costs using payments from CRF from December 30, 2020, to December 31, 2021.

Division LL of the Consolidated Appropriations Act, 2023, Pub. L. No. 117-328 (December 29, 2022), further extended the period for state and local governments to pay for CRF program expenditures until September 30, 2022 for costs incurred or obligations made during the period March 1, 2020 through December 31, 2022. It also extended the period of time that Tribal governments are required to use their CRF funds. Tribal governments must pay for CRF program expenditures by March 31, 2023 CRF program costs incurred or obligations made during the period March 1, 2020 through December 31, 2022. These extensions do not apply to subrecipients unless original subrecipient agreements were modified by the pass-through entity to include such extensions. For more information on the limitation for use of payments from CRF, please reference the US Department of the Treasury's (Treasury) guidance located in the section below titled "Availability of Other Program Information."

In addition to Federal statutes, regulations or the terms and conditions, auditors must use Treasury's guidance and Frequently Asked Questions (FAQs) and Treasury's Office of Inspector

General (OIG) guidance on reporting and record retention, including related FAQs at <https://oig.treasury.gov/sites/oig/files/2021-03/OIG-CA-20-028R.pdf>, as the criteria when auditing use of payments from CRF, as well as when reporting findings.

II. PROGRAM PROCEDURES

A. Overview

The Treasury provided assistance of \$150 billion from CRF in direct payments to state, territorial, Tribal, and eligible local governments with \$3 billion reserved for payments to the District of Columbia, Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, and American Samoa and \$8 billion reserved for payments to Tribal governments. The remaining \$139 billion were allocated for payments to the 50 states and eligible local governments with each state receiving a minimum payment no less than \$1.25 billion for fiscal year 2020. Payments to states were subject to reduction based on payments to eligible local governments. Amounts paid to states and eligible local governments were based on 2019 population data from the US Census Bureau.

Units of local government eligible for direct payment include counties, municipalities, towns, townships, villages, parishes, boroughs, or other units of general government below the state level with a population that exceeds 500,000. Eligible units of local government had to provide a certification to receive direct payment from CRF. The secretary of the Treasury made a determination to allocate payments to Tribal governments based on population, employment, and expenditure data.

State, territorial, Tribal, and eligible local governments are required to use payments from CRF to cover:

1. Necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID-19);
2. Costs that were not accounted for in the governments' most recently approved budget as of March 27, 2020; and
3. Costs that were incurred during the period that begins on March 1, 2020, and ends on December 31, 2021 for State and local governments, and on December 31, 2022 for Tribal governments and Alaskan Native Corporations.

Governments otherwise have broad discretion to utilize payments for expenditures ranging from COVID-19 testing including, but not limited to, reimbursing small businesses for the costs of business interruption caused by required closures.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) statutory criteria on use of payments from CRF stated in section 601(d) of the Social Security Act, as added by section 5001 of Division A of the CARES Act (42 USC 801(d)) and as interpreted in Treasury's guidance and FAQs, applies to prime recipients, subrecipients, and beneficiaries, as detailed in Section M. on Subrecipient Monitoring below and Treasury's FAQ # B.13. Please note the Single Audit Act and 2 CFR part 200, subpart F

regarding audit requirements do not apply to those receiving funds as either individuals or beneficiaries.

On June 25, 2021, the Supreme Court held in *Yellen v. Confederated Tribes of the Chehalis Reservation* that Alaska Native regional and village corporations (ANCs) are considered Indian Tribes under the Indian Self-Determination and Education Assistance Act (ISDEA) and are thus eligible for payments from the Fund. Consistent with this ruling, Treasury, in consultation with Office of Management and Budget (OMB), has determined that ANCs are subject to the requirements of the Single Audit Act and its implementing regulations, 2 CFR Part 200, Subpart F, with respect to payments received from the Fund. See <https://home.treasury.gov/system/files/136/CRF-Application-of-the-Single-Audit-to-ANCs.pdf> for more information the application of the Single Audit Act to ANCs.

Source of Governing Requirements

CRF is authorized by Division A, Title V, Section 5001 of the CARES Act, Pub. L. No. 116-136 (March 27, 2020) and codified at [42 USC 801](#) et seq., and amended by Division N, Title X, Section 1001 of the Consolidated Appropriations Act, 2021, Pub. L. No. 116-260 (December 27, 2020) codified at 42 USC 801(d)(3). It was further amended by Division LL of the Consolidated Appropriations Act, 2023, Pub. L. No. 117-328 (December 29, 2022).

Availability of Other Program Information

Additional information on CRF is available on the Treasury website at <https://home.treasury.gov/policy-issues/cares/state-and-local-governments>.

Treasury has published in the *Federal Register* its Guidance and FAQs regarding the Coronavirus Relief Fund for states, Tribal governments, and certain eligible local governments. This section of the *Federal Register* is entitled, “Coronavirus Relief Fund for States, Tribal Governments, and Certain Eligible Local Governments, Coronavirus Relief Fund Program Guidance (CRF Program Guidance).”

The *Federal Register* notice is available at 86 FR 4182 (Jan. 15, 2021) and on Treasury’s website at https://home.treasury.gov/system/files/136/CRF-Guidance-Federal-Register_2021-00827.pdf (See pages 1 – 13). Treasury subsequently revised this guidance as relates to the requirement that costs be incurred by December 31, 2021, to provide additional flexibility to recipients. See CRF Guidance Revision Regarding Cost Incurred dated December 14, 2021, at https://home.treasury.gov/system/files/136/CRF-Guidance_Revision-Regarding-Cost-Incurred.pdf.

All of Treasury OIG’s guidance on reporting and record retention, including related FAQs, can be found at <https://oig.treasury.gov/cares-act-reporting-and-record-keeping-information>. Links and descriptions for key documents can be found below:

- [Department of the Treasury Office of Inspector General Coronavirus Relief Fund Frequently Asked Questions Related to Reporting and Recordkeeping \(Revised\)](#) (OIG-CA-20-028R dated March 2, 2021) (See pages 1 – 25)

This document addresses frequently asked questions (FAQs) from CRF prime recipients regarding their reporting and record keeping requirements and supplements Treasury OIG’s memorandums Coronavirus Relief Fund Recipient Reporting and Record Retention Requirements (OIG-CA-20-021 dated July 2, 2020) and Coronavirus Relief Fund Reporting Requirements Update (OIG-CA-20-025 dated July 31, 2020).

- [Coronavirus Relief Fund Reporting Requirements Update](#) (OIG-CA-20-025 dated July 31, 2020) (See pages 1 – 6)

This memorandum augments and clarifies prime recipient’s quarterly reporting requirements contained in memorandum OIG-CA-20-021 dated July 2, 2020.

- [Coronavirus Relief Fund Reporting and Record Retention Requirements](#) (OIG-CA-20-021 dated July 2, 2020) (See pages 1 – 4)

This document describes recipient reporting and record retention requirements under the Coronavirus Relief Fund program.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	Y	N	N	Y	Y	N

A. Activities Allowed or Unallowed

CRF is designed to provide ready funding to address unforeseen financial needs and risks created by the COVID-19 public health emergency. Governments may use CRF payments for eligible expenses subject to the restrictions set forth in 42 USC 801(d). Payments must be used to cover costs that are incurred by:

1. State and local governments beginning March 1, 2020 through December 31, 2021, and by Tribal governments beginning March 1, 2020 through December 31, 2022;
2. Necessary expenditures incurred due to the public health emergency with respect to COVID-19;
3. Not accounted for in the governments' most recently approved budget as of March 27, 2020; and

A cost meets the requirement of "costs not accounted for in the budget most recently approved as of March 27, 2020," if either (a) the cost cannot lawfully be funded using a line item, allotment, or allocation within that budget or (b) the cost is for a substantially different use from any expected use of funds in such a line item, allotment, or allocation.

Please see page 2 of Treasury’s guidance on “Costs not accounted for in the budget most recently approved as of March 27, 2020,” at https://home.treasury.gov/system/files/136/CRF-Guidance-Federal-Register_2021-00827.pdf for additional details. Treasury subsequently revised this guidance to provide additional flexibility to recipients. See CRF Guidance Revision Regarding Cost Incurred dated December 14, 2021, at https://home.treasury.gov/system/files/136/CRF-Guidance_Revision-Regarding-Cost-Incurred.pdf. Costs incurred represent funds obligated. As such, State and local governments are required to use their CRF funds by September 30, 2022 to pay for CRF program expenditures incurred or obligations made during the period March 1, 2020 through December 31, 2021. Tribal governments are required to use their CRF funds by March 31, 2023 to pay for CRF program expenditures incurred or obligations made during the period March 1, 2020 through December 31, 2022.

Note: Allowable activities unique to CRF where extra attention may be warranted include Payments to Individuals (Payroll to Public Health and Safety Employees); Aggregate payments to individuals (Substantially Dedicated Payroll); Payments to Individuals (Hazard Pay); Real Property; Unemployment Insurance; and Broadband.

1. *Activities Allowed*- Please see below for program-specific guidance on the allowability of these costs.
 - a. Payments to Individuals (Payroll to Public Health and Safety Employees): CRF recipients were permitted to use of CRF for payroll of public health and safety employees, and those that directly support them, during the covered period. (See [CRF Program Guidance](#) pages 4184 and 4185 for the Nonexclusive Examples of Eligible Expenditures; and [Treasury OIG FAQs](#) #80 and #80b)
 - b. Aggregate Payments to Individuals (Substantially Dedicated Payroll): CRF recipients were permitted to use CRF for payroll expenses for non-public health and safety employees (i.e., employees that do not meet the definition of public health and safety workers above). CRF funds used for this purpose were permitted to cover payroll for these employees to the extent that their work was substantially dedicated to mitigating or responding to the COVID–19 public health emergency. The relevant unit of government must maintain documentation of the “substantially dedicated” conclusion with respect to its employees. (See [CRF Program Guidance](#) FAQ 47 on page 4191)
 - c. Payments to Individuals (Hazard Pay): CRF recipients were permitted to use CRF for hazard pay and overtime payroll expenses for individuals that performed hazardous duty or work involving physical hardship that in each case was related to COVID–19. (See [CRF Program Guidance](#) FAQ 29 on page 4190)

- d. Real Property: CRF recipients were permitted to use CRF for real property necessary to address the COVID–19 public health emergency. (See [CRF Program Guidance](#) FAQ 58 on page 4193)
- e. Unemployment Insurance: States were permitted to use CRF payments to support state unemployment insurance funds to the extent that the costs incurred were incurred due to the COVID–19 public health emergency. Unemployment insurance costs incurred by the recipient as an employer were permitted if they were related to the COVID–19 public health emergency and the costs were not otherwise reimbursed by the federal government pursuant to the CARES Act. (See [CRF Program Guidance](#) FAQs 9 and 10 on page 4188)
- f. Broadband: CRF recipients were permitted to use CRF funds to expand rural broadband capacity to assist with distance learning and telework to the extent that they were necessary for the public health emergency. (See [CRF Program Guidance](#) FAQ 36 on page 4190). CRF payments are not required to be used as the source of funding of last resort. However, recipients may not use payments from CRF to cover expenditures for which they will receive reimbursement from other sources. Governments are responsible for making determinations as to what expenditures are necessary due to the public health emergency with respect to COVID-19.

2. *Activities Unallowed*

- a. CRF payments are not required to be used as the source of funding of last resort. However, recipients may not use payments from CRF to cover expenditures for which they will receive reimbursement from other sources. Governments are responsible for making determinations as to what expenditures are necessary due to the public health emergency with respect to COVID-19.
- b. Please see Treasury’s FAQs at https://home.treasury.gov/system/files/136/CRF-Guidance-Federal-Register_2021-00827.pdf for more information related to the expenditures that may or may not be covered with payments from CRF and the CRF Guidance Revision Regarding Cost Incurred dated December 14, 2021 at https://home.treasury.gov/system/files/136/CRF-Guidance_Revision-Regarding-Cost-Incurred.pdf.

B. Allowable Cost/Cost Principles

As a direct payment for specified use, these funds are considered federal financial assistance, but are not provided pursuant to a grant agreement. In accordance with 2 CFR section 200.101(b) regarding applicability only certain provisions of the *Code of Federal*

Regulations, Title 2, Subtitle A, Chapter II, Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (“Uniform Guidance”– 2 CFR Part 200) apply to CRF and these provisions include the following:

1. Subpart A- Acronyms and Definitions;
2. Subpart B-General provisions except for 2 CFR sections 200.111–200.113;
3. 2 CFR section 200.303 regarding internal controls;
4. 2 CFR sections 200.331–333 regarding subrecipient monitoring and management; and
5. Subpart F – Audit Requirements

All other provisions of 2 CFR Part 200 are not applicable to CRF.

While 2 CFR Part 200, Subpart E, Cost Principles does not apply to CRF, auditors should use pages 1 to 13 of Treasury’s [“Coronavirus Relief Fund for States, Tribal Governments, and Certain Eligible Local Governments: Coronavirus Relief Fund Program Guidance”](#) as published in the Federal Register on January 15, 2021 as the criteria when testing the allowability of costs under CRF. For example, while not exhaustive, in the context of real property improvements and acquisitions and equipment acquisitions (which includes vehicles) this means that the acquisition itself must be necessary due to the COVID-19 public health emergency. In particular, a government must (i) determine that it is not able to meet the need arising from the public health emergency in a cost-effective manner by leasing property or equipment or by improving property already owned and (ii) maintain documentation to support this determination. Likewise, an improvement, such as the installation of modifications to permit social distancing, would need to be determined to be necessary to address the COVID-19 public health emergency (See FAQ # A.58 in the [CRF Program Guidance](#) for more detail on real property improvements and acquisitions and equipment acquisitions).

H. Period of Performance

Governments must use the direct payments for necessary expenditures incurred between March 1, 2020, and December 31, 2021, due to the COVID-19 public health emergency. Please see pages 1 and 2 of Treasury’s guidance on “Costs incurred during the period that begins on March 1, 2020, and ends on December 31, 2021” for more detail at: https://home.treasury.gov/system/files/136/CRF-Guidance_Revision-Regarding-Cost-Incurred.pdf.

Treasury subsequently revised this guidance to provide additional flexibility to recipients. See CRF Guidance Revision Regarding Cost Incurred dated December 14, 2021, at

https://home.treasury.gov/system/files/136/CRF-Guidance_Revision-Regarding-Cost-Incurred.pdf.

Costs incurred represent funds obligated. As such, State and local governments are required to use their CRF funds by September 30, 2022 to pay for CRF program expenditures incurred or obligations made during the period March 1, 2020 through December 31, 2021. Tribal governments are required to use their CRF funds by March 31, 2023 to pay for CRF program expenditures incurred or obligations made during the period March 1, 2020 through December 31, 2022. However, this extension does not apply to subrecipients unless original subrecipient agreements were modified by the pass-through entity to include such extension.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Title of Report: Financial Progress Report

PRA Number: Statutory requirement per 42 USC 801(f)(1). PRA not required.

Reporting Cycle: Quarterly

Authoritative Requirement: 42 USC 801

Department of the Treasury “Coronavirus Relief Fund for States, Tribal Governments, and Certain Eligible Local Governments Coronavirus Relief Fund Program Guidance” as published in the Federal Register on January 15, 2021 at https://home.treasury.gov/system/files/136/CRF-Guidance-Federal-Register_2021-00827.pdf;

Department of the Treasury Office of Inspector General Coronavirus Relief Fund Frequently Asked Questions Related to Reporting and Recordkeeping (Revised) <https://oig.treasury.gov/sites/oig/files/2021-03/OIG-CA-20-028R.pdf>;

Department of the Treasury Office of Inspector General “Coronavirus Relief Fund Reporting and Record Retention Requirements” <https://oig.treasury.gov/sites/oig/files/2021-01/OIG-CA-20-021.pdf>; 31 CFR section 35.4(c) Reporting and requests for other information;

Blank Copy of the Report: Department of the Treasury Office of Inspector General “Treasury OIG & PRAC Financial Reporting OLDC Form” [Treasury OIG & PRAC Financial Reporting OLDC Form: Prime Recipient User Guide](#)

Report Instructions: Department of the Treasury Office of Inspector General “Treasury OIG & PRAC Financial Reporting OLDC Form” [Treasury OIG & PRAC Financial Reporting OLDC Form: Prime Recipient User Guide](#)"

Report Corrections: Recipients may make report corrections or additions within the first 10 days after a quarter end, or before the close date. The Treasury OIG approves final submissions that are determined to be complete and may return reports to recipients for corrections. Recipients may not access previous versions of a revised report in GrantSolutions for correction. They must make corrections in the current open reporting period.

Key Line Item(s)- The following line items contain critical information:

1. *Total Cumulative Obligations*- Quantifiable Objective Criteria: Cumulative obligations reported in GrantSolutions agrees with the prime recipient’s records (e.g., general ledger, subsidiary ledger, and related source documents).
(See [Treasury OIG & PRAC Financial Reporting OLDC Form: Prime Recipient User Guide](#) pages 30 – 57; [Treasury OIG FAQs on Reporting and Recordkeeping \(Revised\)](#) #72; and [Treasury OIG Record Retention and Reporting Requirements](#), page 4)
2. *Total Cumulative Expenditures*- Quantifiable Objective Criteria: Cumulative expenditures reported in GrantSolutions agrees with the prime recipient’s records (e.g., general ledger, subsidiary ledger, and related source documents).
(See [Treasury OIG & PRAC Financial Reporting OLDC Form: Prime Recipient User Guide](#) pages 30 – 57; [Treasury OIG FAQs on Reporting and Recordkeeping \(Revised\)](#) #72; and [Treasury OIG Record Retention and Reporting Requirements](#) page 4)
3. *Loans*- Quantifiable Objective Criteria: Repayment terms of all loans issued are reported accurately against the loan terms.
(See [Treasury CRF Program Guidance](#) #40; and [Treasury OIG FAQs on Reporting and Recordkeeping \(Revised\)](#) #51)
4. *Transfers to Other Government Entities*- Quantifiable Objective Criteria: The prime recipient does not include transfers for movements of funds within their own government as subrecipients. For example, a

State designating funds for their public works department is not a transfer.

(See [Treasury CRF Program Guidance #4](#) and [Treasury OIG FAQs on Reporting and Recordkeeping \(Revised\) #26 and #27](#))

5. *Aggregate Reporting-* Quantifiable Objective Criteria: Aggregate reporting is only used for single transactions less than \$50,000 and not for Contracts, Grants, Loans, Direct Payments, and/or Transfers greater than \$50,000. (See [Treasury OIG & PRAC Financial Reporting OLDC Form: Prime Recipient User Guide](#) pages 30 – 57; [Treasury OIG FAQs on Reporting and Recordkeeping \(Revised\) #6 and #7](#))

4. **Special Reporting for Federal Funding Accountability and Transparency Act**

Not Applicable

M. Subrecipient Monitoring

For information on subrecipient monitoring, please reference Part 3 of the Compliance Supplement. (Note: The Single Audit Act and 2 CFR Part 200, Subpart F regarding audit requirements do not apply to beneficiaries as defined in the Treasury CRF Program Guidance Treasury’s FAQ B.13 at [CRF-Guidance-Federal-Register_2021-00827.pdf \(treasury.gov\)](#)).

The Treasury CRF Program Guidance requires recipients to report on both subrecipients and beneficiaries in their reporting. However, for the purposes of this Compliance Requirement, the requirement only applies to subrecipients as defined under the Uniform Guidance and not beneficiaries.

Recipients should maintain documentation to support their determinations regarding whether an entity is a subrecipient, contractor, or beneficiary.

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.020 COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Community Development Financial Institutions Program (CDFI Program) is to use federal resources to invest in, and build the capacity of, Community Development Financial Institutions (CDFIs) to help them serve low-income and underserved people and communities that lack access to affordable financial products and services.

II. PROGRAM PROCEDURES

A. Overview

The CDFI Program is administered by the Community Development Financial Institutions Fund (CDFI Fund), Department of the Treasury. Through the CDFI Program, the CDFI Fund provides two types of monetary awards to CDFIs—Financial Assistance (FA) Awards and Technical Assistance (TA) Awards. In order to be eligible to apply for assistance, entities must meet, or propose to meet, specific CDFI eligibility criteria (12 CFR sections 1805.200 and 1805.201). CDFIs include, among others, entities such as banks, credit unions, depository institution holding companies, loan funds, and venture capital funds.

An organization must be a Certified CDFI when the Notice of Funds Availability (NOFA) is released in order to be eligible to apply for a FA Award through the CDFI Program. Organizations that are Emerging CDFIs or Sponsoring Entities may only apply for TA Awards.

1. CDFIs may use the funds to pursue a variety of goals, including:
 - a. Promoting economic development to develop businesses, create jobs, and develop commercial real estate;
 - b. Developing affordable housing and to promote homeownership; and
 - c. providing community development financial services, such as basic banking services, financial literacy programs, and alternatives to predatory lending.

B. Subprograms/Program Elements

The CDFI Fund provides FA and TA Awards to help certified and emerging CDFIs sustain and expand their services and build their technical capacity. FA and TA Awards are provided through a yearly competitive nationwide evaluation and selection process as referenced in the NOFA. The latest version of the CDFI Program Notice of Funding

Availability can be found on the CDFI Fund website at:

<https://www.cdfifund.gov/programs-training/programs/cdfi-program/apply-step>.

After selection, each CDFI Program Award Recipient enters into an Assistance Agreement, which includes Performance Goals and other terms and conditions. A template of the Assistance Agreement can be found on the CDFI Fund website at

https://www.cdfifund.gov/sites/cdfi/files/2022-01/FY2021_CDFIPProgram_NACAProgram_FA_Assistance_Agreement_Template.pdf

Source of Governing Requirements

The CDFI Program is authorized by the Community Development Banking and Financial Institutions Act of 1994 Pub. L. No. 103-325, (September 23, 1994), codified at 12 CFR Part 1805.

Availability of Other Program Information

Additional information on the CDFI Program is available on the CDFI Fund website at <https://www.cdfifund.gov>. The link to the template for the Assistance Agreement can be found under Section II. Program Procedures, Section B. If there are specific questions regarding the programs, the CDFI Fund may be contacted via telephone at (202) 653-0421 or by e-mail at cdfihelp@cdfi.treas.gov.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	N	Y	N	Y	N	N

A. Activities Allowed or Unallowed

Section 3.7 of the terms and conditions in the assistance agreement prescribes the specific authorized activities of FA awards for each CDFI Program award Recipient (12 CFR sections 1805.300 and 1805.301).

1. *Activities Allowed*

- a. Financial Assistance- The Recipient must use the Financial Assistance (including Base-FA, HFFI-FA, DF-FA, and PPCFA) to support its activities in the following areas:
 - (1) Financial Products (provided, however, HFFI-FA may not be used to fund loan purchases, loan refinancing, or any type of financing for prepared food outlets).
 - (2) Financial Services (Regulated Institutions only; HFFI-FA may not be used to provide Financial Services).
 - (3) (iii) Development Services.
 - (4) (iv) Loan Loss Reserves.
 - (5) (v) Capital Reserves (Regulated Institutions only; DF-FA may not be used for Capital Reserves).
 - (6) (vi) Direct Administrative Expenses.
 - (7) Financial Products (provided, however, HFFI-FA may not be used to fund loan purchases, loan refinancing, or any type of financing for prepared food outlets).
- b. Technical Assistance: The Recipient must use the Technical Assistance to support activities in the following areas:

- (1) Compensation (Personal Services);
 - (2) Compensation (Fringe);
 - (3) Training and Education;
 - (4) Travel;
 - (5) Professional Services;
 - (6) Equipment;
 - (7) Supplies; and
 - (8) Incorporation costs (Sponsoring Entities only).
- c. CDFI Program Award Recipients may not distribute assistance to an affiliate or subsidiary without the prior consent of the CDFI Fund (12 CFR section 1805.302(b)).

G. Matching, Level of Effort, Earmarking

1. Matching

- a. *Financial Assistance* – Each CDFI Program Award Recipient must match FA provided with an amount that is at least comparable in (1) form (e.g., grant, loan, deposit, and Equity Investment) to the type of FA provided by the CDFI Fund, and (2) value, on a dollar-for-dollar basis, to the FA provided by the CDFI Fund, unless waived by Congress in the appropriation for the program. Such match must come from sources other than the federal government and must consist of nonfederal funds. The applicable time frame for meeting the match is set forth in the NOFA published in the *Federal Register* for each funding round. The most recent NOFAs can be retrieved from the CDFI Fund’s website at <https://www.cdfifund.gov/programs-training/programs/cdfi-program/apply-step>.

The amount of FA disbursed by the CDFI Fund to a CDFI Program Award Recipient will not exceed the amount of match that the CDFI Program Award Recipient has in hand as codified in 12 CFR sections 1805.500. Matching Funds are In-Hand when the Applicant receives payment for the Matching Funds from the Matching Funds source (e.g., grant, loan, deposit, and Equity Investment).

- b. *Technical assistance* – There is no match requirement for TA Awards under the CDFI Program as codified in 12 CFR section 1805.303(d).

2. Level of Effort

Not Applicable

3. Earmarking

Not Applicable

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Performance Progress Report (PPR) (OMB Control Number 1559-0036) – (12 CFR 1805) - Recipients submit the PPR in the Awards Management Information System (AMIS) database once a year, three (3) months after the Recipient's Period of Performance End Date. The PPR is used to determine if the Recipient is in compliance with the applicable Performance Goals and Measures in their Assistance Agreement. The PG&M's are specific to each Recipient's assistance agreement. Additional guidance for completing the compliance reports is available on the CDFI Fund website under the CDFI Program website on the [Compliance Resources and Reporting section](#) page in the [Annual Compliance Reports Performance Progress Report \(PPR\) and Financial Audit Statement Data Points](#) document starting on page 2. The Recipient has the ability to print copies of the PPR from its AMIS account if needed by the Auditor. The authoritative requirement for submission of the PPR is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the PPR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the "Approval History" at the bottom of the PPR in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS.

Key Line Items - The following line item contains critical information (items not numbered in the report):

1. *Performance Goals and Measures (PG&M)* - The PG&M's identified are specific to each Recipient's assistance agreement and generally only include 2-3 PG&Ms. The data reported for the Period of Performance for each required PG&M should meet or exceed the required benchmarks as outlined in the assistance agreement.

Uses of Award Report (UOA) (OMB Control Number 1559-0032) – Recipients submit the UOA in the AMIS database once a year, three (3) months after the Recipients Period of Performance End Date. Additional guidance for completing the compliance reports is available on the CDFI Fund website under the CDFI Program website on the [Compliance Resources and Reporting section](#) page in the Uses of Award (UOA) Report Data Points Description and Related Guidance and Financial Audit Statement Data Points document starting on page 2. The authoritative requirement for submission of the UOA is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the UOA has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the UOA in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS.

Key Line Items - The following line items contain critical information (items not numbered in the report):

1. Advances of FA Funds held in interest-bearing accounts.
2. Amount of interest earned.
3. Interest earned in excess of \$500 has been remitted to the Department of Health & Human Services.
4. Category of Activity - Total Dollar Amount – The total dollar amount of the activity expended during the Period of Performance.

Transaction Level Report (TLR) and Consumer Loan Report (CLR) (OMB Control Number 1559-0027) – The TLR is applicable to FA Award Recipients only. The CLR is applicable to banks and credit unions who are FA Award Recipients that originated consumer loans during the Period of Performance. Both reports are due 180 days after the Recipient's Period of Performance End Date. The reports are used to collect compliance and performance data and provide

transactional information on an organization's portfolio. The reports require reporting on newly originated loans and investments closed as of a Recipient's fiscal year end. The guidance for completing the reports can be found in the [CDFI TLR Data Point Guidance](#) available on the CDFI Fund website. The authoritative requirement for submission of the TLR/CLR is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the TLR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the "Approval History" at the bottom of the TLR in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS.

Key Line Items for the TLR - The following line items contain critical information:

1. Column C - TLR Submission Year – Submission year is the current data year.
2. Column D - Date Originated – Reporting date is within the reporting period.
3. Column E - Original Loan/Investment Amount –.
4. Column I - Interest Rate .
5. Column K - Points .
6. Column L - Origination Fees .
7. Column O - Term .
8. Column AH - Annual Gross Revenue from Business Operations at Time of Loan/Investment Origination .

Key Line Items for the CLR - The following line items contain critical information:

1. Column E - Total Originated Amount the ratio of the total amount and the total number is equal to 1.
2. Column F - Total Originated Number –the ratio of the total amount and the total number is equal to 1.

3. Column B - Fiscal Year – Reported value is equal to the value of the current data year.

3. **Special Reporting**

Not Applicable

4. **Special Reporting for Federal Funding Accountability and Transparency Act**

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

Recipients that received assistance in the form of a loan are required to submit both performance and financial reports for the Period of Performance designated in the assistance agreement. However, this does not relieve the borrower of the requirement to file financial reports on these loans or otherwise comply with program requirements until the loan is repaid to the CDFI Fund.

For-profit recipients of this funding are not subject to audit under the [*Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*](#).

DEPARTMENT OF THE TREASURY**ASSISTANCE LISTING 21.023 EMERGENCY RENTAL ASSISTANCE PROGRAM****I. PROGRAM OBJECTIVES**

Note: This program is considered a “higher risk” program for 2023, pursuant to 2 CFR section 200.519(c)(2). Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process.

Two pieces of legislation authorized funding for Emergency Rental Assistance. The authorizations include some different legal requirements. Therefore, this Compliance Supplement addresses the requirements as “ERA 1” and “ERA 2.” ERA 1 was authorized by Division N, Title V, Section 501 of the Consolidated Appropriations Act, 2021 (the Act), Pub. L. No. 116-260 (December 27, 2020), codified at 15 USC 9058a. ERA 2 was authorized by Title III, Subtitle B, Section 3201 of the American Rescue Plan Act (ARPA), 2021, Pub. L. No. 117-2 (March 11, 2021), codified at 15 USC 9058c. Both ERA 1 and ERA 2 funding is defined as “other financial assistance” per 2 CFR Part 200.1 and both ERA 1 and ERA 2 are administered by Treasury as direct payments for specified use.

The purpose of ERA is to provide direct payments to eligible entities to assist eligible households with financial assistance and to provide housing stability services and, in the case of ERA 2 as applicable, to cover the costs for other affordable rental housing and eviction prevention activities. ERA grantees may provide assistance directly to eligible landlords and utility providers on behalf of an eligible household or directly to an eligible household (See 15 USC 9058a(c)(2)(C)(i) and FAQ 12 for more detail on landlords and utility provider participation in the program). Financial assistance for eligible households may include payment of rent, rental arrears, utilities and home energy costs, utilities and home energy costs arrears, and other expenses related to housing. ERA grantees may also use funds to provide housing stability services as authorized by the respective statutes.

II. PROGRAM PROCEDURES**A. Overview**

ERA 1 provided \$25 billion for the US Department of the Treasury (Treasury) to make payments to States (defined to include the District of Columbia), US territories (Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, and American Samoa), Indian tribes or their tribally designated housing entities, as applicable, the Department of Hawaiian Home Lands, and certain local governments with more than 200,000 residents. These entities are collectively referred to as “eligible grantees” or “ERA 1 grantees.” ERA 1 award funds may be used to provide financial assistance and housing stability services to eligible households. All ERA 1 grantees that submitted the requested documentation to Treasury and executed a financial assistance agreement received their total ERA 1 award funds in one payment.

ERA 2 provided \$21.55 billion for Treasury to make payments to States (defined to include the District of Columbia), US Territories (Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, and American Samoa), and local governments with more than 200,000 residents. These entities are collectively referred to as “eligible grantees” or “ERA 2 grantees.” ERA 2 award funds may be used to assist eligible households with financial assistance and to provide housing stability services and, as applicable, to cover the costs for other affordable rental housing and eviction prevention activities.

Pursuant to 15 USC 9058c (c)(1), Treasury made initial payments of 40 percent of an eligible grantee’s total award amount to each grantee under ERA 2 that submitted the required documentation and executed the financial assistance agreement. Through February 2022, Treasury made payments of the remaining 60 percent of ERA 2 grantees’ award funds after they certified that at least 75 percent of the initial ERA 2 payment had been obligated pursuant to 15 USC 9058c(c)(2). Beginning in February 2022, Treasury altered its ERA 2 payment tranche policy to allow grantees to receive the remainder of their ERA 2 award funds in two payments (half of the remaining balance, followed by the remaining balance), subject to potential reductions resulting from the implementation of a statutory reallocation requirement with each tranche payment only made after grantees certified that they have obligated at least 75 percent of the funds already disbursed pursuant to 15 USC 9058c(c)(2).

Additional information on statutory differences between ERA 1 and ERA 2 are described in the Emergency Rental Assistance Frequently Asked Questions (FAQs) posted [at: https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/faqs](https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/faqs).

15 USC 9058a(b)(1)(A) directs Treasury to use US Census Bureau data for the most recent year for which data is available for population calculations for determining the populations of state and local governments. Funds are distributed via a per capita formula allocation detailed on Treasury.gov that considers the minimum allocation of \$200 million for states and the District of Columbia. Allocation amounts can be found via the following link: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/allocations-and-payments>.

Source of Governing Requirements

Emergency Rental Assistance (“ERA 1”), Division N, Title V, Section 501 of the Consolidated appropriations Act, 2021, Pub. L. No. 116-260 (December 27, 2020) and codified as 15 USC 9058a.

Emergency Rental Assistance (“ERA 2”), Title III, Subtitle B, Section 3201 of the American Rescue Plan Act, 2021, Pub. L. No. 117-2 (March 11, 2021) codified as 15 USC 9058c.

Section 15011 of the Coronavirus Aid, Relief, and Economic Security (CARES) Act (Pub. L. No. 116-136), codified by 15 USC 9058a, as amended by Title VIII, Section 801(b) of

the Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260), codified at 15 USC 9058c, on December 27, 2020.

Treasury's Frequently Asked Questions (FAQs) and related guidance available on Treasury.gov, including important version changes over time that can be found on the ERA website.

Availability of Other Program Information

1. General information for ERA is available on Treasury's website at www.treasury.gov/ERA. Information includes the following documents:
 - a. ERA 1 authorizing statute: <https://www.govinfo.gov/content/pkg/PLAW-116publ260/pdf/PLAW-116publ260.pdf> (See pages 889 - 899)

This document details information that is contained in the authorizing statute including funds appropriated for ERA 1.
 - b. ERA 2 authorizing statute: <https://www.govinfo.gov/content/pkg/PLAW-117publ2/pdf/PLAW-117publ2.pdf> (See pages 52 - 56)

This document details information that is contained in the authorizing statute including funds appropriated for ERA 2.
 - c. 15 USC 9058a(g)(1) regarding ERA 1 reporting: <https://www.govinfo.gov/content/pkg/PLAW-116publ136/pdf/PLAW-116publ136.pdf> (See pages 260 - 262)

This document provides information on grantee reporting the use of funds.
 - d. ERA 1 Award Terms template: <https://home.treasury.gov/system/files/136/Emergency-rental-assistance-terms-FINAL.pdf> (See pages 1 - 5)

This document provides award terms as a condition to the receipt of payment from Treasury for ERA 1.
 - e. ERA 2 Award Terms template: https://home.treasury.gov/system/files/136/ERA2_Grantee_Award_Terms_572021.pdf (See pages 1 - 5)

This document provides award terms as a condition to the receipt of payment from Treasury for ERA 2.
 - f. Treasury's ERA Frequently Asked Questions (FAQs) and guidance are available at: <https://home.treasury.gov/system/files?file=136/ERA-FAQ-7.27.22.pdf> (See pages 1-18)

Treasury released FAQs as guidance regarding ERA 1 and ERA 2 except where differences are specifically noted.

- g. Treasury's ERA 1 Reallocation guidance: <https://home.treasury.gov/system/files/136/UpdatedERA1ReallocationGuidanceSep6.pdf> (See pages 1 - 8)

The ERA 1 statute requires Treasury to identify "excess funds" for reallocation from amounts Grantees have "not obligated" from their initial ERA 1 allocations.

- h. Treasury's ERA 2 Reallocation guidance: <https://home.treasury.gov/system/files/136/ERA2-Reallocation-Guidance-March-30-2022.pdf> (See pages 1 - 6)

The ERA 2 statute requires Treasury to identify funds for reallocation from amounts allocated to eligible Grantees, but not yet paid out to them.

- i. ERA Compliance and Reporting guidance: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/reporting> (See web page)

Treasury instituted a webpage that provides information and guidance on quarterly reporting and compliance.

- j. Guidance from the Treasury Office of Inspector General (OIG) related to the reporting of ERA fraud, waste, and abuse and any future monitoring of funds requirements (where applicable): <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/fraud> (See web page)

Treasury OIG provided guidance to grantees on what to do if they suspect fraud, waste, and abuse.

- a. ERA Promising Practices guidance: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/promising-practices> (See web page)

2. Treasury has engaged with ERA grantees across the country to identify program strategies that promise to speed up program implementation, more efficiently deliver program benefits, enhance program integrity, and improve tenant and landlord access to programs.

- a. ERA Program and Service Design guidance:
<https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/service-design> (See web page)

Treasury provided guidance on consideration for good program design and delivery.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	N	Y	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. ERA 1 and ERA 2 funds may be used for administrative expenses, housing stability services, and financial assistance on behalf of an eligible household, as defined in the Treasury guidance. In the case of ERA 2, after October 2022, grantees that have obligated 75 percent of their allocations may choose to use up to 25 percent of their allocation for, “other affordable rental housing and eviction prevention purposes, as defined by the Secretary, serving very low-income families.” Treasury released guidance for these additional uses as FAQ 46 in July 2022.

Where applicable, the final ERA 1 payment amount distributed by Treasury to the ERA 1 grantee through an ERA 1 “redirect” and/or “reallocation” process, pursuant to Treasury’s Reallocation Guidance, is described on [Treasury.gov](https://www.treasury.gov). If a grantee receives redirected or reallocated funds, the funds are subject to the same requirements under the ERA 1 Award Terms previously accepted by the grantee in connection with their ERA 1 award with the addition that grantees receiving reallocated ERA 1 funds may request from Treasury an extension of their final obligation date from September 30, 2022, to December 29, 2022. Please see the ERA page at [Treasury.gov](https://www.treasury.gov) and [ERA FAQs](#) for the latest guidance regarding eligible uses under ERA 1 and ERA 2. (See FAQs 1, 4-7, 16-20, 26-28, 35 and 39-42)

- b. **Administrative Expenses:** The revised Award Terms for ERA 1 and ERA 2 awards issued by Treasury permits ERA grantees to use award funds provided to cover both direct and indirect administrative costs. The cost of a grantee contacting a landlord to encourage their participation and acceptance of ERA assistance is one of many examples of an eligible administrative cost. Under ERA 1, a grantee may use up to 10 percent of the total award amount for direct and indirect administrative costs and may use up to 10 percent of the total award amount for housing stability services. Under ERA 2, a grantee may use up to 15 percent of the total award amount for direct and indirect administrative costs and may use up to 10 percent of the total award amount for housing stability services as described below (See also FAQ 29).
- c. **Housing Stability Services:** Under ERA 1, housing stability services includes case management and other services related to the COVID-19 outbreak intended to help keep households stably housed. Under ERA 2, housing stability services do not have to be related to the COVID-19 outbreak. For ERA 1 and ERA 2, housing stability services include those that enable households to maintain or obtain housing. Such services may include, among other things, eviction prevention and eviction diversion programs; mediation between landlords and tenants; housing counseling; fair housing counseling; housing navigators or promoters that help households access programs or find housing; case management related to housing stability; housing-related services for survivors of domestic abuse or human trafficking; legal services or attorney’s fees related to eviction proceedings and maintaining housing stability; and specialized services for individuals with disabilities or seniors that support their ability to access or maintain housing (See FAQ 23).
- d. **Financial Assistance:** Financial assistance to households includes payment of rent, rental arrears, utilities and home energy costs, utility and home energy costs arrears, and other expenses related to housing pursuant to 15

USC 9058a(c)(2)(A). Please note that under the ERA 1 program, award funds used for “other expenses” must be related to housing and “incurred due, directly or indirectly, to the novel coronavirus disease (COVID-19) outbreak” (See 15 USC 9058a(c)(2)(A)(v). However, the ERA 2 statute requires that “other expenses” be “related to housing” but does not require that they be incurred due to the COVID-19 outbreak (See 15 USC 9058a(d)(1)(A)(V)). The amount of financial assistance for prospective rent cannot exceed three months under a single household application (See FAQ 10). There is no maximum dollar amount for the cumulative financial assistance that may be provided on behalf of an eligible household beyond the requirements set forth in the ERA FAQs. These requirements include that amounts paid be based on documentation of household income, leases, and equivalent forms (or for applicants unable to present adequate documentation, a written attestation from the applicant up to a monthly maximum of 100 percent of the greater of the Fair Market Rent or the Small Area Fair Market Rent for the area in which the applicant resides) and that the amount of assistance provided to any household under ERA 1 and ERA 2, including assistance provided by other ERA 1 and ERA 2 grantees cannot exceed 18 months (See FAQ 10).

Financial assistance arrears may only cover household expenses accrued on or after March 13, 2020, up to a maximum of 15 months for ERA 1 and a maximum of 18 months, under ERA 1 and ERA 2 combined. For prospective rent assistance greater than three months up to the statutory maximum of 18 months under ERA 1 and ERA 2, the household must apply to the program again and the grantee must have sufficient funds. Households may receive up to 12 months of assistance under ERA 1 and an additional three months if necessary to ensure housing stability for the household for a total of three months. This means that for ERA 1, the maximum rental arrears monthly coverage period, where applicable, is 15 months where necessary for housing stability and households may only receive up to three months of prospective rent, where applicable and qualifying (See FAQ 10).

Examples of other costs for both ERA 1 and ERA 2 include relocation expenses (including prospective relocation expenses), rental security deposits, rental fees including application and screening fees, reasonable accrued late fees, Internet service to a given rental unit, and rental bonds where necessary to avoid an eviction order, as provided in the Treasury guidance and subject to certain conditions (for example, that Internet service expenses are eligible only if grantees establish policies governing the appropriate of use for this purpose).

- e. Other Affordable Rental Housing and Eviction Prevention Purposes: Treasury released FAQ 46 on July 2022 to define these uses.

B. Allowable Costs / Cost Principles

The cost principles in 2 CFR Part 200, Subpart E (Cost Principles) except the 2 CFR 200.418 and 2 CFR 200.419 apply to ERA 1 and ERA 2. Under ERA 1, a grantee may use up to 10 percent of the total award amount for direct and indirect administrative costs. Under ERA 2, a grantee may use up to 15 percent of the total award amount for direct and indirect administrative costs (See [FAQ 29](#)).

E. Eligibility

1. Eligibility for Individuals

To ensure eligibility requirements are met, household eligibility should be tested to focus on whether grantees established and adhered to reasonable policies for evaluating household applications within Treasury's framework providing for the use of self-attestation, categorical eligibility, and fact-specific proxies in qualifying circumstances. Specific eligibility requirement can be found in FAQ 1 at <https://home.treasury.gov/system/files?file=136/ERA-FAQ-7.27.22.pdf>.

This approach to eligibility was implemented in accordance with 15 USC 9058a, for ERA 1 in 15 USC 9058a(c)(2)(C)(ii) concerning documentation of payments to households, 15 USC 9058a(f)(2)(A) and (B) of the Act concerning signature requirements for applications and documentation required for tenants, 15 USC 9058a (k)(1) concerning area median income determinations, and 15 USC 9058a (k)(3)(A)(I) and (II) concerning eligible household determinations and attestation requirements. This treatment is further explained in the ERA FAQs; 15 USC 9058a; and the Treasury, Department of Justice and Department of Housing and Urban Development joint letter issued August 27, 2021 (<https://home.treasury.gov/system/files/136/Eviction-Moratorium-Joint-Letter.pdf>).

To the extent that a grantee has established and consistently followed its own reasonable procedures for implementing an eligibility determination process, consistent with Treasury's guidance, it is not Treasury's expectation that grantees should seek additional documentation from a beneficiary after the initial determination of eligibility has been completed, including for those determined to be eligible using self-attestation, categorical eligibility, or fact-specific proxies in qualifying circumstances. Testing of individual household eligibility-related documentation should be limited to material already collected by the grantee during application as much as possible to avoid imposing undue burden on households that remain at risk of housing instability.

Treasury guidance related to determining where an applicant lives and the amount that they owe can be found in FAQ 5 <https://home.treasury.gov/system/files?file=136/ERA-FAQ-7.27.22.pdf>. Grantees must obtain, if available, a current lease, signed by the applicant and the landlord

or sublessor, that identifies the unit where the applicant resides and establishes the rental payment amount. If a household does not have a signed lease, documentation of residence may include evidence of paying utilities for the residential unit, an attestation by a landlord who can be identified as the verified owner or management agent of the unit, or other reasonable documentation as determined by the grantee. In the absence of a signed lease, evidence of the amount of a rental payment may include bank statements, check stubs, or other documentation that reasonably establishes a pattern of paying rent, a written attestation by a landlord who can be verified as the legitimate owner or management agent of the unit, or other reasonable documentation as defined by the grantee in its policies and procedures.

Additional Treasury guidance related to income determination can be found in FAQ 4 and related guidance (<https://home.treasury.gov/system/files?file=136/ERA-FAQ-7.27.22.pdf>). ERA 2 builds on the eligibility criteria in ERA 1 and permits additional flexibilities.

The ERA FAQs document the full eligibility considerations for grantees to extend emergency assistance to vulnerable populations without imposing undue documentation burdens. As described, given the challenges presented by the COVID-19 pandemic, grantees may be flexible as to the particular form of documentation they require, including by permitting photocopies or digital photographs of documents, e-mails, or attestations from employers, landlords, caseworkers, or others with knowledge of the household's circumstances. Grantees must require all applications for assistance to include an attestation from the applicant household that all information included is correct and complete. In all cases, grantees must document their policies and procedures for determining household eligibility to include policies and procedures for determining the prioritization of households in compliance with the statute and maintain records of their determinations.

Grantees may rely on a written attestation without further documentation of household income from the applicant under three approaches:

- a. Self-attestation Alone – In order to provide assistance rapidly during the public health emergency related to COVID-19, the grantee may rely on a self-attestation of household income, financial hardship, and/or risk of homelessness and housing instability without further verification if the applicant confirms in their application or other document that they are unable to provide documentation, provided the other requirements detailed in Treasury guidance are satisfied. If an applicant is able to provide satisfactory evidence of residence but is unable to present adequate documentation of the amount of the rental obligation, grantees may accept a written attestation from the applicant to support the payment of assistance up to a monthly maximum of 100 percent of the greater of the Fair Market Rent or the Small Area Fair Market Rent for the area in which

the applicant resides, as most recently determined by HUD and made available at <https://www.huduser.gov/portal/datasets/fmr.html>;

- b. Categorical Eligibility – If an applicant household income has been verified to be at or below 80 percent of the area median income (for ERA 1) or if an applicant household has been verified as a low-income family as defined in Section 3(b) of the United States Housing Act of 1937 (42 USC 1437a(b)) (for ERA 2) in connection with another local, state, or federal government assistance program, grantees are permitted to rely on a determination letter from the government agency that verified the applicant’s household income or status as a low-income family, provided that the determination for such program was made on or after January 1, 2020; and/or
- c. Fact-specific proxy – A grantee may rely on a written attestation from the applicant household as to household income if the grantee also uses any reasonable fact-specific proxy for household income, such as reliance on data regarding average incomes in the household’s geographic area. Grantees also have discretion to provide waivers or exceptions to this documentation requirement to accommodate disabilities, extenuating circumstances related to the pandemic, or a lack of technological access. In these cases, the grantee is still responsible for making the required determination regarding the applicant’s household income and documenting that determination.

Grantees have discretion to provide waivers or exceptions to certain documentation requirements to accommodate disabilities, extenuating circumstances related to the pandemic, or a lack of technological access. In these cases, the grantee is still responsible for making the required determination regarding the applicant’s household income and documenting that determination. Pursuant to 15 USC 9058a(k)(3)(B), and 2 CFR 200.403, when providing ERA 1 assistance, the grantee must review the household’s income and sources of assistance to confirm that the ERA 1 assistance does not duplicate any other assistance, including federal, state, or local assistance provided for the same costs. Grantees may rely on an attestation from the applicant regarding non-duplication with other government assistance, and the duplication requirement does not apply to ERA 2; however, to maximize program efficacy, Treasury encourages grantees to minimize the provision of duplicative assistance.

Treasury strongly encourages grantees to rely on the self-certification of applicants with regard to whether their financial hardship meet statutory eligibility requirements. Similarly, with respect to determining whether one or more individuals within the household can demonstrate a risk of experiencing homelessness or housing instability, Treasury indicates that a grantee may rely on a past due utility or rent notice or eviction notice, evidence of unsafe or unhealthy living conditions (which may include overcrowding) or any other evidence of

risk, as determined by the grantee. Treasury clearly indicates that a grantee may rely on an applicant's self-certification identifying the applicable risk factor or factors, without further documentation, if other documentation is not immediately available.

After October 2022, grantees that have obligated 75 percent of their allocations may choose to use up to 25 percent of their allocation for, "other affordable rental housing and eviction prevention purposes, as defined by the Secretary, serving very low-income families." Treasury released guidance for these additional uses as FAQ 46 in July 2022 -

See <https://home.treasury.gov/system/files?file=136/ERA-FAQ-7.27.22.pdf>. In summary, eviction prevention purposes are those previously defined as housing stability uses. For affordable housing, the eligible uses include operation or development of affordable housing that utilizes another federal grant program for affordable housing development and has a 20 year affordability covenant.

2. Eligibility for Groups of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

H. Period of Performance

Under 15 USC 9058a(e)(1), the period of performance for ERA 1 awards began on the date that the grantee executed the ERA 1 Award Terms and ended on December 31, 2021. 15 USC 9058a(h) extended the award period of performance from December 31, 2021, to September 30, 2022. Pursuant to 15 USC 9058a(e)(2), Treasury extended the award period of performance to end on December 29, 2022 for ERA 1 grantees that receive reallocated funds.

Under 15 USC 9058c(g), the period of performance for ERA 2 awards begins on the date that Treasury and the grantee executed the ERA 2 Award Terms and ends on September 30, 2025. All award funds not obligated or expended by the end of the period of performance date for ERA 1 and ERA 2 awards must be returned to Treasury as part of the award closeout process pursuant to 2 CFR 200.344(d), including amounts distributed through redirection and reallocation. See also the ERA 1 Closeout Resource at

https://home.treasury.gov/system/files/136/ERACloseoutResource_Final_9.16.22.pdf.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Title of Report: ERA Compliance Report

PRA Number: 1505-0266 (ERA 1) and 1505-0270 (ERA 2)

Reporting Cycle: Quarterly

Authoritative Requirement: 15 USC 9058c; 2 CFR 200.328 (Financial report); and 2 CFR 200.329 (Performance report)

Blank Copy of the Report: <https://home.treasury.gov/system/files/136/ERA-Treasury-Portal-User-Guide-v2.pdf> (see figures 3-7 for screenshots of user guide)

Report Instructions: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/emergency-rental-assistance-program/reporting>

Report Corrections: The Office of Recovery Program's (ORP) reporting portal has built-in functionality to reopen a report and allow recipients to make edits after the reporting deadline. However, it is ORP's policy that recipients may only make revisions if authorized by Treasury staff for a period of up to 60 days after the reporting deadline. After the revision period ends, the report is final. A resubmitted report becomes a recipient's final report within ORP's reporting portal. Recipients can generate PDFs of these reports at any time.

Key Line Items-

1. *Administrative Costs Ratio-* Quantifiable Objective Criteria: Total obligations and/or expenditures for administrative costs does not exceed the relevant threshold of total allocation (10% across the prime and all subrecipients for ERA 1, not to exceed 15% for ERA 2 across the prime and all subrecipients)
(See [ERA Reporting Guidance](#), Appendix 7, Applicable Limitations on Administrative Expenses, page 52)
2. *Housing Stability Services Ratio-* Quantifiable Objective Criteria: Total obligations and/or expenditures for housing stability services is not greater than 10% of the total amount allocated (See ERA Reporting Guidance, Appendix 7, Applicable Limitations on Administrative Expenses, page 52). Examples of these services can be found as item 23 on ages 12 and 13 of the July 27, 2022 FAQs located at <https://home.treasury.gov/system/files?file=136/ERA-FAQ-7.27.22.pdf>.
3. *System for Prioritizing Assistance-* Quantifiable Objective Criteria: The number of households with less than 50% Area Median Income (AMI) receiving financial assistance is greater than the number of households

with greater than 50% AMI receiving assistance (See ERA Reporting Guidance, Section E, Number of Unique Participant Households at Certain Income Levels, page 27)

4. *Participant Households at Certain Income Levels Eligibility*- Quantifiable Objective Criteria: The total households receiving assistance is not greater than the sum of Area Median Income (AMI) banded eligible households with a 5 to 10% margin of error to avoid false positives for medium to large recipients. Treasury is aware of some limited temporary income data availability and reporting lag due to waterfall distribution models required within the statutory design framework and related administrative processing delays, as well as the use of fact-based proxies or assistance based on participation in other programs. Does not apply to tribal recipients exempt from income reporting according to Treasury guidance and policy (See ERA Reporting Guidance, Section E, Number of Unique Participant Households at Certain Income Levels, page 27)

3. Special Reporting

Not applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

Although reporting on subaward information is applicable to ERA grantees pursuant to the award term set forth in Appendix A to 2 CFR Part 170, which is incorporated by reference in the ERA 1 and ERA 2 Award Terms, ERA grantees' compliance with these reporting requirements is not subject to audit.

M. Subrecipient Monitoring

See Part 3, Section M, "Subrecipient Monitoring" for a general description of the compliance requirements, the related audit objectives, and suggested audit procedures.

N. Special Tests and Provisions

1. ERA 1 Funds Redirection

Compliance Requirements

Pursuant to 15 USC 9058a(b)(1)(A) and Treasury's implementing instructions to requesting grantees, grantees are permitted to redirect ERA 1 funds when a locality receives an ERA 1 award and subsequently transfers 100 percent of the ERA 1 award funds received from Treasury to its eligible state and Treasury approves the transaction. The redirection of award funds is finalized when the locality has submitted the relevant redirection documentation to Treasury and Treasury has provided confirmation of acceptance. At that time, the locality's ERA 1 award is cancelled, and the locality has no further legal obligation to Treasury under the ERA 1 award.

Audit Objectives

The state's ERA 1 award is modified by the amount of the funds transferred from the local government to the state and the state is responsible as the grantee for reporting on the use of the transferred award funds that become subject to the requirements set forth in the Award Terms previously accepted by the state in connection with its ERA 1 award. A local government that has redirected 100 percent of its ERA 1 award funds to its state but has not submitted the relevant redirection documentation to Treasury or is still awaiting confirmation of acceptance of submitted documentation by Treasury, is still responsible for complying with the ERA 1 Award Terms, including submitting Monthly and Quarterly reports until their redirection forms were submitted and accepted by Treasury.

Suggested Audit Procedures

- (1) All voluntarily redirected ERA 1 award funds were approved by the grantee's authorizing official in accordance with Treasury guidance;
- (2) All redirected ERA 1 award funds were deposited to the official, authorized bank account of the receiving grantee, as approved by Treasury; and
- (3) All ERA 1 award funds received through the redirection process are used in accordance with the ERA 1 Award Terms.

2. ERA Funds Reallocation

Compliance Requirements

Pursuant to 15 USC 9058a(d), Treasury is required to reallocate "excess" ERA 1 award funds. Treasury's objective in reallocations is to ensure ERA 1 award funds remain available to grantees in accordance with their jurisdictional needs and demonstrated capacity to deliver assistance while the ERA appropriations remain available. Treasury's ERA 1 reallocation guidance on Treasury.gov and previewed [here](#) describes how grantees that have expenditure ratios below designated thresholds as of September 30, 2021, were subject to involuntary recapture, in the absence of mitigating actions, requiring the grantee to return funds to Treasury within the provided timeframes. Treasury continues to periodically assess expenditures using escalating expenditure benchmarks to identify excess funds. For the first assessment using data as of September 30, 2021, grantees could mitigate the impact of recapture by submitting a certification that the grantee's financial assistance activity had since increased to a level beyond the minimum threshold, committing to a voluntary reallocation, or by providing a Performance Improvement Plan. Treasury's reallocation guidance on Treasury.gov will continue to detail specific ERA reallocation timelines. The guidance also describes the voluntary reallocation process through which a grantee may request that Treasury reallocate its ERA 1 award funds to other ERA 1 grantees in the same state. Treasury is not recapturing funds from

Indian Tribes or Tribally Designated Housing Entities (TDHEs) prior to the end of the second quarter of 2022, except where a Tribal grantee, its TDHE, or housing authority voluntarily return funds to Treasury. Auditors should refer to the ERA 1 reallocation guidance at www.treasury.gov/era. Guidance for ERA 2 reallocation can also be found on this site.

Updated information regarding ERA 2 reallocation was posted as an update to Reallocation Guidance in March 2022.

Audit Objectives

The reallocation expenditure ratio determines whether the grantee is subject to involuntary reallocation due to an insufficient ratio and the amount of excess funds subject to recapture by Treasury. Auditors should confirm the amounts reported as expended and obligated accurately capture the grantee's housing activity at the time of submission, as reflected in a grantee's award and/or financial systems, and that grantees receiving reallocated funds met the Treasury criteria.

Suggested Audit Procedures

- a. Confirm that financial information certified by grantees used by Treasury to make reallocation determinations is accurate and that excess funds that are subject to involuntary recapture are returned to Treasury in accordance with Treasury's confirmation letter.
- b. Financial information certified as part of reallocation includes monthly expenditure and cumulative obligations levels, as described in the Treasury reallocation guidance.
- c. ERA 1 expenditures reported monthly by the grantee are inputs to Treasury's reallocation expenditure ratio.
- d. ERA 1 obligations certified in the Request for Reallocated Funds form (1505-0266), including in the Request for Voluntarily Reallocated Funds, are inputs into determining eligibility to receive reallocated funds.
- e. ERA 2 expenditures and obligations reported in quarterly reports by the grantee are inputs to Treasury's ERA 2 reallocation expenditure and obligation ratios.

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.024 COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS RAPID RESPONSE PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Community Development Financial Institutions Rapid Response Program (CDFI RRP) is to quickly deploy COVID-19 relief capital to Certified CDFIs. Funding awarded to CDFIs is being used to help distressed and underserved communities respond to the economic impacts of COVID-19 pandemic.

II. PROGRAM PROCEDURES

A. Overview

The CDFI RRP is administered by the Community Development Financial Institutions Fund (CDFI Fund), Department of the Treasury. Through the CDFI RRP, the CDFI Fund provided awards to support, prepare for, and respond to the economic impact of the COVID-19 pandemic. In order to be eligible to apply for CDFI RRP, entities must have met, or proposed to meet, specific CDFI eligibility criteria (12 CFR sections 1805.200 and 1805.201). CDFIs include entities such as banks, credit unions, depository institution holding companies, loan funds, and venture capital funds, among others.

In order to be eligible to apply for an award through the CDFI RRP, an organization must have been a Certified CDFI when the [Notice of Funds Availability](#) (NOFA) was released.

Through the CDFI RRP, CDFIs may use CDFI RRP grant funds for five categories of eligible activities supporting the provision of financial products and services. The five categories of eligible activities include: financial products, financial services, loan loss reserves, development service and capital reserves

In addition, CDFIs cannot expend more than \$200,000 or 15% of the grant award amount for seven categories of eligible activities supporting operations: Compensation—Personal Services, Compensation—Fringe Benefits, Professional Service Costs, Travel Costs, Training and Education Costs, Equipment, and Supplies. CDFIs may use the grants to support a variety of eligible lines of business: Commercial Real Estate, Small Business, Microenterprise, Community Facilities, Consumer Financial Products, Consumer Financial Services, Commercial Financial Services, Commercial Financial Products, Affordable Housing, and Intermediary Lending to Nonprofits and CDFIs.

B. Subprograms/Program Elements

The CDFI RRP was a formula-based grant program designed to provide awards to all eligible applicants as referenced in the NOFA. The latest version of the RRP NOFA can be found on the CDFI Fund website at: https://www.cdfifund.gov/sites/cdfi/files/2021-04/FY21_CDFI_RRP_NOFA_2021_04034.pdfh.

After selection of an award, each CDFI RRP award recipient entered into an assistance agreement, which includes performance goals and other terms and conditions. A template of the Assistance Agreement can be found on the CDFI Fund website at:

https://www.cdfifund.gov/sites/cdfi/files/2021-06/CDFI_RRP_Assistance_Agreement_6.16.21_updated.pdf.

Source of Governing Requirements

The CDFI RRP is authorized by the Consolidated Appropriations Act, 2021 Pub. L. 116–260, (December 27, 2020), codified at 12 CFR Parts 1805 and 1815.

Note: All capitalized terms used herein but not defined have such definitions as specified in the [CDFI Program’s Interim Rule](#), NOFA, or applicable assistance agreement.

Availability of Other Program Information

Additional information on CDFI RRP is available on the CDFI Fund website at <https://www.cdfifund.gov/programs-training/programs/rrp>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	N	N	Y	N	N

A. Activities Allowed or Unallowed

Section 3.7 of the terms and conditions in the assistance agreement prescribes the specific authorized activities of FA awards for each RRP Program award Recipient (12 CFR sections 1805.300 and 1805.301).

1. Activities Allowed

- a. Financial Assistance- The Recipient must use the Financial Assistance to support its activities in the following areas.
 - (1) Financial Products in an Eligible Market(s) and/or the Recipient's approved Target Market;
 - (2) Financial Services (Regulated Institutions only) in an Eligible Market(s) and/or the Recipient's approved Target Market;
 - (3) Development Services in an Eligible Market(s) and/or the Recipient's approved Target Market;
 - (4) Loan Loss Reserves in an Eligible Market(s) and/or the Recipient's approved Target Market;
 - (5) Capital Reserves (Regulated Institutions only);
 - (6) Compensation (Personal Services);
 - (7) Compensation (Fringe Benefits);
 - (8) Training and Education;
 - (9) Travel;
 - (10) Professional Services;
 - (11) Equipment; and
 - (12) Supplies.

2. Activities Unallowed

- a. CDFI RRP Award Recipients may not distribute assistance to an affiliate or a subsidiary without the prior consent of the CDFI Fund. This requirement is also codified in 12 CFR section 1805.302(b).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Performance Progress Report (PPR) (OMB Control Number 1559-0036) – (12 CFR 1805) - Recipients submit the PPR in the Awards Management Information System (AMIS) database once a year, three (3) months after the Recipient’s Period of Performance End Date. The PPR is used to determine if the Recipient is in compliance with the applicable Performance Goals and Measures in their Assistance Agreement. The PG&M are specific to each Recipient’s assistance agreement. Additional guidance for completing the compliance reports is available on the CDFI Fund website under the CDFI Program website on the [Compliance Resources and Reporting section](#) page in the [Annual Compliance Reports Performance Progress Report \(PPR\) and Financial Audit Statement Data Points](#) document starting on page 2. The Recipient has the ability to print copies of the PPR from the AMIS account if needed by the Auditor. The authoritative requirement for submission of the PPR is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the PPR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the PPR in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS.

Key Line Items - The following line item contains critical information (items not numbered in the report):

1. *Performance Goals and Measures (PG&M)* - The PG&M’s identified are specific to each Recipient’s assistance agreement and generally only include 2-3 PG&Ms. The data reported for the Period of Performance for each required PG&M should meet or exceed the required benchmarks as outlined in the assistance agreement.
2. *Transaction Level Report (TLR) and Consumer Loan Report (CLR) (OMB Control Number 1559-0027)* – The TLR is applicable to FA Award Recipients only. The CLR is applicable to banks and credit unions who are FA Award Recipients that originated consumer loans during the Period of Performance. Both reports are due 180 days after the Recipient’s Period of Performance End Date. The reports are used to collect compliance and performance data and provide transactional information on an organization’s portfolio. The reports require

reporting on newly originated loans and investments closed as of a Recipient's fiscal year end. The guidance for completing the reports can be found in the [CDFI TLR Data Point Guidance](#) available on the CDFI Fund website. The authoritative requirement for submission of the TLR/CLR is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the TLR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the "Approval History" at the bottom of the TLR in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS.

Key Line Items for the TLR - The following line items contain critical information:

1. *Column C - TLR Submission Year* – Submission year is the current data year.
2. *Column D - Date Originated* – Reporting date is within the reporting period.
3. *Column E - Original Loan/Investment Amount.*
4. *Column I - Interest Rate.*
5. *Column K – Points.*
6. *Column L - Origination Fees.*
7. *Column O - Term.*
8. *Column AH - Annual Gross Revenue from Business Operations at Time of Loan/Investment Origination.*

Key Line Items for the CLR - The following line items contain critical information:

1. *Column E - Total Originated Amount* –the ratio of the total amount and the total number is equal to 1.
2. *Column F - Total Originated Number* –the ratio of the total amount and the total number is equal to 1.
3. *Column B - Fiscal Year* – Reported value is equal to the value of the current data year.

Uses of Award Report (UOA) (OMB Control Number 1559-0032) – Recipients submit the UOA in the AMIS database once a year, three (3) months after the Recipients Period

of Performance End Date. Additional guidance for completing the compliance reports is available on the CDFI Fund website under the CDFI Program website on the [Compliance Resources and Reporting section](#) page in the Uses of Award (UOA) Report Data Points Description and Related Guidance and Financial Audit Statement Data Points document starting on page 2. The authoritative requirement for submission of the UOA is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the UOA has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the UOA in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS.

Key Line Items - The following line items contain critical information (items not numbered in the report):

1. Advances of FA Funds held in interest-bearing accounts
2. Amount of Interest earned
3. Interest earned in excess of \$500 has been remitted to the Department of Health & Human Services

Category of Activity - Total Dollar Amount – The total dollar amount of the activity expended during the Period of Performance.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.025 COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS SMALL DOLLAR LOAN PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Community Development Financial Institutions (CDFI) Small Dollar Loan Program (SDL Program) is to use federal resources to help Certified CDFIs address the issue of expanding consumer access to mainstream financial institutions and provide alternatives to high-cost small dollar loans. The program was also created to help unbanked and underbanked populations build credit, access affordable capital, and allow greater access to the mainstream financial system.

II. PROGRAM PROCEDURES

A. Overview

To provide grants for Loan Loss Reserves to enable: (1) a Certified Community Development Financial Institution (CDFI) or any partnership between a Certified CDFI and federally insured depository institution with a primary mission to serve targeted Investment Areas to establish a loan-loss reserve fund in order to defray the costs of a small dollar loan program established or maintained by such institution; and (2) to provide grants for Technical Assistance to a Certified CDFI or any partnership between or among Certified CDFIs to establish and maintain small dollar loan programs. SDL Program grants cannot be used to provide direct loans to consumers. This program is intended to provide an alternative to high-cost small dollar loans, as well as help unbanked and underbanked populations build credit, access affordable capital, and allow greater access into the mainstream financial system.

SDL Program grants cannot be used to provide direct loans to consumers.

B. Subprograms/Program Elements

Through the SDL Program, the CDFI Fund provides (1) LLR Awards to enable CDFIs to establish a loan loss reserve fund in order to cover losses on small dollar loans from a new or existing small dollar loan program and (2) TA Awards to support technology, staffing, and other eligible activities to enable a Certified CDFI to establish and maintain a small dollar loan program. LLR and TA Awards are provided through a competitive nationwide evaluation and selection process. After being selected for an Award, each SDL Program Award Recipient enters into an assistance agreement, which includes Performance Goals and Measures and other terms and conditions.

Source of Governing Requirements

The SDL Program is authorized by Title XII— Improving Access to Mainstream Financial Institutions Act of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Pub. L. 111– 203), which amended the Riegle Community Development Banking and Financial Institutions Act of 1994 Pub. L. No. 103-325 (September 23, 1994), codified at 12 CFR Part 1805.

Note: All capitalized terms used herein but not defined have such definitions as specified in the [CDFI Program’s Interim Rule](#), NOFA, or applicable assistance agreement.

Availability of Other Program Information

Additional information on the SDL Program is available on the CDFI Fund website at <https://www.cdfifund.gov/programs-training/programs/sdlp>. A template of the assistance agreement is available on the CDFI Fund website at: [SDL Program Assistance Agreement FY 2022 FINAL.pdf \(cdfifund.gov\)](#). If there are specific questions regarding the programs, the CDFI Fund may be contacted via telephone at (202) 653-0421 or by e-mail at cdfihelp@cdfi.treas.gov.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	N	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Technical Assistance- TA Awards may be used for technology, staff support, and other eligible activities to enable a Certified CDFI to establish and maintain a small dollar loan program. Section 3.2 of the terms and conditions in the assistance agreement prescribes the specific authorized activities of the TA Award amounts for each SDL Program Award Recipient.
- b. Loan Loss Reserve -LLR grants may be used to establish a LLR fund in order to cover the losses on small dollar loans associated with starting a new small dollar loan program or expanding an existing small dollar loan program. Section 3.2 of the terms and conditions in the assistance agreement prescribes the specific authorized activities of the LLR Award amounts for each SDL Program Award Recipient.

2. *Activities Unallowed*

- a. SDL Program Award Recipient may not distribute assistance to an affiliate or subsidiary without the prior consent of the CDFI Fund.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

- a. *Performance Progress Report (PPR)* (OMB Control Number 1559-0036) – (12 CFR 1805) - Recipients submit the PPR in the Awards Management Information System (AMIS) database once a year, three (3) months after the Recipient’s Period of Performance End Date. The PPR is used to determine if the Recipient is in compliance with the applicable Performance Goals and Measures in their Assistance Agreement. The PG&M’s are specific to each Recipient’s assistance agreement. Additional guidance for completing the compliance reports is available on the CDFI Fund website under the CDFI Program website on the [Compliance Resources and Reporting](#) section page in the Annual Compliance Reports Performance Progress Report (PPR) and Financial Audit Statement Data Points document starting on page 2. The Recipient has the ability to print copies of the PPR from its AMIS account if needed by the Auditor. The authoritative requirement for submission of the PPR is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the PPR has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the PPR in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS

Key Line Items - The following line item contains critical information (items not numbered in the report):

1. *Performance Goals and Measures (PG&M)* - The PG&Ms are specific to each Recipient’s assistance agreement. The data reported for the Period of Performance for each required PG&M should meet or exceed the required benchmarks.
- b. *Uses of Award Report (UOA)* (OMB Control Number 1559-0032) – Recipients submit the UOA in the AMIS database once a year, three (3) months after the Recipients Period of Performance End Date. Additional guidance for completing the compliance reports is available on the CDFI Fund website under the CDFI Program website on the Compliance Resources and Reporting section page in the Uses of Award (UOA) Report Data Points Description and Related Guidance and Financial Audit Statement Data Points document starting on page 2. The authoritative requirement for submission of the UOA is codified in 12 CFR 1805.803.

Recipients may request to revise a previously submitted report without it having an impact on their compliance status. The request should indicate the reason(s) for the revision(s) and the proposed changes. Revision requests should be submitted in a service request through the Recipients AMIS account. Once the UOA has been unlocked for revisions the Recipient has five (5) business days to make any necessary corrections and resubmit the report. Auditors can review the “Approval History” at the bottom of the UOA in AMIS to determine the report approval status. The Auditor will review the most recent version of the report available in AMIS.

Key Line Items – The following line items contain critical information (items not numbered in the report):

1. *Category of Activity* – These are the authorized activities for LLR and TA Awards as defined in Schedule 2 “General Award Terms and Conditions” of the assistance agreement. The Recipient is/has expended federal award dollars on authorized activities.
2. *Category of Activity - Total Dollar Amount* – The total dollar amount of the activity expended during the Period of Performance.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF THE TREASURY
ASSISTANCE LISTING 21.026 HOMEOWNER ASSISTANCE FUND PROGRAM

I. PROGRAM OBJECTIVES

Note: This program is considered a “higher risk” program for 2023, pursuant to 2 CFR section 200.519(c)(2). Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process.

The Homeowner Assistance Fund (HAF) program provides \$9.961 billion for the U.S. Department of the Treasury (“Treasury”) to make payments to states (defined to include the District of Columbia, Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, and American Samoa), Indian tribes or their tribally designated housing entities, and the Department of Hawaiian Home Lands (collectively the “eligible entities” or “HAF Participants”) to mitigate financial hardships associated with the coronavirus pandemic, including for the purpose of preventing homeowner mortgage delinquencies, defaults, foreclosures, loss of utilities or home energy services, and displacements of homeowners experiencing financial hardship after January 21, 2020, through qualified expenses related to mortgages and housing.

II. PROGRAM PROCEDURES

A. Overview

Section 3206 of the American Rescue Plan Act of 2021 (the “Act”), Pub. L. No. 117-2 (March 11, 2021), codified as 15 USC 9058d (15 USC 9058d), established the HAF program and provides \$9.961 billion for Treasury to make payments to the eligible entities to provide the assistance to homeowners for qualified expenses related to mortgages and housing as described in 15 USC 9058d(c)(1) and Treasury’s HAF Guidance.

Pursuant to 15 USC 9058d(c)(2), at least 60 percent of the HAF participants’ award funds must be used to provide assistance with mortgage payments, homeowner’s insurance, utility payments, and other qualified expenses related to mortgages and housing to eligible homeowners within a certain target income. The law requires HAF participants to prioritize the remaining award funds to provide assistance to “socially disadvantaged individuals” (see also the section on “Targeting” in the HAF Guidance).

15 USC 9058d(d) prescribes that the HAF funding must be allocated as follows:

1. \$30 million for the US Virgin Islands, Guam, Northern Mariana Islands, and American Samoa (US territories);
2. \$498 million for the Department of Hawaiian Home Lands (DHHL) and Indian tribes or their tribally designated housing entities; and

3. the remainder for the 50 states, the District of Columbia, and Puerto Rico. Each state, the District of Columbia, and Puerto Rico will receive a minimum payment of \$50 million. Amounts that will be paid to states, the District of Columbia, and Puerto Rico are based on homeowner need as it relates to unemployment and mortgage delinquencies or mortgage foreclosures in those jurisdictions.

Amounts paid to US territories are based on share of population, and amounts paid to tribal entities are based on a formula under 15 USC 9058d(f).

Source of Governing Requirements

- Section 3206 of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (March 11, 2021) and codified at 15 USC 9058d.
- As implemented by Treasury’s HAF guidance available on Treasury.gov, including important version changes over time that can be found on the site.

Availability of Other Program Information

General information for the HAF program is available through the program website at www.treasury.gov/HAF. Information includes the following documents:

- [HAF Guidance](#) (See pages 1-12)
Provides guidance on HAF program purpose, definitions, Notice of Request for HAF payments, qualified expenses, homeowner eligibility, HAF plans, and reporting and monitoring as required under section 15 USC 9058d.
- [HAF Interim Report User Guide](#) (See pages 1-27)
Provides guidance on using Treasury’s Portal to submit the required Homeowner Assistance Fund (HAF) Interim Report.
- [HAF Reporting Frequently Asked Questions \(FAQs\)](#) (See pages 1-10)
Provided answers to frequently asked questions on HAF reports.
- [HAF Quarterly Report User Guide](#) (See pages 1-49)
The User Guide contains detailed guidance and instructions for HAF participants in using Treasury’s Portal for submitting the HAF Quarterly Report.
- [HAF Annual Report User Guide](#) (See pages 1-31)

Provides guidance on using Treasury’s Portal to submit the required HAF Annual Report.

- [HAF Guidance on Participant Compliance and Reporting Responsibilities](#) (See pages 1-25)

Provides detail on HAF participants’ compliance and reporting responsibilities under the HAF program, and should be read in concert with the [HAF Financial Assistance Agreement](#) (See pages 1-5), the [HAF authorizing statute](#) (See pages 60-63), and the [HAF Guidance](#) (See pages 1-12).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	Y	N	N	N	Y	Y	N

A. Activities Allowed or Unallowed

HAF participants may use their HAF award funds for qualified expenses related to mortgages and housing, including for the purpose of preventing homeowner mortgage delinquencies, homeowner mortgage defaults, homeowner mortgage foreclosures, homeowner loss of utilities or home energy services, and displacements of homeowners experiencing financial hardship after

January 21, 2020. Please see pages 5 to 8 of the [HAF Guidance](#) for the full list of qualified expenses.

B. Allowable Cost / Cost Principles

HAF funds are considered “other financial assistance” per 2 CFR 200.1 and are administered by Treasury as direct payments for specified use. Refer to 2 CFR Part 200, Subpart E regarding the Cost Principles that apply to the use of funds under this program.

1. Allowable Costs under the HAF program include the following:
 - a. mortgage payment assistance;
 - b. financial assistance to allow a homeowner to reinstate a mortgage or to pay other housing-related costs related to a period of forbearance, delinquency, or default;
 - c. mortgage principal reduction, including with respect to a second mortgage provided by a nonprofit or government entity;
 - d. facilitating mortgage interest rate reductions;
 - e. payment assistance for: (a) homeowner’s utilities, including electric, gas, home energy, water, and wastewater; (b) homeowner’s internet service, including broadband internet access service, as defined in 47 CFR 8.1(b) (or any successor regulation); (c) homeowner’s insurance, flood insurance, and mortgage insurance; (d) homeowner’s association fees or liens, condominium association fees, or common charges, and similar costs payable under a unit occupancy agreement by a resident member/shareholder in a cooperative housing development; and (e) down payment assistance loans provided by nonprofit or government entities;
 - f. payment assistance for delinquent property taxes to prevent homeowner tax foreclosures;
 - g. measures to prevent homeowner displacement, such as home repairs to maintain the habitability of a home or assistance to enable households to receive clear title to their properties;
 - h. reimbursement of funds expended by a state, local government, or applicable tribal entity during the period beginning on January 21, 2020, and ending on the date that the first funds are disbursed by the HAF participant under the HAF, for a qualified expense (other than any

qualified expense paid directly or indirectly by another federal funding source, or any qualified expenses described in clauses (6), (7), (8), or (10) of this definition);

- i. payment of lot rent for a manufactured home, where such payment would promote housing stability and prevent the default of the resident of the manufactured home; and
- j. reimbursement of funds expended by a state, local government, or entity described in clause (3) or (4) of the definition above of “eligible entity” during the period beginning on the date the participant received its initial HAF payment and ending on the date the participant received the balance of funds requested in the participant’s HAF plan for a qualified expense consistent with the participant’s approved HAF Plan (other than any qualified expense paid directly or indirectly by another federal funding source).

Please see the HAF Guidance on the HAF program page on Treasury.gov for the latest guidance regarding the eligible uses of HAF funds.

E. Eligibility

1. Eligibility for Individuals

Treasury expects auditors to test the eligibility of homeowners to receive HAF assistance and to focus on whether HAF participants established and adhered to reasonable policies and procedures for evaluating homeowners’ applications in accordance with the HAF Guidance which permits HAF participants to reasonably rely on self-attestation.

Testing of individual homeowner eligibility-related documentation should be limited to material already collected by the HAF participant in the application as much as possible to avoid imposing undue burden on homeowners that are experiencing financial hardships.

The HAF Guidance documents the full eligibility considerations for HAF participants to extend financial assistance to vulnerable populations without imposing undue documentation burdens. HAF participants must require all applications for assistance to include an attestation from the applicant homeowner that all information included is correct and complete. In addition, HAF participants are expected to have policies and procedures to determine homeowner eligibility in the following two criteria:

Financial Hardship: HAF participants may rely on homeowners' attestations that they experienced financial hardship after January 21, 2020 (including a hardship that began

before January 21, 2020 but continued after that date). The attestation must describe the nature of the financial hardship (for example, job loss, reduction in income, or increased costs due to healthcare or the need to care for a family member).

Income Determination: HAF participants may take one of two approaches to income verification: (1) the homeowner may provide a written attestation as to household income together with supporting documentation such as paystubs, W2s or other wage statements, IRS Form 1099s, tax filings, depository institution statements demonstrating regular income, or an attestation from an employer; or (2) the homeowner may provide a written attestation as to household income and the HAF participant may use a reasonable fact-specific proxy for household income, such as reliance on data regarding average incomes in the household's geographic area. To be eligible for HAF assistance, the homeowner must have income equal to or less than 150 percent of the area median income (AMI) or 100 percent of the median income for the United States, whichever is greater.

For additional information, please see Treasury's HAF Guidance at: <https://home.treasury.gov/system/files/136/HAF-Guidance.pdf>

2. Eligibility of Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

Not Applicable

3. Earmarking

1. Counseling or educational efforts by housing counseling agencies approved by HUD, tribal government (including such efforts by in-house housing counselors who are HUD certified or tribally approved), or legal services, targeted to households eligible to be served with funding from the HAF related to foreclosure prevention or displacement, in an aggregate amount up to 5 percent of the funding from the HAF received by the HAF participant.

2. Planning, community engagement, needs assessment, and administrative expenses related to the HAF participant's disbursement of HAF funds for qualified expenses, in an aggregate amount not to exceed 15 percent of the funding from the HAF received by the HAF participant.
3. Participants are providing not less than 60% of funds to homeowners with income less than 100% AMI or 100% of U.S. median income.
4. Participants target homeowners that are classified as Socially Disadvantaged Individuals (SDI) and 100 percent AMI or less.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not applicable
- d. *Other: Quarterly Report (PRA 1505-0269)*- Quarterly

Authoritative Requirement: 2 CFR 200.328

Report Instructions:

https://home.treasury.gov/system/files/136/HAF_QuarterlyReportUserGuide.pdf

Report Corrections: The Office of Recovery Program's (ORP) reporting portal has built-in functionality to reopen a report and allow recipients to make edits after the reporting deadline. However, it is ORP's policy that recipients may only make revisions if authorized by Treasury staff for a period of up to 60 days after the reporting deadline. After the revision period ends, the report is final. A resubmitted report becomes a recipient's final report within ORP's reporting portal. Recipients can generate PDFs of this reports at any time.

Key Line Items –

1. *Administrative Expenses*- Quantifiable Objective Criteria: Obligations and expenditures do not exceed 15% for admin expenses, as noted on page 4 of the [HAF Guidance](#) (See item #10).

2. *Services, Counseling & Education*- Quantifiable Objective Criteria: Obligations and expenditures do not exceed 5% for legal services, counseling, and education, as noted on page 4 of the [HAF Guidance](#).

2. Performance Reporting

- a. *Title of Report: Annual Performance Report*
 PRA Number: 1505-0269
 Reporting Cycle: Annual
 Authoritative Requirement:
https://home.treasury.gov/system/files/136/HAF_GuidanceonParticipantComplianceandReportingResponsibilities.pdf
 Blank Copy of the Report: [HAF_AnnualReportUserGuide_5.23.22.docx](#)
 Report Instructions: [HAF_AnnualReportUserGuide_5.23.22.docx](#)

Key Line Item(s)

1. *Socially Disadvantaged Individuals*- Quantifiable Objective Criteria: Participants are providing not less than 60% of funds to homeowners with income less than 100% AMI or 100% of U.S. median income.
2. *Area Median Income*- Quantifiable Objective Criteria: Participants target homeowners that are classified as SDI and 100 percent AMI or less. This requirement can be found on page 6 of the [HAF Guidance](#).

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

Although reporting on subaward information is applicable to HAF participants pursuant to the award term set forth in Appendix A to 2 CFR Part 170, which is incorporated by reference in the HAF Financial Assistance Agreement, HAF participants' compliance with these reporting requirements is not subject to audit.

M. Subrecipient Monitoring

All HAF participants and their subrecipients must be registered in SAM.gov. HAF participants must monitor and manage their subrecipients in accordance with 2 CFR 200.332 to ensure their subrecipients are administering the subawards in compliance with the terms and conditions of the subawards.

DEPARTMENT OF THE TREASURY**ASSISTANCE LISTING 21.027 CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUNDS****I. PROGRAM OBJECTIVES**

Note: This program is considered a “higher risk” program for 2023, pursuant to 2 CFR section 200.519(c)(2). Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process.

Note: Per Part IV, “Other Information,” certain Coronavirus State and Local Fiscal Recovery Funds (SLFRF) recipients are provided with an option to have an alternative compliance examination engagement in lieu of a Single Audit or a Program-Specific Audit under 2 CFR Part 200, Subpart F.

The purpose of the SLFRF program is to provide direct payments to states (defined to include all 50 states and the District of Columbia), US territories (defined to include Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, and American Samoa), Tribal governments, metropolitan cities, counties, and (through states) non-entitlement units of local government (NEUs) (collectively the “eligible entities”) to:

1. Respond to the public health emergency with respect to Coronavirus Disease 2019 (COVID-19) or its negative economic impacts, including by providing assistance to households, small businesses, nonprofits, and impacted industries, such as tourism, travel, and hospitality;
2. Respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers of the recipient that perform essential work or by providing grants to eligible employers that have eligible workers who are performing essential work;
3. Provide government services, to the extent of the reduction in revenue of the eligible entities due to the COVID-19 public health emergency relative to revenues collected in the most recent full fiscal year of the eligible entities prior to the emergency; and
4. Make necessary investments in water, sewer, or broadband infrastructure.

II. PROGRAM PROCEDURES**A. Overview**

Sections 602 and 603 of the Social Security Act (the “Act”), as added by section 9901 of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (Mar. 11, 2021), codified at 42 USC sections 802 and 803, authorized the Coronavirus State Fiscal Recovery Fund and Coronavirus Local Fiscal Recovery Fund, respectively (referred to collectively as the

“Coronavirus State and Local Fiscal Recovery Funds” or “SLFRF”). SLFRF is administered by the US Department of the Treasury (“Treasury”) and provides assistance in the form of direct payments for specified use. SLFRF provides \$350 billion for payments to eligible entities.

The total allocations to the eligible entities under SLFRF are as follows:

- (1) \$195.3 billion reserved for making payments to the 50 states and the District of Columbia;
- (2) \$4.5 billion reserved for making payments to the US territories;
- (3) \$20 billion reserved for making payments to Tribal governments;
- (4) \$45.57 billion reserved for making payments to metropolitan cities;
- (5) \$65.1 billion reserved for making payments to counties; and
- (6) \$19.53 billion reserved for making payments to NEUs.

Amounts paid to eligible states and local governments were based on 2019 population data from the US Census Bureau as well as latest available data from the Bureau of Labor Statistics at the time of the issuance of Treasury’s Interim Final Rule, May 17, 2021. Treasury made a determination to allocate payments to Tribal governments based on enrollment reported to the Bureau of Indian Affairs and employment data, as well as consultation with Tribal leaders.

Prior to receipt of award funds, all eligible entities are required to execute a Financial Assistance Agreement, which includes the Award Terms and Conditions that recipients must comply with in carrying out the objectives of their award, as well as the certification required at 42 USC 802(d)(1). Tribal and local governments are not required to provide such certification as a condition of receiving payment under SLFRF. Eligible entities are required to use their award funds as set forth at 42 USC sections 802(c)(1) and 803(c)(1) and Treasury’s Final Rule, 31 CFR Part 35 to meet pandemic response needs and rebuild a strong, more equitable economy as the country recovers.

Source of Governing Requirements

The SLFRF program is authorized by sections 602 and 603 of the Social Security Act as added by section 9901 of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (Mar. 11, 2021), codified at 42 USC sections 802 and 803, and implemented by Treasury’s [Interim Final Rule](#) and [Final Rule](#) at 31 CFR Part 35.

On January 6, 2022, Treasury adopted a Final Rule to implement the requirements of the SLFRF program. The Final Rule responded to comments Treasury received on the Interim Final Rule and became effective on April 1, 2022.

Along with the Final Rule, Treasury published a [Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule](#) (the “Statement”) that clarifies the transition from compliance with the Interim Final Rule to compliance with the Final Rule. Recipients should review the Final Rule for additional information. Recipients must comply with the Final Rule beginning on April 1, 2022. Prior to April 1, 2022, recipients were permitted to take actions and use funds in a manner consistent with the Final Rule, and Treasury will not take action to enforce the Interim Final Rule if a use of funds is consistent with the terms of the Final Rule, regardless of when the SLFRF funds were used. This means that Treasury will not take action to enforce against uses in accordance with the Interim Final Rule to the extent that the recipient wishes to change its planned uses of SLFRF funds in a manner consistent with the Final Rule.

Prior to April 1, 2022, the Interim Final Rule remained in effect. Accordingly, recipients were able to obligate and expend funds in a manner consistent with the Interim Final Rule prior to April 1, 2022. In addition, Treasury recognizes that recipients took steps to use SLFRF funds for projects in a manner consistent with the Interim Final Rule prior to adoption of the Final Rule. To the extent that a recipient took significant steps toward obligating SLFRF funds in a manner consistent with the Interim Final Rule prior to January 6, 2022, Treasury will generally not take action to enforce provisions contained in the Final Rule, to the extent that they are more restrictive than those in the Interim Final Rule. Such significant steps include initiation of procurement or grantmaking actions, detailed planning of projects or programs, appropriation of funds, and other significant planning steps.

Recipients must follow the requirements on award funds they expended for their fiscal year 2023 based on the requirements set forth at 42 USC sections 802 and 803, Treasury’s Interim Final Rule, Treasury’s Final Rule, and Frequently Asked Questions (FAQs), as applicable. If an expenditure is not consistent with the Final Rule, then auditors should consult the Statement in order to determine how to assess the applicability of the Interim Final Rule and use their professional judgement. See the IV., “Other Information” section below for auditor guidance relating to the criteria auditors should use for compliance testing purposes.

Auditors should note that the [Consolidated Appropriations Act, 2023](#) amended Sections 602 and 603 of the Social Security Act to provide state, local, and Tribal governments the flexibility to use SLFRF funds for additional eligible uses. See Division LL, Section 102 of the Consolidated Appropriations Act. Additional guidance will be forthcoming and available on the Treasury website.

Availability of Other Program Information

Additional information on the requirements for SLFRF is available through the program webpage on Treasury’s website at <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds>.

SLFRF’s Compliance and Reporting Guidance can be found at <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds/recipient-compliance-and-reporting-responsibilities>.

The Compliance and Reporting Guidance provides additional detail and clarification for each recipient's compliance and reporting responsibilities and should be read in concert with the Award Terms and Conditions (Please refer to: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-fund/request-funding>), the authorizing statute, the Interim Final Rule and Final Rule, as applicable, and other regulatory and statutory requirements.

Interim Final Rule FAQs and Final Rule FAQs about SLFRF are available on the program webpage on Treasury's website at <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds>.

The FAQ documents contain answers to frequently asked questions regarding the Interim Final Rule and the Final Rule. Treasury intends to update the Final Rule FAQs periodically in response to questions received from stakeholders. The Final Rule FAQs are applicable to the Final Rule, although readers will notice that many FAQs have been incorporated from the Interim Final Rule FAQs, because they remain applicable. Answers to frequently asked questions that are unique to the Interim Final Rule remain available on the Treasury website. The Final Rule FAQs include a categorization to assist readers in identifying the FAQs that remain largely the same as in the Interim Final Rule FAQs and the FAQs that are new or have been updated in conformity with the Final Rule.

Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule can be found at <https://home.treasury.gov/system/files/136/SLFRF-Compliance-Statement.pdf>.

The Statement clarifies the transition from compliance with the Interim Final Rule to compliance with the Final Rule. Recipients should also review the Final Rule for additional information.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status Discussion in Part 1 for additional information.

Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	Y	Y	N	Y	Y	N

A. Activities Allowed or Unallowed

Recipients may use SLFRF payments for any eligible expenses subject to the restrictions set forth in sections 602 and 603 of the Social Security Act as added by section 9901 of the American Rescue Plan Act of 2021 codified at 42 USC sections 802 and 803 respectively. Recipients may also use payments subject to the restrictions set forth Division LL, Section 103 of the Consolidated Appropriations Act, 2023, Treasury's Interim Final Rule and Final Rule at 31 CFR Part 35, and FAQs available at <https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf> and <https://home.treasury.gov/system/files/136/SLFRF-Final-Rule-FAQ.pdf>.

1. *Activities Allowed-* Recipients may use payments from SLFRF to:

- a. **Respond to the public health and negative economic impacts of the pandemic**, by supporting the health of communities, and helping households, small businesses, impacted industries, and the public sector recover from economic impacts of the pandemic;
- b. **Replace lost public sector revenue** to provide government services; recipients may use this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic.
- c. **Provide premium pay for essential workers**, offering additional support to those who have borne and will bear the greatest health risks because of their service in critical infrastructure sectors; and
- d. **Invest in water, sewer, and broadband infrastructure**, making necessary investments to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet.

2. *Activities Unallowed*
 - a. Offset a reduction in net tax revenue (applicable to states and territories)
 - b. Deposits into pension funds (applicable to all recipients except Tribes)
 - c. Debt service or replenishing financial reserves (e.g., “rainy day funds”) (applicable to all recipients)
 - d. Satisfaction of settlements and judgments (applicable to all recipients)
 - e. Programs, services, or capital expenditures that include a term or condition that undermines efforts to stop the spread of COVID-19 (applicable to all recipients)

Under the Final Rule, recipients can elect a one-time “standard allowance” of \$10 million (not to exceed the recipient’s award amount) to spend on the “provision of government services” during the period of performance. Alternatively, recipients can calculate lost revenue for the years 2020, 2021, 2022, and 2023 based on the formula provided in the Final Rule to determine the amount of SLFRF funds that can be used for the “provision of government services.” In calculating revenue loss, recipients can choose whether to use calendar or fiscal year dates but must be consistent throughout the period of performance. If calculating revenue loss, recipients must provide auditors with evidence supporting their revenue loss calculation. Treasury has determined that there are no subawards under this eligible use category. The definition of subrecipient in the Uniform Guidance provides that a subaward is provided for the purpose of “carrying out” a portion of a federal award. Recipients’ use of revenue loss funds does not give rise to subrecipient relationships.

The dollar amount of the revenue loss determines the limit for the amount of SLFRF funds that can be used to “provide government services” (which is one of four eligible uses of SLFRF funds). For Schedule of Expenditures of Federal Awards (SEFA) reporting purposes, the aggregate expenditures for all four eligible use categories are reported on the SEFA and not the result of the revenue loss calculation or standard allowance. See the IV, “Other Information” section below for guidance on the related Schedule of Expenditures of Federal Award reporting.

B. Allowable Cost/Cost Principles

SLFRF is considered “other financial assistance” per 2 CFR section 200.1 and is administered as direct payments for specified use.

The auditor is not expected to determine whether the recipient exceeded the maximum limits for specified eligible use categories. Treasury will evaluate that the recipient was within the limits for the eligible use categories through reviewing the recipient’s reporting, which is subject to audit.

The 2 CFR Part 200, Subpart E is applicable to expenditures under SLFRF unless stated otherwise. Given the purpose and very broad scope of eligible uses of the revenue replacement funds, only a subset of the requirements in 2 CFR Part 200, Subpart E apply to recipients' use of such funds, as follows:

- 2 CFR 200.400(a) - (c), and (e) Policy guide;
- 200.403(a), (c), (d), (g), and (h) Factors affecting allowability of costs; and
- 200.404(e) Reasonable costs.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

Not Applicable

3. Earmarking

Recipients may use payments from SLFRF to replace lost public sector revenue to provide government services. Recipients may use this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic.

Under the Final Rule, recipients can elect a one-time "standard allowance" of \$10 million (not to exceed the recipient's award amount) to spend on the "provision of government services" during the period of performance. Alternatively, recipients can calculate lost revenue for the years 2020, 2021, 2022, and 2023 based on the formula provided in the Final Rule to determine the amount of SLFRF funds that can be used for the "provision of government services."

In calculating revenue loss, recipients can choose whether to use calendar or fiscal year dates but must be consistent throughout the period of performance. If calculating revenue loss, recipients must provide auditors with evidence supporting their revenue loss calculation.

Treasury has determined that there are no subawards under this eligible use category. The definition of subrecipient in the Uniform Guidance provides that a subaward is provided for the purpose of "carrying out" a portion of a federal award. Recipients' use of revenue loss funds does not give rise to subrecipient relationships.

The dollar amount of the revenue loss determines the limit for the amount of SLFRF funds that can be used to "provide government services" (which is one of

four eligible uses of SLFRF funds). For Schedule of Expenditures of Federal Awards (SEFA) reporting purposes, the aggregate expenditures for all four eligible use categories are reported on the SEFA and not the result of the revenue loss calculation or standard allowance. See the IV, “Other Information” section below for guidance on the related Schedule of Expenditures of Federal Award reporting.

H. Period of Performance

Recipients may only use funds to cover costs incurred during the period beginning on March 3, 2021 and ending on December 31, 2024, pursuant to the Final Rule at 31 CFR section 35.5(a). Recipients must liquidate all obligations incurred by December 31, 2024, under the award no later than December 31, 2026, which is the end of the period of performance. As such, program obligations or costs must be incurred from the period beginning on March 3, 2021 and ending on December 31, 2024. No new obligations or costs may be incurred during the period beginning January 1, 2025 and ending on December 31, 2026. During this two-year period from January 1, 2025, through December 31, 2026, recipients are only permitted to expend funds to satisfy obligations incurred by December 31, 2024.

I. Procurement and Suspension and Debarment

1. Procurement

Recipients may use award funds to enter into contracts to procure goods and services necessary to implement one or more of the eligible purposes outlined in 42 USC sections 802(c) and 803(c) and Treasury’s Interim Final Rule and Final Rule. As such, except as noted in the next paragraph, recipients are expected to have procurement policies and procedures in place that comply with the procurement standards outlined in the Uniform Guidance.

In July 2022, Treasury released [Final Rule FAQ 13.15](#), which explains that only a subset of the requirements in Subparts D and E of the Uniform Guidance apply to recipients’ use of award funds under the revenue loss eligible use category. The requirements of 2 CFR sections 200.318 through 200.327 are not included in the list of requirements applicable to such funds.

Recipients may also refer to section 13 of the [Final Rule FAQs](#), which includes FAQs related to procurement and other Uniform Guidance-related topics.

2. Suspension and Debarment

See Part 3.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Title of Report: Project and Expenditure Report

PRA Number: 1505-0271

Reporting Cycle: Quarterly and Annual

Authoritative Requirement: 2 CFR 200.328 and [31 CFR section 35.4\(c\) Reporting and requests for other information](#)

Blank Copy of the Report: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds/recipient-compliance-and-reporting-responsibilities> - See pages 17 through 34.

Report Instructions: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds/recipient-compliance-and-reporting-responsibilities> - See pages 17 through 34.

Report Corrections: Recipients will have an opportunity to reopen and provide edits to their submitted Project and Expenditure Reports any time before the reporting deadline. Recipients will then be required to re-certify and submit the report again to properly reflect any edits made. After the reporting deadline, unless prompted by Treasury staff, recipients will not be able to edit their submitted report, any changes or revisions will need to be reflected in the next Project and Expenditure report.

The Office of Recovery Program's (ORP) reporting portal has built-in functionality to reopen a report and allow recipients to make edits after the reporting deadline. However, it is ORP's policy that recipients may only make revisions if authorized by Treasury staff for a period of up to 60 days after the reporting deadline. After the revision period ends, the report is final. A resubmitted report becomes a recipient's final report within ORP's reporting portal. Recipients can generate PDFs of this reports at any time.

Key Line Item(s)- The following line items contain critical information:

1. Obligations and Expenditures- Quantifiable Objective Criteria: Reported obligations and expenditures. (See pages 16 and 17 of the above links.)
 - a. Current period obligation
 - b. Cumulative obligation
 - c. Current period expenditure
 - d. Cumulative expenditure

Revenue loss calculation validation- Note- Recipients may elect a “standard allowance” of up to \$10 million to spend on government services through the period of performance instead of using the full formula specified in the final rule. The standard allowance is available to all recipients. See page 30 for when recipients may modify their revenue loss election. Quantifiable Objective Criteria: Recipient’s application of the revenue loss calculation is accurate if they did not elect the standard allowance. Specific information regarding the revenue loss formula can be found in [paragraph \(d\)\(2\) of 31 CFR § 35.6 at 31 CFR § 35.6\(d\)\(2\)\(d\)\(2\)](#).

2. *Capital Expenditures*- Quantifiable Objective Criteria: The recipient has the required written justification in their grant file if the total of the capital expenditures costs in a project is greater than or equal to \$1 million and less than \$10 million; or, the recipient submitted the required justification to Treasury if (1) a project has total capital expenditures costs greater than \$10 million for capital expenditures enumerated by Treasury in the final rule; or (2) the total of a project’s capital expenditures costs is greater than \$1 million for capital expenditures not enumerated by Treasury in the final rule. Note: Capital expenditures paid for using revenue replacement funds are not subject to this requirement. Tribal governments are not required to complete the written justification. (See [31 CFR section 35.6\(b\)\(4\)](#))

3. **Special Reporting**

Not Applicable

4. **Special Reporting for Federal Funding Accountability and Transparency Act (FFATA)**

Not Applicable

- a. Treasury received approval from the Office of Management and Budget (OMB) to increase the subaward reporting threshold outlined in 2 CFR Part 170 from \$30,000 to \$50,000 for CSLFRF.

- b. Although reporting on subaward information is applicable to SLFRF recipients pursuant to the award term set forth in Appendix A to 2 CFR Part 170, which is incorporated by reference in the SLFRF Financial Assistance Agreement, SLFRF recipients' compliance with FFATA reporting requirements is not subject to audit.

M. Subrecipient Monitoring

See Part 3, Section M, "Subrecipient Monitoring" for a general description of the compliance requirements, the related audit objectives, and suggested audit procedures. Note that subrecipient monitoring is not required for entities deemed to be beneficiaries. Because NEUs are considered by Treasury to be direct recipients of SLFRF (and not subrecipients or beneficiaries), states have no subrecipient monitoring responsibilities related to the funding states were required to distribute to NEUs.

The subrecipient or beneficiary designation is an important distinction as funding provided to beneficiaries is not subject to audit pursuant to the Single Audit Act and 2 CFR Part 200, Subpart F, but funding provided to subrecipients is subject to those audit requirements. For example, when recipients of SLFRF provide award funds to entities to respond to the negative economic impacts of COVID-19 as end users, and not for the purpose of carrying out program requirements, the entities receiving such funding are beneficiaries of SLFRF. Alternatively, when recipients of SLFRF provide award funds to an entity to carry out a program on behalf of the SLFRF recipient, the entities receiving such funding are subrecipients.

Recipients may permit for-profit subrecipients to submit a consolidated audit that reflects their SLFRF expenditures across subawards and programs.

Also as discussed in [Final Rule FAQ 13.14](#), Treasury has determined that there are no subawards under this eligible use category because a recipients' use of revenue loss funds does not give rise to subrecipient relationships given that there is no federal program or purpose to carry out in the case of the revenue loss portion of the award. Therefore, subrecipient monitoring is not applicable to Expenditure Category Group 6 "Revenue Replacement."

IV. OTHER INFORMATION

Please refer to the section entitled "Source of the Governing Requirements" above.
Schedule of Expenditures of Federal Awards (SEFA)

As noted above in Activities Allowed or Unallowed, the dollar amount of the revenue loss determines the limit for the amount of SLFRF funds that can be used to "provide government services" (which is one of four eligible uses of SLFRF funds). For SEFA reporting purposes, the aggregate expenditures for all four eligible use categories are reported on the SEFA and not the result of the revenue loss calculation or standard allowance.

Additionally, because NEUs are considered direct recipients under SLFRF, NEUs that do not elect or are not eligible for the alternative compliance examination engagement are required to report their award expenditures on the SEFA and data collection form as direct awards. Further, States must not report award funds that were required to be distributed to the NEUs on State SEFAs or data collection forms.

Requirements for an Alternative Compliance Examination Engagement for Recipients That Would Otherwise be Required to Undergo a Single Audit or Program-Specific Audit as a Result of Receiving SLFRF Awards

I. ALTERNATIVE APPROACH OBJECTIVES

Treasury recognizes that many recipients of SLFRF may newly be required to complete a single audit or a program-specific audit pursuant to the Single Audit Act and its implementing regulations, 2 CFR Part 200, Subpart F, due to their receipt of an SLFRF award which may lead to them expending \$750,000 or more during their fiscal year in Federal awards. This may be because the recipient has not received direct federal financial assistance before, or the other federal financial assistance they expended did not exceed the \$750,000 audit threshold set forth at 2 CFR 200.501(a). This section describes an alternative approach for SLFRF recipients that would otherwise not be required to undergo an audit pursuant to 2 CFR Part 200, Subpart F, if it was not for the expenditures of SLFRF funds directly awarded by Treasury. This alternative approach is permitted by OMB as further described in the Part 8, Appendix VII – Other Audit Advisories and as detailed below. However, an SLFRF recipient may still elect to undergo a single audit or a program-specific audit under 2 CFR Part 200, Subpart F.

A. Alternative Compliance Examination Engagement

The alternative approach to a single audit or program-specific audit under 2 CFR Part 200, Subpart F, permits eligible recipients to engage a practitioner to perform a compliance examination engagement in accordance with the Government Accountability Office (GAO) [Government Auditing Standards](#). The GAO *Government Auditing Standards* direct practitioners to conduct these engagements in accordance with the American Institute of Certified Public Accountants (AICPA) Statements on Standards for Attestation Engagements. The AICPA attestation standards are codified in the AT-C section of the AICPA's *Professional Standards* and [AT-C section 315, Compliance Attestation](#), which is the standard to be followed. This engagement, which results in an opinion on compliance, is to be directed at the compliance requirements described below in D. Compliance Requirements.

This alternative is intended to reduce the burden of a full single audit or program-specific audit on eligible recipients and practitioners, as well as uphold Treasury's responsibility to be a good steward of federal funds. This balance of burden reduction and Treasury responsibility to be a good steward is achieved in several ways as follows:

1. A financial statement audit is not required for those eligible recipients that expend award funds from other Federal programs.
2. A compliance examination engagement simplifies the engagement for both recipients and practitioners.
3. A formal schedule of expenditures of federal awards is not required as the practitioner opines directly on compliance for a single program.
4. The requirements for internal control in 2 CFR 200.514(c) are not relevant to the engagement, although AT-C 315, paragraph .15, still requires the practitioner to obtain an understanding of relevant portions of internal control over compliance sufficient to plan the engagement and to assess control risk for compliance with specified requirements.
5. The engagement still involves testing of the compliance requirements described below and results in a related examination opinion which is similar to the compliance opinion provided under 2 CFR Part 200, Subpart F.
6. The engagement reporting is simplified as compared to the audit report required by 2 CFR Part 200, Subpart F. One compliance examination opinion is issued (versus up to 3 reports for a single audit or program-specific audit) and the reporting allows for reporting findings that are noted in a similar manner to how they are reported for audits under 2 CFR Part 200, Subpart F.

The following subsections of this section align with normal OMB Compliance Supplement presentation for a Federal program; however, practitioners performing the alternative compliance examination engagement should use this “Other Information” section as a standalone document. Practitioners should not use Part 3 of the OMB *Compliance Supplement* or the full Part 4 section of the SLFRF Program Compliance Supplement (designated for audits of the program performed under 2 CFR Part 200, Subpart F) when testing compliance. Instead, the examination objectives and suggested examination procedures below should be used on their own.

B. Recipient Eligibility

Recipient eligibility to use this alternative approach is as follows: SLFRF recipients that expend \$750,000 or more during the recipient’s fiscal year in federal awards and which meet **both** criteria listed below have the option to follow the alternative SLFRF compliance examination engagement:

1. The recipient’s total SLFRF award received directly from Treasury or received (through states) as an NEU is at or below \$10 million; and

2. Other federal award funds the recipient expended (not including their direct SLFRF award funds) are less than \$750,000 during the recipient's fiscal year.

C. Program Objectives

SLFRF provides direct payments to states (defined to include the District of Columbia), US territories (defined to include Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, and American Samoa), Tribal governments, metropolitan cities, counties, and (through states) NEU (collectively the "eligible entities") to:

1. Respond to the public health emergency with respect to COVID-19 or its negative economic impacts, including by providing assistance to households, small businesses, nonprofits, and impacted industries, such as tourism, travel, and hospitality;
2. Respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers of the recipient that perform essential work or by providing grants to eligible employers that have eligible workers who are performing essential work;
3. Provide government services, to the extent of the reduction in revenue of the eligible entities due to the COVID-19 public health emergency relative to revenues collected in the most recent full fiscal year of the eligible entities prior to the emergency; and
4. Make necessary investments in water, sewer, or broadband infrastructure.

II. PROGRAM PROCEDURES

A. Overview

Sections 602 and 603 of the Social Security Act (the "Act"), as added by section 9901 of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (Mar. 11, 2021), codified at 42 USC 802 and 803, authorized the Coronavirus State Fiscal Recovery Fund and Coronavirus Local Fiscal Recovery Fund, respectively (referred to collectively as the "Coronavirus State and Local Fiscal Recovery Funds" or "SLFRF"). SLFRF is administered by the Treasury and provides assistance in the form of direct payments for specified uses. SLFRF provides \$350 billion for payments to eligible entities.

The total allocations to the eligible entities under SLFRF are as follows:

1. \$195.3 billion reserved for making payments to the 50 states and the District of Columbia;

2. \$4.5 billion reserved for making payments to the US territories;
3. \$20 billion reserved for making payments to tribal governments;
4. \$45.57 billion reserved for making payments to metropolitan cities;
5. \$65.1 billion reserved for making payments to counties; and
6. \$19.53 billion reserved for making payments to states for distribution to NEUs.

Prior to receipt of award funds, all eligible entities are required to execute a Financial Assistance Agreement, which includes the Award Terms and Conditions that recipients must comply with in carrying out the objectives of their award, as well as the certification required by 42 USC section 802(d)(1). Tribal and local governments are not required to provide such certification as a condition of receiving payment under SLFRF. Eligible entities are required to use their award funds as set forth in 42 USC sections 802(c)(1) and 803(c)(1) and Treasury's Final Rule, 31 CFR Part 35 to meet pandemic response needs and rebuild a strong, more equitable economy as the country recovers.

Source of Governing Requirements

The Coronavirus State and Local Fiscal Recovery Funds program is authorized by sections 602 and 603 of the Social Security Act as added by section 9901 of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (Mar. 11, 2021), codified at 42 USC sections 802 and 803, and implemented by Treasury's [Interim Final Rule](#) and [Final Rule](#) at 31 CFR Part 35.

On January 6, 2022, the Treasury adopted a Final Rule to implement the requirements of the SLFRF program. The Final Rule responded to comments Treasury received on the Interim Final Rule and became effective on April 1, 2022.

Along with the Final Rule, Treasury published a *Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule* (See <https://home.treasury.gov/system/files/136/SLFRF-Compliance-Statement.pdf>) that clarifies the transition from compliance with the Interim Final Rule to compliance with the Final Rule. Recipients should also review the Final Rule for additional information.

Recipients must comply with the Final Rule beginning on April 1, 2022. Prior to April 1, 2022, recipients were permitted to take actions and use funds in a manner consistent with the Final Rule, and Treasury will not take action to enforce the Interim Final Rule if a use of funds is consistent with the terms of the Final Rule, regardless of when the SLFRF funds were used. This means that Treasury will not take action to enforce

against uses in accordance with the Interim Final Rule to the extent that the recipient wishes to change its planned uses of SLFRF funds in a manner consistent with the Final Rule.

Prior to April 1, 2022, the Interim Final Rule remained in effect. Accordingly, recipients were able to obligate and expend funds in a manner consistent with the Interim Final Rule prior to April 1, 2022. In addition, Treasury recognizes that recipients took steps to use SLFRF funds for projects in a manner consistent with the Interim Final Rule prior to adoption of the Final Rule. To the extent that a recipient took significant steps toward obligating SLFRF funds in a manner consistent with the Interim Final Rule prior to January 6, 2022, Treasury will generally not take action to enforce provisions contained in the Final Rule, to the extent that they are more restrictive than those in the Interim Final Rule. Such significant steps include initiation of procurement or grantmaking actions, detailed planning of projects or programs, appropriation of funds, and other significant planning steps.

Auditors must audit recipients on award funds they expended for their fiscal year 2023 based on the requirements set forth in 42 USC sections 802 and 803, Treasury's Interim Final Rule, Treasury's Final Rule, and Frequently Asked Questions (FAQs), as applicable. If an expenditure is not consistent with the Final Rule, then auditors should consult the Statement in order to determine how to assess the applicability of the Interim Final Rule.

Auditors should note that the [Consolidated Appropriations Act, 2023](#) amended Sections 602 and 603 of the Social Security Act to provide state, local, and Tribal governments the flexibility to use SLFRF funds for additional eligible uses. See Division LL, Section 102 of the Consolidated Appropriations Act, 2023. Additional guidance will be forthcoming and available on the Treasury website.

Availability of Other Program Information

Additional information on the requirements for SLFRF is available through the program webpage on Treasury's website at [Coronavirus State and Local Fiscal Recovery Funds | US Department of the Treasury](#).

SLFRF's Compliance and Reporting Guidance can be found at [Recipient Compliance and Reporting Responsibilities | US Department of the Treasury](#).

The Compliance and Reporting Guidance provides additional detail and clarification for each recipient's compliance and reporting responsibilities and should be read in concert with the Award Terms and Conditions, the authorizing statute, the Interim Final Rule and Final Rule, as applicable, and other regulatory and statutory requirements.

The [Final Rule](#), an overview of the Final Rule, and FAQs about SLFRF are available on the program webpage on Treasury's website at <https://home.treasury.gov/policy->

[issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds.](#)

The FAQ documents contain answers to frequently asked questions regarding the Interim Final Rule and the Final Rule. Treasury intends to update the Final Rule FAQs periodically in response to questions received from stakeholders. The Final Rule FAQs are applicable to the Final Rule, although readers will notice that many FAQs have been incorporated from the Interim Final Rule FAQs, because they remain applicable. Answers to frequently asked questions that are unique to the Interim Final Rule remain available on the Treasury website. The Final Rule FAQs include a categorization to assist readers in identifying the FAQs that remain largely the same as in the Interim Final Rule FAQs and the FAQs that are new or have been updated in conformity with the Final Rule.

Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule can be found at <https://home.treasury.gov/system/files/136/SLFRF-Compliance-Statement.pdf>.

The Statement clarifies the transition from compliance with the Interim Final Rule to compliance with the Final Rule. Recipients should also review the Final Rule for additional information.

III. COMPLIANCE REQUIREMENTS

Preconditions for the Compliance Examination Engagement- ACEEs should be performed consistent with, and in addition GAO's *Government Auditing Standards*, AT-C 205, [Examination Engagements](#), and AT-C 315, [Compliance Attestation](#). As a precondition to this compliance examination engagement, the practitioner should determine that:

1. management can provide evidence to the practitioner that it meets the recipient eligibility criteria for the alternative compliance examination engagement as outlined in Section A, "Recipient Eligibility";
2. management accepts responsibility for the entity's compliance with the compliance requirements below and the entity's internal control over compliance; and
3. management evaluates the entity's compliance with the compliance requirements in this section.

Compliance Requirements Relevant to the Compliance Examination Engagement- The requirements noted with a "Y" in the "Matrix of Compliance Requirements" below are subject to the compliance examination engagement.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment/Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement Suspension & Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	N	N	N	N	N

A. Activities Allowed or Unallowed

Recipients may use SLFRF payments for any eligible expenses subject to the restrictions set forth in sections 602 and 603 of the Social Security Act as added by section 9901 of the American Rescue Plan Act of 2021 as codified by 42 USC sections 802 and 803, respectively. Recipients may also use payments subject to the restrictions set forth Division LL, Section 103 of the Consolidated Appropriations Act, 2023, Treasury's Interim Final Rule and Final Rule at 31 CFR Part 35, and FAQs available at <https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf> and <https://home.treasury.gov/system/files/136/SLFRF-Final-Rule-FAQ.pdf>.

1. *Activities Allowed-* Suggested Examination Procedures

- a. Obtain an understanding of the design of relevant portions of internal control over compliance regarding unallowable activities by performing some or all of the following:
 - (1) Inquiries of appropriate management, supervisory, and staff personnel
 - (2) Inspection of the entity's relevant documents
 - (3) Observation of the entity's activities and operations
 - (4) Review a sample of SLFRF expenditures to determine if recipients used SLFRF funds for ineligible uses

1. *Activities Unallowed-* The following activities are not permitted under SLFRF:

- a. Offset a reduction in net tax revenue (applicable to states and territories)
- b. Deposits into pension funds (applicable to all recipients except Tribes)

- c. Debt service or replenishing financial reserves (e.g., “rainy day funds”) (applicable to all recipients)
- d. Satisfaction of settlements and judgments (applicable to all recipients)
- e. Programs, services, or capital expenditures that include a term or condition that undermines efforts to stop the spread of COVID-19 (applicable to all recipients)

Examination Objective Determine whether the recipients used SLFRF funds for ineligible uses.

B. Allowable Cost/Cost Principles

Compliance Requirement- Recipients that are eligible for the alternative compliance examination engagement may elect the standard allowance for revenue loss, pursuant to which they could use the entirety of their allocation for the provision of government services. Recipients are required to comply with 2 CFR 200.404(e) regarding reasonable costs, and, as such, are required to not deviate from their established practices and policies regarding the incurrence of costs.

[Final Rule FAQ 13.15](#) outlines that Given the purpose and very broad scope of eligible uses of the revenue replacement funds, only a subset of the requirements in 2 CFR part 200, Subpart E apply to recipients’ use of such funds, as follows:

- 2 CFR 200.400(a) - (c), and (e) Policy guide;
- 200.403(a), (c), (d), (g), and (h) Factors affecting allowability of costs; and
- 200.404(e) Reasonable costs.

Examination Objective- Determine whether the recipient significantly deviated from its established practices and policies regarding the incurrence of costs.

1. Suggested Examination Procedures

- a. Obtain an understanding of the design of relevant portions of internal control over compliance and established practices and policies regarding the incurrence of costs by performing some or all of the following:
 - (1) Inquiries of appropriate management, supervisory, and staff personnel
 - (2) Inspection of the entity's relevant documents

- (3) Observation of the entity's activities and operations
- (4) Test a sample of SLFRF expenditures to determine that the recipient treated costs consistently with its established practices and policies.

L. REPORTING

As described in the GAO *Government Auditing Standards*, and elaborated upon in AICPA standards, the practitioner issues the following reporting in the alternative compliance examination engagement:

- Practitioner's Examination Report prepared in accordance with [AT-C 315](#) and [Government Auditing Standards](#).
- Schedule of Findings and Responses (if applicable) that includes findings required to be reported under *Government Auditing Standards*.

IV. OTHER INFORMATION

A. COMPLIANCE EXAMINATION ENGAGEMENT SUBMISSION INSTRUCTIONS

The submission deadlines for the alternative compliance examination engagement are the same as those for single audits and program specific audits due in accordance with 2 CFR Part 200, Subpart F. Therefore, the results of the alternative compliance examination engagement must be submitted by the auditee to the Federal Audit Clearinghouse within the earlier of 30 calendar days after receipt of the auditor's report(s), or nine months after the end of the audit period.

Instructions for how recipients are to submit the ACEE can be found on pages 1 to 14 of the Federal Audit Clearinghouse guidance located at [https://facides.census.gov/Files/IDES%20Manual%202022%20\(UG\).pdf](https://facides.census.gov/Files/IDES%20Manual%202022%20(UG).pdf)

Also, please refer to the related SLFRF certification statement on page 13 of the Single Audit Checklist, Instructions, and Form located at <https://facides.census.gov/Files/2022%20Checklist%20Instructions%20and%20Form.pdf>.

DEPARTMENT OF THE TREASURY**ASSISTANCE LISTING 21.029 CORONAVIRUS CAPITAL PROJECTS FUND****I. PROGRAM OBJECTIVES**

Note: This program is considered a “higher risk” program for 2023, pursuant to 2 CFR section 200.519(c)(2). Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process. Auditors are advised to consult 200.518, and in particular 200.518(d)(2) with regards to the Coronavirus Capital Projects Fund (CPF) allocations to Tribal governments and the State of Hawaii for Native Hawaiian Programs given their relatively small amount, approximately \$167,504.

Note: The CPF permitted Tribal governments to leverage a consortium to accomplish the objectives of the CPF program. A consortium is an association of two or more Tribal governments pooling CPF resources together. Subject to agreement and/or delegation of authority, Tribal governments may receive money directly from Treasury and then provide funds to a consortium or a consortium may receive funds directly from Treasury and then provide the funds to Tribes. The distribution of CPF funds should be included as expenditures in the Schedules of Expenditures of Federal Awards (SEFA) of CPF recipients.

The purpose of the CPF is to provide grants to states (defined to include the 50 states, the District of Columbia and Puerto Rico), U.S. territories and freely associated states (United States Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau), and Tribal governments, to carry out critical capital projects directly enabling work, education, and health monitoring, including remote options, in response to the public health emergency with respect to the Coronavirus Disease (COVID-19).

II. PROGRAM PROCEDURES**A. Overview**

Section 604 of the Social Security Act, as added by section 9901 of the American Rescue Plan Act of 2021 (the “Act”), Pub. L. No. 117-2 (Mar. 11, 2021), codified at 42 U.S.C. section 804, authorized the \$10 billion Coronavirus Capital Projects Fund (“CPF”). The CPF is administered by the U.S. Department of the Treasury (“Treasury”) and provides assistance in the form of grants.

Recipients may use CPF funds to carry out capital projects that (1) directly enable work, education, and health monitoring; (2) address a need that results from or was exacerbated by the COVID-19 public health emergency; and (3) address a critical need of unserved or underserved populations. Examples include:

- Investments in broadband infrastructure in eligible areas that meet certain speed requirements.

- Investments in digital connectivity technologies, such as devices, public computer facilities, and public Wi-Fi infrastructure that facilitate Internet access.
- Construction or renovation of multi-purpose community facilities that jointly enable work, education, and health monitoring.
- Other capital projects that meet the program requirements.

Under Section 42 U.S.C. section 804(b)(1)(A), each of the states (including the District of Columbia and Puerto Rico) is allocated a fixed amount of \$100 million, totaling \$5.2 billion. States may also receive a portion of the remaining \$4.6 billion, to be allocated in accordance with the requirements set forth in 42 U.S.C. section 804(b)(2)(A):

- 50 percent (\$2.3 billion) of such amount shall be allocated among the states based on the proportion that the population of each state bears to the population of all states;
- 25 percent (\$1.15 billion) of such amount shall be allocated among the states based on the proportion that the number of individuals living in rural areas in each state bears to the number of individuals living in rural areas in all states; and
- 25 percent (\$1.15 billion) of such amount shall be allocated among the states based on the proportion that the number of individuals with a household income that is below 150 percent of the poverty line applicable to a family of the size involved in each state bears to the number of such individuals in all states.

42 U.S.C. section 804(b)(1)(B) directs the secretary to pay a total of \$100 million divided in equal shares among United States Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau. 42 U.S.C. section 804 (b)(1)(C) directs the secretary to pay a total of \$100 million divided in equal shares to tribal governments and the State of Hawaii for the exclusive use of the Department of Hawaiian Home Lands and the Native Hawaiian Education Programs. Using the statutory formulas found in 42 U.S.C. sections 804(b)(1) and (2) , Treasury calculated and published the allocation for each eligible entity along with the specific calculation methodologies used for all eligible entities (see “Allocation Information” at <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/capital-projects-fund>). State allocations vary. Each tribal government is allocated \$167,504. Each U.S. territory and freely associated state is allocated \$14,285,714.

Source of Governing Requirements

The CPF is authorized by section 604 of the Social Security Act as added by section 9901 of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (Mar. 11, 2021), codified at 42 U.S.C. 804; and is implemented by Treasury’s Guidance for States and Freely

Associated States and Treasury’s Guidance for Tribal Governments (together, Treasury’s Guidance), link provided below.

Auditors should refer to the 42 U.S.C. section 804, Treasury’s Guidance, FAQs, Capital Projects Fund Compliance and Reporting Guidance for States, Territories, and Freely Associated States, Grant Agreements, and approved Grant Plans, and Program Plans. Treasury’s Guidance and the FAQs can be accessed on the Treasury website via the links provided below. The Grant Agreements and approved Grant Plans and Program Plans can be obtained from grant recipients.

Availability of Other Program Information

1. Treasury’s Guidance for States, Territories and Freely Associated States can be found at <https://home.treasury.gov/system/files/136/Capital-Projects-Fund-Guidance-States-Territories-and-Freely-Associated-States.pdf>. This guidance provides States, Territories and Freely Associated States a summary of project eligibility and terms and conditions, as well as information about the process for applying for a grant under the Capital Projects Fund program.
 - Project eligibility is described starting on page 3.
 - An explanation of “directly enable work, education and healthcare” starting on page 7.
 - Eligible and ineligible costs starting on page 10. Please consult with FAQ’s in conjunction with this audit.
 - Period of Performance starting on page 12.
 - Certain other requirements are discussed starting on page 18.
 - FAQ #2.9 marks a change from the previously published guidance.

2. Treasury’s Guidance for Tribal Governments can be found at <https://home.treasury.gov/system/files/136/Capital-Projects-Fund-Guidance-Tribal-Governments.pdf>. This guidance provides Tribal Governments a summary of project eligibility and terms and conditions, as well as information about the process for applying for a grant under the Capital Projects Fund program.
 - Project eligibility is described starting on page 3.
 - An explanation of “directly enable work, education, and healthcare” starts on page 7.
 - Eligible and ineligible costs can be found beginning on page 10. FAQ’s in conjunction with this audit.
 - Other requirements discussed on page 16.

- FAQ #2.9 marks a change from previously published guidance.
3. FAQs about the Fund are outlined on the program webpage on Treasury’s website at [Coronavirus Capital Projects Fund FAQs \(treasury.gov\)](https://www.treasury.gov/press-releases/Pages/pr2020072).

FAQs are considered to be guidance for the CPF program. FAQs generally clarify or supplement existing guidance, but may also modify existing guidance. New FAQs may be published in the future, and will include the date of publication.

4. Treasury’s Compliance and Reporting Guidance for States, Territories, and Freely Associated States (State Reporting Guidance) can be found at <https://home.treasury.gov/system/files/136/CPF-Reporting-Guidance-for-States.pdf>

This guidance provides additional detail and clarification about reporting and compliance responsibilities for States, territories, and freely associated states under the CPF Program.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	Y	N	Y	Y	N

A. Activities Allowed or Unallowed1. *Activities Allowed*

- a. States, Territories, and Freely Associated States and their Subrecipients CPF is designed to provide funding for States, Territories and Freely Associated States' capital projects that meet all three criteria below:
 - (1) directly enable work, education, and health monitoring,
 - (2) designed to address a critical need that resulted from or was made apparent or exacerbated by the COVID-19 public health emergency, and
 - (3) designed to address a critical need of the community.
- b. Presumptively eligible projects include:
 - (1) Broadband infrastructure projects designed to deliver service that meets or exceeds symmetrical download and upload speeds of 100 Mbps.
 - (2) Digital connectivity technology projects that involve the purchase and/or installation of devices and equipment to facilitate broadband internet access, where affordability has been identified by the Recipient as a barrier to broadband adoption and use.
 - (3) Multi-purpose community facilities that are designed to jointly and directly enable work, education, and health monitoring.
- c. If the recipient proposes a different use of funds, projects may additionally be approved by Treasury on a case-by-case basis provided they meet the enumerated criteria above, These criteria are described in detail in the Capital Projects Fund Guidance for States, Territories and Freely Associated States (*see* (I.C.c: Case-by-Case Review).
- d. States, territories, and freely associated states may only use CPF funds for costs associated with Program Plans that have been approved by Treasury, or for eligible program administrative costs.
- e. Tribal Governments:
 - (1) An eligible Tribal government may apply individually, jointly with other Tribes, or through an organization, consortium, or similar entity. A designation letter, signed by the Tribal government's duly authorized Tribal official, must be received by Treasury if anyone other than the Tribal government is submitting the CPF application.

- f. An approved CPF application must meet all three criteria below:
 - (1) directly enable work, education, and health monitoring,
 - (2) designed to address a critical need that resulted from or was made apparent or exacerbated by the COVID-19 public health emergency, and
 - (3) designed to address a critical need of the community.

- g. Presumptively eligible projects include:
 - (1) Broadband infrastructure projects designed to deliver service that meets or exceeds symmetrical download and upload speeds of 100 Mbps.
 - (2) Digital connectivity technology projects that involve the purchase and/or installation of devices and equipment to facilitate broadband internet access, where affordability has been identified by the Recipient as a barrier to broadband adoption and use.
 - (3) Multi-purpose community facilities that are designed to jointly and directly enable work, education, and health monitoring.
 - (4) Projects may additionally be approved by Treasury on a case-by-case basis provided they meet the enumerated criteria above. These criteria are described in detail in the Capital Projects Fund Guidance for Tribal Governments.
 - (5) Tribal recipients may only use CPF funds for costs associated with applications that have been approved by Treasury, or for eligible program administrative costs. Auditors should refer to the approved application when testing the compliance requirements.

2. *Activities Unallowed*

- a. Activities that may not be funded by the CPF include but are not limited to:
 - (1) General infrastructure projects, such as highways, bridges, transit systems, and ports, are not eligible under the CPF program.
 - (2) General construction and improvement of hospitals and traditional schools are not presumed to be eligible, although, there may be

opportunities for such projects to receive funding under the CPF program if they meet the project eligibility criteria. Such projects will be reviewed on a case-by-case basis.

- b. The following costs are not eligible, unless otherwise permitted by Treasury:
- (1) Acquisition of spectrum licenses;
 - (2) Operating expenses, other than grant administration costs (limited to \$25,000 or 5 percent of the grant award, whichever is greater);
 - (3) Short-term operating leases;
 - (4) Payment of interest or principal on outstanding debt instruments, or other debt service costs incurred prior to March 15, 2021;
 - (5) Fees or issuance costs associated with the issuance of new debt;
 - (6) Satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring plan in a judicial, administrative, or regulatory proceeding;
 - (7) To support or oppose collective bargaining. This does not affect the ability to use funds to comply with 41 CFR Part 60-14.

B. Allowable Cost/Cost Principles

Allowable costs are determined in accordance with the cost principles identified in 2 CFR Part 200, Subpart E. Treasury does not intend for the Uniform Guidance definition of “capital assets” to limit eligible investments under the CPF program. For purposes of the CPF program, “Capital Project” or “Project” means the construction, purchase, and installation of, and/or improvements to capital assets where the costs of such assets are capitalized or depreciated, including ancillary costs necessary to put the capital asset to use as further described in the Treasury’s Guidance and FAQs. This definition may be found in Section IV of Treasury’s Guidance.

Infrastructure projects funded solely with CPF award funds are not subject to the Buy America Preference requirements set forth in section 70914 of the Build America, Buy America Act included in the Infrastructure Investment and Jobs Act, Pub. L. No. 117-58. CPF grant recipients may use CPF award funds to match other federal funds to the extent that they are permitted by statute. For example, CPF funds may be used to meet the matching requirements for the Infrastructure Investment and Jobs Act (IIJA) Division F, Title I, Sec. 60102 (h)(3)(B)(iii)(I)(dd). CPF recipients should ensure that the program or project is an acceptable use of funds for the other federal funding stream. CPF grant funding may not be used for costs that will be reimbursed by the other federal or state

funding stream; CPF funds must be used only for complementary purposes.

Additional guidance on the treatment of equipment and real property allowable costs will be forthcoming.

C. Cash Management

1. *State and U.S. Territory Recipients* - Although not a requirement per 2 CFR 200.305, Treasury has assessed that as of calendar year 2022, all state and U.S. territory recipients are subject to Part B of the Cash Management Improvement Act. Additional guidance can be found on page 12 of the State Reporting Guidance.

1. *Tribal Recipients*- Treasury has made the determination that if a Tribal recipient fully disburses award funds before the end of the period of performance, the timing and number of advance payments made by Treasury are as close as is administratively feasible to the actual disbursements by a Tribal recipient, and are therefore in compliance with 2 CFR 200.305(b)(1). Please see FAQ 3.7. Guidance related to Tribal government interest tracking and retention requirements may be found in FAQ 3.8 and 3.9.

H. Period of Performance

Funding must be used to cover eligible costs that are incurred during the period that begins on the date that the Grant Agreement is executed and ends on December 31, 2026. Recipients are permitted to use CPF grant award funds for pre-award costs incurred after March 15, 2021, but before their Grant Agreement is executed, but only if they provided reasonable assurance to Treasury that the costs were incurred pursuant to the negotiation of and in anticipation of the Capital Projects Fund award and are necessary for the efficient and timely performance of the Project. Such costs are allowable only to the extent they would have been allowable if incurred after the date of the Capital Projects Fund award and only with the written approval of Treasury. For the avoidance of doubt, unless otherwise provided, Treasury's approval of the Recipient's applicable Program Plan shall constitute written approval of pre-award costs that are identified in the Program Plan.

Additional information regarding pre-award costs may be found at [State, Territory, and Freely Associated States Guidance](#) page 10, Tribal Guidance page 10, FAQ #1.4, FAQ 4.10, and on page 12 of the State Reporting Guidance.

Additional information regarding Period of Performance, in general, can be found at State, Territory, and Freely Associated States Guidance page 12, Tribal Guidance page 12, FAQ #1.4, FAQ #2.4, and FAQ #3.7.

I. Procurement and Suspension and Debarment

1. Procurement

See Part 3, Section I, "Procurement and Suspension and Debarment" for a general description of the compliance requirements associated with procurement, the related audit objectives, and suggested audit procedures.

Infrastructure projects funded solely with CPF award funds are not subject to the Buy America Preference requirements set forth in section 70914 of the Build America, Buy America Act included in the Infrastructure Investment and Jobs Act, Pub. L. No. 117-58.

2. *Suspension and Debarment*

See Part 3, Section I, “Procurement and Suspension and Debarment” for a general description of the compliance requirements, the related audit objectives, and suggested audit procedures.

L. Reporting

The following applicable reporting requirements include all CPF recipients except for Tribal Governments.

1. **Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* –Applicable, submitted via Treasury’s reporting portal.
For Project and Expenditure Report reporting requirements, please refer to pages 4 – 10 of <https://home.treasury.gov/system/files/136/CPF-Reporting-Guidance-for-States.pdf>
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. **Performance Reporting**

This guidance does not apply to Tribal governments.

Project and Expenditure Report for States, Territories & Freely Associated States

PRA Number: 1505-0277

Reporting Cycle: Quarterly

Authoritative Requirement: States, Territories & Freely Associated States:

<https://home.treasury.gov/system/files/136/Capital-Projects-Fund-Guidance-States-Territories-and-Freely-Associated-States.pdf>

Blank Copy of the Report: Coronavirus Capital Projects Funds Compliance and Reporting Guidance for States, Territories, and Freely Associated States

<https://home.treasury.gov/system/files/136/CPF-Reporting-Guidance-for-States.pdf>

Report Instructions: Coronavirus Capital Projects Funds Compliance and Reporting Guidance for States, Territories, and Freely Associated States can be found on pages

11 to 13 of the Guidance accessed via the following link

<https://home.treasury.gov/system/files/136/CPF-Reporting-Guidance-for-States.pdf>

Report Corrections: ORP's reporting portal has built-in functionality to reopen a report and allow recipients to make edits after the reporting deadline. However, it is ORP's policy that recipients may only make revisions if authorized by Treasury staff for a period of up to 60 days after the reporting deadline. After the revision period ends, the report is final. A resubmitted report becomes a recipient's final report within ORP's reporting portal. Recipients can generate PDFs of this report at any time.

Key Line Items- The following line items contain critical information:

1. *Obligations and Expenditures*

- a. Quantifiable Objective Criteria: Subrecipient Reimbursement Documentation of reported obligations and expenditures do not exceed total award amount. (See pages 12 and 13 of the [Reporting Guidance](#))

- (1) Current period obligation
- (2) Cumulative obligation
- (3) Current period expenditure
- (4) Cumulative expenditure

2. *Administrative Expenses*

- a. Quantifiable Objective Criteria: Recipient Reimbursement Documentation for Administrative Expenses as reported, which does not exceed 5% of the total award or \$25,000, whichever is greater (unless Treasury specifically authorized a higher amount) (See page 3 of the Reporting Guidance)

- (1) Current period obligation
- (2) Cumulative obligation
- (3) Current period expenditure
- (4) Cumulative expenditure

3. *Broadband Infrastructure Projects: Miles of Fiber Purchased using CPF/Reported (As Applicable)*

- a. Quantifiable Objective Criteria: Subrecipient Reimbursement Documentation for Miles of Fiber Purchased with CPF funds as

Reported for Broadband Infrastructure Projects is within 10% difference or less from the total number reported. (See page 6 of the Reporting Guidance)

4. *Digital Connectivity Technology Projects*: Total Number of Devices Purchased using CPF/Reported (As Applicable)
 - a. Quantifiable Objective Criteria: Subrecipient Reimbursement Documentation Supporting the Number of Devices Purchased with CPF Funding as Reported for Digital Connectivity Technology Projects is within 10% difference or less from the total number reported. (See page 7 of the Reporting Guidance)
5. *Multi-Purpose Community Facility Projects*: Square Footage funded by CPF/Reported (As Applicable)
 - a. Quantifiable Objective Criteria: Subrecipient Reimbursement Documentation Supporting the Square Footage Reported for Multi-Purpose Community Facility Projects is within 10% difference or less from the total number reported. (See pages 7 and 8 of the Reporting Guidance)

3. Special Reporting

Not Applicable.

4. Special Reporting for Federal Funding Accountability and Transparency Act

Applicable. See Part 3.L for audit guidance.

DEPARTMENT OF THE TREASURY

ASSISTANCE LISTING 21.032 LOCAL ASSISTANCE AND TRIBAL CONSISTENCY FUND

I. PROGRAM OBJECTIVES

Section 605 of the Social Security Act (the Act), as added by section 9901 of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (March 11, 2021) and codified by 42 U.S.C. 805, established the Local Assistance and Tribal Consistency Fund (LATCF). The LATCF provides \$2 billion in total funding for payment by Treasury to eligible revenue sharing counties and eligible Tribal governments across fiscal years 2022 and 2023 for revenue enhancement.

42 U.S.C. 805(c) provides that “an eligible revenue sharing county, an eligible Tribal government, or an eligible revenue sharing consolidated government may use funds provided under a payment made under this section for any governmental purpose other than a lobbying activity.”

II. PROGRAM PROCEDURES

A. Overview

The LATCF reserves \$250 million to allocate and pay to eligible Tribal governments for each of the fiscal years 2022 and 2023 and reserves \$750 million to allocate and pay to eligible revenue sharing counties for each of the fiscal years 2022 and 2023.

Under this program, recipients have broad discretion on uses of funds, similar to the ways in which they may use funds generated from their own revenue sources. All funds are available to recipients until expended or returned to Treasury.

B. Eligible Use of Funds

The LATCF provides flexible support for eligible revenue sharing counties and eligible Tribal governments to meet their jurisdictions’ needs. Specifically, the statute provides that recipients may use funds for any governmental purpose other than a lobbying activity.

Programs, services, and capital expenditures that are traditionally undertaken by a government are considered to fulfill a “governmental purpose.” For Tribal governments, investing in activities undertaken by Tribal enterprises, such as operating or capital expenditures for businesses that are owned or controlled by a Tribal government, are considered a governmental purpose. Recipients should refer to the [Local Assistance and Tribal Consistency Fund guidance](#) for more information on eligible and ineligible uses.

Source of Governing Requirements

Section 605 of the Social Security Act, as added by Section 9901 of the American Rescue Plan Act

of 2021, codified at 42 U.S.C. 805, and as amended by section 103 of Division LL of the Consolidated Appropriations Act, 2023.

Availability of Other Program Information

- A. Treasury released LATCF guidance which can be found at <https://home.treasury.gov/system/files/136/LATCF-guidance.pdf> (See pages 1 - 10) The guidance document provides detailed information on LATCF.
- B. Treasury has published the methodology used to calculate allocation amounts to eligible Tribal governments, which can be found at <https://home.treasury.gov/system/files/136/605-LATCF-Allocation-Methodology-Summary.pdf> (See pages 1 - 6)
- C. Treasury has published a summary of the methodology used to calculate allocation amounts to eligible revenue sharing counties which can be found at <https://home.treasury.gov/system/files/136/LATCF-Eligibility-and-Allocation-Methodology-for-County-Governments.pdf>. (See pages 1 - 7)
- D. Treasury released LATCF reporting guidance which can be found at <https://home.treasury.gov/system/files/136/LATCF-Reporting-Guidance.pdf>. (See pages 1 - 10)

Each recipient will be responsible for submitting an annual Obligation and Expenditure report to Treasury. The reporting guidance details the reporting requirements for governments that receive LATCF funding including:

- Section I concerns the annual reporting requirements.
- Section II discusses required certifications.
- Section III discusses other information related to reporting, including compliance and record keeping.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an

“N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	N	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Recipients may use LATCF funds for any governmental purpose other than a lobbying activity.
- b. As a general matter, LATCF recipients may treat these funds in a similar manner to how they treat funds generated from their own local revenue. Programs, services, and capital expenditures that are traditionally undertaken by a government are considered to fulfill a “governmental purpose.” For eligible Tribal governments, investing in activities undertaken by Tribal enterprises, such as operating or capital expenditures for businesses that are owned or controlled by a Tribal government, are considered a governmental purpose.
- a. A non-exhaustive list of example activities that fulfill a governmental purpose include, but are not limited to:
 - (1) Provision of health services, educational services, court services, police, fire, emergency medical, and other public safety services, utilities or sanitation services, and direct assistance to households (including cash assistance);
 - (2) Capital expenditures on core facilities and equipment, including in housing and community development (e.g., schools, hospitals, childcare facilities, and parks and recreation facilities), public safety facilities and equipment (e.g., police vehicles), and government administration buildings;
 - (3) Infrastructure investments, including roads, bridges, water and

sewer systems, utility systems, airports, public transit, and technology infrastructure;

(4) Long-term economic development activities, including affordable housing development, workforce development and other programs to strengthen local communities undergoing economic transitions;

(5) General government operations, such as general government administration, personnel costs, administrative facilities, record keeping, tax assessments, or election administration; and

(6) Meeting another federal program's non-federal match or cost-sharing requirements, unless barred by statute or other applicable law (as outlined in [Guidance for the Local Assistance and Tribal Consistency Fund](#)).

- b. Recipients also may use funds to cover costs of administering the LATCF program, including costs of consultants to support effective management and oversight as well as compliance with legal, regulatory, and other requirements.

2. *Activities Unallowed*

- a. LATCF recipients may not use federal funds to directly or indirectly pay for any personal service, advertisement, telegram, telephone, letter, printed or written matter, or other device, intended or designed to influence in any manner a Member of Congress, a jurisdiction, or an official of any government, to favor, adopt, or oppose, by vote or otherwise, any legislation, law, ratification, policy, or appropriation, whether before or after the introduction of any bill, measure, or resolution proposing such legislation, law, ratification, policy, or appropriation. Amounts that are used in violation of the lobbying restriction set forth in this guidance may be subject to recoupment.

B. Allowable Cost/Cost Principles

1. Given the LATCF's purpose as a general revenue enhancement program and the broad eligible uses of LATCF funds, Treasury has determined that funds available under the LATCF program constitute revenue sharing. 2 CFR part 200 Subpart E does not apply to LATCF. Per the [Guidance for the Local Assistance and Tribal Consistency Fund](#), this program is only subject to the following provisions in 2 C.F.R. Part 200 (the Uniform Guidance):

- 2 C.F.R. Subpart A (Acronyms);
- 2 C.F.R. 200.100-110 (certain General Provisions);

- 2 C.F.R. 200.203 (public notice of Federal financial assistance programs);
- 2 C.F.R. 200.303 (internal controls); and
- Single Audit Act and its implementing regulations at 2 C.F.R. Part 200 Subpart F.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Obligation and Expenditure Report

PRA Number: 1505-0276

Reporting Cycle: Annual

Authoritative Requirement: Section 605 of the Social Security Act, as added by Section 9901 of the American Rescue Plan Act of 2021 (Pub. L. No. 117-2) (42 U.S.C. 805)

Blank Copy of the Report: [Reporting Guidance for the Local Assistance and Tribal Consistency Fund \(treasury.gov\)](#)

Report Instructions: [Reporting Guidance for the Local Assistance and Tribal Consistency Fund \(treasury.gov\)](#)

Report Corrections: Office of Recovery Programs' (ORP) reporting portal has built-in functionality to reopen a report and allow recipients to make edits after the reporting deadline. However, it is ORP's policy that recipients may only make revisions if authorized by Treasury staff for a period of up to 60 days after the reporting deadline. After the revision period ends, the report is final. A resubmitted report becomes a recipient's final report within ORP's reporting portal. Recipients can generate PDFs of this report at any time.

Key Line Items- The following line items contain critical information:

1. *Quantifiable Objective Criteria*: Aggregate recipient-reported obligations and expenditures by governmental purpose reporting category matches the recipient's financial statements with no more than a 10 percent difference from the total amount reported (e.g., governmental services, capital expenditures, transportation/water/sewer/technology, other governmental

service). (See pages 3 to 6)

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

Recipients meeting the applicable thresholds per the Federal Funding Accountability and Transparency Act of 2006 are only required to report on executive total compensation pursuant to 2 CFR part 170. See Part 3.L for audit guidance.

FEDERAL COMMUNICATIONS COMMISSION

ASSISTANCE LISTING 32.006 COVID-19 TELEHEALTH PROGRAM

I. PROGRAM OBJECTIVES

The coronavirus disease 2019 (COVID-19) Telehealth Program (Program) provides \$200 million in funding, appropriated by Congress as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act (Round 1), to help health care providers provide telehealth services in response to the COVID-19 pandemic. The Federal Communications Commission (Commission) established the Program through a Report and Order released on April 2, 2020, available at <https://docs.fcc.gov/public/attachments/FCC-20-44A1.pdf>. This Program provides immediate support to eligible health care providers responding to the COVID-19 pandemic by funding the telecommunications services, information services, and devices necessary to provide telehealth services until the Program's funds have been expended or the COVID-19 pandemic has ended.

However, demand for the program significantly exceeded available funding. To build on the success of Round 1 of the Commission's COVID-19 Telehealth Program, in the Consolidated Appropriations Act 2021 (Round 2), Congress appropriated an additional \$249.95 million for this Program. Thus, on February 2, 2021, the Commission released a Report and Order (Round 2 Administration Report and Order), available at <https://docs.fcc.gov/public/attachments/FCC-21-24A1.pdf>, expanding the administrative responsibilities of the Universal Service Administrative Company (USAC) to administer the Program with financial oversight delegated to the Commission's Office of the Managing Director (OMD) to work in coordination with the Wireline Competition Bureau (WCB). Subsequently, on March 30, 2021, the Commission released a Report and Order (Round 2 Report and Order) <https://docs.fcc.gov/public/attachments/FCC-21-39A1.pdf> establishing requirements, processes, and procedures for Round 2 of Program funding.

For more details regarding the Program, please visit the Commission's public website (Round 1) at <https://www.fcc.gov/covid-19-telehealth-program>, and USAC's website (Round 2) at <https://www.usac.org/about/covid-19-telehealth-program/>.

II. PROGRAM PROCEDURES

A. Application Requirements

Eligible health care providers must submit the "COVID-19 Telehealth Program Application and Request for Funding" application through an online application portal. In conjunction with completing an application, applicants are required to complete four steps.

First, applicants are required to request and receive an eligibility determination from USAC. Requirements are as follows:

1. *Round 1 Funding* – Applicants are required to request and receive an eligibility determination for each health care provider site included in their application by filing an FCC Form 460, Eligibility and Registration Form, with USAC.

2. *Round 2 Funding* – Applicants are required to request and receive an eligibility determination from USAC for only the lead health care provider site by filing an FCC Form 460, Eligibility and Registration Form. Health care provider sites that USAC has already deemed eligible to participate in the Commission’s existing Rural Health Care Program or in Round 1 of the Program may rely on that eligibility determination for Round 2 of the Program. Applicants must certify to the eligibility of all other health care provider sites that received eligible funded services or connected devices on their Round 2 Request for Reimbursement Form.

Second, as entities doing business before the Commission, applicants are also required to obtain an FCC Registration Number (FRN) in the Commission Registration System (CORES). Third, applicants are required to register with the federal System for Award Management (SAM) to be able to receive Program payments if awarded funding. Fourth, entities seeking funding through Round 1 or Round 2 of the Program were required to submit an application. Applicants submitting applications prior to May 2, 2020, were instructed to download a fillable PDF application form and email the completed form and supporting documentation to the Commission. Effective May 2, 2020, applicants were required to apply through the COVID-19 Telehealth Program Application Portal.

B. Application Evaluation Process

For Round 1 funding, WCB, in consultation with the FCC’s Connect2Health Task Force, reviewed the Program applications, as outlined in the Commission’s Report and Order, selected participants, and made funding awards on a rolling basis to eligible applicants based on the estimated costs of the eligible services and connected devices they intended to purchase with Program funds. Awards were made until the funding was exhausted, which occurred on July 8, 2020.

For Round 2 funding, the Commission adopted application evaluation metrics. For Round 2, to ensure equitable nationwide distribution of Program funding, the Commission adopted requirements to ensure that at least two applications with lead health care providers from every state, territory, and the District of Columbia received Program funding across both rounds of the Program if such applications exist.

To distribute more funding to applicants, the Commission established a \$1 million cap per applicant for each round. All eligible Round 2 applicants may qualify for the full commitment amount per application, including those receiving Round 1 funding. The final Round 2 funding commitments were announced on January 26, 2022.

Source of Governing Requirements

Round 1 Funding:

Round 1 is governed under the Coronavirus Aid, Relief, and Economic Security (CARES) Act, Pub. L. No. 116-136, 134 Stat. 28, 15 U.S.C. §9001 (note) (2020). This bill is available at

[H.R.748 - 116th Congress \(2019-2020\): CARES Act | Congress.gov | Library of Congress.](#)

Pursuant to the CARES Act, the Commission adopted provisions for the Program in Report and Order: *Promoting Telehealth for Low-Income Consumers; COVID-19 Telehealth Program*, WC Docket nos. 18-213, 20-89, and Report and Order, 35 FCC Rcd 3366, 3375-84, paras. 15–36 (2020). The second section of the Report and Order implements the Connected Care Pilot Program, which is a Universal Service Fund-supported program and is separate from the Program. The Round 1 Report and Order is available at <https://docs.fcc.gov/public/attachments/FCC-20-44A1.pdf>.

Round 2 Funding:

Round 2 is governed under the Consolidated Appropriations Act, 2021, Pub. L. No. 116-260, Division N-Additional Coronavirus Response and Relief, Title IX-Broadband Internet Access Service, section 903 “FCC COVID-19 Telehealth Program,” 47 U.S.C.A. §254 (note) (2020). The bill is available at <https://www.congress.gov/bill/116th-congress/house-bill/133/text>.

On March 30, 2021, the Commission adopted a Report and Order and Order on Reconsideration that established the requirements and necessary procedures for the Commission to award the additional Round 2 funds appropriated under the Consolidated Appropriations Act, 2021 (*COVID-19 Telehealth Program, Promoting Telehealth for Low-Income Consumers*), WC Docket nos. 20-89, 18-213, Report and Order, FCC 21-39, available at <https://docs.fcc.gov/public/attachments/FCC-21-39A1.pdf>.

As a direct payment for specified use, these funds are considered federal financial assistance and are subject to only the following sections of the Code of Federal Regulations, Title II, Chapter II, Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (“2 CFR”): Subpart A- Acronyms and Definitions; Subpart B, General provisions; subparts C–D (specifically 2 CFR section 200.203 – Requirement to provide public notice of federal financial assistance programs 2 CFR section 200.303 Internal controls; 2 CFR sections 200.331-333 Subrecipient Monitoring and Management; and Subpart F, Audit Requirements. The remaining sections of subparts C, D, and E do not apply to this Program. Code of Federal Regulations is available at [CFR - Title 2 \(2021\): Grants and Agreements | ECFR.gov | Code of Federal Regulations](#).

Availability of Other Program Information

Program information is available at <https://www.fcc.gov/covid-19-telehealth-program-invoices-reimbursements> and USAC’s website <https://www.usac.org/about/covid-19-telehealth-program/>. A “Frequently Asked Questions” section is provided on each website for additional details.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have

been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	Y	Y	N	Y	N	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

Telehealth telecommunications or information services/connected devices that use broadband Internet access service-enabled technologies or telecommunications to deliver remote medical, diagnostic, patient-centered, and treatment-related services directly to patients.

- a. **Round 1 Funding** – Consistent with the Report and Order (FCC 20-44), funding recipients can seek reimbursement for eligible telecommunications and information services and connected devices that were not included in the COVID-19 Telehealth Program Application and Request for Funding application, as well as seek reimbursement for different quantities than were included in the application. Existing services that were not purchased in response to COVID-19 are ineligible for funding. However, if existing services were upgraded to respond to COVID-19, the costs of the upgrade may be considered for funding. Detailed information on eligible services and devices for rounds 1 and 2 is available at the above websites.
- b. **Round 2 Funding** – In addition to the Activities Allowed in Round 1, consistent with the Report and Order (FCC 21-39), applicants may apply to receive retroactive funding for eligible services and devices purchased

on or after March 13, 2020, so long as they did not receive Round 1 funding for those eligible services and devices.

2. *Activities Unallowed*

Participants cannot receive duplicate funding from any source (private, state, or federal) for the exact same services or devices eligible for support under the Program.

Participants cannot be a vendor or service provider of the eligible services and/or connected devices for which they receive Program reimbursement.

Program funding cannot be used to purchase, rent, lease, or otherwise obtain any communications equipment or service identified and published on the Covered List. See the Covered List posted online at <https://www.fcc.gov/supplychain/coveredlist>. (Pursuant to section 2(a) of the Secure and Trusted Communications Networks Act of 2019 (Secure Networks Act), and section 1.50002 of the Commission's rules, the Federal Communications Commission's Public Safety and Homeland Security Bureau (Bureau) publishes of a list of communications equipment and services (Covered List) that are deemed to pose an unacceptable risk to the national security of the United States or the security and safety of United States persons.)

B. Allowable Costs/Cost Principles

See Eligibility of Services and Connected Devices section of the Round 1 FAQs at <https://www.fcc.gov/covid-19-telehealth-program-invoice-frequently-asked-questions> and Appendix B – Eligible Services List for COVID-19 Telehealth Program (Round 2) at <https://docs.fcc.gov/public/attachments/FCC-21-39A1.pdf>. The Round 2 list is also posted online, in the Eligible Services and Devices section at <https://www.fcc.gov/covid-19-telehealth-program-frequently-asked-questions-faqs>.

1. Telecommunications, information services, broadband connectivity services, and connected devices costs necessary to provide telehealth services to patients in response to COVID-19. Connected device costs for which funding is requested must be integral to patient care. Devices mentioned below in example list have been deemed to be integral to patient care.
2. The Program will only fund devices (e.g., pulse oximetry, blood pressure monitoring devices) that are themselves connected.
3. Program funds can be used to treat patients/patient groups at a health care facility or remotely that could free up resources and could reduce a health care professional's unnecessary exposure to COVID-19.

Examples of services and connected devices that program applicants are eligible to seek funding for include but are not limited to:

- *Telecommunications Services*: Voice services for health care providers or their patients.
 - *Information Services*: Internet connectivity services for health care providers or their patients, remote patient monitoring platforms and services; patient reported outcome platforms; store and forward services, such as asynchronous transfer of patient images and data for interpretation by a physician; platforms and services to provide synchronous video consultation.
 - *Internet Connected Devices/Equipment*: Tablets, smart phones, or connected devices to receive connected care services at home or telehealth at a provider site (e.g., broadband enabled blood pressure monitors; pulse-ox) for patient or health care provider use; telemedicine kiosks/carts for health care provider site. Connected devices that are Bluetooth or Wi-Fi enabled are eligible.
4. Round 1 and Round 2 funding will not be provided for ineligible services including, personnel, administrative, construction, marketing, maintenance, technical support, separate costs for warranties and protection, and training activities/costs. Ineligible activities include IT services/costs for the development of new websites, systems, and platforms.
 5. The Program will also not fund unconnected devices (e.g., devices that patients can use at home and then share the results with their medical professional manually), accessories, or non-telehealth items (e.g., office furniture and supplies, security systems, back-up power equipment, incidental expenses/indirect costs, smart watches, and fitness trackers).

H. Period of Performance

For Round 1 funding, the period of performance is as follows:

1. For eligible items, purchased on or after March 13, 2020, and by December 31, 2020, eligible health care providers may apply to receive reimbursement through the Program.

For monthly recurring services (e.g., internet service), funding recipients seeking reimbursement for eligible recurring services may apply their funding commitment towards six months of eligible recurring services as long as those services are implemented on or after March 13, 2020, and by December 31, 2020. Eligible upfront or prepaid costs/licenses with an annual term (e.g., bundled telehealth services, telehealth platforms, telehealth services, and telehealth platform/service user fees, access charges, or subscriptions) are eligible for a full year of support. Existing services that were not purchased in response to COVID-19 are ineligible for funding. However, if existing services were upgraded to respond to COVID-19, the costs of the upgrade may be considered for funding.

For Round 2 funding, the period of performance is set out at ¶59-60 of the Round 2 Report and Order, 36 FCC Rcd 4171 at page 22, as follows:

1. For eligible services and devices, applicants may apply to receive funding retroactive on eligible items purchased on or after March 13, 2020, so long as they did not receive Round 1 funding for those eligible services and devices. Existing services that were not purchased in response to COVID-19 are ineligible for funding. However, if existing services were upgraded to respond to COVID-19, the costs of the upgrade may be considered for funding.
2. For monthly recurring services, applicants may receive Program funding for up to 12 months of eligible recurring services, and annual license agreements (only one one-year term will be funded) including retroactive funding for services and devices purchased on or after March 13, 2020.
3. The deadline for purchasing and implementing services is October 31, 2022. The deadline to submit invoices and requests for reimbursement is October 31, 2023. <https://www.fcc.gov/document/wcb-extends-deadlines-covid-19-telehealth-program-round-2>

I. Procurement and Suspension and Debarment

1. Procurement

Because the Program is a federal subsidy, Program funding may not be used to purchase, rent, lease, or otherwise obtain any communications equipment or service identified and published on the Covered List. See the Covered List posted online at <https://www.fcc.gov/supplychain/coveredlist>.

2. Suspension and Debarment

Entities that seek to be funding recipients in the Program are required to first register in SAM.gov before they can receive Program payments and should not be able to register if suspended or debarred from receiving federal funds. Pursuant to 47 CFR section 54.8, the Commission's suspension and debarment rules, which are currently applicable to the USF program, apply to COVID-19 Telehealth program funding recipients. The Commission shall suspend and debar a person (any individual, group of individuals, corporation, partnership, association, unit of government or legal entity, however organized) convicted of criminal violations or held civilly liable for certain acts arising out of activities associated with or related to the E-rate, High Cost, Rural Health Care, and Lifeline programs. See 47 CFR sections 54.8(c), (d), and (g). Associated activities include the receipt of funds or discounted services through one or more of the USF support mechanisms, or consulting with, assisting, or advising applicants or service providers regarding one or more of the USF support mechanisms. See 47 CFR section 54.8(a)(1).

Section 54.8(d) states:

Unless otherwise ordered, *any persons suspended or debarred shall be excluded from activities associated with or related to the schools and libraries support mechanism (E-rate), the high-cost support mechanism, the rural health care support mechanism, and the low-income support mechanism (Lifeline).* Suspension and debarment of a person other than an individual constitutes suspension and debarment of all divisions and/or other organizational elements from participation in the program for the suspension and debarment period, unless the notice of suspension and proposed debarment is limited by its terms to one or more specifically identified individuals, divisions, or other organizational elements or to specific types of transactions. 47 CFR section 54.8(d).

L. Reporting

1. Financial Reporting

- a. *SF-270*, Request for Advance or Reimbursement - Not Applicable.
- b. *SF-271*, Outlay Report and Request for Reimbursement for Construction Program -Not Applicable.
- c. *SF-425*, Federal Financial Report -Not Applicable.
- d. *Other-Applicable*. Completed program request for reimbursement forms submitted to the FCC, including supporting invoice documents, serve as Financial Reports from the awardees. (Per the Consolidated Appropriations Act, 2021, §903(e), Round 2 is exempt from the PRA.)

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Eligibility

Compliance Requirements Consistent with the Telecommunications Act of 1996, Pub. L. No. 104-104, 110 Stat. 56 (codified at 47 USC section 151 *et seq.*) and the CARES Act, 15 USC section 9001 (note), nonprofit and public eligible health care

providers fall within the categories of health care providers in section 254(h)(5)(B) of the 1996 Act, 47 USC section 254, and include:

- a. post-secondary educational institutions offering health care instruction, teaching hospitals, and medical schools;
- b. community health centers or health centers providing health care to migrants;
- c. local health departments or agencies;
- d. community mental health centers;
- e. not-for-profit hospitals;
- f. rural health clinics;
- g. skilled nursing facilities; or
- h. consortia of health care providers consisting of one or more entities falling into the first seven categories.

Eligible entities include a dedicated ER of a rural, for profit hospital or a part-time eligible entity located in an ineligible facility. For Round 2, the other eligible entities can be located in rural or non-rural area and can operate from a temporary or mobile location.

Audit Objectives Determine whether a funding recipient is an eligible health care provider consistent with the Program's rules and requirements.

Suggested Audit Procedures

- a. Verify that the site(s) receiving funded eligible services and equipment is an eligible health care provider . Based on health care provider entity type, use information in the following verifier websites in addition to any other available sources to confirm eligibility:
 - Documentation of an approved eligibility determination from USAC
 - Community health centers or centers providing health care to migrants – <https://findahealthcenter.hrsa.gov/>
 - Community mental health center – (no specific verifier website available)
 - Local health department/agency – <https://www.naccho.org/membership/lhd-directory>
 - Not-for-profit hospital – <https://guide.aha.org/guide/searchResults>

- Post-secondary educational institution offering health care instruction, teaching hospital, or medical school – <https://ope.ed.gov/dapip/#/home>
- Rural health clinic (not limited to rural locations for purposes of the Program)
- Dedicated ER of rural, for-profit hospital – <https://guide.aha.org/guide/searchResults>
- Skilled nursing facility – <https://www.medicare.gov/nursinghomecompare/search.html>

FEDERAL COMMUNICATIONS COMMISSION

ASSISTANCE LISTING 32.009 EMERGENCY CONNECTIVITY FUND PROGRAM

I. PROGRAM OBJECTIVES

Congress established the Emergency Connectivity Fund (ECF) through section 7402 of the American Rescue Plan Act of 2021 (Act), and appropriated \$7.171 billion for the purchase of eligible equipment, advanced telecommunications, and information services for use by students, school staff, and library patrons at locations that include locations other than at a school or library. In addition, Congress appropriated \$1 million for the Inspector General of the Federal Communications Commission (OIG) to conduct oversight of support provided through the ECF. Congress directed the Federal Communications Commission (Commission) to promulgate rules providing for the distribution of funding from the ECF within 60 days from the date of enactment. The Commission adopted rules and established the ECF Program on May 10, 2021. See *Establishing the Emergency Connectivity Fund to Close the Homework Gap*, WC Docket No. 21-93, Report and Order, 36 FCC Rcd 8696 (2021) available at <https://docs.fcc.gov/public/attachments/FCC-21-58A1.pdf> (Report and Order). Congress also provided that these appropriated funds would remain available until September 30, 2030.

The ECF Program provides funding to meet the remote learning needs of students, school staff, and library patrons who would otherwise lack access to connected devices and broadband connections sufficient to engage in remote learning during the COVID-19 emergency period. In the Report and Order, the Commission adopted an initial 45-day application filing window to allow eligible schools and libraries to request funding for eligible services and equipment to be received or delivered between July 1, 2021 through June 30, 2022.

The Act also provides that the Commission and the Universal Service Administrative Company (USAC), the permanent administrator of the Universal Service Fund, will administer the regulations adopted pursuant to section 7402. In the Report and Order, the Commission directed USAC to administer the ECF Program under its oversight and pursuant to the terms of the March 19, 2021 Memorandum of Understanding (MOU) between the Commission and USAC.

As a direct payment for specified use, these funds are considered federal financial assistance and are subject to only the certain sections (as noted in the Source of Governing Documents, below) of the Code of Federal Regulations, Title II, Chapter II, Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. For Audit purposes, Nonprofit organizations must refer to Subpart F and other types of organizations may be audited by the Commission or Contractor. Audit information may be requested by the Commission, USAC, or Commission's contractor for program specific audits.

For additional details regarding the ECF Program, please visit <https://www.fcc.gov/emergency-connectivity-fund> and <https://www.emergencyconnectivityfund.org/>.

II. PROGRAM PROCEDURES

Consistent with Congressional direction in section 7402, schools, libraries, and consortia of schools and libraries that are eligible for support through the E-Rate Program are eligible to

request and receive support through the ECF Program. However, eligible schools and libraries do not have to be participants in the E-Rate Program to participate in the ECF Program. In its Report and Order, the Commission determined that the ECF Program would leverage many of the existing forms, including the E-Rate application form (i.e., FCC Form 471 – Description of Services Ordered and Certification Form) and other E-Rate processes to the extent feasible to streamline the process for applying for and receiving support through the ECF Program.

The Commission opened an initial 45-day application filing window for applicants to submit requests for funding (i.e., ECF FCC Form 471 applications) for eligible equipment and services received or delivered between July 1, 2021 and June 30, 2022. The first initial application filing window opened on June 29, 2021 and closed on August 13, 2021. Due to the availability of remaining funds after the close of the initial application filing window, a second ECF Program application filing window opened on September 28, 2021 and closed on October 13, 2021 to allow schools and libraries to apply for funding to address remaining unmet connectivity needs of their students, school staff, and library patrons. During the second application filing window, applicants could submit requests for funding to purchase eligible equipment and services to be received or delivered between July 1, 2021 and June 30, 2022. On February 22, 2022, the Wireline Competition Bureau (Bureau) extended the June 30, 2022 service delivery date to June 30, 2023 for all first and second ECF filing window funding requests for equipment, non-recurring services, and recurring services and modified 47 CFR section 54.1711(e) accordingly. See *Establishing Emergency Connectivity Fund to Close the Homework Gap*, WC Docket No. 21-93, Order, DA 22-176 (rel. Feb. 22, 2022).

On March 23, 2022, the Bureau announced that a third application filing window would open on April 28, 2022 and close on May 13, 2022. During this 15-day filing window, eligible schools and libraries could request funding for eligible equipment and up to 12 months of recurring services to be received or delivered between July 1, 2022 and December 31, 2023. In addition, December 31, 2023 was established as the service delivery date for all ECF third window funding requests for equipment, non-recurring services, and recurring services. See *Wireline Competition Bureau Announces Third Application Filing Window for the Emergency Connectivity Fund Program*, WC Docket No. 21-93, Public Notice, DA 22-309 (rel. Mar. 23, 2022). As demand received during the third application filing window exceeded available funds, the third window funding requests will be prioritized in accordance with 47 CFR section 54.1708(c), and it is not anticipated that there will be any additional application filing windows for the program as total program demand exceeds the \$7.171 billion that was appropriated for the ECF.

USAC reviews the timely filed ECF FCC Form 471 applications and makes recommendations for issuing commitments for the funding requests. The Commission reviews and approves the recommended funding decisions and USAC then issues the funding commitment decision letters to the applicants and service providers. The Commission records the commitments and obligates funds in the Commission's financial system. In the event that demand exceeds available funds, the Commission and USAC will prioritize support based on the applicant's E-Rate Program discount rate for category one services, with a 5 percent bump up for rural schools and libraries. See ECF Program prioritization matrix at 47 CFR section 54.1708(c).

Applicants that will submit requests for reimbursement for Program payments, or service providers that agree to submit requests for reimbursement on behalf of the applicant, must register or renew their account with the System for Award Management (SAM), which is located at <https://sam.gov/content/home>, in order to receive program disbursements.

Applicants will submit reimbursement requests using the ECF FCC Form 472, Billed Entity Applicant Reimbursement (BEAR) Form, and service providers that agree to invoice on behalf of applicants will submit the ECF FCC Form 474, Service Provider Invoice (SPI) Form. Applicants and service providers are required to include certain certifications on the form to protect against waste, fraud, and abuse. Applicants and service providers are also required to submit vendor invoices detailing the items purchased, along with their reimbursement requests. Invoices must support the amounts requested in the application form and reimbursement request. The Commission authorizes the disbursement of funds by the United States Department of Treasury after approving the proposed payments.

Source of Governing Requirements

The Emergency Connectivity Fund Program is established pursuant to the American Rescue Plan Act of 2021, Pub. L. No. 117-2, 135 Stat. 109-110, Sec. 7402(c), 47 USC section 254 Note. The bill is available at [H.R.1319 - 117th Congress \(2021\): American Rescue Plan Act | Congress.gov | Library of Congress](#).

Pursuant to the American Rescue Plan Act, the Commission adopted rules for the ECF Program in its May 10, 2021 Report and Order: *Establishing Emergency Connectivity Fund to Close the Homework Gap*, WC Docket Nos- 21-58, 21-93 Report and Order, 36 FCC Rcd 8696 (2021). The Report and Order is available at <https://docs.fcc.gov/public/attachments/FCC-21-58A1.pdf>. The rules for the ECF Program are available at [47 CFR sections 54.1700 et seq.](#)

As a direct payment for specified use, these funds are considered federal financial assistance and are subject to only the following sections of the Code of Federal Regulations, Title II, Chapter II, Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (“2 CFR”): Subpart A, Acronyms and Definitions; Subpart B, General provisions; subparts C–D (specifically 2 CFR section 200.203 – Requirement to provide public notice of federal financial assistance programs; and 2 CFR section 200.303 Internal controls and 2 CFR sections 200.331-333 Subrecipient Monitoring and Management); Subpart F, Audit Requirements.

The following remaining 2 CFR policy requirements are excluded from coverage under this assistance listing: Subpart C; Subpart D; Subpart E.

Code of Federal Regulations is available at [CFR - Title 2 \(2021\): Grants and Agreements | ECFR.gov | Code of Federal Regulations](https://www.ecfr.gov).

Availability of Other Program Information

Program information is available at <https://www.fcc.gov/emergency-connectivity-fund>. See “Frequently Asked Questions” section for details. Additional information is also available at <https://www.emergencyconnectivityfund.org/>.

The documents listed in the “Source of Governing Requirements” and the above link serve as a guide for tests and findings.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N

Y	Y	N	N	Y	N	Y	Y	N	N	N	Y

A. Activities Allowed or Unallowed

See Eligible Services and Equipment section at <https://www.fcc.gov/emergency-connectivity-fund> and the Eligible Services List for Emergency Connectivity Fund Program at https://www.fcc.gov/sites/default/files/ecf_esl.pdf.

1. *Activities Allowed*

ECF Program-funded devices and services must be used primarily for off-campus educational purposes and by students, school staff, and library patrons with otherwise unmet needs. To ensure that funding is focused on unmet needs, the Commission requires schools, library, and consortia to certify, as part of their funding application, that they are only seeking support for eligible equipment and/or broadband connectivity provided to students, school staff, and library patrons who would otherwise lack access to connected devices and/or broadband connectivity sufficient to engage in remote learning.

The ECF FCC Form 471 application must be signed by the person authorized to order eligible equipment and/or services for the eligible school, library, or consortium and shall include that person's certification under penalty of perjury. Certifications include:

- a. Since the connected devices supported by this Program are intended to be used primarily for educational purposes and by students, school staff, and library patrons, the Commission requires schools and libraries to restrict access to eligible connected devices to only those students, school staff, and library patrons with appropriate credentials.
- b. The library applicant must certify that the library or library consortium listed on the FCC Form 471 application is only seeking support for eligible equipment and/or services provided to library patrons who have signed and returned a statement that the library patron would otherwise lack access to equipment or services sufficient to meet the patron's educational needs if not for the use of the equipment or service being provided by the library. To ensure that libraries are providing eligible equipment and services to patrons with unmet needs, before providing a library patron with eligible equipment or services, the library must provide the patron a copy of an eligible use policy, which explains that the equipment or service is intended for library patrons who do not otherwise have access to equipment or services sufficient to meet the patron's educational needs. The library must also obtain a signed statement from the library patron that they would otherwise lack access to the equipment or services sufficient to meet their educational needs if not for the equipment or service provided by the library.
- c. The school or school consortium applicant must certify that the school entities listed on the FCC Form 471 application are only seeking support for eligible equipment and/or services provided to students and school staff who would otherwise lack connected devices and/or broadband services sufficient to engage in remote learning. These applicants must describe how and when they collected the information that they use for the estimates provided in their responses on the application section pertaining to the unmet needs of their students.

The complete list of certifications required on the program application is listed at 47 CFR section 54.1710(a)(1)(i)-(xv).

The complete list of certifications required on the program Request for Reimbursement forms to be made by applicants and the service providers that agree to submit these forms on the behalf of applicants is listed at 47 CFR section 54.1711(a)(1)(i)-(xii) and (a)(2)(i)-(x).

Both applicants and service providers, who agree to invoice on the applicant's behalf, may submit requests for reimbursement. The applicant must indicate that its service provider will submit the requests for reimbursement in its application and provide evidence that shows that the service provider has agreed to the arrangement.

Applicants who have entered into contractual arrangements or are otherwise legally obligated to purchase eligible equipment and services from their service provider, can submit requests for reimbursement before they have paid their service provider(s) for the requested equipment and services. The equipment or services must have been received before the applicant may submit requests for reimbursement. Applicants must also pay their service provider within 30 days after receipt of funds and will be required to certify compliance and provide verification of payment to the service provider.

2. *Activities Unallowed*

Schools and libraries are prohibited from seeking and receiving reimbursement for eligible equipment and services purchased for use solely at the school or library. Additionally, for funding requests submitted during the first two application filing windows, items purchased or received prior to July 1, 2021, or after June 30, 2023, are ineligible for ECF support for this funding period (see, e.g., 47 CFR section 54.1708(b) and *Establishing the Emergency Connectivity Fund to Close the Homework Gap*, Order, DA 22-176 (rel. Feb. 22, 2022) (extending the service delivery date from June 30, 2022 to June 30, 2023). For the funding requests submitted during the third application filing window, applicants may request funding for eligible equipment, non-recurring services, and for up to 12 months of recurring service to be received or delivered between July 1, 2022 and December 31, 2023. There is a minor exception for multi-year lease agreements for equipment or connected devices. The ECF Program will fund the lease payments for this equipment or connected devices for the period July 1, 2021 through June 30, 2023, the extended service delivery date for equipment, non-recurring services, and recurring services requested during for the first two application filing windows. The applicants may have received this equipment or connected devices before the July 1, 2021 date for these multi-year lease arrangements. The ECF Program will also fund the lease payments for this equipment or connected devices for up to 12 months of equipment to be delivered between July 1, 2022 and December 31, 2023, for applicants that receive funding commitments for their third window requests.

ECF Program rules require that on the ECF Request for Reimbursement forms - the FCC Form 472 and FCC Form 474 – applicants and service providers certify to the following under penalty of perjury: “No Federal subsidy made available through a program administered by the Commission that provides funds to be used for the capital expenditures necessary for the provision of advanced communications services has been or will be used to purchase, rent, lease, or otherwise obtain, any covered communications equipment or service, or maintain any covered communications equipment or service, or maintain any covered communications equipment or service previously purchased, rented, leased, or otherwise obtained, as required by § 54.10.”

Entities participating in the ECF Program may not seek Emergency Connectivity Fund support or reimbursement for eligible equipment or services that have been purchased with or reimbursed in full from other Federal pandemic-relief funding, targeted state funding, other external sources of targeted funding or targeted gifts, or eligible for discounts from the schools and libraries universal service support mechanism or other universal service support mechanisms.

B. Allowable Costs/Cost Principles

See Eligible Services and Equipment section at <https://www.fcc.gov/emergency-connectivity-fund-faqs> and the Eligible Services List for Emergency Connectivity Fund Program at https://www.fcc.gov/sites/default/files/ecf_esl.pdf.

Section 7402(b) provides that the Commission will reimburse 100 percent of the costs associated with the purchase of eligible equipment and/or advanced telecommunications and information services, except that any reimbursement of a school or library for the costs associated with any eligible equipment may not exceed an amount the Commission determines to be reasonable. Section 7402(d)(6) defines eligible equipment to mean: (1) Wi-Fi hotspots, (2) modems, (3) routers, (4) devices that combine a modem and router, and (5) connected devices. Section 7402(d)(11) defines Wi-Fi hotspot as a device that is capable of—(A) receiving advanced telecommunications and information services; and (B) sharing such services with another connected device through the use of Wi-Fi. Section 7402(d)(3) defines connected devices as laptop computers, tablet computers, or similar end-user devices that are capable of connecting to advanced telecommunications and information services. Section 7402(d)(1) defines “advanced telecommunications and information services” to mean advanced telecommunications and information services, as such term is used in section 254(h) of the Communications Act of 1934 (47 USC section 254(h)).

1. Eligible Equipment: Wi-Fi hotspots, modems, routers, devices that combine a modem and router, and connected devices (i.e., laptops and tablet computers). Air cards used to connect end-user devices to the Internet through cellular data services are wireless modems and are also eligible for support through the ECF Program.

2. **Connected Devices:** The Commission defined connected devices as laptop computers and tablet computers that are capable of connecting to advanced telecommunications and information services (47 CFR section 54.1700(c)). It is expected that connected devices will be Wi-Fi enabled and be able to support video conferencing platforms and other software necessary to ensure full participation in remote learning. It is also expected that connected devices will be accessible to and usable by individuals with disabilities. If people with disabilities require connected devices to connect to the Internet, schools and libraries will request such devices to accommodate disabilities, if needed. The Commission also determined that desktop computers and mobile phones, including smart phones, are ineligible for ECF Program support.
3. **Advanced Telecommunications and Information Service:** The Commission defined advanced telecommunications and information services as services as the term is used in section 254(h) of the Communications Act, 47 USC section 254(h) (47 CFR section 54.1700(a)). To qualify for funding for the ECF Program, schools and libraries will only be reimbursed for purchasing a commercially available service providing a fixed or mobile broadband Internet access connection for off-campus use by students, school staff, or library patrons.
4. **Limited exception for network construction and/or datacasting.** Funding for network construction or self-provisioned networks will be permitted only where no commercially available broadband Internet access services are available that are sufficient to support remote learning for students, school staff, or library patrons. Under those same limited circumstances, funding for customer premises equipment to receive datacasting services will also be available. Applicants must demonstrate that there were no commercially available Internet access service options available sufficient to support remote learning from one or a combination of providers. Applicants must also define the geographic area that was or will be served and assess the estimated number of students, school staff, or library patrons to be served. Applicants must be able to provide clear evidence of how they determined that an existing fixed or mobile network sufficient to support remote learning was or is not available and that for prospective construction, they sought service from existing providers serving the area prior to constructing a new network and that such providers were unable or unwilling to provide services sufficient to meet the remote learning needs of their students, school staff, or library patrons. Applicants will also be required to certify that they sought service from existing providers in the relevant area and that such providers were unable or unwilling to provide broadband Internet access services sufficient to meet their remote learning needs before constructing new networks or requesting funding for datacasting customer premises equipment.

For networks already constructed or equipment already purchased during the pandemic, applicants must show that services were provided to students, school staff, or library patrons during the funding period supported by the second filing window.

For future construction, they must show that construction is completed and services provided within one year of a funding commitment decision.

5. **Installation, Taxes, and Fees:** The Program will cover reasonable costs of the enumerated equipment, connected devices, and services, including installation, activation, and initial configuration costs, taxes, and fees. Installation and configuration costs will only be eligible for support if they are provided by the same vendor that is providing the eligible equipment.
6. **Wi-Fi Hotspots on School Buses and Bookmobiles:** Schools and libraries are allowed to use Emergency Connectivity Fund Program support to purchase Wi-Fi hotspots for school buses and bookmobiles to provide off-campus broadband services to students, school staff, and library patrons who currently lack sufficient broadband access.
7. **Reasonable Amount:** The Commission has determined that \$400 is a reasonable, maximum support amount for connected devices. Applicants may request a waiver of the reasonable support amount for connected devices, pursuant to 47 CFR section 54.1718(a)(2) and (b)(2), if the reasonable cost to purchase devices for students, school staff, or patrons with disabilities is higher than \$400 and the public interest warrants deviation from the general rule. For Wi-Fi hotspots provided to an individual student, school staff member, or library patron, \$250 is the maximum reasonable support amount based on advertised costs for Wi-Fi hotspots.
8. Funding will not be provided for desktop computers and mobile phones, including smartphones. Funding for more than one connection and connected device per user is also prohibited.

For other types of eligible equipment—namely, modems, routers, and devices that combine modems and routers, and multi-user Wi-Fi hotspots, the Commission delegated authority to the Bureau to provide guidance to USAC for assessing the reasonability of the costs for these applications. USAC will also make the pricing data from the Emergency Connectivity Fund Program publicly available through its Open Data platform (<https://www.emergencyconnectivityfund.org/open-data/>). The publication of this pricing data will allow applicants to review prices paid by schools and libraries across the country for same and similar eligible equipment and services.

9. Applicants may use consultants to assist with the preparation of their funding applications and reimbursement requests, but any fees associated with such assistance are not eligible for funding under the Program.

F. Equipment/Real Property Management

1. *Equipment and Services*

Applicants may request ECF Program funding for only eligible equipment and services. Eligible equipment and services funded by the Emergency Connectivity Fund Program are detailed in sections (A) and (B) above.

The Eligible Services List provides guidance on the equipment and services eligible for funding under the Emergency Connectivity Fund Program:
https://www.fcc.gov/sites/default/files/ecf_esl.pdf.

Emergency Connectivity Fund Program participants are required to maintain asset and service inventories of the devices and services purchased with ECF Program support.

Equipment and service inventory requirements.

Schools, libraries, and consortia shall keep asset and service inventories as follows:

- a. For each connected device or other piece of equipment provided to an individual student, school staff member, or library patron, the asset inventory must identify:
 - (1) The device or equipment type (i.e. laptop, tablet, mobile hotspot, modem, router);
 - (2) The device or equipment make/model;
 - (3) The device or equipment serial number;
 - (4) The full name of the person to whom the device or other piece of equipment was provided; and
 - (5) The dates the device or other piece of equipment was loaned out and returned to the school or library, or the date the school or library was notified that the device or other piece of equipment was missing, lost, or damaged.
- b. For each connected device or other piece of eligible equipment not provided to an individual student, school staff member, or library patron, but used to provide service to multiple eligible users, the asset inventory must contain:
 - (1) The device type or equipment type (i.e. laptop, tablet, mobile hotspot, modem, router);

- (2) The device or equipment make/model;
 - (3) The device or equipment serial number;
 - (4) The name of the school or library employee responsible for that device or equipment; and
 - (5) The dates the device or equipment was in service.
- c. For services provided to individual students, school staff, or library patrons, the service inventory must contain:
- (1) The type of service provided (i.e., DSL, cable, fiber, fixed wireless, satellite, mobile wireless);
 - (2) The service plan details, including upload and download speeds and monthly data cap;
 - (3) The full name of the person(s) to whom the service was provided;
 - (4) The service address (for fixed broadband service only);
 - (5) The installation date of the service (for fixed broadband service only); and
- d. For services not provided to an individual student, school staff member, or library patron, but used to provide service to multiple eligible users, the service inventory must contain:
- (1) The type of service provided (i.e., DSL, cable, fiber, fixed wireless, satellite, mobile wireless);
 - (2) The service plan details, including upload and download speeds and monthly data cap
 - (3) The name of the school or library employee responsible for the service;
 - (4) A description of the intended service area;
 - (5) The service address (for fixed broadband service only);
 - (6) The installation date of the service (for fixed broadband service only); and

- (7) The last date of service, as applicable (for fixed broadband service only).

The FCC has also provided guidance for audits regarding the provision of personally identifiable information (PII) to USAC or Commission staff about individuals (e.g., students, school staff members, or library patrons). (See paragraph 134 of the Report and Order). In the Report and Order, the FCC stated that anyone that requests program information that could contain PII should protect all audit documentation from unauthorized access and abide by all applicable federal and state privacy laws. If anonymized or deidentified information regarding the students, school staff, and library patrons is not sufficient, auditors may request that the school or library obtain consent of the parents or guardians, for students, and the consent of the school staff member or library patron to have access to this PII or explore other legal options for obtaining PII.

- e. Records retention. All Emergency Connectivity Fund participants shall retain records related to their participation in the program sufficient to demonstrate compliance with all program rules for at least ten (10) years from the last date of service or delivery of equipment.
- f. Prohibition on resale. Eligible equipment and services purchased with Emergency Connectivity Fund support shall not be sold, resold, or transferred in consideration of money or any other thing of value, except as provided in paragraph (g) below.
- g. Disposal of obsolete equipment. Eligible equipment purchased using Emergency Connectivity Fund support shall be considered obsolete if the equipment are at least three years old. Obsolete equipment may be resold or transferred in consideration of money or any other thing of value, disposed of, donated, or traded.

2. *Real Property Management*

Not applicable

H. Period of Performance

1. Approved eligible equipment and services requested during the first two application filing windows must be received or delivered between July 1, 2021 and June 30, 2023, and therefore must be invoiced by August 29, 2023. Approved equipment and up to 12 months of recurring services requested during the third application filing window must be received or delivered between July 1, 2022 and December 31, 2023, and therefore must be invoiced by February 29, 2024. See also 47 CFR section 54.1711(e).

2. Applicants and service providers are required to submit reimbursement requests and invoices for prospective purchases within 60 days from the date of the funding commitment decision letter; a revised funding commitment decision letter approving a post commitment change or a successful appeal of a previously denied or reduced funding commitment; or service delivery date, whichever is later. See 47 CFR section 54.1711(d) and (e)..
3. For recurring services that are invoiced on a monthly or periodic basis, approved applicants may invoice within 60 days after the last date of service instead of invoicing on a monthly basis or other periodic basis. For example, if an approved applicant receives monthly or periodic services through June 30, 2023, they must invoice by no later than August 29, 2023 (i.e., 60 days after the last date of service).
4. For equipment or other non-recurring services that have not been received when the applicant submitted their first or second filing window application, applicants may use June 30, 2023 as the service delivery date and invoice within 60 days after the date of funding commitment decision letter (FCDL); a revised funding commitment decision letter (RFCDL) approving a post-commitment change or a successful appeal of a previously denied or reduced funding; or the service delivery date, whichever date is later. For equipment and other non-recurring services that have not been received when the applicant submitted their third filing window application, applicants may use December 31, 2023 as the service delivery date and invoice within 60 days of the date of the FCDL; the date of the RFCDL approving a post-commitment change or a successful appeal of previously denied or reduced funding; or the service delivery date, whichever date is later. See also 47 CFR section 54.1711(d) and (e).

I. Procurement and Suspension and Debarment

1. Procurement

Program applicants must certify on the ECF FCC Form 471 application that the school, library, or consortia listed on the ECF FCC Form 471 application has complied with all applicable state, local, or tribal local laws regarding procurement of services for which support is being sought.

Schools and libraries may seek support from the ECF Program for the purchase of eligible services and equipment using existing bulk purchase programs or sponsored service agreements, so long as doing so is consistent with the relevant local, state, and tribal procurement regulations. The Emergency Connectivity Fund Program is aimed at connecting numerous students, school staff, and library patrons at their homes or other locations, and therefore a school district or library system appropriately may have agreements with multiple service providers to offer connectivity.

Gift restrictions for the Program prohibit eligible schools and libraries receiving support through the Emergency Connectivity Fund Program, including their employees, officers, representatives, agents, independent contractors, and individuals who are on the governing boards, from soliciting or accepting any gift or other thing of value from a service provider participating in or seeking to participate in the Emergency Connectivity Fund Program. Participating service providers are likewise prohibited from offering or providing any gift or other thing of value to eligible entities, including their employees, officers, representatives, agents, independent contractors, and individuals who are on the governing boards. An exception in the Emergency Connectivity Fund Program gift rule allows service providers to offer and provide, and applicants to solicit and accept, broadband connections, devices, networking equipment, or other things of value that are directly related to addressing the pandemic-related needs of students, school staff, and library patrons through June 30, 2022.

2. *Suspension and Debarment*

The Commission's suspension and debarment rules applicable to the Universal Service Fund Programs are also applicable to the Emergency Connectivity Fund Program (47 CFR section 54.8 (Suspension and Debarment rules)).

N. **Special Tests and Provisions**

1. **Eligible Entities**

Compliance Requirements Section 254(h)(7) of the Communications Act (47 USC section 254(h)(7)), as well as the limitations on eligibility set forth in section 254(h)(4) of the Communications Act (47 U.S.C. section 254(h)(4)), will be used to determine eligibility to receive Program funding.

For purposes of the ECF Program, the same definitions of “elementary school,” “secondary school,” “library,” and “library consortium” that are used in the E-Rate rules, with one minor modification explained below. Elementary or secondary schools as defined in the Elementary and Secondary Education Act (20 U.S.C. sections 7801(19) and (45)) are eligible for funding. Under ECF Program rules, “an elementary school means an elementary school as defined in 20 USC section 7801, a non-profit institutional day or residential school, including a public elementary charter school, that provides elementary education, as determined under state law.” See 47 CFR section 54.1700(g). A secondary school “means a secondary school as define in 20 USCsection 7801, a non-profit institutional day or residential school, including a public secondary charter school, that provides secondary education, as determined under state law except that the term does not include any education beyond grade 12.” See 47 CFR section 54.1700(k).

For the ECF Program, a library is defined as “(1) a public library; (2) a public elementary school or secondary school library; (3) a tribal library; (4) an academic library; (5) a research library;” and “(6) a private library, but only if the state in which such private library is located determines that the library should be considered a library for the purposes of this definition.” See 47 CFR section 54.1700(h). The Library Services and

Technology Act (LSTA) was amended to make clear that tribal libraries are eligible for support under the LSTA. Additionally, a library may also refer to a library consortium, which is defined as “any local, statewide, regional, or interstate cooperative association of libraries that provides for the systematic and effective coordination of the resources of schools, public, academic, and special libraries and information centers, for improving services to the clientele of such libraries. For purposes of these rules, references to library will also include library consortium.” See 47 CFR section 54.1700(i).

The ECF Program eligible entities requirements are:

- a. Schools or libraries that are eligible for E-Rate support, are also eligible for the ECF program, consistent with Congressional direction in Section 7402 of the Act.
- b. Private schools that meet the definition of elementary or secondary schools as defined in the Elementary and Secondary Education Act (20 U.S.C. sections 7801(19) and (45)), are nonprofit, and do not have an endowment exceeding \$50 million.
- c. A library’s eligibility depends on its funding as an independent entity. Only libraries whose budgets are completely separate from any schools (including, but not limited to, elementary and secondary schools, colleges, and universities) are eligible.

Audit Objectives Determine that the entity that incurred the expenditure complies with the eligibility requirements.

Suggested Audit Procedures

- a. Ascertain that the entity that records expenditure meets eligibility requirements. One approach to verify the eligibility of an entity is to confirm whether the entity is receiving or has previously received E-Rate support. Information on E-Rate support is available at <https://opendata.usac.org/stories/s/E-rate-Tools/bneq-mh8b/>. Another approach is to confirm whether the school meets the definition of the Elementary and Secondary Education Act using data sets and search tools made available by the US Department of Education’s National Center for Education Statistics (available at <https://nces.ed.gov/ccd/> for information on public schools and <https://nces.ed.gov/surveys/pss/> for information on private schools). Similarly, the Institute of Museum and Library Services provides data sets and search tools that may be used to confirm whether the library meets the eligibility criteria (available at <https://www.ims.gov/research-tools/data-collection>). In addition, the entity itself could provide documentation sufficient to show eligibility.
- b. If the consortium lead entity or consortium member records the expenditure, verify that the entity meets eligibility requirements. Consortia members may be verified using the approaches described above. Note that the consortium lead entity is not required to be an eligible entity (see 47 CFR sections 54.500-54.501).

2. Restricted Purpose

Compliance Requirements

a. Unmet need

To ensure that funding is focused on *unmet need*, the Commission requires schools, library, and consortia to certify, as part of their funding application, that they are only seeking support for eligible equipment and/or broadband provided to students and school staff who would otherwise lack access to connected devices and/or broadband connectivity sufficient to engage in remote learning.

At the application stage, school need only provide the best estimates of their unmet need. They may use whatever method they deem appropriate for estimating unmet need and are not required to provide any documentation to support these estimates when they submit their ECF FCC Form 471 application. Here is a link to see the unmet need questions for schools on the application:

<https://www.emergencyconnectivityfund.org/ecf-fcc-form-471/entity-information/>.

When schools file for requests for reimbursement, however, they should only request reimbursement for eligible equipment and services provided to students or school staff who would otherwise lack broadband services and/or devices sufficient to engage in remote learning. For example, if a school requested ECF funding to support the broadband services at the homes of 100 students based on an estimate of those that lacked services, but it determines during the school year that only 90 students have unmet need, the school should only seek reimbursement for the services provided to those 90 students. Schools may also be asked to provide documentation to support actual costs of assigned equipment and/or services after funds have been committed.

b. Per-location and per-user limitations

Per-location and per-user limitations will be imposed to maximize the use of limited funds. An eligible school or library will be reimbursed for no more than one connected device and no more than one Wi-Fi hotspot per student, school staff member, or library patron during the COVID-19 emergency period, and no more than one fixed broadband connection per location. However, unlike the per-location limit for fixed broadband, a similar per-location limitation will not be imposed on Wi-Fi hotspots because Wi-Fi hotspots distributed by schools and libraries may be insufficient for multiple users and many homes with multiple students, school staff, or library patrons may need more than one Wi-Fi hotspot to fully engage in remote learning. For purposes of the per-location limitation each unit in a multi-tenant environment (e.g., apartment buildings) will be considered as a separate location.

Audit Objectives Determine that program funds meet the restricted purpose test.

Suggested Audit Procedures

- a. Test a sample of transactions to determine compliance with the requirement to seek reimbursement for eligible equipment and services provided to students or staff who would otherwise lack broadband services and/or devices sufficient to engage in remote learning (i.e., with unmet needs). (Note: The student counts for unmet needs submitted on the FCC ECF Form 471 are the school/district's best estimate and therefore the focus should be on what is sought for the request for reimbursements). Request and review documentation supporting compliance with the requirement to request reimbursement for eligible equipment and services provided to students or staff who would otherwise lack broadband services and/or devices sufficient to engage in remote learning. Documentation may include asset inventories referenced in section F. above for Equipment Management, as well as ECF Program forms to review and compare application and invoicing forms and documentation.
- b. Request a sample of the library patron statements collected by the libraries to test the requirement that patrons would have otherwise lacked access to equipment or services sufficient to meet their educational needs, if not for the use of the equipment and/or service being provided by the library. Request and review library patron documentation supporting the certification statements and any other documentation to show compliance with ECF Program rules.
- c. Test a sample of asset and service inventories and other documentation from schools and libraries that support compliance with the per-location and per-user limitations.

NATIONAL ENDOWMENT FOR THE HUMANITIES

ASSISTANCE LISTING 45.129 PROMOTION OF THE HUMANITIES – FEDERAL/STATE PARTNERSHIP

I. PROGRAM OBJECTIVES

The Federal/State Partnership program provides funding through general operating support grants to humanities councils in the United States and its jurisdictions. The 56 state and jurisdictional humanities councils tailor their grantmaking and programs to the needs, resources, and interests of their state or jurisdiction, while also extending the reach of National Endowment for the Humanities (NEH)-funded projects and further strengthening NEH’s connection to local communities throughout the U.S. and its jurisdictions.

II. PROGRAM PROCEDURES

The NEH awards general operating support (GOS) grants to each of the 56 state and jurisdictional humanities councils upon submission and approval of the *Annual Plan* and the *Activities and Outcomes Report*. Generally, each grant has a five-year period of performance, with annual awards in the first three years. Each of the first three years constitutes a funding period. Closeout activities occur in years four and five. The state and jurisdictional humanities councils are expected to obligate most of the funds awarded each year by the end of the funding period.

The GOS grants provide support for the following functional activities: Program Services (e.g., council-conducted projects and public meetings), Fundraising, Subawards, and General Management. Each state and jurisdictional humanities council is required to submit Section B of the *SF-424A: Budget Information – Non-Construction Programs* and a budget justification with their annual GOS application, wherein the Council must list costs projected to be incurred during the respective funding period. The state and jurisdictional humanities councils may subaward funds, referred to as “regrants” in this program, through a competition to local nonprofit organizations, institutions, groups, and individuals.

Source of Governing Requirements

The authorizing statute for this program is 20 USC 956(f).

Availability of Other Program Information

NEH maintains a website (<http://www.neh.gov>) that provides general information about NEH programs. Five publications titled a) “[General Terms and Conditions for General Support Grants to State Humanities Councils | The National Endowment for the Humanities \(neh.gov\)](#),” b) “[Addendum to: General Terms and Conditions for Awards and General Terms and Conditions for General Support Grants for State Humanities Councils | The National Endowment for the Humanities \(neh.gov\)](#),” c) “[Matching Guidelines for General Support Grants to State Humanities Councils | The National Endowment for the Humanities \(neh.gov\)](#),” d) “[General Terms and Conditions for American Rescue Plan State Humanities Councils Awards | The National](#)

[Endowment for the Humanities \(neh.gov\)](#)”, and e) [General Management Costs for State Humanities Councils | The National Endowment for the Humanities \(neh.gov\)](#) are specifically applicable to this program.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	N	Y	N	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Funds may be used to initiate and support programs and research which have substantial scholarly and cultural significance; to ensure that the benefit of programs will also be available to citizens where such programs would otherwise be unavailable due to geographic or economic reasons; and to foster education in and public understanding and appreciation of the humanities (20 USC 956(c)(4), 956(c)(9), and 956(c)(10)). Funds may not be used to support projects that fall outside of the humanities and the humanistic social sciences (as defined in 20 USC 952(a)) (including the creation or performance of art; creative writing, autobiographies, memoirs and creative nonfiction; and quantitative social science research or policy studies as defined 20 USC 952(b)).

- b. The state and jurisdictional humanities councils may subaward funds to organizations (including institutions of higher education and units of state and local governments), groups, or persons that form an association to carry out a project, not-for-profit groups (do not have to be incorporated), or individuals to support programs and research which have substantial scholarly and cultural significance. Subawards may not be made to for-profit organizations (20 USC 956(c)(2), 956(h)(1), and 956(l)).

G. Matching, Level of Effort, Earmarking

1. Matching

Under this program, state and jurisdictional humanities councils are awarded two types of funding: Outright Funds and Federal Matching Funds. The amount of each type of funding is identified in the grant award documents.

a. Outright Funds

State and jurisdictional humanities councils must cost share Outright Funds on a dollar-for-dollar basis. By law, the NEH cannot support more than 50 percent of the costs of a state or jurisdictional humanities council's activity. Expenditures of Outright Funds must be matched by cash contributions to the state or jurisdictional humanities council from any source (including funds from other Federal agencies), program income earned, unreimbursed allowable costs that a subrecipient (regrantee) incurs in carrying out a council-funded project, and the value of in-kind contributions made by third parties. In-kind contributions may be in the form of charges for real property and equipment or the value of goods and services directly benefiting and specifically identifiable to an activity of the state or jurisdictional humanities council (20 USC 956(f)(1)).

For those jurisdictional councils covered by the Economic Development of the Territories Act (the US Virgin Islands, Guam, American Samoa, and the Commonwealth of Northern Mariana Islands), the cost-sharing requirement do not apply to the first \$200,000 in Outright Funds awarded each funding period. The remainder of the annual outright funding awarded requires dollar-for-dollar cost sharing (48 USC 1469a(d)).

b. Federal Matching Funds

When Federal Matching Funds are offered, each state and jurisdictional humanities council must certify that it or one of its subrecipients (regrantees) have raised the required amount of eligible third-party cash gifts to support grant activities, if it intends to accept matching funds. The state or jurisdictional council is responsible for determining whether funds received from third-parties qualify as gifts eligible for Federal match. A gift is defined as the voluntary transfer of money (or a noncash contribution that is subsequently converted to cash) from a nonfederal

third-party to the state or jurisdictional humanities council or its subrecipient (regrantee) without compensation or consideration of return. Further gift eligibility guidance can be found on the NEH website, “[Matching Guidelines for General Support Grants to State Humanities Councils | The National Endowment for the Humanities \(neh.gov\)](#)”. State and jurisdictional humanities councils are not required to accept Federal Matching Fund offers.

The NEH awards Federal Matching Funds to a state or jurisdictional humanities council upon receipt and acceptance of the certification that the entity and/or its subrecipients (regrantees) have raised the required amount of eligible third-party cash gifts. The state or jurisdictional council must submit a *Certification of Gifts/Pledges* to NEH annually by September 15. Before certifying a gift that has been raised and retained by a subrecipient (regrantee), the state or jurisdictional humanities council must determine from documentation provided by the subrecipient (regrantee) that the gift meets the eligibility criteria stipulated in NEH matching guidelines, and that the gift has been transferred by the donor to the subrecipient (regrantee). (20 USC 960(a)(2)(B)).

2. Level of Effort

Not Applicable

3. Earmarking

Federal funds allocated for subawards must be expended according to the NEH approved SF-424A budget justification for the funding period and any amendments as approved by NEH. Transfers can be made from other expenditure activities to subawards, but written permission from the NEH is required to transfer funds from the “subaward” category.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Certification of Gifts/Pledges (OMB No. 3136-0134) – This form is used to describe and certify the eligibility of third-party gifts for the release of Federal Matching Funds. The state or jurisdictional humanities council must maintain documentation that substantiates the amounts, sources, eligibility, and expenditure of the gifts certified.

Key Line Item –

1. *Total Amount Given-* This is a key line item because it represents the total amount of gifts raised by the state or jurisdictional state humanities council and/or its subrecipients (regrantees) that meet the criteria to be matched dollar-for-dollar with Federal Matching Funds, as determined by the state or jurisdictional state humanities council.

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

SMALL BUSINESS ADMINISTRATION

ASSISTANCE LISTING 59.075 SHUTTERED VENUE OPERATORS GRANT

IMPORTANT NOTE: This program funding was provided to both non-federal entities (e.g., states, local governments, or nonprofit organizations) and for-profit entities. The guidance in this section is only applicable for audits of non-federal entities. The Small Business Administration has developed separate audit requirements and guidance for audits of for-profit entities with SVOG awards which is available at <https://www.sba.gov/document/support-svog-audit-attestation-profit-recipients>.

I. PROGRAM OBJECTIVES

The Shuttered Venue Operators Grant (SVOG) program provides grant awards of up to \$10 million to support the ongoing operations of eligible live venue operators or promoters, theatrical producers, live performing arts organization operators, nonprofit museum operators, motion picture theater operators (including owners), and talent representatives who have experienced significant revenue losses because of the COVID-19 pandemic.

The SVOG program was created in Section 324 of the Economic Aid to Hard-Hit Small Businesses, Nonprofits and Venues Act (part of HR 133 Consolidated Appropriations Act, 2021) signed into law on December 27, 2020, including \$15 billion in grants to operators of eligible shuttered venues. On March 11, 2021, the American Rescue Plan Act of 2021 (Pub. L. No. 117-2, title V, sec. 5005) was enacted; it provided an additional \$1,249,500,000 in grants for eligible entities. Of this total grant funding, at least \$2 billion was reserved for applicants with up to 50 full-time employees.

II. PROGRAM PROCEDURES

A. The SVOG program provides awards to the following eligible applicant types:

1. Live performing arts organization operator
2. Live venue operator or promoter
3. Motion picture theater operator (including owners)
4. Nonprofit museum operators
5. Talent representative
6. Theatrical producer

During the application process, entities were required to select one applicant type when applying in order to account for applicant-type specific criteria. However, all applicants were expected to clearly present the financial and operational impact of the COVID-19 pandemic to confirm their eligibility for an award and establish their funding need. The maximum award amount (cumulative across all award decision types) is \$10 million. For affiliates, the maximum award is \$10 million per entity (no more than five entities per

affiliate group for a cumulative total of \$50 million). Museum operator affiliate groups are unique in that in that there is a \$10 million cumulative award cap across all affiliated entities.

B. The SVOG program implemented four award decisioning processes, each with a separate notification. Through SVOG, a single entity could have received up to four different SBA Form 1222s or Notice of Award (NOA) documents. Each NOA issued supersedes any previous NOAs and serves as the principal award document. The NOA documents have version numbers 1–4 corresponding to the award decision made. The four award decision processes (in sequential order) include:

1. *Initial Award* – Award decision made based on initial application package (NOA Document #1). Recipients receiving an initial award were given a 12-month grant term (Budget Period - NOA Box 5) to spend award funds. Any applicant that was denied an initial award was given the opportunity to appeal their eligibility. If the decline decision was overturned, then the entity was given an initial award (NOA Document Version #1).
2. *Reconsideration* – Recipients meeting specific criteria were given the opportunity to request a second review of their initial award amount. If SBA adjusted the award amount, then the SBA issued a new NOA (NOA Document #2). If a grantee received a reconsideration award, the grant term remained 12 months.
3. *Supplemental* – Recipients meeting specific criteria were eligible to receive supplemental funding support awards. Recipients receiving a supplemental award were given an 18-month grant term commencing from the date of initial award issuance and received an updated NOA (NOA Document Version #3). SBA is allowing grantees that receive a supplemental award to spend all funds, both initial and supplemental phase awards, across the 18-month grant term. SBA also issued zero-dollar supplemental awards to permit qualifying entities to extend their grant term by six months. In addition to the 18-month grant term, the issuance of a supplemental grant award also provides grantees with a six-month expenditure period extension, specifically extending the end date to incur eligible expenses from December 31, 2021 to June 30, 2022.
4. *Reconsideration 2.0* – SBA opened a final award decision invitation to all grantees to request a final review of their funding need and eligibility for additional award funds. If a reconsideration 2.0 award is issued a new NOA is created (NOA Document Version #4).

The SVOG initially commenced with a multiple disbursement process, but quickly changed to a single disbursement of funds. Therefore, entities receiving funding from multiple award decisions were issued a single disbursement of funds in line with each award decision.

Some entities who received SVOG awards may have also received Paycheck Protection Program (PPP) loans. The American Rescue Plan Act of 2021 modified and amended the PPP program. Prior to the amendments of the American Rescue Plan Act of 2021, entities that received SVOG awards were ineligible to apply and receive PPP loans. After the

amendments of the American Rescue Plan Act of 2021, the SVOG program deducted all PPP loans issued a loan number on or after December 27, 2020, regardless of repayment or non-use of those PPP funds. See the October 20, 2021, SVOG FAQ, #102 for more information.

Source of Governing Requirements

The SVOG program was created by Economic Aid to Hard-Hit Small Businesses, Nonprofits and Venues Act (part of HR 133 Consolidated Appropriations Act, 2021) signed into law on December 27, 2020. This Act provided the initial funding and program eligibility qualifications utilized to establish the award decisioning process and build program parameters. On March 11, 2021, the American Rescue Plan Act of 2021 (Pub. L. No. 117-2, title V, sec. 5005) provided additional program funding and clarifications on program design and implementation. All grantees receiving awards from the SVOG program are expected to utilize funding consistent with the terms and conditions of the program and 2 CFR Part 200.

If there are specific questions regarding the SVOG program, e-mail SVOGrant@sba.gov.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have

been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Y	Y	N	N	N	N	Y	N	N	N	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

See Pub. L. No. 116-260 Title III, Sec. 324 (d)(2)(B)(i-viii), SVOG FAQs, and Post-Award FAQs.

Grantees are generally encouraged to use funds to reimburse or pay for ordinary and necessary business expenses to reopen or keep open a business that was shuttered during the COVID-19 pandemic (specific allowable uses listed below). As previously described, grantees affirm allowable use by submitting budgets to SBA showing distribution of award funds across the eight allowable budget categories. After the SBA completes the four award decisions outlined above, all grantees are required to submit a finalized budget to SBA through the SVOG Portal, which will outline the intended use of funds for the award and establish the budget basis for monitoring and closeout review. The request for a finalized budget response was issued to grantees on a rolling basis beginning in February 2022.

SVOG award funds may be used for any of the following:

- a. Payroll costs;
- b. Payments on any covered rent obligation;

- c. Any covered utility payment;
- d. Scheduled payments of interest or principal on any covered mortgage obligation (which shall not include any prepayment of principal on a covered mortgage obligation);
- e. Scheduled payments of interest or principal on any indebtedness or debt instrument (which shall not include any prepayment of principal) incurred in the ordinary course of business that is a liability of the eligible person or entity and was incurred prior to February 15, 2020;
- f. Covered worker protection expenditures;
- g. Payments made to independent contractors, as reported on Form-1099 MISC, not to exceed a total of \$100,000 in annual compensation for any individual employee of an independent contractor; and
- h. Other ordinary and necessary business expenses, including—
 - (1) Maintenance expenses,
 - (2) Administrative costs, including fees and licensing costs,
 - (3) State and local taxes and fees,
 - (4) Operating leases in effect as of February 15, 2020,
 - (5) Payments required for insurance on any insurance policy, and
 - (6) Advertising, production transportation, and capital expenditures related to producing a theatrical or live performing arts production, concert, exhibition, or comedy show, except that grant funds may not be used primarily for such expenditures.

Entities that received SVOG awards may have also received funding from other Federal sources, for example, PPP loans, the Economic Injury Disaster Loan (EIDL), or the Employee Retention Credit (ERC). SVOG awards should only reimburse costs that have not already been reimbursed (or received a credit) by other funding sources. **Additional clarification on allowable use of funds and allocability with other federal sources are provided in the SVOG FAQs at <https://www.sba.gov/document/support-faq-regarding-shuttered-venue-operators-grant-svog> and the Post-Award FAQs at <https://www.sba.gov/document/support-svog-post-award-frequently-asked-questions>.**

As noted above, the SVOG program establishes several cost items as allowable up to a spending cap. Two allowable cost examples with caps include:

- (1) To pay independent contractors, as reported on Form-1099 MISC, not to exceed a total of \$100,000 in annual compensation for any individual employee of an independent contractor; and
- (2) To pay advertising, production transportation, and capital expenditures related to producing a theatrical or live performing arts production, concert, exhibition, or comedy show, except that grant funds may not be used primarily for such expenditures.

2. *Activities Unallowed*

See Pub. L. No. 116-260, Title III, sec. 324 (d)(3)(A-E), **SVOG FAQs, and Post-Award FAQs**

SVOG award funds may not be used for any of the following:

- a. To purchase real estate;
- b. For payments of interest or principal on loans originating after February 15, 2020;
- c. To invest or re-lend funds;
- d. For contributions or expenditures to, or on behalf of, any political party, party committee, or candidate for elective office;
- e. For pre-payment of principal on any mortgage obligation, indebtedness, or debt instrument origination on or before February 15, 2020; or
- f. To purchase or pay loans for items of prurient sexual nature.

B. Allowable Costs/Cost Principles

SVOG was structured as a grant program and therefore all recipients must implement their awards and spend funds consistent with the *Code of Federal Regulations*, Title 2, Subtitle A, Chapter II, Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. However, when the program statute allows the use of SVOG award funds for a specific use beyond the scope of uses outlined in the Uniform Guidance, that use is allowed. Please refer to the SVOG Post-Award FAQs for examples.

The purchase of alcohol is generally prohibited with 2 CFR section 200.423. However, the SVOG program provides for federal award funds to be utilized for the purchase of alcohol in certain circumstances as outlined in the SVOG FAQs, No. 173. When considering the allowability of alcohol purchases with SVOG award funds, please review

and adhere to the guidance on assessing “an ordinary and necessary business” expense as described in the FAQs and defined by the IRS in Publication No. 535.

The authorizing statute permits reimbursement of eligible and allowable costs dating back to March 1, 2020, which for some entities could be a period of one year or more prior to issuance of an initial SVOG award. Box 1 of the SVOG NOA document recognizes the authorizing statute and the authorizing statute serves as SBA’s basis for approving pre-award costs consistent with 2 CFR section 200.458. Please refer to FAQ No. 33 for additional information.

Grantees will submit a finalized budget to SBA in the first few months of 2022, which will establish the basis for monitoring and closeout. At closeout, grantees will provide a reconciliation of expenses by allowable budget category in response to the expense report action item. Grantees should maintain justification for any changes from the final budget to the expense report and maintain clear records of the costs charged to the SVOG award substantiating eligibility and allowability.

H. Period of Performance

Recipients that receive an initial SVOG award will be able to spend award funds over a 12-month period (defined in NOA Box 5 as the *Budget Period*) after the award issuance date (defined in the most recent NOA Box 4 as the *Project Period*) for eligible and allowable costs incurred between March 1, 2020, and December 31, 2021. Recipients that receive a supplemental award will be able to spend all award funds (both initial and supplemental phase awards) received over an 18-month period (defined in most recent NOA Box 5 as the *Budget Period*) after the initial phase award issuance date (defined in the most recent NOA Box 4 as the *Project Period*) for eligible and allowable costs incurred between March 1, 2020, and June 30, 2022 (*Eligible Cost Period*).

Reconsideration awards made through the SVOG program do not impact the award expenditure or spend down dates, these dates are only determined by the issuance of an initial or supplemental award.

ENVIRONMENTAL PROTECTION AGENCY

ASSISTANCE LISTING 66.458 CAPITALIZATION GRANTS FOR CLEAN WATER STATE REVOLVING FUNDS

ASSISTANCE LISTING 66.482 DISASTER RELIEF APPROPRIATIONS ACT (DRAA) HURRICANE SANDY CAPITALIZATION GRANTS FOR CLEAN WATER STATE REVOLVING FUNDS

I. PROGRAM OBJECTIVES

Capitalization grants are awarded to states to create and maintain Clean Water State Revolving Funds (CWSRFs) to (1) enable states to encourage construction of wastewater treatment facilities to meet the enforceable requirements of the Clean Water Act (Act); (2) increase the emphasis on nonpoint source pollution control and protection of estuaries; and (3) establish permanent financing institutions in each state to provide continuing sources of financing to maintain water quality.

II. PROGRAM PROCEDURES

The CWSRF program is established in each state by capitalization grants from the Environmental Protection Agency (EPA). The CWSRF provides loans and other types of financial assistance to qualified communities and local agencies. The CWSRF is a permanent revolving fund to provide loans and other assistance. Since the enabling legislation was enacted in 1987, capitalization grants have been available to states in most years. EPA implements the CWSRF in a manner that preserves a high degree of flexibility for states in operating their revolving funds in accordance with each state's unique needs and circumstances.

States are required to provide an amount equal to 20 percent of the capitalization grant as state matching funds to receive a grant. Capitalization grant applications must include (1) an Intended Use Plan (IUP), which lists proposed projects eligible for financing from CWSRF loans; (2) an identification of the source of the matching amount; (3) a proposed payment schedule; and (4) certain certifications and demonstrations. States may transfer an amount up to 33 percent of its Drinking Water State Revolving Fund (DWSRF) (Assistance Listing 66.468) capitalization grant to the CWSRF or an equivalent amount from the CWSRF to the DWSRF program.

The Disaster Relief Appropriations Act (Pub. L. No. 113-2) provided funds for awards to the states of New York and New Jersey for wastewater facilities impacted by Hurricane Sandy. EPA awarded these funds under Assistance Listing 66.482. Those funds are subject to all the compliance requirements that apply to Assistance Listing 66.458 except as indicated in III, "Compliance Requirements," of this program supplement.

On June 6, 2019, the "Additional Supplemental Appropriations for Disaster Relief Act, 2019," or ASADRA (Pub. L. No. 116-20), was signed into law. The law provided funds to Alabama, Alaska, California, Georgia, Florida, North Carolina, and South Carolina CWSRF programs for drinking water facilities impacted by Hurricanes Florence and Michael, Typhoon Yutu, and calendar year 2018 wildfires and earthquakes.

Source of Governing Requirements

The CWSRF program is authorized under Title VI of the Clean Water Act (33 USC 1381 et seq.) (Act), the Disaster Relief Appropriations Act (Pub. L. No. 113-2), and the “Additional Supplemental Appropriations for Disaster Relief Act, 2019”, or ASADRA (Pub. L. No. 116-20). The implementing regulations are found in 40 CFR Part 35, Subpart K.

Availability of Other Program Information

General information about the program is available on the EPA Clean Water State Revolving Fund home page (<https://www.epa.gov/cwsrf>).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	Y	N	N	N	N

A. Activities Allowed or Unallowed

1. Financial Assistance

- a. The CWSRF may provide financial assistance (1) to municipalities, inter-municipal, interstate, or state agencies for the construction of publicly owned treatment works, as defined in section 212 of the Act that are on the state’s project priority list; (2) for implementing nonpoint source

management programs under section 319 of the Act; (3) for developing and implementing estuary management plans under section 320 of the Act (33 USC 1383(c)); (4) for the construction, repair or replacement of decentralized wastewater treatment systems that treat municipal wastewater or domestic sewage; (5) for measures to manage, reduce, treat, or recapture stormwater or subsurface drainage water; (6) to any municipality, or intermunicipal, interstate, or state agency for measures to reduce the demand for publicly owned treatment works capacity through water conservation, efficiency, or reuse; (7) for the development and implementation of watershed projects meeting the criteria set forth in section 122 of the Act; (8) to any municipality, or intermunicipal, interstate, or state agency for measures to reduce the energy consumption needs for publicly owned treatment works; (9) for reusing or recycling wastewater, stormwater, or subsurface drainage water; (10) for measures to increase the security of publicly owned treatment works; (11) to any qualified nonprofit entity, as determined by the EPA Administrator, to provide assistance to owners and operators of small and medium publicly owned treatment works to plan, develop, and obtain financing for eligible projects under this subsection, including planning, design, and associated preconstruction activities; and, to assist such treatment works in achieving compliance with the Act; and (12) to any qualified nonprofit entity, as determined by the Administrator, to provide assistance to an eligible individual (as defined in subsection (j)).

- (1) For the repair or replacement of existing individual household decentralized wastewater treatment systems; or
- (2) In a case in which an eligible individual resides in a household that could be cost-effectively connected to an available publicly owned treatment works, for the connection of the applicable household to such treatment works.

b. The allowable types of financial assistance under Assistance Listing 66.458 (33 USC 1383(d)) are:

- (1) Making loans for eligible projects;
- (2) Buying or refinancing of debt obligations of municipal, intermunicipal, and interstate agencies incurred after March 7, 1985;
- (3) Guaranteeing or purchasing insurance for local debt obligations;
- (4) Using as a source of revenue or security for CWSRF debt obligations (providing that the net proceeds of the sale of such bonds are deposited in the CWSRF);

- (5) Guaranteeing loan guarantees for similar revolving funds established by municipalities or intermunicipal agencies;
 - (6) To earn interest on fund accounts; and
 - (7) For the reasonable costs of administering the fund and conducting activities under this subchapter, except that such amounts shall not exceed 4 percent of all grant awards to such fund under this subchapter, \$400,000 per year, or one-fifth percent per year of the current valuation of the fund, whichever amount is greatest, plus the amount of any fees collected by the state for such purpose regardless of the source.
- c. Funds awarded under Assistance Listing 66.482 may be used only for projects to reduce flood damage risk and vulnerability or to enhance resiliency to rapid hydrologic change or a natural disaster (Pub. L. No. 113-2, Division A, Title X, 127 Stat. 31).
2. *CWSRF funds may be used by states for the reasonable costs of administering and managing the CWSRF (33 USC 1383(d)(7)).*

See III.G.3.a, “Matching, Level of Effort, Earmarking – Earmarking.”

3. *CWSRF funds may be used by states to provide additional subsidization in the form of principal forgiveness, grants, and negative interest loans to municipal, intermunicipal, interstate, or state agencies receiving CWSRF assistance.*

Additional subsidy may be provided to (a) implement a process, material, technique, or technology to address water or energy-efficiency goals; (b) mitigate stormwater runoff; (c) encourage sustainable project planning, design, and construction; or (d) a municipality that meets the state’s affordability criteria or seeks additional subsidization to benefit individual ratepayers in the residential user rate class who would otherwise experience significant financial hardship (33 USC 1383(i)(1)). See III.G.3.b, “Matching, Level of Effort, Earmarking – Earmarking.”

B. Allowable Cost/Cost Principals

The cost principles of 2 CFR 200 Subpart E are applicable (as appropriate) to this award. If the state does not have a previously established indirect cost rate, the state will prepare and submit its indirect cost rate proposal in accordance with 2 CFR 200 Appendix VII. For CWSRF programmatic eligibilities, state CWSRF programs are required to follow 33 USC 1383(c) for assistance eligibilities.

C. Cash Management

The state may draw cash from EPA through the Automated Standard Application for Payments (ASAP) system for:

1. *Loans* – when the CWSRF receives a request from a loan recipient, based on incurred costs, including pre-building and building costs.
2. *Refinance or Purchase of Municipal Debt* – generally, when at a rate no greater than equal amounts over the maximum number of quarters that payments can be made, and up to the amount committed to the refinancing or purchase of the local debt.
3. *Purchase of Insurance* – when insurance premiums are due.
4. *Guarantees and Security for Bonds* – immediately, in the event of imminent default in debt service payments on the guaranteed/secured debt; otherwise, up to an amount dedicated for the guarantee or security based on incurred construction costs.
5. *Administrative Expenses* – cash can be drawn based on a schedule that coincides with the rate at which administrative expenses will be incurred (40 CFR section 35.3160).

G. Matching, Level of Effort, Earmarking

1. Matching

States are required to deposit into the CWSRF from state monies, an amount equal to 20 percent of each grant payment. If the state provides a match more than the required amount, the excess balance may be banked toward subsequent match requirements. States generally report the total amount of their matching for a capitalization grant in an annual CWSRF report to EPA. The match is required to be made on or before the time that EPA funds are drawn (40 CFR section 35.3135(b)).

2. Level of Effort

Not Applicable

3. Earmarking

- a. The maximum amount allowable for administering and managing the CWSRF is an amount equal to 4 percent of the cumulative amount of capitalization grant awards received (less any amounts used in previous years to cover administrative expenses), \$400,000, or one-fifth percent of the current valuation of the fund, whichever is the greatest. The valuation

of the fund is defined as the Total Net Position in the most recent year’s audited financial statements for the state CWSRF program. When the administrative expense of the CWSRF exceeds the largest of these amounts, the excess must be paid from sources outside the CWSRF (40 CFR section 35.3120(g)).

- b. The Disaster Relief Appropriations Act (Pub. L. No. 113-2, Division A, Title X, 127 Stat. 31) and ASADRA (Pub. L. No. 116-20), includes a requirement to provide subsidies in the amount shown in the table below.

The FY 2019, FY 2020, and FY 2021 appropriations (Pub. L. No. 116-6 and Pub. L. No. 116-94) require 10 percent of the capitalization grant be used for additional subsidy. This additional subsidy can go to any CWSRF borrower; however, only when such funds are provided as initial financing for an eligible recipient or to buy, refinance, or restructure the debt obligations of eligible recipients that were incurred after the date of enactment of the appropriation.

The Clean Water Act also allows additional subsidy if the amount appropriated for capitalization grants to all states in a fiscal year exceeds \$1,000,000,000. The additional subsidy allowed is based on the percentage over \$1,000,000,000 that is appropriated. For FY19, FY20, and FY21 a state may provide up to 30 percent for additional subsidy. This optional amount is in addition to the 10 percent required by the annual appropriation acts. In future years, if the appropriated amount is less than 30 percent of \$1,000,000,000, that percentage would be substituted for the 30 percent. This subsidy can be provided in the form of grants, principal forgiveness, or negative interest as specified in III.A.3, “Activities Allowed or Unallowed.”

Disaster Relief Funds and ASADRA	FY 2019 Funds	FY 2020 Funds	FY 2021 Funds
Not less than 20 percent and not more than 30 percent of the capitalization amount.	Not less than 10 percent and not more than 40 percent of the capitalization grant amount for recipients.	Not less than 10 percent and not more than 40 percent of the capitalization grant amount for eligible recipients. Additionally, the Water Infrastructure Fund Transfer Act (WIFTA) amendment allows states to transfer up to 5 percent of their total allotment of CWSRF capitalization grants	Not less than 10 percent and not more than 40 percent of the capitalization grant amount for eligible recipients.

Disaster Relief Funds and ASADRA	FY 2019 Funds	FY 2020 Funds	FY 2021 Funds
		as of 10/4/2020, to the DWSRF for threats to public health as a result of heightened exposure to lead. These funds are to be provided as subsidy in the form of principal forgiveness, grants, or negative interest). For the ASADRA funds, states are required to use not less than 20 percent, but not more than 30 percent as subsidy in the form of principal forgiveness, grants, or negative interest.	

- c. To the extent that there are sufficient eligible project applications, no less than 10 percent of appropriated funds shall be used for projects to address green infrastructure, water or energy efficiency improvements or other environmentally innovative activities (Pub. L. No. 116-6 and Pub. L. No. 116-94).

H. Period of Performance

- 1. Grant payments from a capitalization grant shall begin in the quarter in which the grant is awarded and end no later than eight quarters after the grant is awarded, not to exceed 12 quarters from the date of allotment of grant funds to the states (40 CFR section 35.3155(c)).
- 2. Funds made available for disaster relief activities under Assistance Listing 66.482 are available until expended (Pub. L. No. 113-2, Division A, Title X, 127 Stat. 31).

IV. OTHER INFORMATION

The audit focus is on a state’s CWSRF program rather than individual capitalization grants awarded to states by EPA.

Subrecipients

CWSRF amounts are awarded by EPA to states as grants. The states then makes subawards in the form of loans to its subrecipients. Therefore, in determining the amount of federal funds

expended to be reported on the Schedule of Expenditures of Federal Awards (SEFA), subrecipients receiving CWSRF loans should include project expenditures incurred under these loans during the audit period as provided in 2 CFR section 200.502(a). These are subawards—not direct federal loans—and, therefore, neither 2 CFR sections 200.502(b) nor (d) apply when calculating the amount of federal funds expended.

It also is important to appropriately identify these CWSRF loans as subawards because of the impact on which federal agency is the cognizant or oversight agency. When completing the Form SF-SAC (also referred to as the Data Collection Form for Reporting on Audits of States, Local Governments and Non-profit Organizations, OMB Form 0348-0057), the subrecipient should indicate that a CWSRF loan received from the state is not a direct award by showing an “N” in Part III, Item 6(h).

Equivalency

Equivalency projects/loans are funded with an amount equal to the capitalization grant and reported in the OMB Federal Funding Accountability and Transparency Act (FFATA) Subaward Reporting System. These projects/loans are considered to be federal projects/loans. To achieve consistency in meeting program requirements and eliminate the possibility of over-reporting information under FFATA, equivalency projects/loans must meet all equivalency requirements: federal cross-cutters, single audit, architectural and engineering (A/E) procurement, disadvantage business enterprise (DBE), and signage.

While any of the sources of funds in the CWSRF may be used for equivalency projects/loans, it should be understood that these funds would be considered federal funds and that all disbursements for equivalency projects/loans must be entered into SEFA.

ENVIRONMENTAL PROTECTION AGENCY

ASSISTANCE LISTING 66.468 CAPITALIZATION GRANTS FOR DRINKING WATER STATE REVOLVING FUNDS

ASSISTANCE LISTING 66.483 DISASTER RELIEF APPROPRIATIONS ACT (DRAA) HURRICANE SANDY CAPITALIZATION GRANTS FOR DRINKING WATER STATE REVOLVING FUNDS

I. PROGRAM OBJECTIVES

Capitalization grants are awarded to states to create and maintain Drinking Water State Revolving Funds (DWSRF) programs. States can use capitalization grant funds to establish a revolving loan fund (DWSRF) to assist public water systems finance the costs of infrastructure needed to achieve or maintain compliance with Safe Drinking Water Act (SDWA) requirements and protect the public health objectives of the Act.

II. PROGRAM PROCEDURES

The DWSRF program is established in each state by capitalization grants from the Environmental Protection Agency (EPA) and state match equaling 20 percent of the EPA capitalization grants.

EPA implements the DWSRF program in a manner that preserves flexibility for states in operating their program in accordance with their unique needs and circumstances. States have the flexibility to set aside some of their capitalization grants for other related activities. States may also transfer an amount up to 33 percent of its DWSRF capitalization grant to the Clean Water State Revolving Fund (CWSRF) (Assistance Listing 66.458) or an equivalent amount from the CWSRF to the DWSRF program. A state may transfer capitalization grant dollars, state match, investment earnings, or principal and interest repayments.

Capitalization grant agreements include (1) an application; (2) an Intended Use Plan (IUP), which describes how the state intends to use funds made available to it, including a list of proposed projects eligible for financing and a description of the financial status of the program; (3) a proposed payment schedule; (4) certain certifications and demonstrations which can be included in an optional operating agreement; and (5) workplans containing a least a general description of the use of set-aside funds.

The state must annually provide an IUP which describes how the state will use available DWSRF program funds for the year to meet the objectives of the SDWA and further the goal of protecting public health. The IUP explains how all of the funds available to the DWSRF program (including bond proceeds, interest earnings, loan repayments, federal capitalization grants, state match, etc.) will be expended.

The Disaster Relief Appropriations Act (Pub. L. No. 113-2) provided funds for awards to the states of New York and New Jersey for drinking water facilities impacted by Hurricane Sandy. EPA awarded these funds under Assistance Listing 66.483. Those funds are subject to all of the

compliance requirements that apply to Assistance Listing 66.468 except as indicated in III, “Compliance Requirements,” in this program supplement.

On June 6, 2019, Pub. L. No. 116-20, the “Additional Supplemental Appropriations for Disaster Relief Act, 2019,” or ASADRA, was signed into law. The law provided funds to Alabama, Alaska, California, Georgia, Florida, North Carolina, and South Carolina DWSRF programs for drinking water facilities impacted by Hurricanes Florence and Michael, Typhoon Yutu, and calendar year 2018 wildfires and earthquakes.

Source of Governing Requirements

This program is authorized under Section 1452 of the Public Health Service Act (Title XIV), commonly known as the SDWA (42 USC 300j-12) and the Disaster Relief Appropriations Act, 2013 (Pub. L. No. 113-2). The implementing regulations for the program can be found at 40 CFR Part 35, Subpart L.

Availability of Other Program Information

Other general information about the program is available on the EPA Drinking Water State Revolving Fund home page (<https://www.epa.gov/dwsrf>).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	Y	N	N	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

a. A state DWSRF program may provide the following financial assistance to publicly or privately owned community water systems and nonprofit non-community water systems for eligible drinking water infrastructure projects (40 CFR sections 35.3520 and 35.3525):

- (1) Making loans for eligible projects (40 CFR section 35.3520(b).
- (2) Purchasing or refinancing existing debt obligations of municipal, intermunicipal and interstate agencies entered into on or after July 1, 1993. Purchase of local debt would have the expectation that the seller would repay the debt at the agreed upon terms.
- (3) Guarantee of or purchasing insurance for local debt obligations.
- (4) Providing a source of revenue or security for DWSRF debt obligations, provided that the net proceeds of the sale of such debt obligations are deposited in the DWSRF.
- (5) Funds awarded (all manner of assistance, both a loan or grant to a local entity) under Assistance Listing 66.483 may be used only for projects to reduce flood damage risk and vulnerability or to enhance resiliency to rapid hydrologic change or a natural disaster (Pub. L. No. 113-2, Division A, Title X, 127 Stat. 31).

b. A state may set aside DWSRF funds for the following designated activities (40 CFR section 35.3535):

- (1) Administrative expenses (including technical assistance).
- (2) Technical assistance to small water systems that regularly serve 10,000 or fewer persons (40 CFR section 35.3505).

- (3) State program management.
- (4) Local assistance and other state programs.

2. *Activities Unallowed*

As per 40 CFR 35.3520(d) through (f), a state DWSRF program may not provide assistance for:

- a. Dams or reservoirs, water rights, laboratory fees for monitoring, system operation and maintenance, or projects that are primarily fire protection. Water rights are listed as ineligible in DWSRF regulations, but a class deviation for water rights was signed in November of 2019. “Deviation from 40 CFR section 35.3520(e)(2)” [DWSRF Class Deviation for Water Rights--Dec 2019 \(epa.gov\)](#). This allows the use of DWSRF funds for Water rights if it addresses a public health objective of the Safe Drinking Water Act. EPA has the authority to allow deviations from EPA regulations that are not disallowed by law. In this case the Safe Drinking Water Act.
- b. Expansion projects pursued solely in anticipation of future growth.

B. Allowable Cost/Cost Principals

The cost principles of 2 CFR 200 Subpart E are applicable as appropriate, to this award. If the state does not have a previously established indirect cost rate, the state will prepare and submit its indirect cost rate proposal in accordance with 2 CFR 200 Appendix VII.

For DWSRF programmatic eligibilities, state DWSRF programs are required to follow 40 CFR 35.3520 for assistance eligibilities from the loan fund and 40 CFR 35.3535 for DWSRF set-aside eligibilities.

C. Cash Management

The state may draw cash through the Automated Standard Application for Payments (ASAP) system for (40 CFR sections 35.3560 and 35.3565):

1. *Loans* – when the DWSRF receives a request from a loan recipient, based on incurred costs, including pre-building and building costs.
2. *Refinance or Purchase of Municipal Debt* – generally, at a rate not greater than equal amounts over the maximum number of quarters that payments can be made, and up to the amount committed to the refinancing or purchase of the local debt. A state may immediately draw cash for up to the greater of \$2 million or 5 percent of each fiscal year’s capitalization grant to refinance costs.

3. *Purchase of Insurance* – when insurance premiums are due.
4. *Guarantees and Security for Bonds* – immediately, in the event of imminent default in debt service payments on the guaranteed/secured debt; otherwise, up to the amount dedicated for the guarantee or security based on actual construction cost.
5. *Set-Asides* – generally, on an incurred cost basis after workplans have been approved by EPA (40 CFR section 35.3560(e)).

G. Matching, Level of Effort, Earmarking

1. Matching

- a. States are required to deposit into the DWSRF from state monies an amount equal to 20 percent of each grant payment. The match is required to be made on or before the time that EPA funds are drawn. When a letter of credit (LOC) mechanism or similar financial arrangement is used for the state match, payments to the LOC account must be made proportionally on the same schedule as payments for the capitalization grant. Monies from this state match LOC must be drawn into the DWSRF as monies are drawn on the federal automated clearinghouse account. A state may issue general obligation or revenue bonds to derive the state match. If the state provides a match in excess of the required amount, the excess balance may be banked toward subsequent match requirements (40 CFR section 35.3550(g)).

2. Level of Effort

Not Applicable

3. Earmarking

- a. The allotment can be earmarked for set-aside activities as follows:
 - (1) *Administrative Expenses* – Not to exceed the higher of 4 percent of the allotment, \$400,000, or one-fifth of a percent of the fund's annual net position.
 - (2) *Technical Assistance to Small Systems* – Not to exceed 2 percent of the cumulative allotment (40 CFR section 35.3535(c)).
 - (3) *State Program Management* – Not to exceed 10 percent of the cumulative allotment (40 CFR section 35.3535(d)). The cumulative allotment amount will be in state records as their total grants awarded. EPA will have a record of this as well.

- (4) *Local Assistance and Other State Programs* – Not to exceed 15 percent of the capitalization grant and no more than 10 percent of the grant is used on any one of the defined activities (40 CFR section 35.3535(e)).
- b. For 2018 and previous grants, state cannot use more than 30 percent of any particular fiscal year’s capitalization grant to provide subsidies in the form of principal forgiveness or negative interest rate loans to communities meeting the state’s definition of disadvantaged, or communities the state expects to become disadvantaged as a result of the project (40 CFR section 35.3525(b)). Starting with the 2019 grants, states are required to use between 6 percent and 35 percent of their grant for disadvantaged assistance subsidy, as per the amendments from the American Water Infrastructure Act of 2018.
- c. EPA’s DWSRF appropriations include the following requirements:
 - (1) The Disaster Relief Appropriations Act (Pub. L. No. 113-2, Division A, Title X, 127 Stat. 31), FY 2019 appropriation and the FY 2020 appropriation each have requirements to provide subsidy in amounts found in the table below. This subsidy can be provided in the form of grants, principal forgiveness, or negative interest.

Disaster Relief Funds	FY 2019 Funds	FY 2020 and FY 2021 Funds
Not less than 20 percent and not more than 30 percent of the capitalization amount.	“20 percent of the capitalization grant amount mandatory additional subsidy, available to all DWSRF-eligible recipients, and an additional 6-35 percent additional subsidy available only to state-defined disadvantaged communities.”	“14 percent of the capitalization grant amount mandatory additional subsidy, available to all DWSRF-eligible recipients, and an additional 6-35 percent additional subsidy available only to state-defined disadvantaged communities. Additionally, the Water Infrastructure Fund Transfer Act (WIFTA) allows states, until 10/5/2020, to transfer up to 5 percent of their cumulative allotment of CWSRF capitalization grants to the DWSRF for threats to public health as a result of heightened exposure to lead. These funds are to be provided as subsidy in the form of principal forgiveness, grants, or negative interest.” For the ASADRA funds, states are required to use

Disaster Relief Funds	FY 2019 Funds	FY 2020 and FY 2021 Funds
		between 20 percent and 30 percent as subsidy in the form of principal forgiveness, grants, or negative interest.

- (2) The decision to maintain a category of projects for green infrastructure, water and energy efficiency, and other environmentally innovative activities is at the state's discretion (Pub. L. No. 113-76, Pub. L. No. 113-235, and Pub. L. No. 114-113).

H. Period of Performance

- Grant payments from a capitalization grant, which increase the ceiling of funds from which a state may draw cash for eligible costs, shall begin no earlier than the quarter in which the grant is awarded, and generally end no later than eight quarters after the grant is awarded, not to exceed twelve quarters from the date of allotment of grant funds to the states. States must enter into binding commitments for an amount equal to each capitalization grant payment and accompanying state match that is deposited into the Fund within one year after the receipt of each grant payment. This does not apply to funds drawn for set-aside activities. States disburse, or liquidate, grant funds for projects in accordance with construction schedules. Funds are disbursed for set-aside activities in accordance with costs being incurred under approved workplans (40 CFR sections 35.3550(e) and 35.3560).
- Funds made available for disaster relief activities under Assistance Listing 66.483 are available until expended (Pub. L. No 113-2, Division A, Title X, 127 Stat. 31).

IV. OTHER INFORMATION

The audit focus is on a state's DWSRF program rather than individual capitalization grants awarded to states by EPA.

Subrecipients

DWSRF amounts are awarded by EPA to states as grants. The states then make subawards in the form of loans to their subrecipients. Therefore, in determining the amount of federal funds expended to be reported on the Schedule of Expenditures of Federal Awards (SEFA), subrecipients receiving DWSRF loans should include project expenditures incurred under these loans during the audit period as provided in 2 CFR section 200.502(a). These are subawards—not direct federal loans—and, therefore, neither 2 CFR sections 200.502(b) nor (d) apply when calculating the amount of federal funds expended.

It also is important to appropriately identify these DWSRF loans as subawards because of the impact on which federal agency is the cognizant or oversight agency. When completing the Form

SF-SAC (also referred to as the Data Collection Form), the subrecipient should indicate that a DWSRF loan received from the state is not a direct award by showing an “N” in Part III, Item 6(h).

Equivalency

To achieve consistency in meeting program requirements and eliminate the possibility of over-reporting information under the Federal Funding Accountability and Transparency Act (FFATA), state DWSRF programs must use the same group of loans for the purpose of meeting federal cross-cutting, single audit, procurement, and Transparency Act reporting requirements (as per 40 CFR 35.3575). Equivalency projects/loans are funded with an amount equal to the capitalization grant. DWSRF set-aside activities are also considered federal expenditures. Auditors should be mindful that set-aside spending will not always trigger FFATA reporting based on the thresholds for reporting under the law. In addition, for states using the loan authority under the set-aside funds, it is possible those expenditures are repayment dollars from previous loans and should not be considered federal funds. Auditors should consult with the state to make that determination.

While any of the sources of funds in the DWSRF may be used for equivalency projects/loans, it should be understood that these funds would be considered federal funds once they are deemed equivalency dollars and that all disbursements for equivalency projects/loans must be entered into the SEFA. The SEFA should reflect equivalency dollars rather than actual cash draws from the Treasury to the state. Additionally, the SEFA will differ from the SF-425 form.

DEPARTMENT OF ENERGY

ASSISTANCE LISTING 81.041 STATE ENERGY PROGRAM

I. PROGRAM OBJECTIVES

The objective of the State Energy Program (SEP) is to work with the states, territories, and the District of Columbia (hereinafter “states”) to increase the use of energy efficiency and renewable energy across all sectors of the economy nationwide. States use SEP funds to design and implement state-wide energy plans and programs that best meet their individual energy needs. SEP also provides a wide range of technical assistance and support to the states to increase key skills and enhance their ability to design and carry out effective programs.

SEP received additional funding under the Infrastructure Investment and Jobs Act (IIJA) which created additional compliance requirements. Each SEP grantee will have an award with IIJA funding, which can be found at [State Energy Program Guidance | Department of Energy](#). Subrecipients receiving 81.041 funding are expected to follow all of the requirements established by the pass-through entity as permitted by 2 CFR 200.332.

II. PROGRAM PROCEDURES

To be eligible for a SEP award, a state must submit a SEP State Application to the Department of Energy (DOE). The State Application comprises two elements:

- A. Master File:** includes information on the state’s overall strategic energy plan, the key elements, goals, and objectives of that plan, and how specific SEP activities fit into that overall plan. It must also include a plan for state subrecipient monitoring.
- B. Annual File:** includes a description of the energy efficiency and renewable energy programs and activities that the state intends to carry out during its program year (PY), with budget information and milestones for each project/activity, and an overall budget broken out by object class.

Upon approval of the annual application, states receive funds from DOE and proceed to implement the programs therein. If states indicate in their annual application the intent to pass-through SEP funds, they are authorized to pass through those funds to a variety of subrecipients including, but not limited to, local governments, nonprofit organizations, other state agencies, and businesses.

In addition to federal appropriated funds, other sources of funding under this program may include oil overcharge funds, also known as petroleum violation escrow (PVE) funds. If PVE funds are allocated to a state SEP program, the state is required to follow all program requirements as if those were SEP funds.

Source of Governing Requirements

SEP is authorized under the Energy Policy and Conservation Act, as amended (42 USC 6321 et seq.).

SEP's implementing program regulations are found at 10 CFR Part 420.

Availability of Other Program Information

Additional details on SEP requirements can be found in the following State Energy Program Funding Opportunity Announcements and Administrative and Legal Requirements Document (ALRD):

1. DE-FOA-0001644 FY 2017
<https://www.energy.gov/sites/prod/files/2017/10/f37/2017-sep-competitive-awards.pdf> or
<https://www.energy.gov/eere/wipo/state-energy-program-fiscal-year-2017-competitive-funding-opportunity-announcement>
2. State Energy Program 2022 Administrative and Legal Requirements Document (ALRD) issued 3/3/2022
<https://www.energy.gov/sites/default/files/2022-03/sep-2022-administrative-and-legal-requirements-document-alrd.pdf>
3. State Energy Program Infrastructure Investment and Jobs Act (IIJA) of 2021 - Administrative and Legal Requirements Document (ALRD) issued 8/26/22
https://www.energy.gov/sites/default/files/2022-08/SEP-IIJA-ALRD_0.pdf
4. State Energy Program (SEP) Infrastructure Investment and Jobs Act (IIJA) of 2021 Energy Efficiency Revolving Loan Fund Capitalization Grant Program (EE RLF) IIJA - Administrative and Legal Requirements Document (ALRD) issued 11/15/22
<https://www.energy.gov/sites/default/files/2022-11/EE-RLF-IIJA-Administrative-and-Legal-Requirements-Document.pdf>

SEP also issues periodic program notices, which outline new policies and requirements. Program notices are available at <https://www.energy.gov/eere/wipo/state-energy-program-guidance>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not

being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	N	Y	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

a. A broad range of energy efficiency and renewable energy activities are eligible for funding under SEP. The following types of activities are allowable:

- (1) mandatory lighting efficiency standards for public buildings;
- (2) carpool, vanpool, and public transportation initiatives;
- (3) energy efficient procurement procedures;
- (4) mandatory thermal efficiency standards for new and renovated buildings;
- (5) right turn on red, and left turn from one-way streets onto one-way streets;
- (6) coordination among local, state, and federal energy efficiency, renewable energy, and public transportation programs;
- (7) public education to promote energy conservation;
- (8) transportation efficiency such as accelerating use of alternative transportation fuels and hybrid vehicles;
- (9) encouraging use of energy efficiency technologies in industry, buildings, transportation and utilities;

- (10) financing for energy efficiency and renewable energy capital investments and programs, including loans, performance contracting, rebates and grants, which includes establishment of revolving loan funds (RLF) and loan loss reserves (LLR) to the extent that the activities supported by the loans are eligible activities under the program (see III.A.1.b, below) (10 CFR 420.18(d));
- (11) energy audits for buildings and industrial facilities (including industrial processes) within the state;
- (12) adoption of integrated energy plans, which provide for periodic evaluation of a state's energy needs, available energy resources and energy costs;
- (13) promoting the use of adequate and reliable energy supplies, including greater energy efficiency that meet applicable safety, environmental, and policy requirements at the lowest cost;
- (14) energy efficiency in residential housing;
- (15) identifying and educating consumers about deceptive practices related to implementation of energy efficient and renewable resource energy measures;
- (16) reducing utility companies' peak demand;
- (17) promoting energy efficiency as an integral part of economic development and environmental planning conducted by state and local governments or utilities;
- (18) training and education for building designers and contractors to promote buildings that are energy efficient;
- (19) building retrofit standards and regulations;
- (20) feasibility studies of renewable energy and energy efficiency technologies;
- (21) partnerships with other state agencies to leverage additional funds, such as public benefit funds and state and local investments in Clean Air Act compliance; and
- (22) collaborative programs for energy efficiency and renewable energy technologies that link a state's energy and environmental objectives (10 CFR sections 420.15 and 420.17).
- (23) transmission and distribution planning;

- a. support for local governments and Indian Tribes
 - b. feasibility studies for transmission line routes and alternatives
 - c. preparation of necessary project design and permits
 - d. outreach to affected stakeholders
- b. Loan repayments and interest earned on loans can be used only on activities that are included in the state's annual application (10 CFR section 420.18(d)).
 - c. SEP funds may be used for administrative costs associated with the continued operation of an American Recovery and Reinvestment Act (ARRA)-funded RLF or LLR.
2. *Activities Unallowed*

SEP funds may not be used for the following (10 CFR section 420.18):

- a. Construction, such as construction of mass transit systems and exclusive bus lanes, or for construction or repair of buildings or structures.
- b. Purchase of land, a building or structure, or any interest therein.
- c. Subsidizing fares for public transportation.
- d. Subsidizing utility rate demonstrations or state tax credits for energy conservation measures or renewable energy measures.
- e. The conduct of, or purchase equipment to conduct, research, development or demonstration of energy efficiency or renewable energy techniques and technologies not commercially available.
- f. Rebates in excess of 50 percent of the total cost of purchasing and installing materials and equipment.
- g. Loan guarantees or loan forgiveness.

G. Matching, Level of Effort, Earmarking

1. Matching

IIJA states that SEP funds shall not be subject to the cost matching requirement. Accordingly, cost match is not required. The matching requirement for SEP has been waived until 2027. Therefore, State Energy Offices no longer have to provide match to receive their allocation in their PY22 (thru 2027) funds.

Petroleum Violation Escrow (PVE) Funds

PVE, or oil-overcharge funds support a variety of energy related programs in the states. Each state determines how it wishes to allocate the funds across eligible programs. States may use these funds and the interest earned for SEP eligible activities, and other eligible uses. States may use some PVE funds outside of their SEP grants, while some PVE funds must be used within their grants. See [State Energy Program Operations Manual](#) for more information.

PVE Funds Used Within the State's Annual Formula SEP Grant

When used within the scope and budget of a state's SEP grant, PVE funds are subject to SEP grant and program requirements. A state or other non-federal match is not required for PVE funds used within an SEP grant. PVE funds are not subject to the 20% limitation on equipment purchases under the program. See 10 CFR 420.12 and 10 CFR 420.18.

2. Level of Effort

2.1 Level of Effort - Maintenance of Effort

Not applicable

2.2 Level of Effort – Supplement Not Supplant

Each state receiving federal financial assistance shall provide reasonable assurance that federal financial assistance will be used to supplement, and not to supplant, state and local funds and increase the amount of state and local funds that otherwise would be available, in the absence of the federal financial assistance, for the implementation of a State Energy Plan. See 10 CFR 420.13(b)(7).

3. Earmarking

Not Applicable

IV. OTHER INFORMATION

Federal funds used to capitalize a RLF or fund an LLR are not subject to the limitation on the period of availability of federal funds for the ARRA award but continue to retain their federal character for the entire period of time that the funds are used for such purpose (i.e., at each revolution of funds). To ensure continuation of required reporting and DOE oversight of the federal requirements that apply to the RLF or LLR activity in perpetuity or as long as the grantee continues the activity, reporting responsibility for the RLF or LLR activities attributable to ARRA funds will fall under the annual SEP formula award. Additionally, grantees are required to continue to use the funds in accordance with the applicable federal requirements of the ARRA award. Therefore, if a grantee has established a RLF or LLR, auditors should include in their samples loans made from the fund during the audit period. Such transactions should be reviewed in the same manner as any other expenditure under the program.

Applicable guidance is available at:

https://www.energy.gov/sites/default/files/2020/11/f80/SEP_PROGRAM_NOTICE_10-008F_November_10_2020.pdf.

DEPARTMENT OF ENERGY

ASSISTANCE LISTING 81.042 WEATHERIZATION ASSISTANCE FOR LOW-INCOME PERSONS

I. PROGRAM OBJECTIVES

The objective of the Weatherization Assistance for Low-Income Persons (WAP) program is to increase the energy efficiency of dwellings owned or occupied by low-income persons, reduce their total expenditures on energy, and improve their health and safety. WAP has a special interest in addressing these needs for low-income persons who are particularly vulnerable, such as the elderly, disabled persons, and families with children, as well as those with high energy usage and high energy burdens.

WAP received additional funding under the Infrastructure Investment and Jobs Act (IIJA) which created additional compliance requirements. Each WAP grantee has an additional award for these funds, separate from the annual award. These requirements can be found at the link included in the Availability of Other Program Information.

Subrecipients receiving 81.042 funding are expected to follow all of the requirements established by the pass-through entity as permitted by 2 CFR 200.332.

II. PROGRAM PROCEDURES

States may submit an application and plan to the Department of Energy (DOE). The submission describes the proposed weatherization projects and contains a budget, a production schedule of dwelling units to be weatherized with grant funds, a monitoring plan, a training and technical assistance plan, and rental procedures. Upon approval, states receive funds from DOE and may enter into sub-agreements with local administering agencies having approved plans. If a state does not submit an application or if the State Plan is rejected, a local applicant may submit a plan to carry out weatherization projects. Section 411(c) of the Energy Independence and Security Act of 2007 added Puerto Rico and the US territories to the definition of “state.” As a result, DOE makes WAP awards to American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, and the US Virgin Islands. References to “state” in this program supplement include these entities. DOE also provides direct grants to select Native American tribes each year.

In addition to federal appropriated funds, other sources of funding under this program may include oil overcharge funds, also known as petroleum violation escrow (PVE) funds. PVE-leveraged funds identified in the budget and incorporated into the DOE award (as part of the approved budget) must meet all DOE requirements, including allowability of costs, specified in the award. If such funds are not included in the approved budget, states have greater flexibility in how those funds are used.

Source of Governing Requirements

WAP is authorized under Title IV, Part A, of the Energy Conservation and Production Act (Act), as amended (42 USC 6861 through 6873), including amendments made by, Consolidated

Appropriations Act of 2021 (Pub. L. No. 116-260; December 27, 2020); Implementing regulations are published at 10 CFR Part 440.

Availability of Other Program Information

Program notices are available at [Weatherization Program Notices and Memorandums | Department of Energy](#).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	N	N	Y	N	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. The cost of purchase and delivery of weatherization materials (10 CFR section 440.18(d)(1)). Funds may only be expended on weatherization materials listed in Appendix A to 10 CFR Part 440 or as approved by DOE.
- b. Labor costs in accordance with 10 CFR section 440.19.

- c. Transportation of weatherization materials, tools, and equipment, and work crews to a storage site and/or to the site of weatherization work (10 CFR section 440.18(d)(3)).
- d. Maintenance, operation, and insurance of vehicles used to transport weatherization materials (10 CFR section 440.18(d)(4)).
- e. Maintenance of tools and equipment (10 CFR section 440.18(d)(5)).
- f. Purchase or annual lease of tools, equipment and/or vehicles, except that any purchase of vehicles shall be referred to DOE in every instance (10 CFR section 440.18(d)(6)).
- g. Employment of on-site supervisory personnel (10 CFR section 440.18(d)(7)).
- h. Storage of weatherization materials, tools, and equipment (10 CFR section 440.18(d)(8)).
- i. The costs of incidental repairs to make the installation of weatherization materials effective (10 CFR section 440.18(d)(9)).
- j. The cost of liability insurance for weatherization projects for personal injury and property damage (10 CFR section 440.18(d)(10)).
- k. The cost of carrying out low cost/no cost weatherization assistance (10 CFR section 440.20).
- l. The cost of WAP financial audits in accordance with 10 CFR section 440.23.
- m. Administrative expenses (10 CFR section 440.18(d)(13)).
- n. The costs of eliminating health hazards, necessary to ensure the safe installation of weatherization materials (10 CFR section 440.18(d)(15)).
- o. Leveraging activities, as specified in the leveraging section of the State Plan and grant agreement (10 CFR 440.14(c)(6)(xiv), Sec. 1011(g) of the Energy Act of 2020 (Division Z of P.L. 116-260)). Leveraging entails a state obtaining additional program-targeted nonfederal or in-kind contributions as a result of WAP-funded activities. Leveraging should be limited to contributions that can be clearly attributed to a state's weatherization activities, and that are used to augment those activities. The maximum percentage of Weatherization funds that can be diverted for leveraging activities is 15 percent of the grantee's total allocation.
- p. Expenditures for labor, weatherization materials, and related matters for a renewable energy system, as defined in 10 CFR section 440.3, shall not

exceed an average of \$3,000 per dwelling unit or adjusted amount as published in WAP program notices from the Energy Policy Act of 2005, Pub. L. No. 109-58 (42 USC 6865(c)(4); 10 CFR section 440.18(b)).

2. *Activities Unallowed*

- a. Funds shall not be used to weatherize a dwelling unit which is designated for acquisition or clearance by a federal, state, or local program within 12 months from the date of the weatherization (10 CFR section 440.18(f)(1)).
- b. Funds may not be used to install or otherwise provide weatherization materials for a dwelling unit weatherized previously with grant funds, unless:
 - (1) The weatherization activities may be considered “low cost/no cost” as described in 10 CFR section 440.20: inexpensive weatherization materials are used; no labor paid with funds provided is used to install weatherization materials referred to here; and a maximum of 10 percent of the amount allocated to a subgrantee, not to exceed \$50 in materials costs per dwelling unit, is expended (10 CFR section 440.18(f)(2)(i));
 - (2) Such a dwelling has been damaged by fire, flood or other act of God and the repair of the damage is not paid for by insurance (10 CFR section 440.18(f)(2)(ii)); or
 - (3) Language introduced in Consolidated Appropriations Act of 2021, Pub. L. No. 116-260, (h) AMENDING RE-WEATHERIZATION DATE.—Paragraph (2) of section 415(c) of the Energy Conservation and Production Act (42 USC 6865(c)) is amended to read as follows:

“(2) Dwelling units weatherized (including dwelling units partially weatherized) under this part, or under other Federal programs (in this paragraph referred to as ‘previous weatherization’), may not receive further financial assistance for weatherization under this part until the date that is 15 years after the date such previous weatherization was completed. This paragraph does not preclude dwelling units that have received previous weatherization from receiving assistance and services (including the provision of information and education to assist with energy management and evaluation of the effectiveness of installed weatherization materials) other than weatherization under this part or under other Federal programs, or from receiving non-Federal assistance for weatherization.”

E. Eligibility

Regulations for these requirements are found at 10 CFR 440.22

1. Eligible dwelling units

- a. A dwelling unit is eligible for weatherization assistance if it is occupied by a family unit(section 10 CFR 440.22(a)(1-3):
- (1) Whose income is at or below 200 percent of the poverty level determined in accordance with the criteria established by the Director of the Office of Management and Budget;
 - (2) That contains a member who has received cash assistance payments under Title IV or XVI of the Social Security Act or applicable state or local law at any time during the 12-month period preceding the determination of eligibility for weatherization assistance; or
 - (3) If the state elects, is eligible for assistance under the Low-Income Home Energy Assistance Act of 1981, provided that such basis is at least 200 percent of the poverty level (42 USC 6862(7), as amended by Section 407(a), ARRA, 123 Stat 146).

The poverty guidelines are issued each year in the *Federal Register* and HHS maintains a web page that provides the poverty guidelines ([Poverty Guidelines | ASPE \(hhs.gov\)](#)).

- b. A subgrantee may weatherize a building containing rental dwelling units using financial assistance for dwelling units eligible for weatherization assistance under [paragraph \(b\)](#) of this section, where:
- (1) The subgrantee has obtained the written permission of the owner or his agent;
 - (2) Not less than 66 percent (50 percent for duplexes and four-unit buildings, and certain eligible types of large multi-family buildings) of the dwelling units in the building:
 - (i) Are eligible dwelling units, or
 - (ii) Will become eligible dwelling units within 180 days under a federal, state, or local government program for rehabilitating the building or making similar improvements to the building; and
 - (3) The grantee has established procedures for dwellings which consist of a rental unit or rental units to ensure that:

- (i) The benefits of weatherization assistance in connection with such rental units, including units where the tenants pay for their energy through their rent, will accrue primarily to the low-income tenants residing in such units;
 - (ii) For a reasonable period of time after weatherization work has been completed on a dwelling containing a unit occupied by an eligible household, the tenants in that unit (including households paying for their energy through their rent) will not be subjected to rent increases unless those increases are demonstrably related to matters other than the weatherization work performed;
 - (iii) The enforcement of [paragraph \(b\)\(3\)\(ii\)](#) of this section is provided through procedures established by the state by which tenants may file complaints, and owners, in response to such complaints, shall demonstrate that the rent increase concerned is related to matters other than the weatherization work performed; and
 - (iv) No undue or excessive enhancement shall occur to the value of the dwelling units.
- (i) A building containing rental dwelling units meets the requirements of paragraph (b)(2), and paragraphs (b)(3)(ii) and (b)(3)(iv), of this section if it is included on the most recent list posted by DOE of Assisted Housing and Public Housing buildings identified by the US Department of Housing and Urban Development as meeting those requirements.
 - (ii) A building containing rental dwelling units meets the requirements of [paragraph \(b\)\(2\)](#), and [paragraph \(b\)\(3\)\(iv\)](#), of this section if it is included on the most recent list posted by DOE of Assisted Housing and Public Housing buildings identified by the US Department of Housing and Urban Development as meeting those requirements.
 - (iii) A building containing rental dwelling units meets the requirement of [paragraph \(b\)\(2\)](#) of this section if it is included on the most recent list posted by DOE of Low Income Housing Tax Credit buildings identified by the US Department of Housing and Urban Development as meeting that requirement and of Rural Housing Service Multifamily Housing buildings identified by the US Department of Agriculture as meeting that requirement.

- (iv) For buildings identified under [paragraphs \(b\)\(4\)\(i\), \(ii\) and \(iii\)](#) of this section, states will continue to be responsible for ensuring compliance with the remaining requirements of this section, and states shall establish requirements and procedures to ensure such compliance in accordance with this section.
- c. In order to secure the federal investment made under this part and address the issues of eviction from and sale of property receiving weatherization materials under this part, States may seek landlord agreement to placement of a lien or to other contractual restrictions;
- d. As a condition of having assistance provided under this part with respect to multifamily buildings, a State may require financial participation, when feasible, from the owners of such buildings. Such financial participation shall not be reported as program income, nor will it be treated as if it were appropriated funds. The funds contributed by the landlord shall be expended in accordance with the agreement between the landlord and the weatherization agency.
- e. In devising procedures under [paragraph \(b\)\(3\)\(iii\)](#) of this section, States should consider requiring use of alternative dispute resolution procedures including arbitration.
- f. A State may weatherize shelters. For the purpose of determining how many dwelling units exist in a shelter, a grantee may count each 800 square feet of the shelter as a dwelling unit or it may count each floor of the shelter as a dwelling unit.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

A subrecipient is eligible to provide weatherization services under WAP provided that:

- a. It is a public or nonprofit entity, or a Community Action Agency (CAA) (e.g., a private corporation or public agency established under the Economic Opportunity Act of 1964, which is authorized to administer funds received from federal, state, or local entities to assess, design, operate, finance, and oversee antipoverty programs) (10 CFR section 440.15(a)(1)); and
- b. It has been selected as a participant in the weatherization program on the basis of public comment received during a public hearing (10 CFR section 440.15(a)(2)).

L. Reporting

All program reporting is done in a web-based interface, Performance and Accountability for Grants in Energy (PAGE) (<https://page.energy.gov/>). The site provides DOE and grantees, including state and local governments, and tribal organizations, with the ability to electronically submit and manage grant performance and financial information.

Subrecipients receiving 81.042 funding are expected to follow all of the reporting requirements established by the pass-through entity as permitted by 2 CFR 200.332(a)(3).

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement and Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable (

2. Performance Reporting

[DOE F 540.3](#), *WAP Quarterly Program Report (OMB Control No. 1910-5127)* – This report has columns for each reporting quarter and is submitted online using PAGE).

Reported data can generally be corrected, if needed, until the submission of the subsequent Quarterly Program Report.

Key Line Items – The following line items contain critical information:

1. *Grants Outlays* – Funds Subject to DOE Program Rules. Outlays by Function – Total Outlays by Function:
 - a. Grantee Administration
 - b. Subgrantee Administration
 - c. Grantee T&TA
 - d. Subgrantee T &TA
 - e. Program Operations Total
 - f. Health and Safety
 - g. Vehicles and Equipment – Acquisition Cost

- h. Liability Insurance
 - i. Leveraging
 - j. Financial Audits
2. *Grant Production* –Total Annual Energy Savings (final report only)
- For clarification, this data is only required to be reported in the last quarterly report, in other words the Q4 report containing the annual cumulative values.
- a. DOE UNITS* (includes other funds if included in DOE budget)
UNITS BY TYPE:
 - (1) Owner-Occupied Single Family Site Built
 - (2) Single-Family Rental Site Built
 - (3) Multi-Family (5 or more units per building)
 - (4) Owner-Occupied Mobile Home
 - (5) Renter-Occupied Mobile Home
 - (6) Shelter
 - b. UNITS BY PRIMARY HEATING FUEL
 - (1) Natural Gas
 - (2) Fuel Oil
 - (3) Electricity
 - (4) Propane/LPG
 - (5) Kerosene
 - (6) Wood
 - (7) Other
 - c. UNITS BY OCCUPANCY
 - (1) Elderly-Occupied
 - (2) Disabled-Occupied
 - (3) Native American-Occupied
 - (4) Children-Occupied

- (5) High Residential Energy User
- (6) Household with a High Energy Burden
- d. OTHER UNIT CATEGORIES- Reweatherized Total
- e. TOTAL PEOPLE ASSISTED WITH GRANT FUNDS* (includes other funds if included in DOE budget)
 - (1) Elderly
 - (2) Persons with Disabilities
 - (3) Native Americans
 - (4) Children
- f. Leveraged Units (units completed with other funds that are not included in DOE budget, any part of the definition of a DOE unit has been met)

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF EDUCATION CROSS-CUTTING SECTION

INTRODUCTION

This section contains compliance requirements that apply to more than one Department of Education (ED) program (listed below) in the Supplement because the program was authorized under the Elementary and Secondary Education Act of 1965 (ESEA) or the program is subject to the General Education Provisions Act (GEPA) or the Build America Buy America Act (BABAA). The applicable programs in Part 4 reference this ED Cross-Cutting Section.

Note: For an area that a specific program did not select under the six requirement limitation, ED has removed its Assistance Listing from that area (or sub-area) of the cross-cutting section.

Assistance

Listing No.	Program Name	Listed as
ESEA Programs		
84.010	Title I Grants to Local Educational Agencies (LEAs)	Title I, Part A
84.011	Migrant Education—State Grant Program	MEP
84.282	Charter Schools	CSP
84.287	Twenty-First Century Community Learning Centers	21st CCLC
84.365	English Language Acquisition Grants	Title III, Part A
84.367	Supporting Effective Instruction State Grant	Title II, Part A
84.424	Student Support and Academic Enrichment Grants	Title IV, Part A
Non-ESEA Programs		
84.002	Adult Education—State Grant Program	Adult Education
84.027	Special Education—Grants to States (IDEA, Part B)	IDEA
84.173	Special Education—Preschool Grants (IDEA Preschool)	
84.042	TRIO—Student Support Services	TRIO Cluster
84.044	TRIO—Talent Search	
84.047	TRIO—Upward Bound	
84.066	TRIO—Educational Opportunity Centers	
84.217	TRIO—McNair Post-Baccalaureate Achievement	
84.048	Career and Technical Education – Basic Grants to States (Perkins IV)	CTE
84.126	Rehabilitation Services – Vocational Rehabilitation	

84.181	Special Education—Grants for Infants and Families with Disabilities	IDEA, Part C
84.425A	Education Stabilization Fund—State Educational Agency (Outlying Areas) (ESF-SEA I and II)	
84.425C	Governor’s Emergency Education Relief (GEER I and II) Fund	
84.425D	Elementary and Secondary School Emergency Relief (ESSER I and II) Fund	
84.425H	Education Stabilization Fund—Governors (Outlying Areas) (ESF-Governors I and II)	
84.425R	Emergency Assistance to Non-Public Schools (EANS) Program	
84.425U	American Rescue Plan Elementary and Secondary School Emergency Relief (ARP ESSER) Fund	
84.425V	American Rescue Plan Emergency Assistance to Non-Public Schools (ARP EANS)	
84.425X	American Rescue Plan-Outlying Areas State Educational Agency (ARP-OA SEA) Fund	
84.938	Hurricane Education Recovery	

References to the ESEA are to the ESEA, as amended by the Every Student Succeeds Act (ESSA).

The ESEA was amended December 10, 2015, by the ESSA (Pub. L. No. 114-95).

Education Stabilization Fund (ESF) Programs

To prevent, prepare for, and respond to the Coronavirus Disease 2019 (COVID-19), Congress enacted three laws. In March 2020, it passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act, Pub. L. No. 748-284, which includes the ESF. Four CARES Act ESF programs are included in this Supplement: the Governor’s Emergency Education Relief (GEER I) Fund (Assistance Listing 84.425C); the Elementary and Secondary School Emergency Relief (ESSER I) Fund (Assistance Listing 84.425D); the Education Stabilization Fund—Governors (Outlying Areas) (ESF-Governors I) (Assistance Listing 84.425H); and the Education Stabilization Fund—State Educational Agency (Outlying Areas) (ESF-SEA I) (Assistance Listing 84.425A).

In December 2020, Congress passed the Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act, 2021, Pub. L. No. 116-260, which provided additional funds to

the ESF. Five CRRSA ESF programs are included in this Supplement: the Governor’s Emergency Education Relief (GEER II) Fund (Assistance Listing 84.425C); the Elementary and Secondary School Emergency Relief (ESSER II) Fund (Assistance Listing 84.425D); the Education Stabilization Fund–Governors (Outlying Areas) (ESF-Governors II) (Assistance Listing 84.425H); the Education Stabilization Fund–State Educational Agency (Outlying Areas) (ESF-SEA II) (Assistance Listing 84.425A); and the Emergency Assistance to Non-Public Schools (EANS) program (Assistance Listing 84.425.R).

In March 2021, Congress passed the American Rescue Plan Act of 2021 (ARP), Pub. L. No. 117-2, which provided additional funds to the ESF. Three ARP programs are included in this Supplement: the American Rescue Plan Elementary and Secondary School Emergency Relief (ARP ESSER) Fund (Assistance Listing 84.425U); the American Rescue Plan Emergency Assistance to Non-Public Schools (ARP EANS) (Assistance Listing 84.425V); and the American Rescue Plan-Outlying Areas State Educational Agency (ARP-OA SEA) Fund (Assistance Listing 84.425X).

Waivers and Expanded Flexibility

Local educational agencies (LEAs) through their SEA, and schools through their LEA and SEA, may request waivers from ED of many of the statutory and regulatory requirements of programs authorized in the ESEA. In addition, some States have been granted authority to grant waivers of Federal requirements under the Education Flexibility Partnership Act of 1999. See approved States at: <https://oese.ed.gov/offices/office-state-grantee-relations-evidence-based-practices/ed-flex/awards/>.

Due to the COVID-19 pandemic, ED invited SEAs to apply for certain fiscal waivers. A list of the invited waivers is available at:

- ESEA: [Guidance - Office of Elementary and Secondary Education](#)
- Adult Ed and Perkins: <https://www2.ed.gov/about/offices/list/ovae/pi/AdultEd/tydings-covid-waiver-letter-aefta.pdf>
- IDEA: <https://www2.ed.gov/policy/speced/guid/idea/monitor/cssos-mfs-2018-waiver-authority-06-05-2020.pdf>

For certain programs, lists of waivers granted under the CARES Act waiver authority are listed in the *Federal Register*:

- Adult-Ed and Perkins: <https://www.federalregister.gov/documents/2020/11/05/2020-24537/notice-of-waiver-granted-under-the-coronavirus-aid-relief-and-economic-security-cares-act>
- ESEA: <https://www.federalregister.gov/documents/2020/05/18/2020-10563/notice-of-waivers-granted-under-section-3511-of-the-coronavirus-aid-relief-and-economic-security>

Cross-Cutting Requirements

The requirements in this cross-cutting section can be classified as either general or program-specific. General cross-cutting requirements are those that are the same for all applicable programs but are implemented on an entity level. These requirements need only be tested once to cover all applicable major programs. The general cross-cutting requirements that the auditor only need test once to cover all applicable major programs are: III.G.2.1, “Level of Effort-Maintenance of Effort” (except for certain ESF programs see program specific level of effort-maintenance of effort requirement); and III.N, “Special Tests and Provisions.” Program-specific cross-cutting requirements are the same for all applicable programs but are implemented at the individual program level. These types of requirements need to be tested separately for each applicable major program. The compliance requirement in III.N.1, “Participation of Private School Children,” may be tested on a general or program-specific basis.

In recent years, the Office of Inspector General in ED has investigated a number of significant criminal cases related to the risk of misuse of Federal funds and the lack of accountability of Federal funds in public charter schools. Auditors should be aware that, unless an applicable program statute provides otherwise, public charter schools and charter school LEAs are subject to the requirements in this cross-cutting section to the same extent as other public schools and LEAs. Auditors also should note that, depending upon State law, a public charter school may be its own LEA or a school that is part of a traditional LEA.

Program procedures for non-ESEA programs covered by this cross-cutting section and additional information on program procedures for the ESEA programs are set forth in the individual program sections of this Supplement.

I. PROGRAM OBJECTIVES

Program objectives for programs covered by this cross-cutting section are set forth in the individual program sections of this Supplement.

II. PROGRAM PROCEDURES

A. Overview

1. ESEA Programs

The ESEA requires an SEA to either develop and submit separate, program-specific individual State plans to ED for approval as provided in individual program requirements outlined in the ESEA or submit, in accordance with Section 8302 of the ESEA, a consolidated plan to ED for approval. Each SEA submitted a consolidated State plan. SEAs with approved consolidated State plans may require LEAs to submit consolidated plans or allow an LEA to submit a consolidated plan or individual program plans.

B. Subprograms/Program Elements

Unique Features of ESEA Programs That May Affect the Conduct of the Audit
Subprograms/Program Elements

The following unique features may affect the conduct of an audit:

1. *Consolidation of Administrative Funds*

SEAs and LEAs (with SEA approval) may consolidate Federal funds received for administration under many ESEA programs, thus eliminating the need to account for these funds on a program-by-program basis. The amount from each applicable program set aside for State consolidation may not be more than the percentage, if any, authorized for State administration under that program. This also includes non-ESEA programs: the McKinney-Vento Homeless Assistance Act, ESSER, GEER (if administered by a SEA), and EANS.

2. *Schoolwide Programs*

Eligible schools are able to use their Title I, Part A funds, in combination with other Federal, State, and local funds, in order to upgrade the entire educational program of the school and to raise academic achievement for all students. Except for some of the specific requirements of the Title I, Part A program, Federal funds that a school consolidates in a schoolwide program are not subject to most of the statutory or regulatory requirements of the programs providing the funds as long as the schoolwide program meets the intent and purposes of those programs. The Title I, Part A requirements that apply to schoolwide programs are identified in the Title I, Part A program-specific section. If a school does not consolidate Federal funds with State and local funds in its schoolwide program, the school has flexibility with respect to its use of Title I, Part A funds, consistent with Section 1114 of ESEA (20 USC 6314), but it must comply with all statutory and regulatory requirements of the other Federal funds it uses in its schoolwide program.

3. *Transferability*

SEAs and LEAs (with some limitations) may transfer up to 100 percent of their allotment from one or more applicable programs (Title II, Part A and Title IV, Part A for SEAs and LEAs; 21st CCLC for SEAs) to one or more of those programs or to other applicable programs: Title I, Part A; Title I, Part C; Title I, Part D; Title III, Part A; and Title V, Part B. Transferred funds are subject to all of the requirements, set-asides, and limitations of the programs into which they are transferred.

4. *Small Rural Schools Achievement Alternative Use of Funds*

Eligible LEAs may, after notifying the SEA, spend all or part of the formula funds they receive under two applicable programs (Title II, Part A and Title IV, Part A) for local activities authorized under one or more of five applicable programs (Title I, Part A; Title II, Part A; Title III; Title IV, Part A; and 21st CCLC).

Availability of Other Program Information

The ESEA, as reauthorized by the ESSA, is available with a hypertext index at <https://www.congress.gov/114/plaws/publ95/PLAW-114publ95.pdf>.

An ED *Federal Register* notice, dated July 2, 2004 (69 FR 40360-40365), indicating which Federal programs may be consolidated in a schoolwide program, is available at <http://www.gpo.gov/fdsys/pkg/FR-2004-07-02/pdf/04-15121.pdf>.

A number of documents contain guidance applicable to the cross-cutting requirements in this section. Documents numbered 10-11 below, which were issued before enactment of the ESSA, are applicable in general. They include:

1. ESSA Fiscal Changes & Equitable Services (which includes guidance on Transferability Authority) (November 21, 2016) [ESSA Non Regulatory Guidance Fiscal and Equitable Service 11-21-2016 \(PDF\) \(ed.gov\)](https://www.ed.gov/sites/default/files/2016/11/ESSA-Non-Regulatory-Guidance-Fiscal-and-Equitable-Service-11-21-2016.pdf)
Note: The information on Title I, Part A equitable services in this document is superseded by the nonregulatory guidance ED issued in October 2019. See below.
2. ESSA Schoolwide Guidance (September 29, 2016) <https://oese.ed.gov/files/2020/07/essaswpguidance9192016.pdf>
3. Title I, Part A of the ESEA: Providing Equitable Services to Eligible Private School Children, Teachers, and Families (October 7, 2019) <https://oese.ed.gov/files/2020/07/equitable-services-guidance-100419.pdf>
4. Informational Document on the Rural Education Achievement Program (REAP) (January 19, 2021) <https://oese.ed.gov/files/2021/01/19-0043-REAP-Informational-Document-final-OS-Approved-1.pdf>
5. Non-Regulatory Guidance: Early Learning in the Every Student Succeeds Act (November 2016) <https://oese.ed.gov/files/2020/07/essaelguidance10202016.pdf>
6. Within-District Allocations Under Title I, Part A of the Elementary and Secondary Education Act of 1965 (Draft) <https://oese.ed.gov/files/2022/02/Within-district-allocations-FINAL.pdf>
7. Providing Equitable Services to Students and Teachers in Non-Public Schools under the CARES Act Programs (Oct. 9, 2020) <https://oese.ed.gov/files/2020/10/Providing-Equitable-Services-under-the-CARES-Act-Programs-Update-10-9-2020.pdf>
8. Fact Sheet: State-Administered Programs under the ESEA and the Nationwide Waiver from the U.S. Department of Agriculture to Allow Meal Pattern Flexibility in the Summer Food Service Program and the National School Lunch Program Seamless Summer Option through June 2021 (January 2021) <https://oese.ed.gov/files/2021/05/Fact-sheet-on-USDA-meals-waivers-Jan-2021.pdf>
9. DRAFT Title VIII, Part F of the Elementary and Secondary Education Act of 1965, as Amended by the Every Student Succeeds Act: Equitable Services for Eligible Private

School Children, Teachers, and Other Educational Personnel [Draft-Title-VIII-Equitable-Services-Guidance.pdf \(ed.gov\)](#)

10. How Does a State or Local Educational Agency Allocate Funds to Charter Schools that are Opening for the First Time or Significantly Expanding Their Enrollment? (December 2000) <https://oese.ed.gov/files/2020/07/cguidedec2000.pdf>
11. Title I Fiscal Issues: Maintenance of Effort; Comparability; Supplement, not Supplant; Carryover; Consolidating Funds in Schoolwide Programs; and Grantback Requirements (February 2008) <https://oese.ed.gov/files/2020/07/fiscalguid.pdf>
12. Letter to Chief State School Officers on Granting Administrative Flexibility for Better Measures of Success (September 7, 2012) <http://www2.ed.gov/policy/fund/guid/gposbul/time-and-effort-reporting.html?exp=3>
13. A BABAA FAQ document, U.S. Department of Education Frequently Asked Questions about the Build America Buy America Act, addressing questions related to ED's implementation of BABAA is available at <https://www2.ed.gov/policy/fund/guid/buy-america/faqs.pdf> and additional information can be found at <https://www2.ed.gov/policy/fund/guid/buy-america/index.html>.

III. COMPLIANCE REQUIREMENTS

If there has been a transfer of funds to a consolidated administrative cost objective from a major program, in developing audit procedures to test compliance with “Activities Allowed or Unallowed” and “Allowable Costs/Cost Principles,” the auditor should include the consolidated administrative cost objective in the universe to be tested.

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. *Consolidation of Administrative Funds (SEAs/LEAs)- ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); MEP (84.011); CSP (84.282); 21st CCLC (84.287); Title III, Part A (84.365); Title II, Part A (84.367); Title IV, Part A (84.424). This section also applies to ESSER, GEER, EANS, and the ESF Outlying Areas program (84.425A, C, D, H R, U, V, and X).*

An SEA may consolidate the amounts specifically made available to it for State administration under one or more ESEA programs (and such other programs as the ED secretary may designate) if the SEA can demonstrate that the majority of its resources are derived from non-Federal sources. An SEA must use consolidated administrative funds for authorized administrative activities of one or more of the consolidated programs. It may also use such funds for administrative activities designed to enhance the effective and coordinated use of funds under one or more of the programs included in the consolidation, such as coordination of ESEA

programs with other Federal and non-Federal programs; the establishment and operation of peer review mechanisms; the dissemination of information regarding model programs and practices; and technical assistance (Section 8201 of ESEA (20 USC 7821)).

An LEA may, with the approval of its SEA, consolidate and use for the administration of one or more ESEA programs not more than the percentage, established in each program, of the total available under those programs. An LEA may use consolidated funds for the administration of the consolidated programs and for uses at the school district and school levels comparable to those authorized for the SEA. An LEA that consolidates administrative funds may not use any other funds under the programs included in the consolidation for administration (Section 8203 of ESEA (20 USC 7823)).

An SEA or LEA that consolidates administrative funds is not required to keep separate records of administrative costs for each individual program.

Expenditures of consolidated administrative funds are allowable if they are for administrative costs that are allowable under any of the contributing programs (sections 8201(c) and 8203(e) of ESEA (20 USC 7821(c) and 7823(e))).

See IV, “Other Information,” for guidance on the treatment of consolidated administrative funds for purposes of Type A program determination and presentation in the Schedule of Expenditures of Federal Awards (SEFA).

- b. *Schoolwide Programs (LEAs)- ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); MEP (84.011); 21st CCLC (84.287); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424). This section also applies to ESSER & GEER (84.425C,D, and U), IDEA (84.027 and 84.173), and CTE (84.048).*

An eligible school participating under Title I, Part A may, in consultation with its LEA, use its Title I, Part A funds, along with funds provided from the above-identified programs, to upgrade the school’s entire educational program in a schoolwide program.

See IV, “Other Information,” for guidance on the treatment of consolidated schoolwide funds for purposes of Type A program determination and presentation in the SEFA.

- c. *Transferability (SEAs and LEAs)- ESEA programs in this Supplement to which this section applies are: 21st CCLC (84.287) (for SEAs only), Title II, Part A (84.367), and Title IV, Part A (84.424).*

SEAs may transfer up to 100 percent of the non-administrative funds allocated for State-level activities from applicable programs to one or more of the other listed applicable programs, or to Title I, Part A (Assistance Listing 84.010); Title I, Part C (Assistance Listing 84.011); Title I, Part D (Assistance Listing 84.013); Title III, Part A (Assistance Listing 84.365A); and Title V, Part B (84.358). LEAs may transfer up to 100 percent of their allotments from an applicable program to the other listed applicable program, or to Title I, Part A (Assistance Listing 84.010); Title I, Part C (Assistance Listing 84.011); Title I, Part D (Assistance Listing 84.013); Title III, Part A (Assistance Listing 84.365A); and Title V, Part B (84.358).

See III.G.3.b, “Matching, Level of Effort, Earmarking – Earmarking,” in this cross-cutting section, for additional testing related to transferability.

See IV, “Other Information,” for guidance on the treatment of funds transferred under this provision for purposes of Type A program determination and presentation in the SEFA.

- d. *Small Rural Schools Achievement (SRSA) Alternative Uses of Funds Program- ESEA programs in this Supplement to which this section applies are Title II, Part A (84.367) and Title IV, Part A (84.424).*

LEAs that (a) have a total average daily attendance of fewer than 600 students, or serve only schools that are located in counties with a population density of fewer than ten persons per square mile; and (b) serve only schools that are designated rural (locale code of 41, 42, or 43) by the National Center for Education Statistics (NCES), or (with the concurrence of the SEA) are located in an area defined as rural by a governmental agency of the State may, after notifying the SEA, spend all or part of the funds received under the above programs for local activities authorized under one or more of the following five programs:

- (1). Assistance Listing 84.010 Improving Basic Programs Operated by Local Educational Agencies (Title I, Part A)
- (2). Assistance Listing 84.287 Twenty-First Century Community Learning Centers (Title IV, Part B)
- (3). Assistance Listing 84.365 Language Instruction for English Learners and Immigrant Students (Title III)
- (4). Assistance Listing 84.367 Supporting Effective Instruction (Title II, Part A)

(5) Assistance Listing 84.424 Student Support and Academic Enrichment (Title IV, Part A) (Section 5211(a)-(c) of ESEA (20 USC 7345(a)-(c))).

See IV, “Other Information,” for guidance on the treatment of funds transferred under this provision for purposes of Type A program determination and presentation in the SEFA.

B. Allowable Costs/Cost Principles

1. Documentation of Employee Time and Effort (Consolidated Administrative Funds and Schoolwide Programs)

ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); MEP (84.011); CSP (84.282); 21st CCLC (84.287); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424). This section also applies to IDEA (84.027 and 84.173) (schoolwide programs only), CTE (84.048) (schoolwide programs only), and ESSER, GEER, and EANS (84.425C, D, R, U, and V) (consolidated administrative funds and schoolwide programs).

- a. *Consolidated Administrative Funds:* An SEA or LEA that consolidates Federal administrative funds is not required to keep separate records by individual program (Sections 8201(c) or 8203(e) of ESEA (20 USC 7821(c) or 7823(e))). The SEA or LEA may treat the consolidated administrative funds as a consolidated administrative cost objective.

Time-and-effort requirements with respect to consolidated administrative funds vary under different circumstances.

- (1) For an employee who works solely on the consolidated administrative cost objective, an SEA or LEA is not required to maintain records reflecting the distribution of the employee’s salary and wages among the programs included in the consolidation.
- (2) For an employee who works in part on the consolidated administrative cost objective and in part on a Federal program whose administrative funds have not been consolidated or on activities funded from other revenue sources, an SEA or LEA must maintain time and effort distribution records in accordance with 2 CFR section 200.430(i)(1)(vii) that support the portion of time and effort dedicated to:
 - (a) The consolidated cost objective, and
 - (b) Each program or other cost objective supported by non-consolidated Federal funds or other revenue sources.

- b. *Schoolwide Programs* – A schoolwide program school is permitted to consolidate Federal funds with State and local funds to upgrade the entire educational program of the school. A school that consolidates Federal funds with State and local funds in a consolidated schoolwide pool is not required to maintain separate records by program (Section 1114(a)(3)(C) of ESEA (20 USC 6314(a)(3)(C), 34 CFR section 200.29(d)). If a schoolwide program school does not consolidate Federal funds in a consolidated schoolwide pool, the school must keep separate records by program. (Guidance is contained in the publication entitled *Title I Fiscal Issues: Maintenance of Effort; Comparability; Supplement, not Supplant; Carryover; Consolidating Funds in Schoolwide Programs; and Grantback Requirements* (February 2008). This guidance is available at <https://oese.ed.gov/files/2020/07/fiscalguid.pdf>.

Time-and-effort requirements in schoolwide program schools vary under different circumstances.

- (1) If a school operating a schoolwide program consolidates Federal, State, and local funds in a consolidated schoolwide pool, there is no distinction between staff paid with Federal funds and staff paid with State or local funds. Under these circumstances, payment from the single consolidated schoolwide pool is sufficient to demonstrate that an employee works only on activities of the schoolwide program, and no other documentation is required.
- (2) If a school operating a schoolwide program does not consolidate Federal funds with State and local funds in a consolidated schoolwide pool, an employee who works, in whole or in part, on a Federal program or cost objective must document time and effort as follows:
 - (a) For an employee who works solely on a single cost objective (e.g., a single Federal program whose funds have not been consolidated or Federal programs whose funds have been consolidated but not with State and local funds), an LEA is not required to maintain records reflecting the distribution of the employee's salary and wages, including among the Federal programs included in the consolidation, if applicable.
 - (b) For an employee who works on multiple activities or cost objectives (e.g., in part on a Federal program whose funds have not been consolidated in a consolidated schoolwide pool and in part on Federal programs supported with funds consolidated in a schoolwide pool or on activities that are not part of the same cost objective), an LEA must maintain time and effort distribution records in accordance with 2

CFR section 200.430(i)(1)(vii) that support the portion of time and effort dedicated to:

- (i) The Federal program or cost objective; and
 - (ii) Each other program or cost objective supported by consolidated Federal funds or other revenue sources.
- c. In a September 7, 2012, letter to Chief State School Officers, ED authorized SEAs to approve LEAs' use of a substitute system for time-and-effort reporting for employees whose salaries are supported by multiple cost objectives, but who work on a predetermined schedule. ED also provided guidance to clarify the meaning of a "single cost objective." For more detail, see *Letter to Chief State School Officers on Granting Administrative Flexibility for Better Measures of Success* (Sept. 7, 2012) (<https://www2.ed.gov/policy/fund/guid/gposbul/time-and-effort-reporting.html>).

2. *Indirect Costs*

ESEA programs in this Supplement to which a restricted indirect cost rate applies are Title I, Part A (84.010); MEP (84.011); 21st CCLC (84.287); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424).

This section also applies to Adult Education (84.002); IDEA (84.027 and 84.173); CTE (84.048); and IDEA, Part C (84.181).

A "restricted" indirect cost rate (RICR) must be used for programs administered by State and local governments and their governmental subgrantees that have a statutory requirement prohibiting the use of Federal funds to supplant nonfederal funds. The programs listed above in this section have a non-supplanting requirement and therefore must have a restricted indirect cost rate.

Nongovernmental grantees or subgrantees administering such programs have the option of using the RICR, or an indirect cost rate of 8 percent, unless ED determines that the RICR would be lower.

The formula for a restricted indirect cost rate is:

$$\text{RICR} = (\text{General management costs} + \text{Fixed costs}) / (\text{Other expenditures}).$$

General management costs are costs of activities that are for the direction and control of the grantee's (or subgrantee's) affairs that are organization wide, such as central accounting services, payroll preparation and personnel management. For State and local governments, the general management indirect costs consist of (1) allocated Statewide Central Service Costs approved by the Department of Health and Human Services in a formal Statewide Cost Allocation Plan (SWCAP) as "Section I" costs and (2) departmental indirect costs. The term "general

management” as it applies to departmental indirect costs does not include expenditures limited to one component or operation of the grantee. Specifically excluded from general management costs are the following costs that are reclassified and included in the “other expenditures” denominator:

- a. Divisional administration that is limited to one component of the grantee;
- b. The governing body of the grantee;
- c. Compensation of the chief executive officer of the grantee;
- d. Compensation of the chief executive officer of any component of the grantee; and
- e. Operation of the immediate offices of these officers.

Also excluded from the SWCAP Section I indirect costs are any occupancy and maintenance type costs as described in 34 CFR section 76.568. However, because these costs are allocated and not incurred at the departmental level, they do not require reclassification to the “other expenditure” denominator.

Fixed costs are contributions to fringe benefits and similar costs associated with salaries and wages that are charged as indirect costs, including retirement, social security, pension, unemployment compensation, and insurance costs.

Other expenditures are the grantee’s total expenditures for its Federally and non-Federally funded activities, including directly charged occupancy and space maintenance costs (as defined in 34 CFR section 76.568), and the costs related to the chief executive officer of the grantee or any component of the grantee and its offices. Excluded are general management costs, fixed costs, subgrants, capital outlays, debt service, fines and penalties, contingencies, and election expenses (except for elections required by Federal statute).

Occupancy and space maintenance costs associated with functions that are not organization-wide must be included with other expenditures in the indirect cost formula. These costs may be charged directly to affected programs only to the extent that statutory supplanting prohibitions are not violated. This reimbursement must be approved in advance by ED. Specific occupancy and space maintenance costs may be charged directly only to programs affected by the restricted rate calculation if charging for such costs is approved in advance by ED (34 CFR section 76.568(c)).

Indirect costs charged to a grant are determined by applying the RICR to total direct costs of the grant minus capital outlays, subgrants, and other distorting or unallowable items as specified in the grantee’s indirect cost rate agreement.

The other ED programs (those not having a statutory non-supplant requirement) that allow indirect costs do not require a restricted rate and should follow the cost

principles in 2 CFR Part 200, Subpart E (34 CFR sections 76.560 and 76.563-76.569).

3. *Unallowable Direct Costs to Programs*

Officials from ED have noted that some entities have charged costs in the following areas which were determined to be unallowable as specified in the indicated references. Auditors should be alert that if any such costs are charged, charges must be consistent with provisions of 2 CFR Part 200, Subpart E or as applicable.

- a. Separation leave costs (2 CFR section 200.431(b)).
- b. Severance costs (2 CFR section 200.431(i)).
- c. Post-retirement health benefit (PRHB) costs (2 CFR section 200.431(h)).

4. *Unallowable Costs to Programs (Direct or Indirect)*

Officials from ED have noted that, in cases where grantees rent or lease buildings or equipment from an affiliate organization, the costs associated with the lease or rental agreement can be excessive. The auditor should be alert to the fact that the measure of allowability in such “less-than-arms-length-relationships” is not fair market value, but rather the “costs of ownership” standard as referenced in 2 CFR section 200.465(c).

C. Cash Management

ESEA programs in this Supplement to which this section applies are: CSP (84.282); 21st CCLC (84.287); and Title IV, Part A (84.424).

This section also applies to Adult Education (84.002); TRIO Cluster (84.042, 84.044, 84.047, 84.066, and 84.217); CTE (84.048); Vocational Rehabilitation (84.126); and IDEA, Part C (84.181).

Note: This section applies only to ED programs in which the entity being audited is a grantee (i.e., the entity receives grant funds directly from ED). Auditors should refer to Part 3, Section C, “Cash Management,” for any ED program in which the entity is being audited is a subrecipient (i.e., Federal funds are received through a pass-through grant from a grantee).

Grantees draw funds via the G5 System. Grantees request funds by (1) creating a payment request using the G5 System through the Internet; (2) calling the Payee Hotline; or (3) if the grantee is placed on the reimbursement or cash monitoring payment method, submitting a Form 270, *Request for Title IV Reimbursement or Heightened Cash Monitoring 2 (HCM2)*, (OMB No. 1845-0089), to an ED program or regional office.

When creating a payment request in G5, the grantee enters the drawdown amounts, by award, directly into G5. Grantees can redistribute drawn amounts between grant awards by making adjustments in G5 to reflect actual disbursements for each award, as long as the net amount of the adjustments is zero. When requesting funds using the other two methods, grantees provide drawdown information to the hotline operator or on the Form 270, as applicable.

To assist grantees in reconciling their internal accounting records with the G5 System, using their DUNS (Data Universal Numbering System) number, grantees can obtain a G5 External Award Activity Report (<https://www.g5.gov/>) showing cumulative and detail information for each award. The External Award Activity Report can be created with date parameters (Start and End Dates) and viewed on-line. To view each draw per award, the G5 user may click on the award number to view a display of individual draws for that award.

G. Matching, Level of Effort, Earmarking

1. Matching

See individual program supplements for any matching requirements.

2. Level of Effort

2.1 Level of Effort – Maintenance of Effort (SEAs/LEAs)

ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); Title III, Part A (84.365); and Title II, Part A (84.367).; as described in the Introduction, “Cross-Cutting Requirements,” this requirement is a general cross-cutting requirement that need only be tested once to cover all major programs to which it applies.

An LEA may receive funds under an applicable program only if the SEA finds that the combined fiscal effort per student or the aggregate expenditures of the LEA from State and local funds for free public education for the preceding year was not less than 90 percent of the combined fiscal effort or aggregate expenditures for the second preceding year, unless specifically waived by ED.

An LEA’s expenditures from State and local funds for free public education include expenditures for administration, instruction, attendance and health services, pupil transportation services, operation and maintenance of plant, fixed charges, and net expenditures to cover deficits for food services and student body activities. They do not include the following expenditures: (a) any expenditures for community services, capital outlay, debt service and supplementary expenses as a result of a

presidentially declared disaster and (b) any expenditures made from funds provided by the Federal government.

If an LEA fails to maintain fiscal effort, an SEA must reduce an LEA's allocation under a covered program if the LEA also failed to maintain effort in one or more of the five immediately preceding fiscal years in the exact proportion by which the LEA fails to maintain effort by falling below 90 percent of both the combined fiscal effort per student and aggregate expenditures (using the measure most favorable to the LEA) (Section 8521 of ESEA (20 USC 7901); 34 CFR section 299.5).

In some States, the SEA prepares the calculation from information provided by the LEA. In other States, the LEAs prepare their own calculation. The suggested audit procedures for compliance contained in Part 3G for "Level of Effort – Maintenance of Effort" should be adapted to fit the circumstances. For example, if auditing the LEA and the LEA does the calculations, the auditor should perform steps a., b., and c. If auditing the LEA and the SEA does the calculation, the auditor should perform step c for the amounts reported to the SEA. If auditing the SEA and the SEA performs the calculation, the auditor should perform steps a. and b. and amend step c to trace amounts to the LEA reports. If auditing the SEA and the LEA performs the calculation, the auditor should perform step a. and, if the requirement was not met, determine if the funding was reduced appropriately.

2.2 Level of Effort – Supplement Not Supplant

MEP (84.011); CTE (84.048); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424).

General – An SEA and LEA may use program funds only to supplement and, to the extent practical, increase the level of funds that would, in the absence of the Federal funds, be made available from non-Federal sources for the education of participating students. In no case may an LEA use Federal program funds to supplant funds from non-Federal sources (MEP, Section 1304(c)(2) of ESEA (20 USC 6394(c)(2)); Title III, Part A, Section 3115(g) (20 USC 6825(g)) (see additional information below); Title II, Part A, Section 2301 of ESEA (20 USC 6691)); and Title IV, Part A, Section 4110 (20 USC 7120)).

In the following instances, it is presumed that supplanting has occurred:

- a. The SEA or LEA used Federal funds to provide services that the SEA or LEA was required to make available under other Federal, State, or local laws.

- b. The SEA or LEA used Federal funds to provide services that the SEA or LEA provided with non-Federal funds (or for Title III, Part A, other Federal funds, as noted below) in the prior year.
- c. The SEA or LEA used MEP funds to provide services for participating children that the SEA or LEA provided with non-Federal funds for nonparticipating children.

These presumptions are rebuttable if the SEA or LEA can demonstrate that it would not have provided the services in question with non-Federal funds had the Federal funds not been available.

MEP – An SEA and LEA may exclude from determinations of compliance with the supplement not supplant requirement supplemental State or local funds spent in any school attendance area or school for programs that meet the intent and purposes of the MEP, as identified in Title I of ESEA (sections 1118(d) and 1304(c)(2) of ESEA (20 USC 6321(d) and 6394(c)(2)); 34 CFR section 200.88).

Title I, Part C funds may only be used to address the needs of migratory children that are not addressed by services available from other **Federal or non-Federal** programs (Section 1306(b)(2) of ESEA). *Title III, Part A* – An SEA or LEA may only use funds under Title III, Part A to supplement the level of Federal, State and local public funds that, in the absence of the Title III funds, would have been provided for programs for English learners and immigrant children and youth (Section 3115(g) of ESEA (20 USC 6825(g))).

3. Earmarking

- a. Administration

Title I, Part A (84.010) and MEP (84.011)

An SEA may reserve for the administration of Title I programs up to one percent from each of the amounts allocated to the State under Title I, parts A, C (MEP), and D (Subpart 1) or \$400,000, whichever is greater.

However, if the sum of the amounts appropriated for parts A, C, and D is equal to or greater than \$14 billion, as is the case for fiscal year (FY) 2019, the amount an SEA may reserve for administration may not exceed one percent of the amount the State would receive if the Title I allocation were \$14,000,000,000 (20 USC 6304(b)). ED has provided a table to the State showing the amount that it could reserve for administration of Title I programs from FY 2021 funds if \$14 billion were appropriated for FY 2020. An SEA may reserve less than one percent from each of parts A, C, and D. Moreover, an SEA does not need to reserve the same percentage from each part, although the SEA may not reserve more from parts C and

D than it would have reserved if it had reserved proportionate amounts from parts A, C, and D. An SEA reserving \$400,000 must reserve proportionate amounts from each of the amounts allocated to the State under Part A but is not required to reserve funds proportionately from each of parts A, C, and D and may, for example, take the reservation entirely out of Part A funds. However, in reserving \$400,000, an SEA may not reserve more funds for State administration from Part C or Part D than it would have if it had reserved proportionate funds from parts A, C, and D. (Section 1004 of ESEA (20 USC 6304); see also 34 CFR section 200.100(b)). For more detail, see page 33 of the guidance entitled *State Educational Agency Procedures for Adjusting Basic, Concentration, Targeted, and Education Finance Incentive Grant Allocations Determined by the U.S. Department of Education* (May 23, 2003) (<https://oese.ed.gov/files/2020/07/seaguidanceforadjustingallocations.doc>) and page 9 of the ESSA Fiscal Changes & Equitable Services guidance (November 2016) ([ESSA Non Regulatory Guidance Fiscal and Equitable Service 11-21-2016 \(PDF\) \(ed.gov\)](#)).

As explained in III.A.1, “Activities Allowed or Unallowed – Consolidation of Administrative Funds,” the amounts reserved above may be consolidated with State administrative funds available under other applicable programs (Section 8201(a) of ESEA (20 USC 7821(a)).

b. Transferability

Title II, Part A (84.367); and Title IV, Part A (84.424).

SEAs may transfer up to 100 percent of the non-administrative funds allocated for State-level activities from one or more of the programs listed above (as well as 21st CCLC) to one or more of those programs, or to Title I, Part A (84.010); MEP (84.011); Title I, Part D, Subpart 1 (84.013); Title III, Part A (84.365A); or Title V, Part B (84.358). LEAs may transfer up to 100 percent of their allotments from one or more of the programs listed above to one or more of those programs, or to Title I, Part A (84.010); MEP (84.011); Title I, Part D, Subpart 2 (84.013); Title III, Part A (84.365A); or Title V, Part B (84.358).

The allocation base for a program for a fiscal year equals that fiscal year’s original funding plus funds transferred into the program for that fiscal year. Funds may be transferred during a fiscal year’s carryover period.

Funds must be transferred to the receiving program’s allocation for the same fiscal year that the funds were allocated to the transferring program (Sections 5103(a) and (b) of ESEA (20 USC 7305b(a) and (b))).

H. Period of Performance (All Grantees)

ESEA program in the Supplement to which this section applies are MEP (84.011); Title III, Part A (84.365); and Title IV, Part A (84.424).

This section also applies to Adult Education (84.002); IDEA (84.027 and 84.173); CTE (84.048); and IDEA, Part C (84.181).

All ESEA and other programs as identified in the program documents except subrecipients under Career Technical Education (CTE) – LEAs and SEAs must obligate funds during the 27 months, extending from July 1 of the fiscal year for which the funds were appropriated through September 30 of the second following fiscal year. This maximum period includes a 15-month period of initial availability plus a 12-month period for carryover. For example, funds from the fiscal year 2019 appropriation initially became available on July 1, 2019; and may be obligated by the grantee and subgrantee through September 30, 2021 (Section 421(b) of GEPA (20 USC 1225(b)); 34 CFR sections 76.703 through 76.710). See note about invited waiver that pertains to this requirement under “Waivers and Expanded Flexibility.” CTE Program – In any academic year that a subrecipient does not obligate all of the amounts it is allocated under the Secondary and Postsecondary CTE programs for that year, it must return the unobligated amounts to the State to be reallocated under the Secondary and Postsecondary CTE programs, as applicable (Section 133(b) of the Carl D. Perkins Career and Technical Education Act of 2006 as amended by the Strengthening Career and Technical Education Act for the 21st Century Act (Perkins V) ((20 USC 2301 et seq., as amended by Pub. L. No. 115-224) (20 USC 2353(b))).

Consolidated Administrative Funds – Under those ESEA programs that allow for the consolidation of administrative funds, such funds must be obligated within the period of availability of the program that the funds came from. Because expenditures in a consolidated administrative fund are not accounted for by specific Federal programs, an SEA or LEA may use a first-in, first-out method for determining when funds were obligated, may attribute costs in proportion to the dollars provided, or may use another reasonable method.

Definition of Obligation – An obligation is not necessarily a liability in accordance with generally accepted accounting principles. When an obligation occurs (is made) depends on the type of property or services that the obligation is for (34 CFR section 76.707):

IF AN OBLIGATION IS FOR –	THE OBLIGATION IS MADE –
(a) Acquisition of real or personal property.	On the date on which the State or subgrantee makes a binding written commitment to acquire the property.
(b) Personal services by an employee of the State or subgrantee	When the services are performed.
(c) Personal services by a contractor who is not an employee of the State or subgrantee.	On the date on which the State or subgrantee makes a binding written commitment to obtain the services.

IF AN OBLIGATION IS FOR –	THE OBLIGATION IS MADE –
(d) Performance of work other than personal services.	On the date on which the State or subgrantee makes a binding written commitment to obtain the work.
(e) Public utility services.	When the State or subgrantee receives the services.
(f) Travel.	When the travel is taken.
(g) Rental of real or personal property.	When the State or subgrantee uses the property.
(h) A pre-award cost that was properly approved by the State under the cost principles	On the first day of the subgrant period.

The act of an SEA or other grantee awarding Federal funds to an LEA or other eligible entity within a State does not constitute an obligation for the purposes of this compliance requirement. An SEA or other grantee may not reallocate grant funds from one subrecipient to another after the period of availability ends.

If a grantee or subgrantee uses a different accounting system or accounting principles from one year to the next, it shall demonstrate that the system or principle was not improperly changed to avoid returning funds that were not timely obligated. A grantee or subgrantee may not make accounting adjustments after the period of availability ends in an attempt to offset audit disallowances. The disallowed costs must be refunded.

I. Procurement and Suspension and Debarment

Applicability of BABAA to ED Programs

A list of ED programs that are subject to BABAA is available at: [infrastructure-programs-list.pdf \(ed.gov\)](#). This list is subject to change resulting from the identification of new programs that will require BABAA compliance or resulting from reauthorizations of existing programs that will require compliance. However, the list becomes outdated each time an update is made so auditors are cautioned to document the date of the list they viewed to determine BABAA applicability.

As of December 5, 2022 (the date of the most current list at the time of this Compliance Supplement's publication), this section applies to CSP (84.282); IDEA, Part B (84.027); IDEA, Preschool (84.173); and IDEA, Part C (84.181) because Procurement is subject to audit in those program supplement sections.

ED implemented BABAA effective October 1, 2022, in accordance with its approved BABAA adjustment period waiver. The BABAA domestic content procurement preference requirement applies to new, non-competing continuation, and supplemental grants awarded on or after October 1, 2022, under ED's infrastructure programs. At ED, infrastructure is limited to only construction, remodeling, or broadband infrastructure activities. Projects considered under ED's Regulations as "minor remodeling" (34 CFR § 77.1(c)) are not considered infrastructure projects and are not subject to the BABAA Domestic Sourcing Requirements. Only those activities in each grant project related to *infrastructure* are covered. No other projects or costs associated with other grant activities are subject to the BABAA domestic sourcing requirements. The BABAA

domestic content procurement preference requirement does not apply retroactively to new, non-competing continuation (NCC), and supplemental grants awarded prior to October 1, 2022. See also related ED BABAA FAQ document referred to in the Availability of Other Program Information section above.

Waivers – BABAA

For a proposed construction, remodeling, or broadband infrastructure project, a grantee must submit a waiver request using the ***BABAA Waiver Request Form*** to ED before, during, or after it solicits bids for the project that is subject to the BABAA domestic sourcing requirements.

For information regarding the BABAA domestic sourcing waiver requirements and waiver request process, see the [U.S. Department of Education Domestic Sourcing Requirements and Grant Waiver Request Procedure](#) guidance document.

L. Reporting

1. Financial Reporting

Title I, Part A (84.010); MEP (84.011); 21st CCLC (84.287); Title III, Part A (84.365); Title II, Part A (84.367);

- a. *SF-270, Request for Advance or Reimbursement – Applicable (but not subject to audit if using the G5 System)*
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs – Not Applicable*
- c. *SF-425, Federal Financial Report – Not Applicable*
- d. *Form 270, Request for Title IV Reimbursement or Heightened Cash Monitoring 2 (HCM2) (OMB No. 1845-0089) – Applicable only to institutions placed on reimbursement payment method or Heightened Cash Monitoring 2 by ED.*

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Participation of Private School Children

ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); MEP (84.011); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424).

This section also applies to ESSER I and GEER I (84.425C and D), as well as ESF-SEA, ESF II-SEA, ESF-Governor, ESF II-Governor, and ARP-OA SEA (84.425A, H, and X, respectively).

Depending on how the SEA/LEA implements requirements for the provision of equitable participation of private school children, this requirement may be tested on a general or program-specific basis (as described in the Introduction, “Cross-Cutting Requirements”).

Compliance Requirements For programs funded under Title I, Part A (Assistance Listing 84.010), an LEA, after timely and meaningful consultation with private school officials, must provide equitable services to eligible private school children, their teachers, and their families. Eligible private school children are those who reside in a participating public school attendance area and have educational needs under Section 1115(c) of the ESEA (20 USC 6315(c)). The amount of funds an LEA makes available for equitable services under Title I, Part A must be equal to the proportion of funds generated by private school children from low-income families who reside in participating public school attendance areas. An LEA must determine the proportional share available for services for eligible private school children based on the total amount of Title I funds received prior to any expenditures or transfers of funds within the program, such as reservations for administration, parental involvement, and district-wide activities (20 USC 6320(a)(4)(A)). LEAs determine the proportional share by multiplying the proportion of children from low-income families who attend private schools and live in participating Title I attendance areas by the LEA’s total Title I allocation (including any funds transferred into Title I). For more information, see Title I, Part A of the ESEA: Providing Equitable Services to Eligible Private School Children, Teachers, and Families (October 7, 2019) (<https://oese.ed.gov/files/2020/07/equitable-services-guidance-100419.pdf>).

For programs under Title VIII of the ESEA (Assistance Listing 84.011, 84.365, 84.367, and 84.424), ESF-SEA I (Assistance Listing 84.425A), and ESF-Governor I (Assistance Listing 84.425H), an agency, consortium, or entity receiving financial assistance under an applicable program must provide eligible private school children and their teachers or other educational personnel with equitable services or other benefits under the program. Before an agency, consortium, or entity makes any decision that affects the opportunity of eligible private school children, teachers, and other educational personnel to participate, the agency, consortium, or entity must engage in timely and meaningful consultation with private school officials. Expenditures for services and benefits to eligible private school children and their teachers and other educational personnel must be equal on a per-pupil basis to the expenditures for participating public school children

and their teachers and other educational personnel, taking into account the number and educational needs of the children, teachers and other educational personnel to be served (Section 8501 of ESEA (20 USC 7881); 34 CFR sections 299.6 through 299.9).

For programs under ESSER I and GEER I (Assistance Listing 84.425C and D), an LEA that receives funds under one or both of those programs must provide equitable services in the same manner as provided under section 1117 of Title I, Part A of the ESEA (20 USC 6320) (Assistance Listing 84.010) to students and teachers in private schools as determined in consultation with private school officials (section 18005(a) of the CARES Act). To meet this requirement, an LEA must determine the proportional share of ESSER I or GEER I funds available for equitable services in accordance with section 1117(a)(4)(A) of the ESEA (20 USC 6320(a)(4)(A)). Consistent with the guidance referenced below, under ESSER I and GEER I, the LEA in which a private school is located is responsible for providing equitable services to students and teachers in the school. With respect to the provision of services, in general all students and teachers in a private school are eligible to receive equitable services under ESSER I and GEER I. However, an LEA may limit eligibility to students who are low-achieving and reside in a Title I public school attendance area in the LEA consistent with the Title I, Part A equitable services requirements in section 1117 of the ESEA. In addition, if a Governor (under GEER I) or an SEA (through the SEA reserve fund under ESSER I) targets funds for a specific purpose or population of public school students, an LEA may similarly target services for private school students. For more information, see questions 4 and 7–11 in Providing Equitable Services to Students and Teachers in Non-Public Schools under the CARES Act Programs (Oct. 9, 2020) (<https://oese.ed.gov/files/2020/10/Providing-Equitable-Services-under-the-CARES-Act-Programs-Update-10-9-2020.pdf>).

An LEA that receives funds under ESSER II or GEER II is not required to provide equitable services to students and teachers in private schools.

For programs under ESF-SEA, ESF II-SEA, ESF-Governor, ESF II-Governor, and ARP-OA SEA, SEAs and governors will ensure that equitable services, as determined through timely and meaningful consultation with non-public school officials, will be provided to students and teachers in non-public elementary and secondary schools in the same manner as provided under section 8501 of the ESEA.

The control of funds used to provide equitable services to eligible private school students, teachers and other educational personnel, and families, and title to materials, equipment, and property purchased with those funds must be in a public agency and the public agency must administer the funds, materials, equipment, and property. The provision of equitable services must be by employees of a public agency or through a contract by the public agency with an individual, association, agency, or organization that is independent of the private school. The contract must be under the control of the public agency (Sections 1117(d), and 8501(d) of ESEA (20 USC 6320(d), and 7881(d); section 18005(b) of the CARES Act; 34 CFR sections 76.661, 200.64(b)(3), 200.67, and 299.9).

These compliance requirements also apply to transfers from *Title II, Part A (84.367)* and *Title IV, Part A (84.424)* (Section 5103(e)(2) of ESEA (20 USC 7305b(e)(2)), as provided in III.A.3, “Activities Allowed or Unallowed – Transferability”).

Audit Objectives Determine whether (1) an LEA, SEA, or other agency receiving ESEA funds, an LEA receiving ESSER I or GEER I funds (84.425C and D), and an OA SEA or Governor receiving ESF-SEA, ESF II-SEA, ESF-Governor, ESF II-Governor, and ARP-OA SEA (84.425A, H, and X, respectively) has conducted timely consultation with private school officials to determine the kind of educational services to provide to eligible private school children, (2) the planned services were provided, and (3) the required amount was used for private school children.

Suggested Audit Procedures

- a. Verify, by reviewing minutes of meetings and other appropriate documents, that the agency, consortium, or entity conducted timely consultation with private school officials in making its determinations and set aside the required amount for private school children.
- b. Review program expenditure and other records to verify that educational services that were planned were provided.
- c. For Title I, Part A, verify that the amount of funds available for equitable services in an LEA was determined by multiplying the proportion of private school children from low-income families residing in participating public school attendance areas by the LEA’s total Title I, Part A allocation.
- d. If an agency, consortium, or entity provides services to eligible private school students under an arrangement with a third-party provider, verify that the agency, consortium, or entity retains proper administration and control by having a written contract that:
 - (1) Describes the services to be provided; and
 - (2) Provides that the agency, consortium, or entity retains ownership of materials, equipment, and property purchased with Federal funds.
- e. For programs other than Title I, Part A, ESSER I, and GEER I, verify that expenditures are equal on a per-pupil basis for public and private school students, teachers, and other educational personnel, taking into consideration their numbers and needs as required by 34 CFR section 299.7. Please note that all students and teachers in a non-public school are eligible to receive equitable services under the CARES Act programs, unless a Governor (under the GEER Fund) or an SEA (through the SEA reserve under the ESSER Fund) targets funds for a specific purpose or population of public and non-public school students. If a Governor or SEA does this, then equitable services would also be limited.

2. Access to Federal Funds for New or Significantly Expanded Charter Schools

ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424).

As described in the Introduction, “Cross-Cutting Requirements,” this requirement is a program-specific cross-cutting eligibility requirement that needs to be tested separately for each covered program in the Supplement.

Note: This requirement only applies with respect to funds allocated to new, or significantly expanded, charter schools under a covered program in a State that has charter schools. A *covered program* means an elementary or secondary education program administered by ED under which the secretary allocates funds to States on a formula basis, except that the term does not include a program or portion of a program under which an SEA awards subgrants on a discretionary, noncompetitive basis. *Significant expansion of enrollment* means a substantial increase in the number of students attending a charter school due to a significant event that is unlikely to occur on a regular basis, such as the additional of one or more grades or educational programs in major curriculum areas. The term also includes any other expansion of enrollment that the SEA determines to be significant. 34 CFR section 76.787. *Charter school* has the same meaning as provided in Title IV, Part C, of the ESEA (Section 4310(2) of ESEA (20 USC 7221i(2))). With respect to an existing charter school LEA that has not significantly expanded its enrollment, an SEA must determine the school’s eligibility and allocate Federal funds to the school in a manner consistent with applicable Federal statutes and regulations under each covered program.

If a State considers a charter school to be an LEA under a covered program, this requirement applies to the SEA or other State agency responsible for allocating funds under that program—either by formula or through a competition—to LEAs. If a State considers a charter school to be a public school within an LEA under a covered program, this requirement applies to the LEA. The requirements in this Supplement address an SEA’s responsibilities with respect to eligible charter school LEAs. An LEA that is responsible for providing funds under a covered program to eligible charter schools must comply with these requirements on the same basis as an SEA.

Compliance Requirements An SEA must ensure that a charter school LEA that opens for the first time or significantly expands its enrollment receives the funds under each covered program for which it is eligible.

Except as noted below, if a charter school LEA opens or expands by November 1, the SEA must allocate to the school the funds for which it is eligible no later than five months after the school first opens or significantly expands its enrollment; if a charter school LEA opens or significantly expands after November 1 but before February 1, an SEA must allocate to the school a pro rata portion of the funds for which the school is eligible on or before the date the SEA makes allocations to other LEAs under that program for the succeeding academic year; if a charter school LEA opens or expands

after February 1, the SEA may, but is not required to, allocate to the school a pro rata portion of the funds for which the school is eligible.

An SEA must determine a new or expanding charter school LEA's eligibility based on actual enrollment or other eligibility data available on or after the date the charter school LEA opens or significantly expands. An SEA may not deny funding to a new or expanding charter school LEA due to the lack of prior-year data, even if eligibility and allocation amounts for other LEAs are based on prior-year data. An SEA may allocate funds to, or reserve funds for, an eligible charter school LEA based on reasonable estimates of projected enrollment at the charter school LEA. If an SEA allocates more or fewer funds to a charter school LEA than the amount for which the charter school LEA is eligible, based on actual enrollment or eligibility data, the SEA must make appropriate adjustments to the amount of funds allocated to the charter school LEA as well as to other LEAs under a covered program on or before the date the SEA allocates funds to LEAs for the succeeding academic year. For purposes of implementing the hold harmless protections in sections 1122(c) and 1125A(f)(3) of Title, Part A of ESEA for a new or expanding charter school LEA, an SEA must calculate a hold-harmless base for the prior year that, as applicable, reflects the new or expanding enrollment of the charter school LEA (Section 4306(c) of ESEA (20 USC 7221e(c))). For more detail, see pages 4–7 of the ESSA Fiscal Changes & Equitable Services guidance (November 2016) ([ESSA Non Regulatory Guidance Fiscal and Equitable Service 11-21-2016 \(PDF\) \(ed.gov\)](#)).

At least 120 days before the date a charter school LEA is scheduled to open or significantly expand its enrollment, the charter school LEA or its authorized public chartering agency must provide the SEA with written notice of that date. Upon receiving such notice, an SEA must provide the charter school LEA with timely and meaningful information about each covered program in which the charter school LEA may be eligible to participate, including notice of any upcoming competitions under the program. An SEA is not required to make allocations within five months of the date a charter school LEA opens for the first time or significantly expands if the charter school LEA, or its charter authorizer, fails to provide to the SEA proper written notice of the school's opening or expansion.

For a covered program in which an SEA awards subgrants on a competitive basis, the SEA must provide an eligible charter school LEA that is scheduled to open on or before the closing date of any competition a full and fair opportunity to apply to participate in the program. However, the SEA is not required to delay the competitive process in order to allow a charter school LEA that has not yet opened or expanded to compete (Section 4306 of ESEA (20 USC 7221e); 34 CFR sections 76.785 through 76.799).

Audit Objectives (SEA/LEA, depending on which entity is responsible for funding charter schools) Determine whether new or significantly expanding charter schools received the amount of Federal formula funds for which they were eligible in a timely manner.

Suggested Audit Procedures (SEA/LEA, depending on which entity is responsible for funding charter schools)

- a. Determine if the entity was responsible for providing Federal formula funds under the applicable covered program to any charter school LEAs/charter schools that opened for the first time or significantly expanded enrollment on or before November 1 of the academic year.
- b. Determine if the entity was responsible for providing Federal formula funds under the applicable covered program to any charter school LEAs/charter schools that opened for the first time or significantly expanded enrollment between November 1 and February 1 of the academic year.
- c. Review the entity's procedures for allocating Federal formula funds under the applicable covered program to determine whether eligibility to participate in the program was based on enrollment or eligibility data from a prior year. If prior-year data were used for allocations, determine whether the entity properly based the new or expanding charter school LEA's/charter school's eligibility and allocation amount on actual eligibility or enrollment data for the year in which the school opened or expanded.
- d. Review documentation to identify the opening or expansion date for each eligible charter school LEA/charter school that opened or significantly expanded its enrollment on or before November 1 of the academic year. Determine whether the charter school LEA/charter school was given access to all of the funds for which it was eligible, in the proper amount, within five months of the opening or expansion date (provided that SEA or LEA notification, data submission, and application requirements were met).
- e. Review documentation to identify the opening or expansion date for each eligible charter school LEA/charter school that opened or significantly expanded its enrollment between November 1 and February 1 of the academic year. Determine whether the charter school LEA/charter school was given access to the pro rata portion of the funds for which the school was eligible, in the proper amount, on or before the date the SEA or LEA made allocations to other LEAs/public schools under the program for the succeeding academic year (provided that SEA or LEA notification, data submission, and application requirements were met).
- f. Review documentation to determine whether the SEA or LEA made necessary adjustments to account for over- or under-allocations once actual eligibility and enrollment data became available.
- g. For Title I, Part A, review documentation to determine whether the SEA applied section 4306(c) of the ESEA to calculate a hold-harmless base for the prior year that reflects the new or significantly expanded enrollment of the charter school LEA.

3. Oversight and Monitoring Responsibilities with Respect to Charter Schools with relationships with Charter Management Organizations (SEAs/LEAs)

ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424).

As described in the Introduction, “Cross-Cutting Requirements,” this requirement is a program-specific cross-cutting eligibility requirement that needs to be tested separately for each covered program in the Supplement.

Note: As stated earlier, in recent years, the Office of Inspector General in ED has investigated a number of significant criminal cases related to the risk of misuse of Federal funds and the lack of accountability of Federal funds in public charter schools. Auditors should be aware that, unless an applicable program statute provides otherwise, public charter schools and charter school LEAs are subject to the requirements in this cross-cutting section to the same extent as other public schools and LEAs. Auditors also should note that, depending upon State law, a public charter school may be its own LEA or a school that is part of a traditional LEA.

Compliance Requirements As grantees, SEAs/LEAs are responsible for overseeing and monitoring subrecipients, including charter schools with relationships with Charter Management Organizations (CMOs). The SEA/LEA must: (1) evaluate each subrecipient’s risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining appropriate subrecipient monitoring (2 CFR section 200.332(b)); and (2) monitor the activities of the subrecipient as necessary to ensure that the subaward is used for authorized purposes, in compliance with Federal statutes, regulations, and the terms and conditions of the subaward; and that subaward performance goals are achieved (2 CFR section 200.332(d)).

Charter schools with relationships with CMOs that receive Federal grant funds must comply with statutes authorizing the applicable grant program, regulations, the terms and conditions of their grant awards, and relevant department-issued guidance. Additionally, under Title 2 of the Code of Federal Regulations Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Grant Guidance), non-Federal entities that receive Federal grants: (1) must establish and maintain effective internal controls over those funds and (2) should have internal controls that comply with the US Government Accountability Office (GAO) “Standards for Internal Control in the Federal Government” (Green Book), issued in November 1999 and updated in September 2014, or the “Internal Control – Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 1992 and updated in May 2013. The Green Book and the COSO Internal Control – Integrated Framework (COSO framework) provide specific requirements for assessing and reporting on controls in the Federal government.

Audit Objectives (SEA/LEA, depending on which entity is responsible for the oversight and monitoring of charter schools with relationships with CMOs)

Determine whether the SEA/LEA is fulfilling its oversight and monitoring responsibilities with respect to charter schools with relationships with CMOs and whether the SEA/LEA has effective internal controls to mitigate identified risks.

Suggested Audit Procedures (SEA/LEA, depending on which entity is responsible for oversight and monitoring of charter schools with relationships with CMOs)

- a. Determine if the entity has subrecipient monitoring policies and procedures that include a review of charter schools with relationships with CMOs, including procedures to assess the risk posed by conflicts of interest, related party transactions, and insufficient segregation of duties.
- b. Determine whether the entity’s subrecipient monitoring policies and procedures with regard to charter schools with relationships with CMOs have been implemented.
- c. Review documentation of subrecipient monitoring of charter schools with relationships with CMOs, including review of monitoring reports and follow-up activities to track the correction of identified noncompliance, such as completion of corrective action plans.
- d. Determine whether the entity has internal controls designed to provide reasonable assurance that charter schools with relationships with CMOs have effective controls to mitigate financial risks, provide for accountability over Federal funds, and mitigate performance risks.

IV. OTHER INFORMATION

1. Consolidation of Administrative Funds (SEAs and LEAs)

ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); MEP (84.011); CSP (84.282); 21st CCLC (84.287); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424).

This section also applies to ESSER, GEER, and EANS (84.425C, D, R, U, and V).

State and local administrative funds that are consolidated (as described in III.A.1, “Activities Allowed or Unallowed – Consolidation of Administrative Funds (SEAs and LEAs)”) should be included in the audit universe and the total expenditures of the programs from which they originated for purposes of (1) determining Type A programs and (2) completing the Schedule of Expenditures of Federal Awards (SEFA). A footnote showing, by program, amounts of administrative funds consolidated is encouraged.

2. Schoolwide Programs (LEAs)

ESEA programs in this Supplement to which this section applies are Title I, Part A (84.010); MEP (84.011); Title III, Part A (84.365); Title II, Part A (84.367); and Title IV, Part A (84.424).

This section also applies to IDEA (84.027 and 84.173) and CTE (84.048).

Since schoolwide programs are not separate Federal programs, as defined in 2 CFR section 200.42, expenditures of Federal funds consolidated in schoolwide programs should be included in the audit universe and the total expenditures of the programs from which they originated for purposes of (1) determining Type A programs and (2) completing the SEFA. A footnote showing, by program, amounts consolidated in schoolwide programs is encouraged.

3. *Transferability (SEAs and LEAs)*

ESEA programs in this Supplement to which this section applies are Title II, Part A (84.367) and Title IV, Part A (84.424).

Expenditures of funds transferred from one program to another (as described in III.A.3, “Activities Allowed or Unallowed – Transferability (SEAs and LEAs)”) should be included in the audit universe and total expenditures of the receiving program for purposes of (1) determining Type A programs, and (2) completing the SEFA. A footnote showing amounts transferred between programs is encouraged.

4. *Prima Facie Case Requirement for Audit Findings*

Section 452(a)(2) of the General Education Provisions Act (20 USC 1234a(a)(2)) requires that ED officials establish a prima facie case when they seek recoveries of unallowable costs charged to ED programs. When the preliminary ED decision to seek recovery is based on an audit under 2 CFR Part 200, Subpart F, upon request, auditors will need to provide ED program officials audit documentation. For this purpose, audit documentation (part of which is the auditor’s working papers) includes information the auditor is required to report and document that is not already included in the reporting package.

The requirement to establish a prima facie case for the recovery of funds applies to all programs administered by ED, with the exception of Impact Aid (Assistance Listing 84.041) and programs under the Higher Education Act (i.e., the Family Federal Education Loan Program (Assistance Listing 84.032) and the other ED programs covered in the Student Financial Assistance Cluster in Part 5 of the Supplement).

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.002 ADULT EDUCATION – BASIC GRANTS TO STATES

I. PROGRAM OBJECTIVES

The Adult Education and Family Literacy State Grant program provides grants to eligible agencies to provide adult education and literacy services. These grants help adults (1) become literate and obtain the knowledge and skills necessary for employment and economic self-sufficiency; (2) obtain the education and skills that are necessary to become full partners in the educational development of their children and lead to sustainable improvements in the economic opportunities for their family; and (3) attain a secondary school diploma and transition to postsecondary education and training, including through career pathways. These grants also assist immigrants and other individuals who are English language learners in improving their reading, writing, speaking, and comprehension skills in English and mathematics and in acquiring an understanding of the American system of government, individual freedom, and the responsibilities of citizenship.

II. PROGRAM PROCEDURES

To receive funds, states must submit to the secretaries of Labor and Education, and have approved, a four-year unified or combined state plan (state plan) that covers the program, as well as certain other core programs required to be included in the plan under the Workforce Innovation and Opportunity Act (WIOA) (Pub. L. No. 113-128). State plans must be modified at the end of the first two-year period and may be revised at other times when substantial changes in conditions occur. Funds are awarded to the state eligible agency each year in accordance with a statutory formula. In turn, the state eligible agency makes awards to eligible providers on a competitive basis, using the same competitive process for all eligible providers, and ensures that all eligible providers have direct and equitable access to apply and compete for funds. Local activities, implemented by eligible providers, include services or instruction in one or more of the following categories: adult education, workplace adult education and literacy activities, family literacy activities, English language acquisition activities, integrated English literacy and civics education, workforce preparation activities, and integrated education and training.

Eligible providers are organizations with demonstrated effectiveness in providing adult education and literacy activities and may include a local educational agency; a community-based organization or faith-based organization; a volunteer literacy organization; an institution of higher education; a public or private nonprofit agency; a library; a public housing authority; a nonprofit institution that has the ability to provide adult education and literacy services to eligible individuals; a consortium or coalition of the agencies, organizations, institutions, libraries, or authorities described above; and a partnership between an employer and an entity listed above.

Source of Governing Requirements

The program is authorized by the Adult Education and Family Literacy Act (AEFLA), Title II of WIOA (Pub. L. No. 113-128 (29 USC 3271 et seq.)).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	Y	Y	N	N	N	Y	N

A. Activities Allowed or Unallowed

The state eligible agency shall require that each eligible provider receiving a grant or contract establish or operate one or more programs that provide services or instruction in one or more of the following categories: adult education, workplace adult education and literacy activities, English language acquisition activities, integrated English literacy and civics education, workforce preparation activities, and integrated education and training (29 USC 3272(2) and 3321(b); 34 CFR section 463.30).

1. *Activities Allowed*

a. *State-Level Activities-* State eligible agencies must use AEFLA funds for the following:

- (1) Subgrants to eligible providers (29 USC 3302(a)(1) and 3321(a)).
- (2) State administrative costs, including the development, and implementation of the state plan; consultation with other appropriate agencies, groups, and individuals in the development

and implementation of AEFLA activities; and coordination and non-duplication with related federal and state programs (29 USC 3301 and 3302(a)(3)).

- (3) State leadership activities including the following required activities: (1) alignment of adult education and literacy activities with other WIOA core programs to implement the strategy identified in the state plan; (2) high-quality professional development programs; (3) technical assistance to eligible providers; and (4) monitoring and evaluation of adult education and literacy activities (29 USC 3302(a)(2) and 3303(a)(1)).

- b.** *Subrecipient Activities*- Subrecipient activities are described in the eligible provider’s approved application. Eligible providers may also use funds for administrative costs (see III.G.3.b, “Matching, Level of Effort, Earmarking – Earmarking,” for a limitation) (29 USC 3272(2), 3321(b), and 3323(a)(2)); 34 CFR sections 463.25, 463.26, and 463.30).

B. Allowable Costs/Cost Principles

See Part 4, 84.000 ED Cross-Cutting Section.

C. Cash Management

See Part 4, 84.000 ED Cross-Cutting Section.

E. Eligibility

1. Eligibility for Individuals

Eligible individuals are individuals who are at least 16 years of age, who are not enrolled or required to be enrolled in secondary school under state law, and who are basic skills deficient, do not have a secondary school diploma or its recognized equivalent and have not achieved an equivalent level of education, or are English language learners (29 USC 3272(4)).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

G. Matching, Level of Effort, Earmarking

1. Matching

- a. Each state eligible agency providing adult education and literacy services shall provide a nonfederal contribution of at least 25 percent of the total amount of funds expended for adult education and literacy activities in the state (29 USC 3302(b)(1)(B)).
- b. A state eligible agency serving an outlying area shall provide a nonfederal contribution equal to 12 percent of the total amount of funds for adult education and literacy activities in the outlying area, unless ED allows a smaller nonfederal contribution (29 USC 3302(b)(1)(A)).
- c. A state eligible agency's nonfederal contribution may be provided in cash or in-kind, fairly evaluated, and shall include only nonfederal funds that are used for adult education and literacy activities in a manner that is consistent with the purpose of AEFLA (29 USC 3302(b)(2)).

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

A state eligible agency may receive funds for any fiscal year if ED finds that the fiscal effort per student or the aggregate expenditures of such eligible agency for adult education and literacy activities, in the second preceding fiscal year, was not less than 90 percent of the fiscal effort per student or the aggregate expenditures of the state eligible agency for adult education and literacy activities, in the third preceding fiscal year (29 USC 3331(b)).

2.2 Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

- a. *State Eligible Agency* – The following earmarking requirements are for each yearly grant award and must be met within the period of its availability (generally 27 months) (34 CFR sections 76.703 through 76.710):
 - (1) Funds used for grants and contracts for eligible providers shall not be less than 82.5 percent of the state eligible agency's grant funds (29 USC 3302(a)(1)).
 - (2) Funds used for corrections education and education for other institutionalized individuals shall not be more than 20 percent of

the 82.5 percent available for grants and contracts for eligible providers (29 USC 3302(a)(1) and 3305); 34 CFR Part 463, Subpart F).

- (3) Funds used for state leadership activities shall not exceed 12.5 percent of the state eligible agency's grant funds (29 USC 3302(a)(2) and 3303)).
 - (4) Funds used for necessary and reasonable administrative expenses of the state eligible agency shall not be more than 5 percent of the grant funds, or \$85,000, whichever is greater (29 USC 3302(a)(3)).
- b. *Subrecipients* – Eligible providers must use at least 95 percent of the funds received from the state eligible agency to carry out adult education and literacy activities unless a lower limit has been agreed to by the state eligible agency. Eligible providers may use up to 5 percent of their funds for noninstructional costs, including planning, administration, professional development, providing services in alignment with the local workforce development plan required under WIOA, and fulfilling certain one-stop partner responsibilities required by Section 121(b)(1)(A) of WIOA (this may include using funds to pay for infrastructure costs of one-stop centers in accordance with Section 121(b)(1)(A) of WIOA). In cases when the 5 percent limit is too restrictive, the eligible provider must negotiate with the state eligible agency to determine the adequate level of funds for noninstructional purposes (29 USC 3323; 34 CFR sections 463.25 and 463.26).

H. Period of Performance

See Part 4, 84.000 ED Cross-Cutting Section.

M. Subrecipient Monitoring

See 2 CFR 200.331 Requirements for Pass-through Entities.

IV. OTHER INFORMATION

Certain compliance requirements that apply to multiple Department of Education (ED) programs are discussed once in the ED Cross-Cutting Section of this supplement (page 4-84.000-1) rather than being repeated in each individual program. Where applicable, this section references to the ED Cross-Cutting Section for these requirements.

DEPARTMENT OF EDUCATION**ASSISTANCE LISTING 84.010A TITLE I GRANTS TO LOCAL EDUCATIONAL AGENCIES (TITLE I, PART A OF THE ESEA)****I. PROGRAM OBJECTIVES**

The objective of this program is to improve the teaching and learning of children who are at risk of not meeting challenging state academic standards and who reside in areas with high concentrations of children from low-income families.

II. PROGRAM PROCEDURES

The US Department of Education (ED) provides funds under Title I, Part A (hereafter Part A) of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA) (Pub. L. No. 114-95), through each state educational agency (SEA) to local educational agencies (LEAs) through a statutory formula based primarily on the number of children ages 5 through 17 from low-income families. This number is augmented by annually collected counts of children ages 5 through 17 in foster homes, locally operated institutions for neglected or delinquent children, and families above poverty that receive assistance under Temporary Assistance for Needy Families (TANF) (Assistance Listing 93.558), adjusted to account for the cost of education in each state. To receive funds, an SEA must submit to ED for approval either (1) an individual state plan as provided in Section 1111 of the ESEA (20 USC 6311), or (2) a consolidated state plan that includes Part A, in accordance with Section 8302 of the ESEA (20 USC 7842). Each SEA included Part A in a consolidated state plan. This plan, after approval by ED, remains in effect for the duration of the state's participation in Part A under the current ESEA authorization. The plan must be updated to reflect substantive changes.

In general, to receive Part A funds, LEAs must have on file with the SEA an approved plan that includes the descriptions required under Section 1112(b) of the ESEA (20 USC 6312(b)). In lieu of an individual program plan, however, an LEA may include Part A as part of a consolidated application submitted to the SEA under Section 8305 of the ESEA (20 USC 7845).

LEAs allocate Part A funds to eligible school attendance areas based on the number of children from low-income families residing within the attendance area. A school at or above 40 percent poverty or a school that receives a waiver from the SEA may use its Part A funds, along with other federal, state, and local funds, to operate a schoolwide program to upgrade the instructional program in the whole school (20 USC 6314(a)). Otherwise, a school operates a targeted assistance program in which the school identifies students who are failing, or most at risk of failing, to meet the state's challenging state academic achievement standards and who have the greatest need for assistance. The school then designs, in consultation with parents, staff, and the LEA, an instructional program to meet the needs of those students (20 USC 6315).

Source of Governing Requirements

This program is authorized by Title I, Part A of the ESEA, as amended by the ESSA (20 USC 6301 through 6339 and 6571 through 6576)). Program regulations are found at 34 CFR Part 200. The regulations in 34 CFR parts 76, 77, and 299 apply to this program.

Availability of Other Program Information

A number of documents posted on ED's website contain information pertinent to the Part A requirements in this Compliance Supplement. They are:

1. Title I, Part A of the ESEA: Providing Equitable Services to Eligible Private School Children, Teachers, and Families (October 7, 2019)

- As noted in Section IV, auditors should ascertain from the audited SEAs and LEAs whether the SEA or the LEA or its schools are operating under any approved waivers.
14. Frequently Asked Question About Waivers Related to the Title I, Part A Carryover Limitation Under the ESEA Due to COVID-19
<https://oese.ed.gov/files/2021/08/FAQs-on-Title-I-carryover-waivers-8-2021.pdf>

Additional information is provided in the “Availability of Other Program Information” part of Part 4, 84.000 ED Cross-Cutting Section.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance

requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A. Activities Allowed or Unallowed

1. *Activities Allowed*

See also Part 4, 84.000 ED Cross-Cutting Section.

- a. *SEAs*- SEAs must use regular federal fiscal year (FY) 2022 funds to provide subgrants to LEAs through their FY 2022 LEA allocation process. SEAs may reserve funds for state administration and Direct Student Services and must reserve funds for school improvement activities in accordance with the statutory requirements (Title I, Sections 1003, 1003A, and 1004 of ESEA (20 USC 6303, 6303b (if applicable), and 6304). (See also III.G.3.a, “Matching, Level of Effort, Earmarking – Earmarking,” below, and ED Cross-Cutting Section, 84.000, III.G.3.a.)

B. Allowable Costs/Cost Principles

See Part 4, 84.000 ED Cross-Cutting Section.

E. Eligibility

1. **Eligibility for Individuals**

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

a. *School Attendance Areas or Schools (LEAs with either schoolwide programs or targeted assistance programs)*

An LEA must determine which school attendance areas are eligible to participate in Part A. A school attendance area is generally eligible to participate if the percentage of children from low-income families is at least as high as the percentage of children from low-income families in the LEA as a whole or at least 35 percent. An LEA may also designate and serve a school in an ineligible attendance area if the percentage of children from low-income families enrolled in that school is equal to or greater than the percentage of such children in a participating school attendance area. When determining eligibility, an LEA must select a poverty measure from among the following data sources: (1) the number of children ages 5–17 in poverty counted in the most recent census; (2) the number of children eligible for free and reduced price lunches; (3) the number of children in families receiving TANF; (4) the number of children eligible to receive Medicaid assistance; or (5) a composite of these data sources. Except as follows, the LEA must use that measure consistently across the district to rank all its school attendance areas according to their percentage of poverty. For measuring the number of children from low-income families in a secondary school, an LEA may use the same measure it uses for elementary schools or apply the average percentage of children from low-income families in the elementary schools that feed into the secondary school.

An LEA must serve eligible schools or attendance areas in rank order according to their percentage of poverty. An LEA must serve those areas or schools above 75 percent poverty, including any middle or high schools, before it serves any with a poverty-percentage at or below 75 percent. After an LEA has served all areas and schools with a poverty rate above 75 percent or, at its discretion, high schools at or above 50 percent, the LEA may serve lower-poverty areas and schools either by continuing with the district-wide ranking or by ranking its schools at or below 75 percent poverty according to grade-span grouping (e.g., K–6, 7–9, 10–12). If an LEA ranks by grade span, the LEA may use the district-wide poverty average or the poverty average for the respective grade-span grouping. An LEA may serve, for one additional year, an attendance area that is not currently eligible but that was eligible and served in the preceding year.

An LEA may elect not to serve an eligible area or school that has a higher percentage of children from low-income families only if (1) the school meets the Part A comparability requirements; (2) the school is receiving supplemental state or local funds that are spent according to the requirements in sections 1114 or 1115 of the ESEA; and (3) the supplemental state and local funds expended in the area or school equal or

exceed the amount that would be provided under Part A. An LEA with an enrollment of fewer than 1,000 students or with only one school per grade span is not required to rank its school attendance areas (Title I, Section 1113(a)-(b) of ESEA (20 USC 6313(a)-(b)); 34 CFR section 200.78(a)).

b. *Allocating Funds to Eligible School Attendance Areas and Schools (LEAs with either schoolwide programs or targeted assistance programs)*

From its total Part A allocation and before reserving any funds for allowable activities or allocating Part A funds to participating public school attendance areas or schools, an LEA must reserve, to provide equitable services to eligible private school children, the proportional share generated by children from low-income families who reside in participating public school attendance areas and who attend private schools. For the purpose of determining the proportional share (equitable services section of III.N., “Special Tests and Provisions”), the LEA may use the same poverty data, if available, as the LEA uses to count public school children. If the same data are not available, the LEA may use comparable data from a survey of families of private school children, allowing such survey results to be extrapolated from a representative sample if complete actual data are unavailable. An LEA may also correlate sources of data or apply the low-income percentage of each participating public school attendance area to the number of private school children who reside in that school attendance area. If an LEA selects a public school to participate on the basis of enrollment, rather than because it serves an eligible school attendance area, the LEA must, in consultation with private school officials, determine an equitable way to count private school children from low-income families in order to calculate the proportional share of Part A funds available to serve private school children. An LEA may count private school children from low-income families every year or every two years.

After reserving Part A funds to provide equitable services to eligible private school students, homeless children, children in local institutions for neglected children, and any other allowable reservations, an LEA must allocate Part A funds to each participating school attendance area or school, in rank order, on the basis of the number of public school children from low-income families residing in the area or attending the school.

If an LEA serves any attendance area with less than a 35 percent poverty rate, the LEA must allocate to all its participating areas an amount per child from a low-income family that equals at least 125 percent of the LEA’s Part A allocation per child from a low-income family. (An LEA’s allocation per child from a low-income family is the total LEA allocation under subpart 2 of Part A divided by the number of children from low-income families in the LEA according to the poverty measure selected by the LEA to identify eligible school attendance areas. The LEA then

multiplies this per-child amount by 125 percent.) If an LEA serves only areas with a poverty rate greater than 35 percent, the LEA must allocate funds, in rank order, on the basis of the total number of public-school children from low-income families in each area or school but is not required to allocate a per-pupil amount of at least 125 percent. If an LEA serves areas or schools below 75 percent poverty by grade-span groupings, the LEA may allocate different amounts per child from a low-income family for different grade-span groupings as long as those amounts do not exceed the amount per child from a low-income family allocated to any area or school above 75 percent poverty. Amounts per child from a low-income family within grade spans may also vary as long as the LEA allocates higher amounts per child from a low-income family to higher-poverty areas or schools within the grade span than it allocates to lower-poverty areas or schools.

(Title I, Section 1113(c) of the ESEA (20 USC 6313(c)) and Title I, Section 1117(a)(4) of ESEA (20 USC 6320(a)(4)); 34 CFR sections 200.64(a)(2)-(3), 200.77 and 200.78)

c. *Serving Homeless Children in Participating and Nonparticipating Schools and Children in Local Institutions for Neglected or Delinquent Children*

- (1) Before allocating Part A funds to school attendance areas and schools and based on its total allocation, an LEA must reserve funds to provide services comparable to those provided to children in participating school attendance areas and schools to serve:
 - (a) Children in local institutions for neglected children; and
 - (b) Homeless children and youths, including providing educationally related support services to children in shelters and other locations where homeless children may live and services not ordinarily provided to other children served by Part A.
- (2) An LEA may reserve funds to provide services comparable to those provided to children in participating school attendance areas and schools to serve:
 - (a) Children in local institutions for delinquent children; and
 - (b) Neglected and delinquent children in community day school programs.

(Title I, Section 1113(c) of ESEA (20 USC 6313(c)); 34 CFR section 200.77)

3. Eligibility for Subrecipients

ED allocates funds by formula for basic grants, concentration grants, targeted grants, and education finance incentive grants, through SEAs, to each eligible LEA for which the Bureau of the Census has provided data on the number of children from low-income families residing in the school attendance areas of the LEA (the “Census list”). If there is an LEA in a state that is not on the Census list (see III.G.3.a, “Matching, Level of Effort, Earmarking - Earmarking,” below), the SEA must determine that the LEA is eligible under each formula as follows:

- a. Basic grants – an eligible LEA must have at least 10 formula children (i.e., the Census estimate of low-income children, children in neglected facilities and in publicly supported foster homes, and children from families that receive an annual payment from the TANF program (Assistance Listing 93.558) that exceeds the federal poverty level) and the number of formula children must exceed 2 percent of the LEA’s total population of children ages 5 through 17.
- b. Concentration grants – an eligible LEA must be eligible for basic grants and the number of formula children must exceed 6,500 children or 15 percent of the LEA’s total population of children ages 5 through 17 population.
- c. Targeted grants – an eligible LEA must have at least 10 formula children and the number of those children must equal or exceed 5 percent of the LEA’s total population of children ages 5 through 17.
- d. Education finance incentive grants – an eligible LEA must have at least 10 formula children and the number of those children must equal or exceed 5 percent of the LEA’s total population of children ages 5 through 17.

(Title I, Sections 1124-1125A of ESEA (20 USC 6333-6337; 34 CFR section 200.71)

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

See Part 4, 84.000 ED Cross-Cutting Section.

2.2 Level of Effort – *Supplement Not Supplant*

Compliance Requirements An LEA may use Part A funds only to supplement the funds that would, in the absence of the Part A funds, be made available from state and local sources for the education of students participating in a Part A program. In no case may an LEA use Part A funds to supplant funds from state and local sources (Section 1118(b)(1) of ESEA (20 USC 6321(b)(1))). An LEA may not be required to (1) identify that an individual cost or service supported with Part A funds is supplemental; or (2) provide services through a particular instructional method or in a particular instructional setting (Section 1118(b)(3) of ESEA (20 USC 6321(b)(3))).

To demonstrate compliance, an LEA must demonstrate that it has a methodology (e.g., through written procedures) and uses it to allocate state and local funds to each Title I school and ensures that the school receives all of the state and local funds it would otherwise receive if it were not receiving Part A funds (i.e., the LEA's methodology may not take into account a school's Title I status) (Section 1118(b)(2) (20 USC 6321(b)(2))). An LEA may use a combination of methodologies to allocate state and local funds to schools (e.g., use a different methodology for high schools than it uses for elementary schools). An LEA also may design its methodology to take into consideration grade span or school type, student enrollment size, or schools in need of additional funds to serve high concentrations of children with disabilities, English learners, or other such groups of students the LEA determines require additional support.

An LEA need not have a methodology if it has (1) only one school; (2) only Title I schools; or (3) a grade span that contains only one school, only non-Title I schools, or only Title I schools (i.e., no methodology is required for this grade span).

This requirement applies to both schoolwide program schools and targeted assistance schools. Thus, a Title I targeted assistance school is not required to use Part A funds to provide supplemental services to identified children or to identify that an individual cost or service supported with Part A funds is supplemental. Part A funds still must be used only for allowable activities (i.e., in a Title I targeted assistance school, Part A funds may be used only to serve students who are failing, or most at risk of failing, to meet challenging state academic standards) (see sections 1114 and 1115 of ESEA (20 USC 6314 and 6315)).

If an LEA reserves state and local funds for district-level activities (i.e., funds that it does not allocate through its methodology to schools), the LEA must conduct activities with those funds in a manner that does not take into account a school's Title I status. In addition, to the extent an

LEA retains state and local funds to implement activities that are required by federal, state, or local law, the LEA must use those funds in a manner that does not take into account a school's Title I status.

An LEA may exclude from determinations of compliance with the supplement not supplant requirement supplemental state or local funds spent in any school attendance area or school for programs that meet the intent and purposes of Part A (Section 1118(d) of ESEA (20 USC 6321(d)); 34 CFR section 200.79).

Audit Objectives

LEAs

- a. (1) Determine whether an LEA has a methodology for allocating state and local funds to each Title I school that ensures the school receives all of the state and local funds it would otherwise receive if it were not receiving Part A funds; (2) determine whether the LEA implemented its methodology; (3) if the LEA reserves state and local funds for district-level activities, determine whether the LEA conducts activities with those funds in a manner that does not take into account a school's Title I status.

SEAs

Verify that the SEA reviews LEA compliance with the Part A supplement not supplant provision (e.g., through sub-recipient monitoring).

3. Earmarking

See also Part 4, 84.000 ED Cross-Cutting Section and the following:

- a. Allocation of funds to LEAs (SEAs)

ED provides LEA allocation tables to SEAs for basic grants, concentration grants, targeted grants, and education finance incentive grants based on LEA-level data from the Bureau of the Census (Census list).

- (1) If there is an LEA in a state that is not on the Census list (e.g., charter school LEAs), the SEA must adjust the initial allocations provided by ED for any eligible LEA that is not on the Census list (see III.E.3, "Eligibility - Eligibility for Subrecipients," above) (34 CFR section 200.72).
- (2) In making the adjustments, the SEA must ensure that no eligible LEA is reduced below its hold harmless level. An LEA's hold harmless level is 85, 90, or 95 percent of the amount it was

allocated in the preceding year depending on its percentage of formula children (34 CFR section 200.73).

- (3) In making the adjustments, the SEA must apply section 4306(c) of the ESEA, as amended by the ESSA, which requires the SEA, for purposes of implementing the hold-harmless protections in sections 1122(c) and 1125A(f)(3) of the ESEA for a newly opened or significantly expanded charter school LEA, to calculate a hold-harmless base for the prior year that reflects the new or significantly expanded enrollment of the charter school LEA (20 USC 7221e(c)). For more information see pages 4–7 in the ESSA Fiscal Changes & Equitable Services guidance (November 2016) (<https://www2.ed.gov/policy/elsec/leg/essa/essaguidance160477.pdf>).

b. Targeting school improvement funds (SEAs)

Each SEA must ratably reduce the allocations of LEAs and also follow the special rule described below to reserve for school improvement activities the greater of:

- Seven percent of the SEA’s FY 2022 Part A award; or
- The sum of the total amount that the SEA reserved for school improvement under section 1003(a) from its FY 2016 Part A award (generally, 4 percent of that award) and the amount of the SEA’s FY 2016 School Improvement Grants (SIG) allocation under section 1003(g).

Special rule: In reserving funds for school improvement, an SEA may not reduce an LEA’s Part A allocation below the prior year’s amount. If funds are insufficient to reserve the amount described in the two bullets above, the SEA is not required to reserve this amount. The special rule in section 1003(h) of the ESEA took effect beginning with FY 2018 Part A funds that ED awarded states on July 1, 2018 (<https://uscode.house.gov/view.xhtml?req=granuleid:USC-prelim-title20-section6303&num=0&edition=prelim>).

Of the amount reserved, the SEA must allocate not less than 95 percent directly to LEAs on a formula or competitive basis to support school improvement activities in schools identified for comprehensive support and improvement under ESEA Section 1111(c)(4)(D)(i) of the ESEA or implementing targeted support and improvement plans under ESEA Section 1111(d)(2) of the ESEA. However, the SEA may, with the approval of its LEAs, provide directly for these activities or arrange for them to be provided by other entities such as school support teams or educational service agencies.

If, after consulting with LEAs, the SEA determines that the amount of funds reserved is greater than needed, the SEA must allocate the excess amount to LEAs (1) in proportion to their allocations under subpart 2 of Part A or (2) in accordance with the SEA's reallocation procedures under Section 1126(c) of the ESEA (Title I, Section 1003(a)-(h) of ESEA (20 USC 6303(a)-(h)); 34 CFR section 200.100(a)).

c. Funds reserved for state administration (SEAs)

From the amount received by the SEA for Part A, to administer Part A, an SEA may reserve no more than the greater of 1 percent of what the SEA would have received for Part A, if the appropriation for parts A, C, and D of Title I were \$14 billion (as indicated on a state administrative allocation table that ED provides to SEAs) or \$400,000 (\$50,000 for outlying areas) (Title I, Section 1004 (20 USC 6304); 34 CFR section 200.100(b)).

d. Funds reserved for Direct Student Services (SEAs: optional)

After meaningful consultation with geographically diverse LEAs, an SEA may, but is not required to, reserve a maximum of 3 percent of its Part A allocation for direct student services (Title I, Section 1003A (20 USC 6303b)).

L. Reporting

1. Financial Reporting

See Part 4, 84.000 ED Cross-Cutting Section.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Participation of Private School Children

See Part 4, 84.000 ED Cross-Cutting Section.

2. Access to Federal Funds for New or Significantly Expanded Charter Schools

See Part 4, 84.000 ED Cross-Cutting Section.

3. Annual Report Card, High School Graduation Rate

Compliance Requirements An SEA and its LEAs must report graduation rate data for all public high schools at the school, LEA, and state levels using the four-year adjusted cohort rate and, at an SEA's or LEA's discretion, one or more extended-year adjusted cohort rates. Graduation rate data must be reported both in the aggregate and disaggregated by the subgroups in Section 1111(c)(2) of the ESEA, homeless status, status as a child in foster care using a four-year adjusted cohort graduation rate (and any extended-year adjusted cohort rates) (ESEA sections 1111(h)(1)(C)(iii)(II) and 8101(23), (25) (20 USC 6311(h)(1)(C)(iii)(II) and 7801(23), (25))). Except as noted below, only students who earn a regular high school diploma may be counted as a graduate for purposes of calculating graduation rates. The term "regular high school diploma" means the standard high school diploma that is awarded to the preponderance of students in the state and that is fully aligned with the state standards (but not to alternate academic achievement standards for students with the most significant cognitive disabilities) or a higher diploma. A regular high school diploma does not include a recognized equivalent of a diploma, such as a general equivalency diploma (GED), certificate of completion, certificate of attendance, or similar lesser credential (ESEA, Section 8101(43) (20 USC 7801(43))). An SEA may, but is not required to, award a state-defined alternate diploma for students with the most significant cognitive disabilities who take an alternate assessment aligned with alternate academic achievement standards. That diploma must be standards based, aligned with the state's requirements for a regular high school diploma, and obtained within the time period for which the state ensures the availability of a free appropriate public education. If an SEA awards an alternate diploma, the SEA may count those students in its four-year and any extended-year adjusted cohort graduation rate, even if the student takes more than four years to receive the alternate diploma (ESEA, Section 8101(23)(A)(ii)(I)(bb), (25)(A)(ii)(I)(bb) (20 USC 7801(23)(A)(ii)(I)(bb), (25)(A)(ii)(I)(bb))).

To remove a student from the cohort, a school or LEA must confirm, in writing, that the student transferred out, emigrated to another country, transferred to a prison or juvenile facility, or is deceased. To confirm that a student transferred out, the school or LEA must have official written documentation that the student enrolled in another school or in an educational program that culminates in the award of a regular high school diploma. A student who is retained in grade, enrolls in a GED program, or leaves school for any other reason may not be counted as having transferred out for the purpose of calculating graduation rate and must remain in the adjusted cohort (ESEA sections 1111(h)(1)(C)(iii)(II) and 8101(23), (25) (20 USC 6311(h)(1)(C)(iii)(II) and 7801(23), (25))).

Audit Objectives Determine whether SEAs and LEAs have implemented appropriate policies and procedures for documenting the removal of a student from the adjusted cohort.

Suggested Audit Procedures

SEAs

Review SEA policies and procedures that ensure that LEAs are maintaining appropriate documentation to confirm when students have been removed from the adjusted cohort.

LEAs

Verify that the LEA maintains appropriate written documentation to support the removal of a student from the adjusted cohort (. One way to do so is to select several students that have been removed from the adjusted cohort. Verify the LEA has maintained appropriate written documentation to support the removal of these students from the adjusted cohort (see the last paragraph under “3” above).

4. Assessment System Security – (SEAs/LEAs)

Compliance Requirements SEAs, in consultation with LEAs, are required to establish and maintain an assessment system that is valid, reliable, and consistent with relevant professional and technical standards. Within their assessment system, SEAs must have policies and procedures to maintain test security and ensure that LEAs implement those policies and procedures (Title I, Section 1111(b)(2)(B)(iii) of the ESEA (20 USC 6311(b)(2)(B)(iii))).

Audit Objectives Determine whether SEAs and LEAs have developed and operationalized policies and procedures regarding test security for the assessments.

Suggested Audit Procedures

SEAs

- a. Review SEA policies and procedures for ensuring that the SEA and LEAs have developed and operationalized test security measures.
- b. Verify that the SEA has developed and operationalized the relevant policies and procedures.

LEAs

- a. Ascertain that the LEA has policies and procedures for ensuring that the LEA and its schools implement test security measures.
- b. Verify that the LEA and its schools implemented test security measures, for example, by reviewing documentation and interviewing LEA officials and school administrators and teachers.

Note: An auditor need not consider the sufficiency of an SEA’s or LEA’s test security procedures. ED ensures that the sufficiency of test security procedures is reviewed as a

part of its peer review process of State assessment systems. For more information see pages 43-45 of the State's Guide to the U.S. Department of Education's Assessment Peer Review Process (September 2018) (<https://www2.ed.gov/admins/lead/account/saa/assessmentpeerreview.pdf>).

IV. OTHER INFORMATION

Note: Certain compliance requirements that apply to multiple programs are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. When applicable, Section III references the ED Cross-Cutting Section for these requirements.

Also, as discussed in the ED Cross-Cutting Section, SEAs and LEAs may have been granted waivers from certain compliance requirements. This includes waivers of certain Part A requirements that ED invited SEAs to apply for due to the COVID-19 Pandemic. Auditors should ascertain from the audited SEAs and LEAs whether the SEA or the LEA or its schools are operating under any approved waivers.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.011 MIGRANT EDUCATION-STATE GRANT PROGRAM (Title I, Part C of ESEA)

I. PROGRAM OBJECTIVES

The objectives of the Migrant Education-State Grant program (Migrant Education program or MEP) are to (1) assist states in supporting high-quality and comprehensive educational programs and services during the school year and, as applicable, during summer or intersession periods, that address the unique educational needs of migratory children; (2) ensure that migratory children who move among the states are not penalized in any manner by disparities among the states in curriculum, graduation requirements, and challenging state academic standards; (3) ensure that migratory children receive full and appropriate opportunities to meet the same challenging state academic standards that all children are expected to meet; (4) help migratory children overcome educational disruption, cultural and language barriers, social isolation, various health-related problems, and other factors that inhibit the ability of such children to succeed in school; and (5) help migratory children benefit from state and local systemic reforms.

II. PROGRAM PROCEDURES

MEP funds are allocated to a state educational agency (SEA), under either an approved consolidated application or an approved individual program application, in order for the SEA to provide MEP services and activities either directly, or through local operating agencies (LOAs). LOAs may be (1) a local educational agency (LEA) to which an SEA makes a subgrant, (2) a public or private agency with which an SEA or the secretary makes an arrangement, or (3) an SEA if the SEA operates the state's migrant education program or projects directly.

The amount of funding an SEA receives annually depends, in part, on the number of eligible migratory children that the SEA determined reside within the state and the number of eligible migratory children who received MEP-funded services provided by the state during summer or intersession programs. Because an SEA may choose to provide MEP services directly or through a local operating agency, some of the suggested audit procedures will apply for an SEA or LOA, depending on which agency provides the services and where the records are maintained.

In general, only eligible migratory children may receive MEP services. A "migratory child" means a child or youth who made a qualifying move in the preceding 36 months as a migratory agricultural worker or migratory fisher; or with, or to join, a parent or spouse who is a migratory agricultural worker or a migratory fisher. A qualifying move is a move due to economic necessity (a) from one residence to another residence; and (b) from one school district to another, except in the case of a state that comprises a single school district, wherein a qualifying move is from one administrative area to another within such district, or in the case of a school district of more than 15,000 square miles, wherein a qualifying move is a distance of 20 miles or more to a temporary residence (Title I, Part C, Section 1309(3), (5)(20 USC 6399(3), (5)). The 34 CFR section 200.81 further defines the following key terms: "agricultural work or employment," "fishing work or employment," "temporary employment," "seasonal employment," "personal subsistence," and "qualifying work."

Source of Governing Requirements

This program is authorized by Title I, Part C of the Elementary and Secondary Education Act of 1965, as amended (ESEA) (20 USC 6391 through 6399). Requirements in 34 CFR Part 200, subparts C (34 CFR sections 200.81 through 200.89) and E (34 CFR sections 200.100 through 200.103), 34 CFR Part 76, and 34 CFR Part 299 also apply.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	Y	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

See also Part 4, 84.000 ED Cross-Cutting Section.

- a. *SEAs*- SEAs may use funds to operate the program directly or through contracts or subgrants to LEAs or other LOAs and pay for state administration. In general, funds available under the MEP may be used only to (a) identify eligible migratory children and their needs; (b) provide instructional and support services that address the identified needs of the eligible children (including, but not limited to, preschool services,

academic and career counseling, and advocacy and outreach); and (c) to support such objectives through related activities such as, but not limited to, professional development, parental involvement, and transfer of student records.

An SEA may also use MEP funds to carry out administrative activities that are unique to the program. These activities include, but are not limited to, statewide identification and recruitment of migratory children, interstate and intrastate program coordination, transfer of student records, collecting and using information to make subgrants, and direct supervision of instructional or support staff (Title I, Part C, sections 1301, 1304(c), and 1306(b) of ESEA (20 USC 6392, 6391(c), and 6396(b)); 34 CFR section 200.82).

- b. *LEAs or Other LOAs*- LEAs or other LOAs use funds in accordance with the agreement with the SEA to (a) identify eligible migratory children and their needs; (b) provide instructional and support services that address the identified needs of the eligible children; and (c) to support such objectives through related activities such as, but not limited to, professional development, parental involvement, and transfer of student records.
- c. *Schoolwide Programs (LEAs)* – Before a school chooses to consolidate MEP funds in its schoolwide program, the school must (1) use these funds, in consultation with parents of migratory children or organizations representing those parents, or both, first to meet the unique educational needs of migratory students that result from the effects of their migratory lifestyle, and those other needs that are necessary to permit these students to participate effectively in school; and (2) document that these needs have been met (Title I, Part C, Section 1306(b)(4) of ESEA (20 USC 6396); 34 CFR sections 200.86 and 200.29(c)(1)).

B. Allowable Costs/Cost Principles

See Part 4, 84.000 ED Cross-Cutting Section.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – Maintenance of Effort (SEAs/LEAs)

Not Applicable

2.2 Level of Effort – Supplement Not Supplant

See Part 4, 84.000 ED Cross-Cutting Section.

3. Earmarking

a. Administration

See Part 4, 84.000 ED Cross-Cutting Section.

b. Transferability

Not Applicable

H. Period of Performance (All grantees)

See Part 4, 84.000 ED Cross-Cutting Section.

L. Reporting

1. Financial Reporting

See Part 4, 84.000 ED Cross-Cutting Section.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Participation of Private School Children (SEAs/LEAs)

See Part 4, 84.000 ED Cross-Cutting Section.

2. Priority for Services

Compliance Requirements SEAs and LEAs or other LOAs must give priority for MEP services to migratory children who made a qualifying move within the previous one-year period; and are failing, or most at risk of failing, to meet the challenging state's academic standards, or have dropped out of school (Title I, Part C, Section 1304(d) of ESEA (20 USC 6394(d)).

Audit Objectives (*SEAs providing services directly and LEAs or other LOAs*) Determine whether the SEA or LEA or other LOA is defining, and properly identifying and counting, “priority for services” migratory children so that priority in the provision of MEP services is given to those migratory children who made a qualifying move within the previous one-year period; and are failing, or most at risk of failing, to meet the challenging state’s academic standards, or have dropped out of school (priority children).

Suggested Audit Procedures (*SEAs providing services directly and LEAs or LOAs*)

- a. Review the SEA’s or LEA’s or other LOA’s procedures to identify those individual migratory children who made a qualifying move within the previous one-year period; and are failing, or are most at risk of failing, to meet the challenging state academic standards, or have dropped out of school. Such procedures must include an accurate definition of priority for services.
- b. Review the SEA or LEA’s or other LOA’s process for selecting children to receive MEP services.
- c. Select a sample of migratory children who were identified as “priority for services” children. Review program records to determine if these children were provided MEP services. (In rare instances, a local project may not have any “priority for services” children in its service area, in which case the suggested audit procedures would not apply.)
- d. Review the SEA’s or LEA’s or other LOA’s procedures to accurately document the eligible migratory children who were identified as being “priority for services,” and the services provided to those children.

3. Subgrant Process (SEAs)

Compliance Requirements SEAs may provide MEP services either directly, or through LEAs or other LOAs. When the SEA awards subgrants, in order to target program funds appropriately, the SEA is required determine the amount of the subgrants by taking into account (1) the numbers of migratory children, (2) the needs of migratory children, (3) the “priority for services” requirement in section 1304(d) of ESEA (20 USC 6394(d)), and (4) the availability of funds from other federal, state, and local programs. How the SEA takes into consideration each of the required factors is left to the SEA’s discretion (Title I, Part C, sections 1301 and 1304(b)(5) of the ESEA (20 USC 6391 and 6394(b)(5))).

Audit Objectives Determine whether the SEA’s process to determine the amount of MEP subgrants takes into account current information on numbers of migratory children, needs of migratory children, need to serve priority children, and the availability of funds from other federal, state, and local programs.

Suggested Audit Procedures

Review the SEA’s process for awarding MEP funds to subgrantees to ascertain if the process:

- a. Uses current or recent (e.g., previous year, average of most recent two or three years) information.
- b. Takes into account the following: (1) numbers of migratory children; (2) needs of migratory children; (3) “priority for services” requirement in Section 1304(d) of ESEA; and (4) availability of funds from other federal, state, and local programs.

4. Child Counts – Quality Control Process

Compliance Requirements SEAs must establish and implement a system of quality controls for the proper identification and recruitment of eligible migratory children on a statewide basis that includes at a minimum, the components specified in ED regulations. These components include training recruiters on eligibility requirements; supervision and annual review and evaluation of identification and recruitment practices; resolving eligibility questions raised by recruiters and communicating this information to all LOAs; examining each COE by qualified personnel to verify eligibility; validating that eligibility determinations were made properly, including prospective re-interviewing of a randomly selected sample of children determined to be migratory during the performance reporting period (34 CFR section 200.89(b)(2)); and implementing corrective action if the SEA identifies COEs that do not sufficiently document a child’s eligibility, or in response to internal State audit findings and recommendations, or monitoring or audit findings of the Secretary. SEAs are required to describe specific aspects of their quality control process in Section 2.4.3 of the Consolidated State Performance Report, Part II (See III.L.3.b., “Reporting – Special Reporting - Consolidated State Performance Report, Part II, Migrant Child Counts”). SEAs may require LEAs and other LOAs to submit information to the SEA and comply with specified quality control procedures (20 USC 6394(c)(7); 34 CFR sections 200.89(c) and (d); ED has identified Required Data Elements and Required Data Sections and provided Instructions and Questions & Answers for the National COE at <https://www2.ed.gov/programs/mep/coe2017.docx>).

Audit Objectives Determine whether the SEA and LEAs and other LOAs (1) established and implemented a quality control process that meets the requirements of ED regulations, and (2) whether the process is accurately reported in the Consolidated State Performance Report, Part II.

Suggested Audit Procedures

SEAs

- a. Verify that the SEA has a documented a quality control process that meets the requirements of ED regulations, including processes for annual prospective re-interviewing of a sample of children determined to be eligible for the MEP during the performance reporting period (September 1 to August 31).

- b. Ascertain whether the quality control process was actually conducted in the manner described.
- c. Verify that the SEA accurately reported the quality control process in Section 2.4.3 of the Consolidated State Performance Report, Part II.

LEAs and Other LOAs

- a. Determine if the LEAs and other LOAs were required to submit information to the SEA relating to Section 2.4.3 of the Consolidated State Performance Report, Part II, and if so, what information was required, the processes for obtaining it, and how quality was ensured.
- b. Ascertain whether the LEAs and other LOAs complied with the SEA's requirements relating to obtaining, processing, and submitting accurate data required for Section 2.4.3 of the Consolidated State Performance Report, Part II.

IV. OTHER INFORMATION

Note: Certain compliance requirements that apply to multiple programs are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. When applicable, Section III references the ED Cross-Cutting Section for these requirements.

Also, as discussed in the ED Cross-Cutting Section, SEAs and LEAs may have been granted waivers from certain compliance requirements. This includes waivers of certain Title I, Part C requirements that ED invited SEAs to apply for due to the COVID-19 Pandemic. Auditors should ascertain from the audited SEAs and LEAs whether the SEA or the LEA or its schools are operating under any approved waivers.

1. Consolidation of Administrative Funds (SEAs and LEAs)

See Part 4, 84.000 ED Cross-Cutting Section: Other Information.

2. Schoolwide Programs (LEAs)

See Part 4, 84.000 ED Cross-Cutting Section: Other Information.

3. Prima Facie Case Requirement for Audit Findings

See Part 4, 84.000 ED Cross-Cutting Section: Other Information.

DEPARTMENT OF EDUCATION**ASSISTANCE LISTING 84.027 SPECIAL EDUCATION—GRANTS TO STATES (IDEA, Part B)****ASSISTANCE LISTING 84.173 SPECIAL EDUCATION—PRESCHOOL GRANTS (IDEA Preschool)****I. PROGRAM OBJECTIVES**

The purposes of the Individuals with Disabilities Education Act (IDEA) are to (1) ensure that all children with disabilities have available to them a free appropriate public education (FAPE) that emphasizes special education and related services designed to meet their unique needs and prepares them for further education, employment, and independent living; (2) ensure that the rights of children with disabilities and their parents are protected; (3) assist states, localities, educational service agencies, and federal agencies to provide for the education of all children with disabilities; and (4) assess and ensure the effectiveness of efforts to educate children with disabilities. The Assistance to States for Education of Children with Disabilities program (IDEA, Part B) and the Preschool Grants for Children with Disabilities program (IDEA Preschool) provide grants to states to assist them in meeting these purposes (20 USC 1400 et seq.).

IDEA's Special Education—Grants to States program (IDEA, Part B) provides grants to states, and through them to LEAs, to assist them in providing special education and related services to eligible children with disabilities ages 3 through 21 (20 USC 1411). (The obligation to make FAPE available to children with disabilities ages 3 through 5 and 18 through 21 depends on state law. All states require that FAPE be made available to children with disabilities ages 3 through 5, and most states mandate FAPE through age 20 or 21.) IDEA's Special Education—Preschool Grants program (IDEA Preschool), also known as the "619 program," provides grants to states, and through them to LEAs, to assist them in providing special education and related services to children with disabilities ages three through five and, at a state's discretion, to two-year-old children with disabilities who will turn three during the school year (20 USC 1419).

II. PROGRAM PROCEDURES

A state applying through its state educational agency (SEA) for assistance under IDEA, Part B must, among other things, submit a plan to the Department of Education (ED) that provides assurances that the SEA has in effect policies and procedures that ensure that all children with disabilities have the right to a FAPE (20 USC 1412(a)).

States that receive assistance under IDEA, Part B, may receive additional assistance under the Preschool Grants program. A state is eligible to receive a grant under the Preschool Grants program if (1) the state is eligible under 20 USC 1412; and (2) the state demonstrates to the Secretary that it has in effect policies and procedures that ensure the provision of FAPE to all children with disabilities ages 3 through 5 years residing in the state (20 USC 1419(b)).

However, a state that provides early intervention services in accordance with Part C of the IDEA to a child who is eligible for services under section 1419 is not required to provide that child with FAPE (20 USC 1412(a)(1)(C)).

Source of Governing Requirements

These programs are authorized under the Individuals with Disabilities Education Act, Part B (IDEA-B) as amended on December 3, 2004 (Pub. L. No. 108-446; 20 USC 1400 et seq.). Implementing regulations for these programs are 34 CFR Part 300.

Availability of Other Program Information

A number of documents posted on ED's website contain information pertinent to the IDEA, Part B requirements in this Compliance Supplement:

1. Office of Special Education programs (OSEP) Memorandum 19-03, *Procedures for Receiving a Federal Fiscal Year (FFY) 2019 Grant Award Under Part B of the Individuals with Disabilities Education Act (IDEA)*
<https://osep.grads360.org/#communities/pdc/documents/17658>
2. OSEP Memorandum 10-5, *Maintenance of Financial Support under the Individuals with Disabilities Education Act*, dated December 2, 2009
<http://www2.ed.gov/policy/speced/guid/idea/monitor/mfs-12-2-2009.pdf>
3. OSEP Memorandum 15-10, *Issuance of Guidance on the Final Local Educational Agency (LEA) Maintenance of Effort (MOE) Regulations under Part B of the Individuals with Disabilities Education Act (IDEA)*, dated July 27, 2015
<https://sites.ed.gov/idea/files/idea/policy/speced/guid/idea/memosdcltrs/osepmemo1510leamoeqa.pdf>

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	Y	Y	Y	Y	N	N	Y	N

A. Activities Allowed or Unallowed

See also Part 4, 84.000 ED Cross-Cutting Section.

1. *SEAs*

Allowable activities for SEAs are subgranting funds to LEAs and state administration, and other state-level activities (see Section III.G.3, “Matching, Level of Effort, Earmarking – Earmarking,” for a further description of these activities).

2. *LEAs*

a. *IDEA, Part B* – An LEA may only use federal funds under IDEA, Part B for the excess costs of providing special education and related services to children with disabilities. Special education includes specially designed instruction, at no cost to the parent, to meet the unique needs of a child with a disability, including instruction conducted in the classroom, in the home, in hospitals and institutions and in other settings, and instruction in physical education. Related services include transportation and such developmental, corrective and other supportive services as may be required to assist a child with a disability to benefit from special education. Related services do not include a medical device that is surgically implanted or the replacement of such device. A portion of these funds, under conditions specified in the law, may also be used by the LEA (1) for services and aids that also benefit nondisabled children; (2) for early intervening services; (3) to establish and implement high-cost or risk-sharing funds; and (4) for administrative case management. Excess costs are those costs for the education of an elementary school or secondary school student with a disability that are in excess of the average annual per student expenditure in an LEA during the preceding school year. LEAs are required to compute the minimum average amount of per pupil expenditure separately for children with disabilities in its elementary schools and for children with disabilities in its secondary schools, and not

on a combination of the enrollments in both. Appendix A to 34 CFR Part 300 provides detailed guidance and an example for calculating the average per pupil expenditures and the minimum average amounts that the LEA must spend before using IDEA funds (20 USC 1401(8), (26) and (29); 20 USC 1413(a)(2) and (4); 34 CFR sections 300.16, 300.34, 300.39, 300.202, and 300.208).

- b. *IDEA Preschool* – An LEA may use federal funds under the Preschool Grants program only for the costs of providing special education and related services (as described above) to children with disabilities ages three through five and, at a state’s discretion, providing a free appropriate public education to two-year-old children with disabilities who will turn three during the school year (20 USC 1419(a); 34 CFR section 300.800).

B. Allowable Costs/Cost Principles

See also Part 4, 84.000 ED Cross-Cutting Section.

The use of IDEA funds by a state, for the acquisition of equipment, or the construction or alteration of facilities, must be approved by ED based on a determination by ED that the program would be improved by allowing funds to be used for these purposes (20 USC 1404).

F. Equipment and Real Property Management

Acquisition of equipment and construction or alteration of facilities by the IDEA Part B programs must meet the prior approval requirements in, and be consistent with, the IDEA-specific requirements in 20 USC 1404 and 1412(a)(10)(B); and 34 CFR sections 300.144 and 300.718.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

a. SEAs – Maintenance of State Financial Support

- (1) A state may not reduce the amount of state financial support for special education and related services for children with disabilities (or state financial support otherwise made available because of the excess costs of educating those children) below the amount of state financial support provided for the preceding fiscal year.

The secretary reduces the allocation of funds under 20 USC 1411 for any fiscal year following the fiscal year in which the state fails to comply with this requirement by the amount by which the state failed to meet the requirement.

If, for any fiscal year, a state fails to meet the state-level maintenance of effort requirement (or is granted a waiver from this requirement), the financial support required of the state in future years for maintenance of effort must be the amount that would have been required in the absence of that failure (or waiver) and not the reduced level of the state's support (20 USC 1412(a)(18); 34 CFR section 300.163).

- (2) For any fiscal year for which the federal allocation received by a state exceeds the amount received for the previous fiscal year and if the state pays or reimburses all LEAs within the state from state revenue 100 percent of the nonfederal share of the costs of special education and related services, the SEA may reduce its level of expenditure from state sources by not more than 50 percent of the amount of such excess (20 USC 1413(j)(1); 34 CFR section 300.230).

An SEA may meet the maintenance of effort requirement by either a total or per capita amount. See OSEP Memorandum 19-03, *Procedures for Receiving a Federal Fiscal Year (FFY) 2019 Grant Award Under Part B of the Individuals with Disabilities Education Act (IDEA)*, page 3, section 3, Maintenance of State Financial Support. This guidance is available at <https://osep.grads360.org/#communities/pdc/documents/17658>.

For more information on the maintenance of financial support requirements for SEAs, see OSEP Memorandum 10-5, *Maintenance of Financial Support under the Individuals with Disabilities Education Act*, dated December 2, 2009. This guidance is available at (same as #1 Memo 10-5) <http://www2.ed.gov/policy/speced/guid/idea/monitor/mfs-12-2-2009.pdf>.

- (3) For the purposes of establishing an LEA's eligibility for an award for a fiscal year, the SEA must determine that the LEA meets the eligibility standard (see III.G.2.1.b.(2), "Eligibility Standard") (34 CFR section 300.203(a)).

b. LEAs – Local Maintenance of Effort

(1) General

IDEA, Part B funds received by an LEA cannot be used, except under certain limited circumstances, to reduce the level of expenditures for the education of children with disabilities made by the LEA from local funds, or a combination of state and local funds, below the level of those expenditures for the preceding fiscal year. To meet this requirement, LEAs must meet (1) the eligibility standard and (2) the compliance standard. These standards are described in detail below in paragraphs b(2) and b(3), respectively.

Allowances may be made for (a) the voluntary departure, by retirement or otherwise, or departure for just cause, of special education or related services personnel; (b) a decrease in the enrollment of children with disabilities; (c) the termination of the obligation of the agency, consistent with this part, to provide a program of special education to a particular child with a disability that is an exceptionally costly program, as determined by the SEA, because the child (i) has left the jurisdiction of the agency, (ii) has reached the age at which the obligation of the agency to provide a FAPE has terminated, or (iii) no longer needs such program of special education; (d) the termination of costly expenditures for long-term purchases, such as the acquisition of equipment and the construction of school facilities; or (e) the assumption of costs by the high cost fund operated by the SEA under 34 CFR section 300.704 (20 USC 1413(a)(2); 34 CFR sections 300.203 and 300.204).

Appendix E of 34 CFR Part 300 provides LEA maintenance of effort calculation examples. For more information on the LEA maintenance of effort requirements, see OSEP Memorandum 15-10, *Issuance of Guidance on the Final Local Educational Agency (LEA) Maintenance of Effort (MOE) Regulations under Part B of the Individuals with Disabilities Education Act (IDEA)*, dated July 27, 2015. This guidance is available at <https://sites.ed.gov/idea/files/idea/policy/speced/guid/idea/memosdcltrs/osepmemo1510leamoeqa.pdf>.

(2) Eligibility Standard

- (a) To meet the eligibility standard for an award for a fiscal year, the LEA must budget for the education of children with disabilities at least the same amount, from at least one of the following sources, as the LEA spent for that purpose from the same source for the most recent fiscal year for which information is available:
- (i) Local funds only;
 - (ii) The combination of state and local funds;
 - (iii) Local funds only on a per capita basis; or
 - (iv) The combination of state and local funds on a per capita basis.
- (b) When determining the amount of funds that the LEA must budget to meet the requirement, the LEA may take into consideration, to the extent the information is available, the exceptions and adjustment provided in 34 CFR sections 300.204 and 300.205 that the LEA:
- (i) Took in the intervening year or years between the most recent fiscal year for which information is available and the fiscal year for which the LEA is budgeting; and
 - (ii) Reasonably expects to take in the fiscal year for which the LEA is budgeting.
- (c) Expenditures made from funds provided by the federal government for which the SEA is required to account to the federal government or for which the LEA is required to account to the federal government directly or through the SEA may not be considered in determining whether an LEA meets the eligibility standard (34 CFR section 300.203(a)).

(3) Compliance Standard

Except as provided in 34 CFR sections 300.204 and 300.205, funds provided to an LEA under IDEA, Part B must not be used to reduce the level of expenditures for the education of children with disabilities made by the LEA

from local funds below the level of those expenditures for the preceding fiscal year.

An LEA meets this standard if it does not reduce the level of expenditures for the education of children with disabilities made by the LEA from at least one of the following sources below the level of those expenditures from the same source for the preceding fiscal year, except as provided in 34 CFR sections 300.204 and 300.205:

- (i) Local funds only;
- (ii) The combination of state and local funds;
- (iii) Local funds only on a per capita basis; or
- (iv) The combination of state and local funds on a per capita basis.

Expenditures made from funds provided by the federal government for which the SEA is required to account to the federal government or for which the LEA is required to account to the federal government directly or through the SEA may not be considered in determining whether an LEA meets the compliance standard (34 CFR section 300.203(b)).

(4) Subsequent Years Rule

If, in the fiscal year beginning on July 1, 2013, or July 1, 2014, an LEA fails to meet the eligibility standard or compliance standard in effect at that time, the level of expenditures required of the LEA for the fiscal year subsequent to the year of the failure is the amount that would have been required in the absence of that failure, not the LEA's reduced level of expenditures.

If, in any fiscal year beginning on or after July 1, 2015, an LEA fails to meet the requirements of 34 CFR sections 300.203(b)(2)(i) or (iii) and the LEA is relying on local funds only, or local funds only on a per capita basis, to meet the eligibility standard or compliance standard, the level of expenditures required of the LEA for the fiscal year subsequent to the year of the failure is the amount that would have been required under 34 CFR sections 300.203(b)(2)(i) or (iii) in the absence of that failure, not the LEA's reduced level of expenditures.

If, in any fiscal year beginning on or after July 1, 2015, an LEA fails to meet the requirement of 34 CFR section 300.203(b)(2)(ii) or (iv) and the LEA is relying on the combination of state and local funds, or the combination of state and local funds on a per capita basis, to meet the eligibility standard or compliance standard, the level of expenditures required of the LEA for the fiscal year subsequent to the year of the failure is the amount that would have been required under 34 CFR sections 300.203(b)(2)(ii) or (iv) in the absence of that failure, not the LEA's reduced level of expenditures (34 CFR section 300.203(c)).

(5) Consequence of Failure to Maintain Effort

If an LEA fails to maintain its level of expenditures for the education of children with disabilities in accordance with 34 CFR section 300.203(b), the SEA is liable in a recovery action under Section 452 of the General Education Provisions Act (20 USC 1234a) to return to the Department of Education, using nonfederal funds, an amount equal to the amount by which the LEA failed to maintain its level of expenditures in accordance the compliance standard in that fiscal year, or the amount of the LEA's Part B subgrant in that fiscal year, whichever is lower (34 CFR section 300.203(d)).

(6) Adjustment to Local Fiscal Effort

For any fiscal year for which the federal allocation received by an LEA exceeds the amount received for the previous fiscal year, the LEA may reduce the level of local or state and local expenditures by not more than 50 percent of the excess (20 USC 1413(a)(2)(C)(i) and 34 CFR section 300.205(a)). If an LEA exercises this authority, it must use an amount of local funds equal to the reduction in expenditures under Section 1413(a)(2)(C)(i) to carry out activities authorized under the Elementary and Secondary Education Act (ESEA) of 1965. The amount of funds expended by the LEA for early intervening services counts toward the maximum amount of state and local expenditures that the LEA may reduce. However, if an SEA determines that an LEA is unable to establish and maintain programs of FAPE that meet the requirements of Section 1413(a) or the SEA has taken action against the LEA under Section 1416, the SEA shall prohibit the LEA from reducing its local or state and local expenditures for

that fiscal year. If, in making its annual determinations, an SEA determines that an LEA is not meeting the requirements of Part B of the IDEA, including the targets in the state's performance plan, the SEA must prohibit the LEA from reducing its maintenance of effort under 20 USC 1413(a)(2)(C) for any fiscal year (20 USC 1413(a)(2)(C) and 1416(f); 34 CFR sections 300.205 and 300.608(a)).

2.2 Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

Individual state grant award documents identify the amount of funds a state must distribute to its LEAs on a formula basis and the amount it can set aside for administration and other state-level activities under paragraphs 3.a. and b. below.

a. IDEA, Part B (SEAs)

- (1) *Funds Set Aside for State Administration:* Each state may reserve, for each fiscal year, not more than the maximum amount the state was eligible to reserve for state administration under 20 USC 1411 for fiscal year (FY) 2004, or \$800,000 (adjusted for inflation in accordance with 20 USC 1411(e)(1)(B)), whichever is greater. Administration includes the coordination of activities under this part with, and providing technical assistance to, other programs that provide services to children with disabilities. These funds may also be used for the administration of Part C of the IDEA if the SEA is the lead agency (20 USC 1411(e)(1)A; 34 CFR section 300.704(a)).
- (2) *Funds Set Aside for Other State-Level Activities:* The maximum amount a state may reserve for other state-level activities in fiscal year 2007 and subsequent fiscal years is as follows: States, for which the amount reserved for state administration is greater than \$850,000 and the state reserves funds for the LEA risk pool, may reserve an amount equal to 10 percent of the state's allocation for fiscal year 2006 under 20 USC 1411(d), adjusted cumulatively for inflation. States, for which the amount reserved for administration is greater than \$850,000 and the state does not reserve funds for the LEA risk pool, may reserve an amount equal to 9 percent of the state's allocation for fiscal year 2006 under 20 USC 1411(d), adjusted cumulatively for inflation. States for which the amount reserved for state administration is less than or equal to \$850,000 and the state reserves funds for the LEA risk pool may reserve an amount equal to 10.5 percent of the state's allocation for fiscal year

2006 under 20 USC 1411(d), adjusted cumulatively for inflation. States for which the amount reserved for administration is less than or equal to \$850,000 and the state does not reserve funds for the LEA risk pool may reserve an amount equal to 9.5 percent of the state's allocation for fiscal year 2006 under 20 USC 1411(d), adjusted cumulatively for inflation (20 USC 1411(e)(2) and 34 CFR section 300.704(b)). SEAs must use some portion of state-level activity funds for monitoring, enforcement, and complaint investigation, and to establish and implement the mediation process, including providing for the costs of mediators and support personnel (20 USC 1411(e)(2)(B); 34 CFR section 300.704(b)(3)).

These funds may also be used

- (a) for support and direct services, including technical assistance and personnel preparation and professional development and training;
- (b) to support paperwork reduction activities, including expanding the use of technology in the individualized education plan (IEP) process;
- (c) to assist LEAs in providing positive behavioral interventions and supports and appropriate mental health services for children with disabilities;
- (d) to improve the use of technology in the classroom to enhance learning by children with disabilities;
- (e) to support the use of technology, including technology with universal design principals and assistive technology devices, to maximize accessibility to the general education curriculum for children with disabilities;
- (f) for development and implementation of transition programs, including coordination of services with agencies involved in supporting the transition of students with disabilities to postsecondary activities;
- (g) to assist LEAs in meeting personnel shortages;
- (h) to support capacity-building activities and improve the delivery of services by LEAs to improve results for children with disabilities;
- (i) for alternative programming for children with disabilities who have been expelled from school, and services for children with disabilities in correctional facilities, children

- enrolled in state-operated or state-supported schools, and children with disabilities in charter schools;
- (j) to support the development of and provision of appropriate accommodations for children with disabilities, or the development and provision of alternative assessments that are valid and reliable for assessing the performance of children with disabilities; and
 - (k) to provide technical assistance to schools and LEAs and direct services, including supplemental educational services as defined in section 1116(e)(12)(C) of the ESEA (20 USC 6316(e)(12)(C)), in schools or LEAs identified for improvement solely on the basis of the assessment results of the disaggregated group of children with disabilities (20 USC 1411(e)(2)(C); 34 CFR section 300.704(b)(4)).
- (3) *LEA Risk Pool:* Each state has the option to reserve for each fiscal year 10 percent of the amount of funds the state reserves for other state-level activities: (a) to finance and make disbursements from the high-cost fund to LEAs; and (b) to support innovative and effective ways of cost-sharing by the state, by an LEA, or among a consortium of LEAs, as determined by the state in coordination with representatives from LEAs. For purposes of this provision, the term “LEA” includes a charter school that is an LEA, or a consortium of LEAs (20 USC 1411(e)(3); 34 CFR section 300.704(c)).
- (4) *Formula Subgrants to LEAs:* Any funds under this program that the SEA does not retain for administration and other state-level activities shall be distributed to eligible LEAs in the state. An SEA must distribute to each eligible LEA the amount that the LEA would have received, from the fiscal year 1999 appropriation, if the state had distributed 75 percent of its grant for that year to LEAs. (This amount is based on the IDEA-B child count conducted on December 1, 1998.) The SEA must then distribute 85 percent of any remaining funds to those LEAs on the basis of the relative numbers of children enrolled in public and private elementary and secondary schools within the LEA’s jurisdiction; and then distribute 15 percent of any remaining funds to those LEAs in accordance with their relative numbers of children living in poverty, as determined by the state educational agency (20 USC 1411(f)(1) and (2); 34 CFR sections 300.705(a) and (b)).

- b. IDEA, Preschool Grants Program (SEAs)
- (1) *Reservation for State Activities.* Each state may reserve, for each fiscal year, not more than the maximum amount of funds that the secretary determines may be retained by the state for administration and other state-level activities (20 USC 1419(d); 34 CFR section 300.812).
- (a) *Funds Set Aside for State Administration:* An SEA may use not more than 20 percent of the funds it is allowed to retain for state activities under 20 USC 1419(d) for the purposes of administering this program, including the coordination of activities under Part B of the IDEA with, and providing technical assistance to, other programs that provide services to children with disabilities. These funds may also be used for the administration of Part C of the IDEA (20 USC 1419(e); 34 CFR section 300.813).
- (b) *Funds Set Aside for Other State-Level Activities:* SEAs shall use funds reserved for state activities that are not used for administration for:
- (i) support services (including establishing and implementing the mediation process required by section 20 USC 1415(e)), which may benefit children with disabilities younger than 3 or older than 5 as long as those services also benefit children with disabilities ages 3 through 5;
- (ii) direct services for children eligible for services under this program;
- (iii) activities at the state and local levels to meet the performance goals established by the state under 20 USC 1412(a)(15);
- (iv) supplementing other funds used to develop and implement a statewide coordinated services system designed to improve results for children and families, including children with disabilities and their families, but not to exceed one percent of the amount received by the state under this program for a fiscal year;
- (v) providing early intervention services (which must include an educational component that promotes school readiness and incorporates pre-literacy, language, and numeracy skills) in accordance with

Part C of the IDEA to children with disabilities who are eligible for services under section 619 of the IDEA until such children enter, or are eligible under state law to enter, kindergarten; or

- (vi) at the state's discretion, continuing service coordination or case management for families who receive services under Part C of the IDEA (20 USC 1419(f); 34 CFR section 300.814).

- (2) *Formula Subgrants to LEAs.* Any funds under this program that the SEA does not retain for administration and other state-level activities shall be distributed to eligible LEAs in the state.
 - (a) An SEA must distribute to each eligible LEA the amount the LEA would have received from the fiscal year 1997 appropriation if the state had distributed 75 percent of its grant for that year to LEAs. (This amount is based on the IDEA-B child count conducted on December 1, 1996.)
 - (b) The SEA must then distribute 85 percent of any remaining funds to those agencies on the basis of the relative numbers of children enrolled in public and private elementary and secondary schools within the agency's jurisdiction; and then distribute 15 percent of any remaining funds to those agencies in accordance with their relative numbers of children living in poverty, as determined by the SEA.
 - (c) If an SEA determines that an LEA is adequately providing a FAPE to all children with disabilities ages 3 through 5 residing in the area served by that agency with state and local funds, the SEA may reallocate any portion of the funds under this program that are not needed by that LEA to provide a FAPE to other LEAs in the state that are not adequately providing special education and related services to all children with disabilities ages 3 through 5 residing in the areas they serve. The SEA may also retain those funds for use at the state level to the extent the state has not reserved the maximum amount of funds it is permitted to reserve for state-level activities under 34 CFR section 300.812 (20 USC 1419(g); 34 CFR sections 300.815 through 300.817).

c. Schoolwide Programs (LEAs)

The amount of IDEA-B funds used in a schoolwide program may not exceed the amount received by the LEA under IDEA-B for that fiscal year

divided by the number of children with disabilities in the jurisdiction of the LEA multiplied by the number of children with disabilities participating in the schoolwide program (20 USC 1413(a)(2)(D); 34 CFR section 300.206).

d. Adjustments of Base Payments to LEAs

- (1) If a new LEA is created within a state, the state must divide the base allocation for the LEAs that would have been responsible for serving children with disabilities now being served by the new LEA among the new LEA and affected LEAs based on the relative numbers of children with disabilities currently provided special education by each of the LEAs.
- (2) If one or more LEAs are combined into a single LEA, the state must combine the base allocation of the merged LEAs.
- (3) If, for two or more LEAs, geographic boundaries, or administrative responsibilities for providing services to children with disabilities ages 3 through 21 change, the base allocation of affected LEAs must be redistributed among affected LEAs based on the relative numbers of children with disabilities currently provided special education by each affected LEA.
- (4) If an LEA received a base payment of zero in its first year of operation, the state must adjust the base payment for the first fiscal year after the first annual child count in which the LEA reports that it is serving any children with disabilities. The state shall divide the base allocation for the LEAs that would have been responsible for serving children with disabilities now being served by the LEA among the LEA and affected LEAs based on the relative numbers of children with disabilities currently provided special education by each of the LEAs (34 CFR section 300.705(b)(2)).

e. Coordinated Early Intervening Services (LEAs)

An LEA can use not more than 15 percent of the amount of federal Part B funds the LEA receives for any fiscal year (less any amount by which it reduces its expenditures under 20 USC 1413(a)(2)(C)) (see III.G.2.1.b.(6) in this section), in combination with other funds, to develop and implement, early intervening services for children in kindergarten through grade 12 who have not been identified under IDEA but need additional academic and behavioral support to succeed in the general education environment (20 USC 1413(f); 34 CFR section 300.226).

H. Period of Performance

See also Part 4, 84.000 ED Cross-Cutting Section.

I. Procurement and Suspension and Debarment

Further, acquisition of equipment and construction or alteration of facilities by the IDEA Part B programs must meet the prior approval requirements in, and be consistent with, the IDEA-specific requirements in 20 USC 1404 and 1412(a)(10)(B); and 34 CFR sections 300.144 and 300.718.

IV. OTHER INFORMATION

Certain compliance requirements that apply to multiple ED programs are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. Where applicable, Section III references the ED Cross-Cutting Section for these requirements.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.032 FEDERAL FAMILY EDUCATION LOANS (GUARANTY AGENCIES)

I. PROGRAM OBJECTIVES

Nonprofit and state guaranty agencies are established to guarantee student loans made by lenders and perform certain administrative and oversight functions under the Federal Family Education Loans (FFEL) program. FFEL program loans include Federal Stafford Loans (both subsidized and unsubsidized), Federal PLUS loans, and Federal Consolidation loans. The Department of Education (ED) provides reinsurance to the guaranty agency.

II. PROGRAM PROCEDURES

To participate in the FFEL program and to receive various payments and benefits incident to that participation, a guaranty agency enters into agreements with ED under which the guaranty agency agrees to comply with the applicable law and regulations. In general, guaranty agencies (1) establish and maintain a Federal Fund and the Agency Operating Fund; (2) collect on defaulted loans on which they have paid claims; (3) make timely claim payments to lenders; (4) make timely reinsurance filings with ED; (5) provide accurate and reliable reports to ED; (6) apply proper charges to defaulted borrowers; and (7) take proper enforcement measures with respect to lenders, lender servicers, and defaulted borrowers.

Section 428A of the Higher Education Act, as amended (HEA), allows ED to enter into Voluntary Flexible Agreements (VFA) with guaranty agencies to pilot alternatives to the current guaranty agency financing model or structure. Any guaranty agency or consortium of agencies may apply to enter into a VFA with ED (Section 428A(a)(3) of the HEA (20 USC 1078-1(a)(3))). VFA pilots are uniquely designed by the guaranty agency and ED and ED may waive some of the compliance requirements as part of the agreement. If a VFA exists, the auditor should review the VFA and determine (1) which of the compliance requirements below are applicable, and (2) what, if any, additional or alternative audit procedures should be performed to test compliance with the terms of the VFA.

The SAFRA Act, Title II of the Health Care and Education Reconciliation Act of 2010, Pub. L. No. 111-152, provides that after June 30, 2010, no new student loans will be made under the FFEL program. Therefore, since July 1, 2010, all new subsidized and unsubsidized Stafford Loans made to students, PLUS loans made to parents and to graduate/professional students, and consolidation loans made to borrowers, have only been made under the Federal Direct Student Loans (Direct Loan) program (Assistance Listing 84.268) and will not be handled by guaranty agencies.

Source of Governing Requirements

The FFEL program is authorized by the Title IV, Part B of the Higher Education Act (HEA) of 1965, as amended (20 USC 1071 to 1087-4). Program regulations are located at 34 CFR Part 682.

Availability of Other Program Information

To help borrowers burdened by debt during the COVID-19 emergency, ED announced an expansion of the pause on federal student loan interest and collections to all defaulted loans in the FFEL program. ED issued Dear Colleague Letter (DCL) [GEN-21-03](#) on May 12, 2021, with an update on May 24, 2021, entitled “Expansion of Collections Pause to Defaulted FFEL Program Loans Managed by Guaranty Agencies (Updated May 24, 2021).”

The pause has a significant impact on guaranty agency operations, including the compliance requirements covered by this compliance supplement, that auditors should be aware of. For instance:

- Interest is being retroactively reduced to zero percent back to March 13, 2020 through May 1, 2022.
- Guaranty agencies are not allowed to charge and retain collection cost for loan rehabilitation, and for those rehabilitations that occurred during the period, the guarantor must make adjustments on the account before it is transferred to the new holder for interest and collection cost charged.
- Guaranty agencies are allowed to charge 2.8 percent collection cost to borrowers for consolidation loans (change from 18.5 percent), and any previous charges must be refunded to the Direct Loan consolidating servicer to adjust the borrower accounts.
- Guaranty agencies must make adjustments to interest and involuntary payments to loans that defaulted on/after March 13, 2020; these loans must be transferred to ED under Special Mandatory Assignment.
- Guaranty agencies may transfer funds from the Federal Fund to the Operating Fund without prior permission from ED to reimburse themselves for lost revenue and to make refunds to borrowers. Guaranty agencies who received additional funds from ED must report that activity on their Annual Report.

[DCL GEN-21-03](#) was issued without specific completion timelines. Due to the pause extension, the three groupings of loans won’t end until early summer 2022, so each population continues to evolve. At the time this Compliance Supplement was revised, the DCL was mid-implementation and the guidance and requirements are subject to change. Any updates to the DCL will be added to the original posting with a reference to an update.

Auditors are reminded that they should (1) perform reasonable procedures to ensure that the requirements subject to audit in the Compliance Supplement are current and to determine whether there are any additional provisions of federal awards relevant to the compliance requirements subject to audit that should be covered by the single audit, and (2) update or augment the requirements contained in the Compliance Supplement, as appropriate.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N

A. Activities Allowed or Unallowed

The compliance requirements and suggested audit procedures for allowed and unallowed services are presented separately in III.N.9, “Special Tests and Provisions – Investments Federal Fund and Agency Operating Fund.”

L. Reporting

1. Financial Reporting

Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

ED Form 2000, *Guaranty Agency Financial Report (OMB No. 1845-0026)* – Guaranty agencies submit this form monthly, monthly/quarterly, and annually. Instructions for this report are available at <https://ifap.ed.gov/sites/default/files/attachments/2020-02/GAFRGuideFY19FINALSep2019.pdf>.

In determining which amounts to test on ED Form 2000, particular attention should be given to the September 30 amounts for current year defaults, current year collections, loans receivable and the sources and uses of funds in the Federal Fund (or equivalent line items pertaining to the Federal/Operating Funds for the September 30 report). Also, guaranty agencies are required to submit loan level detail information to the National Student Loan Data System (NSLDS) (*OMB No. 1845-0035*). When reviewing support for the above reports, the auditor should consider whether the relevant amounts in these reports reconcile with the NSLDS Extract submitted by the guaranty agency. (Note: There may be some differences between the ED Form 2000 and the NSLDS Extracts due to timing factors (e.g., pulling of NSLDS Extract in third week vs. month end). Finally, ED may send edits back to the guaranty agency to be entered.)

The guaranty agency is required to submit loan-level detail data to the NSLDS. The NSLDS Enrollment Reporting Guide that describes this level of detail is available at https://ifap.ed.gov/sites/default/files/attachments/2019-12/NewNSLDSEnrollmentReportingGuide_0.pdf.

Key Line Items - The following are identified as key data elements:

1. *Social security number*
2. *First name*
3. *Date of birth*
4. *Original school code*
5. *Academic level*
6. *Current school code*
7. *Enrollment status code*
8. *Enrollment status date*
9. *Originating lender code*
10. *Loan guarantee date*

11. *Amount of guarantee*
12. *Current holder lender code*
13. *Date repayment entered*
14. *Loan status code*
15. *Loan status date*
16. *Outstanding principal*
17. *Amount of claim paid to lenders (principal and interest)*
18. *Interest and fee amounts for loans in defaulted status*

ED sends edits back to the guaranty agency for disposition. Samples should be selected from the guaranty agency’s NSLDS Extracts (Note: Guaranty Agencies may have changed to automated exchanges of data with schools and lenders; thus, hard copy documents may not exist. In this instance, auditors may only be able to trace to system information and not to supporting records.) (34 CFR section 682.414(b)).

In addition to providing ED with information it needs to maintain its accounting and loan database records, data in the ED Form 2000 report are used for various purposes by ED. The use of this data is the subject of several other compliance requirements cited in III.N, “Special Tests and Provisions,” which identify the need to test specific items in these reports. For audit efficiency, the auditor may want to test those requirements at the same time as this compliance requirement. The other compliance requirements are III.N.1, “Current Records,” III.N.2, “Conditions of Reinsurance Coverage,” III.N.3, “Death, Disability, Closed Schools, False Certifications, Unpaid Refunds, Bankruptcy, and Teacher Loan Forgiveness Claims,” and III.N.8, “Federal Fund and Agency Operating Fund.”

4. Special Reporting for Federal Funding Accountability and Transparency Act

Not Applicable

N. Special Tests and Provisions

1. Current Records

Compliance Requirements The guaranty agency shall maintain current, complete, and accurate records for each loan that it holds. The records must be maintained in a system that allows ready identification of each loan’s current status, including status date, updated at least once every 10 business days (34 CFR section 682.414(a)).

Audit Objectives Determine whether the guaranty agency’s records are updated for information received from lenders, schools, borrowers, others, and NSLDS on a timely basis.

Suggested Audit Procedures

- a. For a sample of loans, compare dates transactions or information was posted to the guaranty agency’s system to the dates the source information was received.
- b. Verify that the status date is not the date the claim was paid but the actual date of occurrence (i.e., date of death on NSLDS).
- c. Identify whether any backlog exists that is over 10 days old.
- d. Verify that there are no duplicate records for a given borrower.

2. Conditions of Reinsurance Coverage

Compliance Requirements A guaranty agency may make a payment from the Federal Fund and receive a reinsurance payment on a loan only if the requirements in 34 CFR sections 682.406 and 682.414 are met. The lender must provide the guaranty agency with documentation, as described in 34 CFR sections 682.406 and 682.414. Key items in that documentation include:

- a. Evidence that the lender exercised due diligence in making, disbursing, and servicing the loan as prescribed by the rules of the guaranty agency, including documentation of:
 - (1) Timely conversion to repayment;
 - (2) Collection and payment histories;
 - (3) Beginning and ending dates of borrower deferments/forbearances;
 - (4) Required skip-tracing activities; and
 - (5) No 45-day gaps in collection activities (34 CFR sections 682.406, 682.411, and 682.414).
- b. Evidence that the loan was actually in default before the guaranty agency paid a default claim (34 CFR section 682.406(a)(4)).
- c. Evidence that the lender filed a default claim with the guaranty agency within 90 days of default (34 CFR section 682.406(a)(5)).
- d. Evidence that the loan was legally enforceable by the lender when the guaranty agency paid the claim on the loan to the lender (34 CFR section 682.406(a)(10)).

- e. Evidence that the lender provided an accurate collection history and an accurate payment history with the default claim showing that the lender exercised due diligence in collecting the loan that met the requirements of 34 CFR section 682.411 (34 CFR section 682.406(a)(3)).
- f. Evidence that the lender satisfied all conditions of guarantee coverage set by the guaranty agency (34 CFR section 682.406(a)(7)).
- g. Evidence that the guaranty agency submitted a request for payment to ED within 30 days of lender payment (34 CFR section 682.406(a)(9)).

The secretary requires a guaranty agency to repay reinsurance payments received on a loan if the lender or the guaranty agency failed to meet these requirements (34 CFR sections 682.406 and 682.414).

Past problem areas have been:

The lender:

- a. Did not exercise due diligence in collecting the loan in accordance with 34 CFR section 682.411 (34 CFR section 682.406(a)(3)).
- b. Did not include adequate documentation evidencing: timely conversion to repayment, a detailed collection and detailed payment history, beginning or ending dates of borrowers' deferments/forbearances, performance of required skip-tracing activities, and no 45-day gaps in collection activities to support claim eligibility and the claim amount (34 CFR section 682.406(a)(3)).
- c. Did not file a default claim with the guaranty agency within 90 days of default (34 CFR section 682.406(a)(5)).

(Note: The guaranty agency shall reject the claim based on due diligence (34 CFR section 682.406(a)(3)) or timely filing violations (34 CFR section 682.406(a)(5)), unless it was cured by the lender in accordance with 34 CFR Part 682, Appendix D (34 CFR section 682.406(b)).

- d. Was paid interest beyond 30 days after a claim was returned for inadequate documentation for claims returned on or after July 1, 1996 (34 CFR section 682.406(a)(6)).

The guaranty agency:

- a. Filed a request for payment of reinsurance later than 30 days following payment of a default claim to the lender (34 CFR section 682.406(a)(9)).
- b. Did not pay the lender within 90 days of the date the lender filed the claim (34 CFR section 682.406(a)(8)).

Audit Objectives Determine whether loans for which reinsurance was paid met the requirements for reinsurance.

Suggested Audit Procedures

- a. Select a sample of defaulted loans from the guaranty agency’s ED Form 2000 reports.
- b. Ascertain if, prior to paying claims, the guaranty agency determined that:
 - (1) The lender exercised due diligence in making, disbursing, and servicing the loan;
 - (2) The loan was legally enforceable;
 - (3) The loan was in default;
 - (4) The claim was timely filed;
 - (5) The lender provided an accurate collection and payment history showing that the lender exercised due diligence in collecting the loan; and
 - (6) The lender satisfied conditions of guaranty coverage set by the guaranty agency.
- c. Ascertain that the guaranty agency:
 - (1) Filed a request for payment of reinsurance no later than 30 days following payment of a default claim to the lender; and
 - (2) Paid the lender or returned the claim to the lender for additional documentation within 90 days of the date the lender submitted the claim.
 - (3) Calculated and reported the loan amount using the appropriate rate on the Form 2000.

3. Death, Disability, Closed Schools, False Certification, Unpaid Refunds, Bankruptcy, and Teacher Loan Forgiveness Claims

Compliance Requirements If an individual borrower dies or the student for whom a parent received a PLUS loan dies, the obligation of the borrower and any endorser to make any further payments on the loan is canceled, in accordance with 34 CFR section 682.402(b). A borrower may file an application for discharge due to total and permanent disability. Total and permanent disability discharges are approved in accordance with 34 CFR section 682.402(c). If a borrower files an application for discharge due to a closed school, the secretary reimburses the holder of the loan in accordance with 34 CFR section 682.402(d). If a borrower’s eligibility to receive a loan was falsely certified by an eligible school, the secretary reimburses the holder of the loan and discharges the loan in

accordance with 34 CFR section 682.402(e). The secretary reimburses the holder of a loan for the amount of unpaid refunds under certain circumstances in accordance with 34 CFR sections 682.402(l) through (p). If a borrower files a petition for relief under the Bankruptcy Code, the secretary reimburses the holder of the loan for unpaid principal and interest on the loan, in accordance with 34 CFR section 682.402(f). The rules applicable to joint consolidation loans to married borrowers and co-makers on a PLUS loan are in 34 CFR sections 682.402(a)(2) and (3).

A lender must file a death, disability, closed school, false certification, or bankruptcy claim within the period prescribed in 34 CFR section 682.402(g)(2). The guaranty agency shall review a death, disability, closed school, false certification, or bankruptcy claim promptly and shall pay the lender in accordance with 34 CFR section 682.402(h). Guaranty agencies are required to take specific actions in bankruptcy proceedings in accordance with 34 CFR section 682.402(i). In accordance with 34 CFR section 682.402, the guaranty agency shall not request payment from ED until the lender's claim has been paid. A borrower or lender must file an unpaid refund application within the period prescribed in 34 CFR section 682.402(l). The guaranty agency shall review an unpaid refund claim promptly in accordance with 34 CFR section 682.402(l) and shall pay the lender in accordance with 34 CFR section 682.402(n).

If, after being employed full time as a teacher for five consecutive academic years, a borrower applies for teacher loan forgiveness through the loan holder, the guaranty agency must determine if the borrower meets the eligibility requirements and pay the loan holder within 45 days (34 CFR sections 682.216(a) and (f)).

Audit Objectives Determine whether death, disability, closed school, false certification, unpaid refund, bankruptcy, and teacher loan forgiveness claims met the requirements for the payment of such claims.

Suggested Audit Procedures

- a. Select a sample of death, disability, closed school, false certification, unpaid refund, bankruptcy, and teacher loan forgiveness claims from the guaranty agency's ED Form 2000 reports.
- b. Review claim documentation that supports the eligibility of the claims for payment.
- c. Verify that the guarantor calculated and reported the claim amount using the appropriate rate on the Form 2000.

4. Default Aversion Assistance

Compliance Requirements Upon receipt of a complete request from a lender, received no earlier than day 60 and no later than day 120 of delinquency, a guaranty agency shall engage in default aversion activities designed to prevent the default by a borrower. Default aversion activities are activities of a guaranty agency that are directly related to providing collection assistance to the lender on a delinquent loan prior to the loan being

legally in a default status (34 CFR section 682.404(a)(2)(ii)). In consideration of such efforts, the guaranty agency receives a default aversion fee (34 CFR section 682.404(j)).

Calculating the Fee – A guaranty agency may transfer a default aversion fee from its Federal Fund to its Operating Fund equal to 1 percent of the total unpaid principal and accrued interest owed on loans on which the lender requests default aversion assistance. However, if a loan on which the guaranty agency has received the default aversion fee is subsequently paid as a default claim, the guaranty agency must rebate funds to the Federal Fund by deducting the rebate funds from the default aversion fee calculation. The fees may be transferred from the Federal Fund to the Operating Fund no more frequently than monthly and may not be paid more than once on any loan (34 CFR section 682.404(j)).

Audit Objectives Determine whether the guaranty agency performed default aversion activities in accordance with the requirements, whether loans on which the default aversion fee was received were qualified, and whether the fees were calculated accurately.

Suggested Audit Procedures

- a. For a sample of loans, review documentation supporting that the loans qualified for and the guaranty agency performed the default aversion activities.
- b. For a sample of default aversion fee transfers:
 - (1) Verify that the default aversion fee was calculated accurately.
 - (2) Verify that default aversion fees were not paid more than once on the same loan.
- c. For a sample of defaulted loans, verify that the appropriate default aversion fees are returned to the Federal Fund.

5. Collection Efforts

Compliance Requirements The guaranty agency must engage in certain collection activities within certain time frames as prescribed by 34 CFR section 682.410(b)(6) on a loan for which it pays a default claim filed by a lender. These collection activities include written notices, contacts with borrowers, wage garnishments, etc. If a guaranty agency contracts with another party to perform default aversion assistance activities and collect defaulted loans, the party that provides default aversion assistance on a loan may not perform collection activity on that loan within three years of the date the default claim is paid (34 CFR sections 682.404(j) and 682.410(b)(6)).

Under DCL [GEN-21-03](#), guaranty agencies were directed to stop all collection efforts in March 2021 and return any involuntary amounts collected.

Audit Objectives Determine whether the guaranty agency performed required collection procedures on defaulted loans and that the collection contractor did not perform collection activities within three years of the default claim payment on loans for which it performed default aversion assistance.

Suggested Audit Procedures

- a. If the guaranty agency uses a collection contractor, review the contract to ascertain if the contract specified the required collection procedures to be followed for defaulted loans.
- b. For a sample of defaulted loan accounts, review documentation that supports that prescribed collection activities were followed.
- c. Verify that the collection contractor did not perform collection activity within the three-year period on loans for which it performed default aversion assistance.

6. Federal Share of Borrower Payments

Compliance Requirements If the borrower makes payments on a loan after the guaranty agency has paid a claim on that loan, the guaranty agency must pay the secretary an equitable share of those payments.

The secretary's equitable share is the portion of payments that remains after deducting:

- a. The complement of the reinsurance percentage in effect when reinsurance was paid on the loan (see III.N.2, "Federal Reinsurance Rate" for the applicable reinsurance rate. The complement of the reinsurance percentage equals 100 minus the federal reinsurance rate), and
- b. Sixteen percent of borrower payments (34 CFR section 682.404(g)(1)(ii)).

A guaranty agency may not retain the equitable share on loans that have been repaid by a Federal Consolidation Loan.

For defaulted loans, which are repaid by a consolidation loan, under separate authority, agencies are allowed to retain only the amount of collection costs charged to the borrower and paid off by the consolidation loan. The amount that may be retained is as follows: The guaranty agency can charge up to 18.5 percent of the outstanding principal and interest on the defaulted loan; however, the secretary is entitled to the lesser of actual collection costs charged or 8.5 percent of principal and interest outstanding on the defaulted loan, except that the guaranty agency may not retain any portion of the collection costs paid by a consolidation loan that exceed 45 percent of the agency's total collections on defaulted loans that year (34 CFR sections 682.401(b)(18) and 685.220(f)).

A guaranty agency is required to deposit into its Federal Fund all funds received on loans on which a claim has been paid, including default collections, within 48 hours (two business days) of receipt of those funds, minus any portion that the agency is authorized

to deposit into the Operating Fund. “Receipt of Funds” means actual receipt of funds by the guaranty agency or its agent, whichever is earlier (34 CFR section 682.419(b)(6)).

Audit Objectives Determine whether the secretary’s equitable share of borrower payments on defaulted loans is properly computed and deposited into the Federal Fund in a timely manner.

Suggested Audit Procedures

Test a sample of borrower payments on defaulted loans at the loan level to ascertain if the equitable share due ED was deposited into the Federal Fund in a timely manner.

7. Assignment of Defaulted Loans to ED

Compliance Requirements Unless the secretary notifies a guaranty agency in writing that other loans must be assigned to the secretary, a guaranty agency must assign any loan that meets all of the following criteria as of April 15 of each year: (a) the unpaid principal balance is at least \$100; (b) the loan, and any other loans held by the guaranty agency for that borrower, have been held by the agency for at least five years; (c) a payment has not been received on the loan in the last year; and (d) a judgment has not been entered on the loan against the borrower. The secretary may also direct a guaranty agency to assign to ED certain categories of defaulted loans held by the guaranty agency as described in 34 CFR section 682.409. In determining whether mandatory assignment from a guaranty agency is required, the secretary will review the adequacy of collection efforts. ED considers the guaranty agency’s record of success in collecting its defaulted loans, the age of the loans, and the amount of any recent payments on the loans (Section 428(c)(8) of the HEA (20 USC 1078(c)(8)); 34 CFR section 682.409).

DCL [GEN-21-03](#) required that guaranty agencies pause assigning loans that it would have otherwise assigned until it receives instructions from ED to resume those assignments and also required that guaranty agencies transfer loans meeting certain criterion to ED. Eligible loans for transfer include those in “population 2” of the DCL which is defined as:

“Population 2 includes outstanding loans on which a default claim was paid on or after March 13, 2020 and on or prior to the end date for the pause for loans held by [ED], that are not subject to an active bankruptcy filing, and are in default on or after the date of this letter...”

Audit Objectives Determine whether the guaranty agency assigned to ED all loans that were required to be assigned by statute, regulation, or DCL GEN-21-03, unless assignment has been paused in accordance with DCL GEN-21-03.

Suggested Audit Procedures

Review the guaranty agency’s aging of loans and identifications of loan populations to ascertain if the guaranty agency is holding loans that should be assigned to ED.

8. Federal Fund and Agency Operating Fund

Compliance Requirements- Federal Fund- A guaranty agency shall deposit in the Federal Fund the following:

- a. All amounts received from ED as payment of reinsurance or other claims on loans.
- b. All funds received by the guaranty agency from any source on FFEL loans on which a claim has been paid minus the portion the agency is authorized to deposit in its Operating Fund (must be deposited within 48 hours of receipt).
- c. Insurance premiums or federal default fees.
- d. Amounts received for Supplemental Preclaim Assistance (SPA) activity performed prior to October 1, 1998.
- e. Earnings from investments of the Federal Fund.
- f. Other receipts as specified in regulations (34 CFR section 682.419(b)).

The Federal Fund may only be used for the following purposes:

- a. To pay lender insurance claims.
- b. To transfer default aversion fees into the Agency Operating Fund.
- c. For other purposes listed in the regulations (34 CFR section 682.419(c)), including for any purpose authorized by the secretary (see N. Special Test 14. Lost Revenue).

Agency Operating Fund

The guaranty agency shall deposit into the Operating Fund:

- a. Account maintenance fees.
- b. Default aversion fees.
- c. The portion of the amounts collected on defaulted loans that remains after the secretary's share of collections has been paid and the complement of the reinsurance percentage has been deposited into the Federal Fund (34 CFR section 682.423).
- d. Other receipts as specified in regulations (34 CFR section 682.423(b)).

Funds in the Operating Fund may only be used for application processing, loan disbursement, enrollment and repayment status management, default aversion activities, default collection activities, school and lender training, financial aid awareness and

related outreach activities, compliance monitoring, and other SFA-related activities for the benefit of students (34 CFR section 682.423(c)).

Past problem areas concerning fund revenue and expense have included:

- a. Failure to credit funds received into the Federal Fund, including lock-box operations, within the specified period.
- b. Unauthorized expenses paid from the Federal Fund assets.
- c. Failure to report all credits to the Federal Fund on ED Form 2000.
- d. Use of the Federal Funds for other programs (e.g., Leveraging Educational Assistance Partnerships [LEAP] and state programs).
- e. Commingling of funds.

Audit Objectives Determine whether the guaranty agency credited the required amounts to the Federal and Operating Funds and used the resources of each fund solely for authorized purposes.

Suggested Audit Procedures

- a. Review revenue records to assure that amounts required to be credited to the Federal and Operating Funds were so credited. Review revenues and receipts that were not credited to the Federal or Operating Funds to assure that they were not inappropriately omitted.
- b. Test expenditures to ascertain if they were made for allowable purposes.
- c. Examine the general journal for unusual entries that impact the Federal or Operating funds.

9. Investments – Federal Fund

Compliance Requirements Funds transferred to the Federal Fund shall be invested in obligations issued or guaranteed by the United States or a state, or in other similarly low-risk securities selected by the guaranty agency, with the approval of the secretary (such as pooled investments as part of a state investment program). Earnings from the Federal Fund are the sole property of the federal government (Section 422A(b) of the HEA (20 USC 1072a(b)); and DCLID: [99-G-316](#)).

Audit Objectives Determine whether the agency invested federal funds only in approved securities or other instruments and properly accounted for investment earnings.

Suggested Audit Procedures

- a. Review investment activity during the period to ascertain that Federal Fund assets were invested in approved securities or other instruments.

- b. Ascertain that earnings were deposited in the Federal Fund.

10. Collection Charges

Compliance Requirements The guaranty agency must charge each defaulted borrower reasonable costs incurred by the agency for its default collection activities. The agency must charge these costs on defaulted loans whether acquired by a default or bankruptcy claim (34 CFR section 682.410(b)(2)). Costs of collection on defaulted loans include those direct costs of collection activities conducted after default on loans held by the agency, and indirect costs that are properly allocated to those same activities. Direct costs include the expenses listed in 34 CFR section 30.60(a), such as collection agency charges, court costs, and attorney fees.

Because HEA section 484A(b) makes the defaulter liable only for reasonable collection costs, and costs are reasonable only if they are based on actual collection expenses being incurred by the guaranty agency, the agency must ensure that the estimate is based on reliable data. A charge based on expense and recovery data incurred in the most recently completed and audited fiscal year of the guaranty agency can be reasonably expected to predict actual costs being incurred in the year for which the charge is assessed. However, when changes that will affect that rate are reasonably expected in expenses or recoveries during the year for which the charge is computed, adjustments may be warranted.

The rate or amount to be charged the borrower to satisfy collection costs is the least of the following three rates:

- a. The amount or rate, if any, specified in the borrower's note;
- b. The rate determined by dividing the agency's expected expenses by its expected recoveries for the period at issue; or
- c. The rate that would be charged if the loan were held by ED (through March 1, 2007, 25 percent of the amount of principal and interest satisfied from a payment; thereafter, 24 percent of the amount).

An agency that is limited to the amount charged by ED must conform its charges to the limits in paragraph c, above, no later than the date on which it ordinarily implements any adjustment based on its annual assessment of costs and recoveries.

There are instances when collection charges may not be assessed to the borrower at the rate determined as specified above:

- a. A guaranty agency may charge collection costs in an amount not to exceed 18.5 percent of the outstanding principal and interest on a defaulted FFELP loan that is paid off by a Federal Consolidation Loan. The guaranty agency must remit to the secretary a portion of the collection charge equal to the lesser of the amount charged the borrower or 8.5 percent of the outstanding principal and interest of the loan. A guaranty agency must remit directly to the secretary the entire amount of the collection charge with respect to each defaulted loan that is paid off with

excess consolidation proceeds, as defined in 34 CFR section 682.401(b)((18)(iv) (34 CFR section 682.401(b)(18)) (see III.N.6, “Federal Share of Borrower Payments”).

- b. Borrowers who make the required nine voluntary and on-time payments within ten months and whose loans are then rehabilitated by sale to an eligible lender may not be charged more than 16 percent of the outstanding principal and interest on the loans being rehabilitated (20 USC 1078-6(a)(1)(D)(i)(II)(aa); 34 CFR section 682.405(b)(1)(vi)). A guaranty agency may not charge any collection costs to a borrower who timely enters into a loan rehabilitation agreement or other repayment agreement as discussed in paragraph c, below.
- c. A guaranty agency may not charge collection costs to a borrower who enters into a loan rehabilitation agreement or other repayment agreement with the guaranty agency during the 60-day period after notice from the guaranty agency that the guaranty agency has paid a default claim and will report default status on the loan to national credit bureaus (34 CFR section 682.410(b)(5)(ii).
- d. For loans rehabilitated on or after March 13, 2020, DCL [GEN-21-03](#) requires that collection costs be reduced for loans considered “Population 3” which includes outstanding loans that were in default during the pandemic (regardless of when the claim was paid) and for which that default was resolved through rehabilitation or consolidation prior to March 13, 2020. The DCL states that:

“To provide parity with the treatment of loans held by [ED], a [guaranty agency] may not add collection costs to the loan when it is successfully rehabilitated but may reimburse itself for those costs....”

Therefore, borrowers charged collection costs during this time are owed a refund from the guaranty agency.

Audit Objectives To determine whether the guaranty agency charged appropriate costs for its default collection activities to borrowers on defaulted loans acquired by the guaranty agency either by payment of a default or bankruptcy claim. Determine if the guaranty agency has corrected borrower accounts for loans rehabilitated before May 12, 2021, during the Pandemic period.

Suggested Audit Procedures

- a. Test a sample of defaulted loan accounts to determine whether the guaranty agency charged only for reasonable costs of collection.
- b. Ascertain if the method used to calculate the amount charged (1) included only appropriate expenses of default collection activities, and (2) was limited to the amount prescribed by regulation.

- c. Review methodology for determining loans in Population 3 as defined by DCL GEN-21-03, and if the guaranty agency has made the required corrections. If the guaranty agency has not made the required corrections, document the identification method of Population 3 and validate these amounts.

11. Enforcement Action

Compliance Requirements The guaranty agency shall take measures to ensure enforcement of all federal, state and guaranty agency requirements and at a minimum, conduct biennial on-site program reviews of lenders that meet criteria specified in 34 CFR section 682.410(c)(1) or are selected using an alternative methodology approved by the secretary. The guaranty agency is required to use statistically valid techniques to calculate liabilities owed the secretary that the review indicates may exist; demand prompt payment from the responsible party; and refer to the secretary any case in which the payment of funds is not made within 60 days. A guaranty agency also is required to undertake or arrange for the prompt and thorough investigation of criminal or other programmatic misconduct by its program participants. It is responsible also for promptly reporting all of the allegations and indications of fraud or misconduct having a substantial basis in fact, and the scope, progress, and results of the agency's investigations (34 CFR section 682.410(c)).

Audit Objectives Determine whether the guaranty agency is carrying out program reviews and related enforcement activity in accordance with the above requirements.

Suggested Audit Procedures

- a. Review the guaranty agency's procedures for selecting lenders to review to ascertain if they meet the regulatory criteria or an alternative methodology approved by the secretary.
- b. Review the guaranty agency's program review guidance to ascertain if it is up-to-date and includes, when problems are found, a statistically valid method for determining liabilities due the secretary.
- c. Review program review reports to ascertain if amounts due the secretary were identified and, if so, whether appropriate demand for payment and follow-up was conducted.
- d. Through inquiry and review, determine whether the guaranty agency adopted procedures for reporting all allegations of misconduct having a substantial basis to ED. Review guaranty agency records on the follow-up of misconduct to determine whether ED was notified when appropriate.

12. Access to National Student Loan Data System (NSLDS)

Compliance Requirements Section 485B of HEA (20 USC 1092b) establishes principles for administering the NSLDS. The secretary is required to ensure that the primary purpose of access to the system by guaranty agencies is for legitimate program

operations and to take actions to maintain confidence in the NSLDS, including, at a minimum, developing standardized protocols for limiting access to the data system. NSLDS access and use requirements were issued by ED in Dear Colleague Letter GEN-05-06/FP-05-04 (<https://ifap.ed.gov/dear-colleague-letters/04-11-2005-gen-05-06-access-and-use-nslds-information>) *Access To and Use of NSLDS Information*, dated April 8, 2005, and expanded July 2009 in NSLDS Organization Access Process located at ([NSLDS Access](#)) [Subject: NSLDS Organization Access Process | Knowledge Center](#).

Each organization using the NSLDS is required to establish a Destination Point Administrator (DPA). The roles and responsibilities of the DPA are to ensure that authorized personnel use the NSLDS only for official government business. The responsibilities of the DPA include the following:

- a. Ensuring that all users are aware of their responsibilities regarding access to NSLDS.
- b. Monitoring the use and access of NSLDS data by all of the organization’s users.
- c. De-activating a User ID when the person to whom it was assigned is no longer with the organization or otherwise is no longer eligible to have access to NSLDS.
- d. Ensuring that information in or received from the NSLDS is protected from access by or disclosure to unauthorized personnel.

Audit Objectives Determine whether the guaranty agency has established required controls and oversight regarding NSLDS access.

Suggested Audit Procedures

- a. Review and evaluate the guaranty agency’s established and documented controls over access to the NSLDS.
- b. Verify that the entity removes NSLDS access when an employee terminates or is reassigned to a position not requiring NSLDS access.

13. Implementation of Dear Colleague Letter GEN-21-03 “Expansion of Collections Pause to Defaulted FFEL Program Loans Managed by Guaranty Agencies (Updated May 24, 2021)”

Compliance Requirements [Dear Colleague Letter GEN-21-03](#) required that all guaranty agencies identify three populations for all loans in its portfolio, stating as follows:

“On March 30, 2021, the U.S. Department of Education [ED] announced an expansion of the pause on federal student loan interest and collections on all defaulted loans in the FFEL Program that are managed by [guaranty agencies]. These flexibilities will be in place for the same period of time as the pause for loans held by [ED], which is currently slated to run through September 30, 2021.”

(Note: This “end date” was [updated to be through May 1, 2022](#), by the secretary.)

There are three populations of FFEL Program loans covered by the announcement:

- Population 1 includes outstanding loans on which a default claim was paid prior to March 13, 2020, that are not subject to an active bankruptcy filing, and are still in default as of the date of this letter;
- Population 2 includes outstanding loans on which a default claim was paid on or after March 13, 2020 and on or prior to the end date for the pause for loans held by ED, that are not subject to an active bankruptcy filing, and are in default on or after the date of this letter; and
- Population 3 includes outstanding loans that were in default during the pandemic (regardless of when the claim was paid) and for which that default was resolved through rehabilitation or consolidation prior to the date of this letter.

Actions Required to be Taken by Guaranty Agencies for Population 1

- Interest rates must be set to 0 percent;
- Payments received through Administrative Wage Garnishment (AWG), the Treasury Offset Program (TOP), and other forms of involuntary collection since March 13, 2020, must be refunded;
- Borrowers who made voluntary payments must be given the option for a refund of those payments;
- All forms of involuntary collection must be suspended;
- All collection attempts (including billings) must cease; and
- Borrowers with active rehabilitation agreements must be notified they are not required to make further payments to receive credit toward rehabilitation.

Actions Required to be Taken by Guaranty Agencies for Population 2

- All actions required for Population 1 loans;
- Deleting the guaranty agency’s trade line from a borrower’s credit report entirely; and
- Mandatory assignment of these loans to ED.

Actions Required to be Taken by Guaranty Agencies for Population 3

- All actions required for Population 1 loans; and

- Sending financial adjustments and associated money to purchasing lenders (for loan rehabilitations) or ED (for loan rehabilitations or consolidations).

The DCL describes in detail each action that guaranty agencies must take and the applicable waivers of the Higher Education Act of 1965, as amended (HEA), and ED’s implementing regulations that ED will exercise to facilitate these actions.

Audit Objectives Determine whether the guaranty agency has implemented DCL GEN-21-03 provisions and identify areas of non-implementation. Validate those controls used to identify each population are acceptable, reasonable and use a standardized approach. Identify and document all assumptions made in this process.

Suggested Audit Procedures

- a. Review and evaluate the guaranty agency’s methods for determining the population for all loans in its portfolio.
- b. Validate that all actions required for each loan populations were followed. Identify any areas of non-compliance.

14. Calculation of Lost Revenue

Compliance Requirements Dear Colleague Letter [GEN-21-03](#) allows a guaranty agency to reimburse itself from the Federal Fund for lost revenue that will be realized as a result of the implementation of the Dear Colleague Letter. That reimbursement, however, will only cover “...the share of what a [guaranty agency] might have reasonably collected during the pandemic but for the suspension. Lost revenue calculations will need to be submitted to Federal Student Aid’s Office of Partner Participation and Oversight’s Financial Oversight Service Group.

Guaranty agencies may reimburse themselves for this lost revenue from the Federal Fund on a quarterly basis based on their good-faith estimates, and without the requirement for prior approval from Federal Student Aid as to lost revenue. When the suspension ends, ED will compare the total amount reimbursed to the amount of lost revenue as submitted by the guaranty agency, with an attendant over-/under-payment process.

ED is not setting specific requirements for the guaranty agency’s estimate of its lost collection revenues for the purposes of seeking reimbursement from the Federal Fund, but the estimate must be made in good faith and supported by the guaranty agency’s records.

Audit Objectives Determine whether the guaranty agency has estimated its lost revenue in accordance with DCL GEN-21-03 and any additional related guidance and confirm that the estimation is supported by the guaranty agency’s records.

Suggested Audit Procedures

- a. Review the guaranty agency’s methods for determining its lost revenue and ensure that it complies with DCL GEN-21-03 and any relevant guidance.
- b. Review the guaranty agency’s lost revenue estimate and confirm that it is supported by the guaranty agency’s records.

IV. OTHER INFORMATION

Some “statewide” entities are defined to include a guaranty agency under the FFEL Program (Assistance Listing 84.032). For such entities, this Part 4 section should be used to identify pertinent compliance requirements. Auditors for “statewide” entities that incorporate a guaranty agency must consider the provisions of 2 CFR section 200.518(b)(3) in determining major programs. When those provisions apply, coverage of the FFEL Program for a guaranty agency as a major program must be identified and reported on separately as a major program in the Summary of Auditor’s Results Section of the Schedule of Findings and Questioned Costs, referring to the program as “Assistance Listing 84.032 (FFEL – Guaranty Agencies).”

Use of Third Party Servicers

Some guaranty agencies hire third party servicers to administer FFEL Program functions. Third party servicers are required to obtain a financial statement audit and an examination-level compliance attestation engagement under the March 2000 Audit Guide: Audits of Guaranty Agency Servicers Participating in the Federal Family Education Loan Program (Guaranty Agency Servicer Audit Guide), issued by ED. Auditors of guaranty agencies may exclude coverage of compliance requirements performed by a third party servicer, provided the auditor has determined that the third party servicer has obtained an audit under the Guaranty Agency Servicer Audit Guide for the entire audit period of the guaranty agency. If the third party servicer has a different audit period, the auditor of the guaranty agency must determine that the most recently required audit of the third-party servicer under the Guaranty Agency Servicer Audit Guide has been completed timely and must obtain a representation from the third party servicer that it has engaged (or will engage) an auditor to perform the required audit under the Guaranty Agency Servicer Audit Guide for the immediate subsequent audit period. The auditor of the guaranty agency must confirm that the audit period of the prior third party servicer audit, together with the audit period for the subsequent third party servicer audit, covers the entire audit period of the guaranty agency audit.

If the auditor excludes coverage of guaranty agency compliance requirements performed by a third party servicer, the *Report on Compliance for Each Major Federal Program and Report on Internal Control Over Compliance Required by Uniform Guidance* must clearly describe the compliance requirements for which coverage has been excluded, name the third party servicer that performed those compliance requirements, state that the third party servicer has obtained an audit performed under the March 2000 Guaranty Agency Servicer Audit Guide issued by ED, and specify the period of that audit. Alternatively, the auditor may decide to use a third party servicer’s audit (attestation engagement) and rely on it in rendering an opinion on compliance. In such cases, the auditor should obtain the servicer’s most recent compliance audit report and any other reports regarding servicer compliance.

If the servicer's compliance audit report or other reports contain findings of noncompliance, the auditor should assess the effect of that noncompliance on the nature, timing, or extent of substantive tests to be conducted at the guarantee agency and/or the third party servicer, as well as reporting that information. The auditor must also adhere to pertinent generally accepted auditing standards relating to use of servicer organization audits and reliance on the work of other auditors.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.032 FEDERAL FAMILY EDUCATION LOANS (LENDERS)

I. PROGRAM OBJECTIVES

Banks, schools, other financial institutions, governmental entities, or nonprofit organizations that meet the definition of an eligible lender in Section 435(d) of the Higher Education Act of 1965, as amended (HEA) (20 USC 1085(d)) may function as lenders under the Federal Family Education Loans (FFEL) program. All of these types of lenders must comply with the requirements generally applicable to lenders. However, there are additional compliance requirements that apply to schools as lenders.

II. PROGRAM PROCEDURES

Prior to July 1, 2010, eligible banks, savings and loan associations, credit unions, pension funds, insurance companies, and schools could make loans under the FFEL program (34 CFR section 682.101(a)). Under Section 435(d)(1) of the HEA (20 USC 1085(d)(1)), state agencies and nonprofit organizations also qualified as eligible lenders under certain conditions and for certain purposes. Schools that meet the requirements of 34 CFR section 682.601(a) could also make loans under the FFEL program. An eligible lender that holds loans as an eligible lender trustee for a school, or an organization affiliated with a school, and the school involved in such an arrangement are subject to certain restrictions on lending under Section 435(d)(7) of the HEA (20 USC 1085(d)(7)). These entities may continue to hold FFEL program loans until they are sold to another lender, repaid, or a claim is paid on the loan.

A lender (other than a school lender) holding more than \$5 million in FFEL loans during its fiscal year, and a school lender under 34 CFR section 682.601 that holds any FFEL loans during its fiscal year, must submit an independent annual compliance audit for that year conducted by a qualified independent organization or person (34 CFR section 682.305(c)(1)). Governmental entities or nonprofit organizations that function as lenders under the FFEL program must meet this requirement by auditing the school lender activity as a major program (or, if applicable, as part of the Student Financial Aid (SFA) Cluster) as part of the entity's single audit under 2 CFR Part 200, Subpart F. (For Schools that are Lenders, see guidance in IV, "Other Information.")

The SAFRA Act, Title II of the Health Care and Education Reconciliation Act of 2010, Pub. L. No. 111-152, provides that, after June 30, 2010, no new student loans will be made under the FFEL program. Therefore, beginning July 1, 2010, all new subsidized and unsubsidized Stafford Loans made to students, PLUS loans made to parents and to graduate/professional students, and consolidation loans made to borrowers, will be made under the Federal Direct Student Loans (Direct Loan) program (Assistance Listing 84.268).

Source of Governing Requirements

The FFEL program is authorized by Title IV, Part B, of the HEA, as amended (20 USC 1071 through 1087-4). Program regulations are located at 34 CFR Part 682.

Availability of Other Program Information

A number of documents contain guidance applicable to FFEL program lenders. They include:

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

Not Applicable

2.2 Level of Effort – *Supplement Not Supplant*

For schools that are lenders, proceeds from special allowance payments and interest payments from borrowers, interest subsidies received from the US Department of Education (ED), and any other proceeds from the sale of or other disposition of loans (exclusive of return of principal, any financing costs incurred by the school to acquire funds to make the loans, and the cost of charging origination fees or interest rates at less than the fees or rates authorized by the HEA) must be used to supplement, not to supplant, nonfederal funds that would otherwise be used for need-based grant programs (Section 435(d)(2)(C) of the HEA (20 USC 1085(d)(2)(C)); 34 CFR section 682.601(c)).

3. Earmarking

Not Applicable

I. Procurement and Suspension and Debarment

For schools that are lenders (see III.N.10, “Holding Loans as a Trustee for an Institution of Higher Education or an Affiliated Organization”), any contract awarded for financing, servicing, or administration of FFEL loans must be awarded on a competitive basis (Section 435(d)(2)(A)(iv) of the HEA (20 USC 1085(d)(2)(A)(iv)); 34 CFR section 682.601(a)(4)).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable
- d. *Lender’s Interest and Special Allowance Request and Report (LaRS) (OMB No. 1845-0013)* – The LaRS is used by ED to calculate interest subsidies, special allowance payments due to lenders, and excess interest owed ED. It is also used to obtain information about the lender’s FFEL program portfolio. For lenders to receive payments of interest benefits and special allowance payments, quarterly reports must be submitted to ED on the LaRS. The lender must submit fully completed quarterly LaRS to ED even if the lender is not owed, or does not wish to receive interest benefits or special allowance payments from ED.

The LaRS must be submitted within 90 days after the end of the quarter to be considered timely. When testing of LaRS information is requested later in this program supplement, that testing can be done concurrently with this testing. See 34 CFR section 682.414(a)(4)(ii) for more information.

The LaRS is a five-part form with a cover page.

(1) *Page I* – The first page of the form identifies the lender by name and identification number and, if the lender uses a servicer to prepare the form, the servicer’s name, and identification number. It also requires that an official representative of the lender certify that the data reported is correct and that it conforms to the laws, regulations, and policies applicable to the FFEL Program.

(2) *Part I – Lender Origination and Lender Loan Fees* – This part contains information on the amount of funds disbursed during the quarter and the amount of loan origination and lender loan fees due to ED. (As there are no new loans originated under the FFEL program, this part is limited to adjustments and cancellations of previously disbursed loans.)

(3) *Part II – Interest Benefits* – This part contains information on the amount of interest benefits due to the lender on eligible loans.

(4) *Part III – Special Allowance* – This part contains information for the lender to request special allowance payments from ED. The loan information must be separated according to loan type, applicable interest rate, and special allowance categories. ED calculates the amount of special allowance payments due to the lender and/or the amount of excess interest owed to ED, based on this data.

(5) *Part IV – Loan Activity* – This part contains information regarding any changes in principal amounts for each type of FFEL program loan in the lender’s portfolio during the quarter.

(6) *Part V – Loan Portfolio Status* – This part contains information regarding the status of the outstanding loan principal for each type of FFEL program loan in the lender’s portfolio at the end of the quarter.

The information reported on the LaRS is subject to levels of edit checks for data reasonability during ED’s processing of the payment request. In some cases, the form will be rejected and returned to the lender for correction. In other cases, ED notifies the lender that its submission failed to pass certain reasonability edits and instructs the lender to determine if the errors resulted in an incorrect payment of interest benefits or special allowance. The lender is further instructed by ED to make applicable adjustments to the affected loan balances on the next quarterly report. The lender is required to keep records necessary to support the amounts reported on the LaRS (34 CFR section 682.305(a)).

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions**1. Individual Record Review**

Compliance Requirements A lender is required to maintain current, complete, and accurate records of each loan that it holds. These loan records (files) form the basis for the information contained in the LaRS. The records must be maintained in a system that allows ready identification of each loan's status. Except for the loan application and the promissory note, these records may be stored in microform, computer file, optical disk, CD-ROM, or other media formats provided that the means of storage meets the requirements in 34 CFR sections 668.24(d)(3)(i) through (iv) (34 CFR section 682.414(a)).

The required records are identified in 34 CFR section 682.414(a)(4)(ii) and are listed below.

- a. A copy of the loan application if a separate application was provided to the lender
- b. A copy of the signed promissory note
- c. The repayment schedule
- d. A record of each disbursement of loan proceeds
- e. Notices of changes in a borrower's address and status as at least a half-time student
- f. Evidence of the borrower's eligibility for a deferment
- g. The documents required for the exercise of forbearance
- h. Documentation of the assignment of the loan
- i. A payment history showing the date and amount of each payment received from or on behalf of the borrower, and the amount of each payment that was attributed to principal, interest, late charges, and other costs
- j. A collection history showing the date and subject of each communication between the lender and the borrower or endorser relating to collection of a delinquent loan; each communication (other than regular reports by the lender showing that an account is current) between the lender and a credit bureau regarding the loan; each effort to locate a borrower whose address is unknown at any time; and each

request by the lender for default aversion assistance on the loan

- k. Documentation of any Master Promissory Note confirmation process or processes
- l. Any additional records that are necessary to document the validity of a claim against the guarantee or the accuracy of reports submitted.

Note: Original Loan Applications and Promissory Notes. If the audit sample includes loans that the lender no longer owns, such as loans that the lender sold to another party, loans that were repaid by a consolidation loan or loans, or assigned to a guaranty agency, the auditor may perform alternative procedures to obtain access to and review the original documents. The alternative procedures could include, but are not necessarily limited to, the review of (1) a copy or image maintained by the lender or servicer of the original document; or (2) a certified true copy, obtained from the entity that currently holds the original loan document, that may be compared to the lender's document.

Audit Objectives Determine whether the lender maintained current, complete, and accurate loan records.

Suggested Audit Procedures

- a. Trace loan information from the lender's summary records/ledgers to detailed loan records.
- b. Test a sample of individual loan files and determine if the lender maintained the required documents and the information recorded in the detailed loan record agrees with the information in these documents and the summary records.

2. Interest Benefits

Compliance Requirements *Payment of Interest Benefits*- ED pays the lender interest benefits (see 34 CFR section 682.202(a) for applicable FFEL interest rates) on eligible FFEL program loans (subsidized Stafford and certain consolidated loans) on behalf of a qualified borrower during certain loan statuses including:

- a. All periods prior to the beginning of the repayment period;
- b. Any period when the borrower has an authorized deferment (34 CFR section 682.300); and
- c. During a period that does not exceed three consecutive years from the established repayment period start date on each loan under the income-based repayment plan and that excludes any period during which the borrower receives an economic hardship deferment if the borrower's monthly payment amount is not sufficient to pay the accrued interest on the borrower's loan or on the qualifying portion of the borrower's Consolidation Loan.

Payment of Interest Benefits on Consolidated Loans- Consolidation loan borrowers qualify for interest benefits during authorized periods of deferment on the portion of the loan that does not represent Health Education Assistance Loans (HEAL) if the loan application was received by the lender on or after:

- a. January 1, 1993, but prior to August 10, 1993;
- b. August 10, 1993, but prior to November 13, 1997, if the loan consolidates only subsidized Stafford loans; or
- c. November 13, 1997, but prior to July 1, 2010, for the portion of the loan that repaid subsidized FFEL loans and Direct Subsidized Loans (34 CFR section 682.301(a)(3)).

Termination of Interest Benefits- Generally, ED's obligation to pay interest benefits to a lender ceases when the eligible borrower enters repayment status and does not qualify for a deferment. Interest benefits to the lender also begin or terminate with certain other date-specific events enumerated in 34 CFR sections 682.300(b)(2) and (c).

Reporting of Interest Benefits- The information needed for ED to calculate interest benefits is reported in Part II of the LaRS. See 34 CFR section 682.202(a) for applicable interest rates for FFEL program loans. The Servicemembers Civil Relief Act (50 USC App. 527) (SCRA), which limits the interest rate on a borrower's loan to 6 percent during the borrower's active duty military service, applies to FFEL loans. This limitation applies to borrowers who were in military service as of August 14, 2008, but a borrower is not entitled to a refund of interest paid above the 6 percent rate prior to that date. The SCRA interest rate limit does not apply to an endorser to a PLUS loan made to a parent or graduate/professional student unless that individual is also performing eligible military service (50 USC App. 527). Lenders must also limit interest billing to ED to an interest rate of no more than 6 percent for borrowers that qualify for SCRA interest rate cap (34 CFR 682.208(j)).

Consolidation Loan Interest Payment Rebate Fee- Consolidation loan interest payment rebate fees are required on a monthly basis from lenders that hold federal consolidation loans with first disbursements after October 1, 1993. The monthly rebate fee is 0.0875 percent (1.05 percent annualized) of the unpaid balance of the principal and the accrued unpaid interest on all federal consolidation loans disbursed after October 1, 1993 and held by the lender on the last day of the month. For loans based on applications received during the period October 1, 1998 through January 31, 1999, inclusive, the monthly rebate fee is 0.05167 percent (0.62 percent annualized) of the unpaid balance of principal and accrued unpaid interest. Consolidation loan rebate fees (CLRF) are reported monthly using the FFEL Consolidation Loan Rebate Fee Report and Remittance Form (*OMB No. 1845-0046*) (Section 428C(f) of the HEA (20 USC 1078-3(f))).

Audit Objectives Determine whether interest benefits were accurately calculated and billed to ED and that the CLRF were submitted on a monthly basis to ED.

Suggested Audit Procedures

- a. Test that the loans are assigned the correct interest rate in accordance with 34 CFR section 682.202(a) and 50 USC App. 527 and are reported in the correct interest rate category in the LaRS.
- b. Test that the lender begins and ends billings to ED for interest benefits on the appropriate day for loans in an in-school, grace, or authorized deferment period.
- c. Review loan records, disbursement records, or other documentation to verify that interest is billed only for periods specified in 34 CFR section 682.300(b)(2) and is not billed for interest covered under 34 CFR section 682.300(c).
- d. For consolidated loans on which the lender has claimed interest benefits, review the history files, and verify that the loans qualified for interest payments.
- e. For consolidated loans subject to the consolidation loan interest payment rebate fee, verify that fees were calculated accurately and submitted on a monthly basis.
- f. Test the accuracy of the average daily balance or actual accrual calculations by recalculating amounts or by reasonableness tests.

3. Special Allowance Payments

Compliance Requirements *Special Allowance Payments/Return of Excess Interest-* In addition to interest benefits, ED pays a special allowance to the lender on the average daily outstanding balance of eligible FFEL loans. ED computes the special allowance payable to the lender based upon the average daily balance computed by the lender. The amount of each quarterly special allowance payment on a loan will vary according to the type of FFEL program loan, the date the loan was disbursed, the loan period, and the loan status. The lender reports in Part III of the LaRS the average daily principal balance of those loans in each category qualifying for the payment. In addition, ED will calculate the amount of excess interest or negative special allowance owed to ED. ED computes the special allowance payment due to the lender during processing of the LaRS (34 CFR sections 682.304 through 682.305).

Loans Eligible for Special Allowance Payments-See 34 CFR section 682.302(b) for details on loans eligible for special allowance payments. Limitations on the payment of a special allowance for PLUS loans were eliminated by the Higher Education Reconciliation Act (HERA) (Pub. L. No. 109-171). Lenders may receive special allowance payments on PLUS loans that were first disbursed on or after January 1, 2000, and before July 1, 2006, for periods beginning April 1, 2006 (Section 438(b)(2)(I) of the HEA (20 USC 1087-1(b)(2)(I)). The average loan principal, including capitalized interest, is to be calculated using the average daily balance method defined in 34 CFR section 682.304(d). For any FFEL loan that is subject to the SCRA six percent interest rate limit, for those FFEL loans first disbursed on or after July 1, 2008, the applicable interest rate used in calculating the lender's special allowance payment is the SCRA-determined rate. Interest benefits due the lender may be calculated by using either the average daily balance or actual accrual methods in 34 CFR sections 682.304(b) and (c).

Special Allowance Rates for Loans Made on or After October 1, 2007, but Prior to July 1, 2010-Except for certain loans made from funds derived from tax-exempt sources, the special allowance rate for any eligible loan, for which the first disbursement of principal was made on or after October 1, 2007, is to be calculated according to the formulas described in:

- a. Section 438(b)(2)(I)(vi)(I) of the HEA (20 USC 1087-1(b)(2)(I)(vi)(I)) (34 CFR section 682.302(f)(1)) for a loan that is held by an entity that does not qualify as an “eligible not-for-profit holder,” or
- b. Section 438(b)(2)(I)(vi)(II) of the HEA (20 USC 1087-1(b)(2)(I)(vi)(II)) (34 CFR section 682.302(f)(2)) for a loan that is held by an entity that qualifies as an “eligible not-for-profit holder.”

An “eligible not-for-profit holder” is an eligible lender under Section 435(d) of the HEA (20 USC 1085(d)), other than a school lender, that is—

- a. A state, or a political subdivision, agency, authority, or instrumentality of a state, including an entity eligible to issue bonds described in section 144(b) of the Internal Revenue Code (Code), or in 26 CFR section 1.103-1;
- b. A not-for-profit entity described in section 150(d)(2) of the Code that has not made the election described in section 150(d)(3) of the Code to relinquish that status;
- c. A not-for-profit entity described in section 501(c)(3) of the Code; or
- d. A trustee acting on behalf of a governmental or nonprofit entity listed above, without regard to whether that entity qualifies as an eligible lender under Section 435(d) in its own right (Section 435(p) of the HEA (20 USC 1085(p); 34 CFR section 682.302(f)(3)).

Loans that are held by a governmental or nonprofit entity that is an eligible lender under Section 435(d) of the HEA may qualify for the higher special allowance rate, as may loans held by an eligible lender trustee on behalf of such an entity. Loans held by the entity or eligible lender trustee qualify for the higher rate only if the governmental or nonprofit entity—

- a. On September 27, 2007, either acted as an eligible lender under Section 435(d) of the HEA (other than as a school lender), or was the sole beneficial owner of a FFEL program loan that was eligible for special allowance payments;
- b. Is neither owned nor controlled, even in part, by a for-profit entity; and
- c. Remains the sole beneficial owner of such loans and the income from such loans (Section 435(p)(2) of the HEA (20 USC 1085(p)(2))).

The grant of a security interest in a loan or its income, or the pledge of the loan or income as collateral, in order to secure a debt obligation issued by a governmental or nonprofit entity, does not affect the not-for-profit eligibility status of that entity or of an eligible lender trustee to the extent acting on its behalf (Section 435(p)(2)(E) of the HEA (20 USC 1085(p)(2)(E))).

An eligible lender trustee may not receive compensation in excess of reasonable and customary rates for serving as a trustee for a governmental or nonprofit entity (Section 435(p)(2)(D) of the HEA (20 USC 1085(p)(2)(D))).

Note that a state is permitted to designate a not-for-profit entity that was not acting as an eligible lender under Section 435(d) of HEA on September 27, 2007, as a new “eligible not-for-profit holder” (34 CFR section 682.302(f)(3)).

Loans Made or Purchased with Funds from the Issuance of Tax-Exempt Obligations- The special allowance rate payable on loans made or purchased from funds derived from tax-exempt obligations depends on the specific source of funds used to acquire the loan, whether specified events occurred after its acquisition, the date the loan was acquired, the rate payable on the loan when it was acquired, and the characteristics of the lender that acquired the loan (Section 438 of the HEA (20 USC 1087-1)).

With limited exceptions, for HERA small lenders (see below), the special allowance rates for loans made on or after October 1, 2007, are the same for all loans, regardless of the source of funding, and differ only with respect to the status of the holder of the loan. Loans made before October 1, 2007, that were acquired with funds from tax-exempt obligations originally issued prior to October 1, 1993, receive a special allowance at one-half the rate otherwise payable, but not less than needed to provide, including the interest on the loan, an annualized return of 9.5 percent (sections 438(b)(2)(B)(i), (ii), and (iv) of the HEA (20 USC 1087-1(b)(2)(B)(i), (ii), and (iv))). This separate rate is referred to as the “9.5 percent floor.”

Loans acquired with funds from tax-exempt obligations originally issued on or after October 1, 1993 receive the same special allowance rate as loans acquired with funds

from sources other than tax-exempt obligations. An obligation that was issued to obtain funds to make loans, or to acquire an interest in a loan (including an interest by pledge of the loan as collateral), is considered to have been originally issued on the date it was issued. A tax-exempt obligation that refunds or is one of a series of tax-exempt refunding obligations, is considered to have been originally issued when the initial obligation was issued (Section 438(b)(2)(B)(iv) of the HEA (20 USC 1087-1(b)(2)(B)(iv))).

Only loans made or purchased from an eligible funding source specified in 34 CFR section 682.302(c)(3)(i) may qualify for the 9.5 percent floor. Those sources are funds obtained from:

- a. The proceeds of a tax-exempt obligation originally issued prior to October 1, 1993;
- b. Collections or default payments by a guarantor on a loan acquired with the proceeds of such an obligation;
- c. Interest benefits or special allowance payments received on a loan acquired with the proceeds of such an obligation;
- d. The sale of a loan acquired with the proceeds of such an obligation; or
- e. The investment of the proceeds of such an obligation.

Special allowance at the 9.5 percent floor may be received on claims submitted for the quarter ending December 31, 2006 and thereafter only if the lender has submitted, and ED has accepted, a report of an audit conducted under a methodology prescribed for this purpose that identifies those loans that have been acquired from the eligible sources in the previous paragraph, and the lender has submitted, for each such claim, a management certification that SAP is claimed at that rate only on loans determined through that process to be eligible. (See Dear Colleague Letters FP-07-01 and FP-07-06.)

However, loans made from or purchased using these eligible sources do not qualify for the 9.5 percent floor if the loans were made or purchased after February 7, 2006, or for loans made before that date and purchased after that date, did not qualify on that date for special allowance at the 9.5 percent floor (Section 438(b)(2)(B)(vi) of the HEA (20 USC 1087-1(b)(2)(B)(vi)); 34 CFR section 682.302(e)(4)).

These deadlines were deferred until December 31, 2010, with respect to a “HERA small lender,” a loan holder that on February 8, 2006, and during the quarter for which the special allowance is paid:

- a. Was a unit of state or local government or a private nonprofit entity;
- b. Was not owned or controlled by, or under common ownership with, a for-profit entity; and

- c. Held directly or through any subsidiary, affiliate, or trustee, a total unpaid balance of principal equal to or less than \$100 million on loans for which special allowances were paid under section 438(b)(2)(B) in the most recent quarterly payment prior to September 30, 2005(Section 438(b)(2)(B)(vii) of the HEA (20 USC 1087-1(b)(2)(B)(vii)); 34 CFR section 682.302(e)(5)).

Loans that are eligible for the 9.5 percent floor may lose eligibility for that rate and revert to the usual rates for any loan that is:

- a. Pledged or otherwise transferred prior to October 1, 2004 from the tax-exempt obligation used to acquire the loan, unless either of the following applies:
 - (1) The loan is pledged or transferred in consideration of funds listed in 34 CFR section 682.302(c)(3)(i) or from a tax-exempt refunding obligation, or
 - (2) The prior tax-exempt obligation used to acquire the loan is neither retired nor deceased with yield-restricted obligations;
- b. Financed by a tax-exempt obligation that, after September 30, 2004, has matured, been refunded, or is retired or deceased;
- c. Refinanced after September 30, 2004 with funds obtained from a source other than the funds listed in 34 CFR section 682.302(c)(3)(i);
- d. Sold or transferred to any other holder after September 30, 2004.

Section 438(b)(2)(B) of the HEA (20 USC 1087-1(b)(2)(B)); 34 CFR sections 682.302(e)(2) and (3)).

Termination of Special Allowance Payments on a Loan-Special allowance payments on loan balances terminate when a date-specific event occurs and the loan is no longer eligible for the payment. These date-specific events are described in detail in 34 CFR section 682.302(d) and include the following:

- a. The date a borrower's loan is repaid;
- b. The date a borrower's loan check is returned uncashed to the lender;
- c. The date the lender receives payment on a claim for loss on the loan;
- d. The date the loan ceases to be guaranteed or ceases to be eligible for reinsurance, regardless of whether the lender has filed a claim for loss on the loan with the guarantor;
- e. The 60th day after the borrower's default on the loan, unless the lender files a claim for loss on the loan with the guarantor together with all the required documentation on or before the 60th day;

- f. The 120th day after disbursement if the loan check has not been cashed on or before that date or if the loan proceeds disbursed by EFT have not been released from the restricted account maintained by the school on or before that date;
- g. The 30th day after the date the lender received a returned claim from the guaranty agency due solely to inadequate documentation on a loan submitted by the regulatory deadline for loss on the loan (unless the lender files a claim for loss on the loan with the guarantor, together with the required documentation prior to the 30th day); and
- h. The date on which the lender determines the loan is legally unenforceable based on receipt of an identity theft report under 34 CFR section 682.208(b)(3).

Loss of Interest and Special Allowance Payment Benefits-A lender can lose reinsurance coverage and interest and special allowance payment benefits due to violations of due diligence requirements on a loan (see III.N.7, “Due Diligence by Lenders in the Collection of Delinquent Loans”). To reinstate reinsurance and other federal payments on the loan, the violation has to be “cured” (see III.N.9, “Curing Due-Diligence and Timely Filing Violations”). See Appendix D to 34 CFR Part 682 for more information.

Audit Objectives Determine whether special allowance payments were earned and reported properly.

Suggested Audit Procedures

- a. Test that the lender is reporting all eligible loans in its portfolio in Part III of the LaRS by the proper year, quarter, interest rate, and special allowance category.
- b. Using the results of any audit conducted by or for the lender under Dear Colleague Letter FP-07-06 and accepted by ED, test that the lender is accurately reporting for the 9.5 percent floor only those loans that—
 - (1) were identified as a result of the audit as made or purchased with eligible sources of funds, or
 - (2) if made or acquired by the lender after December 31, 2006, were made or purchased with funds obtained from repayments, sales, or interest or special allowance payments on loans that were established by such audit to be first-generation loans, as that term is used in Dear Colleague Letter FP 07-01, and
 - (3) unless held by a lender that qualified for deferral until December 30, 2010,
 - (a) were made or purchased prior to February 8, 2006, and
 - (b) were eligible for 9.5 percent floor on February 8, 2006.

- c. Test that the lender is terminating special allowance requests on loan balances when a date-specific event specified in 34 CFR section 682.302(d) occurs, as documented in the borrower’s file.
- d. Test that the lender is terminating billing under the 9.5 percent floor when disqualifying events specified in HEA and 34 CFR sections 682.302(e)(2) and (3) occur.
- e. Test the accuracy of the average daily balance calculations as defined in 34 CFR section 682.304(d) by recalculating amounts or by reasonableness tests.
- f. Test a sample of loans included in the average daily balances to determine that the average daily balances do not include loans that are not eligible for special allowance payments.
- g. For loans made on or after October 1, 2007 through June 30, 2010, for which the lender claimed special allowance as an “eligible not-for-profit holder,” examine if the lender claimed special allowance on loans held as a trustee on behalf of another entity—
 - (1) the claim was limited to loans to which a governmental or nonprofit entity listed above held full beneficial ownership; and
 - (2) the lender was compensated by the governmental or nonprofit entity at a rate in excess of that paid other eligible lender trustees holding FFEL program loans, and if so, by what amount.

4. Loan Sales, Purchases, and Transfers

Compliance Requirements Loan sales, purchases, and transfers between eligible lenders entail special portfolio management risks and, therefore, require special controls. The lender must exercise due care in ensuring that gaps in servicing do not occur, possibly affecting the reinsurance of the loan. The lender must notify the borrower, either jointly with the other party or separately, of the transfer of the loan and the purchasing lender must notify the guaranty agency of the loan transfer (34 CFR section 682.208(e)). Within 90 days of its acquisition of the loan, the purchasing lender shall report to at least one national credit bureau the information required in 34 CFR section 682.208(b)(2). In addition, the HEOA amended Section 428 (b)(2)(F) of the HEA (20 USC 1078(b)(2)(F)), which requires that a borrower be notified if the transfer, sale, or assignment of the borrower’s loan will result in a change in the identity of the party to whom the borrower must send payments or direct any communications. After August 13, 2008, the borrower also must be advised of the effective date of the transfer of the loan, the date on which the current loan servicer (as of the date of the notice) will stop accepting payments, and the date on which the new loan servicer will begin accepting payments (20 USC 1078(b)(2)(F)). If an originating lender sells or otherwise transfers a loan to a new holder, ED will hold the originating lender liable for the payment of the origination and lender fees and will not pay interest benefits or a special allowance to the new holder or pay

reinsurance to the guaranty agency until the origination fees are paid to ED (34 CFR section 682.305(a)(4)).

Audit Objectives Determine whether loan sales, purchases, and transfers were made in accordance with ED requirements and that accurate records of such transactions were maintained.

Suggested Audit Procedures

- a. For a sample of loans, trace the principal amount of loans sold as reported on the LaRS to the bills of sale.
- b. Review a sample of the loan purchase/sales agreements and ascertain the terms of the agreements as to the day of sale, transfer of funds, and responsibility for loan origination and lender fees. Test that the sale/purchase was conducted in accordance with these terms and the date-specific event was properly noted in the lender's records as to the start/end date of eligibility for interest benefits and special allowance.
- c. Select a sample of loans that were transferred to the lender during the audit period and verify that all applicable LaRS loan data, including beginning balances, was entered completely and accurately into the lender's system. Verify that all required supporting loan documentation was obtained and maintained.
- d. Select a sample of loans that were transferred, sold, or assigned on or after August 14, 2008, and determine if the borrower was notified with the required information.

5. Enrollment Reports

Compliance Requirements Schools are required to confirm and report to the National Student Loan Data System (NSLDS) the enrollment status of students who receive federal student loans. This process is called Enrollment Reporting. Enrollment information is used to determine the borrower's eligibility for in-school status, deferment, interest subsidy, and grace period. Enrollment changes, such as a change from full-time to half-time status, graduation, withdrawal, or an approved leave of absence, are changes that need to be reported. The enrollment information is merged into the NSLDS database and reported to guarantors, lenders, and servicers of student loans.

Lenders must use the NSLDS data to make adjustments for interest and special allowance billings on each loan. The billing for interest benefits and special allowance payments relies on the timely and proper processing of student enrollment information, including timely conversion to repayment status. The conversion of a loan to repayment status is subject to a number of conditions as defined in 34 CFR section 682.209. Typically, Stafford loan borrowers begin repayment 6 months following the date on which the borrower is no longer enrolled on at least a half-time basis at a school. PLUS and consolidation loans go into repayment on the day the loan is disbursed, or if disbursed in

multiple installments, on the date the loan is fully disbursed. The first payment is due within 60 days of the date the loan is fully disbursed (34 CFR section 682.209).

Audit Objectives Determine whether, upon receipt of Enrollment Reports or other notification of change information, the lender accurately and timely updated loan records for changes to student status, including conversion to repayment status.

Suggested Audit Procedures

- a. Trace a sample of loans from the Enrollment Reports received during the period to loan records to determine if changes to student enrollment status were made accurately.
- b. Determine whether conversions to repayment status were made within required time limits.
- c. Obtain and review the error reports (manifests, in-school discrepancy reports, or out-of-school status reports), if any, generated by the lender that identify discrepancies between the Enrollment Reports and the lender's records.
- d. For a sample of loans, trace student enrollment data to any interim status reports or other notification of change information that may have been received directly from the school.

6. Payment Processing

Compliance Requirements Except in the case of payments made under an income-based repayment plan, the lender may credit the entire payment amount first to any late charges accrued or collection costs, then to any outstanding interest, and then to any outstanding principal. A borrower may prepay all or part of a loan at any time without a penalty. Unless the borrower requests otherwise, if a prepayment equals or exceeds the established monthly payment amount, the lender shall apply the prepayment to future installments and advance the next payment due date. The lender must (1) inform the borrower in advance that any additional full payment amounts submitted without instructions as to their handling will be applied to future scheduled payments with the borrower's next scheduled payment due date advanced, or (2) provide a notification after the payment is received stating that the payment has been so applied and the due date of the borrower's next scheduled payment. Information related to the next scheduled payment due date need not be provided to a borrower making prepayments while in an in-school, grace, deferment, or forbearance period when payments are not due (34 CFR section 682.209(b)). Interest must be charged in accordance with 34 CFR sections 682.202(a) and (b).

Income-Based Repayment Plan- The HEA provides an income-based repayment (IBR) plan that enables a borrower who has had a partial financial hardship to make a lower monthly payment with certain exceptions. The IBR plan has different rules for applying payments. For loans repaid under the IBR plan, the lender must apply payments in the order of (1) accrued interest, (2) collection costs, (3) late charges, and (4) loan principal (Section 428(b)(9)(A)(v) of the HEA (20 USC 1078(b)(9)(A)(v))).

Audit Objectives Determine whether the lender (1) calculated interest and principal in accordance with 34 CFR sections 682.202 (a) and (b), and (2) applied loan payments and prepayments in accordance with 34 CFR section 682.209(b), or in the case of prepayments, with the documented specific request of the borrower.

Suggested Audit Procedures

- a. Test whether the lender applied the borrower payments and prepayments to loan records in accordance with payment application requirements.
- b. Test that application of principal and interest were appropriately calculated and that the correct amount was applied to the individual borrower's loan balance.
- c. Test if prepayments were allocated in accordance with ED regulatory requirements or, if applicable, borrower instructions.

7. Due Diligence by Lenders in the Collection of Delinquent Loans

Compliance Requirements Lenders are required to engage in specific collection activities and meet specific claim-filing deadlines on delinquent loans. In the case of a loan made to a borrower who is incarcerated, residing outside the United States or its territories, Mexico, or Canada, or whose telephone number is unknown, the lender may send a forceful collection letter instead of each telephone effort described below. There are also specific collection activities that must be performed before a lender can file a default claim on a loan with an endorser. The due diligence provisions preempt any State law, including state statutes, regulations, or rules that would conflict with or hinder satisfaction of the requirements or frustrate the purposes of that section (34 CFR section 682.411).

Definition of Delinquency – Delinquency on a loan begins on the first day after the due date of the first missed payment. The due date of the first payment is established by the lender but must follow the deadlines specified in 34 CFR section 682.209(a). If a payment is made late, the first day of delinquency is the day after the due date of the next missed payment. A payment that is within \$5.00 of the amount normally required to advance the due date may advance the due date if the lender's procedures allow for that advancement (34 CFR section 682.411(b)).

Definition of Collection Activity- Collection activity with respect to a loan is defined as:

- a. Mailing or otherwise transmitting to the borrower at an address that the lender reasonably believes to be the borrower's current address, a collection letter or final demand letter that satisfies the timing and content requirements of 34 CFR sections 682.411(c), (d), (e), or (f);
- b. Attempting telephone contact with the borrower;
- c. Conducting skip-tracing efforts, in accordance with 34 CFR sections 682.411(h)(1) or (m)(1)(iii) to locate a borrower whose correct address or telephone number is unknown to the lender;
- d. Mailing or otherwise transmitting to the guaranty agency a request for default aversion assistance available from the agency on the loan at the time the request is transmitted; or
- e. Any telephone discussion or personal contact with the borrower as long as the borrower is apprised of the account's past-due status (34 CFR section 682.411(l)(5)).

Gaps in Collection Activity

A lender/servicer may not permit the occurrence of a gap of more than 45 days (or 60 days in the case of a transfer) in collection activity on a loan (34 CFR section 682.411(j)).

Due Diligence Documentation

A lender is required to maintain complete and accurate records of each loan that it holds. In determining whether the lender met the due diligence compliance requirements pertaining to collection of delinquent loans, the documentation maintained must include a collection history showing the date and subject of each communication between the lender and the borrower or endorser relating to collection of a delinquent loan; each communication (other than regular reports by the lender showing that an account is current) between the lender and a credit bureau regarding the loan; each effort to locate a borrower whose address is unknown at any time; and each request by the lender for default aversion assistance on the loan (34 CFR section 682.414(a)(4)).

Failure to Comply with Due-Diligence Regulations

Failure to comply with the federal due-diligence regulations will result in the loss of reinsurance for the guaranty agency, the loss of a lender's right to receive an insurance payment from the guaranty agency's Federal Fund, and the lender's right to receive interest and special allowance (34 CFR Part 682, Appendix D, paragraph I.B.3).

Due-Diligence Requirements for Loans with Monthly and Less-than-Monthly Repayment Obligations

The required collection activities are described below. As part of one of the collection activities, the lender must provide the borrower with information on the availability of the Student Loan Ombudsman's office (34 CFR section 682.411).

One to 15 Days Delinquent: One written notice or collection letter should be sent to the borrower informing the borrower of the delinquency and urging the borrower to make payments sufficient to eliminate the delinquency (except in the case where a loan is brought into this period by a payment on the loan, expiration of an authorized deferment or forbearance period, or the lender's receipt from the drawee of a dishonored check submitted as a payment on the loan). The notice or collection letter sent during this period must include, at a minimum, a lender contact, a telephone number, and a prominent statement informing the borrower that assistance may be available if he or she is experiencing difficulty in making a scheduled repayment.

Sixteen to 180 Days Delinquent (16–240 days delinquent for a loan repayable in installments less frequently than monthly): Unless exempted as set forth in 34 CFR section 682.411(d)(4), during this period the lender shall engage in the following:

- a. At least four diligent telephone contacts (see definition of a “diligent telephone contact” below) urging the borrower to make the required payments on the loan. At least one of the telephone contacts must occur on or before the 90th day of delinquency and another one must occur after the 90th day of delinquency.
- b. At least four collection letters – at least two of which must warn the borrower that if the loan is not paid, the lender will assign the loan to the guaranty agency that, in turn, will report the default to all national credit bureaus, and that the agency may institute proceedings to offset the borrower's state and federal income tax refunds and other payments made by the federal government to the borrower, or to garnish the borrower's wages, or assign the loan to the federal government for litigation against the borrower.

Diligent Efforts for Telephone Contact

Diligent efforts for telephone contact are defined in 34 CFR section 682.411(m) as:

- a. A successful effort to contact the borrower by telephone;
- b. At least two unsuccessful attempts to contact the borrower by telephone at a number that the lender reasonably believes to be the borrower's correct telephone number; or
- c. An unsuccessful effort to ascertain the borrower's correct telephone number, including but not limited to, a directory assistance inquiry as to the borrower's telephone number and sending a letter to or making a diligent effort to contact each reference, relative, and individual identified in the most recent loan application or most recent school certification for that borrower that the lender

holds. The lender may contact a school official other than the financial aid administrator who reasonably may be expected to know the borrower's address.

Subsequent Payment or Information Obtained

Following the lender's receipt of payment on the loan or a correct address for the borrower, the lender's receipt from the drawee of a dishonored check received as a payment on the loan, the lender's receipt of a correct telephone number for the borrower, or the expiration of an authorized deferment or forbearance period, the lender is required to engage only in the following activities (34 CFR section 682.411):

- a. *For loans less than 91 days delinquent (121 days for a loan repayable in installments less frequently than monthly) – Two diligent efforts to contact the borrower by telephone.*
- b. *For loans 91–120 days delinquent (121–180 days for a loan repayable in installments less frequently than monthly) – One diligent effort to contact the borrower by telephone.*
- c. *For loans more than 120 days delinquent (180 days for a loan repayable in installments less frequently than monthly) – No additional diligent efforts to contact the borrower by telephone are required.*
- d. *181–270 days delinquent (241–330 days for loans payable in installments less frequent than monthly) – During this period, the lender must engage in efforts to urge the borrower to make the required payments on the loan. These efforts must, at a minimum, provide information to the borrower regarding options to avoid default and the consequences of defaulting on the loan.*
- e. *Final demand on or after the 241st day of delinquency (the 301st day for loans payable in installments less frequent than monthly) – The lender must send a final demand letter to the borrower requiring repayment of the loan in full and notifying the borrower that a default will be reported to a national credit bureau. The lender must allow the borrower at least 30 days after the date the letter is mailed to respond and bring the loan out of default before filing a default claim on the loan.*

Default Aversion Assistance

Default aversion assistance is collection assistance that a guarantor provides to supplement a lender's efforts to prevent default on a borrower's loan; however, it does not replace the lender's responsibility to perform due diligence. Not earlier than the 60th day and no later than the 120th day of delinquency, a lender must request default aversion assistance from the guaranty agency that guarantees the loan (34 CFR section 682.411(i)).

Skip-Tracing Requirements

Skip tracing is the process by which lenders attempt to obtain corrected address or telephone information for borrowers for whom the lender does not have accurate information. Skip-tracing processes must meet regulatory time frames and minimum standards as outlined in 34 CFR section 682.411(h).

Unless the final demand letter (as specified in the “Subsequent Payment or Information Obtained” section above) has already been sent, the lender shall begin to diligently attempt to locate the borrower through the use of effective commercial skip-tracing techniques within 10 days of its receipt of information indicating that it does not know the borrower’s current address. These efforts must include, but are not limited to, sending a letter to, or making a diligent effort to contact each endorser, relative, reference, individual, and entity identified in the borrower’s loan file, including the schools the student attended. For this purpose, a lender’s contact with a school official that might reasonably be expected to know the borrower’s address may be with someone other than the financial aid administrator and may be in writing or by telephone.

These efforts must be completed by the date of default with no gap of more than 45 days between attempts to contact those individuals or entities. Upon receipt of information indicating that it does not know the borrower’s current address, the lender shall discontinue the collection efforts described in the Subsequent Payment or Information Obtained section.

If the lender is unable to ascertain the borrower’s current address despite its performance of the activities described in the Subsequent Payment or Information Obtained section, the lender is excused thereafter from performance of the collection activities (with the exception of a request for default aversion assistance) unless it receives a communication indicating the borrower’s address prior to the 241st day of delinquency (the 301st day for loans payable in less frequent installments than monthly).

Requirements for Loan Endorsers

Loan endorsers are required for PLUS loans for borrowers with an adverse credit history (34 CFR sections 682.201(b)(4) and 682.201(c)(1)(vii)).

Before filing a default claim on a loan with an endorser, the lender must:

- a. Make a diligent effort to contact the endorser by telephone and send the endorser two letters advising the endorser of the delinquent status of the loan and urging the endorser to make the required payments on the loan.
- b. At least one letter must warn the endorser that if the loan is not paid, the lender will assign the loan to the guaranty agency that, in turn, will report the default to all national credit bureaus.
- c. On or after the 241st day of delinquency (the 301st day for loans payable in installments less frequent than monthly) send a final demand letter to the endorser requiring repayment of the loan in full and notifying the endorser that a default will be reported to a national credit bureau. The lender shall allow the endorser at

least 30 days after the date the letter is mailed to respond to the final demand letter and to bring the loan out of default before filing a default claim on the loan (34 CFR section 682.411(n)).

Skip Tracing for Loan Endorsers

Unless the final demand letter specified in the paragraph above has already been sent, upon receiving information indicating that it does not know the endorser's current address or telephone number, the lender must diligently attempt to locate the endorser through the use of normal commercial skip-tracing techniques. This effort must include an inquiry to directory assistance (34 CFR section 682.411(n)(3)).

Audit Objectives Determine if the lender complied with the due-diligence requirements for collection of delinquent loans, including the requirements for skip tracing or default aversion assistance.

Suggested Audit Procedures

- a. Test a sample of loans that were delinquent from one to 15 days, verify that the lender's records document that the required written notice or collection letter was sent to the borrower. Verify that the letter contained the required information.
- b. Test a sample of loans that were delinquent between 16 to 180 days (16 to 240 days for loans repayable in installments less frequently than monthly) verify that the lender's records document that the required telephone efforts were made and that the required collection letters were sent to the borrower. Verify that at least two of the letters warned the borrower of possible assignment of the loan to the guaranty agency, reporting the default to all national credit bureaus, offset of income tax refunds to garnish wages, and litigation against the borrower.
- c. Test a sample of loans that were delinquent from 181 to 270 days (241 to 331 days for loans payable in installments less frequently than monthly) verify that the lender's records document the lender's efforts to urge the borrower to make the required payments on the loan and that the efforts, at a minimum, provided information to the borrower regarding options to avoid default and the consequences of defaulting on the loan.
- d. Test a sample of loans that are 241 days delinquent (the 301st day for loans payable in installments less than monthly), verify that the lender sent the required final demand letter to the borrower.
- e. *Loan Endorser Procedures:* Test a sample of the lender's records to verify that they document that the lender made a diligent effort to contact the endorser by phone, sent the required letters and final demand letter, if applicable, in accordance with requirements.
- f. *Skip-Tracing Procedures:* From the sample of delinquent loans where a final demand letter was not sent to the borrower, verify that the lender's records

document that the lender attempted to contact each endorser, relative, reference, individual and entity identified in the borrower's loan file within 10 days of receipt of information indicating that the lender did not know the borrower's current address. Verify that these efforts were completed by the date of default with no gap of more than 45 days between attempts. Verify that the lender's efforts for loan endorsers included an inquiry to directory assistance.

- g. *Default Aversion Assistance*: Obtain and review the agreement the guaranty agency has with the lender that establishes the time period for default aversion assistance. From the population of delinquent or defaulted loans, determine the loans where required default aversion assistance from the loan guaranty agency should have been requested by the lender. For a sample of the loans, verify that the lender's records document that default aversion assistance was requested within the required timeframes.

8. Timely Claim Filings by Lenders or Servicers

Compliance Requirements Lenders are required to timely file claims with the guaranty agency for payment of death, disability, closed schools, false certification, bankruptcy, and default claims. Each type of claim has a separate timely filing requirement (34 CFR sections 682.402(g)(2) and 682.406(a)(5)). A lender has up to three years after the default claim filing deadline to successfully cure due-diligence violations that have rendered a loan un-reinsured (34 CFR Part 682, Appendix D). The lender is also required to maintain records to document the validity of a claim against a loan guaranty (34 CFR sections 682.402(g)(1) and 682.414(a)(4)(iii)).

TYPE OF CLAIM	TIMELY FILING REQUIREMENTS
Default	A lender must submit default claims to the guaranty agency within 90 days of the default.
Death	A lender must submit a claim within 60 days of the date that the lender determines that a borrower (or the student on whose behalf a parent obtained a PLUS loan) has died.
Total and Permanent Disability	<p>Effective July 1, 2013, if a borrower, who is not a veteran, notifies the lender that the borrower claims to be totally and permanently disabled as described in paragraph (1) of the definition of that term in 34 CFR section 682.200(b), the lender must direct the borrower to notify the secretary of the borrower's intent to submit an application for total and permanent disability discharge and provide the borrower with the information needed for the borrower to notify the secretary (34 CFR section 682.402(c)(2)).</p> <p>After the secretary receives the application described in 34 CFR section 682.402 (c)(2)(iv), the secretary notifies the holders of the borrower's Title IV loans that the secretary has received a total and permanent disability discharge application from the borrower. The holders of the loans must notify the applicable guaranty agencies that the total and permanent disability discharge application has been received (34 CFR section 682.402(c)(2)(vi)).</p> <p>The secretary will notify the borrower and the borrower's lenders whether the application for a disability discharge has been approved and will direct each lender to submit a disability claim to the guaranty agency so the loan can be assigned to the secretary. The lender must submit the claim to the guaranty agency within 60 days of the date the lender received notification from the</p>

TYPE OF CLAIM	TIMELY FILING REQUIREMENTS
	<p>secretary that the borrower is totally and permanently disabled (34 CFR sections 682.402(c)(3)(iii) and 682.402 (g)(2)(ii)).</p> <p>Effective July 1, 2013, if the borrower, who is a veteran, notifies the lender that the borrower claims to be totally and permanently disabled as described in paragraph (2) of the definition of that term in 34 CFR section 682.200(b), the lender must direct the veteran to notify the secretary of the veteran’s intent to submit an application for total and permanent disability discharge and provide the veteran with the information needed to apply for a total and permanent discharge to the secretary (34 CFR section 682.402(c)(9)).</p> <p>After the secretary receives the application described in 34 CFR section 682.402 (c)(2)(iv), the secretary notifies the holders of the veteran’s Title IV loans that the secretary has received a total and permanent disability discharge application from the borrower. The holders of the loans must notify the applicable guaranty agencies that the total and permanent disability discharge application has been received (34 CFR section 682.402(c)(9)(vi)).</p> <p>If the secretary approves the veteran’s total and permanent disability discharge application based on documentation from the Department of Veterans Affairs, the lender must submit a disability claim to the guaranty agency in accordance with 34 CFR section 402(g)(1) (34 CFR section 682.402(c)(9)(xii)(A)).</p> <p>The secretary will notify the veteran and the veteran’s lenders whether the application for a disability discharge has been approved and will direct each lender to submit a disability claim to the guaranty agency so the loan can be assigned to the secretary. The lender must submit the claim to the guaranty agency within 60 days of the date the lender received notification from the secretary that the veteran is totally and permanently disabled (34 CFR section 682.402(c)(9)(x) and 34 CFR 682.402 (g)(2)(ii)).</p>
Closed School	<p>The lender shall file a claim within 60 days after the borrower submits to the lender the written request and sworn statement described in 34 CFR section 682.402(d)(3) or after the lender is notified by the secretary or the secretary’s designee or by the guaranty agency to do so.</p>
False Certification	<p>The lender shall file a claim with the guaranty agency within 60 days after the borrower submits to the lender the written and sworn statement described in 34 CFR section 683.402(e)(3) or after the lender is notified by the secretary or the secretary’s designee or by the guaranty agency to do so.</p>
Bankruptcy	<p>A lender shall file a bankruptcy claim by the earlier of: (1) 30 days after the date on which the lender receives notice of the first meeting of creditors or other information described in 34 CFR section 682.402(f)(3); or (2) 15 days after the lender is served with a complaint or motion to have the loan determined to be dischargeable on grounds of undue hardship, or if the lender secures an extension of time within which an answer may be filed, 25 days before the expiration of that period, whichever is later.</p>

Records to Support a Claim

The lender is required to maintain records necessary to document the validity of a claim against a loan guaranty (34 CFR section 682.414(a)(4)(ii)). Items to be filed by the lender when making a claim to the guaranty agency include (34 CFR section 682.402):

- a. The original or a true and exact copy of the promissory note.
- b. The loan application if a separate loan application was provided to the lender.
- c. In the case of a death claim, an original or certified copy of the death certificate or other documentation supporting the discharge request that formed the basis for the determination of death.
- d. In the case of a disability claim, a copy of the certification of disability described in 34 CFR section 682.402(c)(2).
- e. In the case of a closed school claim, the documentation described in 34 CFR section 682.402(d)(3) or any other documentation as the secretary may require.
- f. In the case of a false certification claim, the documentation described in 34 CFR section 682.402(e)(3).
- g. In the case of a bankruptcy claim:
 - (1) Evidence that a bankruptcy petition has been filed and all pertinent documents sent to or received from the bankruptcy court by the lender;
 - (2) An assignment to the guaranty agency of any proof of claim filed by the lender regarding the loan; and
 - (3) A statement of any facts of which the lender is aware that may form the basis for an objection or exception to the discharge of the borrower's loan obligation in bankruptcy and all documents supporting those facts (34 CFR section 682.402(g)(1)(v)).

Audit Objectives Determine whether the lender complied with the documentation requirements and deadlines for timely filing of claims with the guaranty agency concerning death, disability, false certification, closed schools, bankruptcy, or default claims.

Suggested Audit Procedures

- a. Select a sample from all loans on which a claim was filed and verify that the lender's records document that a claim was filed with accurate claim payment information and in a timely manner with the guaranty agency.

- b. Using the same sample of claims, verify that the lender maintained the required documentation to support the particular type of claim.

9. Curing Due-Diligence and Timely Filing Violations

Compliance Requirements A due-diligence violation occurs when a lender does not perform a requirement (see III.N.8, “Timely Claim Filings by Lenders or Servicers”) within the time frame specified. The time interval between collection activities is called a “gap.” If the gap between collection activities exceeds that permitted a due diligence violation has occurred and the lender may incur penalties, including loss of insurance and reinsurance on the loan (34 CFR section 682.411 and 34 CFR Part 682, Appendix D).

Some examples of due-diligence violations include the lender’s failure to perform the following functions in a timely manner:

- a. Sending the required collection letter(s), including the required final demand letter;
- b. Making the required telephone contact or diligent effort to contact the borrower;
- c. Requesting default aversion assistance from the guarantor;
- d. Conducting skip tracing activity.

A timely filing violation occurs when a lender fails to submit default, death, disability, closed school, or false certification claims within the prescribed time frames prescribed. See III.N.8, “Timely Claim Filings by Lenders or Servicers,” for timely filing requirements.

Cures for Due-Diligence Violations-

Violations of six days or less (21 days or less for a transfer) – There will be no reduction or recovery by the secretary of payments to the lender or guaranty agency if there is no violation of federal requirements of six days or more (21 days or more for a transfer).

Two or fewer violations of six days or more (21 days or more for a transfer) and no gap of 46 days or more (61 days for a transfer) – Principal will be reinsured, but accrued interest, interest benefits, and special allowance payable by the secretary for the delinquency period will be limited to amounts accruing through the date of default. However, the lender must complete all required activities before the claim filing deadline, except that a default aversion assistance request must be made before the 330th day of delinquency. If the lender fails to make the default aversion assistance request by the 330th day, the secretary will not pay any accrued interest, interest benefits and special allowance for the most recent 270 days prior to the default. If the lender fails to complete any other required activity before the claim filing deadline, accrued interest, interest benefits, and special allowance otherwise payable by the secretary for the delinquency period will be limited to amounts accruing through the 90th day before default.

Three violations of six days or more (21 days or more for a transfer) and no gap of 46 days or more (61 days for a transfer) – The lender must satisfy the requirements in 34 CFR Part 682, Appendix D, I.E.1., or receive a full payment or a new, signed repayment agreement in order for reinsurance on the loan to be reinstated. The secretary will not pay any interest benefits or special allowance for the period beginning with the lender's earliest unexcused violation occurring after the last payment received before the cure is accomplished, and ending with the date, if any, that reinsurance on the loan is reinstated.

More than three violations of 6 days or more (21 days or more for a transfer) of any type, or a gap of 46 days (61 days for a transfer) or more and at least one violation – The lender must satisfy the requirement outlined in 34 CFR Part 682, Appendix D, I.D.1, for the reinsurance on the loan to be reinstated. The secretary will not pay any interest benefits or special allowance for the period beginning with the lender's earliest unexcused violation occurring after the last payment received before the cure is accomplished, and ending with the date, if any, that reinsurance on the loan is reinstated (34 CFR Part 682, Appendix D, I.C.3).

Cures for Timely Filing Violations- When a lender has a timely filing violation on a default claim, the guarantee on the loan may be reinstated through one of the following (34 CFR Part 682, Appendix D, I.E.1):

- a. The receipt of one full payment as defined in 34 CFR Part 682, Appendix D, I.A,
- b. The receipt of a new repayment agreement signed by the borrower, or
- c. Successful completion of the requirements in 34 CFR Part 682, Appendix D, I.E.1.

Audit Objectives Determine whether the lender complied with the cure procedures in 34 CFR Part 682, Appendix D for loans with due-diligence or timely filing violations. Determine whether the information for cures was accurately reported on the LaRS.

Suggested Audit Procedures

- a. Select a sample of cured loans identified on the LaRS and verify that the lender's records document that it performed the required cure procedures.
- b. For cured loans for which the lender obtained a new repayment agreement, verify that the agreement meets the repayment period limitations of 34 CFR sections 682.209(a)(8) and 682.209(h)(2).
- c. For cured loans for which the lender obtained one full payment, obtain documentation of the payment, and verify that the payment complied with the terms of the most current repayment schedule and was valid in accordance with 34 CFR Part 682, Appendix D, I.A.

10. Servicemembers Civil Relief Act

Compliance Requirements Effective July 1, 2016, FFEL lenders and lender-servicers must use the Defense Manpower Data Center’s (DMDC) Servicemembers Civil Relief Act (SCRA) website at least monthly to identify borrowers who are in military service status for the purpose of determining eligibility for a 6 percent interest rate cap under 34 CFR section 682.202(a)(8). Once a borrower’s status and service dates have been confirmed using the DMDC, the loan servicer must use the DMDC-generated certification information in lieu of requiring a request from the borrower and a copy of the servicemember’s military orders to support the borrower’s receipt of the SCRA interest rate limitation. A borrower may provide the loan holder with alternative evidence of military service status to demonstrate eligibility if the borrower believes that the information contained in the DMDC database is inaccurate or incomplete. When the loan servicer applies the SCRA’s interest rate limitation to a borrower’s account, it must notify the borrower in writing within 30 days that the interest rate on the loan has been changed (see Dear Colleague Letter GEN-16-08, May 5, 2016) (34 CFR section 682.208(j)).

Audit Objectives Determine whether eligible borrowers of FFEL loans received the benefit of the 6 percent interest rate cap provided by the SCRA.

Suggested Audit Procedures

- a. Test a sample of loans to verify that FFEL lenders and lender-servicers used the DMDC’s SCRA website to identify borrowers eligible for the SCRA interest rate limit of 6 percent.
- b. Test sample of borrowers who were eligible for the SCRA interest rate cap to verify that they received the new rate of 6 percent only if their previous interest rate was greater than 6 percent.
- c. Test a sample of loans to verify that borrowers were notified in writing within 30 days that the interest rate was reduced to the SCRA limit of 6 percent.

IV. OTHER INFORMATION

Selection of Major Programs When the Entity is a School That is a Lender under the FFEL Program.

Some schools hold loans under the FFEL program. Under the HEA and 34 CFR section 682.601(a)(7), for any fiscal year beginning on or after July 1, 2006, in which a school engages in activities as an eligible lender, the school must submit a compliance audit covering its activities as a lender. An audit conducted in accordance with 2 CFR Part 200, Subpart F, that treats the lender function as a major program, will satisfy that requirement.

If the SFA Cluster (see Part 5) was selected as a major program for a school that is also a lender under the FFEL program, the auditor must also include in the audit coverage, work sufficient to render an opinion, as part of an opinion on the SFA Cluster, on the school’s compliance with the requirements set forth in this program supplement. Audit documentation must demonstrate

sufficient audit coverage of the above compliance requirements to support that opinion, as well as the compliance requirements set forth in the SFA Cluster. When the SFA Cluster is audited as a major program for a school that is a lender, the program should be listed in the Summary of Auditor’s Results Section of the Schedule of Findings and Questioned Costs as “SFA Cluster (including Assistance Listing 84.032 FFEL - Lenders).”

For schools that are lenders, if the SFA Cluster is not selected as a major program, Assistance Listing 84.032 must be covered as a separate major program using this program supplement. In such cases, the program should be listed in the Summary of Auditor’s Results Section of the Schedule of Findings and Questioned Costs as “Assistance Listing 84.032 - FFEL – Lenders.”

Governmental Lenders Covered as Part of a Statewide Single Audit

Some “statewide” entities are defined to include a governmental lender under the FFEL program. For such entities, this program supplement should be used to identify pertinent compliance requirements. Auditors for such entities with large FFEL lending programs must consider the provisions of 2 CFR section 200.518(b)(3) in determining major programs. When those provisions apply, coverage of the FFEL program for a lender should be identified and reported on separately and listed as a major program in the Summary of Auditor’s Results Section of the Schedule of Findings and Questioned Costs as “Assistance Listing 84.032 - FFEL – Lenders.”

Use of Third Party Servicers

Some lenders (including schools that are lenders in the FFEL program) use third party servicer organizations to perform some or many lender functions. Third party servicer organizations are required to obtain a financial statement audit and compliance attestation engagement under the January 2011 *Lender Servicer Financial Statement Audit and Compliance Attestation Guide* (Lender Servicer Audit Guide), issued by ED. Auditors of lenders (including school lenders) may exclude coverage of compliance requirements performed by a third party servicer, provided the auditor has determined that the third party servicer has obtained an audit under the Lender Servicer Audit Guide for the entire audit period of the lender. If the third party servicer has a different audit period, the auditor of the lender must determine that the most recently required audit of the third party servicer under the Lender Servicer Audit Guide has been completed timely and must obtain a representation from the third party servicer that it has engaged (or will engage) an auditor to perform the required audit under the Lender Servicer Audit Guide for the immediate subsequent audit period. The auditor of the lender must confirm that the audit period of the prior third party servicer audit, together with the audit period for the subsequent third party servicer audit, covers the entire audit period of the lender/school lender audit.

If the auditor excludes coverage of compliance requirements performed for a third party servicer, the *Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance* must clearly describe the compliance requirements for which coverage has been excluded, name the third party servicer that performed those compliance requirements, state that the third party servicer has obtained an audit performed under the January 2011 Lender Servicer Audit Guide issued by ED, and specify the period of that audit. Alternatively, the auditor may decide to use a third party servicer’s audit (attestation engagement) and rely on it in rendering an opinion on compliance. In such cases, the auditor

should obtain the servicer's most recent compliance audit report and any other reports regarding servicer compliance.

If the servicer's compliance audit report or other reports contain findings of noncompliance, the auditor should assess the effect of that noncompliance on the nature, timing, or extent of substantive tests to be conducted at the lender and/or the servicer organization, as well as reporting that information. The auditor must also adhere to pertinent generally accepted auditing standards relating to use of servicer organization audits and reliance on the work of other auditors.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.041 IMPACT AID (Title VII of ESEA)

I. PROGRAM OBJECTIVES

The objective of the Impact Aid Program (IAP) under Title VII of the Elementary and Secondary Education Act (ESEA), as amended by the Every Student Succeeds Act (ESSA) (Pub. L. No. 114-95), is to provide financial assistance to local educational agencies (LEAs) whose local revenues or enrollments are adversely affected by federal activities. These activities include the federal acquisition of real property (Section 7002) (20 USC 7702) or the presence of children residing on tax-exempt federal property or residing with a parent employed on tax-exempt federal property (“federally connected” children) (Section 7003) (20 USC 7703).

II. PROGRAM PROCEDURES

Funds are provided on the basis of statutory criteria and data supplied by LEAs in applications submitted to the Department of Education (ED), with copies provided simultaneously to the state educational agency (SEA). ED makes payments directly to the LEA. Generally, payments under Section 7003 of the ESEA are based on membership and attendance counts of federally connected children, with additional funds provided for certain federally connected children with disabilities and children residing on Indian lands. Payments under Section 7002 of the ESEA are based on the estimated taxable value of eligible federal property and the applicable tax rate, and, in case of insufficient funds, upon a statutory formula that considers past year payments.

Except for the additional funds provided for federally connected children with disabilities under Section 7003(d) of the ESEA, funds provided under sections 7002 and 7003 are considered general aid and generally have no restrictions on their expenditure. Under 2 CFR 200.101(e)(2), sections 7002 and 7003(b) are **not** subject to subparts C (pre-federal award), D (post federal award), or E (cost principles) of 2 CFR Part 200; therefore, ED generally has no basis to sustain findings related to these subparts for funds provided under sections 7002 and 7003(b) of the ESEA.

Any formula funds that are provided under Section 7007(a) of the ESEA to certain LEAs that received Section 7003 payments must be used for construction, as defined in the statute. Any discretionary construction grant funds that are provided under Section 7007(b) of the ESEA to certain LEAs that received Section 7002 or 7003 payments must be used for emergency repairs or modernization, as defined in the statute and regulations.

In fiscal years where the auditee expends only Section 7002 funds from the Impact Aid program, the auditor must exclude the amount of the 7002 Impact Aid expenditures from the determination of the Type A/B program threshold. See IV, “Other Information” below for additional information on major program determination and SEFA presentation.

Source of Governing Requirements

This program is authorized by sections 7001–7014 of the ESEA, as amended, which is codified at 20 USC 7701 through 7714. Implementing regulations are 34 CFR Part 222.

Availability of Other Program Information

Additional information on this program may be found at <http://www.ed.gov/about/offices/list/oese/programs.html> and at <https://impactaid.ed.gov/>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	N	N	N	Y	N	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. *Section 7003(d) – Federally Connected Children with Disabilities* LEAs must use the payments provided under Section 7003(d) of the ESEA to conduct programs or projects for the free, appropriate public education of the federally connected children with disabilities who generated those funds. Allowable costs include expenditures reasonably related to the conduct of programs or projects for the free, appropriate public education of children with disabilities, including program planning and evaluation and acquisition costs of equipment, except when the title to that equipment would not be held by the LEA. Costs for school construction are not

allowable (Section 7003 of ESEA (20 USC 7703), 34 CFR section 222.53(c)).

- b. *Section 7007 – Construction* LEAs that receive payments under Section 7003 of the ESEA and that meet certain other statutory criteria may receive formula assistance under Section 7007(a) of the ESEA in any fiscal year that Congress appropriates funds under that section. LEAs must use the payments provided under Section 7007(a) for construction, as defined in Section 7013(3) of the ESEA. Under Section 7013(3), the term “construction” includes (a) preparing drawings and specifications for school facilities; (b) erecting, building, acquiring, altering, remodeling, repairing, or extending school facilities; (c) inspecting and supervising the construction of school facilities; and (d) debt servicing for such activities (sections 7007 and 7013(3) of ESEA (20 USC 7707 and 7713)). Certain LEAs that receive payments under Section 7002 or 7003 of the ESEA and that meet other statutory and regulatory criteria may receive discretionary grant assistance under Section 7007(b) of the ESEA. Selected grantees must use these funds for emergency or modernization construction grant expenditures, as specified in their grant award documents. Emergency and modernization are defined in 34 CFR section 222.176 and the allowable and unallowable uses of these funds are detailed in 34 CFR sections 222.172 through 222.174.
- c. *Section 7002 – Federal Property Payments and Section 7003(b) – Basic Support Payments* Funds made available under sections 7002 and 7003(b) of the ESEA usually become part of the general operating fund of the LEAs. These funds are available as general aid for free public education and may be used for current operating expenditures or capital outlays in accordance with state laws. The auditor is not expected to perform any tests with respect to the expenditure of these funds.

B. Allowable Costs/Cost Principles

The cost principles described in 2 CFR Part 200, Subpart E, apply only to Section 7003(d) (federally connected children with disabilities) and Section 7007 (construction) funds.

Under 2 CFR 200.101(e)(2), sections 7002 (federal property payments) and 7003(b) (basic support payments) are not subject to the cost principles described in Subpart E of 2 CFR Part 200.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort**2.1 Level of Effort – *Maintenance of Effort***

Not Applicable

2.2 Level of Effort – *Supplement Not Supplant*

Section 7003(d) funds may not supplant any state funds (either general or special education state aid) that were or would have been available to the LEA for the free, appropriate public education of federally connected children with disabilities counted under Section 7003(d). A reduction in the per-pupil amount of state aid for children with disabilities, including children counted under Section 7003(d), from that received in the previous year raises a presumption that supplanting has occurred. An LEA can rebut this presumption by demonstrating that the reduction was unrelated to the receipt of Section 7003(d) funds (Section 7003(d) of ESEA (20 USC 7703(d)); 34 CFR section 222.54).

3. Earmarking

Not Applicable

L. Reporting**1. Financial Reporting**

Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Application for Impact Aid – Section 7003 (OMB No. 1810-0687) – Each year an LEA must submit this application, which provides the following information: counts of federally connected children in various categories, membership and average daily attendance data, and information on expenditures for children with disabilities. This form is in the Impact Aid Grant System, which does not have a public link, therefore school districts will need to provide a copy to the auditor.

Please note: As a result of the public health emergency related to the coronavirus, the Impact Aid Coronavirus Relief Act (Pub. L. No. 116-211) provides LEAs the option for their fiscal year 2022 7003 application of using the same student count data from their fiscal year 2021 application or providing new student count data as prescribed in Section 7003. Similarly, the Impact Aid Supplemental Flexibility Act (Pub. L. No. 117-83) gave LEAs the option to use the same

student count data for the FY 2023 application as it used for the FY 2022 application or providing new student count data as prescribed in Section 7003.

Key line items:

1. Current year membership (enrollment) on the survey date should be tested. LEAs have the option to use the current year enrollment numbers or enrollment numbers associated with the Impact Aid Coronavirus Relief Act. Federally connected children who live on Indian lands are weighted the most in the payment formula, followed by those with parents in the Uniformed Services, and civilian children who both live on and whose parents work on Federal property. Children living in Federal low rent housing and children who only live on or whose parents only work on Federal property are weighted lower in the payment formula. The auditor should use professional judgment when determining which categories to test, taking into account the relative materiality of the weight and number of children reported in each category. (Note: Eligible LEAs submit a separate application for Section 7002 or Section 7007(b) funding. The auditor is not expected to perform any tests with respect to the Section 7002 or Section 7007(b) applications.)

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Wage Rate Requirements

Compliance Requirements Section 7007 construction funds, as well as any section 7002 or 7003(b) funds spent for construction or minor remodeling, are subject to Wage Rate Requirements (20 USC 1232b).

See Part 4, 20.001 Wage Rate Requirements Cross-Cutting Section.

2. Required Level of Expenditure

Compliance Requirements For each fiscal year, the amount of expenditures for special education and related services provided to federally connected children with disabilities must be at least equal to the amount of funds received or credited under Section 7003(d) of the ESEA for that fiscal year. This is demonstrated by comparing the amount of Section 7003(d) funds received or credited with the result of the following calculation:

- a. Divide total LEA expenditures for special education and related services for all children with disabilities by the average daily attendance (ADA) of all children with disabilities served during the year.

- b. Multiply the amount determined in paragraph a, above, by the ADA of the federally connected children with disabilities claimed by the LEA for the year.

If the amount of Section 7003(d) funds received or credited is greater than the amount calculated above, an overpayment equal to the excess Section 7003(d) funds exists. This overpayment may be reduced or eliminated to the extent that the LEA can demonstrate that the average per pupil expenditure for special education and related services provided to federally connected children with disabilities exceeded its average per pupil expenditure for serving non-federally connected children with disabilities (Section 7003(d) of ESEA (20 USC 7703(d)); 34 CFR section 222.53(d)).

Audit Objectives Determine whether the LEA met the required level of expenditure for providing special education and related services to federally connected children with disabilities.

Suggested Audit Procedures

- a. Review the LEA's calculation to ascertain if it shows that the required level of expenditure for federally connected children was met. Check accuracy of calculation.
- b. Trace amounts used in the calculation of supporting records.
- c. If the LEA's calculation shows that an overpayment was made, verify that the average per pupil expenditure for federally connected children with disabilities exceeded the average per pupil expenditure for non-federally connected children to the extent of the overpayment.

IV. OTHER INFORMATION

Given the nature of the Section 7002 funds, a recipient expending only Section 7002 funds would have no compliance requirements subject to testing for the Impact Aid program or would only be subject to the Wage Rate Requirements (20 USC 1232b) if 7002 funds were spent for construction or minor remodeling. Selecting the Impact Aid program as a major federal program in fiscal years where no (or only one) compliance requirements are subject to testing could result in the exclusion of other programs as major federal programs. Therefore, if a recipient had Impact Aid expenditures only from Section 7002 funds during its fiscal year, the auditor must exclude the amount of the 7002 Impact Aid expenditures from the determination of the Type A/B program threshold. If a recipient had Impact Aid expenditures from multiple sections, including Section 7002, the entire amount of Impact Aid expenditures should be considered when determining the Type A/B program threshold and the 7002 funds would only be subject to Wage Rate Requirements testing, if applicable. All Impact Aid expenditures, including Section 7002 funds excluded from the Type A/B program threshold, must be reported on the Schedule of Expenditures of Federal Awards.

DEPARTMENT OF EDUCATION**ASSISTANCE LISTING 84.042 TRIO – STUDENT SUPPORT SERVICES****ASSISTANCE LISTING 84.044 TRIO – TALENT SEARCH****ASSISTANCE LISTING 84.047 TRIO – UPWARD BOUND****ASSISTANCE LISTING 84.066 TRIO – EDUCATIONAL OPPORTUNITY CENTERS****ASSISTANCE LISTING 84.217 TRIO – MCNAIR POST-BACCALAUREATE
ACHIEVEMENT****I. PROGRAM OBJECTIVES**

The federal TRIO programs are authorized by Title IV of the Higher Education Act of 1965, as amended, and now consist of seven programs. These programs are designed to help first-generation college and economically disadvantaged students achieve success at the postsecondary level by facilitating high school completion and entry, retention, and completion of postsecondary education. Five of these programs are included in the TRIO cluster. The remaining two TRIO programs do not meet the funding threshold to be included in the Supplement. The five included programs are:

Student Support Services (SSS) program provides academic support services to low-income, first-generation, and individuals with disabilities to enable them to be retained in and graduate from institutions of higher education. The program assists participants in making the transition from one level of higher education to the next. The program also fosters an institutional climate supportive of the success of students who are limited English proficient and students from groups that are traditionally underrepresented in postsecondary education and improves the financial literacy and economic literacy of students.

Talent Search (TS) program identifies qualified youth with the potential for educational success at the postsecondary level and encourages them to complete or reenter secondary school and undertake a program of postsecondary education. The TS program also publicizes the availability of student financial assistance for persons who seek to pursue a postsecondary education. TS also encourages persons who have not completed education programs at the secondary or postsecondary level to enter or reenter and complete these programs.

Upward Bound (UB) program targets low-income and potential first-generation college students who are enrolled in high school, or veterans seeking to prepare themselves for success in postsecondary education. The program provides opportunities for participants to succeed in pre-college performance and ultimately in higher education pursuits.

Educational Opportunity Centers (EOC) program provides information regarding financial and academic assistance available to individuals who desire to pursue a program of postsecondary education. EOC projects provide assistance to individuals in applying to admission to institutions that offer programs of postsecondary education, including assistance in preparing necessary

applications for use by admissions and financial aid officers. EOC projects also provide information to improve financial and economic literacy of participants.

McNair Post-Baccalaureate Achievement (McNair) program provides low-income, first-generation college students and students from groups underrepresented in graduate education with effective preparation for doctoral study through involvement in research and other scholarly activities.

II. PROGRAM PROCEDURES

All TRIO grants are competitive discretionary grants and are awarded for five years.

Eligible applicants for SSS and McNair grants are institutions of higher education or combinations of such institutions.

Eligible applicants for TS and EOC grants are institutions of higher education, public or private agencies, or organizations, including community-based organizations with experience in serving disadvantaged youth, secondary schools, and combinations of institutions and agencies.

Eligible applicants for UB grants are institutions of higher education, public and private agencies, or organizations, including community-based organizations with experience in serving disadvantaged youth, secondary schools, and combinations of institutions, agencies, and organizations. The UB program has three types of projects: regular, veterans, and math/science.

Source of Governing Requirements

The federal TRIO programs are authorized by Title IV of the Higher Education Act of 1965, as amended (20 USC 1070a et seq.). The applicable regulations are at 34 CFR parts 643 (TS), 644 (EOC), 645 (UB), 646 (SSS), and 647 (McNair).

Availability of Other Program Information

Other program information is available at <http://www2.ed.gov/about/offices/list/ope/trio/index.html>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not

being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Y	Y	Y	Y	N	N	N	N	N	Y	N	Y

A. Activities Allowed or Unallowed

1. Activities Allowed

a. UB Program

- (1) Services and activities a UB project must provide (see III.N.1, “Special Test and Provisions – Services that Student Support Services, Talent Search, Upward Bound or McNair Projects Must Provide”) include the following:
 - (a) Academic tutoring to enable students to complete secondary or postsecondary courses;
 - (b) Advice and assistance in secondary and postsecondary course selection;
 - (c) Assistance in preparing for college entrance exams and completing college admissions applications;
 - (d) Providing information on the full range of federal student financial aid programs and benefits and resources for locating public and private scholarships, and assistance in completing financial aid applications, including the Free Application for Federal Student Aid;
 - (e) Providing guidance on and assistance in reentering secondary school, alternative education programs for secondary school dropouts that lead to the receipt of a regular secondary school diploma, or general educational development (GED) programs or postsecondary education;

- (f) Education or counseling services designed to improve the financial and economic literacy of students or the student's parents, including financial planning for postsecondary education; and
 - (g) Core curriculum instruction in mathematics through pre-calculus, laboratory science, foreign language, composition, and literature (required for projects that have received funds for at least two years, see III.N.2, "Special Test and Provisions - Core Curriculum Instruction in the Upward Bound Program") (34 CFR section 645.11).
- (2) Services and activities a UB project may provide include the following:
- (a) Exposure to cultural events, academic programs, and other activities not usually available to disadvantaged youth;
 - (b) Information, activities, and instruction designed to acquaint youth participating in the project with the range of career options available to the youth;
 - (c) On-campus residential programs;
 - (d) Mentoring programs involving elementary school or secondary school teachers or counselors, faculty members at institutions of higher education, students, or any combination of these persons;
 - (e) Work-study positions where youth participating in the project are exposed to careers requiring a postsecondary degree;
 - (f) Programs and activities for participants who are limited-English proficient, from groups traditionally underrepresented in higher education, individuals with disabilities, homeless children or youths, participants in foster care or aging out of foster care or other disconnected participants; and
 - (g) Other activities designed to meet the purposes of the Upward Bound program in Math-Science or Veterans programs services to their participants as discussed in 34 CFR section 645.1 (34 CFR section 645.12).

b. *SSS Program*

- (1) Services and activities an SSS project must provide (see III.N.1, “Special Test and Provisions - Services that Student Support Services, Talent Search, Upward Bound or McNair Projects Must Provide”) include the following:
 - (a) Academic tutoring, directly or through other services provided by the institution, to enable students to complete postsecondary courses, which may include instruction in reading, writing, study skills, mathematics, science, and other subjects;
 - (b) Advice and assistance in postsecondary course selection;
 - (c) Information on the full range of federal student financial aid programs and benefits and resources for locating public and private scholarships, and assistance in completing financial aid applications (including the Free Application for Federal Student Aid);
 - (d) Education or counseling services designed to improve the financial and economic literacy of students;
 - (e) Activities designed to assist participants enrolled in four-year institutions of higher education in applying for admission to, and obtaining financial assistance for enrollment in, graduate and professional programs; and
 - (f) Activities designed to assist students enrolled in two-year institutions of higher education in applying for admission to, and obtaining financial assistance for enrollment in, a four-year program of postsecondary education (34 CFR section 646.4(a)).
- (2) Services and activities an SSS project may provide include:
 - (a) Individualized counseling for personal, career, and academic matters provided by assigned counselors;
 - (b) Information, activities, and instruction designed to acquaint students with the range of career options available to the students;
 - (c) Exposure to cultural events and academic programs not usually available to disadvantaged students;

- (d) Mentoring programs involving faculty or upper class students, or a combination thereof;
- (e) Securing temporary housing during breaks in the academic year for students who are or were formerly homeless children and youths and foster care youths;
- (f) Programs and activities that are specially designed for students who are limited English proficient, students from groups that are traditionally underrepresented in postsecondary education, students who are individuals with disabilities, students who are homeless children and youths, students who are foster care youth or other disconnected students;
- (g) Other activities designed to meet the purposes of the SSS program (34 CFR section 646.4(b)); and
- (h) The following cost items are allowable if reasonably related to allowed project activities: (a) cost of remedial and special classes, and courses in English language instruction for students of limited English proficiency, under certain circumstances; (b) in-service training of project staff; (c) activities of an academic or cultural nature; (d) transportation and, with the prior approval of the secretary, meals and lodging of participants and staff to and from approved educational and cultural activities sponsored by the project; (e) purchase, lease, or rental of computer hardware, computer software, or other equipment to be used for student development, student records and project administration; (f) professional development travel for staff; (g) project evaluation; (h) grant aid to eligible students, under certain circumstances; and (i) temporary housing during breaks in the academic year for students who are homeless children, youths or were formerly homeless, and students who are foster care youth (34 CFR section 646.30).

c. *TS Program*

- (1) Services and activities a TS project must provide (see III.N.1, “Special Test and Provisions - Services that Student Support Services, Talent Search, Upward Bound or McNair Projects Must Provide”) include the following:

- (a) Connections for participants to high-quality academic tutoring services to enable the participants to complete secondary or postsecondary courses;
 - (b) Advice and assistance in secondary school course selection and, if applicable, initial postsecondary course selection;
 - (c) Assistance in preparing for college entrance examinations and completing college admission applications;
 - (d) Information on the full range of federal student financial aid programs and benefits (including federal Pell Grant awards and loan forgiveness) and on resources for locating public and private scholarships, and assistance in completing financial aid applications, including the Free Application for Federal Student Aid (FAFSA);
 - (e) Guidance and assistance in secondary school reentry, alternative education programs for secondary school dropouts that lead to the receipt of a regular secondary school diploma, entry into GED programs, or entry into postsecondary education; and
 - (f) Connections for participants to education or counseling services designed to improve the financial and economic literacy of the participants or the participants' parents, including financial planning for postsecondary education (34 CFR section 643.4(a)).
- (2) Services and activities a TS project may provide include the following:
- (a) Academic tutoring, which may include instruction in reading, writing, study skills, mathematics, science, and other subjects;
 - (b) Personal and career counseling or activities;
 - (c) Information and activities designed to acquaint youth with the range of career options available to them;
 - (d) Exposure to the campuses of institutions of higher education, as well as to cultural events, academic programs, and other sites or activities not usually available to disadvantaged youth;
 - (e) Workshops and counseling for families of participants served;

- (f) Mentoring programs involving elementary or secondary school teachers or counselors, faculty members at institutions of higher education, students, or any combination of these persons;
- (g) Programs and activities that are specially designed for participants who are limited English proficient, from groups that are traditionally underrepresented in postsecondary education, individuals with disabilities, homeless children and youths, foster care youth, or other disconnected participants;
- (h) Other activities designed to meet the purposes of the TS program (34 CFR section 643.4(b)); and
- (i) Specific activities may include the following, if reasonably related to the objectives of the TS project:
 - (i) transportation, meals, and lodging with prior approval for visits to postsecondary educational institutions, participation in “College Day” activities, career field trips, and transportation to institutions of higher education, secondary schools not attended by the participants, or other locations at which the participant receives instruction that is part of a rigorous secondary school program of study; (ii) purchase of testing and test preparation materials; (iii) fees for college admissions applications and entrance examinations with the exceptions noted in 34 CFR section 643.30(c); (iv) in-service staff training; (v) rental of space, if space is not available at the site of the grantees and/or is not owned by the grantee; (vi) purchase, lease, or rental of computer hardware, computer software, and other equipment for students development, project administration, and recordkeeping; and (vii) tuition for a course that is part of a rigorous secondary school program of study (as defined in 34 CFR section 643.7, and recognized by ED) if the conditions of 34 CFR section 643.30(h) are met (34 CFR section 643.30).

d. *EOC Program*

Allowable services and activities under the EOC program include the following:

- (1) Public information campaigns designed to inform the community about opportunities for postsecondary education and training;
- (2) Academic advice and assistance in course selection;

- (3) Assistance in completing college admission and financial aid applications;
- (4) Assistance in preparing for college entrance examinations;
- (5) Education or counseling services designed to improve the financial and economic literacy of participants;
- (6) Guidance on secondary school reentry or entry to a GED program or other alternative education program for secondary school dropouts;
- (7) Individualized personal, career, and academic counseling;
- (8) Tutorial services;
- (9) Career workshops and counseling;
- (10) Mentoring programs involving elementary or secondary school teachers, faculty members at institutions of higher education, students, or any combinations of these persons;
- (11) Programs and activities that are specifically designed for participants who are limited English proficient, participants from groups that are traditionally underrepresented in postsecondary education, participants who are individuals with disabilities, participants who are homeless children and youth, participants who are foster care youth, or other disconnected participants;
- (12) Other activities designed to meet the purposes of the EOC program (34 CFR section 644.4); and
- (13) Specific activities may include the following, if reasonably related to the objectives of the EOC project: (a) transportation, meals, and lodging with prior approval for visits to postsecondary educational institutions, participation in “College Day” activities, and career field trips; (b) purchase of testing materials; (c) fees for college admissions applications and entrance examinations with the exceptions noted in 34 CFR section 644.30(c); (d) in-service staff training; (e) rental of space, if space is not available at the site of the grantees and/or is not owned by the grantee; and (f) purchase, lease, or rental of computer hardware, computer software, and other equipment for students development, project administration, and recordkeeping (34 CFR section 644.30).

e. *McNair Program*

- (1) Services and activities a McNair project must provide (see III.N.1, “Special Test and Provisions - Services that Student Support Services, Talent Search, Upward Bound or McNair Projects Must Provide”) include the following:
 - (a) Opportunities for research and other scholarly activities at the grantee institution or at graduate centers that are designed to provide students with effective preparation for doctoral study;
 - (b) Summer internships;
 - (c) Seminars and other educational activities designed to prepare students for doctoral study;
 - (d) Tutoring;
 - (e) Academic counseling; and
 - (f) Assistance to students in securing admission to and financial aid for enrollment in graduate programs (34 CFR section 647.4(a)).
- (2) Services and activities a McNair project may provide include the following:
 - (a) Education or counseling services designed to improve the financial and economic literacy of students, including financial planning for postsecondary education;
 - (b) Mentoring programs involving faculty members at institutions of higher education, students, or a combination of faculty members and students;
 - (c) Exposure to cultural events and academic programs not usually available to project participants;
 - (d) Activities of an academic or scholarly nature, such as trips to institutions of higher education offering doctoral programs, and special lectures, symposia, and professional conferences, which have as their purpose the encouragement and preparation for project participants for doctoral study;
 - (e) Stipends of up to \$2,800 per year for students engaged in research internships, provided that the student has

completed the sophomore year of study at an eligible institution before the internship begins (see III.E.1.e, “Eligibility - Eligibility for Individuals”);

- (f) Necessary tuition, room and board, and transportation for students engaged in research internships during the summer;
- (g) Purchase, lease, or rental of computer hardware, computer software, or other equipment for student development, project administration, and recordkeeping; and
- (h) Other activities designed to meet the purposes of the McNair program (34 CFR sections 647.4(b) and 647.30).

2. *Activities Unallowed*

- a. *All Programs* – The following cost items can never be charged to any TRIO program: (1) tuition, fees, stipends, and other forms of direct financial support for employees; (2) research not directly related to the evaluation or improvement of the project (except for the research activities of McNair participants); and (3) construction, renovation, and remodeling of any facilities (34 CFR sections 643.31, 644.31, 645.41, 646.31, and 647.31).
- b. *SSS Program* – SSS funds cannot be used for activities involved in recruiting students for enrollment at the grantee institution or for tuition, fees, stipends, and other forms of direct financial support for staff or participants, except for grant aid for participants (34 CFR sections 646.30 and 646.31).
- c. *UB Program* – The cost of room and board for the following persons may not be charged to the program: (1) administrative and instructional staff personnel who do not have responsibility for dormitory supervision of project participants; and (2) participants in Veterans UB projects. Meals for staff are also unallowable except as provided in 34 CFR sections 645.40 (d) and (m), and in 645.41(c) (34 CFR section 645.41).
- d. *TS Program* – TS funds cannot be used for (1) stipends and other forms of direct financial support for participants, or (2) application fees for financial aid (34 CFR section 643.31).
- e. *EOC Program* – EOC funds cannot be used for tuition, fees, stipends, and other forms of direct financial support for project participants (34 CFR section 644.31).
- f. *McNair Program* – McNair funds cannot be used for tuition, stipends, test preparation and fees, or any other form of student financial support to staff

or participants not expressly allowed under 34 CFR section 647.30 (see paragraphs 1.e.(2)(c) through (g), above) (34 CFR section 647.31(a)).

C. Cash Management

See Part 4, 84.000 ED Cross-Cutting Section.

E. Eligibility

1. Eligibility for Individuals

a. *SSS Program*

- (1) **Eligible Participants** – A student is eligible to participate in a SSS project if the student meets all of the following requirements: (a) is a citizen or national of the United States or meets the residency requirements for federal student financial assistance; (b) is enrolled at the grantee institution or accepted for enrollment in the next academic term at that institution; (c) has a need for academic support as determined by the grantee in order to pursue successfully a postsecondary educational program; and (d) is a low-income individual, a first-generation college student, or an individual with disabilities (34 CFR sections 646.3 and 646.7).
- (2) **Grant Aid to SSS Students** – Grant aid to students is restricted to students who meet all of the following criteria: (a) participating in the SSS project, undergoing their first two years of postsecondary education; and (b) receiving federal Pell Grants. In exceptional cases, grant aid may be offered to students who have completed their first two years of postsecondary education and are receiving federal Pell Grants (34 CFR section 646.30(i)).

The amount of grant aid awarded to an SSS student may not exceed the maximum appropriated Pell Grant (\$6,345 for the 2020–2021 academic year) or be less than the minimum appropriated Pell Grant (\$639 for the 2020–2021 academic year) (20 USC 1070a-14(d)(1)).

b. *TS Program – Eligible Participants*

An individual is eligible to participate in a TS project if the individual meets all of the following requirements: (1) is a citizen, national, or permanent resident of the United States or is in the United States for other than a temporary purpose; (2) has completed five years of elementary education or is at least eleven years of age but not more than 27 years of age (an individual more than 27 years of age may participate in a TS project if there is no EOC in the area, or a veteran regardless of age); and (3) is enrolled in or has dropped out of any grade from six through 12, or

has graduated from secondary school or dropped out of the postsecondary education and needs one or more of the services provided by the project (34 CFR section 643.3).

c. *UB Program*

- (1) **Eligible Participants** – An individual is eligible to participate in a Regular, Veterans, or Math-Science UB project if the individual meets all of the following requirements: (a) is a citizen, national, or permanent resident of the United States, or is in the United States for other than a temporary purpose; (b) is a potential first-generation college student, a low-income individual, or an individual who has a high risk for academic failure; (c) has a need for academic support in order to pursue successfully a program of education beyond high school; and (d) at the time of initial selection has completed the 8th grade but has not entered the 12th grade and is at least 13 years old but not older than 19. A veteran, regardless of age, who meets all other criteria is eligible to participate (34 CFR sections 645.3 and 645.6).
- (2) **Stipends** – Stipends for regular and Math-Science projects may not exceed \$40 per month from September to May of the academic year and \$60 for each of the summer months (June, July, and August). Youth participating in a work-study position may be paid a stipend of \$300 per month during June, July, and August. Stipends for participants in veterans' projects may not exceed \$40 per month. To be eligible for a stipend, participants must show evidence of satisfactory participation in project activities, including regular attendance and performance in accordance with the number of sessions in which a student participated (20 USC 1070a-13(f); 34 CFR section 645.42).

d. *EOC Program – Eligible Participants*

An individual is eligible to participate in an EOC project if the individual meets all of the following requirements: (1) is a citizen, national, or permanent resident of the United States or is in the United States for other than a temporary purpose; (2) is at least 19 years of age (an individual less than 19 years of age can be served by the EOC project if TS services are not available); and (3) expresses a desire to enroll or is enrolled in a program of postsecondary education and requests information or assistance in applying for admission or financial aid for such a program. A veteran, regardless of age, is eligible to participate in an EOC project if he or she meets eligibility requirements (34 CFR section 644.3).

e. *McNair Program*

- (1) Eligible Participants – A student is eligible to participate in a McNair project if the student meets all of the following requirements: (a) is a citizen, national, or permanent resident of the United States or is in the United States for other than a temporary purpose; (b) is currently enrolled in a degree program at an institution of higher education that participates in the student financial assistance programs; (c) is a low-income individual who is a first-generation college student or a member of a group that is underrepresented in graduate education or, under certain circumstances, underrepresented in certain academic disciplines; and (d) has not enrolled in doctoral level study (34 CFR sections 647.3 and 647.7).
- (2) McNair Stipends – Stipends of up to \$2,800 per year for students engaged in approved research internships, provided that the student has completed the sophomore year of study at an eligible institution before the internship begins (20 USC 1070a-15(f); 34 CFR section 647.30).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

- a. *Student Support Services Program Annual Performance Report (OMB No. 1840-0525)* – Grantees must submit an annual performance report to ED each year of the project period.

Key Line Items – The following line items contain critical information:

Section II, *Record Structure for Participant List*, fields:

- 15 Eligibility
- 17 First Enrollment Date (at grantee institution)
- 18 Date of First Project Service
- 19 College Grade Level (entry into project)
- 22 Participant Status (during academic year)
- 23 Enrollment Status (at end of the academic year)
- 24 Academic Standing
- 27 College Grade Level (at the end of the academic year)
- 31 Undergraduate Degree/Certificate Completed at Grantee Institution

- b. *Upward Bound, and Upward Bound Math-Science Programs Annual Performance Report (OMB No. 1840-0831)* – Grantees must submit an annual performance report to ED each year of the project period.

Key Line Items – The following line items contain critical information:

Section II, *Record Structure for Participant List for Upward Bound and Upward Bound Math-Science Projects*, fields:

- 16 Eligibility (at time of initial selection)
- 17 At Risk: Reading Language Arts or Math Proficiency Not Achieved (at time of initial selection)
- 18 At Risk: Low Grade Point Average (at time of initial selection)
- 19 At Risk: Pre-Algebra or Algebra Course Not Successfully Completed by Beginning of 10th Grade (at time of initial selection)
- 20 Limited English Proficiency (at time of initial selection)
- 24 Date of First Project Service
- 25 Grade Level at First Service
- 27 Participant Status for reporting year
- 28 Participation Level for reporting year
- 29 Served by Another Federally Funded College Access Program for reporting year
- 30 Grade Level at the beginning of academic year being reported
- 37 Secondary School Retention and Graduation Objective – Numerator, for reporting year
- 45 Date of Last Project Service

- c. *Talent Search Annual Performance Report (OMB No. 1840-0826)* – Grantees must submit an annual performance report to ED each year of the project periods.

Key Line Items – The following line items and sections contain critical information:

- (1) Section II, *Demographic Profile of Project Participants and Listing of Target School*, subsections:

- A. Types of Participants Assisted
 - B. Participant Distribution by Eligibility
 - F. Veterans Served
 - G. Participants with Limited English Proficiency
 - J. TS participants also served during reporting year by another federally funded program
 - L. Target Schools
- (2) Section IV, *Educational Status of Talent Search Participants* (at end of the reporting period or the following fall), lines:
- A1. Persisted in school for the next academic year at the next grade level or graduated high school.
 - B1. Received regular secondary school diploma within standard number of years but did not complete a rigorous program of study.
 - C1. Enrolled in postsecondary education or notified of deferred enrollment columns (b) and (c).
- d. *Educational Opportunity Centers Program Annual Performance Report For Program Year (OMB Number 1840-0830)* – Grantees must submit an annual performance report to ED each year of the project period.

Key Line Items – The following line items contain critical information:

Section II: *Demographic Profile of Project Participants, Target Schools, Invitational Priorities*

- H. EOC Participants also served during the reporting year by another federally funded program Section IV, *Educational Status of EOC Participants (at the end of the reporting period or for the following fall)*, lines:
 - A1. Received a secondary school diploma or its equivalent
 - B1. Completed a financial aid application
 - D2. Had a secondary school diploma or credential at the time of first service in the reporting year and enrolled in a postsecondary education program
- e. *Ronald E. McNair Post-Baccalaureate Achievement Program Performance Report (OMB No. 1840-0640)* – Grantees must submit an annual performance report to the department each year of the project period.

Key Line Items – The following items contain critical information:

Section II, *Record Structure for Participant List*, fields:

15	Low-income
16	First-generation
17	Under-represented racial/ethnic group
18	First Postsecondary Education Enrollment Date
20	Project Entry Date
21	Grade Level at Project Entry
22	Participant Status (during academic year being reported)
23	Enrollment Status (during academic year being reported)

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Services that Student Support Services, Talent Search, Upward Bound or McNair Projects Must Provide

Compliance Requirements Recipients of TRIO Programs funded under SSS, TS, UB and McNair programs must provide specific services and activities. The services and activities that each program must provide are listed in III.A.1, “Allowable Activities,” above, and are as follows:

- a. UB Program (34 CFR section 645.11), see III.A.1.a.(1) above
- b. SSS Program (34 CFR section 646.4(a)), see III.A.1.b.(1) above
- c. TS Program (34 CFR section 643.4(a)), see III.A.1.c.(1) above
- d. McNair Program (34 CFR section 647.4(a)), see III.A.1.e.(1) above

A grantee must provide all of the required services in the applicable SSS, TS, UB, or McNair program regulations to its participants (either directly through the project or through another service provider, as permitted by the applicable regulations). However, not all participants may need all of the required services or may choose not to take advantage of them.

Audit Objectives Determine whether the required services were provided to SSS, TS, UB, or McNair participants.

Suggested Audit Procedures

Review records of services received by participants, calendars, or logs of service providers (i.e., counselors or tutors) and expenditure records to verify that the required

services and activities were provided to participants.

2. Core Curriculum Instruction in the Upward Bound Program

Compliance Requirements UB projects that have received funding for a least two years must provide core curriculum instruction in mathematics through pre-calculus, laboratory science, foreign language, composition, and literature to its participants in the next and succeeding years. However, not all participants may need instruction in mathematics through pre-calculus, laboratory science, foreign language, composition, and literature, or may choose not to take advantage of this instruction (34 CFR section 645.11 (b)).

Audit Objectives Determine whether UB projects that have received funding for at least two years provided instruction in mathematics through pre-calculus, laboratory science, foreign language, composition, and literature in its core curriculum in the next and succeeding years.

Suggested Audit Procedures

- a. Ascertain if the UB project has received funding for at least two years.
- b. Verify by reviewing participant files, records of services received by participants, expenditure records and class rosters or enrollment records that project participants have available core curriculum instruction in mathematics through pre-calculus, laboratory science, foreign language, composition, and literature in the next and succeeding years.

3. Minimizing Duplication of Services under the TS and UB Programs

Compliance Requirements To minimize the duplication of services and promote collaborations so that more students can be served, TS and UB projects are required to collaborate with other TRIO projects, Gaining Early Awareness and Readiness for Undergraduate programs (GEAR UP) projects (Assistance Listing 84.334), or projects from other programs serving similar populations that are serving the same target schools or target area (34 CFR sections 643.11(b) and 645.21(a)(4)).

In addition, the recipients of TS and UB grants are required to keep records, to the extent practicable, of any services TS or UB participants receive during the project year from another TRIO program or another federally funded program that serves populations similar to those served under the TS and UB programs (34 CFR sections 643.32(c)(5) and 645.43(c)(5)).

Audit Objectives Determine whether the TS or UB project: (1) collaborates with other TRIO projects, GEAR UP projects, or programs serving similar populations and the same target schools or target area to minimize the duplication of services and promote collaborations so that more students can be served; and (2) keeps records of any services TS or UB participants receive during the project year from another TRIO program or another federally funded program that serves populations similar to those served under the TS and UB programs.

Suggested Audit Procedures

- a. Review project files (e.g., approved application, Upward Bound Program Assurances, or Talent Search Program Assurances) for information on collaboration plans and documentation that demonstrates the plans were implemented (e.g., memoranda of understanding), and, for records of services received by participants and referrals from federally funded projects, high school counselors, and community-based organizations.
- b. Verify that the TS or UB grantee collaborates with entities operating projects or programs serving similar populations to minimize the duplication of services.
- c. Review and assess participant files, project databases, referrals from service providers, tutors, and instructors.
- d. Verify that the TS or UB project maintains records of services received by participants from another federal TRIO program or another federally funded program that serves similar populations.

IV. OTHER INFORMATION

1. Certain compliance requirements that apply to multiple ED programs, including the TRIO cluster, are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. Where applicable to the TRIO cluster requirements, references are made to the specific part of the ED Cross-Cutting Section.
2. A citizen, national, or permanent resident of the United States, includes a permanent resident of Guam, the Northern Mariana Islands, the Trust Territory of the Pacific Islands (Palau), or resident of one of the Freely Associated States—the Federated States of Micronesia or the Republic of the Marshall Islands.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.048A CAREER AND TECHNICAL EDUCATION—BASIC GRANTS TO STATES (Perkins V)

I. PROGRAM OBJECTIVES

On July 31, 2018, the president signed into law the Strengthening Career and Technical Education for the 21st Century Act (Pub. L. No. 115-224) (Perkins V), which reauthorized and amended the Carl D. Perkins Career and Technical Education Act of 2006. Perkins V provides grants to states and outlying areas to develop the academic knowledge and technical and employability skills of secondary students and postsecondary students by (1) building on the efforts of states and localities to develop challenging academic and technical standards and to assist students in meeting such standards; (2) promoting the development of services and activities that integrate rigorous and challenging academic and career and technical instruction, and that link secondary education and postsecondary education; (3) increasing state and local flexibility in providing services and activities designed to develop, implement and improve career and technical education; (4) conducting and disseminating national research and disseminating information on best practices that improve career and technical education programs and programs of study, services, and activities; (5) providing technical assistance; (6) supporting partnerships among secondary schools, postsecondary institutions, baccalaureate degree-granting institutions, area career and technical education schools, local workforce investment boards, business and industry, and intermediaries; and (7) providing individuals with opportunities to develop, in conjunction with other educational and training programs, the knowledge and skills needed to keep the United States competitive; and (8) increasing the employment opportunities for populations who are chronically unemployed or underemployed, including individuals with disabilities, individuals from economically disadvantaged families, out-of-workforce individuals, youth who are in, or have aged out of, the foster care system, and homeless individuals.

II. PROGRAM PROCEDURES

A. Overview

Participating states must designate or establish a state board of career and technical education (defined in Perkins V as the “eligible agency” (Section 3(18) of Perkins V (20 USC 2302(18))), and herein referred to as the “state”) to administer and supervise state career and technical education programs. In order to receive funds for any program year, the state must have an approved state plan for career and technical education or an approved combined state plan under the Workforce Innovation and Opportunity Act (WIOA) (Pub. L. No. 113-128).

B. Allocation and Uses of Funds

The Department of Education (ED) allocates funds to the state based on a statutory formula described in Section 111 of Perkins V. From the amount allotted to the state

under Section 111 for any fiscal year, the state shall make available funds for the following statutorily prescribed programs and activities.

Programs and Activities	Section of Perkins V	Statutory Amount of Section 111 Funds
Secondary and postsecondary career and technical education programs	Section 112(a)(1)	Not less than 85 percent, of which not more than 15 percent of the 85 percent may be “reserved” under section 112(c)
State leadership activities	Section 112(a)(2)	Not more than 10 percent
State administration activities	Section 112(a)(3)	Not more than 5 percent, or \$250,000, whichever is greater

The state may operate these programs and activities directly and/or transfer funds through contracts or grants to other state agencies to administer one or more of them.

In administering secondary and postsecondary career and technical education programs under Section 112(a)(1) of Perkins V, the state makes grants to eligible recipients (“hereinafter referred to as subrecipients”) as defined in Section 3(21) of Perkins V (20 USC 2302(21)). Subrecipients submit applications to the state in order to receive funds, which are distributed by statutory formula.

The state and subrecipients may use their funds for a wide range of CTE programs, activities, and services as described in law:

1. Secondary and postsecondary career and technical education programs – Section 135 of Perkins V (20 USC 2355);
2. State leadership activities – Section 124 of Perkins V (20 USC 2344);
3. State administration activities – Section 112(a)(3) of Perkins V (20 USC 2322)(a)(3)).

Source of Governing Requirements

This program is authorized by the Carl D. Perkins Career and Technical Education Act of 2006, as amended by the Strengthening Career and Technical Education for the 21st Century Act (Perkins V) (20 USC 2301 et seq., as amended by Pub. L. No. 115-224).

Availability of Other Program Information

Program and policy guidance applicable to the Perkins V requirements in this program supplement are available on the Perkins Collaborative Resource Network (PCRN) at <http://cte.ed.gov/>. The relevant documents are:

1. State allocations under Perkins V (under Grant Programs/State Allocations tab);
2. Guidance for the submission of state plans, revisions, budgets, and performance levels for Perkins V (under the Grant Programs/State Plans tab);

3. Guidance for the submission of Consolidated Annual Reports (CAR) under Perkins V (under the Accountability/CAR tab); and
4. Prior approval authority regarding program income for Perkins V subrecipients (under Grant Programs/State Formula Grants/Related Sources/Program Memorandum).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

Y	Y	Y	Y	N	Y	Y	N	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. State Leadership Activities – Required Uses.

A state shall use state leadership funds for supporting:

- (1) Preparation for nontraditional fields in current and emerging professions, programs for special populations, and other activities that expose students, including special populations, to high-skill, high-wage, and in-demand occupations;

- (2) Individuals in state institutions, such as state correctional institutions, including juvenile justice facilities, and educational institutions that serve individuals with disabilities;
 - (3) Recruiting, preparing, or retaining career and technical education teachers, faculty, specialized instructional support personnel, or paraprofessionals, such as preservice, professional development, or leadership development programs;
 - (4) Technical assistance for eligible recipients; and
 - (5) Reporting on the effectiveness of such use of funds in achieving the goals described in sections 122(d)(2) and the state determined levels of performance described in sections 113(b)(3)(A) and reducing disparities or performance gaps as described in sections 113(b)(3)(C)(ii)(II).
- b. State Leadership Activities – Other Permissible Uses of Funds. In addition to the required State Leadership Activities (1)– (5) listed above, a state may use state leadership funds for a broad variety of permissive activities listed in Section 124(b) of Perkins V (20 USC 2344(b)). While not an exhaustive list, examples of allowable activities include;
- (1) Developing statewide programs of study;
 - (2) Establishing statewide articulation agreements aligned to approved programs of study;
 - (3) Supporting subrecipients in eliminating inequities in student access to
 - (a) high-quality programs of study that provide skill development; and
 - (b) effective teachers, faculty, specialized instructional support personnel, and paraprofessionals;
 - (4) The creation, evaluation, and support of competency based curricula;
 - (5) Improvement of career guidance and academic counseling programs that assist students in making informed academic

- and career and technical education decisions, including academic and financial aid counseling;
- (6) Support for career and technical student organizations;
 - (7) Support for establishing and expanding work-based learning opportunities that are aligned to career and technical education programs and programs of study; and
 - (8) Other state leadership activities that improve career and technical education.
- c. State Administration – A state may use funds reserved for state administration for:
- (1) Developing the state plan;
 - (2) Reviewing local applications;
 - (3) Monitoring and evaluating program effectiveness;
 - (4) Ensuring compliance with all applicable federal laws;
 - (5) Providing technical assistance; and
 - (6) Supporting and developing state data systems relevant to the provisions of Perkins V (Section 112(a)(3) of Perkins V (20 USC 2322(a)(3))).
- d. Subrecipient (Eligible Recipient) Activities- Funds made available to subrecipients (referred to in the Perkins V law as eligible recipients) such as secondary school districts or local education agencies at the secondary level and community and technical colleges at the postsecondary level shall be used to develop, coordinate, implement or improve career and technical education programs to meet the needs identified in the comprehensive local needs assessment (described in Section 134(c) of Perkins V) at the secondary and postsecondary levels. The subrecipient plan or approved application describes the specific activities to be carried out. Requirements for, and examples of, uses of funds are identified in Section 135(b), (c) and (d) of Perkins V (20 USC 2355(b)), (c), and (d)).
- e. Perkins funds made available to subrecipients shall be used to support career and technical education programs that are of sufficient size, scope, and quality to be effective and that—

- (1) Provide career exploration and career development activities through an organized, systematic framework designed to aid students, including in the middle grades, before enrolling and while participating in a career and technical education program, in making informed plans and decisions about future education and career opportunities and programs of study;
 - (2) Provide professional development for teachers, faculty, school leaders, administrators, specialized instructional support personnel, career guidance and academic counselors, or paraprofessionals;
 - (3) Provide within career and technical education the skills necessary to pursue careers in high-skill, high-wage, or in-demand industry sectors or occupations;
 - (4) Support integration of academic skills into career and technical education programs and programs of study to support—
- f. CTE participants at the secondary school level in meeting the challenging state academic standards adopted under Section 1111(b)(1) of the Elementary and Secondary Education Act of 1965, as amended by Pub. L. No. 115-224, by the state in which the eligible recipient is located; and
- (1) CTE participants at the postsecondary level in achieving academic skills;
 - (2) Plan and carry out elements that support the implementation of career and technical education programs and programs of study and that result in increasing student achievement of the local levels of performance established under Section 113; and
 - (3) Develop and implement evaluations of the activities carried out with funds under this part, including evaluations necessary to complete the comprehensive needs assessment required under Section 134(c) and the local report required under Section 113(b)(4)(B).

- g. Schoolwide Programs- See Part II.B.2 of the 84.000 ED Cross-Cutting Section.

2. *Activities Unallowed*

- a. State Leadership Activities –A state may not use state leadership funds for administrative costs unless expressly authorized under subsection (a) (Section 124(c) of Perkins V (20 USC 2344(c))).

B. Allowable Costs/Cost Principles

See Part III.B. of 84.000 ED Cross-Cutting Section.

C. Cash Management

See Part III.C. of 84.000 ED Cross-Cutting Section.

E. Eligibility

1. Eligibility for Individuals

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Subrecipients (Eligible Recipients) as Determined by the State is as follows:

a. Secondary Career and Technical Education Programs

- (1) The state determined sub-recipient (eligible recipient) as defined in section 3 (21)(a) of Perkins V. A subrecipient must be:

- (a) A local educational agency (LEA), including a public charter school that is eligible to receive \$15,000 or more under Section 131(c) of Perkins V;
- (b) An area career and technical education school or an educational service agency that meets the requirements in Section 131(e) of Perkins V; or
- (c) A consortium of LEAs that meets the requirements in Section 131(f) of Perkins V. (20 USC 2351 (f)).

- (2) The state must treat a secondary school funded by the Bureau of Indian Education (BIE) within the state as if such school were a

LEA within the state for the purpose of receiving a distribution under Section 131 of Perkins V (Section 131(h) of Perkins V (20 USC 2351(h))).

- (3) Except as noted below, the state must provide funds to public charter schools offering a career and technical education program in the same manner as it provides those funds to other schools; career and technical education programs within a charter school must be of sufficient size, scope, and quality to be effective (Section 133(d) of Perkins V (20 USC 2353(d))). For the definition of “charter school” applicable to Perkins V, see Section 4310 (20 USC 7221i) of the Elementary and Secondary Education Act of 1965, as amended (ESEA) at <https://www2.ed.gov/documents/essa-act-of-1965.pdf>.
- (4) For any program year, unless a state has an approved alternative formula, a state must distribute the amount reserved for the secondary school career and technical education programs as follows:
 - (a) Thirty percent to each LEA in proportion to the number of individuals aged 5 through 17, inclusive, who reside in the school district served by such LEA for the preceding fiscal year compared to the total number of such individuals who reside in the school districts served by all LEAs in the state for such preceding fiscal year, as determined on the basis of the most recent satisfactory data provided to the secretary by the Bureau of the Census for the purpose of determining eligibility under Title I of the ESEA; or student membership data collected by the National Center for Educational Statistics through the Common Core of Data survey system; and
 - (b) Seventy percent to each LEA in proportion to the number of individuals aged 5 through 17, inclusive, who reside in the school district served by such LEA and are from families with incomes below the poverty level for the preceding fiscal year, as determined on the basis of the most recent satisfactory data used under Section 1124(c)(1)(A) of the ESEA (20 USC 6333(c)(1)(A)), compared to the total number of such individuals who reside in the school districts served by all the LEAs in the state for such preceding fiscal year (Section 131(a) of Perkins V (20 USC 2351(a))).
- (5) An LEA that does not meet the minimum grant requirement of \$15,000 can form a consortium with one or more LEAs to meet the

- minimum grant requirement (Section 131(f) of Perkins V (20 USC 2351(f))).
- (6) The state must waive the minimum grant requirement for an LEA that is in a rural, sparsely populated area or that is a public charter school operating a secondary school career and technical education program if the LEA demonstrates that the LEA is unable to enter into a consortium for purposes of providing activities under Title I, Part C of Perkins V (Section 131(c)(2) of Perkins V (20 USC 2351(c)(2))).
 - (7) If the state reserves 15 percent or less pursuant to Section 112(a)(1) (20 USC 2322(a)(1)), it may distribute those funds on a competitive basis or through any alternative method (Section 133(a) of Perkins V (20 USC 2353(a))).
- b. Postsecondary Career and Technical Education Programs
- (1) A subrecipient (Eligible Recipient) as defined in section 3 (20) of Perkins V must be an eligible institution, which is
 - (a) A consortium of two or more of the entities described in subparagraphs (B) through (F);
 - (b) A public or nonprofit private institution of higher education that offers and will use funds provided under this title in support of career and technical education courses that lead to technical skill proficiency, or a recognized postsecondary credential, including an industry-recognized credential, a certificate, or an associate degree except that, for the purpose of Section 132, the term “recognized postsecondary credential” as used in this subparagraph shall not include a baccalaureate degree;
 - (c) A local educational agency providing education at the postsecondary level;
 - (d) An area career technical educational school providing education at the postsecondary level;
 - (e) An Indian tribe, tribal organization, or tribal education agency that operates a school or may be present in the state;
 - (f) A postsecondary education institution controlled by BIE or operated by or on behalf of any Indian tribe that is eligible to contract with the secretary of the Interior for the administration of programs under the Indian Self-Determination and Education Assistance Act (25 USC

5301 et seq.) or the Act of April 16, 1934 (25 USC 5342 et seq.);

- (g) A tribally controlled college or university; or
 - (h) An educational service agency (Section 3(17) of Perkins V (20 USC 2302(17))).
- (2) Unless a state has an approved alternative formula, the state must distribute the amounts reserved for the postsecondary career and technical education programs to each subrecipient in proportion to the number of Pell grant recipients and recipients of assistance from BIE enrolled in programs meeting the requirements of Section 135 of Perkins V at that subrecipient in the preceding year compared to the total of such subrecipients enrolled in those programs in the state in the preceding year (Section 132(a) of Perkins V (20 USC 2352(a))). The minimum grant is \$50,000; a state must reallocate amounts allocated to subrecipients that are less than \$50,000 to other subrecipients or consortia in accordance with Section 132, except as provided below (Section 132(c) of Perkins V (20 USC 2352(c))).
- (3) A subrecipient that does not meet the minimum grant requirement of \$50,000 may form a consortium with one or more subrecipients to meet the minimum grant requirement (Section 132(a)(3) of Perkins V (20 USC 2352(a)(3))). The state may waive the minimum grant requirement for subrecipients in rural, sparsely populated areas (Section 132(a)(4) of Perkins V (20 USC 2352(a)(4))).
- (4) If the state reserves 15 percent or less for its postsecondary program, it may distribute these funds on a competitive basis or through any alternative method (Section 133(a) of Perkins V (20 USC 2353(a))).

G. Matching, Level of Effort, Earmarking

1. Matching

A state must match, from nonfederal sources and on a dollar-for-dollar basis, the funds reserved for administration of the state plan. The matching requirement may be applied overall, rather than line-by-line, to state administrative expenditures. (Section 112(b) of Perkins V (20 USC 2322 (b)))

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

a. General

- (1) A state must maintain its fiscal effort in the preceding year from state sources for career and technical education on either an aggregate or a per-student basis when compared with such effort in the second preceding year unless this requirement is specifically waived by the Secretary of Education. For example, to receive its Federal Fiscal Year (FY) 2022 grant award, a state must maintain its level of fiscal effort on either an aggregate or per-student basis in State Fiscal Year (SFY) 2021 (July 1, 2020 -June 30, 2021) at the level of its fiscal effort in SFY 2020 (July 1, 2019-June 30, 2020)

In order for the Secretary to determine whether a state has met this Maintenance of Effort requirement in FY 2022, section 211(b)(1) (D) of Perkins V requires each state to establish its baseline for the first full fiscal year after the enactment of Perkins V, which is the SFY 2020 (July 1, 2019-June 30, 2020) maintenance of effort baseline. In establishing this baseline, states could have used one of two methods in accordance with section 211(b)(1)(D)(i)-(ii) of Perkins V

- Continue to use the state’s fiscal effort or aggregate expenditures of such state for career and technical education, as was in effect on the day before the enactment of Perkins V (**Continuing level**); or
- Establish a new level of fiscal effort per student or aggregate expenditures of such state for career and technical education, which is not less than 95 percent of the state’s fiscal effort as was in effect on the day before the enactment of Perkins V (**new level**).

An example of how the Maintenance of Effort baseline computation could be calculated is as follows:

- In SFY 2019 (7/1/18 to 6/30/19) a state spends \$10 million dollars from state funds on career and technical education activities. The state has a choice, it can utilize this same level of effort in SFY 2020 (7/1/19 to 6/30/20), the **Continuing level**; or the state can reduce their level by 5% for that same year to \$9,500,000. The number that the state selected will be their official (and not actual) expenditure for that year

An example of how a state may maintain effort on a **per- student basis**, but not in aggregate, is as follows:

- In SFY 2020 (the maintenance of effort baseline year), a state spends \$50 million from state funds to provide career and technical education to 300,000 students. In SFY 2021, the state spends only \$49 million to provide career and technical education to 290,000 students. Even though the state's aggregate effort decreased by \$1 million, the state's per-student effort increased from \$166.67 per student to \$168.97 per student. Thus, the state met the maintenance of effort requirement for its fiscal year 2022 grant (Section 211(b)(1)(A) of Perkins V (20 USC 2391(b)(1)(A)).
- b. If a state has been granted a waiver of the maintenance of effort requirement that allows it to receive a grant for a program year, the maintenance of effort requirement for the year after the year the waiver was granted is determined by comparing the amount spent for career and technical education programs from non-federal sources in the first preceding program year with the amount spent in the third preceding program year (i.e. the year prior to the waiver) (Section 211(b)(3) of Perkins V (20 USC 2391(b)(3)).

In computing the fiscal or aggregate expenditures, the Secretary shall, at the request of the state, exclude competitive or incentive-based programs established by the state, capital expenditures, special one-time project costs, and the cost of pilot programs (Section 211(b)(1)(B) of Perkins V (20 USC 2391(b)(1)(B)).

(1) Administration

- A state shall provide from non-federal sources for state administration under Perkins V, an amount that is not less than the amount provided by the state from non-federal sources for state administrative costs for the preceding fiscal or program year. (Section 223(a) of Perkins V (20 USC 2413(a)).

2.2 Level of Effort – *Supplement Not Supplant*

- a. The state and its subrecipients may use funds for career and technical education activities that supplement, and not supplant, non-federal funds expended to carry out career and technical education activities (Section 211(a) of Perkins V (20 USC 2391(a))). The examples of instances where supplanting is presumed to have occurred as described in Part III.G.2.2 of the 84.000 ED Cross-Cutting Section also apply to Perkins V.

- b. Notwithstanding the above paragraph, funds made available under Perkins V may be used to pay for the costs of career and technical education services required in an individualized education plan (IEP) developed pursuant to Section 614(d) of the Individuals with Disabilities Education Act (IDEA) and services necessary to meet the requirements of Section 504 of the Rehabilitation Act of 1973 with respect to ensuring equal access to career and technical education (Section 224(c) of Perkins V (20 USC 2414(c))).

3. Earmarking

- a. *States* – Subject to the requirements discussed below regarding the minimum amount for state administration, a state must reserve the following percentages:
 - (1) *Secondary and Postsecondary Career and Technical Education Programs* – not less than 85 percent. A state must distribute all of these funds to its eligible recipients. A state may reserve no more than 15 percent of the 85 percent of funds to make grants for activities described in Section 135 of Perkins V (20 USC 2355) to subrecipients in (a) rural areas; (b) areas with high percentages of CTE concentrators or CTE participants; and (c) areas with high numbers of CTE concentrators or CTE participants; and (d) areas with disparities or gaps in performance as described in Section 113(b)(3)(C)(ii)(II) (sections 112(a)(1) and (c) of Perkins V (20 USC 2322(a)(1) and (c))).
 - (2) *State Leadership Activities* – not more than 10 percent. Within the state leadership activities not more than 2 percent of the amount allocated to each state in Section 111 of Perkins V (20 USC 2321) shall be allotted to activities that serve individuals in state institutions. Also, not less than \$60,000 and not more than \$150,000 of the amount allocated to each state in Section 111 of Perkins V shall be made available for services that prepare individuals for nontraditional fields. Also, an amount must be made available for the recruitment of special populations to enroll in CTE programs, which must be not less than the lesser of an amount equal to 0.1 percent or \$50,000 (Section 112(a)(2) of Perkins V (20 USC 2322(a)(2))).
 - (3) *State Administration* – not more than 5 percent or \$250,000, whichever is greater, for administration of the state plan (Section 112(a)(3) of Perkins V (20 USC 2322 (a)(3))).
- b. *Subrecipients* – Subrecipients under the secondary and postsecondary career and technical education programs may use no more than 5 percent

of those funds for administrative costs (Section 135(d) of Perkins V (20 USC 2355(d))).

H. Period of Performance

See Part III.H. of the 84.000 ED Crosscutting Section.

M. State Monitoring of Eligible recipients

1. Each state must evaluate annually, using the local adjusted levels of performance described in Section 113(b)(4) of Perkins V (20 USC 2323(b)(4)), the career and technical education activities of each eligible recipient receiving funds under sections 131 and 132 of Perkins V (Section 123(b)(1) of Perkins V (20 USC 2343(b)(1))).
2. The state determines whether a subrecipient failed to meet at least 90 percent of an agreed upon local level of performance for any of the core indicators of performance described in Section 113(b)(4) of Perkins V for all CTE concentrators and, if so, required the subrecipient to develop and implement the improvement plan required by Section 123(b)(2) of Perkins V (20 USC 2343(b)(2)).

IV. OTHER INFORMATION

Certain compliance requirements that apply to multiple ED programs, including Perkins V, are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. Where applicable to the Perkins V requirements, references are made to the specific part of the ED Cross-Cutting Section. Further, the Other Information section in 84.000 also provides information that is relevant to this program. (See Other Information, 2. Schoolwide Programs).

DEPARTMENT OF EDUCATION**ASSISTANCE LISTING 84.126 REHABILITATION SERVICES–VOCATIONAL
REHABILITATION GRANTS TO STATES****I. PROGRAM OBJECTIVES**

The purpose of Title I of the Rehabilitation Act of 1973, as amended (Act), which authorizes the State Vocational Rehabilitation (VR) Services program, is to assist states in operating statewide comprehensive, coordinated, effective, efficient, and accountable VR programs, each of which is (1) an integral part of a statewide workforce development system; and (2) designed to assess, plan, develop, and provide VR services for individuals with disabilities, consistent with their strengths, resources, priorities, concerns, abilities, capabilities, interests, informed choice, and economic self-sufficiency so that such individuals may prepare for and engage in gainful employment.

II. PROGRAM PROCEDURES**A. Overview**

Federal funds are distributed to the states on a formula basis. The program is administered by an agency designated by the state as having overall administrative responsibility for the VR program. If the designated state agency is not an agency primarily concerned with VR, or vocational and other rehabilitation of individuals with disabilities, it must include a designated state unit within the agency that is responsible for the designated state agency's VR program (state VR agency).

To receive funds under Title I of the Act, a state must submit, and have approved by the secretaries of Education and Labor, a Unified or Combined State Plan in accordance with Section 102 or Section 103, respectively, of the Workforce Innovation and Opportunity Act (WIOA) (29 USC 3112 and 3113). The Unified or Combined State Plan must include a VR services portion, which contains both assurances and descriptions that are required by Title I of the Act and the implementing regulations (34 CFR Part 361). The VR services portion of the Unified or Combined State Plan is one of the key bases of the Department of Education's, Rehabilitation Services Administration's monitoring of the state's administration of the VR program.

Services are provided directly by state VR agency staff, purchased from community-based vendors, or arranged to be provided by other public entities. Services identified in Section 103(a) of the Act (29 USC 723(a)), except those of an assessment nature, are provided in accordance with an Individualized Plan for Employment (IPE), which can be developed by the individual, or with assistance from others, including a qualified VR counselor employed by the state VR agency or, as appropriate, a disability advocacy organization. The services identified in the IPE are those determined by the individual and qualified VR counselor to be necessary for the individual to achieve an employment outcome that is consistent with the individual's strengths, resources, priorities, concerns, abilities, capabilities, and informed choice. State VR agencies also may provide services to groups of individuals with disabilities, including students and youth with disabilities.

B. Other

WIOA requires the VR program to collaborate with other workforce development, educational, and human resource programs in a one-stop service delivery system. WIOA’s objective is to create a seamless delivery system by linking the agencies operating these programs in order to provide universal access to the programs operated by each agency. While the one-stop system operates as a common portal for gaining access to these programs, each program provides its respective services to persons meeting its respective eligibility criteria.

Agencies responsible for administering the programs whose services are delivered in a one-stop system are known as “partners;” those whose participation is mandated by WIOA, including the state VR agency, are “required partners.” Each partner must enter into a Memorandum of Understanding (MOU) with the Local Workforce Development Board regarding the operation of the one-stop system. The MOU covers the services to be provided through the one-stop system, funding for those services and for the operating costs of the system, including infrastructure costs and other shared costs of one-stop centers, and the methods for referring individuals between one-stop operators and partners. It establishes how each partner will participate in the one-stop system and share in the cost of its operation. Each partner’s resources may be used only for (1) services that are authorized under that partner’s program and delivered to individuals who are eligible for those services; and (2) operating costs of the one-stop center, including infrastructure costs and shared services costs allocable to the partner’s program.

In addition to the MOU required by WIOA, the Act requires that a state VR agency’s VR services portion of the Unified or Combined State Plan provide for a network of cooperative agreements binding that agency’s central and local offices to the central and local offices, respectively, of the other partners in the one-stop service delivery system. states can choose to use the same document to meet the requirements for both the MOU and the cooperative agreements. As used henceforth in this discussion, “MOU” refers to whatever document(s) a state agency uses to meet these requirements.

Source of Governing Requirements

The VR program is authorized by Title I of the Rehabilitation Act of 1973, as amended by Title IV of WIOA (29 USC 701 et seq.). Program regulations are found at 34 CFR Part 361.

Availability of Other Program Information

The Rehabilitation Service Administration’s (RSA) website contains information pertinent to the program. The following documents are most pertinent to the critical areas to be tested under the VR program:

1. Instructions for completing the Vocational Rehabilitation Financial Report (RSA-17) for the State Vocational Rehabilitation Services program (DCL-20-02)
<https://rsa.ed.gov/about/programs/vocational-rehabilitation-state-grants>
2. Period of Performance Frequently Asked Questions

<https://rsa.ed.gov/sites/default/files/subregulatory/rsa-faq-period-of-performance-for-formula-grant-awards-03-21-2017.pdf>

3. One-Stop Infrastructure Costs Frequently Asked Questions
<https://rsa.ed.gov/sites/default/files/subregulatory/rsa-faq-one-stop-infrastructure-costs-12-27-2016.pdf>

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A. Activities Allowed or Unallowed

1. *Activities Allowed*
 - a. *Services to Individuals-* VR services provided under Section 103(a) of the Act (29 USC 723(a)) are any services described in an IPE necessary to assist an individual with a disability in preparing for, securing, retaining, or regaining an employment outcome that is consistent with the individual’s strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice. Section 103(a) of the Act contains examples of the types of services that can be provided to individuals with disabilities under an IPE. In addition, state VR agencies

may provide pre-employment transition services, pursuant to Section 113 of the Act (29 USC 733), to students with disabilities, regardless of whether they have applied and been determined eligible for VR services. A student with a disability is not required to have an IPE to receive pre-employment transition services under Section 113 of the Act; however, a student with a disability must have an IPE if he or she needs other VR services that are beyond the scope of pre-employment transition services described in section 113 of the Act.

- b. *Services to Groups*-The state VR agency may provide VR services that benefit a group of individuals with disabilities. Section 103(b) of the Act (29 USC 723(b)) describes those services state VR agencies may provide to groups of individuals with disabilities.
- c. *Participation in a One-Stop Service Delivery System*- Any service or infrastructure cost charged to the VR program through its participation in the one-stop service delivery system must be allowable under the program's authorizing statute and regulations and allocable to the VR program, consistent with the MOU between the state VR agency and the Local Workforce Development Board. The MOU is the primary vehicle by which the state VR agency sets forth how it will participate in and share in the costs of operating the one-stop service delivery system.

The MOU identifies the resources the state VR agency will contribute to support a fair share of the one-stop system's common operating costs, including infrastructure and shared services costs. The amount provided must be proportionate to the use of the system and the relative benefits received by the program. VR agencies may provide contributions for infrastructure and shared services costs through cash, noncash, or third party in-kind contributions, in accordance with the MOU. Cash contributions are cash funds provided to the Local Workforce Development Board or its designee by one-stop partners, either directly or through an interagency transfer. Noncash contributions are expenditures incurred by one-stop partners on behalf of the one-stop center and goods or services contributed by a partner program and used by the one-stop center, fairly valued consistent with 2 CFR section 200.306. Third party in-kind contributions are contributions of space, equipment, technology, non-personnel services, or other like items to support the infrastructure costs associated with one-stop operations, contributed either directly to one-stop partners or on behalf of a specific partner. While the VR agency may provide third party in-kind contributions for the one-stop system, such contributions do not count as match under the VR program (29 USC 3151(b)(1)(A)(iv)); 34 CFR sections 361.23 and 361.60(b) and Subpart F).

- d. *Administrative Costs for Pre-Employment Transition Services*- Administrative costs incurred while providing pre-employment transition

services are allowable under the VR program but must be paid with other VR funds.

2. *Activities Unallowed*

- a. *Administrative Costs for Pre-Employment Transition Services*- States may not use any of the funds reserved in accordance with 29 USC 730(d)(1) for administrative costs, as defined in 29 USC 705(1), related to the provision of pre-employment transition services under Section 113 of the Act (29 USC 730(d)(2)).
- a. R services provided under Section 103(a) of the Act (29 USC 723(a)) are any services described in an IPE necessary to assist an individual with a disability in preparing for, securing, retaining, or regaining an employment outcome that is consistent with the individual’s strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice. Section 103(a) of the Act contains examples of the types of services

C. Cash Management

See ED Cross-Cutting Section (84.000).

H. Period of Performance

Under section 111(a)(1) of the Rehabilitation Act, the Department pays to each state each federal fiscal year an amount equal to the federal share of the cost of providing VR services and administering the VR program. Consistent with the definition of “period of performance” at 2 CFR section 200.1 and the requirements governing information that must be contained in a GAN at 2 CFR section 200.211, the VR GAN specifies the beginning and end dates for each VR grant award. Therefore, state VR agencies may incur obligations or make expenditures under a grant award if they are incurred during the period of performance for that award. Any obligations or expenditures incurred outside of that period of performance would need to be paid with funds available from a different VR grant award.

J. Program Income

Sources of program income include, but are not limited to, payments from the Social Security Administration for rehabilitating Social Security beneficiaries, payments received from workers’ compensation funds, fees for services to defray part or all of the costs of services provided to particular individuals, and income generated by a state-operated community rehabilitation program.

Except as indicated below, program income, whenever earned, must be used only for the provision of VR services and the administration of the VR services portion of the Unified or Combined State Plan under the state VR Services program. However, a state VR agency may use program income earned from the Social Security Administration for

carrying out programs under Titles I, VI, or VII of the Act. Program income is considered earned when it is received (29 USC 728).

The state VR agency may use program income only as an “addition” to the federal award. The state VR agency may not use program income as a “deduction” to the federal award. To the extent that program income funds are available, the grantee must disburse those funds before requesting additional funds from ED (34 CFR section 361.63).

L. Reporting

1. Financial Reporting

- a. *SF 270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF 271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF 425, Federal Financial Report* – Applicable for grant awards issued before October 1, 2020
- d. *RSA-17, Vocational Rehabilitation Financial Report* – Applicable for grant awards issued on or after October 1, 2020

2. Performance Reporting

RSA-911, *Case Service Report (RSA 911) (OMB No. 1820 0508)*. The RSA-911 is a set of data elements that state VR agencies must submit to ED. The data elements obtained from state VR agency service records and case management systems document the application for and/or provision of VR services to individuals with disabilities, including program outcomes and demographic information. The RSA-911 data set instructions are available at <https://rsa.ed.gov/sites/default/files/subregulatory/pd-19-03.pdf>.

Key Line Items –

1. *Supporting documentation* must be included in the service record or case management system for the data elements listed below. Dates reported in the case management system must match the supporting documentation. The following data elements contain critical information:
 - a. Date of Application (element 7)
 - b. Date of Eligibility Determination (element 38)
 - c. Date of Most Recent or Amended Individualized Plan for Employment (IPE) (element 398)
 - d. Start Date of Employment in Primary Occupation (element 350)

- e. Employment Outcome at Exit (element 356)
- f. Date of Exit (element 353)
- g. Hourly Wage at Exit (element 359)

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.181 SPECIAL EDUCATION—GRANTS FOR INFANTS AND FAMILIES

I. PROGRAM OBJECTIVES

The purposes of the Individuals with Disabilities Education Act (IDEA), Part C (Part C) state formula grant program are to (1) develop and implement a statewide, comprehensive, coordinated, multi-disciplinary interagency system that provides early intervention services for infants and toddlers with disabilities and their families; (2) facilitate the coordination of payment for early intervention services from federal, state, local, and private sources (including public and private insurance coverage); (3) enhance the state's capacity to provide quality early intervention services and expand and improve existing early intervention services being provided to infants and toddlers with disabilities and their families; (4) enhance the capacity of state and local agencies and service providers to identify, evaluate, and meet the needs of all children, including historically underrepresented populations, particularly minority, low-income, inner-city, and rural children, and infants and toddlers in foster care; and (5) encourage states to expand opportunities for children under the age of 3 years who would be at risk of having substantial developmental delay if they did not receive early intervention services.

II. PROGRAM PROCEDURES

Generally, the state is responsible for maintaining and implementing a statewide system to identify, evaluate, and provide early intervention services to eligible children and their families. Such a system includes a public awareness and child find system, development and implementation of an individualized family service plan for eligible children, maintenance of a central directory of information about early intervention services, and personnel development and contracting for or otherwise providing services to eligible children and their families.

The state designates a state lead agency that is responsible for administering, and supervising activities funded by this program. Program services may be carried out by the lead agency, other state agencies, or by public or private organizations either under contract to the state or through other arrangements with such agencies. The lead agency also monitors activities that are covered by the program, whether or not this program funds them. The state also must establish a State Interagency Coordinating Council that, among other things, advises and assists the lead agency in the development and implementation of policies and achieving participation, cooperation, and coordination of all appropriate public agencies in the state.

The amount of a state's allocation under Part C for a fiscal year is based on its proportion of the general population of infants and toddlers, from birth through 2 years of age, in the state (i.e., the ratio of the number of infants and toddlers in the state compared to the number of infants and toddlers in all the states).

Source of Governing Requirements

These programs are authorized under 20 USC 1431 through 1445. Implementing regulations specific to this program are in 34 CFR Part 303.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Y	Y	Y	N	Y	Y	Y	Y	N	N	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

See also Part 4, 84.000 ED Cross-Cutting Section. Each state, in its IDEA Part C application, must include a description of the uses of funds for the fiscal year or years covered by the application, consistent with the requirements in 34 CFR sections 303.205 and 303.501. Generally, allowable activities include:

- a. Maintaining a statewide, comprehensive, coordinated, multi-disciplinary, interagency system to provide early intervention services for infants and toddlers with disabilities and their families.
- b. Providing direct early intervention services for infants and toddlers with disabilities and their families, which are otherwise not funded through other public or private sources.
- c. Expanding and improving on services under Part C that are otherwise available for infants and toddlers and their families.

- d. Providing a free appropriate public education, in accordance with Part B of the IDEA, to children with disabilities from their third birthday to the beginning of the following school year.
- e. With the written consent of the parents, continuing to provide early intervention services under this part to children with disabilities from their third birthday (in accordance with 34 CFR section 303.211) until such children enter, or are eligible under state law to enter, kindergarten, in lieu of a free appropriate public education provided in accordance with Part B.
- f. In any state that does not provide services for at risk infants and toddlers, to strengthen the statewide system by initiating, expanding, or improving collaborative efforts related to at-risk infants and toddlers, including establishing linkages with appropriate public or private community-based organizations, services, and personnel for the purpose of (a) identifying and evaluating at-risk infants and toddlers, (b) making referrals of the infants and toddlers identified and evaluated, and (c) conducting periodic follow-up on each such referral to determine if the status of the infant or toddler involved has changed with respect to the eligibility of the infant and toddler for services.
- g. A state may charge rent, occupancy, or space maintenance costs as a direct cost to its IDEA Part C grant award, only if it indicates so in Section IV.B.2, "Restricted Indirect Cost Rate/Cost Allocation Plan Information," of its IDEA Part C grant application and receives approval from ED in its grant award letter (34 CFR section 303.225(c)(3)).
- h. Subject to approval by the governor, the State Interagency Coordinating Council may use IDEA Part C funds to (1) conduct hearings and forums; (2) reimburse members of the council for reasonable and necessary expenses for attending council meetings and performing council duties (including child care for parent representatives); (3) pay compensation to a member of the council if the member is not employed or must forfeit wages from other employment when performing official council business (otherwise council members must serve without compensation from IDEA Part C funds); (4) hire staff; and (5) obtain the services of professional, technical, and clerical personnel as may be necessary to carry out the performance of its functions under Part C of the Act (20 USC 1441(d); 34 CFR section 303.603).

B. Allowable Costs/Cost Principles

See also Part 4, 84.000 ED Cross-Cutting Section.

Further, under IDEA the acquisition of equipment or construction or alteration of facilities must be approved by ED based on a determination by ED that the program

would be improved by allowing funds to be used for those purposes (see 20 USC 1404, 1433, and 1438; 34 CFR sections 303.104 and 303.501).

C. Cash Management

See also Part 4, 84.000 ED Cross-Cutting Section.

F. Equipment/Real Property Management

Further, acquisition of equipment and construction or alteration of facilities by the IDEA Part C program must meet the prior approval requirements in, and be consistent with, the IDEA-specific requirements in 20 USC 1405 and 34 CFR section 303.104.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

Although the following requirement is identified as a supplement not supplant requirement in the law and regulation, this Supplement classifies this type of requirement as maintenance of effort.

The total amount of state and local funds budgeted for expenditure in the current fiscal year for early intervention services for children eligible under Part C and their families must be at least equal to the total amount of state and local funds actually expended for early intervention services for these children and their families in the most recent preceding fiscal year for which the information is available. Allowances may be made for:

- (a) decreases in the number of children who are eligible to receive Part C early intervention services; and
- (b) unusually large amounts of funds expended for such long-term purposes such as the acquisition of equipment and the construction of facilities (20 USC 1437(b)(5)(B); 34 CFR section 303.225(a)(2) and (b)).

Monies received from Medicaid reimbursements attributable to federal funds, a parent's private health insurance, or a parent or family fees paid under the state's system of payments are not included in "state and local funds" under the state's calculation of the level of effort under 34 CFR section 303.225(b) (34 CFR sections 303.520(d)(2), (d)(3), and (e)(3)).

If a state has enacted a state statute that meets the requirements in 34 CFR section 303.520(b)(2) regarding the use of private health insurance coverage to pay for early intervention services under Part C of the Act, the state may reestablish a new baseline of state and local expenditures under 34 CFR section 303.225(b) in the next federal fiscal year following the effective date of the statute (34 CFR section 303.520(b)(3)).

2.2 Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

Not Applicable

H. Period of Performance

See also Part 4, 84.000 ED Cross-Cutting Section.

I. Procurement and Suspension and Debarment

Further, acquisition of equipment and construction or alteration of facilities by the IDEA Part C program must meet the prior approval requirements in, and be consistent with, the IDEA-specific requirements in 20 USC 1405 and 34 CFR section 303.104.

See Part 4, 84.000 ED Cross-Cutting Section.

IV. OTHER INFORMATION

Certain compliance requirements that apply to multiple Department of Education (ED) programs are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. When applicable, Section III references to the ED Cross-Cutting Section for these requirements.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.282 CHARTER SCHOOLS

I. PROGRAM OBJECTIVES

The objectives of the Expanding Opportunity Through Quality Charter Schools Program (CSP), authorized under Title IV, Part C of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), are to expand opportunities for all students, particularly traditionally underserved students, to attend charter schools and meet challenging state academic standards; provide financial assistance for the planning, program design, and initial implementation of public charter schools; increase the number of high-quality charter schools available to students across the United States; evaluate the impact of charter schools on student achievement, families, and communities; share best practices between charter schools and other public schools; encourage states to provide facilities support to charter schools; and support efforts to strengthen the charter school authorizing process.

II. PROGRAM PROCEDURES

A. Overview

The ESEA was reauthorized by the ESSA (Pub. L. No. 114-95) on December 10, 2015. In accordance with Section 4(a)(1)(B) of the ESSA and Section 4302(c) of the ESEA, as amended by the ESSA, CSP grants awarded in fiscal year (FY) 2016 and earlier years operate in accordance with the requirements of the ESEA, as amended by the No Child Left Behind Act of 2001 (NCLB). CSP grants awarded in FY 2017 and later years are subject to the provisions of the ESEA, as amended by the ESSA. The CSP encompasses multiple subprograms, including Grants to State Entities, Grants to Charter School Developers for the Opening of New Charter Schools and for the Replication and Expansion of High-Quality Charter Schools (Developer Grants), Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools, and National Dissemination Grants.

B. Grants to State Entities

Prior to FY 2017, CSP funds generally were awarded on a competitive basis to state educational agencies (SEAs) in states with statutes specifically authorizing charter schools. Beginning with new awards in FY 2017, eligible entities under the CSP are state entities (SEs), which consist of SEAs, state charter school boards, governors, and charter school support organizations. For CSP grants awarded in FY 2016 and earlier, SEAs were authorized to use their CSP funds to award subgrants to eligible applicants for planning, program design, and initial implementation of charter schools; and to support the dissemination of information about, and successful practices in, charter schools. For CSP grants awarded in FY 2017 and later years, an SE must use not less than 90 percent of CSP funds to award subgrants to eligible applicants to open and prepare for the operation of new charter schools; open and prepare for the operation of replicated high-quality charter schools; or to expand high-quality charters schools. An SE must also reserve not

less than 7 percent of funds to provide technical assistance to eligible applicants and authorized public chartering agencies.

C. Developer Grants and State Entity Subgrants

As noted above, SEAs or SEs receiving a CSP grant are authorized to make subgrants to eligible applicants. If an eligible SEA or SE elects not to participate in this program, or its application is not approved, eligible applicants, including charter schools that operate in the state, may apply directly to the secretary for a grant. Prior to FY 2017, an eligible applicant (i.e., charter school developer or charter school) was limited to receiving not more than one grant or subgrant for planning and initial implementation activities and not more than one grant or subgrant for dissemination activities, unless the charter school is granted a waiver. A charter school was authorized to apply to the SEA for funds to carry out dissemination activities if the charter school was in operation for at least three consecutive years and demonstrated overall success, including substantial progress in improving student achievement; high levels of parent satisfaction; and the management and leadership necessary to overcome initial start-up problems and establish a thriving, financially viable charter school. A charter school could receive a dissemination grant or subgrant, whether or not the charter school applied for or received funds under the CSP for planning or implementation.

For CSP grants awarded in FY 2017 and later years, an eligible applicant may apply for a grant or subgrant to open and prepare for the operation of a new charter school; open and prepare for the operation of a replicated high-quality charter school; or to expand a high-quality charter school. An applicant is limited to receiving a grant or subgrant for a period of not more than five years, of which an eligible applicant may use not more than 18 months for planning and program design. An eligible applicant may not receive more than one grant or subgrant for each individual charter school for a five-year period, unless the eligible applicant demonstrates that such individual charter school has at least three years of improved educational results for students enrolled in the charter school, with respect to the elements described in section 4310(8)(A) and (D) of the ESEA, as amended by the ESSA. The CSP no longer authorizes separate grants or subgrants for dissemination activities.

D. Grants to Charter Management Organizations for the Replication or Expansion of High-Quality Charter Schools

The Consolidated Appropriations Act, 2010 (Pub. L. No. 111-117, 123 Stat. 3264, December 16, 2009) authorized the secretary to make awards to nonprofit charter management organizations (CMOs) and other not-for-profit entities for the replication and expansion of successful charter school models. This authority was extended in subsequent appropriations acts through FY 2016. Similar authority is now codified in statute under the ESEA, as amended by the ESSA. Under the new law, the secretary is authorized to award competitive grants to nonprofit CMOs to enable them to open and prepare for the operation of one or more replicated high-quality charter schools or to expand one or more high-quality charter schools.

E. National Dissemination Grants

Prior to FY 2017, CSP Grants for National Leadership Activities were awarded to support efforts by eligible entities to improve the quality of charter schools by providing technical assistance and other types of support on issues of national significance and scope. For CSP FY 2017 and later years, the CSP will award National Dissemination Grants on a competitive basis to support efforts by eligible entities to support the charter school sector and increase the number of high-quality charter schools available to our Nation's students by disseminating best practices regarding charters schools.

Source of Governing Requirements

This program was authorized by Title V, Part B, Subpart 1 of the ESEA, as amended by NCLB (20 USC 7221-7221j), for awards made in FY 2016 and earlier years. CSP Replication and Expansion grants were authorized under the Department's appropriations acts from FY 2010, through FY 2016 (see e.g., Consolidated Appropriations Act, 2016 (2016 Appropriations Act) (Pub. L. No. 114-113)).

Beginning with FY 2017 grant awards, this program is authorized by Title IV, Part C of the ESEA, as amended by the ESSA (20 USC 7221-7221j). There are no program-specific regulations. However, 34 CFR Part 76, Subpart H prescribes administrative requirements that states and local educational agencies must follow when allocating funds to new or expanding charter schools under ED's formula grant programs.

The transition provisions under the ESEA, as amended by the ESSA, as clarified by the 2016 Appropriations Act, also apply.

Availability of Other Program Information

Information on this program can be found in the following documents posted on ED's website:

1. Charter Schools Program, Nonregulatory Guidance (January 2014) at <http://www2.ed.gov/programs/charter/fy14cspnonregguidance.doc>;
2. Guidance on the Use of Funds to Support Preschool Education (December 2014) at <http://www2.ed.gov/programs/charter/csppreschoolfaqs.doc>; and
3. Dear Colleague Letter on Flexibility for Recipients of Charter Schools Program Grants in FY 2016 and Earlier (November 2017) at <https://oese.ed.gov/offices/office-of-discretionary-grants-support-services/charter-school-programs/state-entities/funding-and-legislation/>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then

determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A. Activities Allowed or Unallowed

See also Part 4, 84.000 ED Cross-Cutting Section.

1. Activities Allowed

a. Use of Funds by SEAs

Funds must be used to award subgrants to eligible applicants. For grants awarded under the ESEA, as amended by NCLB, funds may also be used to establish a revolving loan fund for eligible applicants that have received implementation subgrants, for state dissemination activities, and for administrative costs of the program. For grants awarded under the ESEA, as amended by the ESSA, funds may be used for administration, which may include providing technical assistance to subgrantees and authorized public chartering agencies. See III.G.3, “Matching, Level of Effort, Earmarking – Earmarking,” for limitations on amounts that can be used for these activities (20 USC 7221c(f)(1), (4), and (5)).

b. Use of Funds by Eligible Applicants- ESEA, as amended by NCLB

- (1) Each eligible applicant may use these funds in accordance with its approved application to plan and implement a charter school, or to disseminate information about the charter school and successful practices in charter schools (20 USC 7221c(f)(2)).

- (2) An eligible applicant receiving a CSP grant or subgrant may use funds for (1) post-award planning and design of the educational program, which may include (a) refinement of the desired educational results and of the methods for measuring progress toward achieving those results; and (b) professional development of teachers and other staff who will work in the charter school; and (2) initial implementation of the charter school, which may include (a) informing the community about the school; (b) acquiring necessary equipment and educational materials and supplies; (c) acquiring or developing curriculum materials; and (d) other initial operational costs that cannot be met from state or local sources (20 USC 7221c(f)(3)).
- (3) A charter school receiving funds for dissemination activities may use funds to assist other schools in adapting the charter school's program (or certain aspects of the charter school's program), or to disseminate information about the charter school, through such activities as (1) assisting other individuals with the planning and start-up of one or more new public schools, including charter schools, that are independent of the assisting charter school and the assisting charter school's developers, and that agree to be held to at least as high a level of accountability as the assisting charter school; (2) developing partnerships with other public schools, including charter schools, designed to improve student performance in each of the schools participating in the partnership; (3) developing curriculum materials, assessments, and other materials that promote increased student achievement and are based on successful practices within the assisting charter school; and (4) conducting evaluations and developing materials that document the successful practices of the assisting charter school and that are designed to improve student performance in other schools (20 USC 7221c(f)(6)(B)).

c. *ESEA, as amended by the ESSA*

- (1) Each eligible applicant may use the funds in accordance with its approved application to open and prepare for the operation of a new charter school, open and prepare for the operation of a replicated high-quality charter school or expand a high-quality charter school.
- (2) In addition, an eligible applicant receiving a CSP grant or subgrant must use the funds for one or more of the following activities:
 - (a) Preparing teachers, school leaders, and specialized instructional support personnel, including through paying the costs associated with (A) providing professional

development; and (B) hiring and compensating, during the eligible applicant's planning period specified in the application for subgrant funds that is required under this section, one or more of the following:

- (i) Teachers
 - (ii) School leaders
 - (iii) Specialized instructional support personnel
- (b) Acquiring supplies, training, equipment (including technology) and educational materials (including developing and acquiring instructional materials).
 - (c) Carrying out necessary renovations to ensure that a new school building complies with applicable statutes and regulations, and minor facilities repairs (excluding construction).
 - (d) Providing one-time, startup costs associated with providing transportation to students to and from the charter school.
 - (e) Carrying out community engagement activities, which may include paying the cost of student and staff recruitment.
 - (f) Providing for other appropriate, non-sustained costs related to the activities described in subsection (b)(1) when such costs cannot be met from other sources.
- d. *Grants for the Replication and Expansion of High-Quality Charter Schools*
- (1) Grant funds may be used to replicate or expand a high-quality charter school. Specifically, for grants awarded under the ESEA, as amended by NCLB, funds may be used for (i) post-award planning and design of the educational program; and (ii) initial implementation of the charter school (see paragraph 2.b, above). For grants awarded under the ESEA, as amended by the ESSA, funds may be used to open and prepare for the operation of new charter schools and replicated high-quality charter schools and expand high-quality charter schools.
 - (2) For grants awarded under the ESEA, as amended by NCLB, grant funds also may be used for initial operational costs associated with

the expansion or improvement of the entity’s oversight or management of its schools (see III.G.3.c, “Matching, Level of Effort, Earmarking – Earmarking”), provided that the specific schools being created or expanded under the grant are beneficiaries of such expansion or improvement.

1. Activities Unallowed

- a. A charter school that has received replication and expansion of high-quality charter schools funds is not eligible to receive funds for the same purpose under section 5202(c)(2) of the ESEA (i.e., other funding under this program), including for planning and program design or the initial implementation of a charter school (20 USC 7221c(f)(3); Program Announcements issued in the *Federal Register* May 24, 2010 (75 FR 28789-28795); July 12, 2011 (76 FR 40890-40898); March 6, 2012 (77 FR 13304-13311); June 20, 2014 (79 FR 35323-35333); June 12, 2015 (80 FR 33499-33510); and May 10, 2016 (81 FR 28837-28847)).

B. Allowable Costs/Cost Principles

See Part 4, 84.000 ED Cross-Cutting Section.

C. Cash Management

See Part 4, 84.000 ED Cross-Cutting Section.

E. Eligibility

1. Eligibility for Individuals

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

- a. An “eligible applicant” is a charter school developer that has applied to an authorized public chartering authority to operate a charter school and has provided that authority with adequate and timely notice of its application for funding under the CSP ((20 USC 7221i(6)).
- b. A “charter school” is a public school that
 - (1) In accordance with a specific state statute authorizing the granting of charters to schools, is exempt from significant state or local

rules that inhibit the flexible operation and management of public schools;

- (2) Is created by a developer as a public school, or is adapted by a developer from an existing public school, and is operated under public supervision and direction;
- (3) Operates in pursuit of a specific set of educational objectives determined by the authorized public chartering agency;
- (4) Provides a program of elementary or secondary education, or both;
- (5) Is nonsectarian in its programs, admissions policies, employment practices, and all other operations, and is not affiliated with a sectarian school or religious institution;
- (6) Does not charge tuition;
- (7) Complies with federal civil rights laws;
- (8) Is a school to which parents choose to send their children and admits students on the basis of a lottery, if more students apply than can be accommodated;
- (9) Agrees to comply with the same federal and state audit requirements as do other elementary and secondary schools in the state, unless such requirements are specifically waived for the purpose of this program;
- (10) Meets all applicable federal, state, and local health and safety requirements;
- (11) Operates in accordance with state law;
- (12) Has a written performance contract with the authorized public chartering agency in the state that includes a description of how student performance will be measured in charter schools pursuant to state assessments that are required of other schools and pursuant to any other assessments mutually agreeable to the authorized public chartering agency and the charter school; and
- (13) May serve children in early childhood education programs or postsecondary students. Under the ESEA, as amended by the ESSA, a charter school may automatically enroll students who are in the immediate prior grade of an affiliated charter school, as long as the charter school complies with the lottery requirement when admitting other students ((20 USC 7221i(2)).

- c. The term “developer” means an individual or group of individuals (including a public or private nonprofit organization), which may include teachers, administrators, and other school staff, parents, or other members of the local community in which a charter school project will be carried out.
- A for-profit entity does not qualify as an eligible applicant for purposes of the CSP. However, a CSP grant recipient may enter into a contract with a for-profit entity for the day-to-day management of the charter school (20 USC 7221i(5)).
- d. A “high-quality charter school” is a charter school that:
- (1) Shows evidence of strong academic results, which may include strong student academic growth, as determined by the state;
 - (2) Has no significant issues in the areas of student safety, financial and operational management, or statutory or regulatory compliance;
 - (3) Has demonstrated success in significantly increasing student academic achievement, including graduation rates where applicable, for all students served by the charter school; and
 - (4) Has demonstrated success in increasing student academic achievement, including graduation rates where applicable, for each of the subgroups of students, as defined in section 1111(c)(2) of the ESEA, as amended by the ESSA (20 USC 7221i(8)).

I. Procurement and Suspension and Debarment

See Part 4, 84.000 ED Cross-Cutting Section

IV. OTHER INFORMATION

Certain compliance requirements that apply to multiple ESEA programs are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated for each individual program. When applicable, Section III references the ED Cross-Cutting Section for these requirements. Also, as discussed in the ED Cross-Cutting Section, SEAs and LEAs, including charter school LEAs, may have been granted waivers from certain compliance requirements.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.287 TWENTY-FIRST CENTURY COMMUNITY LEARNING CENTERS

I. PROGRAM OBJECTIVES

The objective of this program is to establish or expand community learning centers (Centers) that provide students with academic enrichment opportunities during non-school hours or periods when school is not in session (e.g., before school, after school, or during summer recess) to complement the students' regular academic program. Centers, which can be located in elementary or secondary schools or other similarly accessible facilities, provide a range of high-quality services to support student learning and development, including tutoring and mentoring, homework help, academic enrichment (such as hands-on science or technology programs), and community service opportunities, as well as music, arts, sports and cultural activities. At the same time, Centers help working parents by providing a safe environment for students during non-school hours or periods when school is not in session and offer families of participation students active and meaningful engagement in their child's education.

Under the 21st Century Community Learning Centers (21st CCLC) program, funds flow to state educational agencies (SEAs) by formula, based on each state's share of Title I, Part A funds. SEAs, in turn, use their allocations to make competitive subgrants to eligible entities, which consist of local educational agencies (LEAs), community-based organizations (CBOs), Indian tribes or tribal organizations, and other public or private entities, or consortia of two or more of such agencies, organizations, or entities.

II. PROGRAM PROCEDURES

Source of Governing Requirements

This program is authorized under Title IV, Part B of the Elementary and Secondary Education Act of 1965 (ESEA). Additional information regarding the ESEA is available at <http://www.ed.gov/essa>. A link to the text of the 21st CCLC program is included on page 183 at <https://www.gpo.gov/fdsys/pkg/BILLS-114s1177enr/pdf/BILLS-114s1177enr.pdf>.

Availability of Other Program Information

Due to the COVID-19 pandemic, the US Department of Education offered, through a waiver under section 8401 of the ESEA, flexibility in school year 2020–2021 to SEAs regarding the requirement in section 4201(b)(1)(A) of the ESEA, which requires a 21st CCLC program to operate “during nonschool hours or periods when school is not in session (such as before and after school or during summer recess).” Under the waiver, an SEA may permit subrecipients to provide supplemental activities when school is in session but students are not receiving in-person instruction, such as permitting a teacher to provide additional academic supports during remote learning. All other requirements for a 21st CCLC program continue to apply.

The letter inviting these waivers can be found here: <https://oese.ed.gov/files/2020/09/21st-CCLC-waiver-invitation-letter-FOR-POSTING.pdf>. The complete list of states that were

approved for this waiver can be found here: <https://oese.ed.gov/offices/office-of-formula-grants/school-support-and-accountability/21st-century-community-learning-centers/resources-21st-century-community-learning-centers/>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions

A. Activities Allowed or Unallowed

See also Part 4, 84.000 ED Cross-Cutting Section.

1. *Activities Allowed*

a. *SEAs*

SEAs may use 21st CCLC program funds for the following:

- (1) Competitive subawards (20 USC 7172(c)(1)).
- (2) State administration (20 USC 7172(c)(2)):

- (a) The administrative costs of carrying out its responsibilities under the program;
 - (b) Establishing and implementing a peer review process for subgrant applications; and
 - (c) Awarding funds to eligible entities, in consultation with other state agencies responsible for administering youth development and adult education programs.
- b. State activities (20 USC 7172(c)(3))
- (1) Monitoring and the evaluation of programs and activities.
 - (2) Providing capacity building, training, and technical assistance.
 - (3) Conducting a comprehensive evaluation (directly, or through a grant or contract) of the effectiveness of programs and activities.
 - (4) Providing training and technical assistance to eligible entities that are applicants for, or recipients of, subawards under this program.
 - (5) Ensuring that any eligible entity that receives an award under this part from the state aligns the activities provided by the program with challenging state academic standards.
 - (6) Ensuring that any such eligible entity identifies and partners with external organizations, if available, in the community.
 - (7) Coordinating funds received under this part with other federal and state funds to implement high-quality programs.
 - (8) Providing a list of prescreened external organizations, as described under section 4203(a)(11) of the ESEA.
 - (9) Working with teachers, principals, parents, the local workforce, the local community, and other stakeholders to review and improve state policies and practices to support the implementation of effective programs.
- c. *LEAs, CBOs, and Other Public or Private Entities (20 USC 7175)*

Subrecipients may use funds to carry out a broad array of activities during non-school hours or periods when school is not in session (e.g., before and after school, during summer recess) that advance student academic achievement, including

- (1) Remedial education activities and academic enrichment learning programs, including providing additional assistance to students to allow the students to improve their academic achievement. Including tutoring services (including those provided by senior citizen volunteers) and mentoring programs;
- (2) Well-rounded education activities that enable students to be eligible for credit recovery or attainment;
- (3) Literacy education programs including financial literacy programs and environmental literacy programs;
- (3) Health and active lifestyle programs including nutritional education and regular, structured physical activity programs;
- (4) Services for individuals with disabilities;
- (5) Programs that provide after school activities for limited English proficient students that emphasize language skills and academic achievement;
- (6) Cultural programs;
- (7) Telecommunications and technology education programs;
- (8) Expanded library service hours;
- (9) Parenting skills program that promote parental involvement and family literacy;
- (10) Programs that provide assistance to students who have been truant, suspended, or expelled to allow the students to improve their academic achievement;
- (11) Drug and violence prevention programs and counseling programs;
- (12) Programs that build skills in science, technology, engineering, and mathematics (STEM);
- (13) Programs that partner with in-demand fields of the local workforce or build career competencies and career readiness and ensure that local workforce and career readiness skills are aligned with the Carl D. Perkins Career and Technical Education Act of 2006 (20 USC 2301 et seq.) and the Workforce Innovation and Opportunity Act (29 USC 3101 et seq.). Note that a subrecipient may provide one or more of these activities, consistent with the SEA's approved consolidated state plan and the subrecipient's 21st CCLC program application to the SEA.

Under 20 USC 7174(a)(2)a subrecipient may use funds to conduct authorized activities during the school day that—

- (a) Are part of an expanded learning program that provides students at least 300 additional program hours before, during, or after the traditional school day;
- (b) Supplement but do not supplant regular school day requirements; and
- (c) Are carried out jointly by an LEA receiving funds under Title I, Part A of the ESEA and another eligible entity and that propose to target services to students, and their families, who primarily attend schools: (1) implementing comprehensive or targeted support and improvement activities under section 1111(d) of the ESEA or other schools determined by an LEA to be in need of intervention and support to improve student academic achievement and other outcomes and (2) that enroll students who may be at risk for academic failure, dropping out of school, involvement in criminal or delinquent activities, or who lack strong positive role models.

B. Allowable Costs/Cost Principles

See Part 4, 84.000 ED Cross-Cutting Section.

C. Cash Management

See Part 4, 84.000 ED Cross-Cutting Section.

E. Eligibility

1. Eligibility for Individuals

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

An SEA may award 21st CCLC funds to an eligible entity, which means an LEA, CBO, Indian tribe or tribal organization (as such terms are defined in section 4 of the Indian Self-Determination and Education Act (25 USC 450b)), another public or private entity, or a consortium of two or more such agencies, organizations, or entities.

J. Program Income

1. See 2 CFR 200.307 Program Income located at https://www.ecfr.gov/cgi-bin/text-idx?node=se2.1.200_1307&rgn=div8. An SEA that has received approval from ED to earn program income must:
 - a. Have a clearly delineated process to give prior approval to its subrecipients.
 - b. Have clearly stated what types of program income may be generated.
 - c. Have provided training to subrecipients on how to track and report the income earned.
 - d. Have made it explicitly clear that children may not be denied program participation based on ability to pay.
2. Subrecipients who have been granted prior approval per 2 CFR 200.307 to earn program income must:
 - a. Have documentation that prior approval to generate program income has been granted by the SEA.
 - b. Have articulated the types of program income they will generate.
 - c. Have provided training on how to track and report program income.
 - d. Ensure that they do not deny students access to the program based on their family's ability to pay.

L. Reporting**1. Financial Reporting**

See Part 4, 84.000 ED Cross-Cutting Section.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

M. Subrecipient Monitoring

See 2 CFR 200.331 Requirements for Pass-through Entities located at <https://www.law.cornell.edu/cfr/text/2/200.331>.

IV. OTHER INFORMATION

Note: Certain compliance requirements that apply to multiple ED programs are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. Where applicable, Section III references the ED Cross-Cutting Section for these requirements. Further, the Other Information section in 84.000 also provides information that is relevant to this program.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.365 ENGLISH LANGUAGE ACQUISITION STATE GRANTS

I. PROGRAM OBJECTIVES

The objective of Title III, Part A of the Elementary and Secondary Education Act (ESEA) is to improve the education of English learners (ELs) by helping them attain English proficiency and meet challenging state academic standards. The program also provides enhanced instructional opportunities for immigrant children and youths.

II. PROGRAM PROCEDURES

A. Overview

The Department of Education (ED) provides Title III, Part A funds to each state educational agency (SEA) on the basis of a statutory formula that takes into account the number of ELs and immigrant children and youth in each state. To receive funds, an SEA must submit to ED for approval either (1) an individual state plan as provided under Section 3113 of the ESEA (20 USC 6823), or (2) a consolidated plan that includes Part A of Title III in accordance with Section 8302 of the ESEA (20 USC 7842). The plan must be updated to reflect substantive changes.

SEAs use Title III, Part A funds for administration, to carry out state activities, and to make two types of subgrants to LEAs.

B. Subprograms/Program Elements

The two types of subgrants are (1) for school districts that have experienced a significant increase in the number of immigrant children and youth in their schools, and (2) for school district to use to serve EL children. In order to receive one of these subgrants, an LEA must submit to the SEA a plan under either Section 3116 of the ESEA (20 USC 6826) or an approved consolidated plan under Section 8302 of the ESEA (20 USC 7842).

LEAs that receive immigrant subgrants use those funds to pay for enhanced instructional opportunities for immigrant children. LEAs receiving EL subgrants must support activities that increase the English proficiency and academic achievement of ELs by providing effective language instruction educational programs, supplemental activities, and professional development for teachers and school leaders relating to ELs (20 USC 6825). In addition, LEAs receiving subgrants under Part A of Title III are required to assess the English language proficiency of the ELs they serve (20 USC 6823). SEAs are required to develop statewide entrance and exit procedures for ELs and assist subgrantees in meeting the state's long-term goals for progress towards English language proficiency.

Source of Governing Requirements

This program is authorized by Title III, Part A of the ESEA (20 USC 6821 through 6871, 7011 through 7014). There are no program regulations; however, the general ESEA requirements in 34 CFR Part 299 apply.

Availability of Other Program Information

Other program information is available at <https://oese.ed.gov/offices/office-of-formula-grants/school-support-and-accountability/english-language-acquisition-state-grants/>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	Y	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

See also Part 4, 84.000 ED Cross-Cutting Section.

Certain compliance requirements which apply to multiple ESEA programs are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. When applicable, Section III references the ED Cross-Cutting Section for these requirements. Also, as discussed in the ED Cross-Cutting

Section, SEAs and LEAs may have been granted waivers from certain compliance requirements.

1. *Activities Allowed*

a. *SEAs*

SEAs must use funds under this program for the following purposes:

- (1) To make subgrants (20 USC 6821(b)(1), 6824).
- (2) State administration (20 USC 6821(b)(3)).
- (3) One or more of the following state activities (20 USC 6821(b)(2)):
 - (a) Establishing and implementing statewide entrance and exit procedures for ELs.
 - (b) Professional development and other activities, which may include assisting personnel in meeting state and local certification and licensing requirements for teaching ELs.
 - (c) Planning, evaluation, administration, and interagency coordination related to LEA subgrants.
 - (d) Providing technical assistance and other forms of assistance to LEA subgrantees.
 - (e) Providing recognition, which may include providing financial awards, to subgrantees that have significantly improved EL achievement and progress in meeting the state ELP goal and academic standards.

b. *LEAs*

- (1) LEAs receiving immigrant subgrants shall use the funds awarded to pay for activities that provide enhanced instructional opportunities for immigrant children and youth. These activities include (20 USC 6825(e)):
 - (a) Family literacy, parent outreach, and training activities designed to assist parents and families to become active participants in the education of their children.
 - (b) Support for personnel, including teacher aides who have been specifically trained, or are being trained, to provide services to immigrant children and youth.

- (c) Provision of tutorials, mentoring, and academic or career counseling for immigrant children and youth.
 - (d) Identification and acquisition of curricular materials, educational software, and technologies to be used in the program carried out with funds.
 - (e) Basic instruction services that are directly attributable to the presence in the school district of immigrant children and youth, including the payment of costs of providing additional classroom supplies, costs of transportation, or such other costs as are directly attributable to such additional basic instruction services.
 - (f) Other instruction services that are designed to assist immigrant children and youth to achieve in elementary schools and secondary schools in the United States, such as programs of introduction to the educational system and civics education.
 - (g) Activities, coordinated with community-based organizations, institutions of higher education, private sector entities, or other entities with expertise in working with immigrants, to assist parents and families of immigrant children and youth by offering comprehensive community services.
- (2) LEAs receiving EL subgrants use the funds for the following purposes, which, as stated may be required or discretionary:
- (a) Administrative costs (20 USC 6825(b)).
 - (b) *Required Activities* – An LEA is required to use EL subgrant funds to:
 - (i) Increase the English proficiency of ELs by providing effective language instruction educational programs that meet the needs of ELs and demonstrate success in increasing English proficiency and student academic achievement (20 USC 6825(c)(1)).
 - (ii) Provide effective professional development to classroom teachers (including teachers in classroom settings that are not the settings of language instruction educational programs), principals, administrators, and other school or community-based organizational personnel (20 USC

6825(c)(2)).

- (iii) Provide and implement other effective activities that supplement language instruction educational programs, which must include parent, family, and community engagement activities, and may include coordination with related programs (20 USC 6825(c)(3)).

c. *Authorized Activities* – An LEA may, but is not required to, use EL subgrant funds for the following activities (20 USC 6825(d)):

- (1) Upgrading program objectives and effective instruction strategies.
- (2) Improving the instruction program for ELs by identifying, acquiring, and upgrading curricula, instruction materials, educational software, and assessment procedures.
- (3) Providing tutorials and academic or vocational education for ELs and intensified instruction.
- (4) Developing and implementing effective preschool, elementary school or secondary school language instruction educational programs that are coordinated with other relevant programs and services.
- (5) Improving the English proficiency and academic achievement of ELs.
- (6) Providing community participation programs, family literacy services, and parent and family outreach and training activities to ELs and their families to improve the English language skills of ELs and to assist parents and families in helping their children to improve their academic achievement and becoming active participants in the education of their children.
- (7) Improving the instruction of ELs, which may include ELs with disabilities, by providing for (i) the acquisition or development of educational technology or instructional materials; (ii) access to, and participation in, electronic networks for materials, training, and communication; and (iii) incorporation of these resources into curricula and programs.
- (8) Offering early college, high school, or dual or concurrent enrollment courses designed to help ELs achieve success in postsecondary education.

B. Allowable Costs/Cost Principles

See Part 4, 84.000 ED Cross-Cutting Section.

G. Matching, Level of Effort, Earmarking**1. Matching**

Not Applicable

2. Level of Effort**2.1 Level of Effort – *Maintenance of Effort***

See Part 4, 84.000 ED Cross-Cutting Section.

2.2 Level of Effort – *Supplement Not Supplant*

See Part 4, 84.000 ED Cross-Cutting Section.

3. Earmarking

SEAs

- a. SEAs can reserve up to 5 percent of their entire grant to carry out state activities and for administration (**Note:** Under the circumstances described in paragraph 3a (1) an SEA can have a reservation for administration that exceeds 5 percent) (20 USC 6821(b)(2)):
 - (1) SEAs are authorized to reserve up to 2.5 percent of their grant, or \$175,000, whichever is greater, for the costs of administration. Because SEAs can use up to \$175,000 of their grant for administration, they may, because of that option, reserve more than 5 percent of their grant for administration (20 USC 6821(b)(3)).
 - (2) SEA reserved funds not used for administration can be used to carry out one or more of the state activities (see III.A.1.c) (20 USC 6821(b)(2)).
- b. A SEA must expend at least 95 percent for subgrants to LEAs that submit approvable plans under either Section 3116 of the ESEA, (20 USC 6826) or an approvable consolidated plan under Section 8305 of the ESEA (20 USC 7845) as follows (20 USC 6821, 6824(a)):

- (1) *Immigrant Subgrants* – SEAs are required to reserve not more than 15 percent of their grants for subgrants to LEAs that have experienced a significant increase, as compared to the average of the two preceding fiscal years, in the percentage or numbers of immigrant children and youth, who have enrolled, during the fiscal year for which the grant is made, in public and nonpublic elementary and secondary schools in the geographic areas served by the LEA. In awarding these subgrants, SEAs must equally consider LEAs that have limited or no experience in serving immigrant children and youth and the quality of the local plans that the LEAs submit under Section 3116 of the ESEA (20 USC 6826). While an SEA must make at least one award, SEAs have discretion to award these subgrants on a competitive, formula, or some other basis (20 USC 6824(d)).
 - (2) *EL Subgrants* – SEAs are required to use funds not used for state activities, SEA administration, or immigrant subgrants to award subgrants to LEAs, or consortia of LEAs, to serve ELs. SEAs shall allocate EL subgrants to their LEAs on a formula basis. The formula is based on the number of ELs in schools served by a particular LEA as a percentage of the number of such ELs in the entire state. The SEA, however, shall not award a subgrant if the amount of the subgrant, under the statutory formula for EL subgrants, would be less than \$10,000 (20 USC 6824).
- c. *LEA Administrative Costs* – An LEA receiving an EL subgrant may use no more than 2 percent of that subgrant for administrative costs (20 USC 6825(b)).

H. Period of Performance

See Part 4, 84.000 ED Cross-Cutting Section.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.367A SUPPORTING EFFECTIVE INSTRUCTION STATE GRANTS (formerly Improving Teacher Quality State Grants)

I. PROGRAM OBJECTIVES

The objective of the Supporting Effective Instruction state grant program (formerly Improving Teacher Quality state grants program) in Title II, Part A of the Elementary and Secondary Education Act (ESEA) of 1965, as amended by the Every Student Succeeds Act (ESSA) (Pub. L. No. 114-95), is to provide funds to state educational agencies (SEAs), and local educational agencies (LEAs) to: (1) increase student achievement consistent with the challenging state academic standards, (2) improve the quality and effectiveness of teachers, principals, and other school leaders, (3) increase the number of teachers, principals, and other school leaders who are effective in improving student academic achievement in schools, and (4) provide low-income and minority students greater access to effective teachers, principals, and other school leaders.

II. PROGRAM PROCEDURES

A. Overview

Funds are obtained by a state on the basis of the Department of Education's (ED) approval of either (1) an individual state plan as provided in Section 2101 of the ESEA (20 USC 6611) or (2) a consolidated application that includes the program, in accordance with Section 8302 of the ESEA (20 USC 7842).

B. Equitable Service

After timely and meaningful consultation with appropriate private school officials, SEAs and LEAs must provide services to teachers and other educational personnel in private schools on an equitable basis that address their needs under the program and are equitable to the level of services provided to teachers and other educational personnel in the SEA and LEA (see generally ESEA section 8501). For more information about equitable services for private school staff and when their participation is equitable.

Source of Governing Requirements

This program is authorized by Title II, Part A, of the ESEA, as amended by the ESEA sections 2101-2104 (which is 20 USC 6611-6614). The program purpose and definitions in ESEA Title II, sections 2101 and 2102 (20 USC 6601 and 6602) also apply to this program.

While there are no program regulations, general ESEA requirements in 34 CFR parts 76, 77, and 299 apply. See also Part 4, 84.000 ED Cross Cutting Section.

Non-Regulatory Guidance: DRAFT Title VIII, Part F of the Elementary and Secondary Education Act of 1965, as Amended by Every Student Succeeds Act: Equitable Services for Eligible Private School Children, Teachers, and Other Educational Personnel, Non-Regulatory Guidance (Draft—not fully approved as of January 30, 2023).
<https://oese.ed.gov/files/2022/03/Draft-Title-VIII-Equitable-Services-Guidance.pdf>

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Y	Y	N	Y	N	Y	N	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

See also Part 4, 84.000 ED Cross-Cutting Section.

Certain compliance requirements that apply to multiple ESEA programs are discussed once in the Department of Education (ED) Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. When applicable, Section III references the Cross-Cutting Section for these requirements. Also, as discussed in the Cross-Cutting Section, SEAs and LEAs may have been granted waivers from certain compliance requirements.

1. *Activities Allowed*

a. State Use of Funds

- (1) State Administration and Activities – SEAs have the authority to set aside 5 percent of a state’s total allocation to carry out statewide activities related to improving educator quality. Allowable state-level activities are identified in Section 2101(c)(4) of the ESEA. While not an exhaustive list, examples of allowable activities include:
- (2) Carrying out programs that establish, expand, or improve alternative routes for state certification of teachers, principals, or other school leaders;
- (3) Carrying out activities that focus on ensuring teachers have the necessary subject-matter knowledge and teaching skills, as demonstrated through measures determined by the state, and principals or other school leaders have the instructional leadership skills to help teachers teach and to help students meet such challenging state academic standards;
- (4) Reforming and teacher, principal, or other school leader certification, recertification, licensing, or tenure systems or preparation program standards and approval processes to ensure that they are aligned with such challenging state standards;
- (5) Developing, or assisting local educational agencies in, developing career opportunities and advancement initiatives that promote professional growth and emphasize multiple career paths; and
- (6) Developing, or assisting local educational agencies in developing, strategies that provide differential pay, or other incentives, to recruit and retain teachers in high-need academic

subjects and teachers, principals, or other school leaders, in low-income schools and school districts (Section ESEA 2101(c)(4) (20 USC 6611(c)(4))).

- b. SEAs may use a certain amount (not more than 3 percent of the amount reserved for subgrants to LEAs under Section 2101(c)(1)) for one or more of the activities for principals or other school leaders described in Section 2101(c)(4). For more information, about this additional SEA reservation of funds, please see Part 3 of the *Non-Regulatory Guidance for Title II, Part A: Building Systems of Support for Excellent Teaching and Leading*, available at <https://www2.ed.gov/policy/elsec/leg/essa/essatitleiipartaguidance.pdf> (ESEA Section 2101(c)(3)).
- c. LEA Use of Funds- After conducting meaningful consultation, as required by ESEA Section 2102(b)(3), LEAs may use funds for a broad range of activities designed to improve educator effectiveness that are identified in ESEA Section 2103(b). While not an exhaustive list, examples of allowable activities include:
 - (1) Providing “professional development” (as the term is defined in ESEA Section 8101(42) (20 USC 7801(42))) to teachers, instructional leadership teams, principals, or other school leaders that is focused on improving teaching and student learning and achievement;
 - (2) Developing and implementing initiatives to recruit, hire, and retain teachers, principals, and other school leaders;
 - (3) Providing training, technical assistance, and capacity-building in local educational agencies to assist teachers, principals, or other school leaders with selecting and implementing formative assessments, designing classroom-based assessments, and using data from such assessments to improve instruction and student academic achievement carrying out initiatives that provide teacher, paraprofessional, principal, or other school leader advancement and professional growth, and an emphasis on leadership opportunities, multiple career paths, and pay differentiation. LEAs also may use funds to hire teachers to reduce class size (ESEA sections 2103(b) (20 USC 6613(b))).

2. *Activities Unallowed*

- a. SEAs may use not more than 1 percent of their total Title II allocation for state administration activities.
- b. SEAs may also use not more than 2 percent of the state’s total Title II, Part

A state allocation to establish or expand teacher, principal, or other school leader preparation academies to prepare teachers, principals, and other school leaders to serve in high-need schools. For more information, please see the guidance described in A.1.a.ii, above (ESEA Section 2101(c)(4)(B)(xii)).

B. Allowable Costs/Cost Principles

(All grantees) See Part 4, 84.000 ED Cross-Cutting Section.

E. Eligibility

1. Eligibility for Individuals

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

a. LEAs apply to the SEAs for program funds. The amount of each LEA's allocation that an SEA provides is based solely on the following formula:

- (1) Twenty percent of the funds must be distributed to LEAs based on the relative numbers of individuals ages 5 through 17 who reside in the area the LEA serves (based on the most recent Census data, as determined by the secretary); and
- (2) Eighty percent of the funds must be distributed to LEAs based on the relative numbers of individuals ages 5 through 17 who reside in the area the LEA serves and who are from families with incomes below the poverty line (based on the most recent Census data, as determined by the secretary) (ESEA Section 2102(a)).

G. Matching, Level of Effort, Earmarking

1. Matching (LEAs)

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

(SEAs/LEAs) See Part 4, 84.000 ED Cross-Cutting Section.

2.2 Level of Effort – *Supplement Not Supplant*

(SEAs/LEAs) See Part 4, 84.000 ED Cross-Cutting Section.

3. Earmarking

- a. **LEA Subgrant Reservation:** SEAs must reserve not less than 95 percent of their Title II allocation for subgrants to LEAs (Section 2101(c)(1) of the ESEA).

(1) Additionally, SEAs may reserve not more than 3 percent of the amount reserved for subgrants to LEAs under Section 2101(c)(1) for one or more of the activities for principals or other school leaders described in Section 2101(c)(4). For more information, about this additional SEA reservation of funds, please see Part 3 of the *Non-Regulatory Guidance for Title II, Part A: Building Systems of Support for Excellent Teaching and Learning*, available at

<https://www2.ed.gov/policy/elsec/leg/essa/essatitleiipartaguidance.pdf>

(ESEA Section 2101(c)(3)).

- b. State Administration and Activities – SEAs have the authority to set aside 5 percent of a state’s total allocation to carry out statewide activities related to improving educator quality. (ESEA Section 2101(c)(1) and (4)).

(1) Limitation on administration: Within this 5 percent, SEAs may use not more than 1 percent of their total Title II allocation for state administration. (ESEA Section 2101(c)(2)).

(2) Limitation on statewide activities reservation: SEAs may reserve not more than 2 percent of the state’s total Title II, Part A state allocation to establish or expand teacher, principal, or other school leader preparation academies to prepare teachers, principals, and other school leaders to serve in high-need schools. For more information, please see the guidance described in A.1.a.ii, above (ESEA Section 2101(c)(4)(B)(xii)).

- c. See Part 4, 84.000 ED Cross-Cutting Section.

L. Reporting

1. Financial Reporting

See Part 4, 84.000 ED Cross-Cutting Section.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance. This reporting requirement applies only to SEAs.

N. Special Tests and Provisions**1. Participation of Private School Children (SEAs/LEAs)**

See Part 4, 84.000 ED Cross-Cutting Section.

2. Access to Federal Funds for New or Significantly Expanded Charter Schools

See Part 4, 84.000 ED Cross-Cutting Section.

IV. OTHER INFORMATION

Funds under the Small, Rural School Achievement (SRSA) program (Assistance Listing 84.358A) may be used for activities allowed under other programs, including this program Title II, Part A.

Expenditures for allowable activities under Title II, Part A from funds awarded for the SRSA Funds Program should be included in the audit universe and total expenditures of Assistance Listing 84.358A (i.e., from the program from which they originated) for purposes of (1) determining Type A programs and (2) completing the Schedule of Expenditures of Federal Awards (SEFA).

See Part IV. Other Information, 1. Consolidation of Administrative Funds, 2. Schoolwide Programs, and 3. Transferability of the 84.000 ED Crosscutting Section.

Certain compliance requirements that apply to multiple ED programs, including Title II, Part A, are discussed once in the ED Cross-Cutting Section of this Supplement (84.000) rather than being repeated in each individual program. Where applicable to the Perkins V requirements, references are made to the specific part of the ED Cross-Cutting Section.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.424 STUDENT SUPPORT AND ACADEMIC ENRICHMENT PROGRAM

I. PROGRAM OBJECTIVES

The objective of the Student Support and Academic Enrichment Grant program in Title IV, Part A of the Elementary and Secondary Education Act (ESEA) of 1965, as amended by the Every Student Succeeds Act (ESSA) (Pub. L. No. 114-95), is to provide funds to state educational agencies (SEAs) and local educational agencies (LEAs) to improve students' academic achievement by increasing the capacity of states, LEAs, schools, and local communities to: 1) provide all students with access to a well-rounded education; 2) improve school conditions for student learning; and 3) improve the use of technology in order to improve the academic achievement and digital literacy of all students.

II. PROGRAM PROCEDURES

Funds are obtained by a state on the basis of the Department of Education's (ED) approval of either 1) an individual state plan as provided in Section 4103 of the ESEA (20 USC 7113) or 2) a consolidated application that includes the program, in accordance with Section 8302 of the ESEA (20 USC 7842).

Source of Governing Requirements

This program is authorized by Title IV, Part A of the ESEA, as amended by the ESSA (Pub. L. No. 114-95) (20 USC 7101-7122). The program purpose and definitions in Title IV, Part A of the ESEA, sections 4101 and 4102 (20 USC 7111 and 7112) also apply to this program. While there are no program regulations, general ESEA requirements in 34 CFR Part 299 apply.

Availability of Other Program Information

- a. Student Support and Academic Enrichment Grants Non-Regulatory Guidance (October 21, 2016)
<https://www2.ed.gov/policy/elsec/leg/essa/essassaegrantguid10212016.pdf>.

- c. Non-Regulatory Guidance: Fiscal Changes and Equitable Services Requirements Under the Elementary and Secondary Education Act of 1965 (ESEA), as Amended by the Every Student Succeeds Act (ESSA) (November 21, 2016)
<https://www2.ed.gov/policy/elsec/leg/essa/essaguidance160477.pdf>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	Y	Y	N	N	N	N	Y

A. Activities Allowed or Unallowed

See also Part 4, 84.000 ED Cross-Cutting Section.

1. *Activities Allowed*

a. *State Use of Funds*

- (1) *Subgrants to LEAs* (Section 4104(a)(1) of the ESEA (20 USC 7114(a)(1))) – SEAs must reserve not less than 95 percent of their Title IV, Part A allocation for subgrants to LEAs.
- (2) *State Administration* (Section 4104(a)(2) of the ESEA (20 USC 7114(a)(2))) – SEAs may reserve up to 1 percent of their Title IV, Part A allocation for administrative costs.

- (3) *State Activities* (Section 4104(a)(3) of the ESEA (20 USC 7114(a)(3))) – States may reserve the remainder of funds not reserved for subgrants or administrative costs for state activities. Examples of allowable state-level activities are identified in Section 4104(b) of the ESEA and may include monitoring and providing technical assistance and capacity building to LEAs; identifying and eliminating state barriers to the coordination and integration of programs, initiatives, and funding streams that meet the purposes of the program; and otherwise supporting LEAs in carrying out activities in the three Title IV, Part A program content areas: well-rounded education, safe and healthy students, and effective use of technology.

b. *LEA Use of Funds*

LEAs may use funds for a broad span of activities designed to improve student academic achievement by improving conditions for learning in three areas: well-rounded education (examples of allowable activities in section 4107 of the ESEA), safe and healthy students (examples of allowable activities in section 4108 of the ESEA), and effective use of technology (examples of allowable activities in section 4109 of the ESEA).

Under Section 4106(e)(2)(C)–(E) of the ESEA, an LEA or consortium of LEAs that receives \$30,000 or more in Title IV, Part A funds, must use:

- (1) Not less than 20 percent of funds to support one or more of the activities authorized under section 4107 pertaining to well-rounded educational opportunities;
- (2) Not less than 20 percent of funds to support one or more activities authorized under section 4108 pertaining to safe and healthy students; and
- (3) A portion of funds to support one or more activities authorized under section 4109 pertaining to the effective use of technology, including an assurance that it will not use more than 15 percent of the funds reserved for this section for purchasing technology infrastructure as described in section 4109(b).

Under section 3511 of Division A of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), Pub. L. No. 116-136, the Department provided authority for LEAs that receive \$30,000 or more to receive waivers of 1) the content area spending requirements in sections 4106(e)(2)(C), (D), and (E) – the requirements to use a minimum percentage of Title IV, Part A funds for activities under sections 4107, 4108, and 4109 for fiscal year (FY) 2019 funds and any available FY 2018 carryover funds; and 2) the spending limitation in section 4109(b) – the 15

percent limit on the use of funds under section 4109 to purchase technology infrastructure for FY 2019 funds and any available FY 2018 carryover funds.

c. *Transferability*

Funds under the Small Rural Schools Achievement (SRSA) Alternative Uses of Funds Program (Assistance Listing 84.358A) may be used for activities allowed under other programs, including this program. Expenditures under Assistance Listing 84.424 from funds awarded for the SRSA Alternative Uses of Funds Program should be included in the audit universe and total expenditures of Assistance Listing 84.424 (i.e., from the program from which they originated) for purposes of (1) determining Type A programs, and (2) completing the Schedule of Expenditures of Federal Awards (SEFA).

See Part 4, 84.000 ED Cross-Cutting Section.

B. Allowable Costs/Cost Principles

(All grantees) See Part 4, 84.000 ED Cross-Cutting Section.

C. Cash Management

See Part 4, 84.000 ED Cross-Cutting Section.

E. Eligibility

1. Eligibility for Individuals

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

a. LEAs or consortia of LEAs are the eligible subrecipients (section 4106(a)-(b) of the ESEA).

b. LEAs apply to the SEAs for program funds. The amount of each LEA's allocation that an SEA provides is determined by formula in the same proportion as to the LEA's prior year's Title I, Part A allocation (Section 4105(a)(1) of the ESEA). In order to receive an allocation under Title IV, Part A, an LEA must have received a Title I, Part A allocation the previous fiscal year.

- c. However for the 2017–2018 school year, SEAs had the option of awarding subgrants on a competitive basis pursuant to authority provided in the 2017 Consolidated Appropriations Act, Pub. L. No. 115-31 available here: https://safesupportivelearning.ed.gov/sites/default/files/ProvisionsConsolidatedAppropriationsAct2017_Title%20IVASSAE.pdf. Such competitive subgrants must be not less than \$10,000.

G. Matching, Level of Effort, Earmarking

1. Matching (LEAs)

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort (SEAs/LEAs)*

Not Applicable

2.2 Level of Effort – *Supplement Not Supplant (SEAs/LEAs)*

See Part 4, 84.000 ED Cross-Cutting Section.

3. Earmarking

See Part 4, 84.000 ED Cross-Cutting Section.

H. Period of Performance

(All grantees) See Part 4, 84.000 ED Cross-Cutting Section.

N. Special Tests and Provisions

1. Participation of Private School Children (SEAs/LEAs)

See also Part 4, 84.000 ED Cross-Cutting Section.

2. Access to Federal Funds for New or Significantly Expanded Charter Schools

See Part 4, 84.000 ED Cross-Cutting Section.

IV. OTHER INFORMATION

See Part 4, 84.000 ED Cross-Cutting Section.

DEPARTMENT OF EDUCATION

ASSISTANCE LISTING 84.425 EDUCATION STABILIZATION FUND (ESF)

ESF INTRODUCTION

Note: This program is considered a “higher risk” program for 2023, pursuant to 2 CFR section 200.519(c)(2). Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) was signed into law on March 27, 2020, and provided \$30.75 billion for the Education Stabilization Fund (ESF) to prevent, prepare for, and respond to coronavirus, domestically or internationally. The Coronavirus Response and Relief Supplemental Appropriations Act, 2021 (CRRSA Act), was signed into law on December 27, 2020, and provided an additional \$81.88 billion for the ESF programs. Finally, the American Rescue Plan Act of 2021 (ARP Act) was enacted on March 11, 2021, and included approximately \$165 billion for the ESF.

Although funds from the CARES, CRRSA, and ARP Acts were allocated to the U.S. Department of Education (ED) under a single Federal program (ESF), ED awarded ESF funds to grantees under 23 subprograms (one subprogram, 84.425Q, was awarded only to for-profit institutions and therefore not included in this Compliance Supplement). An alphabetic character at the end of the 84.425 Assistance Listing Number (ALN) was used to delineate the specific subprogram. Each subprogram has its own funding requirements and compliance requirements.

The ESF Compliance Supplement is broken down into two sections. Section 1 of the ESF Compliance Supplement identifies the objectives and compliance requirements of the subprograms generally focused on elementary and secondary education. Section 2 identifies the objectives and compliance requirements of the subprograms focused on higher education.

The table below identifies the subprograms included in each section by name and Assistance Listing Number with alphabetic character identifier. It also identifies the subprograms that are not included in the Compliance Supplement. For those subprograms not addressed in the Compliance Supplement, auditors must refer to Part 7 of the Compliance Supplement, “Guidance for Auditing Programs Not Included in This Compliance Supplement” and, where applicable, Notices Inviting Applications and other award documentation.

ESF Section	Assistance Listing No. with Alpha	Subprogram Name
Section 1		
	84.425A	Education Stabilization Fund–State Educational Agency (Outlying Areas) (ESF-SEA)
	84.425C	Governor’s Emergency Education Relief (GEER) Fund
	84.425D	Elementary and Secondary School Emergency Relief (ESSER) Fund
	84.425H	Education Stabilization Fund – Governors (Outlying Areas) (ESF-Governor)

ESF Section	Assistance Listing No. with Alpha	Subprogram Name
	84.425R	Coronavirus Response and Relief Supplemental Appropriations Act, 2021 – Emergency Assistance to Non-Public Schools (CRRSA EANS) program
	84.425U	American Rescue Plan - Elementary and Secondary School Emergency Relief (ARP ESSER)
	84.425V	American Rescue Plan - Emergency Assistance to Non-Public Schools (ARP EANS) program
	84.425X	American Rescue Plan–State Educational Agency (Outlying Areas) (ARP-OA SEA)
Section 2		
	84.425E	Higher Education Emergency Relief Fund (HEERF) Student Aid
	84.425F	HEERF Institutional Aid
	84.425J	HEERF Historically Black Colleges and Universities (HBCUs)

Neither Section 1 nor Section 2		
	84.425B	Discretionary Grants: Rethink K-12 Education Models Grants
	84.425G	Discretionary Grants: Reimagining Workforce Preparation Grants
	84.425W	American Rescue Plan – Elementary and Secondary School Emergency Relief –Homeless Children and Youth
	84.425Y	American Rescue Plan – American Indian Resilience in Education (AIRE)

OTHER INFORMATION

Major Program Determination

Many auditees will have received and expended funds under multiple ESF subprograms. For major program purposes, auditors must evaluate 84.425 in its entirety. All ESF subprogram expenditures, even those expenditures of subprograms not addressed in this ESF Compliance Supplement, must be considered as part of the ESF program for major program determination purposes.

Identifying Subawards on the SEFA and Data Collection Form

For purposes of SEFA and Data Collection Form (Form SF-SAC) reporting, auditees should identify the individual subprogram(s) the funds were expended under, including each separate Assistance Listing Number (ALN) with the applicable alpha character. A total for the ESF in its entirety should also be provided. Auditees may need to determine which subprogram funds were expended through review of grant documents and inquiry of the source agency.

In order to identify more precisely subprogram expenditures, while also incorporating guidance issued by OMB on separately identifying COVID-19 expenditures, ED issued a memo to grantees on August 4, 2021, requesting that auditees include on the Federal Awards page of the Data Collection Form: (1) whether the program is novel coronavirus 2019 (COVID-19) relief assistance; and (2) the subprogram Assistance Listing Number alpha.

Therefore, to apply this requirement to the ESF subprograms, on the Federal Awards page of the Data Collection Form, under column c with the heading “Additional Award Identification,” include the phrase “COVID-19” to be consistent with OMB’s guidance in Appendix VII of the Compliance Supplement. Then place a comma (,) after COVID-19 and include the full Assistance Listing number and capitalized alpha character (A, B, C, etc.) (see example below).

Figure: The column to include this information on the Data Collection Form, Federal Awards page is circled in the figure below:

PART II: FEDERAL AWARDS										
1. Federal Awards Expended During Fiscal Period										
Schedule of Expenditures of Federal Awards										
Row Number (auto-generated)	CFDA #		c Additional Award Identification ³	d Federal Program Name	e Amount Expended (S)	f Cluster Name	g Federal Program Total ⁴ (auto-generated) (S)	h Cluster Total ⁵ (auto-generated) (S)	j Loan Programs	
	Federal Awarding Agency Prefix ¹	CFDA Three-Digit Extension ²							Loan/Loan Guarantee (Loan) Y/N	If Loan, the End of the Audit Period Outstanding Loan Balance ⁶ (S)

Example: A grantee listing the program “Higher Education Emergency Relief Fund – Student Aid Portion” (ALN 84.425E) on the SEFA would complete the Federal Awards page of the Data Collection Form in the following manner:

	A	B	C	D
--	---	---	---	---

Row Number (auto generated)	Federal Awarding Agency Prefix	ALN Three- Digit Extension	Additional Award Identification	Federal Program Identification
1	84	425	COVID-19, 84.425E	COVID 19 Education Stabilization Fund

Note: Please note the inclusion of “COVID-19, 84.425E” in column C for the COVID-19 Higher Education Emergency Relief Fund – Student Aid Portion subprogram.

Consolidation of Administrative Funds (SEAs and LEAs)

State and local administrative funds for ESSER, GEER, and EANS (84.425C, D, R, U, and V) that are consolidated (as described in Part 4 ED Cross-Cutting, III.A.1, “Activities Allowed or Unallowed – Consolidation of Administrative Funds (SEAs and LEAs)”) should be included in the audit universe and the total expenditures of the programs from which they originated for purposes of (1) determining Type A programs and (2) completing the Schedule of Expenditures of Federal Awards (SEFA). A footnote showing, by program, amounts of administrative funds consolidated is encouraged.

PROGRAM OBJECTIVES***CARES Act*

For each of the subprograms under the CARES Act, a recipient submitted a unique application in the form of a Certification and Agreement for Funding applicable to the program (see “Source of Governing Requirements”).

The objective of the GEER Fund (84.425C) is to provide local educational agencies (LEAs), institutions of higher education (IHEs), and other education-related entities with emergency assistance as a result of the Coronavirus Disease 2019 (COVID-19).

The objective of the ESSER Fund (84.425D) is to provide State educational agencies (SEAs) and LEAs, including charter schools that are LEAs, with emergency relief funds to address the impact that COVID-19 has had, and continues to have, on elementary and secondary schools across the nation.

The objective of the ESF-SEA (84.425A) and ESF-Governor Funds (84.425H) is to allocate funds to the Outlying Areas—American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the Virgin Islands—for the purpose of providing SEAs and LEAs (ESF-

SEA) and SEAs, LEAs, IHEs, and other education-related entities (ESF-Governor) with emergency assistance to address the impact of COVID-19.

CRRSA Act

For each of the subprograms funded under the CRRSA Act (ESSER II, GEER II, ESF II-SEA and ESF II-Governor), ED made awards as supplements to the CARES Act awards, and recipients were not required to submit another Certification and Agreement.

ED made CRRSA EANS awards to each Governor with an approved Certification and Agreement. CRRSA EANS does not apply to the Outlying Areas.

The objective of the CRRSA EANS (84.425R) subprogram is to provide Governors with a reservation of funds under the CRRSA Act to provide services or assistance to eligible non-public schools to address the impact that COVID-19 has had, and continues to have, on non-public school students and teachers in the state. The SEA administers the CRRSA EANS subprogram on behalf of the Governor.

ARP Act

For each of the programs funded under the ARP Act (ARP ESSER, ARP EANS, and ARP-OA SEA), ED made new awards and included additional terms and conditions for the use of those funds.

The objectives of the ARP ESSER Fund (84.425U) and of the ARP-OA SEA Fund (84.425X) are to provide SEAs and LEAs with emergency relief funds to help schools return safely to in-person instruction, maximize in-person instructional time, sustain the safe operation of schools, and address the academic, social, emotional, and mental health impacts of the COVID-19 pandemic on the Nation's students.

The objective of the ARP EANS (84.425V) program is to provide Governors with additional funds under the ARP Act to provide services or assistance to eligible non-public schools to address the impact that COVID-19 has had, and continues to have, on non-public school students and teachers in the state. Like CRSSA EANS, the SEA administers the ARP EANS program on behalf of the Governor.

Note: For purposes of this Section 1 of the 2023 Compliance Supplement, references to the ESF are to the programs generally focused on elementary and secondary education, which are identified on page 1 of this Section.

Note: For purposes of this document, ESSER refers to ESSER I, ESSER II, and ARP ESSER funds, while ESSER I refers only to funds under the CARES Act; ESSER II refers only to funds under the CRRSA Act; and ARP ESSER refers only to funds under the ARP Act. ESF-SEA refers to ESF I-SEA and ESF II-SEA funds, while ESF I-SEA refers only to funds under the CARES Act; ESF II-SEA refers only to funds under the CRRSA Act; and ARP-OA SEA refers only to funds under the ARP Act. Finally, GEER refers to both GEER I and GEER II funds, while GEER I refers only to funds under the CARES Act and GEER II refers only to funds under the CRRSA Act. Similarly, ESF-Governor refers to both ESF I-Governor and ESF II-Governor

funds, while ESF I-Governor refers only to funds under the CARES Act and ESF II-Governor refers only to funds under the CRRSA Act. CRRSA EANS refers to funds under the CRRSA Act and ARP EANS refers to funds under the ARP Act.

II. PROGRAM PROCEDURES

A. GEER Fund

Under the GEER Fund, ED allocated funds to Governors, as well as the mayor of the District of Columbia; 60 percent was based on each State’s population of individuals ages 5 through 24 and 40 percent was based on the number of children counted under section 1124(c) (indicators of poverty) of the Elementary and Secondary Education Act of 1965 (ESEA). The Governor or mayor uses GEER funds to: (1) provide emergency support through grants to LEAs that the SEA deems to have been most significantly impacted by COVID-19; (2) provide emergency support through grants to IHEs serving students within the State that the Governor determines have been most significantly impacted by COVID-19; and (3) provide support to any other IHE, LEA, or education-related entity within the State that the Governor or mayor deems essential for carrying out emergency educational services. In order to receive GEER funds under the CARES Act, a Governor submitted to ED a completed “Certification and Agreement.” The CRRSA Act authorized additional funding for the GEER Fund, which ED distributed as supplemental awards (GEER II). GEER I and GEER II are subject to all of the same requirements (with the exception of equitable services for LEAs under GEER II).

B. CRRSA EANS and ARP EANS

Under the CRRSA EANS program, ED awarded grants by formula to each Governor (or the mayor of the District of Columbia) with an approved “Certification and Agreement” to provide services or assistance to eligible non-public schools (for purposes of the CRRSA EANS program, an eligible non-public school is an elementary or secondary school that— is non-profit; is accredited, licensed, or otherwise operates in accordance with State law; was in existence prior to March 13, 2020, the date COVID-19 was declared a national emergency; and did not, and will not, apply for and receive a loan under the Small Business Administration’s Paycheck Protection Program (PPP) (15 USC 636(a)(37)) that is made on or after December 27, 2020. This limitation applies for as long as the non-public school is a participant in the CRRSA EANS program.) to address the impact that COVID-19 has had, and continues to have, on non-public school students and teachers in the State.

Under the ARP EANS program, ED awarded grants by formula to each Governor (or the mayor of the District of Columbia) with an approved application to provide services or assistance to eligible non-public schools. The same eligibility requirements for non-public schools apply under the ARP EANS program as did under the CRRSA EANS program with one exception. Under the ARP EANS program, an SEA may provide services or assistance only to non-public schools that (1) enroll a significant percentage of students from low-income families and (2) are most impacted by COVID-19. Each

State was required to identify in its application the threshold to be used in determining if a non-public school enrolls a significant percentage of students from low-income families and the factor or factors to be used in determining which non-public schools are most impacted by COVID-19. States' approved applications may be found here:

<https://oese.ed.gov/arp-eans-awards/>.

A non-public school that participates in the CRRSA EANS or ARP EANS program is not a recipient of Federal financial assistance, and therefore is not subject to requirements that apply to subrecipients (e.g., single audit requirements, SEFA reporting).

C. ESSER Fund

Under ESSER I, ED allocated funds to each SEA by a formula based on the State's fiscal year (FY) 2019 share of funds under Title I, Part A (84.010) of the ESEA. An SEA, in turn, allocated ESSER I funds to LEAs by formula based on FY 2019 Title I, Part A allocations. In order to receive an ESSER I allocation under the CARES Act, an SEA submitted to the Department a completed "Certification and Agreement."

The CRRSA Act provided an additional \$54.3 billion for the ESSER Fund, which ED distributed as supplemental awards (ESSER II). These ESSER II awards to SEAs are in the same proportion as each State received funds under Title I, Part A of the ESEA for FY 2020. The SEA, in turn, allocated ESSER II funds to LEAs by formula based on FY 2020 Title I, Part A allocations.

ESSER I and ESSER II have the same Assistance Listing alpha number and are subject to virtually all of the same requirements, except for one main difference: an LEA that receives ESSER I funds under the CARES Act (Section 18005) must provide equitable services to students and teachers in the same manner as provided under section 1117 of Title I, Part A of the ESEA. ESSER II is not subject to the equitable services requirement; rather the CRRSA Act included \$2.75 billion for the separate CRRSA EANS program.

The ARP Act provided \$122 billion for the ESSER Fund, providing funds to SEAs and LEAs to meet the urgent needs of schools and students. On March 17, 2021, the Department awarded each State the first two-thirds of its ARP ESSER allocation. On April 21, 2021, ED released a State Plan template for the ARP ESSER Fund, which is designed to promote comprehensive planning by SEAs and LEAs. Once ED approved a SEA's plan, it made the SEA's remaining ARP ESSER allocation available to the SEA.

ARP ESSER allocations were based on the proportion that each State received under Title I, Part A of the ESEA for FY 2020. While ARP ESSER has a different alpha character (84.425U), it is subject to most of the same requirements as ESSER II except for the following: an SEA must reserve certain amounts of its ARP ESSER State-level funds for specific purposes, and an LEA that receives ARP ESSER funds must submit to the SEA an ARP LEA plan for the use of funds, must engage in meaningful stakeholder consultation when developing its ARP LEA plan, must submit and make publicly

available a plan for the safe return to in-person instruction and continuity of services, and must reserve at least 20 percent of its ARP ESSER award to address learning loss.

D. ESF-SEA and ESF-Governor (Outlying Areas)

Under the ESF-SEA Fund, ED allocated funds to SEAs in the Outlying Areas based on the same proportion that each Outlying Area received under Title I, Part A of the ESEA in the most recent fiscal year. By statute, ED used this same formula to make allocations to States under the ESSER Fund. In order to receive ESF I-SEA funds, an SEA submitted to ED a completed “Certification and Agreement.” The ESF II-SEA funds were awarded to each Outlying Area under the same grant terms and conditions that applied to the ESF I-SEA funds.

Under the ESF-Governor Fund, ED allocated funds to Governors in the Outlying Areas, with 60 percent of the award based on population ages 5 to 24 and 40 percent of the award based on the relative number of children counted under section 1124(c) (indicators of poverty) of the ESEA. By statute, ED used this same formula to make allocations to Governors under the GEER Fund. In order to receive ESF I-Governor funds, Governors submitted to ED a completed “Certification and Agreement.” The ESF II-Governor funds were awarded to each Outlying Area under the same grant terms and conditions that applied to the ESF I -Governor funds.

Under ARP-OA SEA, ED allocated funds to the SEAs in the Outlying Areas based on the same proportion as each Outlying Area received under Title I, Part A of the ESEA for FY 2020. ARP-OA SEA grant terms and conditions were attached to each SEA’s grant award notification. Each SEA received its full ARP-OA SEA allocation within 30 days of enactment of the ARP Act.

Source of Governing Requirements

These programs are authorized, as applicable, by the CARES Act, Pub. L. No. 116-136, 134 Stat. 281 (Mar. 27, 2020), the CRRSA Act, Pub. L. No. 116-260 (December 27, 2020), and the ARP Act, Pub. L. No. 117-2 (March 11, 2021). The regulations in 34 CFR Part 76 (State-Administered Programs), 2 CFR Part 200 (Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards), and 31 CFR Part 205 (Cash Management Improvement Act) apply to these programs.

On April 22, 2021, ED established requirements for the ARP ESSER Fund under section 2001 of the ARP Act. The requirements cover meaningful stakeholder consultation, LEA ARP ESSER plan requirements, and LEA plans for the safe return to in-person instruction and continuity of services, <https://www.federalregister.gov/documents/2021/04/22/2021-08359/american-rescue-plan-act-elementary-and-secondary-school-emergency-relief-fund>.

Additionally, on July 13, 2021, ED established final requirements for the ARP EANS program. The requirements clarified the statutory requirements applicable to the ARP EANS program, including the requirement to provide services or assistance to non-public schools that enroll a significant percentage of students from low-income families and are most impacted by COVID-19 (see <https://www.govinfo.gov/content/pkg/FR-2021-07-13/pdf/2021-14862.pdf>).

Finally, the application each SEA or Governor completed and signed prior to receiving a grant award also form the basis of the governing requirements for those programs for which ED required Certification and Agreements or applications:

1. Certification and Agreement for Funding under the Education Stabilization Fund Program Elementary and Secondary School Emergency Relief Fund (ESSER I Fund) <https://oese.ed.gov/files/2020/04/ESSERF-Certification-and-Agreement-2.pdf>
2. Certification and Agreement for Funding under the Education Stabilization Fund Program Governor’s Emergency Education Relief Fund (GEER I Fund) <https://oese.ed.gov/files/2020/04/GEER-Certification-and-Agreement.pdf>
3. Certification and Agreement for Funding under the CRRSA Act Emergency Assistance to Non-Public Schools program (CRRSA EANS) https://oese.ed.gov/files/2021/01/Final_EANS_CertificationandAgreement_FY21_1.11.21.pdf

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this Federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the Federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	Y	Y	N	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

See Part 4, 84.000 ED Cross-Cutting Section for requirements applicable to Consolidation of Administrative Funds for ESSER, GEER, EANS, and the ESF Outlying Areas program (84.425A, C, D, H R, U, V, and X) and for requirements applicable to Schoolwide Programs for ESSER & GEER (84.425C, D, and U).

Governors and SEAs must demonstrate that costs incurred by Governors, SEAs, and subrecipients are allowable under the relevant statutory and regulatory provisions, assurances, and Certification and Agreement, and consistent with the purpose of the ESF, which is “to prevent, prepare for, and respond to COVID-19.” The Outlying Areas must ensure that expenditures under ESF-SEA and ESF-Governor are consistent with the allowable uses of funds set forth in the signed Certification and Agreement and that expenditures under ARP-OA-SEA are consistent with the grant conditions and assurances attached to the ARP-OA SEA Grant Award Notification (GAN).

1. *Activities Allowed*

a. *GEER Funds* - Under section 18002(c) of the CARES Act and Section 312 of the CRRSA Act, GEER I and GEER II funds may be used to:

- (1) Provide emergency support through grants to LEAs that the SEA deems have been most significantly impacted by coronavirus to support the ability of such LEAs to continue to provide educational services to their students and to support the on-going functionality of the LEA;
- (2) Provide emergency support through grants to IHEs serving students within the State that the Governor determines have been most significantly impacted by coronavirus to support the ability of such institutions to continue to provide educational services and support the on-going functionality of the institution; and
- (3) Provide support to any other institution of higher education, LEA, or education-related entity within the State that the Governor deems essential for carrying out emergency educational services to students for authorized activities described in section 18003(d)(1) of the CARES Act or the HEA, the provision of childcare and early childhood education, social and emotional support, and the protection of education-related jobs.

b. *ESF-Governor Funds*- Governors in the Outlying Areas may use ESF-Governor funds to:

- (1) Provide emergency support through grants to SEAs and, where applicable, to LEAs to address impacts of the coronavirus in elementary and secondary schools and to support the ability of these agencies to continue to provide educational services to their students and to support the ongoing functionality of the SEA and, where applicable, LEAs (note that SEAs may also subgrant funds received to LEAs);
- (2) Provide emergency support through grants to IHEs to address the impacts of the coronavirus on IHEs and to support the ability of such institutions to continue to provide educational services and support the ongoing functionality of the institutions; and
- (3) Provide support to any IHE, LEA, or education-related entity within the Outlying Area that the Governor deems essential for carrying out emergency educational services to students, the provision of childcare and early childhood education, social and emotional support, and the protection of education-related jobs.

Governors may also use a reasonable and necessary amount of the ESF-Governor funds for administrative costs related to the allocation and management of the funds. Entities that receive ESF-Governor funds may also use a reasonable and necessary amount of the funds for administrative costs related to the management of the funds.

- c. *CRRSA EANS and ARP EANS Funds*- The CRRSA Act, Pub. L. No. 116-260 (December 27, 2020) authorizes the CRRSA EANS program. A non-public school may apply to receive services and assistance from the SEA to address educational disruptions resulting from COVID-19 for:
- (1) Supplies to sanitize, disinfect, and clean school facilities;
 - (2) Personal protective equipment (PPE);
 - (3) Improving ventilation systems, including windows or portable air purification systems;
 - (4) Training and professional development for staff on sanitization, the use of PPE, and minimizing the spread of infectious diseases;
 - (5) Physical barriers to facilitate social distancing;
 - (6) Other materials, supplies, or equipment to implement public health protocols, including guidelines and recommendations from the Centers for Disease Control for reopening and operation of school facilities to effectively maintain health and safety of students, educators, and other staff;
 - (7) Expanding capacity to administer coronavirus testing to effectively monitor and suppress the virus, to conduct surveillance and contact tracing activities, and to support other activities related to coronavirus testing for students, teachers, and staff;
 - (8) Educational technology (including hardware, software, connectivity, assistive technology, and adaptive equipment) to assist students, educators, and other staff with remote or hybrid learning;
 - (9) Redeveloping instructional plans, including curriculum development, for remote or hybrid learning or to address learning loss;
 - (10) Leasing sites or spaces to ensure safe social distancing;
 - (11) Reasonable transportation costs;

- (12) Initiating and maintaining education and support services or assistance for remote or hybrid learning or to address learning loss; or
- (13) Reimbursement for the expenses of any services or assistance described above that a non-public school incurred on or after March 13, 2020, except for the following:
 - Improvements to ventilation systems (including windows), except for portable air purification systems, which may be reimbursed.
 - Any expenses reimbursed through a loan guaranteed under the Paycheck Protection Program (15 USC 636(a)) prior to December 27, 2020.
 - Staff training and professional development on sanitization, the use of PPE, and minimizing the spread of COVID-19.
 - Developing instructional plans, including curriculum development, for remote or hybrid learning or to address learning loss.
 - Initiating and maintaining education and support services or assistance for remote or hybrid learning or to address learning loss.

An SEA may provide these services or assistance directly to a nonpublic school or through a contract with an individual, association, agency, or organization.

Control of funds for services or assistance provided to a non-public school under the CRRSA EANS program and title to materials, equipment, and property purchased with CRRSA EANS funds, must be in a public agency, and a public agency must administer such funds, services, assistance, materials, equipment, and property. In addition, all services or assistance provided under the CRRSA EANS program must be secular, neutral, and non-ideological.

The above requirements also apply to the ARP EANS program except that under section 2002(b) of the ARP Act an SEA may not use ARP EANS funds to provide reimbursements to a non-public school for costs the school incurred to address the impact of COVID-19.

d. *ESSER Funds*

LEAs may use ESSER funds for a wide range of activities to address needs arising from the coronavirus pandemic. Section 18003(d) of the

CARES Act provides a list of allowable LEA ESSER I activities. Section 313(3) of the CRRSA Act includes “additional” LEA allowable uses of funds under ESSER II, in particular addressing learning loss; preparing schools for reopening; and testing, repairing, and upgrading projects to improve air quality in school buildings; however, all of these uses already are permitted under the CARES Act even though not explicitly listed. Section 2001(e) of the ARP Act further expands LEA allowable uses of funds under ARP ESSER to include providing mental health supports, including through the implementation of evidence-based full-service community schools; and developing strategies and implementing public health protocols including, to the greatest extent practicable, policies in line with guidance from the Centers for Disease Control and Prevention (CDC) on reopening and operating schools to effectively maintain the health and safety of students, educators, and other staff. ED has clarified that SEAs, LEAs and schools may use funding under ESSER I, ESSER II, and ARP ESSER to support a very wide range of activities, including activities indirectly linked to the impact of COVID-19, as outlined in the ED Volume 2 COVID Handbook, available at <https://www2.ed.gov/documents/coronavirus/reopening-2.pdf>, provided such uses are consistent with statutory requirements and the Uniform Guidance in 2 CFR Part 200.

LEAs may use ESSER funds to support:

- (1) Any activity authorized by the ESEA of 1965, including the Native Hawaiian Education Act and the Alaska Native Educational Equity, Support, and Assistance Act (20 USC 6301 et seq.), the Individuals with Disabilities Education Act (20 USC 1400 et seq.) (“IDEA”), the Adult Education and Family Literacy Act (20 USC 1400 et seq.), the Carl D. Perkins Career and Technical Education Act of 2006 (20 USC 2301 et seq.) (“the Perkins Act”), or subtitle B of title VII of the McKinney-Vento Homeless Assistance Act (42 USC 11431 et seq.).
- (2) Coordination of preparedness and response efforts of LEAs with State, local, tribal, and territorial public health departments, and other relevant agencies to improve coordinated responses among such entities to prevent, prepare for, and respond to coronavirus.
- (3) Providing principals and others school leaders with the resources necessary to address the needs of their individual schools.
- (4) Activities to address the unique needs of low-income children or students, children with disabilities, English learners, racial and ethnic minorities, students experiencing homelessness, and foster care youth, including how outreach and service delivery will meet the needs of each population.

- (5) Developing and implementing procedures and systems to improve the preparedness and response efforts of LEAs.
- (6) Training and professional development for staff of the LEA on sanitation and minimizing the spread of infectious diseases.
- (7) Purchasing supplies to sanitize and clean the facilities of an LEA, including buildings operated by such agency.
- (8) Planning for and coordinating during long-term closures, including for how to provide meals to eligible students, how to provide technology for online learning to all students, how to provide guidance for carrying out requirements under the IDEA (20 USC 1401 et seq.), and how to ensure other educational services can continue to be provided consistent with all Federal, State, and local requirements.
- (9) Purchasing educational technology (including hardware, software, and connectivity) for students who are served by the LEA that aids in regular and substantive educational interaction between students and their classroom instructors, including low-income students and students with disabilities, which may include assistive technology or adaptive equipment.
- (10) Providing mental health services and supports.
- (11) Planning and implementing activities related to summer learning and supplemental afterschool programs, including providing classroom instruction or online learning during the summer months and addressing the needs of low-income students, students with disabilities, English learners, migrant students, students experiencing homelessness, and children in foster care.
- (12) Addressing learning loss among students, including low-income students, children with disabilities, English learners, racial and ethnic minorities, students experiencing homelessness, and children and youth in foster care, of the local educational agency, including by—
 - Administering and using high-quality assessments that are valid and reliable, to accurately assess students' academic progress and assist educators in meeting students' academic needs, including through differentiating instruction.
 - Implementing evidence-based activities to meet the comprehensive needs of students.

- Providing information and assistance to parents and families on how they can effectively support students, including in a distance learning environment.
 - Tracking student attendance and improving student engagement in distance education.
- (13) School facility repairs and improvements to enable operation of schools to reduce risk of virus transmission and exposure to environmental health hazards, and to support student health needs.
- (14) Inspection, testing, maintenance, repair, replacement, and upgrade projects to improve the indoor air quality in school facilities, including mechanical and non-mechanical heating, ventilation, and air conditioning systems, filtering, purification and other air cleaning, fans, control systems, and window and door repair and replacement.
- (15) Developing strategies and implementing public health protocols including, to the greatest extent practicable, policies in line with guidance from the Centers for Disease Control and Prevention for the reopening and operation of school facilities to effectively maintain the health and safety of students, educators, and other staff.
- (16) Other activities that are necessary to maintain the operation of and continuity of services in LEAs and continuing to employ existing staff of the LEA.

Note: For comprehensive information about allowable uses of funds under ESSER and GEER, please see Frequently Asked Questions Elementary and Secondary School Emergency Relief (ESSER) Programs Governor’s Emergency Education Relief (GEER) available at [ESSER-and-GEER-Use-of-Funds-FAQs-December-7-2022-Update.pdf \(ed.gov\)](#), including E-3.d permitting under very limited circumstances services to extend for a reasonable period beyond the end of the obligation and liquidation period.

Note: An LEA that receives ESSER I funds under the CARES Act (Section 18005) must provide equitable services to students and teachers in the same manner as provided under section 1117 of Title I, Part A of the ESEA. ESSER II and ARP ESSER are not subject to the equitable services requirement; rather the CRRSA Act and ARP Act include the separate EANS programs to address the needs of non-public school students and teachers. For more information about the major similarities and differences between ESSER I and ESSER II, see the Fact Sheet for ESSER II, available at https://oese.ed.gov/files/2021/01/Final_ESSERII_Factsheet_1.5.21.pdf

and differences among ESSER I, ESSERII and ARP ESSER available at: https://oese.ed.gov/files/2021/03/FINAL_ARP-ESSER-FACT-SHEET.pdf.

e. *ESF-SEA Funds*

The Outlying Areas may use ESF-SEA funds for any of the following activities listed in section 18003(d) of the CARES Act:

- (1) Any activity authorized by the Elementary and Secondary Education Act of 1965 (ESEA), including the Native Hawaiian Education Act and the Alaska Native Educational Equity, Support, and Assistance Act (20 USC 6301 et seq.), the Individuals with Disabilities Education Act (20 USC 1400 et seq.) (IDEA), the Adult Education and Family Literacy Act (20 USC 1400 et seq.), the Carl D. Perkins Career and Technical Education Act of 2006 (20 USC 2301 et seq.) (the Perkins Act), or subtitle B of title VII of the McKinney-Vento Homeless Assistance Act (McKinney-Vento) (42 USC 11431 et seq.).
- (2) Coordination of preparedness and response efforts of LEAs with State, local, tribal, and territorial public health departments, and other relevant agencies, to improve coordinated responses among such entities to prevent, prepare for, and respond to coronavirus.
- (3) Providing principals and others school leaders with the resources necessary to address the needs of their individual schools.
- (4) Activities to address the unique needs of low-income children or students, children with disabilities, English learners, racial and ethnic minorities, students experiencing homelessness, and foster care youth, including how outreach and service delivery will meet the needs of each population.
- (5) Developing and implementing procedures and systems to improve the preparedness and response efforts of LEAs.
- (6) Training and professional development for staff of the LEA on sanitation and minimizing the spread of infectious diseases.
- (7) Purchasing supplies to sanitize and clean the facilities of a LEA, including buildings operated by such agency.
- (8) Planning for and coordinating during long-term closures, including for how to provide meals to eligible students, how to provide technology for online learning to all students, how to provide

guidance for carrying out requirements under IDEA (20 USC 1401 et seq.) and how to ensure other educational services can continue to be provided consistent with all Federal, State, and local requirements.

- (9) Purchasing educational technology (including hardware, software, and connectivity) for students who are served by the LEA that aids in regular and substantive educational interaction between students and their classroom instructors, including low-income students and students with disabilities, which may include assistive technology or adaptive equipment.
- (10) Providing mental health services and supports.
- (11) Planning and implementing activities related to summer learning and supplemental afterschool programs, including providing classroom instruction or online learning during the summer months and addressing the needs of low-income students, students with disabilities, English learners, migrant students, students experiencing homelessness, and children in foster care.
- (12) Other activities that are necessary to maintain the operation of and continuity of services in LEAs and continuing to employ existing staff of the LEA.

f. *ARP-OA SEA Funds*

The Outlying Areas may use ARP-OA SEA funds for any of the following activities listed in section 2001(e) and (f) of the ARP Act:

- (1) Evidence-based interventions, such as summer learning or summer enrichment, extended day, comprehensive afterschool programs, or extended school year programs, and ensure that such interventions respond to students' academic, social, and emotional needs and address the disproportionate impact of the coronavirus on the student subgroups described in section 1111(b)(2)(B)(xi) of the ESEA (20 USC 6311(b)(2)(B)(xi)), students experiencing homelessness, and children and youth in foster care.
- (2) Any activity authorized by the ESEA.
- (3) Any activity authorized by the IDEA.
- (4) Any activity authorized by the Adult Education and Family Literacy Act (AEFLA).

- (5) Any activity authorized by the Perkins Act.
- (6) Coordination of preparedness and response efforts of LEAs with State, local, tribal, and territorial public health departments, and other relevant agencies, to improve coordinated responses among such entities to prevent, prepare for, and respond to coronavirus.
- (7) Activities to address the unique needs of low-income children or students, children with disabilities, English learners, racial and ethnic minorities, students experiencing homelessness, and foster care youth, including how outreach and service delivery will meet the needs of each population.
- (8) Developing and implementing procedures and systems to improve the preparedness and response efforts of LEAs.
- (9) Training and professional development for staff of the LEA on sanitation and minimizing the spread of infectious diseases.
- (10) Purchasing supplies to sanitize and clean the facilities of an LEA, including buildings operated by such agency.
- (11) Planning for, coordinating, and implementing activities during long-term closures, including providing meals to eligible students, providing technology for online learning to all students, providing guidance for carrying out requirements under the IDEA and ensuring other educational services can continue to be provided consistent with all Federal, State, and local requirements.
- (12) Purchasing educational technology (including hardware, software, and connectivity) for students who are served by the LEA that aids in regular and substantive educational interaction between students and their classroom instructors, including low-income students and children with disabilities, which may include assistive technology or adaptive equipment.
- (13) Providing mental health services and supports, including through the implementation of evidence-based full-service community schools.
- (14) Planning and implementing activities related to summer learning and supplemental afterschool programs, including providing classroom instruction or online learning during the summer months and addressing the needs of low-income students, children with

disabilities, English learners, migrant students, students experiencing homelessness, and children in foster care.

- (15) Addressing the academic impact of lost instructional time among students, including low-income students, children with disabilities, English learners, racial and ethnic minorities, students experiencing homelessness, and children and youth in foster care, of the LEA, including by—
- Administering and using high-quality assessments that are valid and reliable, to accurately assess students' academic progress and assist educators in meeting students' academic needs, including through differentiating instruction;
 - Implementing evidence-based activities to meet the comprehensive needs of students;
 - Providing information and assistance to parents and families on how they can effectively support students, including in a distance learning environment; and
 - Tracking student attendance and improving student engagement in distance education.
- (16) School facility repairs and improvements to enable operation of schools to reduce risk of virus transmission and exposure to environmental health hazards, and to support student health needs.
- (17) Inspection, testing, maintenance, repair, replacement, and upgrade projects to improve the indoor air quality in school facilities, including mechanical and non-mechanical heating, ventilation, and air conditioning systems, filtering, purification and other air cleaning, fans, control systems, and window and door repair and replacement.
- (18) Developing strategies and implementing public health protocols including, to the greatest extent practicable, policies in line with guidance from the CDC for the reopening and operation of school facilities to effectively maintain the health and safety of students, educators, and other staff.
- (19) Other activities that are necessary to maintain the operation of and continuity of services in LEAs and continuing to employ existing staff of the LEA.
- (20) A reasonable and necessary amount for administrative costs and emergency needs, as determined by the SEA, to address issues responding to coronavirus.

B. Allowable Costs/Cost Principles

See Part 4, 84.000 ED Cross-Cutting Section for requirements applicable to Documentation of Employee Time and Effort for ESSER, GEER, and EANS (84.425C, D, R, U, and V).

1. For ESSER I, ESSER II, ARP ESSER, ESF I-SEA, ESF II-SEA, and ARP OA-SEA Funds, auditors should refer to the Cost Principles for States, Local Governments, and Indian Tribes.
2. For GEER I, GEER II, ESF I-Governor, and ESF II-Governor Funds, a Governor (or the mayor of the District of Columbia) has broad discretion for awarding funds under these subprograms to States, local governments and Indian tribes, educational institutions, or nonprofit organizations. In order to determine which requirements, apply, auditors should examine how each respective Governor allocated the funds to subrecipients to determine which cost principles apply for each subrecipient.
3. The requirements in the Uniform Guidance apply to expenditures of ESSER, ESF-SEA, and ARP-OA SEA funds, including the requirements related to documenting personnel expenses in 2 CFR section 200.430(i). This would mean, for example, that an LEA maintains the records it generally maintains for salaries and wages, including for employees in leave status as permitted under CARES Act Section 18003(d)(12), except that an LEA must maintain time distribution records (sometimes called “time and effort” reporting) if an individual employee is splitting their time between activities that may be funded under ESSER or GEER and activities that are not allowable under ESSER or GEER. However, there are very few situations when an employee of an LEA would perform multiple activities that are not allowable under ESSER or GEER, and thus would be required to maintain time distribution records, given that an LEA is authorized to use funds on “activities that are necessary to maintain the operation of and continuity of services in [an LEA] and continuing to employ existing staff of the [LEA]” in order to “prevent, prepare for, and respond to” the COVID-19 pandemic (Section 18003(d)(12)).

CARES Act Section 18003(d)(12) and CRRSA Act Section 315 authorize grantees to continue to pay employees and Section 18002(c)(3) of the CARES Act allows LEAs, SEAs, IHEs, and other subrecipients to use funds to protect education-related jobs; the authority includes paying staff who are on leave because schools are closed due to COVID-19. Accordingly, ESSER and GEER funds may be used for that purpose even in the absence of a policy that specifically addresses these circumstances.

F. Equipment/Real Property Management

Consistent with 2 CFR section 200.311 (real property), section 200.313 (equipment), and section 200.439 (equipment and other capital expenditures), ESF (with the exception of CRRSA EANS: 84.425R & ARP EANS: 84.425V) funds may be used for these purposes.

Specifically, recipients and subrecipients may use ESF funds to purchase equipment. Capital expenditures for general and special purpose equipment purchases are subject to prior approval by ED or the pass-through entity. In addition, with prior approval by the ED or the pass-through entity, recipients and subrecipients may also use ESF funds to purchase real property, perform construction or minor remodeling, and for improvements to land, buildings, or equipment that meet the overall purpose of the ESF program, which is “to prevent, prepare for, and respond to” the COVID-19 pandemic.

If Governors (or the Mayor of the District of Columbia), SEAs, and subrecipients propose to use ESF funds for construction, they must comply with any applicable requirements in 34 CFR section 76.600 and 34 CFR sections 75.600–75.617. Approved construction projects must also comply with all applicable Uniform Guidance requirements, as well as ED’s regulations regarding construction, that may be applicable, at 34 CFR section 76.600.

Please note that recipients and subrecipients may use ESF funds for minor remodeling without triggering the Department’s construction regulations in 34 CFR section 76.600 and 34 CFR sections 75.600–75.617. Minor remodeling means minor alterations in a previously completed building. The term also includes the extension of utility lines, such as water and electricity, from points beyond the confines of the space in which the minor remodeling is undertaken but within the confines of the previously completed building. The term does not include building construction, structural alterations to buildings, building maintenance, or repairs. See 34 CFR Part 77.1(b). For more information on requirements and flexibilities with regard to utilizing ESF funds for construction please see: https://oese.ed.gov/files/2021/06/HVAC_Use-of-funds-F06-17-2021.pdf and <https://oese.ed.gov/files/2021/06/ARP-ESSER-Plan-Office-Hours-6.3.21.pdf>.

Any purchases with ESF funds in this category are subject to applicable inventory control, log maintenance, and disposition requirements consistent with Part 3, Section F, “Equipment/Real Property Management” of the Compliance Supplement.

Governors, SEAs, and subrecipients must receive prior approval for capital expenditures for equipment acquisition or improvements to land, buildings, or equipment.

1. For capital equipment or improvements to land, buildings, or equipment that were purchased with grant funds, the Governor (or mayor of the District of Columbia) or SEA must receive prior approval from ED.
2. For capital equipment or improvements to land, buildings, or equipment that were purchased with grant funds, the Governor or SEA, as the pass-through entity, must provide prior approval to subrecipients.
3. For construction, the pass-through entity must have considered applicable ED construction requirements as part of the pass-through entity’s prior approval process for construction. For example, if an LEA proposed renovating a school building to increase the filters or ventilation to its HVAC system, the pass-through entity must ensure compliance with applicable construction regulations

(such as 34 CFR 75.609 (Safety and Health standards) and 75.616 (Energy Conservation))?

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort (SEA/Governor)

State Maintenance of Effort (MOE) – SEA and Governor
ESSER II, GEER II, EANS, and ARP ESSER

Under section 317 of the CRRSA Act, for FY 2022, a State that receives ESSER II, GEER II, or EANS funds under the CRRSA Act must:

- a. Maintain State support for elementary and secondary education in FY 2022 at least at the proportional level of the State’s support for elementary and secondary education relative to the State’s overall spending, averaged over FYs 2017, 2018, and 2019; and
- b. Maintain State support for higher education in FY 2022 at least at the proportional level of the State’s support for higher education relative to the State’s overall spending, averaged over FYs 2017, 2018, and 2019.

Under section 2004(a) of the ARP Act, a State that receives ARP ESSER funds must meet the above MOE requirement in *each* of FYs 2022 and 2023.

The CRRSA and ARP Acts have two MOE baselines:

- a. Elementary and secondary education baseline, which averages the percentages of total State spending that are used to support elementary and secondary education over the three baseline years (FYs 2017, 2018, and 2019).
- b. Higher education baseline, which averages the percentages of total State spending that are used to support higher education over the three baseline years (FYs 2017, 2018, and 2019).

Under the CRRSA Act: A State demonstrates MOE for FY 2022 by:

- a. Comparing the percentage of total State spending used to support elementary and secondary education in FY 2022 to the baseline percentage; and

- b. Comparing the percentage of total State spending used to support higher education in FY 2022 to the baseline percentage.

Under the ARP Act: A State demonstrates the above comparisons for both FY 2022 and FY 2023 relative to the baseline percentages.

When comparing the FY 2022 or FY 2023 percentages to the baseline percentage, the State, at its discretion, may round the difference to the nearest whole number using standard rounding procedures. See page 5 in August 2022 [updated MOE FAQs](#).

A State may also include Coronavirus Relief Funds (CRF) awarded under the CARES Act and Coronavirus State and Local Fiscal Recovery Funds (SLFRF) awarded under the ARP Act by the Department of the Treasury that are spent on elementary and secondary education or higher education as State support for education when determining maintenance of effort under section 18008 of the CARES Act, section 317 of the CRRSA Act, and section 2004(a) of the ARP Act. See updated Question 3(a) in [August 2022 updated MOE FAQs](#).

Auditors should separately corroborate the amounts reported for State support for elementary and secondary education for FY 2022 and FY 2023 with data representing either actual State expenditure data or data representing final appropriated or allocated amounts. A state may rely on either set of data to meet this requirement. Similarly, auditors should corroborate the amounts reported for state support for higher education for FY 2022 and separately for FY 2023 with data representing either actual State expenditure data or data representing final appropriated or allocated amounts. A State must use data on actual State expenditures to demonstrate overall spending, consistent with the statutory reference to “overall State spending.”

- For more information on how each State complies with the MOE requirements, including which funding sources a State must exclude when determining whether it has maintained effort, see Guidance on Maintenance of Effort Requirements and Waiver Requests under the Elementary and Secondary School Emergency Relief (ESSER) Fund and the Governor’s Emergency Education Relief (GEER) Fund [8.15.22-Update MOE-Chart-with-waiver-FAQs-Rounding-and-Appendices-Updated1.pdf](#).

3. Earmarking - SEA

ESSER

An SEA must allocate at least 90 percent of ESSER funds to LEAs using the statutorily prescribed formula. Under ESSER I and ESSER II, an SEA may, but is not required to, reserve up to 10 percent of its funds for emergency needs as determined by the SEA.

ARP ESSER

For ARP ESSER, under section 2001(f) of the ARP Act, each SEA must reserve: (1) at least 5 percent of ARP ESSER funds for evidence-based interventions that address the academic impact of lost instructional time (i.e., learning loss); (2) at least 1 percent of ARP ESSER funds for evidence-based summer enrichment programs; and (3) at least 1 percent of ARP ESSER funds for evidence-based comprehensive afterschool programs. The interventions that are implemented with the reserved funds must respond to students' social, emotional, mental health, and academic needs and address the disproportionate impact of COVID-19 on students from low-income families, students of color, English learners, children with disabilities, students experiencing homelessness, children and youth in foster care, and migratory students and consistent with States' approved ARP ESSER State plans.

The remainder, if any, of ARP ESSER funds not allocated to LEAs or reserved for mandatory set-asides or administrative costs (up to 3 percent, depending on the amount otherwise reserved) may be used for emergency needs as determined by the SEA to address issues responding to COVID-19.

Allowances for Administrative Costs:

- Under section 18001(e) of the CARES Act and section 313(e) of the CRRSA Act, an SEA may reserve up to half of one percent of its total ESSER I and ESSER II allocations for administrative costs, including both direct and indirect administrative costs. This reservation must come from the portion of funds that the SEA reserves and not the funds that must be allocated to LEAs.

Under section 2001(f)(4) of the ARP Act, an SEA may reserve not more than half of one percent of the State's total ARP ESSER award may be reserved for administrative costs, including both direct and indirect administrative costs. This reservation must come from the portion of funds that the SEA reserves for emergency needs and not the funds that must be allocated to LEAs or that must be reserved for specific purposes (i.e., learning loss, summer learning, and afterschool programming).

- Under section 312(d)(5) of the CRRSA Act, an SEA may reserve up to half of 1 percent of its total allocation or up to \$200,000, whichever is greater, to administer the EANS program. This allowance applies to both the CRRSA EANS and ARP EANS programs.
- Under the GEER Fund, a Governor may charge as an expense to the GEER fund an amount that is reasonable and necessary to effectively administer the program consistent with cost principles in the Uniform Guidance.

ARP-OA SEA

Outlying Area SEAs must reserve (1) not less than 20 percent of their ARP-OA SEA allocation to carry out, directly or through subgrants or contracts, activities to address the academic impact of lost instructional time by supporting the implementation of evidence-based interventions; (2) a portion of their ARP-OA SEA allocation to carry out, directly or through subgrants to LEAs or through contracts, the implementation of evidence-based summer enrichment programs; and (3) a portion of their ARP-OA SEA allocation to carry out, directly or through subgrants to LEAs or through contracts, the implementation of evidence-based comprehensive afterschool programs.

L. Reporting

1. Financial Reporting

Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Annual Reporting – *(SEA/Governor, LEA/subrecipient)*

ESSER, GEER, and EANS grantees must submit an annual performance report (OMB No. 1810-0749 for ESSER; 1810-0748 for GEER; and 1810-0765 for EANS) with data on expenditures, planned expenditures, subrecipients, and uses of funds, including for mandatory reservations. LEAs/subrecipients submit data to the SEA/Governor for the SEA's/Governor's report. The annual performance reports can be found on the [Grantee Help](#) page of ED's ESF Transparency Portal.

ED Annual reports are due each spring for the previous reporting period.

Reporting periods align with State fiscal years. Please refer to the timetables for reporting, found here: [ESF - Help \(ed.gov\)](#), to determine which report will be available for compliance testing. It is not necessary for auditors to test that these reports were submitted in a timely manner because ED has the ability to verify timeliness.

Key Line Items:

1. ESSER
 - a. Line 3.b1 LEA expenditures by ESSER Subgrant fund, expenditure category, and object code
 - b. Line 3.b10 Number of specific positions supported with ESSER Funds
 - c. Line 3.c Allocation of ESSER funds to schools and criteria used to allocate funds to schools

- d. Line 5.a Full Time Equivalent positions
2. GEER
- a. Lines 2.c and 2.d Reporting on administrative and non-administrative expenditures by Governors
 - b. Line 9.a Reporting on LEA expenditures by GEER Subgrant fund and expenditure category
 - c. Lines 10.a and 11.a Reporting on IHE expenditures by GEER Subgrant fund and expenditure category
 - d. Lines 12.a and 13.a Reporting on Other education-related entity expenditures by GEER Subgrant fund and expenditure category
3. EANS
- a. Line 3a.-6a. Reporting on CRRSA EANS Funds Returned to the Governor
 - b. Line 13 Reporting on SEA Obligations (including reimbursements) by allowable activity for CRRSA EANS
 - c. Line 15 Reporting on Non-public schools receiving services or assistance under CRRSA EANS
4. **Special Reporting for Federal Funding Accountability and Transparency Act (SEA/Governor)**

See Part 3.L for audit guidance.

Grantees must submit monthly FFATA data through FSRs.gov. This monthly subaward data reported by States, along with data on awards to States and expenditures by States, are pulled into the [ESF Transparency Portal](#).

N. Special Tests and Provisions

1. Wage Rate Requirements

Recipients and subrecipients that use ESF funds for minor remodeling, renovation or construction contracts that are over \$2,000 and use laborers and mechanics must meet Davis-Bacon prevailing wage requirements. For information about the prevailing wages in the applicable region, see the Department of Labor (DOL) regional office: <https://www.dol.gov/agencies/whd/government-contracts/construction/regions>.

See Part 4, 20.001 Wage Rate Requirements Cross-Cutting Section for a general description of the compliance requirements, the related audit objectives, and suggested audit procedures.

2. Participation of Private School Children

See Part 4, 84.000 ED Cross-Cutting Section for requirements applicable to the participation of private school students under GEER I and ESSER I, as well as ESF-SEA, ESF-Governor, and ARP-OA SEA (84.425 A, C, D, H, and X).

3. Identifying Non-Public Schools under ARP EANS that Enroll a Significant Percentage of Students from Low-Income Families and are Most Impacted by the COVID-19 Emergency

Compliance Requirements Under section 2002(a) of the ARP Act, services or assistance to nonpublic schools under the ARP EANS program are limited to “non-public schools that enroll a significant percentage of [students from low-income families] and are most impacted by the [COVID–19] emergency.” Related to these requirements, a Governor, in his or her application for ARP EANS funds, was required to identify the significant poverty percentage and factors of COVID-19 impact it would use, after approval by the Secretary, to determine which non-public schools are eligible to receive services or assistance. Also, SEAs were advised. Also, SEAs were advised (see this [August 2022 communication](#)) that “proportionality” is a methodology and not an allowable data source to determine non-public school eligibility under ARP EANS. Data used to determine the eligibility of non-public schools must be actual data that maps to students.

Audit Objectives Determine whether SEAs have implemented the significant poverty percentage and factors of COVID-19 impact in the Governor’s approved application.

Suggested Audit Procedures

- a. Verify that the SEA implemented the relevant criteria to determine whether a non-public school enrolled a significant percentage of students from low-income families and was most impacted by COVID-19.

Note on *Applicability to Proprietary Institutions of Higher Education*: One subprogram, Assistance Listing 84.425Q, was awarded only to Proprietary Institutions of Higher Education and therefore is not included in this Compliance Supplement, which only applies to Public and Private Nonprofit Institutions of Higher Education. Proprietary Institutions, however, have a separate auditing requirement and may be required to submit an audit to ED using the Audit Guide developed by the ED Office of the Inspector General (OIG). Please see more information here: <https://www2.ed.gov/about/offices/list/oig/nonfed/proprietary.html>.

I. PROGRAM OBJECTIVES

The objective of the HEERF program is to use HEERF grant funds to “prevent, prepare for, and respond to coronavirus” through grants to eligible institutions. Each subprogram (denoted by separate Assistance Listing alpha) has specific funding requirements, as described below.

II. PROGRAM PROCEDURES

Overview

Coronavirus Aid, Relief, and Economic Security Act (CARES Act) – HEERF I

The CARES Act appropriated approximately \$14 billion to the Office of Postsecondary Education for HEERF (referred to herein as HEERF I subprograms or funding).

HEERF, I funding was distributed via several different subprograms, which were continued for HEERF II and HEERF III. First, 90 percent (\$12.56 billion) under Section 18004(a)(1) of the CARES Act was distributed to institutions using a formula based on student enrollment, in which at least 50 percent must be reserved to provide students with emergency financial aid grants to help cover expenses related to the disruption of campus operations due to coronavirus (“Student Aid;” Assistance Listing 84.425E) and the remainder of which may be used to cover any costs associated with significant changes to the delivery of instruction due to the coronavirus (“Institutional Aid;” Assistance Listing 84.425F). A total of 7.5 percent (\$1.05 billion) was distributed under Section 18004(a)(2) of the CARES Act for grants for Historically Black Colleges and Universities (HBCUs), Tribally Controlled Colleges and Universities (TCCUs), and other Minority Serving Institutions (MSIs) as well as other institutions eligible for the Strengthening Institutions Program (SIP) under parts A and B of title III, parts A and B of title V, and Subpart 4 of Part A of title VII of the Higher Education Act of 1965, as amended (HEA), to address needs directly related to the coronavirus (Assistance Listings 84.425J, 84.425K, 84.425L, and 84.425M). Finally, a total of 2.5 percent (\$349 million) was distributed under Section 18004(a)(3) of the CARES Act for additional funds for institutions under Part B of title VII of the HEA, through the Fund for the Improvement of Postsecondary Education (FIPSE), to prioritize institutions that ED has determined have the greatest unmet needs. ED distributed these funds under a formula grant for institutions that received less than \$500,000 under other parts of Section 18004 (Assistance Listing 84.425N) and under a competitive grant (Institutional Resilience and Expanded Postsecondary Opportunity (IREPO) Grant, Assistance Listing 84.425P).

Coronavirus Response and Relief Supplemental Appropriations Act (CRRSAA) – HEERF II

The CRRSAA provided an additional \$22.7 billion for institutions through the HEERF (referred to herein as HEERF II subprograms or funding). Of this amount, over \$20 billion was available for supplements and new formula grants to assist public and private nonprofit colleges and universities in preparing for, preventing, and responding to coronavirus. Funding was appropriated for the existing (a)(1), (a)(2) and (a)(3) subprograms previously authorized under the CARES Act, with some changes.

Allocations to institutions under Section 314(a)(1) of CRRSAA (the analogous provision of Section 18004(a)(1) of the CARES Act) were based on a formula that includes the relative shares of Federal Pell Grant recipients, the relative shares of non-Pell Grant recipients, and the relative shares of Federal Pell and non-Pell Grant recipients exclusively enrolled in distance education prior to the coronavirus emergency.

The CRRSAA provided a minimum amount of funding that each institution must devote towards financial aid grants to students. In addition, funds allocated for students enrolled exclusively in distance education may be used only for financial aid grants to students.

For CRRSAA (a)(3) funds, ED created the Supplemental Assistance to Institutions of Higher Education (SAIHE) subprogram (Assistance Listing 84.425S) with seven categories (absolute priorities) of funding specified in a notice inviting applications and described in the CRRSAA (a)(3) SAIHE Certification and Agreement. Generally, institutions that received grants under the SAIHE subprogram must use funds for either the allowable institutional uses or making additional emergency financial aid grants to students, as specified in the CRRSAA (a)(3) SAIHE Certification and Agreement.

American Rescue Plan (ARP) – HEERF III

The ARP provided an additional \$39.6 billion for institutions through the HEERF (referred to herein as HEERF III subprograms or funding) with funding appropriated through existing subprograms previously authorized under the CRRSAA. The ARP, with some changes, was a continuation of the CRRSAA (a)(1), (a)(2), and (a)(3) subprograms.

The ARP established two new required uses of HEERF III institutional grant funds for public and private nonprofit institutions in which a portion of funds must be used to: (a) implement evidence-based practices to monitor and suppress coronavirus in accordance with public health guidelines; and (b) conduct direct outreach to financial aid applicants about the opportunity to receive a financial aid adjustment due to the recent unemployment of a family member or independent student, or other circumstances, described in section 479A of the HEA.

Source of Governing Requirements

The main sources of governing requirements are the CARES Act, Pub. L. No. 116-136 (March 27, 2020); the CRRSAA, Pub. L. No. 116-260 (December 27, 2020); and the ARP, Pub. L. No. 117-2 (March 11, 2021).

In addition to the required [SF-424 form](#), [SF-424 form](#), a completed certification and agreement was required as part of the application used to award HEERF I funds under each Assistance Listing alpha. HEERF I grantees who received Institutional and/or Student Aid funds received HEERF II grant awards automatically with a supplemental agreement attached. Eligible institutions that did not receive HEERF I Institutional and/or Student Aid funds had to submit a certification and agreement as part of their applications for HEERF II funds. Similarly, HEERF II grantees who received Institutional and/or Student Aid funds received HEERF III grant awards automatically with a supplemental agreement attached. Eligible institutions that did not receive HEERF II Institutional and/or Student Aid funds had to submit a certification and agreement as part of their applications for HEERF III funds.

The certification and agreements and supplemental agreements help form the basis of the governing requirements for these subprograms:

1. Student Aid Fund (Assistance Listing 84.425E)
 - a. [*HEERF I – Agreement Certification and Agreement*](#)
 - b. [*HEERF II – \(a\)\(1\) Student Aid Portion Supplemental Agreement Supplemental Agreement*](#)
 - c. [*HEERF II – \(a\)\(1\) Student Aid Portion Certification and Agreement \(Gold C&A\)*](#)
 - d. [*HEERF III – \(a\)\(1\) Student Aid Portion Supplemental Agreement*](#)
 - e. [*HEERF III – \(a\)\(1\) Student Aid Portion Certification and Agreement \(a\)\(1\) Student Aid Portion Certification and Agreement*](#)
2. Institutional Aid Fund (Assistance Listing 84.425F)
 - a. [*HEERF I – \(a\)\(1\) Institutional Portion Certification and Agreement*](#)
 - b. [*HEERF II – \(a\)\(1\) Institutional Portion Supplemental Agreement*](#)
 - c. [*HEERF II – \(a\)\(1\) Institutional Portion Certification and Agreement \(Blue C&A\)*](#)
 - d. [*HEERF III – \(a\)\(1\) Institutional Portion Supplemental Agreement*](#)
 - e. [*HEERF III – \(a\)\(1\) Institutional Portion Certification and Agreement*](#)
3. (a)(2) Programs (Assistance Listings 84.425J, 84.425K, 84.425L, 84.425M)
 - a. [*HEERF I – \(a\)\(2\) Programs Certification and Agreement*](#)
 - b. [*HEERF II – \(a\)\(2\) Programs Supplemental Agreement*](#)

 - c. [*HEERF III – \(a\)\(3\) SSARP Certification and Agreement*](#)

Furthermore, the regulations in the Education Department General Administrative Regulations (EDGAR) 34 CFR parts 75, 77, 81, 82, 84, 86, 97, 98, and 99; the OMB Guidelines to Agencies on Governmentwide Debarment and Suspension (non-procurement) in 2 CFR Part 180, as adopted and amended as regulations of ED in 2 CFR Part 3485; and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR Part 200, as adopted and amended as regulations of ED in 2 CFR Part 3474 (Uniform Guidance) also apply.

Availability of Other Program Information

Rulemaking for Student Eligibility

On May 14, 2021, ED [published its Final Rule \(FR\)](#) regarding eligibility to receive emergency financial aid grants to students under HEERF. It was effective the same day. The FR constitutes ED's binding final rule regarding student eligibility for HEERF assistance and amends ED's position to allow any individual who is or was enrolled (as defined in 34 CFR 668.2) at an eligible institution (as defined in 34 CFR 600.2) on or after March 13, 2020, the date of declaration of the national emergency concerning the novel coronavirus disease, to receive HEERF assistance.

Frequently Asked Questions (FAQs) and Other Guidance

Several documents posted on ED's [HEERF I website](#), [HEERF II website](#), and [HEERF III website](#) contain information pertinent to the compliance requirements described in this compliance supplement. ED strongly encourages auditors to regularly check the HEERF websites for updated FAQs and other pertinent guidance and reporting information. Earlier-released documents listed may also be applicable to later subprograms. The information below is current as of October 25, 2022:

FAQs

1. [ARP HEERF III FAQs](#) (May 11, 2021, and updated October 27, 2022) (this is the most comprehensive set of FAQs for the HEERF grant program)

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this Federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the Federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	Y	N	Y	N	N

A. Activities Allowed or Unallowed

Institutions must demonstrate that costs incurred are allowable under the relevant statutory provisions and consistent with the purpose of the ESF “to prevent, prepare for, and respond to coronavirus.” In general, the CARES Act authorized broad uses of HEERF funds, with specific standards for the different subprograms described below.

The CRRSAA expanded the allowable uses for supplemental awards and new awards made under Section 314(a)(1) of the CRRSAA. The expanded use of funds authority also applies to unexpended HEERF I funds as of December 27, 2020 (the date of enactment of the CRRSAA).

The ARP is largely a continuation of the CRRSAA subprograms but added two new required uses of HEERF III institutional portion grant funds for public and private nonprofit institutions and eliminated the institutional use of funds “to carry out student support activities authorized by the HEA that address needs related to coronavirus.”

Auditors are strongly encouraged to review the FAQ documents and guidance materials which provide specific examples that help interpret these statutory standards.

1. *Activities Allowed*

a. *Emergency Financial Aid Grants to Students (Student Aid Portion)*

For the (a)(1) Student Aid Portion (Assistance Listing 84.425E), disbursements made under the Student Aid Portion are required to be made directly to students. ED’s [final rule](#) (Eligibility to Receive Emergency Financial Aid Grants to Students under the Higher Education Emergency Relief Programs, May 14, 2021) on student eligibility for HEERF states that all students who are or were enrolled in an institution of higher education on or after the date of the declaration of the national emergency due to the coronavirus (March 13, 2020) are eligible for emergency financial aid grants from the HEERF, regardless of whether they completed a FAFSA or are eligible for Title IV.

HEERF I Student Aid Portion funds expended prior to December 27, 2020: These funds must be paid to the student “for expenses related to the disruption of campus operations due to coronavirus (including eligible expenses under a student’s cost of attendance, such as food, housing, course materials, technology, health care, and child-care)” (CARES Act Section 18004(c)).

HEERF II, and HEERF III, and HEERF I fund liquidated (spent) on or after December 27, 2020: These funds must be used to provide financial aid grants to students (including students exclusively enrolled in distance education), which may be used for “any component of the student’s cost of attendance or for emergency costs that arise due to coronavirus, such as tuition, food, housing, healthcare (including mental health care), or child care” (CRRSAA section 314(c)(3); ARP section 2003).

The CRRSAA and ARP requires that schools prioritize students with exceptional need, such as students who receive Pell Grants. However, students do not need to be Pell recipients or students who are eligible for Pell grants in order to receive a financial aid grant.

Beyond Pell eligibility, other types of exceptional need could include students who may be eligible for other Federal or State need-based aid or have faced significant unexpected expenses either for themselves or that would affect their financial circumstances, such as the loss of employment, reduced income, or food or housing insecurity. In addition, the CRRSAA and ARP explicitly states that emergency financial aid grants to students may be provided to students exclusively enrolled in distance education provided they have exceptional need ([HEERF III FAQs](#) questions 11 and 12).

Institutions may not condition the receipt of financial aid grants to students on continued or future enrollment in the institution and may not require a student to consent to the application of the financial aid grants to satisfy a student’s outstanding account balance as a condition of receipt of or eligibility for the financial aid grant. Institutions that add preconditions to receiving a financial aid grant that thwart this requirement may be subjected to oversight and corrective action.

Institutions may use funds under the Institutional Portion Aid Fund to provide additional emergency financial aid grants to students. If an institution chooses to do so, then those funds are subject to the requirements described in the institution’s applicable Student Aid Portion (ALN 84.425E) Certification and Agreement and/or Supplemental Agreement and the *Emergency Financial Aid Grants to Students (Student Aid Portion)* section above.

As it relates to expenditures under the HEERF II and HEERF III (a)(1) Student Aid Portion or for additional emergency financial aid grants made using other HEERF grant funds, ED required that (1) the institution had a documented plan to distribute funds to students, (2) that institutions prioritized grants to students with exceptional need, (3) that the institution did not place any restrictions on the expenditure of those funds beyond what is in the statute, above, (4) the institution expended the entirety of the Student Aid Portion grant on Emergency financial aid grants to students, and (5) that the institution did not reimburse itself for any costs or expenses previously issued to students.

b. *Institutional Costs (Institutional Aid, (a)(2), and (a)(3) Funds)*

HEERF I Institutional Aid funds liquidated (spent) prior to December 27, 2020: For the (a)(1) Institutional Portion (Assistance Listing 84.425F), allowable expenditures incurred and liquidated prior to December 27, 2020, must have been “to cover any costs associated with significant changes to the delivery of instruction due to the coronavirus, so long as such costs do not include payment to contractors for the provision of pre-enrollment recruitment activities; endowments; or capital outlays associated with facilities related to athletics, sectarian instruction, or religious worship” (CARES Act Section 18004(c)).

Other allowable expenditures under the HEERF I Institutional Aid Fund included additional emergency financial grants made to students (in accordance with the requirements of the Student Aid Fund). Additionally, institutions also could have reimbursed themselves for refunds previously made to students on or after March 13, 2020, if those refunds were necessitated by significant changes to the delivery of instruction, including interruptions in instruction, due to the coronavirus. Please see questions 31 and 44 from the HEERF I CARES Act Rollup FAQs for more information. Generally, lost revenue was not a permissible expenditure under the HEERF I Institutional Aid Fund.

HEERF II, HEERF III, and HEERF I fund, liquidated (spent) on or after December 27, 2020. Beginning December 27, 2020, any unused HEERF I Institutional funds, new HEERF II Institutional funds, HEERF III Institutional Aid Funds may be used to defray expenses associated with coronavirus (including lost revenue, reimbursement for expenses already incurred, technology costs associated with a transition to distance education, faculty and staff trainings, and payroll) and to make additional financial grants to students (CRRSAA Section 314(c) (1-3); ARP Section 2003). HEERF I and HEERF II funds may also have been used to carry out student support activities authorized by the HEA that address needs related to coronavirus. The ARP eliminated this use of funds for HEERF III.

The following table describes this distinction:

Institutional Portion	Date	Uses of funds are specified in...
CARES Act HEERF I	For allowable expenditures incurred on or after March 13, 2020, and liquidated (spent) prior to December 27, 2020.	CARES Act section 18004(c)
CARES Act HEERF I	For allowable expenditures incurred on or after March 13, 2020, and liquidated (spent) on or after December 27, 2020.	CRRSAA section 314(c) (1-3)
CRRSAA HEERF II	For allowable expenditures incurred on or after March 13, 2020.	CRRSAA section 314(c) (1- 3)
ARP HEERF III	For allowable expenditures incurred on or after March 13, 2020.	CRRSAA section 314(c)(1), (c)(3), and ARP section 2003(5)

Required uses of ARP HEERF III Institutional Portion grant funds: ARP created two new requirements that a portion of HEERF III institutional funds must be used (a) to implement evidence-based practices to monitor and suppress coronavirus in accordance with public health guidelines; and (b) conduct direct outreach to financial aid applicants about the opportunity to receive a financial aid adjustment due to the recent unemployment of a family member or independent student, or other circumstances, described in section 479A of the HEA (see [HEERF III FAQs](#) questions 21 and 28–35).

HEERF I (a)(2) and (a)(3) subprograms: For the HEERF I (a)(2) subprograms, (Assistance Listings 84.425J, 84.425K, 84.425L, and 84.425M) and HEERF I (a)(3) FIPSE Formula Grant (Assistance Listing 84.425N), funds “may be used to defray expenses, including lost revenue, reimbursement for expenses already incurred, technology costs associated with a transition to distance education, faculty and staff trainings, payroll incurred by institutions and for grants to students for any component of the student’s cost of attendance (as defined under section 472 of the HEA), including food, housing, course materials, technology, health care, and child care” (CARES Act Sections 18004(a)(2) and 18004(a)(3)).

HEERF II and HEERF III (a)(2) and (a)(3) subprograms: New HEERF II (a)(2) and (a)(3) funds and new HEERF III (a)(2) and (a)(3) funds (under Assistance Listings 84.425J, 84.425K, 84.425L, 84.425M, 84.425S, and 84.425T) may also be used under the allowable uses of funds detailed in CRRSAA Section 314(c) above, unless otherwise specified in the Certification and Agreement.

Excise Tax for CRRSAA HEERF II: Institutions that were required to pay an excise tax for tax year 2019 based on investment income under section 3968 of the Internal Revenue Code may only use their HEERF II funds for financial aid grants to students, or for sanitation, personal protective equipment, or other general health and safety expenses related to the coronavirus emergency, and such institutions' allocations are reduced by 50 percent, unless a waiver has been obtained from ED (CRRSAA Section 314(d)(6)). The ARP eliminated this requirement for HEERF III funds.

Construction and Real Property Expenditures under HEERF (a)(2) subprograms (Assistance Listings 84.425J, 84.425K, 84.425L, and 84.425M): Under the Consolidated Appropriations Act, 2022 (Pub. L. No. 117-103), as of March 15, 2022, HEERF (a)(2) program subgrantees may expend their HEERF (a)(2) grant funds on construction and real property for projects that are connected to the purpose of the ESF program to “prevent, prepare for, and respond to coronavirus.” Any HEERF (a)(2) grantees taking advantage of this flexibility will have to receive approval from ED for their specific construction and real property projects supported by HEERF (a)(2) grant funds. HEERF (a)(2) grantees cannot use their (a)(2) grant funds on construction or real property associated with facilities related to athletics, sectarian instruction, or religious worship.

Please note that (a)(2) subprogram grantees may use HEERF grant funds for minor remodeling without triggering the requirements to follow [34 CFR sections 75.600–75.617](#) and receiving approval from ED. Minor remodeling means minor alterations in a previously completed building. The term also includes the extension of utility lines, such as water and electricity, from points beyond the confines of the space in which the minor remodeling is undertaken but within the confines of the previously completed building. The term does not include building construction, structural alterations to buildings, building maintenance, or repairs. See [34 CFR Part 77.1\(b\)](#) and [HEERF III FAQ](#) questions 23 and 24.

- c. *IREPO Subprogram:* Under the IREPO subprogram (Assistance Listing 84.425P), the use of funds is specified in the IREPO NIA and the approved application for grant funds the applicant submitted as part of the program.
- d. *SAIHE Subprogram:* Under the SAIHE subprogram (Assistance Listing 84.425S), depending on the absolute priority an institution applied for and received SAIHE grant funds under, the uses and limitations for that institutions' SAIHE funds are specified in the [\(a\)\(3\) SAIHE Certification and Agreement](#).

- e. *SSARP Subprogram:* Under the SSARP subprogram (Assistance Listing 84.425T), depending on the absolute priority an institution applied for and received SSARP grant funds under, the uses and limitations for that institutions' SSARP funds are specified in the [\(a\)\(3\) SSARP Certification and Agreement](#).
- f. *Grantees on Route or Stop Pay Status:* Additionally, some institutions' grants may have been placed on Route Pay or Stop Pay Status as indicated by a notification the grantee would have received from ED. This requires ED approval of a spending plan prior to the grantee drawing down funds or the submission of single requests with documentation. Auditors should ensure that in these circumstances that the grantee expended their HEERF grant funds consistent with the ED-approved spending plan or required documentation for single requests for funds.

B. Allowable Costs/Cost Principles

The Uniform Guidance Cost Principles described in 2 CFR Part 200, Subpart E, apply to the HEERF subprogram. As described earlier, for the HEERF subprograms covered in this section, institutions generally have broad uses of funds. Some items of cost in Subpart E of the Uniform Guidance require prior approval under [2 CFR section 200.407](#) by ED. However, in its [HEERF II FAQs](#) published on January 14, 2021, and [HEERF III FAQs](#) published on May 11, 2021, ED waived prior approval for certain items of cost (as described in questions 20 and 45, respectively).

1. HEERF grant funds must not be used for:
 - a. funding contractors for the provision of pre-enrollment recruitment activities;
 - b. marketing or recruitment (see [HEERF III FAQs](#) question 27 for information on reengagement activities);
 - c. endowments;
 - d. capital outlays associated with facilities related to athletics, sectarian instruction, or religious worship;
 - e. senior administrator or executive salaries, benefits, bonuses, contracts, incentives, stock buybacks, shareholder dividends, capital distributions, and stock options, or any other cash or other benefit for a senior administrator or executive;
 - f. religious worship, instruction, or proselytization or equipment or supplies to be used for religious worship, instruction, or proselytization; or

- g. construction or purchase of real property, excluding HEERF (a)(2) (*Assistance Listings 84.425J, 84.425K, 84.425L, and 84.425M*) grantees*.

Please see also [HEERF III FAQs](#) question 22 for more information.

*With the exception of HEERF (a)(2) grantees using their (a)(2) grant funds that receive prior approval from ED, grantees are prohibited from using HEERF funding for the acquisition of real property or construction under [34 CFR section 75.533](#). This includes using HEERF grant funds on capital projects, including deferred maintenance and capital improvement.

However, this general prohibition on construction and acquisition of real property does not extend to activities that meet the definition of “minor remodeling” under [34 CFR section 77.1](#). Minor remodeling means minor alterations in a previously completed building, for purposes associated with the coronavirus. The term also includes the extension of utility lines, such as water and electricity, from points beyond the confines of the space in which the minor remodeling is undertaken but within the confines of the previously completed building. The term does not include permanent building construction, structural alterations to buildings, building maintenance, or repairs (see also [HEERF III FAQs](#) questions 23 and 24).

Reasonable direct administrative costs and indirect costs at an institution’s approved negotiated indirect cost rate may be charged against Assistance Listing 84.425F (the Institutional portion). An institution may not apply an indirect cost rate to its estimated amount of lost revenue.

No administrative costs and no indirect costs are allowed to be charged against Assistance Listing 84.425E (the Student Aid Portion), as CARES Act Section 18004(c), CRRSAA Section 314 (c)(3), and ARP 2003 require that these funds be used to provide emergency financial aid grants to students. All administrative costs must be reasonable and necessary and conform to Cost Principles described in 2 CFR Part 200 Subpart E of the Uniform Guidance (see [HEERF II FAQs](#) Question 18 and [HEERF III FAQs](#) questions 43 and 44).

C. Cash Management

For CRRSAA HEERF II and ARP HEERF III, the Certification and Agreement and/or Supplemental Agreement indicate that Student Aid (ALN 84.425E) should be disbursed within 15 calendar days of the drawdown from ED’s grant management system (G5), while Institutional Aid Portion, (a)(2), and (a)(3) funds (all other ALNs) should be disbursed within 3 calendar days of the drawdown from G5.

For lost revenue, the “obligation” occurs on the date the institution completes its estimate of its amount of lost revenue after the estimation period.

G. Matching, Level of Effort, Earmarking**1. Matching**

Not Applicable

2. Level of Effort

Not Applicable

3. Earmarking

Institutions must use no less than 50 percent of funds received under Section 18004(a)(1) of the CARES Act to provide emergency financial aid grants to students for expenses related to the disruption of campus operations due to coronavirus. Conversely, institutions may use up to 50 percent of the funds they receive under Section 18004(a)(1) to “cover any costs associated with significant changes to the delivery of instruction due to the coronavirus so long as such costs do not include payment to contractors for the provision of pre-enrollment recruitment activities, including marketing and advertising; endowments; or capital outlays associated with facilities related to athletics, sectarian instruction, or religious worship.” See

<https://www2.ed.gov/about/offices/list/ope/heerfInstitutionalcertificationagreement42020v2a.pdf>.

Section 314(d)(5) of the CRRSAA requires institutions to provide at least the same amount of funding in financial aid grants to students as was required to be provided under its original Student Aid HEERF I allocation amount. The minimum amount of CRRSAA Section 314(a)(1) funding that each institution must devote towards financial aid grants to students is represented in the “Student Aid” (Assistance Listing 84.425E) of their supplement of new Student Aid award and included in the HEERF II Allocation Table.

Additionally, an institution that utilizes the expanded use of funds authority under the CRRSAA for its unspent HEERF I funds must ensure at least 50 percent of the funds it received under CARES Act section 18004(a)(1) (generally, its HEERF I Student Aid award) is used for financial aid grants to students.

Under ARP, the amount of funds that a public and private nonprofit institution must devote to financial aid grants to students is the full amount allocated under the Student Aid (84.425E) subprogram of HEERF III.

The division of the (a)(1) funds into the Student Aid and Institutional Aid was made by ED. Each were given as separate grant awards, the Student Aid under Assistance Listing 84.425E and the Institutional Aid under Assistance Listing 84.425F.

The order of incurring costs which will be attributed to the Student Aid and Institutional Aid is not relevant to the earmarking requirement but, rather, the relationships between these two portions must be met and measured by the end of the period of performance. Therefore, testing this requirement is only applicable at the end of the period of performance as defined below.

ARP created two new requirements that a portion of HEERF III institutional funds must be used (a) to implement evidence-based practices to monitor and suppress coronavirus in accordance with public health guidelines; and (b) conduct direct outreach to financial aid applicants about the opportunity to receive a financial aid adjustment due to the recent unemployment of a family member or independent student, or other circumstances, described in section 479A of the HEA. As noted in Question 35 of the ARP HEERF III ARP FAQs, institutions must document how the amount of the HEERF grant spent on these two required activities was reasonable and necessary given the unique needs and circumstances of the institution (see HEERF III FAQs questions 21 and 28–35).

Under the SAIHE subprogram (Assistance Listing 84.425S), depending on the absolute priority an institution applied for and received SAIHE grant funds under, the uses and limitations for that institutions' SAIHE funds are specified in the (a)(3) SAIHE Certification and Agreement.

Under the SSARP subprogram (Assistance Listing 84.425T), depending on the absolute priority an institution applied for and received SSARP grant funds under, the uses and limitations for that institutions' SSARP funds are specified in the (a)(3) SSARP Certification and Agreement.

H. Period of Performance

Period of Performance: In the CARES Act, CRRSAA, and ARP Certification and Agreements, all institutions were given one calendar year (12 months) from the date of award in their HEERF Grant Award Notifications (GAN) to complete the performance of their HEERF grants.

Institutions generally must expend their HEERF grant funds within one year from the date when ED processed the most recent obligation of funds for each specific grant. Thus, institutions that received a supplemental award under ARP have one year to spend all remaining HEERF I, HEERF II, and new HEERF III funds for each grant from the date their HEERF III supplemental award is made. The specific period of performance will be indicated in Box 6 of the institution's most recent GAN. (See [HEERF III FAQs](#) Question 39.)

Note: The performance period was extended to June 30, 2023, as of April 24, 2022, for all HEERF grant awards in an open status (grant awards that had not entered the closeout phase and had a balance of \$1,000 or more).

Pre-award Costs: For CARES Act HEERF I awards, institutions were allowed to incur pre-award costs consistent with [2 CFR section 200.458](#) and [34 CFR section 75.263](#) on or after March 13, 2020, the date of the declaration of the national emergency due to the coronavirus, to the date of their HEERF grant award for their (a)(1) Institutional Portion, (a)(2), and (a)(3) funds as long as those expenditures would have been allowable if incurred after the date of the HEERF grant award.

For the (a)(1) Student Aid, institutions were only able to refund themselves for institutionally-funded emergency grants to students that were made (1) for authorized expenses related to the disruption of campus operations due to coronavirus as set forth in Section 18004(c) of the CARES Act; (2) to students eligible to receive emergency financial aid grants under the CARES Act; and (3) on or after March 13, 2020, the date of the declaration of the national emergency due to the coronavirus.

For the HEERF II and HEERF III awards, funds may be used for all costs incurred on or after March 13, 2020.

I. Procurement and Suspension and Debarment

For those procurements supported by HEERF grant funds, auditors should determine if institutions sufficiently documented rationales and determinations in making any sole-source awards during the time of national emergency due to the coronavirus. For HEERF (a)(2) grantees using funds pursuant to an approved construction, renovation, or real property project under Assistance Listings 84.425J, 84.425K, 84.425L, or 84.425M, citing the national emergency due to the coronavirus as a rationale for sole sourcing under the public exigency exception in 2 CFR section 200.320(c)(3) is generally not permitted given the national emergency was first declared in March 2020.

L. Reporting

There are three components to reporting for HEERF: 1) public reporting on the (a)(1) Student Aid; 2) public reporting on the (a)(1) Institutional Portion (a)(2) and (a)(3) subprograms (Quarterly Reporting Form), as applicable; and 3) the annual report.

The CARES Act 18004(e) and the CRRSAA 314(e) requires an institution receiving funds under HEERF I and HEERF II to submit a report to the secretary, at such time in such a manner as the secretary may require. While ARP does not explicitly identify procedures by which institutions must report on their uses of HEERF grant funds, ED exercises this reporting authority under 2 CFR section 200.328 and 2 CFR section 200.329.

Please see the [HEERF Reporting web page](#) for the latest information and guidance for annual and quarterly HEERF reporting.

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Title of Report: HEERF I, II, & III Annual Performance Report Form

PRA Number: 1840-0850

Reporting Cycle: ED collected an annual report for HEERF grantees in March 2023 covering calendar year 2022 expenditures. Additional information and resources regarding this annual report on use of HEERF I CARES Act funds, HEERF II CRRSAA funds, and HEERF III ARP funds is available via the [ESF portal](#).

Authoritative Requirement: 34 CFR 75.720(b)

Blank Copy of the Report: [Data Elements Here](#).

Report Instructions: [User Guide Here](#).

Key Line Items:

1. Question 5: Institutions were required to prioritize exceptional need in awarding emergency financial aid grants to students. Documentation must show methodology for distributing aid that prioritizes exceptional need.

Question 9b, row 13: “Implementing evidence-based practices to monitor and suppress coronavirus in accordance with public health guidelines” and row 14: “Conducting direct outreach to financial aid applicants.” Spending under these categories indicates whether an institution has spent funds under a required use of funds established under the ARP. If an institution indicates zero-dollar amount spending for either or both categories, examine earlier annual reports to determine the institution had spending at some point on these two funding categories consistent with ARP FAQ [Question 21](#).

Title of Report: Quarterly Budget and Expenditure Reporting for all HEERF I, II, and III grant funds

PRA Number: 1840-0849

Reporting Cycle: On June 17, 2022, ED [announced](#) an updated format for the HEERF Quarterly Report effective for Q2 2022, report to be posted July 10, 2022. The quarterly reporting requirements involve publicly posting completed forms conspicuously on the institution’s website.

Authoritative Requirement:**Blank Copy of the Report:** [Report forms here.](#)**Report Instructions:** [Question 36](#) on the ARP FAQs and [Reporting Tips here.](#)*Key Line Items:*

1. Auditors should determine if an institution was both timely and accurate in publicly posting their required quarterly report(s) and sample specific line items in these quarterly public reports and reconcile the publicly reported amounts with underlying documentation to ensure accuracy. ED understands that this information may be unique and challenging to audit, particularly because auditors are asked to verify information posted on a webpage which may not be accessible during audit fieldwork. For these public reporting requirements, auditors may will accept as evidence of compliance, contemporarily produced emails, webmaster logs, or other relevant documentation establishing a good-faith indication that the institution posted the required information at approximately the timelines and using the specific reporting templates described in [Question 36](#) on the ARP FAQs.

Not Applicable

DEPARTMENT OF EDUCATION**ASSISTANCE LISTING 84.938 HURRICANE EDUCATION RECOVERY****I. PROGRAM OBJECTIVES**

The Bipartisan Budget Act (Division, B, Subdivision I, Title VIII of Pub. L. No. 115-123) (“the Bipartisan Budget Act of 2018”) authorized five grant programs to assist school districts and schools in meeting the educational needs of students displaced by hurricanes Harvey, Irma, and Maria, or wildfires in 2017 for which a major disaster or emergency has been declared, and to help schools that were closed as a result of the hurricanes or wildfires to reopen as quickly and effectively as possible. Title VIII, of Pub. L. No. 116-20, the “Additional Supplemental Appropriations for Disaster Relief Act, 2019” enacted June 6, 2019, authorized funding for additional “covered disasters or emergencies” related to hurricanes Florence and Michael, Typhoon Mangkhut, Super Typhoon Yutu, and wildfires, earthquakes, and volcanic eruptions occurring in calendar year 2018 and tornadoes and floods occurring in calendar year 2019 in those areas for which a major disaster or emergency has been declared under section 401 or 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170 and 5190). See 132 Stat. 95.

In enacting these disaster relief legislative provisions, Congress modified the provisions of the Hurricane Education Recovery Act, Pub. L. No. 109-148 (HERA), which was enacted after hurricanes Katrina and Rita in 2006. The provisions of the K-12 programs in the modified authority are generally similar to those in the prior program legislation, except for references to eligible applicants, the names of the covered disasters and emergencies, and date-specific and timeframe references. These K-12 programs are (1) the Immediate Aid to Restart School Operations (Restart) program (Assistance Listing 84.938A), (2) the Assistance for Homeless Children and Youth (AHCY) program (Assistance Listing 84.938B), and (3) the Temporary Emergency Impact Aid for Displaced Students (Emergency Impact Aid or EIA) program (Assistance Listing 84.938C). The Bipartisan Budget Act of 2018 also funded two programs for institutions of higher education to provide assistance for students attending institutions of higher education in areas affected by covered disasters. These programs are (1) the Emergency Assistance to Institutions of Higher Education (Assistance Listing 84.938T) and (2) Defraying Costs of Enrolling Displaced Students (Assistance Listing 84.938S). See Section IV, Other Information for an explanation on the use of alpha suffixes added to the Assistance Listing number.

A. Restart (Assistance Listing 84.938A)

The Restart program is designed to support the provision of immediate services or assistance to local educational agencies (LEAs) and nonpublic schools in areas where a major disaster or emergency was declared under sections 401 and 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170 and 5190) related to the consequences of hurricanes Harvey, Irma and/or Maria or the California wildfires in 2017 or hurricanes Florence and Michael, Typhoon Mangkhut, Super Typhoon Yutu, and wildfires, earthquakes, and volcanic eruptions occurring in calendar year 2018 and tornadoes and floods occurring in calendar year 2019 (“a covered disaster or

emergency”). Funds will be used to assist school administrators and personnel in restarting school operations, re-opening schools, and re-enrolling students.

B. HCY (Assistance Listing 84.938B)

The purpose of the AHCY program is to award grants to eligible state education agencies (SEAs) to enable them to provide financial assistance to LEAs serving homeless children and youth displaced by a covered disaster or emergency in order to address the educational and related needs of these students in a manner consistent with section 723 of the McKinney-Vento Homeless Assistance Act (McKinney-Vento Act) and with section 106 of title IV of division B of Pub. L. No. 109-148.

C. Emergency Impact Aid (EIA) (Assistance Listing 84.938C)

The purpose of the EIA program is to award grants to eligible SEAs to enable them to make emergency impact aid payments to eligible LEAs and eligible Bureau of Indian Education (BIE)-funded schools for the cost of educating during the 2017–2018 school year public and nonpublic school students displaced by hurricanes Harvey, Irma, and Maria, or the 2017 California wildfires or hurricanes Florence and Michael, Typhoon Mangkhut, Super Typhoon Yutu, and wildfires, earthquakes, and volcanic eruptions occurring in calendar year 2018 and tornadoes and floods occurring in calendar year 2019 for which a major disaster or emergency has been declared under sections 401 or 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170 and 5190) (covered disaster or emergency).

II. PROGRAM PROCEDURES

A. Restart

The Department of Education (ED) provides Restart funds to SEAs affected by a covered disaster taking into consideration the number of public and nonpublic schools closed as a result of a covered disaster or emergency, and the number of students enrolled during the school year preceding the school year in which the covered disaster or emergency occurred in those schools. The SEAs use these funds to provide services and assistance to the LEAs and nonpublic schools located in their states. The services may be provided directly by the SEA, through contractual arrangements, or through subgrants to public agencies. The SEAs are required to consider (1) the number of school-aged children served by LEAs or nonpublic schools in the academic year preceding the academic year for which the services and assistance are provided, and (2) the severity of the impact of the hurricanes on the LEAs or nonpublic schools, and the extent of the needs in each LEA or nonpublic school.

An SEA is required to reserve an amount of these funds to be made available to nonpublic schools in the state affected by the applicable covered disaster or emergency that is not less than an amount that bears the same relation to the payment as the number of students in nonpublic elementary schools and secondary schools in the state bears to the total number of students in nonpublic and public elementary schools and secondary schools in the state. The number of students in such schools shall be determined by the

most recent and appropriate data set for the school year prior to the year of the covered disaster or emergency. The control of funds for the services and assistance provided to a nonpublic school under a Restart grant and title to materials, equipment, and property purchased with Restart funds, must be in a public agency (SEA or LEA), and a public agency (SEA or LEA) shall administer such funds, materials, equipment, and property and shall provide such services (or may contract for the provision of such services with a public or private entity).

LEAs or nonpublic schools desiring services or assistance under the Restart program must have submitted an application to the SEA at such time, in such manner, and accompanied by such information as the SEA may reasonably be required to ensure expedited and timely provision of services or assistance to the LEA or nonpublic school.

B. AHCY (Assistance Listing 84.938B)

The Department of Education (ED) provides assistance to LEAs, through SEAs, to serve homeless children and youth displaced by hurricanes Harvey, Irma, and Maria, or the 2017 California wildfires for which a major disaster or emergency has been declared under sections 401 or 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170 and 5190) (covered disaster or emergency). These services or activities may include identification, enrollment assistance, assessment and school placement assistance, transportation, coordination of school services, supplies, referrals for health, mental health, and other needs. ED disburses funds to SEAs based on the number of homeless children and youth enrolled as a result of displacement by a covered disaster or emergency and demonstrated need. SEAs will distribute the funds to LEAs to be spent consistent with the purposes of carrying out section 723 of the McKinney-Vento Homeless Assistance Act.

C. Emergency Impact Aid

Funds are provided on the basis of statutory criteria and student count data supplied by SEAs and LEAs. LEAs provide counts to their SEA, which provides counts to ED. The SEA must provide student counts for all four quarters of the relevant school year on the numbers of displaced students enrolled in that LEA (in public and nonpublic schools) or BIE-funded school as of four different count dates, disaggregated by students who are children with disabilities, English learners who are not reported as children with disabilities, and all other displaced students.

ED makes payments to SEAs to enable them to make payments to LEAs as soon as possible, and LEAs must make payments to accounts on behalf of nonpublic students within 14 calendar days of receiving payments from their SEAs. When students enroll in different nonpublic schools on different quarterly count dates, LEAs need to ensure that payments for these students are directed to the correct accounts on their behalf.

SEAs and LEAs that meet the timelines specified in the Notice Announcing Availability of Funds may make upward or downward revisions to their initial child counts if they

collect more accurate data than was available at the time of their initial application submission. The Notice will set out a date by which states must submit such amendments.

Generally, ED will make payments under EIA program as follows:

For each quarter, ED will provide each state with a payment equal to:

- a. \$2,125 multiplied by the number of displaced students who are not reported as children with disabilities or English learners determined by the state to be enrolled in public and nonpublic schools for that quarter, plus
- b. \$2,250 multiplied by the number of displaced students who are English learners (who are not reported as children with disabilities) determined by the state to be enrolled in public and nonpublic schools for that quarter, plus
- c. \$2,500 multiplied by the number of displaced students who are reported as children with disabilities (regardless of whether the students are English learners) determined by the state to be enrolled in public and nonpublic schools for that quarter.

The aggregate amount of EIA funds that ED may provide per displaced student for the 2017–2018 or 2018–2019 school year, as applicable, is:

- a. \$8,500 for each displaced student who is not reported as a child with a disability or English learner;
- b. \$9,000 for each displaced student who is reported as an English learner who is not reported as a child with a disability; and
- c. \$10,000 for each displaced student who is reported as a child with a disability (regardless of whether the student is an English learner).

The aggregate amount of a payment on behalf of a displaced student enrolled in a nonpublic school may not exceed the *lesser* of—

- a. \$8,500 for a student who is not reported as a child with a disability or English learner;
- b. \$9,000 for a student who is reported as an English learner;
- c. \$10,000 for a student who is reported as a child with a disability; or
- d. The cost of tuition and fees (and transportation expenses, if any) at the nonpublic school for the relevant school year. (See section 107(d)(2)(B) of the modified Act.)

A copy of the HERA may be found at: <http://www.ed.gov/policy/elsec/guid/secletter/051230Bill.pdf>. Additional information on this program may be found on the Internet at <https://www.ed.gov/disasterrelief>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program

supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Y	Y	Y	Y	N	Y	N	N	N	N	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

a. *Restart*

Services and assistance allowable under this program, whether provided by the SEA, an LEA, or a public entity on behalf of a nonpublic school, must support the restart of operations in the re-opening of and the re-enrollment of students in elementary and secondary schools in areas affected a covered disaster or emergency. An SEA, LEA, or public entity can contract with private vendors to offer services and assistance under this program. Such services or assistance must provide for:

Allowable costs

- (1) Recovery of student and personnel data, and other electronic information;
- (2) Replacement of school district information systems, including hardware and software;
- (3) Financial operations;
- (4) Reasonable transportation costs;
- (5) Rental of mobile educational units and leasing of neutral sites or spaces;

- (6) Initial replacement of instructional materials and equipment, including textbooks;
- (7) Redeveloping instructional plans, including curriculum development;
- (8) Initiating and maintaining education and support services; and
- (9) Such other activities related to the purposes of the program that are approved by ED (Section 102(e)(1) of the modified Act).

ED has approved the use of Restart funds for other activities related to the purposes of the program. Information on these activities, as well as examples of allowable activities under the other categories, is available on ED's website via frequently asked questions:

<https://www2.ed.gov/programs/restart/restart-faq-2019-program.pdf>.

An SEA, LEA, or public entity on behalf of a nonpublic school may use Restart program funds in coordination with other federal, state, or local funds available for the activities described above (Section 102(e)(2) of the modified Act).

b. *AHCY (Assistance Listing 84.938B)*

Funds under this program may be used to provide services to, and activities for, homeless children displaced by hurricanes Harvey, Irma, and Maria, or the 2017 California wildfires for which a major disaster or emergency has been declared under sections 401 or 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170 and 5190) (covered disaster or emergency) consistent with Section 723 of the McKinney Vento Homeless Assistance Act. Funds may also be used to provide these services to, or activities for, non-displaced children made homeless by the covered disaster or emergency. These services or activities may include identification; enrollment assistance; assessment and school placement assistance; transportation; coordination of school services; supplies; and referrals for health, mental health, and other needs of homeless students displaced by the covered disaster or emergency.

c. *Emergency Impact Aid (EIA)*

Allowable Uses of Funds for a Child Reported without a Disability or an English Learner.

LEAs, BIE-funded schools, or nonpublic schools may use EIA funds to provide instructional opportunities for displaced students without disabilities who enroll in their schools and for expenses the recipient incurs in serving those displaced students. Allowable expenses are:

- (1) Paying the compensation of personnel, including teacher aides, in schools enrolling displaced students;
- (2) Identifying and acquiring curricular material and classroom supplies;
- (3) Acquiring or leasing mobile educational units or leasing sites and spaces;
- (4) Providing basic instructional services for displaced students, including tutoring, mentoring, or academic counseling;
- (5) Paying reasonable transportation costs;
- (6) Providing health and counseling services; and
- (7) Providing education and support services (Section 107(e) of the “modified Act”).

Allowable Uses of Funds for a Child Reported with a Disability

Recipients of funds under this program for displaced students who are children with disabilities may use those funds only to pay for special education and related services consistent with the IDEA. However, the law does not require that these funds be used to provide special education and related services only to students displaced by the covered disaster or emergency. They may become part of an LEA’s or school’s special education budget, and the LEA or school may use them to provide special education and related services to both displaced and other students who are children with disabilities, taking care to ensure that the special education needs of displaced students with disabilities are met. Notwithstanding the requirement that payments be expended for special education and related services consistent with the IDEA, this program places no other obligation on nonpublic schools to administer any part of the IDEA.

The requirements that apply to the use of funds provided for displaced students who are children with disabilities are the same as those that apply to the LEAs use of funds provided under Part B of the IDEA. They include the requirement that the funds be used for the excess costs of providing special education and related services to children with disabilities, consistent with maintenance-of-effort and supplement, not supplant, requirements. Because these fiscal provisions have special meaning under the IDEA, distinct from the way these terms are applied under the ESEA, we advise you to consult with your state and local staff who administer the IDEA if you need additional information on IDEA requirements. The applicable regulations regarding these requirements can

be found at 34 CFR sections 300.202-300.208.c. Allowable Uses of Funds – General.

While the activities and services provided with EIA funds must be related to serving displaced students, there is no requirement that they be provided only to those students. For instance, one of the allowable activities under the law is provision of basic instructional services. There is no requirement that program funds be used to provide those services only to displaced students; rather, LEAs may use the funds to support regular classroom programs in which both displaced and other students participate. Similarly, the law authorizes the use of funds for reasonable transportation costs. LEAs are under no obligation use these funds to transport only displaced students. They may instead use the money to support their regular transportation budget, taking care to ensure that the transportation needs of displaced students are met.

1. *Activities Unallowed*

a. *Restart*

Services and assistance allowable under this program, whether provided by the SEA, an LEA, or a public entity on behalf of a nonpublic school, must support the restart of operations in the re-opening of and the re-enrollment of students in elementary and secondary schools in areas affected a covered disaster or emergency. An SEA, LEA, or public entity can contract with private vendors to offer services and assistance under this program.

Unallowable costs

Restart program funds may not be used for construction or major renovation of schools. However, funds may be used for minor renovation, repair, and minor remodeling of schools (Section 102(e)(3)(A) of the modified Act).

- b. Costs for construction or major renovation are not allowable (Section 107(e)(3) of the modified Act).

E. Eligibility

1. Eligibility for Individual

Not Applicable

2. Eligibility for Groups of Individuals or Areas of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

a. *Restart*

LEAs or nonpublic schools that serves an area in which a major disaster or emergency was declared under sections 401 and 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170 and 5190) related to the consequences of hurricanes Harvey, Irma and/or Maria or the California wildfires in 2017 or hurricanes Florence and Michael, Typhoon Mangkhut, Super Typhoon Yutu, and wildfires, earthquakes, and volcanic eruptions occurring in calendar year 2018 and tornadoes and floods occurring in calendar year 2019 (“a covered disaster or emergency”) may apply for services or assistance under the program.

In determining which LEAs and schools should be served, the SEAs should consider (1) the number of school-aged children served by the LEA or nonpublic school in the academic year preceding the academic year for which the services or assistance are provided, and (2) the severity of the impact of on the covered disaster on the LEA or nonpublic school and the extent of the needs in each school in a declared major disaster area, per section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170). For the purposes of this program, a nonpublic school means a nonpublic elementary or secondary school that is accredited or licensed or otherwise operates in accordance with state law and was in existence one week prior to the date the major disaster or emergency was declared for the area.

b. *Emergency Impact Aid*

LEAs and BIE-funded schools, including charter schools, in which a displaced student is enrolled, are eligible to participate in this program. An eligible nonpublic school is a nonprofit elementary or secondary school that is accredited or otherwise operates in accordance with state law, was in existence on the date that is one week prior to the date that the major disaster or emergency was declared for the area and serves at least one displaced student whose family has applied for assistance under the program. In addition, participating nonpublic schools must abide by certain civil rights requirements. A nonpublic school must also waive some or all of a displaced student’s tuition or reimburse some or all of the tuition paid in order to receive funds under this program.

For purposes of determining eligibility, “displaced students,” that is, the students for whom schools may receive payments, are those students who:

- Resided in the area of a covered disaster or emergency on the date that is one week prior to the date that the major disaster or emergency was declared for the area; and

- As a result of the covered disaster or emergency, enrolled in an elementary school or secondary school other than the school that the student was enrolled in, or was eligible to be enrolled in, on the date that is one week prior to the date that the major disaster or emergency was declared for the area.

Note that the definition may include a student who enrolled in another school in the same LEA as a result of the covered disaster or emergency. It does not include a student who remains enrolled in the same school but the school has changed location because of the disaster. It is possible, however, that a school in this situation will qualify for Restart program services or assistance. An LEA or BIE-funded school in those states should consult with its SEA regarding the eligibility for Restart services or assistance.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

Emergency Impact Aid

The maintenance of effort requirements that apply to the use of the funds provided for displaced students reported with disabilities are the same as those that apply to the use of funds provided under Part B of the IDEA. See Assistance Listing 84.027, Special Education – Grants To States (IDEA, Part B), “Matching, Level of Effort, Earmarking – Level of Effort – Maintenance of Effort (SEAs/LEAs) (HERA, Section 107(e)(4)).

2.2 Level of Effort – *Supplement Not Supplant*

Restart

Services or assistance provided by this program shall be used to supplement, not supplant, any funds made available through the Federal Emergency Management Agency (FEMA) or through a state. However, if an SEA, LEA, or school has not received such other benefits by the time of application for assistance under this program, the SEA, LEA, or school may use program funds to supplant such funds until they are received, providing the SEA, LEA, or school agrees to repay all duplicative federal assistance received.

3. Earmarking

Emergency Impact Aid

SEAs may not use more than one percent and LEAs may not use more than two percent of their respective allocations for administration of the program (Section 107 (h) of the modified Act).

M. Subrecipient Monitoring

1. Emergency Impact Aid

Nonpublic schools that access accounts for which parents applied on behalf of nonpublic students are not considered subgrantees of LEAs, as defined in 34 CFR section 80.3. SEAs are responsible for monitoring the nonpublic schools with respect to applicable requirements, including ensuring that (1) a school's attestation regarding its enrollment of displaced students, as defined in section 107 of the modified Act, is adequately documented; (2) the school is an eligible nonpublic school as defined in section 107(b)(3) of the modified Act; and (3) the funds from accessed accounts are used only for allowable goods and services. An SEA is responsible for taking appropriate enforcement actions if it determines that a nonpublic school has not met any of these requirements (Section 107 of the modified Act).

Also see Part 4, 84.000 ED Cross-Cutting Section.

N. Special Tests and Provisions

1. Public Control of Funds – Restart

The control of funds provided for nonpublic schools must be in a public agency, and title to materials, equipment, and property purchased with such funds must also be retained by a public agency. ED has issued guidance on this requirement, which is available on ED's website (<https://www2.ed.gov/programs/restart/restartfaq042018.docx>; <https://www2.ed.gov/programs/restart/restart-faq-2019-program.pdf>).

Only a public agency or its contractor can provide services and administer such funds, materials, equipment, and property (Section 102(h)(3) of the modified Act).

IV. OTHER INFORMATION

As part of audit planning, the auditor must determine for which of the six programs grant funds were awarded to the auditee. Some auditees have received grants under two or more of the six programs. As indicated above, compliance requirements vary among the programs. To help distinguish the individual programs, separate alpha suffixes were added to Assistance Listing 84.938 to distinguish the programs as follows:

- Restart (Assistance Listing 84.938A)

- AHCY (Assistance Listing 84.938B)
- Emergency Impact Aid (Assistance Listing 84.938C)

Where these suffixes are not clearly identified, the auditor will need to determine which program funds were expended through review of grant documents and inquiry of the auditee or grant/subgrant source agency.

Please see the redlined version of the HERA (Pub. L. No. 109-148) showing operational modifications made by the *Bipartisan Budget Act of 2018* (Pub. L. No. 115-123); the *Consolidated Appropriations Act of 2018* (Pub. L. No. 115-141); and the *Additional Supplemental Appropriations for Disaster Relief Act, 2019* (Pub. L. No. 116-20).

Covered Disasters for the 2018 Restart Program are: hurricanes Harvey, Irma, and Maria, or the 2017 California wildfires; covered disasters for the 2019 Restart Program are: hurricanes Florence and Michael, Typhoon Mangkhut, Super Typhoon Yutu, and wildfires, earthquakes, and volcanic eruptions occurring in calendar year 2018, and tornadoes and floods occurring in calendar year 2019 for which a major disaster or emergency has been declared under sections 401 or 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC 5170 and 5190).

Nonpublic schools that receive funds on behalf of displaced students under this program must comply with the modified Act's non-discrimination provision, which prohibits discrimination on the basis of race, color, national origin, religion, disability, or sex. (See section 107(m) of the modified Act.) Additionally, nonpublic schools receiving funds on behalf of displaced students under this program are recipients of federal financial assistance for the 2017–2018 school year, and are subject to the provisions of title VI of the Civil Rights Act of 1964, title IX of the Education Amendments of 1972 ("Title IX"), Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act, which are enforced by the Department's Office for Civil Rights. See also the response to Question H-1 for further information about Title IX. More details on these requirements can be found on OCR's website (<http://www.ed.gov/about/offices/list/ocr/index.html>).

In addition, any entity that employs 15 or more employees is subject to Title VII of the Civil Rights Act of 1964, which prohibits discrimination in employment on the basis of race, color, national origin, religion, or sex, except that Title VII may not apply to the employment of individuals of a particular religion by a religious organization, such as a nonpublic religious school. Title VII is enforced by the Equal Employment Opportunity Commission.

Certain compliance requirements that apply to multiple programs are discussed once in the ED Cross-Cutting Section of this Supplement (page 4-84.000) rather than repeated in each individual program. Where applicable, this section references the Cross-Cutting Section for these requirements.

GULF COAST ECOSYSTEM RESTORATION COUNCIL

ASSISTANCE LISTING 87.051 GULF COAST ECOSYSTEM RESTORATION COUNCIL COMPREHENSIVE PLAN COMPONENT PROGRAM

I. PROGRAM OBJECTIVES

The primary objective of this program, authorized by the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012 (RESTORE Act), is to disburse funds to eligible entities for the purpose of restoring and protecting the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, coastal wetlands, and economy of the Gulf Coast region using the best available science. Projects and programs must achieve one or more of the seven objectives listed in the Gulf Coast Ecosystem Restoration Council (RESTORE Council) Comprehensive Plan: (1) restore, enhance, and protect habitats, (2) restore, improve, and protect water resources, (3) protect and restore living coastal and marine resources, (4) restore and enhance natural processes and shorelines, (5) promote community resilience, (6) promote natural resource stewardship and environmental education, and (7) improve science-based decision-making processes.

II. PROGRAM PROCEDURES

The RESTORE Act established the Gulf Coast Restoration Trust Fund (Trust Fund) to hold 80 percent of the administrative and civil penalties paid by parties responsible for the Deepwater Horizon oil spill after July 6, 2012, plus interest on investments. Amounts in the Trust Fund are allocated among the five components: Direct Component, Comprehensive Plan Component, Spill Impact Component, National Oceanic and Atmospheric Administration RESTORE Act Science Program, and Centers of Excellence Research Grants Program. The RESTORE Council, whose members are the states of Alabama, Florida, Louisiana, Mississippi, and Texas; the Administrator of the US Environmental Protection Agency; and the secretaries of the US departments of the Interior, Commerce, Agriculture, Homeland Security, and Army (Federal Servicing Agencies), is responsible for administering the Comprehensive Plan Component and the Spill Impact Component (Assistance Listing 87.052).

Through the Comprehensive Plan Component, the RESTORE Council makes grants and enters into Interagency Agreements (IAAs) for ecological restoration of the Gulf Coast Region. Thirty percent of the penalties paid into the Trust Fund is used for grants and IAAs to support eligible activities proposed by the RESTORE Council members. Recipients of grants and IAAs may choose to make subawards to complete eligible activities, if approved by the RESTORE Council.

Source of Governing Requirements

The primary source of program requirements is the RESTORE Act (Subtitle F of Pub. L. No. 121-141) (33 USC 1321(t) and 33 USC 1321 note). Program implementing regulations are in 31 CFR Part 34.

Availability of Other Program Information

Other program information regarding grants and IAAs under the Comprehensive Plan

Component of the RESTORE Act is available at the RESTORE Council website at (<https://www.restorethegulf.gov>).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	Y	N	Y	Y	N	N	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

All allowed activities must be included in, and conform to, the following:

- a. The activities set forth in the RESTORE Act at 33 USC 1321 (t)(1)(B)(i) and 33 USC 1321 (t)(1)(B)(ii);
- b. The priority criteria set forth in the RESTORE Act at 33 USC 1321 (t)(2)(D)(iii); and
- c. The description of the goals and objectives outlined in the RESTORE Council’s Comprehensive Plan, the approved Funded Priorities List Addendum(s) to such Comprehensive Plan, and the grant or subgrant agreement.

B. Allowable Costs/Cost Principles

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

F. Equipment and Real Property Management

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

H. Period of Performance

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

I. Procurement and Suspension and Debarment

The acquisition of land, or interests in land, can only be from a willing seller (31 CFR section 34.803(f)).

M. Subrecipient Monitoring

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

1. Activities Unallowed

Activities that were included in any claim for compensation presented after July 6, 2012, to the Oil Spill Liability Trust Fund authorized by 26 USC 9509 (31 CFR section 34.200(a)(3)) are unallowed.

N. Special Tests and Provisions**1. Wage Rate Requirements**

Under the Comprehensive Plan Component, for contracts that exceed \$2,000 that are for the construction, alteration, or repair of treatment works as defined at 33 USC 1292(2), all laborers and mechanics employed by contractors and subcontractors must be paid wages at rates not less than those prevailing for the same type of work on similar construction in the immediate locality, as determined by the secretary of Labor, in accordance with the Wage Rate Requirements (33USC 1372).

See Wage Rate Requirements Cross-Cutting Section (page 4-20.001-4).

GULF COAST ECOSYSTEM RESTORATION COUNCIL

ASSISTANCE LISTING 87.052 GULF COAST ECOSYSTEM RESTORATION COUNCIL OIL SPILL IMPACT PROGRAM

I. PROGRAM OBJECTIVES

The primary objective of this program, authorized by the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012 (RESTORE Act), is to disburse funds to eligible entities for the purpose of restoring and protecting the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, coastal wetlands, and economy of the Gulf Coast region using the best available science in accordance with an approved State Expenditure Plan.

II. PROGRAM PROCEDURES

The RESTORE Act established the Gulf Coast Restoration Trust Fund (Trust Fund) to hold 80 percent of the administrative and civil penalties paid by parties responsible for the Deepwater Horizon oil spill after July 6, 2012, plus interest on investments. Amounts in the Trust Fund are allocated among the five components: Direct Component, Comprehensive Plan Component, Spill Impact Component, National Oceanic and Atmospheric Administration RESTORE Act Science Program, and Centers of Excellence Research Grants Program. The Gulf Coast Ecosystem Restoration Council (RESTORE Council) is responsible for administering the Comprehensive Plan Component (Assistance Listing 87.051) and the Spill Impact Component.

Through the Spill Impact Component, the RESTORE Council makes grants for the ecological and economic restoration of the Gulf Coast Region. Thirty percent of the penalties paid into the trust fund is divided among the five Gulf Coast States, the states of Alabama, Florida, Louisiana, Mississippi, and Texas, for eligible projects or programs contained in a State Expenditure Plan, which is submitted by the state and approved by the RESTORE Council chairperson. Recipients may choose to make subawards to complete eligible activities, if approved by the RESTORE Council.

Source of Governing Requirements

The primary source of program requirements is the RESTORE Act (Subtitle F of Pub. L. No. 121-141) (33 USC 1321(t) and 33 USC 1321 note). Program implementing regulations are in 31 CFR Part 34.

Availability of Other Program Information

Other program information regarding grants made under the Spill Impact Component of the RESTORE Act is available at the RESTORE Council website at <https://www.restorethegulf.gov>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N

Y	Y	N	N	Y	N	Y	Y	N	N	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

All activities must be included in, and conform to, the description in the goals and Comprehensive State Expenditure Plan, submitted to and approved by the RESTORE Council Chairperson, and the recipient’s grant or subgrant agreement. Activities must contribute to the overall economic and ecological recovery of the Gulf Coast and may include the following:

- a. Restoration and protection of the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, and coastal wetlands of the Gulf Coast Region;
- b. Mitigation of damage to fish, wildlife, and natural resources;
- c. Implementation of a federally approved marine, coastal, or comprehensive conservation management plan, including fisheries monitoring;

- d. Workforce development and job creation;
- e. Improvements to or on state parks located in coastal areas affected by the Deepwater Horizon oil spill;
- f. Infrastructure projects benefitting the economy or ecological resources, including port infrastructure;
- g. Coastal flood protection and related infrastructure;
- h. Promotion of tourism in the Gulf Coast Region, including promotion of recreational fishing;
- i. Promotion of the consumption of seafood harvested from the Gulf Coast Region;
- j. Planning assistance;
- k. Administrative costs; and
- l. The nonfederal share of the cost of any project or program authorized by federal law that is also an eligible activity under the RESTORE Act (31 CFR sections 34.2, 34.200(b) and 34.201203).

B. Allowable Costs/Cost Principles

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

F. Equipment and Real Property Management

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

H. Period of Performance

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

I. Procurement and Suspension and Debarment

The acquisition of land, or interests in land, can only be from a willing seller (31 CFR section 34.803(f)).

M. Subrecipient Monitoring

As per 2 CFR Part 200 and Standard Terms and Conditions of each individual grant award.

1. **Activities Unallowed**

Activities that were included in any claim for compensation presented after July 6, 2012, to the Oil Spill Liability Trust Fund authorized by 26 USC 9509 (31 CFR section 34.200(a)(3)) are unallowable.

N. Special Tests and Provisions

Wage Rate Requirements

Under the Spill Impact Program, for contracts that exceed \$2,000 that are for the construction, alteration, or repair of treatment works as defined at 33 USC 1292(2), all laborers and mechanics employed by contractors and subcontractors must be paid wages at rates not less than those prevailing for the same type of work on similar construction in the immediate locality, as determined by the secretary of labor, in accordance with the Wage Rate Requirements (33 USC 1372).

See Wage Rate Requirements Cross-Cutting Section (page 4-20.001-4).

DEPARTMENT OF HEALTH AND HUMAN SERVICES**ASSISTANCE LISTING 93.044 SPECIAL PROGRAMS FOR THE AGING – TITLE III,
PART B—GRANTS FOR SUPPORTIVE SERVICES AND SENIOR CENTERS****ASSISTANCE LISTING 93.045 SPECIAL PROGRAMS FOR THE AGING, TITLE III,
PART C, NUTRITION SERVICES****ASSISTANCE LISTING 93.053 NUTRITION SERVICES INCENTIVE PROGRAM****I. PROGRAM OBJECTIVES****Grants for Supportive Services and Senior Centers**

The objective of this program is to assist states and area agencies on aging in facilitating the development and implementation of a comprehensive, coordinated system for providing long-term care in home and community-based settings, in a manner responsive to the needs and preferences of older individuals and their family caregivers, by—

- a. collaborating, coordinating activities, and consulting with other local public and private agencies and organizations responsible for administering programs, benefits, and services related to providing long-term care;
- b. conducting analyses and making recommendations with respect to strategies for modifying the local system of long-term care to better—
 - (1) respond to the needs and preferences of older individuals and family caregivers;
 - (2) facilitate the provision, by service providers, of long-term care in home and community-based settings; and
 - (3) target services to older individuals at risk for institutional placement, to permit such individuals to remain in home and community-based settings;
- c. implementing, through the agency or service providers, evidence-based programs to assist older individuals and their family caregivers in learning about and making behavioral changes intended to reduce the risk of injury, disease, and disability among older individuals; and
- d. providing for the availability and distribution (through public education campaigns, Aging and Disability Resource Centers, the Area Agency on aging itself, and other appropriate means) of information relating to—
 - (1) the need to plan in advance for long-term care; and
 - (2) the full range of available public and private long-term care (including integrated long-term care) programs, options, service providers, and resources (Older Americans Act [OAA] Section 305(a)(3)).

The target population for these supportive services is individuals with greatest economic and social need (with particular attention to low-income older individuals, including low-income minority older individuals, older individuals with limited English proficiency, and older individuals residing in rural areas), and older individuals at risk for institutional placement (OAA Section 306(a)(1)); however, proof of age (or income) is not required as a condition of receiving services.

Supportive services may include a full range of economic and social services, including, but not limited to (1) access services (transportation, health services, including mental health services, outreach, information and assistance); (2) legal assistance and other counseling services; (3) health screening services (including mental health screening); (4) ombudsman services; (5) provision of services and assistive devices (including provision of assistive technology services and assistive technology devices); (6) services designed to support states, area agencies on aging, and local service providers in carrying out and coordinating activities for older individuals with respect to mental health services, including outreach for, education concerning, and screening for such services, and referral to such services for treatment; (7) activities to promote and disseminate information about life-long learning programs, including opportunities for distance learning; and (8) services designed to assist older individuals in avoiding institutionalization and to assist individuals in long-term care institutions who are able to return to their communities any other services necessary for the general welfare of older individuals (OAA Section 321). Nutrition services are provided under a separate authorization, as described below.

Organizations funded under this program and the nutrition services program (see below) also receive funds from other federal sources as well as from nonfederal sources.

Grants for Nutrition Services

The purposes of this grant program are to (1) reduce hunger and food insecurity; (2) promote socialization of older individuals; and (3) promote the health and well-being of older individuals by helping them gain access to nutrition and other disease prevention and health promotion services to delay the onset of adverse health conditions resulting from poor nutritional health or sedentary behavior (OAA Section 330). Services are provided through this program to individuals aged 60 or older, in a congregate setting or in-home. These services include meals, nutrition education, nutrition counseling, and nutrition screening and assessment, as appropriate (OAA sections 331, 336, and 339). This program is clustered with the grants for supportive services and senior centers for purposes of this program supplement since these services, although separately earmarked, fall under the overall state planning process and process for allocation of funds.

Nutrition Services Incentive Program (NSIP)

The objective of this grant program is to provide resource incentives to encourage and reward effective and efficient performance in the delivery of nutritious meals to older individuals. The Administration on Aging (AoA) is responsible for this program. This program is included as part of this cluster because of its direct relationship to the nutrition services program.

II. PROGRAM PROCEDURES

A. Overview

The AoA, a component of the Department of Health and Human Services, administers the supportive services and senior centers program and the nutrition services program in cooperation with states, sub-state agencies, and other service providers. The states receive a formula grant from AoA, which is used by the State Unit on Aging (State Agency) both for its planning, administration, and evaluation of these programs as well as to pass through to other entities.

Planning and Service Areas (PSAs) are designated by the State Agency in accordance with AoA guidelines after considering the geographical distribution of the service populations, location of available services, available resources, other service area boundaries, location of units of general-purpose local government, and other factors. An Area Agency on Aging (Area Agency) is then designated by the state for each PSA after considering the views of affected local governments (states that had a single statewide planning and service area in place prior to fiscal year (FY) 1981 had the option to continue that method of operation; there are currently eight states in this category). A single Area Agency may serve more than one PSA. The area agencies, which may be public or private nonprofit agencies or organizations, develop and administer counterpart area aging plans, as approved by the State Agency, and, in turn, provide subgrants to or contract with public or private service providers for the provision of services.

With limited exceptions (e.g., ombudsman services, information and assistance, case management), the State Agency and the area agencies are precluded from the direct provision of services, unless providing the services is necessary to ensure an adequate supply of services, the services are related to the agency's administrative functions, or where services of comparable quality can be provided more economically by the agency. Federal funds may pay for only a portion of the costs of administration and services with the state and subrecipients required to provide a matching share from other sources.

The term "case management service" means a service provided to an older individual, at the direction of the older individual or a family member of the individual (i) by an individual who is trained or experienced in the case management skills that are required to deliver the services and coordination described below; and (ii) to assess the needs, and to arrange, coordinate, and monitor an optimum package of services to meet the needs, of the older individual. Case management includes services and coordination such as (i) comprehensive assessment of the older individual (including the physical, psychological, and social needs of the individual); (ii) development and implementation of a service plan with the older individual to mobilize the formal and informal resources and services identified in the assessment to meet the needs of the older individual, including coordination of the resources and services with any other plans that exist for various formal services, such as hospital discharge plans; and with the information and assistance services provided under the OAA; (iii) coordination and monitoring of formal and informal service delivery, including coordination and monitoring to ensure that services specified in the plan are being provided; (iv) periodic reassessment and revision of the status of the older individual with the older individual or, if necessary, a primary caregiver or family member of the older individual; and (v) in accordance with the wishes

of the older individual, advocacy on behalf of the older individual for needed services or resources (OAA Section 102(11)).

AoA administers NSIP in cooperation with states, sub-state agencies, and other service providers. Under Sections 311(b)(1) and (d)(1) of the OAA, states receive a cash grant from AoA, based on the formula in the OAA. The amount of a state's grant is determined by dividing the number of meals served to eligible persons in the state during the preceding federal fiscal year by the number of such meals served in all states and tribes and applying the resulting ratio to the amount of funds available. Under OAA Section 311(d)(1), a state may choose to use all or any part of its grant to obtain commodities distributed by the United States Department of Agriculture (USDA) through state distributing agencies. The amount a state chooses to use in commodities, as well as administrative costs from USDA associated with the purchase of commodities, are deducted from the state's grant from AoA. AoA transfers funds to USDA. USDA remains responsible for the overall management of the commodities program, including ordering, purchase, and delivery of the requested commodities. (See also IV, "Other Information.")

B. State Plan and Area Plans

A state plan, approved by AoA, is a prerequisite to funding of the supportive services and nutrition programs; however, the state plan covers the totality of AoA programs for which the state is the recipient under the OAA. The state plan is developed on the basis of input from the area agencies as well as input from the affected populations as a result of public hearings. The state plan addresses how the state intends to comply with the various requirements of the OAA and, specifically for Title III, its program objectives, designation of Planning and Service Areas (PSAs), and specification of the intrastate allocation formula for distribution of funds to each PSA. The state plan also contains assurances required by the Act and implementing regulations.

Unless a state is not in compliance with Title III requirements, the state plan may be submitted on a two-, three-, or four-year cycle, at the option of the state, with annual amendments, as appropriate; however, AoA funding is provided annually. States found to be in noncompliance may be required to submit their state plans annually until they are determined to be in compliance. Area plans are prepared and submitted to the state for approval for either two, three, or four years, with annual adjustments, as necessary.

Source of Governing Requirements

These programs are authorized under parts B and C, respectively, of Title III of the OAA, as amended, which is codified at 42 USC 3021-3030. These programs may also be referred to as Part B (supportive services and senior centers) and Part C1 (congregate nutrition services) and C2 (home-delivered nutrition services). Grants to Indian tribes for similar purposes are authorized under another title of the OAA and are not included in this supplement. Implementing regulations are published at 45 CFR Part 1321.

The Nutrition Services Incentive Program (NSIP) is authorized in Title III of the OAA, as amended, which is codified at 42 USC 3030a. There are no implementing regulations.

Availability of Other Program Information

Additional information about nutrition and supportive services, as reauthorized in 2020 by Pub. L. No. 116-131 is available at the AoA website at <https://acl.gov/about-acl/administration-aging>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	N	N	Y	Y	Y	N

A. Activities Allowed or Unallowed

1. *State Agency*

- a. State agencies may use any amount of Title III-B (supportive services) funding necessary to conduct an effective ombudsman program (42 USC 3024 (d)(1)(B)).
- b. Grant funds may be used for state plan administration, including state plan preparation, evaluation of activities carried out under the plan, the collection of data and the conduct of analyses related to the need for

services, dissemination of information, short-term training, and demonstration projects (42 USC 3028 (a)).

- c. No supportive services, nutrition services, or in-home services may be provided directly by the State Agency unless the State Agency determines that direct provision of services is necessary to ensure an adequate supply of services, where such services are related to the agency's administrative functions, or where such services of comparable quality can be provided more economically by the State Agency (42 USC 3027(a)(8)(A)).
- d. Distribution of funding within the State must be allocated as described in the State Plan Attachment C Intrastate Funding Formula (IFF) as approved by the Assistant Secretary for Aging to subrecipients, Area Agencies on Aging (if applicable), (42 USC 3025(a)(2)(C)).

2. *Area Agency*

Supportive Services and Senior Centers and Nutrition Services

- a. Funds may be used for plan administration, operation of an advisory council, activities related to advocacy, planning, information sharing, and other activities leading to development or enhancement within the designated service area(s) of comprehensive and coordinated community-based systems of service delivery to older persons (45 CFR section 1321.53).
- b. If approved by the State Agency, an Area Agency may use service funds for program development and coordination activities (45 CFR section 1321.17(f)(14)(i)).
- c. No supportive services, nutrition services, or in-home services may be provided directly by an Area Agency except if, in the judgment of the State Agency, direct provision of services is necessary to ensure an adequate supply of services, where such services are related to the agency's administrative functions, or where such services of comparable quality can be provided more economically by the agency (42 USC 3027 (a)(8)).

3. *Service Providers*

Supportive Services and Senior Centers and Nutrition Services

- a. Funds may be used to assist in the operation of multipurpose senior centers and to meet all or part of the costs of compensating professional and technical personnel required for center operation (42 USC 3030d (b)(2)).

- b. Funds may be used for nutrition services and supportive services consistent with the terms of the agreement between the Area Agency and the service provider (42 USC 3026(a)(1), 3030d(a), and 3030e).
- c. Funds may be used for services associated with access to supportive services for in-home services, and for legal assistance (42 USC 3026(a)(2)).
- d. Nutrition services may be provided to older individuals' spouses, who may not be eligible for these services in their own right, on the same basis as they are provided to older individuals and may be made available to handicapped or disabled individuals who are less than 60 years old but who reside in housing facilities occupied primarily by older individuals at which congregate nutrition services are provided (42 USC 3030g-21(2)(I)).
- e. In accordance with procedures established by the area agencies, nutrition project administrators may offer meals to individuals providing volunteer services during the meal hours and to individuals with disabilities who reside at home with eligible individuals (42 USC 3030g-21(2)(H)).
- f. Funds may be used for provision of home-delivered meals to older individuals (42 USC 3030f).
- g. Funds may be used to acquire (in fee simple or by lease for ten years or more), alter, or renovate existing facilities or to construct new facilities to serve as multipurpose senior centers for not less than ten years after acquisition, or 20 years after completion of construction, unless waived by the assistant secretary for aging (42 USC 3030b).

G. Matching, Level of Effort, Earmarking

1. Matching

a. Title III Supportive Services and Nutrition Services and American Rescue Plan Supportive Services and Nutrition Services Grants

- (1) State – State Plan Administration
 - (a) States must contribute from state or local sources at least 25 percent of the cost of state plan administration as their matching share. This may include cash or in-kind contributions by the state or third parties (42 USC 3028(a)(1) and 42 USC 3029 (b); 45 CFR section 1321.47).

(2) State and Area Agencies – Area Plan Administration

State and area agencies, in the aggregate, must contribute at least 25 percent of the costs of administration of area plans (42 USC 3024 (d)(1)(A); 45 CFR section 1321.47).

- (a) *State* – Since this match is computed based on the aggregate of all area agencies in the state, the auditor’s testing of the amount of this match is performed at the State Agency.
- (b) *Area Agencies* – The auditor’s testing of the allowability of the matching (e.g., from an allowable source and in compliance with the administrative requirements and allowable costs/cost principles requirements) should be performed at the area agencies.

(3) Service Provision

All services, whether provided by the State Agency, an Area Agency, or other service provider (excluding any ombudsman services provided under the authority of 42 USC 3024 (d)(1)(D)) must be funded with a nonfederal match of at least 15 percent. One third of the required 15 percent match must come from state sources (42 USC 3029 (b)(2)). This percentage must be met on a statewide basis. Funds for ombudsman services provided under the authority of 42 USC 3024 (d)(1)(B) are not required to be matched (42 USC 3024 (d)(1)(D); 45 CFR section 1321.47).

b. Nutrition Services Incentive Programs (NSIP) Grants

- (1) There is no match requirement.

c. CARES Act Supportive Services and Nutrition Services Grants

(1) State – State Plan Administration

- (a) States must contribute from state or local sources at least 25 percent of the cost of state plan administration as their matching share. This may include cash or in-kind contributions by the state or third parties (42 USC 3028 (a)(1) and 42 USC 3029 (b); 45 CFR section 1321.47).

(2) State and Area Agencies - Area Plan Administration

State and area agencies, in the aggregate, must contribute at least 25 percent of the costs of administration of area plans (42 USC 3024 (d)(1)(A); 45 CFR section 1321.47).

- (a) *State* – Since this match is computed based on the aggregate of all area agencies in the state, the auditor’s testing of the amount of this match is performed at the State Agency.
- (b) *Area Agencies* – The auditor’s testing of the allowability of the matching (e.g., from an allowable source and in compliance with the administrative requirements and allowable costs/cost principles requirements) should be performed at the area agencies.

(3) **Service Provision**

There is no match requirement for services.

2. Level of Effort

State – The State Agency must spend for both services and administration at least the average amount of state funds it reported as spent under the state plan for these activities for the three previous fiscal years. If the State Agency reports as spent less than this amount, the assistant secretary for aging reduces the state’s allotments for supportive and nutrition services under this part by a percentage equal to the percentage by which the state reduced its expenditures (42 USC 3029 (c); 45 CFR section 1321.49). See III. L.3., “Reporting – Financial Reporting,” for the reporting requirement regarding maintenance of effort.

2.1 Level of Effort – Maintenance of Effort

Not Applicable

2.2 Level of Effort – Supplement Not Supplant

Supportive Services and Senior Centers

- a. Funds expended by a state or unit of general purpose local government (including an Area Agency on aging) to provide services shall supplement, and not supplant, any federal, state, or local funds (42 USC 3030d(d)).

Nutrition Services

- a. Not Applicable

3. Earmarking

- a. *State*

- (1) Overall expenditures for administration are determined by the State agency's status as set forth below, unless a waiver is granted by the assistant secretary for aging (42 USC 3028 (b)):
 - (a) A State agency which serves a State with multiple planning and service areas, not listed in (1)(b) below, shall have available the greater of 5 percent or \$750,000 of the total Title III award (42 USC 3028(b)(2)(A)); or
 - (b) Guam, United States Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands shall have available the greater of 5 percent or \$100,000 of the total Title III award (42 USC 3028(b)(2)(B)).
- (2) After a state determines the amount to be applied to state plan administration under 42 USC 3028 (b), the state may:
 - (a) Use up to (and including) 10 percent of that amount available for the administration of area plans where the state calculates the 10 percent based on the amount remaining after deducting the amount to be applied to state plan administration (42 USC 3024(d)(1)(A)); and
 - (b) Use any amounts available to the state for state plan administration which the state determines are not needed for that purpose to supplement the amount available for administration of area plans (42 USC 3028(a)(2)).
- (3) Any state, which has been designated as a single planning and service area, may elect to be subject to:
 - a. state plan administration limit; or
 - i. 5 percent of the total amount of the allotments made to a State under sections 3024(a)(1) and 3030s-1(f); or
 - ii. \$750,000
 - b. area plan administration limit of the allotments made to a State under sections 3024(a)(1) and 3030s-1(f). (42 USC 3028(a)(3)).
- (4) A state may transfer:
 - (a) Up to 40 percent of a state's separate allotments for congregate and home-delivered nutrition services between those two allotments without AoA approval (42 USC 3028 (b)).
 - (b) Not more than 30 percent between programs under Part B and Part C (parts C1 and/or C2) for use as the state considers appropriate (42 USC 3028(b)).

- (c) An additional 10 percent may be transferred between C1 and C2 with an AoA waiver (42 USC 3028(b)).
- (d) A waiver may be requested to transfer an amount, which is above the allowable 30 percent between parts B and C (42 USC 3030c-3(b)(4)).

A State Agency may not delegate to an Area Agency or any other entity the authority to make such transfers (42 USC 3028(b)(6)).

- (5) The State Agency will not fund program development and coordinated activities as a cost of supportive services for the administration of area plans until it has first spent 10 percent of the total of its combined allotments under this program on the administration of area plans (45 CFR section 1321.17(f)(14)).

b. *Area Agency*

As provided in agreements with the State Agency, area agencies earmark portions of their allotment. The typical earmarks are:

- (1) A maximum amount or percentage for program development and coordination activities by that agency (42 USC 3024(d)(1)(D); 45 CFR section 1321.17(f)(14)(i)).
- (2) A minimum amount or percentage for services related to access, in-home services, and legal assistance (42 USC 3026(a)(2)).

J. Program Income

- 1. Service providers are required to provide an opportunity to individuals being served under all parts B and C services program to make voluntary contributions for services received. These voluntary contributions are to be added to the amounts made available for service provision and must be used to expand the service from which they are collected (42 USC 3030c-2(b)).
- 2. Cost-sharing fees may be collected from Title III-B services except information and assistance, outreach, benefits counseling, or case management services. Cost sharing is not allowed for Title III-C services or Title VII Elder Rights Services (ombudsman, legal services, elder abuse prevention or other consumer protection services) (42 USC 3030c-2(a)(2)).

L. Reporting

For State Agency-

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* - Not Applicable.
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Program* -Not Applicable.
- c. SF-425, Federal Financial Reports- Semi-Annual (OMB No. 4040-0014)- Applicable.
- d. Supplemental Form to the Financial Status Report for all AoA Title III Grantees- (OMB No. 0985-0004).

2. Performance Reporting

Not Applicable

3. Special Reporting

- a. Certification of Maintenance of Effort, OMB No. 0985-0009;(42 USC 3029 (c); 45 CFR section 1321.49) Submitted yearly. A blank copy of the report and reporting instructions can be found at <https://acl.gov/sites/default/files/about-acl/2020-08/0009%20Certification%20of%20Maintenance%20Form%20FINAL.pdf>

1. Key Line Item(s):

- i. State Resources Expended: The State must certify State Resources Expended for the fiscal year in OMB No. 0985-0009. The resources included in this amount must be verifiable and may not include non-State expenditures or non-State in-kind resources, to ensure compliance with 42 USC 3029 (c); 45 CFR section 1321.49.

1. Subsequent submissions may be accepted when there is an identified error in reporting, this is submitted through their fiscal operations specialist and/or ACL regional administrator. Auditors should test most recent submission, resubmissions are a rare occurrence.

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

M. Subrecipient Monitoring1. *State Agency*

The State Agency is required to develop policies governing all aspects of programs operated under the state plan and to monitor their implementation, including assessing performance for quality and effectiveness and specifying data system requirements to collect necessary and appropriate data (45 CFR sections 1321.11 and 1321.17(f)(9)).

2. *Area Agencies*

Area Agencies are required to oversee the activities of service providers with respect to provision of services, reporting, voluntary contributions, and coordination of services (45 CFR section 1321.65).

IV. OTHER INFORMATION

The NSIP program may include both cash payments to states and use of cash to purchase commodities from USDA and for USDA administrative expenses. Assistance in the form of commodities is considered federal awards expended in accordance with 2 CFR section 200.40 definition of “federal financial assistance” and should be valued in accordance with 2 CFR section 200.502(g). Therefore, both cash expenditures for the purchase of food and the value of commodities received from the state distribution agencies should be (1) used when determining Type A programs and (2) included in the Schedule of Expenditures of Federal Awards in accordance with 2 CFR section 200.510(b).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.090 GUARDIANSHIP ASSISTANCE

I. PROGRAM OBJECTIVES

The objective of the Guardianship Assistance program is to help agencies authorized to administer Title IV-E programs to provide kinship guardianship assistance payments under Title IV-E of the Social Security Act, as amended, for relatives taking legal guardianship of children who have been in foster care.

II. PROGRAM PROCEDURES

The Guardianship Assistance program is administered at the federal level by the Children's Bureau, Administration on Children, Youth and Families, Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS). Funding is available (at the option of the Title IV-E agency) to the 50 states, the District of Columbia, Puerto Rico and federally recognized Indian tribes, Indian tribal organizations, and tribal consortia (hereinafter referred to as tribes) with approved Title IV-E plans, based on a Title IV-E plan and amendments, as required by changes in statutes, rules, and regulations submitted to and approved by the ACF Children's Bureau Associate Commissioner.

The Guardianship Assistance program provides federal matching funds to Title IV-E agencies with approved Title IV-E plans that provide ongoing assistance and/or non-recurring payments to relatives who have assumed legal guardianship of eligible children for whom they previously cared for as foster parents and enter into a guardianship assistance agreement. This funding became available beginning on October 7, 2008, with the enactment of amendments to the Social Security Act through the Fostering Connections to Success and Increasing Adoptions Act of 2008 (Pub. L. No. 110-351). The state or tribal Title IV-E agency may implement and claim allowable guardianship assistance program costs beginning on the first day of the quarter in which an approvable Title IV-E plan amendment is submitted to ACF to implement the Guardianship Assistance program (45 CFR section 1356.20(d)(8)). The program is considered an open-ended entitlement program and allows the state (including the District of Columbia and Puerto Rico) or tribe to be funded at a specified percentage (federal financial participation (FFP)) for program costs for eligible children.

The designated Title IV-E agency for this program also administers ACF funding provided for other Title IV-E programs, e.g., Adoption Assistance (Assistance Listing 93.659); Foster Care (Assistance Listing 93.658) and John H. Chafee Foster Care Program for Successful Transition to Adulthood (Assistance Listing 93.674), as well as the Child Welfare Services (Assistance Listing 93.645) and Promoting Safe and Stable Families (Assistance Listing 93.556) programs (Title IV-B of the Social Security Act, as amended) (Assistance Listing 93.556) funds available to states and those tribes qualifying for at least a minimum grant of \$10,000, and the Social Services Block Grant program (Assistance Listing 93.667) (Title XX of the Social Security Act, as amended) (states only). The Title IV-E agency may either directly administer the Guardianship Assistance program or supervise its administration by local level agencies. Where the program is administered by a state, in accordance with the approved Title IV-E plan, it must

be in effect in all political subdivisions of the state, and, if administered by them, program requirements must be mandatory upon them. Where the program is administered by a tribe, it must be in effect in all political subdivisions within the tribal service area(s) and for all populations to be served under the plan. If the program is administered by a political subdivision of a tribe, program requirements must be mandatory upon them (42 USC 671(a)(1-4) and 42 USC 679B(c)(1)(B)).

Source of Governing Requirements

The Guardianship Assistance program is authorized by Title IV-E of the Social Security Act, as amended (42 USC 670 *et seq.*). Implementing regulations are at 45 CFR parts 1355, 1356, and 1357.

States and tribes are required to adopt and adhere to their own statutes and regulations for program implementation, consistent with the requirements of Title IV-E and an approved Title IV-E plan.

Availability of Other Program Information

The Children's Bureau manages a policy issuance system that provides further clarification of the law and guides states and tribes in implementing the Guardianship Assistance program. This information may be accessed at <https://www.acf.hhs.gov/cb/laws-policies>

.III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment/Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement/Suspension & Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	Y	N	N	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Kinship Guardianship Assistance Payments*

Funds may be expended for kinship guardianship assistance payments made on behalf of eligible children (see III.E.1, “Eligibility – Eligibility for Individuals”) in the amount (subject to limitations in this paragraph) and manner prescribed in a negotiated, written, and binding kinship guardianship assistance agreement entered into with the prospective relative guardian (42 USC 673(d)(1)(A)(i)). Kinship guardianship assistance payments are made to relative guardians (as defined in an approved Title IV-E plan) based on the circumstances of the relative guardian and the needs of the child (42 USC 673(d)(1)(B)(i)). Kinship guardianship assistance payments cannot exceed the amount of the foster care maintenance payment the child would have received in a foster family home; however, the amount of the payments may be up to 100 percent of the foster care maintenance payment rate which would have been paid on behalf of the child if the child had remained in a foster family home (42 USC 673(d)(2)).

2. *Administrative Costs*

- a. Funds may be expended for costs directly related to the administration of the program. Approved public assistance cost allocation plans (states) or approved cost allocation methodologies (tribes) will identify which costs are allocated and claimed under this program (45 CFR section 1356.60(c)).
- b. Funds may be expended as specified in a kinship guardianship assistance agreement for the total cost of nonrecurring expenses associated with obtaining legal guardianship of the child (if the child meets program eligibility requirements), to the extent the total cost does not exceed \$2,000 (42 USC 673(d)(1)(B)(iv)).
- c. Funds expended by the Title IV-E agency for guardianship placements (including nonrecurring costs) are considered an administrative

expenditure and are subject to the matching requirements in III.G.1.e (42 USC 674(a)(3)(E)).

3. *Training*

- a. Funds may be expended for training (including both short- and long-term training at educational institutions through grants to such institutions or by direct financial assistance to students enrolled in such institutions) of personnel employed or preparing for employment by the agency administering the plan (42 USC 674(a)(3)(A)).
- b. Funds may be expended for short-term training of relative guardians; state/tribe-licensed or state/tribe-approved child welfare agencies providing services to children receiving Title IV-E assistance; child abuse and neglect court personnel; agency, child, or parent attorneys; guardians ad litem; and court appointed special advocates (42 USC 674(a)(3)(B)).

4. *Demonstration Projects*

Under Section 1130 of the Social Security Act, Title IV-E agencies may be granted authority to operate a demonstration project as set forth in ACF-approved terms and conditions. Any such terms and conditions identify the specific provisions of the Social Security Act that are waived, the additional activities that are allowable, the scope and duration (which may not exceed a maximum of five total years unless specifically approved for further continuation) of the demonstration project and the methodology for determining cost neutrality (either a matched comparison group or a capped allocation). All approved demonstration projects were required to end no later than September 30, 2019 (42 USC 1320a-9 and Section 201 of Pub. L. No. 112-34).

B. Allowable Costs/Cost Principles

Both states and tribes are subject to the requirements of OMB Circular A-87 (2 CFR part 225)/2 CFR part 200, subpart E, as implemented by HHS at 45 CFR part 75. States also are subject to the cost allocation provisions and rules governing allowable costs of equipment of 45 CFR part 95 (45 CFR sections 1355.57, 95.503, and 95.705).

E. Eligibility

1. Eligibility for Individuals

Kinship guardianship assistance payments may be paid on behalf of a child only if program eligibility is established through one of the following methods:

a. *General Eligibility*

All of the following requirements must be met to establish general eligibility:

- (1) The child was removed from his or her home pursuant to a voluntary placement agreement or as a result of a judicial determination to the effect that continuation in the home would be contrary to the welfare of the child (42 USC 673(d)(3)(A)(i)(I)).
- (2) The child was eligible for foster care maintenance payments under 42 USC 672 while residing for at least six consecutive months in the home of the prospective relative guardian (42 USC 673(d)(3)(A)(i)(II)).
- (3) The Title IV-E agency determined that being returned home or adopted are not appropriate permanency options for the child (42 USC 673(d)(3)(A)(ii)).
- (4) The Title IV-E agency determined that the child demonstrates a strong attachment to the prospective relative guardian and the relative guardian has a strong commitment to caring permanently for the child (42 USC 673(d)(3)(A)(iii)).
- (5) With respect to a child who has attained 14 years of age, the child has been consulted regarding the kinship guardianship arrangement (42 USC 673(d)(3)(A)(iv)).
- (6) The kinship guardianship assistance agreement must be a written and binding document entered into through negotiations with the prospective relative guardian and contain information concerning; the amount of, and manner in which, each kinship guardianship assistance payment will be provided under the agreement, and the manner in which the payment may be adjusted periodically, in consultation with the relative guardian, based on the circumstances of the relative guardian and the needs of the child (42 USC 673(d)(1)(A)(i) and 673(d)(1)(B)(i)).
- (7) A kinship guardianship assistance agreement that meets, or is amended to meet, all the requirements of 42 USC 673(d)(1) must be in place with a prospective relative guardian prior to the establishment of the legal guardianship. Payments may only begin once the relative guardian has committed to care for the child and has assumed legal guardianship for the child for whom they have cared as foster parents and for whom they have committed to care on a permanent basis (42 USC 671(a)(28) and 675(7)).
- (8) Any relative guardian must satisfactorily have met a criminal records check, including a fingerprint-based checks of national crime information databases (as defined in 28 USC 534(e)(3)(A)), and for checks described in 42 USC 671(a)(20)(B) on any relative guardian and any other adult living in the home of any relative

guardian, before the relative guardian may receive kinship guardianship assistance payments on behalf of the child (42 USC 671(a)(20)(C)).

- (9) Once a child is determined eligible to receive Title IV-E kinship guardianship assistance payments, he or she remains eligible in accordance with the terms of the kinship guardianship assistance agreement and the payments can continue until: (a) attainment of the age of 18 (or attainment of age 21 if the Title IV-E agency determines that the child has a mental or physical disability which warrants the continuation of assistance); (b) the Title IV-E agency determines that the relative guardian(s) is no longer legally responsible for the support of the child; (c) the Title IV-E agency determines the child is no longer receiving any support from the relative guardian(s); or (d) the occurrence of an event described in the kinship guardianship assistance agreement which requires suspension or discontinuation of kinship guardianship assistance payments (42 USC 673(a)(4)(A) and (B); 42 USC 673(d)(1) and Child Welfare Policy Manual section 8.5A Q/A#3).

A Title IV-E agency may amend its Title IV-E plan to provide for a definition of a “child” as an individual who has not attained 19, 20, or 21 years old (as the Title IV-E agency may elect) (42 USC 675(8)(B)(iii)). This definition of a child will then permit payment of kinship guardianship assistance for a child who is over age 18 (where the Title IV-E agency does not determine that the child has a mental or physical disability which warrants the continuation of assistance up to age 21) only if such a youth is part of an kinship guardianship assistance agreement that is in effect under Section 473 of the Social Security Act and the youth had attained 16 years of age before the agreement became effective. As an additional requirement, a youth over age 18 must also (as elected by the Title IV-E agency) be (a) completing secondary school (or equivalent); (b) enrolled in post-secondary or vocational school; (c) participating in a program or activity that promotes or removes barriers to employment; (d) employed 80 hours a month; or (e) incapable of any of these due to a documented medical condition (42 USC 675(8)(B)).

b. *Sibling Eligibility*

- (1) The child and any sibling of the eligible child (established under the General Eligibility requirements listed in paragraph E.1.a) may be placed in the same kinship guardianship arrangement if the state/tribal agency and the relative agree on the appropriateness of the arrangement for the siblings (42 USC 673(d)(3)(B)(i) and 42 USC 671(a)(31)).

- (2) Kinship guardianship assistance payments may be paid pursuant to a kinship guardianship assistance agreement (in accordance with requirements in paragraph E.1.a.(6)) on behalf of each sibling so placed. If kinship guardianship assistance payments are paid on behalf of the sibling, the Title IV-E agency must pay (in accordance with a kinship guardianship assistance agreement) the total cost of nonrecurring expenses associated with obtaining legal guardianship of the child, to the extent the total cost does not exceed \$2,000. The sibling does not have to meet the eligibility criteria in 42 USC 673(d)(3)(A) to receive kinship guardianship assistance payments or for the legal guardian to be reimbursed for the nonrecurring expenses related to costs of the legal guardianship (42 USC 673(d)(3)(B)(ii)).
- (3) Siblings of an eligible child must also individually meet the requirements specified in paragraphs E.1.a.(7) and (9) (42 USC 671(a)(28); 675(7) 42 USC 673(a)(4)(A) and (B); and 42 USC 675(8)(B)).

c. *Title IV-E Guardianship Waiver Post-Demonstration Projects*

- (1) After the termination of a demonstration project relating to guardianship conducted by a state under Section 1130 of the Social Security Act, children who, as of September 30, 2008, were receiving assistance or services under the project are deemed to be eligible under the approved Title IV-E state plan for the same assistance and services under the same terms and conditions that applied during the conduct of the project (42 USC 674(g)).
- (2) Post-demonstration assistance and services to eligible children assisted in accordance with terminated guardianship related demonstration projects as noted in paragraph E.1.c.(1) is eligible for Title IV-E claiming whether or not the state opts to operate a Guardianship Assistance program pursuant to 42 USC 673(d) (42 USC 674(g)).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

G. Matching, Level of Effort, Earmarking

1. Matching

The percentage of required state/tribal funding and associated federal funding (“federal financial participation”) varies by type of expenditure as follows:

- a. Third party in-kind contributions cannot be used to meet the state’s cost sharing requirements (Child Welfare Policy Manual Section 8.1F.Q#2 8/16/02). 45 CFR section 75.306 is not applicable to this program (45 CFR sections 1355.30(i) and 1355.30(n)(1); 45 CFR section 201.5(e)). Tribes directly operating a Title IV-E program are permitted to use in-kind funds from any allowable third-party sources to provide up to the full required non-federal share of administrative or training costs (42 USC 679c(c)(1)(D); 45 CFR section 1356.68(c)).
- b. *Kinship Guardianship Assistance Payments* – The percentage of Title IV-E funding in kinship guardianship assistance payments will be the FMAP percentage. This percentage varies by state and is available at <http://www.aspe.hhs.gov/health/fmap.htm> (42 USC 674(a)(1); 45 CFR section 1356.60(a)).

Separate tribal FMAP rates, which are based upon the tribe’s service area and population, apply to Guardianship Assistance program assistance payments incurred by tribes that are participating in Title IV-E programs through either direct operation of an approved Title IV-E plan or through operation of a Title IV-E agreement or contract with a state Title IV-E agency. The methodology for calculating tribal FMAP rates was provided through a final notice in the *Federal Register* that is available at <http://www.gpo.gov/fdsys/pkg/FR-2011-08-01/pdf/2011-19358.pdf>. Information on specific tribal FMAP rates for many tribes applicable for each FY and a table where such rates can be calculated for unlisted tribes is posted on the Children’s Bureau’s website and is available at <https://www.acf.hhs.gov/cb/focus-areas/tribes>. The calculated FMAP rate for each tribe applies unless it is exceeded by the FMAP rate for any state in which the tribe is located (42 USC 679B(d) and 42 USC 679B(e)).

- c. *Staff Training* – The percentage of federal funding in expenditures for short- and long-term training at educational institutions of employees or prospective employees (including travel and per diem) is 75 percent (42 USC 674(a)(3)(A) and (B); 45 CFR section 1356.60(b)).
- d. *Professional Partner Training* – The percentage of federal funding in expenditures for short-term training of relative guardians; state/tribe-licensed or state/tribe-approved child welfare agencies providing services to children receiving Title IV-E assistance; child abuse and neglect court personnel; agency, child or parent attorneys; guardians ad litem; and, court

appointed special advocates is 75 percent in FY 2013 and thereafter (42 USC 674(a)(3)(B)).

e. *Administrative Costs*

- (1) The percentage of federal funding for non-recurring Title IV-E agency kinship guardianship placement expenditures (not to exceed \$2,000 for each kinship guardianship) is 50 percent (42 USC 674(a)(3)(E)).
- (2) The percentage of federal funding of all other allowable administrative expenditures is 50 percent (42 USC 674(a)(3)(E)).

2. Level of Effort

Not Applicable

3. Earmarking

Not Applicable

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable
- d. *Form CB-496, Title IV-E Programs Quarterly Financial Report (OMB No. 0970-0205)* – Title IV-E agencies report current expenditures and information on children assisted for the quarter that has just ended and estimates of expenditures and children to be assisted for the next quarter. Prior quarter adjustment (increasing and decreasing) expenditures applicable to earlier quarters must also be separately reported on this form.

Key Line Items – The following line items contain critical information:

Part 1, Expenditures, Estimates and Caseload Data, columns (a) through (d) (Sections C and E (Guardianship Assistance Program))

Part 2, Prior Quarter Expenditure Adjustments – Guardianship Assistance, columns (a) through (d)

Part 3, Foster Care, Adoption Assistance and Guardianship Assistance Demonstration Projects, columns (a) through (e)

2. Performance Reporting

DEPARTMENT OF HEALTH AND HUMAN SERVICES**ASSISTANCE LISTING 93.095 HHS PROGRAMS FOR DISASTER RELIEF
APPROPRIATIONS ACT–NON-CONSTRUCTION****ASSISTANCE LISTING 93.096 HHS PROGRAMS FOR DISASTER RELIEF
APPROPRIATIONS ACT–CONSTRUCTION****I. PROGRAM OBJECTIVES**

The objectives of these programs are to assist in disaster response and recovery and other activities directly related to Hurricane Sandy.

II. PROGRAM PROCEDURES**Covered Programs and Eligibility**

As described in the terms and conditions of the award, programs in this cluster may be used for purposes consistent with the following Department of Health and Human Services (HHS) programs:

- a. Head Start
- b. Social Services Block Grant
- c. Health services (including mental health services)
- d. Repair or rebuilding of nonfederal biomedical or behavioral research facilities

HHS may award grants, cooperative agreements, or contracts to eligible organizations in New York and New Jersey and, as applicable, in other states that were declared as major disaster jurisdictions by the Federal Emergency Management Agency (FEMA). These are as follows: the states of Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, Ohio, Pennsylvania, Rhode Island, Virginia, and West Virginia, and the District of Columbia.

Source of Governing Requirements

This funding is authorized by the Disaster Relief Appropriations Act, Division A (Pub. L. No. 113-2), Title VI and Title X, Chapter 8.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	Y	Y	Y	N	N	Y	N	N

A. Activities Allowed or Unallowed

1. The terms and conditions of the award will provide the allowable uses of these funds.
2. Funds provided under Assistance Listings 93.095 and 93.096 may not result in duplication of benefits. If costs are reimbursed by FEMA, under a contract for insurance, or by self-insurance, they cannot be charged to the award (Pub. L. No. 113-2, Division A, 127 Stat. 11, 127 Stat. 34).
3. Funding subject to the Social Services Block Grant (SSBG) requirements may be used for health services, including mental health services, and for costs of renovating, repairing, and rebuilding health care facilities, child care facilities, or other social services facilities (Pub. L. No. 113-2, Division A, 127 Stat. 33).

F. Equipment and Real Property Management

The following specific requirements apply only to awards when the terms and conditions of the award identify funding subject to Head Start requirements found in 45 CFR Part 1309:

1. Head Start grantees are required to operate and maintain facilities, real property, modular units, and related assets to ensure their use for the funded project purpose(s) and to adequately protect the federal interest in such facilities, real property, and related assets (45 CFR Part 1309).
2. Real property acquired or constructed with Head Start funds or which has undergone major renovation with Head Start funds, may not be conveyed, transferred, assigned, mortgaged, leased, or otherwise encumbered or subordinated unless approved by ACF (45 CFR section 1309.21(b)).
3. A Head Start grantee must file a Notice of Federal Interest (also referred to as “reversionary interest”) when construction or major renovation begins or when an existing facility or land is acquired on which a facility will be built. The Notice of Federal Interest, meeting the requirements of 45 CFR section 1309.21(d)(2), must be filed in the appropriate public records of the jurisdiction in which the property is located (45 CFR section 1309.21(d)(2)). For modular units, the Notice of Federal Interest must be posted in a conspicuous place on the modular unit (45 CFR section 1309.31).

G. Matching, Level of Effort, Earmarking**1. Matching**

Any matching requirements will be indicated in the terms and conditions of the award.

2. Level of Effort

Not Applicable

3. Earmarking

Any earmarking requirements will be indicated in the terms and conditions of the award.

H. Period of Performance

Unless otherwise provided by statute or a waiver has been granted by the Office of Management and Budget (OMB), funds must be expended within 24 months of the beginning date of the period of performance (Pub. L. No. 113-2, Section 904(c)).

1. Funding subject to the SSBG requirements must be spent by September 30, 2017 (Pub. L. No. 113-2, 127 Stat. 33).
2. OMB granted the National Institutes of Health a waiver for construction and infrastructure projects. See Funding Opportunity Announcement RFA-OD-13-007 at <http://grants.nih.gov/grants/guide/rfa-files/RFA-OD-13-007.html>, Part 2. Full Text of Announcement, Section II. Award Information, Award Project Period: “The total project period may not exceed 5 years. Funds will be provided in a single award with a 60-month budget and project period.”

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

Although funding for programs in this Hurricane Sandy Relief Cluster may be subject to the requirements of the Head Start (Assistance Listing 93.600) or SSBG (Assistance Listing 93.667) programs, they are separate from and, therefore, are not clustered with the Head Start or SSBG programs.

Awards from Assistance Listings 93.095 and 93.096 that are identified in the notice of award as Research and Development (R&D) should be shown on the Schedule of Expenditures of Federal Awards as R&D and should be audited with the R&D cluster rather than this Hurricane Sandy Relief Cluster.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.153 COORDINATED SERVICES AND ACCESS TO RESEARCH FOR WOMEN, INFANTS, CHILDREN, AND YOUTH (RYAN WHITE HIV/AIDS PROGRAM PART D WOMEN, INFANTS, CHILDREN, AND YOUTH (WICY) PROGRAM)

I. PROGRAM OBJECTIVES

The objective of this program is to provide family-centered care in an outpatient or ambulatory care setting (directly or through contracts or memoranda of understanding) for low income, uninsured, and medically underserved women, infants, children, and youth with HIV.

II. PROGRAM PROCEDURES

The Department of Health and Human Services (HHS) administers the Ryan White HIV/AIDS Program (RWHAP) Part D Coordinated Services for Women, Infants, Children, and Youth (WICY) through the Health Resources and Services Administration's (HRSA) HIV/AIDS Bureau (HAB). The RWHAP Part D WICY programs provide family-centered outpatient or ambulatory care setting (directly or through contracts or memoranda of understanding) for low income, uninsured, and medically underserved women, infants, children, and youth with HIV. Recipients can also provide additional support services to patients and affected family members.

Grants under the RWHAP Part D WICY are awarded to public and nonprofit private entities, including health facilities operated by or pursuant to a contract with the Indian Health Service (42 USC 300ff-71(a)). Services may be provided directly by the recipient or through contractual agreements or memoranda of understanding with other service providers.

Source of Governing Requirements

The RWHAP Part D WICY is authorized under Section 2671 of Title XXVI of the PHS Act, as amended by the Ryan White HIV/AIDS Treatment Extension Act of 2009 (Pub. L. No. 111-87) and is codified at 42 USC 300ff-71. The Minority AIDS Initiative (MAI) is authorized under Section 2693(b)(2)(D) of the PHS Act (42 USC 300ff-121(b)(2)(D)).

The RWHAP Part D WICY has no program-specific program regulations.

Availability of Other Program Information

Further information about the RWHAP Part D WICY is available at <https://ryanwhite.hrsa.gov/>.

Additional information on allowable uses of funds under the RWHAP Part D WICY is contained in policy notices and standards found at <https://ryanwhite.hrsa.gov/grants/policy-notice>

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	N	Y	Y	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Funds may be used for family-centered care involving outpatient or ambulatory care, directly or through contracts or memoranda of understanding, for women, infants, children, and youth with HIV. This includes provision of professional, diagnostic, and therapeutic services by a primary care provider, or a referral to and provision of specialty care; and services that sustain program activity and contribute to or help improve those services (42 USC 300ff-71(a) and (h)(3)).

Funds are not required to be used for primary care services when payments are available for such services from other sources (including Titles XVIII, XIX and XXI of the Social Security Act) (42 USC 300ff-71(i)).

- b. Funds may be used for the following support services for patients: (1) family-centered care, including case management; (2) referrals for

additional services, including inpatient hospital services, treatment for substance abuse and mental health services, and other social and support services as appropriate; (3) additional services necessary to enable the patient to participate in the RWHAP Part D WICY, including services to recruit and retain youth with HIV; and (4) provision of information and education on opportunities to participate in HIV/AIDS-related clinical research (42 USC 300ff-71(b)). Affected family members (people not identified with HIV) may be eligible for RWHAP support services in limited situations, but these services for affected individuals must always benefit people with HIV. Examples include, but are not limited to, mental health services, and respite care. Services to non-affected family members who meet these criteria may not continue subsequent to the death of the RWHAP client. Refer to HAB Policy Clarification Notice #16-02: Ryan White HIV/AIDS Program Services: Eligible Individuals & Allowable Uses of Funds for further information on circumstances in which affected family members may be eligible to receive RWHAP funded support services.

- c. Funds must be used for the establishment of a clinical quality management program to assess the extent to which HIV health services are consistent with the most recent Public Health Service guidelines for the treatment of HIV/AIDS and related opportunistic infections, and, as applicable, to develop strategies for ensuring that such services are consistent with the guidelines for improvement in the access to and quality of HIV health services (42 USC 300ff-71(f)(2)). Policy Clarification Notice #15-02 <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/pcn-15-02-cqm.pdf>.
- d. Funds may be used for administrative expenses, which are defined as funds used by recipients for grant management and monitoring activities, including costs related to any staff or activity other than provision of services. Indirect costs included in a federally negotiated indirect rate are considered part of administrative costs (see III.G.3, “Matching, Level of Effort, Earmarking – Earmarking,” for a limitation on expenditures for administrative costs) (42 USC 300ff-71(f)(1), (h)(1), and (h)(2)). Funds may be used for administrative expenses; no more than 10 percent on administrative expenses.

2. *Activities Unallowed*

- a. Funds may not be used for AIDS programs or to develop materials, designed to promote or encourage, directly, intravenous drug abuse or sexual activity, whether homosexual or heterosexual (42 USC 300ff-84).
- b. Funds may not be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug (Consolidated Appropriations Act, 2016 (Pub. L. No. 114-113), Division H, Title V, Section 520, and

subsequent appropriations, as applicable). Other elements of syringe services programs may be allowable if in compliance with applicable HHS and HRSA-specific guidance.

- c. Funds may not be used to purchase or improve land or to purchase, construct, or make permanent improvement to any building (Funding Opportunity Announcement, Section IV.6).
- d. Funds may not be used to make cash payments to intended recipients of RWHAP services (Policy Clarification Notice #16-02, Ryan White HIV/AIDS Program Services: Eligible Individuals and Allowable Uses of Funds <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/service-category-pcn-16-02-final.pdf>).
- e. Charges that are billable to third party payors (e.g., private health insurance, prepaid health plans, Medicaid, Medicare, HUD, other RWHAP funding including ADAP).
- f. To directly provide housing or health care services (e.g., HIV care, counseling, and testing) that duplicate existing services.
- g. Pre-Exposure Prophylaxis (PrEP) or nonoccupational Post-Exposure Prophylaxis (nPEP) medications or the related medical services. As outlined in the June 22, 2016, RWHAP and PrEP program letter, the RWHAP legislation provides grant funds to be used for the care and treatment of PLWH, thus prohibiting the use of RWHAP funds for PrEP medications or related medical services, such as physician visits and laboratory costs. RWHAP Part D funds can be used toward Psychosocial Support Services, a component of family-centered care, which may include counseling and testing and information on PrEP to eligible clients' partners and affected family members, within the context of a comprehensive PrEP program.
- h. Fundraising expenses.
- i. Lobbying activities and expenses.
- j. International travel.

J. Program Income

The Notice of Award provides guidance on the use of program income. The addition method is used for the Ryan White HIV/AIDS Program Part D. Program income must be used for activities described in III.A.1, "Activities Allowed."

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.210 TRIBAL SELF-GOVERNANCE PROGRAM – IHS COMPACTS/FUNDING AGREEMENTS

I. PROGRAM OBJECTIVES

The objective of this program is to “improve and perpetuate the government-to-government relationship between Indian tribes and the United States and to strengthen tribal control over federal funding and program management” by enabling tribes to assume programs, services, functions, and activities (or portions thereof) (PSFAs) of the Indian Health Service (IHS), Department of Health and Human Services (HHS) that are otherwise available to American Indian/Alaska Native (AI/AN) Tribes or Tribal Organizations (T/TO), who can request to enter into a Self-Governance (Title V) compact.

II. PROGRAM PROCEDURES

Title V of the Indian Self-Determination and Education Act (ISDEAA) (Pub. L. No. 106-260), which was signed into law August 18, 2000, provided permanent self-governance authority within IHS. A Self-Governance compact is a legally binding and mutually enforceable written agreement, including such terms as the parties intend to control year after year, that affirms the government-to-government relationship between a Self-Governance Tribe and the United States. As a result, the provisions of compacts vary significantly, with only minimal cross-cutting compliance requirements.

A funding agreement (FA) is a legally binding and mutually enforceable written agreement that identifies the PSFAs that the Self-Governance Tribe will carry out, the funds being transferred from Service Unit, Area and Headquarters levels in support of those PSFAs, and such other terms as are required, or may be agreed upon, pursuant to Title V. Funding under FAs may be multi-year agreements.

Tribal Title V compactors who enter into a Self-Governance compact may provide health care services directly at facilities operated by the compactor or by operating a contract health services program as part of the FA. Contract health services are services provided to IHS-eligible beneficiaries by private sector health-care providers, such as hospitals and physicians, under contract with the tribal compactor.

Source of Governing Requirements

Title V of the ISDEAA, as amended, is codified at 25 USC5381 et seq.

Regulations concerning the general administration of Indian health programs are found at 42 CFR Part 136. Regulations implementing ISDEAA Title V and establishing the IHS Tribal Self-Governance program are found at 42 CFR Part 137.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	N	Y	N	Y	N	N	Y

A. Activities Allowed or Unallowed

1. Funds may be used to carry out and deliver the health services PSFA. The FA generally identifies the PSFAs to be performed or administered by the tribe (25 USC 458aaa-4(d)).
2. A Self-Governance Tribe may incur costs that are reasonable in amount and appropriate to the investment responsibilities of the Self-Governance Tribe (42 CFR section 137.101(c)).
3. Funds provided under compacts, funding agreements or grants made pursuant to Title V may be used to meet matching or cost participation requirements under any other federal or nonfederal program; when used in this manner, they are considered nonfederal funds (42 CFR section 137.217) and are subject to Single Audit requirements.

B. Allowable Costs/Cost Principles

1. A Self-Governance Tribe must apply the applicable OMB cost principles, except as modified by 25 U.S.C. § 5325, other provisions of law, or any exemptions to applicable OMB circulars subsequently granted by OMB (42 CFR section 137.167).
2. For contract health services, the tribal compactor is the payer of last resort. Before seeking payment from the tribal compactor, the contract provider must first seek payment from all alternate resources, such as health care providers and institutions; health care programs including programs under the Social Security Act (i.e., Medicare or Medicaid); state or local health care programs; and private insurance. When a third-party liability is established after the claim is paid, reimbursement from the third party should be sought (42 CFR section 136.61).

C. Cash Management

A Self-Governance Tribe may retain and spend interest earned on any funds paid under a compact or FA (25 U.S.C. § 5388(h); 42 CFR section 137.100).

E. Eligibility**1. Eligibility for Individuals**

- a. *Eligibility for Services within Facilities Operated by the IHS (Which Are Billed by IHS to the Tribe) or Run by a Tribal Organization for the Federal Government*
 - (1) Individuals of Indian descent belonging to the Indian community served by the local facilities and program are eligible to receive services. An individual may be regarded as within the scope of the Indian health and medical service if the individual is regarded as an Indian by the community in which the individual lives as evidenced by such factors as tribal membership, enrollment, residence on tax-exempt land, ownership of restricted property, active participation in tribal affairs, or other relevant factors in keeping with the general Bureau of Indian Affairs practices in the jurisdiction (42 CFR section 136.12(a)(2)).
 - (2) Services will also be made available, as medically indicated, to a non-Indian woman pregnant with an eligible Indian's child during the period of pregnancy through postpartum (generally about six weeks after delivery). In cases when the woman is not married to the eligible Indian under applicable state or tribal law, paternity must be acknowledged in writing by the Indian or determined by order of a court of competent jurisdiction. (42 CFR section 136.12(a)).

- (3) The services will also provide medically indicated services to non-Indian members of an eligible Indian's household if a medical officer in charge determines this is necessary to control acute infectious disease or a public health hazard (42 CFR section 136.12(a)).
 - (4) In case of an emergency, as an act of humanity, individuals not eligible under 42 CFR 136.12 may be provided temporary care and treatment in Service facilities (42 CFR section 136.14(a)).
 - (5) Services may be provided on a cost basis to otherwise ineligible persons in accordance with the criteria in Section 813 of the Indian Health Care Improvement Act (25 U.S.C. 1621e).
- b. *Eligibility for Services in the Contract Health Services Component of IHS*
- (1) In order to qualify for the Contract Health Services component of IHS:
 - (a) An individual must meet the requirements outlined in paragraph III.E.1.a, above (42 CFR section 136.23(a)); and
 - (b) Must either reside in the United States and on a reservation located within a Contract Health Service Delivery Area (CHSDA) as defined under 42 CFR section 136.22; or, if the individual does not reside on a reservation, reside within a CHSDA; and
 - (c) Be a member of the tribe or tribes located on that reservation or of the tribes or tribes for which the reservation was established; or maintain close economic and social ties with said tribe or tribes (42 CFR section 136.23(a)).
 - (2) *Students* – Students continue to be eligible for contract health services during their full-time attendance at programs of vocational, technical, or academic education, including normal school breaks and for a period not to exceed 180 days after the completion of their studies (42 CFR section 136.23(b)).
 - (3) *Transients* – Transient persons, such as those who are in travel or are temporarily employed, remain eligible for contract health services during their absence (42 CFR section 136.23(b)).
 - (4) *Other Persons* – Other persons who leave the CHSDA in which they are eligible and are neither transients nor students remain eligible for contract health services for a period not to exceed 180 days from such departure (42 CFR section 136.23(c)).

- (5) *Foster Children* – Indian children who are placed in foster care outside a CHSDA by order of a court of competent jurisdiction and who were eligible for contract health services at the time of the court order shall continue to be eligible for contract health services while in foster care (42 CFR section 136.23(d)).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

H. Period of Performance

1. An FA shall have the term mutually agreed to by the parties. Absent notification from an Indian Tribe that it is withdrawing or retroceding the operation of one or more PSFAs identified in the FA, the FA shall remain in full force and effect until a subsequent FA is executed (42 CFR section 137.55).
2. All funds paid to an Indian tribe in accordance with a compact or FA shall remain available until expended (25 U.S.C. 5388(i)).

J. Program Income

1. For direct care services, the tribal compactor is eligible to pursue reimbursement from all applicable sources (25 USC 1621e, 42 USC 1395qq, and 42 USC 1396j).
2. All Medicare, Medicaid, or other program income earned by a tribe shall be treated as supplemental funding to that negotiated in the FA. The tribe may retain all such income and expend such funds in the current year or in future years except to the extent that the Indian Health Care Improvement Act (25 U.S.C. § 1601 et seq.) provides otherwise for Medicare and Medicaid receipts (25 U.S.C. § 5325 and 25 U.S.C. § 5388(j)) Such funds shall not result in any offset or reduction in the amount of funds the Self-Governance Tribe is authorized to receive under its FA in the year the program income is received or for any subsequent fiscal year (42 CFR section 137.110).
3. *Use of Funds Collected through HHS* – Tribes electing to receive Medicare and Medicaid reimbursement through HHS shall first use such income for the purpose of making any improvements in the hospital or clinic that may be necessary to achieve or maintain compliance with the conditions and requirements applicable generally to facilities of such type under Medicare or Medicaid programs (Pub. L. No. 106-291, 114 Stat. 978; 42 USC 1395qq; and 25 USC 1642).

N. Special Tests and Provisions

1. Character Investigations by Indian Tribes and Tribal Organizations

Compliance Requirements the Indian Child Protection and Family Violence Prevention Act (25 USC 3207) requires tribes and tribal organizations that receive funds under the ISDEAA to conduct an investigation of the character of each individual who is employed or is being considered for employment in a position that involves regular contact with, or control over Indian children 25 U.S.C. § 3207(c); 34 U.S.C. § 20351. The Act further states that the tribe or tribal organization can employ only individuals who meet standards of character that are no less stringent than those prescribed by the regulations, which are outlined in 42 CFR section 136.405, and only after an individual has been the subject of a satisfactory background investigation as described in 42 CFR section 136.406. Tribes and tribal organizations may conduct their own background investigations, contract with private firms, or may request that a Federal or State agency conduct investigations., FBI fingerprint checks are required Tribes and tribal organizations can provisionally hire individuals prior to completion of a satisfactory background investigation only if, at all times prior to receipt of the satisfactory background investigation and when Indian children are in the care of the individual, the individual is within sight and under the supervision of someone on staff that has a completed satisfactory background investigation.

Audit Objectives Determine whether tribes and tribal organizations are performing the required background investigations by or being considered for employment at Tribal and IHS health care facilities.

Suggested Audit Procedures

- a. Obtain and review policies and procedures for the performance of background investigations for health care employees.
- b. Perform tests of selected security and personnel files of health care facilities employees occupying positions that have regular contact with or control over Indian children visiting Tribal or IHS health care facilities within the scope of the individual's duties and responsibilities or contact with those Indian children on a recurring and foreseeable basis to verify:
 - (1) A suitability determination was conducted based on the tribe/tribal organizations policy and procedure for adjudicating eligibility for employment (42 CFR section 136.411).
 - (2) The minimum standards of character were met following a satisfactory background investigation that includes a review of (42 CFR section 136.406):
 - (a) Documentation regarding the individual's trustworthiness, through inquiries with the individual's references and places of employment and education;

(b) A criminal history background check, which includes a fingerprint check through the Criminal Justice Information Services Division of the Federal Bureau of Investigation (FBI), under procedures approved by the FBI, and inquiries to State and Tribal law enforcement agencies for the previous five years of residence listed on the individual's application; and

(c) Evidence that a determination has been made as to whether the individual has been found guilty of or entered a plea of nolo contendere or guilty to any felonious offense or any of two or more misdemeanor offenses under Federal, State, or Tribal law involving crimes of violence; sexual assault, molestation, exploitation, contact, or prostitution; crimes against persons; or offenses committed against children.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.217 FAMILY PLANNING – SERVICES

I. PROGRAM OBJECTIVES

The purpose of the Family Planning – Services Project Grant (FPSPG) program is to provide funds for the education, counseling, and comprehensive medical and social services necessary to enable individuals to freely determine the number and spacing of their children; and, by doing so, to help improve pregnancy outcomes, reduce infertility, and promote the health of females, males, and their families.

II. PROGRAM PROCEDURES

The FPSPG program is administered by the Office of the Secretary (OS)/Office of the Assistant Secretary for Health (OASH), a component of the Department of Health and Human Services (HHS). Within OS, the Office of Population Affairs is responsible for the program. The program has no statutory funds allocation formula: HHS makes discretionary grant awards the amounts of which are based on estimates of the amounts necessary for successful project performance.

Any public or private nonprofit entity located in a state (which includes one of the 50 United States, District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the U.S. Virgin Islands, , American Samoa, the U.S. Outlying Islands (Midway, Wake, et al.), the Marshall Islands, the Federated State of Micronesia, and the Republic of Palau) is eligible to apply for a grant under this program. Faith-based organizations and American Indian/Alaska Native/Native American organizations are also eligible to apply for Title X family planning services grants. The entity applying for the grant should identify existing as well as non-Title X resources available to address the needs for family planning services within the identified service area to ensure resources and services are not duplicated. In furtherance of maximizing access and best serving individuals in need in the service areas, entities should make reasonable efforts to avoid duplication of effort in the provision of services across the Title X network.

Family planning services under the FPSPG program must be voluntary and must be made available without coercion and with respect for the privacy, dignity, and social and religious beliefs of the individuals being served. To the extent possible, entities that receive grants shall encourage family participation in projects assisted under this program.

Source of Governing Requirements

The FPSPG is authorized under Title X of the Public Health Service Act, as amended (42 USC 300 et seq.). The implementing regulations are at 42 CFR Part 59, Subpart A). In addition, sterilization of clients as part of the Title X project must be consistent with Public Health Service (PHS) sterilization regulations (42 CFR Part 50, Subpart B). Grants administration regulations at 45 CFR Part 75 (“Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards”) and other relevant regulations also apply to Title X awards.

Availability of Other Program Information

Additional information is available on the HHS Office of Population Affairs website at <http://www.hhs.gov/opa/>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	N	N	Y	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

a. *Provision of Services* – A project supported by the FPSPG must provide a broad range of family planning methods and services, including infertility services and services for adolescents. Services that may be funded for a particular project are identified in the grant application. They may include:

- (1) *Medical services* – These include providing information on all FDA-approved methods of contraception (including natural family planning methods); counseling services; physical examinations, including cancer detection and laboratory tests; issuance of

contraceptive supplies; periodic follow-up examinations; and referral to other medical facilities when medically indicated.

- (2) *Social services* – These include counseling, referral to and from other social and medical service agencies, and any ancillary services which may be necessary to facilitate clinic attendance.
 - (3) *Information and education* – These activities are designed to achieve community understanding of the program’s objectives, inform the community of the availability of services, and promote continued participation in the project by persons likely to benefit from its services (42 CFR sections 59.5(a)(1) and (b)).
- b. *Purchase of Services* – If the grantee obtains services for its clients by contract or other similar arrangements with service providers, it must do so according to agreements with the providers that specify payment rates and procedures (42 CFR section 59.5(b)(9)).

2. *Activities Unallowed*

No Title X funds shall be used in projects where abortion is a method of family planning (42 CFR section 59.5(a)(5)).

G. Matching, Level of Effort, Earmarking

1. Matching

The federal share of a FPSPG project’s costs may never equal 100 percent nor be less than 90 percent (with certain exceptions). The federal and nonfederal shares are stated in the Notice of Grant Award issued to the grantee (42 CFR sections 59.7(b) and (c)).

2. Level of Effort

Not Applicable

3. Earmarking

Not Applicable

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable

c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.224 HEALTH CENTER PROGRAM (COMMUNITY HEALTH CENTERS, MIGRANT HEALTH CENTERS, HEALTH CARE FOR THE HOMELESS, AND PUBLIC HOUSING PRIMARY CARE)

ASSISTANCE LISTING 93.527 GRANTS FOR NEW AND EXPANDED SERVICES UNDER THE HEALTH CENTER PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Health Center Program (HCP) grants under the Health Center Program Cluster is to improve the health of the nation's underserved communities by ensuring continued access to comprehensive, culturally competent, quality primary health care services regardless of ability to pay. HCP grants support a variety of community-based and patient-directed public and private nonprofit organizations that provide primary and preventive health care services to the nation's underserved.

II. PROGRAM PROCEDURES

The purpose of the HCP grants is to support the costs of operating health centers that serve medically underserved populations.

HCP grants are awarded and administered at the federal level by the Bureau of Primary Health Care (BPHC), HRSA, HHS. Based on applications submitted to and approved by HRSA, grants are provided to public and private nonprofit organizations, including tribal, faith-based, and community-based organizations. Factors considered include the current availability of services in the geographical area and the population to be served. Grantees may provide services directly or enter into service and care arrangements via contracts or other formal referral arrangement.

The authorizing statute for the HCP requires health centers to annually develop and submit to HRSA a budget that reflects expenses and revenues (including HCP grant(s)) necessary to accomplish the health center project service delivery plan. As such, the total budget must include projections from all revenue sources, including fees, premiums, and third party reimbursements reasonably expected to be received to support operations; and state, local, private, and other operational funding provided to the health center. The amount of the HCP grant funding to be provided by HRSA may not exceed the amount by which the projected cost of operations exceeds the projected non-grant revenue sources (42 USC 254b(e)(5)(A), (k)(3)(D), and (k)(3)(I)(i) and 42 CFR section 51c.106).

Source of Governing Requirements

The HCP is authorized under Section 330 of the Public Health Service Act, as amended by Section 10503 of The Patient Protection and Affordable Care Act (Pub. L. No. 111-148). The statutory provisions are codified at 42 USC 254b. The implementing program regulations for Community Health Centers (CHCs) and Migrant Health Centers (MHCs) are codified at 42 CFR parts 51c and 56, respectively. The Health Care for the Homeless (HCH) and Public Housing Primary Care (PHPC) components do not have program-specific regulations.

The Coronavirus Preparedness and Response Supplemental Appropriations Act (CPRSAA), 2020 (Pub. L. No. 116-123) provided one-time funding to current Health Center Program award recipients to support preventing, preparing for, and responding to the novel coronavirus disease 2019 (COVID-19). As with Health Center Program operating awards, unallowable costs include fundraising and the construction of facilities. Other unallowable costs include purchasing or upgrading an electronic health record that is not certified by the Office of the National Coordinator for Health Information Technology (ONCHIT) or for construction-related activities including new construction activities, including additions or expansions; minor alteration or renovation projects; installation of trailers and pre-fabricated modular units; facility or land purchases; or purchase or lease of mobile vans/units, or costs already supported by HCP operational funding.

The Coronavirus Aid, Relief, and Economic Security (CARES) Act (Pub. L. No. 116-136) provided one-time funding to current Health Center Program award recipients to support the detection of COVID-19 and/or the prevention, diagnosis, and treatment of COVID-19, including maintaining or increasing health center capacity and staffing levels during a coronavirus-related public health emergency. As with Health Center Program operating awards, unallowable costs include fundraising and the construction of facilities. Other unallowable costs include purchasing or upgrading an electronic health record that is not certified by the ONCHIT; new construction activities, including additions or expansions; major alteration and renovation (A/R) projects valued at \$500,000 or greater in total federal and non-federal costs (excluding the cost of allowable moveable equipment); installation of a permanently affixed modular or prefabricated building; facility or land purchases; or significant exterior site work such as new parking lots or storm water structures. Additionally, these funds may not be used for costs already supported by the HCP operational funding or CPRSAA funding.

Paycheck Protection Program and Health Care Enhancement Act (Pub. L. No. 116-139) provided one-time funding to support current Health Center Program award recipients and look-alikes to purchase, administer, and expand capacity for testing to monitor and suppress COVID-19. Health Center Program look-alikes are organizations that HRSA determines meet the requirements of the Health Center Program as well as requirements set forth in sections 1861(aa)(4) and 1905(l)(2)(B) of the Social Security Act. As with Health Center Program operating awards, unallowable costs include fundraising and the construction of facilities. Other unallowable costs include costs already supported with HCP, CPRSAA, or CARES Act funding; those that are reimbursed or compensated by other federal or state programs that provide for such benefits; the purchase or upgrade of an electronic health record that is not certified by the ONCHIT; new construction activities, including additions or expansions; major alteration and renovation projects valued at \$500,000 or greater in total federal and non-federal costs (excluding the cost of allowable moveable equipment); installation of trailers and permanently affixed modular or prefabricated buildings; facility or land purchases; and significant exterior site work such as new parking lots or storm water structures.

American Rescue Plan (ARP) Act (Pub. L. No. 117-2) provided one-time funding to current Health Center Program award recipients and look-alikes to prevent, mitigate, and respond to COVID-19 and to enhance health care services and infrastructure. As with Health Center Program operating awards, unallowable costs include fundraising and the construction of facilities. Other unallowable costs include purchasing or upgrading an electronic health record

that is not certified by the ONCHIT; new construction activities, including additions or expansions; major alteration and renovation (A/R) projects valued at \$500,000 or greater in total federal and non-federal costs (excluding the cost of allowable moveable equipment); installation of a permanently affixed modular or prefabricated building; facility or land purchases; or significant exterior site work such as new parking lots or storm water structures. Additionally, these funds may not be used for costs already paid for by other state or federal programs, HCP operational funding, or CPRSAA, CARES Act, or ARP Act funding.

Availability of Other Program Information

Other program information is available from the HRSA website at <https://bphc.hrsa.gov/>, <https://bphc.hrsa.gov/programrequirements>, and <https://www.hrsa.gov/grants/manage-your-grant/policies-regulations-guidance>.

Information on specific COVID-19 funding resources is available at <https://bphc.hrsa.gov/emergency-response/coronavirus-info>.

COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	Y	N	Y	N	Y

A. Activities Allowed or Unallowed1. *Activities Allowed*

a. Required primary health services include:

- (1) Basic health services related to family medicine, internal medicine, pediatrics, obstetrics, or gynecology that are furnished by physicians and, when appropriate, by physician assistants, nurse practitioners, and nurse midwives (42 USC 254b(b)(1)(A)(i)(I)).
- (2) Diagnostic laboratory and radiological services (42 USC 254b(b)(1)(A)(i)(II)).
- (3) Preventive health services, including prenatal and perinatal services; appropriate cancer screening; well-child services; immunizations against vaccine-preventable diseases; screenings for elevated blood lead levels, communicable diseases, and cholesterol; pediatric eye, ear, and dental screenings; voluntary family planning services; and preventive dental services (42 USC 254b(b)(1)(A)(i)(III)).
- (4) Emergency medical services (42 USC 254b(b)(1)(A)(i)(IV)).
- (5) Pharmaceutical services, as may be appropriate for particular centers (42 USC 254b(b)(1)(A)(i)(V)).
- (6) Referrals to providers of medical services (including specialty referral when medically indicated) and other health-related services (including substance abuse and mental health services) (42 USC 254b(b)(1)(A)(ii)).
- (7) Patient case management services (including counseling, referral, and follow-up services) and other services designed to assist health center patients in establishing eligibility for and gaining access to federal, state, and local programs that provide or financially support the provision of medical, social, educational, housing, or other related services (42 USC 254b(b)(1)(A)(iii)).
- (8) Services that enable individuals to use the services of the health center (including outreach and transportation services and, if a substantial number of the individuals in the population served by the center are of limited English-speaking ability, the services of appropriate personnel fluent in the language spoken by a predominant number of such individuals) (42 USC 254b(b)(1)(A)(iv)).

- (9) Education of patients and the general population served by the health center regarding the availability and proper use of health services (42 USC 254b(b)(1)(A)(v)).
 - (10) Substance abuse services for grantees with HCH grants (42 USC 254b(h)(2)).
- b. Additional health services that may be provided as appropriate to meet the health needs of the population to be served include:
- (1) Behavioral and mental health and substance abuse services (42 USC 254b(2)(A)).
 - (2) Recuperative care services (42 USC 254b(b)(2)(B)).
 - (3) Environmental health services, including the detection and alleviation of unhealthful conditions associated with water supply, chemical and pesticide exposures, air quality, or exposure to lead; sewage treatment; solid waste disposal; rodent and parasitic infestation; field sanitation; housing; and other environmental factors related to health (42 USC 254b(b)(2)(C)).
 - (4) For MHCs, special occupation-related health services for migratory and seasonal agricultural workers, including screening for and control of infectious diseases (including parasitic diseases) and injury prevention programs (including prevention of exposure to unsafe levels of agricultural chemicals including pesticides) (42 USC 254b(b)(2)(D)).
- c. Funds may be used for the reimbursement of members of the grantee's governing board, if any, for reasonable expenses incurred by reason of their participation in board activities (42 CFR sections 51c.107(b)(3) and 56.108(b)(3)).
- d. Funds may be used for the cost of insurance for medical emergency and out-of-area coverage (42 CFR section 51c.107(b)(6)).
- e. Funds may be used for the acquisition and lease of buildings and equipment (including the costs of amortizing the principal of, and paying the interest on, loans for equipment) (42 USC 254b(e)(2)).
- f. Funds may be used for the costs of providing training related to the provision of required primary health care services and additional health services and to the management of health center programs (42 USC 254b(e)(2)).

2. *Activities Unallowed*

- a. Federal funds awarded under the HCP may not be expended for any abortion. These limitations do not apply to an abortion (1) if the pregnancy is the result of an act of rape or incest; or (2) in the case when a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the woman in danger of death unless an abortion is performed (Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260)). See <https://www.hrsa.gov/sites/default/files/hrsa/grants/manage/grants-policy-bulletin-2022-apr.pdf> for further details on legislative mandates.
- b. Federal funds awarded under the HCP may not be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug, provided that this limitation does not apply to the use of funds for elements of a program other than making such purchases if the relevant state or local health department, in consultation with the Centers for Disease Control and Prevention, determines that the state or local jurisdiction, as applicable, is experiencing, or is at risk for, a significant increase in hepatitis infections or an HIV outbreak due to injection drug use, and such program is operating in accordance with state and local law (Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260)).

B. Allowable Costs/Cost Principles

Costs charged to federal funds under the HCP award funds must comply with the cost principles at 45 CFR Part 75, Subpart E, and any other requirements or restrictions on the use of federal funding.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Uniform Data System (UDS) (OMB No. 0915-0193) – This system comprises two separate sets of reports that are submitted annually, the Universal Report and Grant Reports. The conditions for their use are:

- a. Grantees that receive a single grant under the HCP or that receive CHC funding only are required to complete the *Universal Report* only.
- b. Grantees that receive multiple awards (in addition to or other than CHC funding) must complete a *Universal Report* for the combined grants and individual *Grant Reports* for their HCH, MHC, and PHPC funding, if applicable.

The Key Line Items described below indicate which report would be reviewed based on the type of HCP grant award received. See Uniform Data System (UDS) Resources for additional detail available at:

<https://bphc.hrsa.gov/datareporting/reporting/index.html>. The Calendar Year 2021 UDS Reporting Manual is available at:

<https://bphc.hrsa.gov/sites/default/files/bphc/datareporting/pdf/2021-uds-manual.pdf>.

This information collection is mandatory under the Health Center Program authorized by section 330 of the Public Health Service (PHS) Act (42 U.S.C. 254b)

Key Line Items – The following line items contain critical information:

Total number of patients (Table 4: Selected Patient Characteristics, Income as a Percent of Poverty Guidelines, Universal Report, Line 6 Column a) reflects the total number of health center patients served during the calendar year. Duplication in the patient count information is of specific concern for this key line item.

[Universal Report and if applicable, Grant Report]

Total Physician Clinic and Virtual Visits (Table 5: Staffing and Utilization, Line 8, Columns b (clinic visits) and b2 (virtual visits)) captures total numbers of patient visits, delivered in-clinic and delivered virtually, attributed to physician personnel. Reported visits must meet the criteria for a countable visit as defined in the UDS Reporting Manual.

[Universal Report and if applicable, Grant Report]

Total NPs, PAs, and CNMs Clinic and Virtual Visits (Table 5: Staffing and Utilization, Line 10a, columns b (clinic visits) and b2 (virtual visits)) captures total numbers of patient visits, delivered in-clinic and delivered virtually, attributed to Nurse Practitioners, Physician Assistants, and Certified Nurse-

Midwives. Reported visits must meet the criteria for a countable visit as defined in the UDS Reporting Manual.

[Universal Report and if applicable, Grant Report]

Total accrued cost before donations and after allocation of overhead (Table 8A: Financial Costs Line 17 Column c) captures data on total financial costs of all in-scope activities provided in the calendar year.

[Universal Report Only]

Total accrued medical staff and other medical cost after allocation of overhead excluding lab and x-ray cost (Table 8A: Financial Costs, Line 1, Column c and Table 8A, Line 3, Column c) captures the total cost After Allocation of Facility and Non-clinical Support Services for Medical Personnel and Medical/Other Direct costs.

[Universal Report Only]

Total BPHC Health Center Program grant(s) drawn-down for the period from January 1 to December 31, of the calendar measurement year (Table 9E: Other Revenues, Line 1g, Column a).

[Universal Report Only]

Total accrued BPHC COVID-19 Supplemental grant(s) draw-down from January 1 to December 31, of the calendar measurement year (Table 9E: Other Revenues, Line 1q, Column a).

[Universal Report Only]

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Sliding Fee Discounts

Compliance Requirements Health centers must prepare and apply a sliding fee discount schedule (SFDS) so that the amounts owed for health center services by eligible patients are adjusted (discounted) based on the patient's ability to pay as follows:

- a. Sliding fee discounts are applied to fees for health center services provided to all individuals and families with annual incomes at or below 200 percent of the Federal Poverty Guidelines (FPG);
- b. A full discount is applied to fees for health center services provided to individuals and families with annual incomes at or below 100 percent of the FPG, or the health center applies only a nominal charge;

- c. Fees for health center services are discounted based on gradations in family size and income for individuals and families with incomes above 100 and at or below 200 percent of the FPG; and
- d. No sliding fee discount is applied to fees for health center services provided to individuals and families with annual incomes above 200 percent of the FPG.

(42 USC 254b(k)(3)(E), (F), and (G); 42 CFR sections 51c.303(e), (f), and (g); and 42 CFR sections 56.303(e), (f), and (g))

Audit Objectives Determine whether the health center has applied sliding fee discounts to patient charges consistent with its sliding fee discount schedule.

Suggested Audit Procedures

- a. Review the health center's sliding fee discount schedule(s).
- b. Review a sample of financial records for patients treated during the audit period to determine whether patient charges were appropriately adjusted based on income and family size by applying the health center's sliding fee discount schedule. (Note: Auditors are not required to test any documentation used to establish or verify income.)

2. Compliance with Consolidated Appropriations Act

Compliance Requirements Federal funds awarded under the HCP may not be expended for any abortion. These limitations do not apply to an abortion (1) if the pregnancy is the result of an act of rape or incest; or (2) in the case where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the woman in danger of death unless an abortion is performed (Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260)).

Audit Objectives Determine whether the health center (HC) performs abortions and if so, whether it has policies and procedures in place to ensure compliance with the Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260).

Suggested Audit Procedures

- a. Inquire of the HC staff and examine the accounting records to determine whether any abortions were performed during the audit period. If no, no further procedures need be undertaken by the auditor.
- b. If abortions were performed during the period, determine whether policies and procedures are in place that address the appropriate use of federal funds awarded under the HCP, specifically related to ensuring that HCP grant funds are not used for abortion activities unless one of the exceptions in the Consolidated Appropriations Act described above is met. If no policies are in place, proceed to

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.268 IMMUNIZATION COOPERATIVE AGREEMENTS

I. PROGRAM OBJECTIVES

The objective of the Immunization Cooperative Agreement program is to reduce and ultimately eliminate vaccine preventable diseases (VPDs) by increasing and maintaining high immunization coverage. Emphasis is placed on populations at highest risk for under-immunization and disease, including children eligible under the Vaccines for Children (VFC) program.

II. PROGRAM PROCEDURES

The Immunization Cooperative Agreements program consists of two parts: discretionary Section 317 immunization funding and VFC financed with mandatory Medicaid (Assistance Listing 93.778) funding.

The objective of the discretionary Section 317 Immunization Cooperative Agreement program is to reduce and ultimately eliminate VPDs by increasing and maintaining high immunization coverage. Emphasis is placed on populations at highest risk for under-immunization and disease, which includes VFC-eligible children. The statute refers to development of programs for all individuals for whom vaccines are recommended, including infants, children, adolescents, and adults. The intent of the discretionary Section 317 funding is to supplement, not supplant, each grantee's immunization effort at the state/local level. The Centers for Disease Control and Prevention (CDC), through its cooperative agreement guidance, has identified the following areas of activity for programmatic emphasis and funding prioritization: reduce the number of indigenous cases of VPDs; ensure that all children are appropriately vaccinated; improve vaccine safety surveillance; increase routine vaccination coverage levels for adolescents; and increase the proportion of adults who are vaccinated annually against influenza and who have ever been vaccinated against pneumococcal disease.

VFC, which is authorized by and financed through Title XIX of the Social Security Act (Medicaid), is activity-based financial assistance and direct assistance in the form of vaccine-purchase funds and program operations funds to support implementation of the VFC program. VFC is administered by CDC and is funded entirely by the federal government. VFC funds are provided to eligible organizations to develop and operate programs designed to ensure effective delivery of vaccination services to eligible children through enrolled providers of medical care. Grantees are required to encourage a variety of providers to participate in the VFC program and to administer vaccines in an appropriate cultural context. Grantees also are required to ensure that providers comply with the requirements of the VFC program. Other criteria, detailed in annual cooperative agreement application guidance documents, may also apply.

Under VFC, children from birth through 18 years of age are eligible for VFC-purchased vaccine if they are Medicaid-eligible, American Indian/Alaskan Native, or without health insurance.

Children who are insured but whose insurance does also not cover vaccination are eligible to receive VFC vaccine at federally qualified health centers or rural health clinics. The intent of the VFC program is to increase vaccination coverage levels by reducing financial barriers to

vaccination. The VFC program ensures that all eligible children receive the benefits of all recommended vaccines, thus strengthening immunity levels in their communities. The program also ensures that access to newly recommended vaccines for children in low-income and uninsured families does not lag behind that for children in middle- and upper-income families. In addition, the program helps to ensure that there is an adequate supply of routinely recommended vaccines when public health emergencies occur, including vaccine supply shortages.

VFC and Section 317 financial assistance (FA) is provided/obligated directly to immunization grantees for administrative and operations costs. Similarly, Section 317 FA is obligated to grantees for the purchase of vaccines not available through federal contracts. Funds for direct assistance (DA) vaccines are maintained at CDC and are periodically obligated to manufacturer contracts. Grantees are given estimated target budgets for their DA vaccine purchase needs. CDC uses these budgets as a control mechanism for vaccine orders.

Vaccines will be maintained by a federally contracted third party distributor that receives orders from and ships vaccine to providers. Periodically, when the federal distributors' inventory reaches certain minimum thresholds, the distributor makes a request to CDC for replenishment vaccines. CDC reviews these requests and assigns funding sources to them (VFC or 317) based on the aggregate of grantee-submitted spend plans. Orders for the vaccines are processed and sent to the appropriate manufacturer(s), referencing funds that were previously obligated to the manufacturer contracts. The manufacturer fulfills the order and ships the vaccines to the federally contracted distributor.

Source of Governing Requirements

These programs are authorized under 42 USC 247b, 42 USC 243, 42 USC 300aa-3, 300aa-25, and 300aa-26, 42 USC 1396s. Regulations specific to discretionary Section 317 grants may be found at 42 CFR Part 51b.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	N	N	Y	N	Y

A. Activities Allowed or Unallowed

1. Discretionary Section 317 cooperative agreements funds may be used to establish and maintain a preventive health service program, including:
 - a. Research into the prevention and control of diseases that may be prevented through vaccination;
 - b. Demonstration projects for the prevention and control of such diseases;
 - c. Public information and education programs for the prevention and control of such diseases;
 - d. Education, training, and clinical skills improvement activities in the prevention and control of such diseases for health professionals; and
 - e. Operational activities associated with the conduct of a successful immunization program (42 USC 247b(k)(1)).

2. The VFC program is intended primarily as a vaccine purchase and supply program for eligible children. VFC funds may be expended to support costs associated with the following:
 - a. VFC vaccine ordering;
 - b. VFC vaccine distribution for grantees that have not transitioned to a federally contracted vaccine distributor; and
 - c. Direct VFC program operations, such as provider recruitment and enrollment, overall VFC program coordination, vaccine management and accountability, VFC provider accountability and site visit assessments, and VFC program evaluation (42 USC 1396s).

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions**1. Control, Accountability, and Safeguarding of Vaccine**

Compliance Requirements Effective control and accountability must be maintained for all vaccine under the VFC program. Vaccine must be adequately safeguarded and used solely for authorized purposes (42 USC 1396s). This includes administration only to VFC program-eligible children, as defined in 42 USC 1396s(b)(2)(A)(i) through (A)(iv), regardless of the child’s parent’s ability to pay (42 USC 1396s(c)(2)(C)(iii)).

Audit Objectives Determine whether the grantee provides oversight of program-enrolled providers to ensure that proper control and accountability is maintained for vaccine, vaccine is properly safeguarded (based on guidance provided by CDC), and VFC-eligibility screening is conducted.

Suggested Audit Procedures

- a. Determine if the grantee has a written procedure for overseeing program-enrolled providers that allows for sampling of provider’s inventory records and assessment of storage procedures. Grantees are not required to sample the records of all providers.
- b. Determine if the grantee sampled the provider’s inventory records to ensure proper recording of receipt, transfer, and usage of vaccine.

- c. Determine if the grantee reviewed the provider's storage of vaccine for proper safeguarding, including risks of loss from theft, expiration, or improper storage temperature.
- d. Determine if the grantee reviewed a sample of provider medical records for documentation of eligibility screening.
- e. Determine if the necessary follow-up procedures were followed if any deficiencies were identified.

2. Record of Immunization

Compliance Requirements A record of vaccine administered shall be made in each person's permanent medical record (or in a permanent office log or file to which a legal representative shall have access upon request) (42 USC 300aa-25), which includes:

- a. Date of administration of the vaccine;
- b. Vaccine manufacturer and lot number of the vaccine; and
- c. Name and address and, if appropriate, the title of the health care provider administering the vaccine.

Audit Objectives Determine whether the grantee provides oversight of vaccinating providers to ensure that the required information has been recorded for vaccine recipients.

Suggested Audit Procedures

- a. Determine if the grantee has a written procedure for ensuring that the required information has been recorded for vaccine recipients.
- b. Determine if the grantee tested a sample of vaccination records to ascertain if the required information was maintained.
- c. Determine if the grantee took any follow-up action if the required records and information were not maintained.

IV. OTHER INFORMATION

After the end of each month and after the end of each federal fiscal year, CDC advises each grantee of the value of all federally funded vaccine which was distributed, in lieu of cash, directly to the grantee and/or on behalf of the grantee to vaccinating providers located in the grantee's geographical area. The annual dollar value of federally funded vaccine should be treated by the grantee as expenditures under a federal award for purposes of determining audit coverage and reporting on the Schedule of Expenditures of Federal Awards. Vaccinating providers and vaccinated individuals are not considered subrecipients; therefore, the value of

vaccine received is not considered as expenditures under a federal award for purposes of determining audit coverage and reporting for those entities.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.423 WAIVERS FOR STATE INNOVATION FOR SECTION 1332 OF THE PATIENT PROTECTION AND AFFORDABLE CARE ACT (PPACA)

I. PROGRAM OBJECTIVES

The purpose of the State Innovation Waiver (1332 waiver) is to permit states to pursue innovative strategies for providing their residents with access to high-quality, affordable health insurance while retaining the basic protections of the PPACA (42 USC § 18052). The 1332 waivers allow states to implement innovative ways to provide access to quality health care that is at least as comprehensive and affordable as would be provided absent the waiver, provides coverage to a comparable number of residents of the state as would be provided coverage absent a waiver, and does not increase the federal deficit.

II. PROGRAM PROCEDURES

Section 1332 provides the secretaries of Health and Human Services (HHS) and the US Department of the Treasury (the Treasury) (collectively referred to in this document as “the Departments”) with the discretion to approve a state’s proposal to waive specific provisions of the PPACA (42 USC § 18052), provided the proposal meets certain requirements (stated above). Upon receipt of an application, the Centers for Medicare & Medicaid Services’ (CMS) Center for Consumer Information and Insurance Oversight (CCIIO) and Treasury’s Office of Tax Policy will coordinate the review and approval process with the Departments and applicable federal agencies (this may vary based on the type of application). CCIIO will provide coordination support, including management of the State Innovation Waiver mailbox. A state seeking a waiver should apply by submitting a completed application in electronic format to stateinnovationwaivers@cms.hhs.gov.

A State Innovation Waiver Cross-Component Work Group (1332 workgroup) includes subject matter experts and key contacts from the departments and other federal agencies, as needed, to examine the scope of each application. Each application is examined to certify that a waiver meets the guardrail requirements including the comprehensiveness standard (as required under the statute). While the 1332 workgroup does not have approval authority itself, it will ensure that the Departments are involved at all levels of the application review process prior to rendering a final decision. Each waiver application is reviewed for completeness, and then approved or denied, as appropriate.

Once a state’s 1332 waiver application has been reviewed and approved, there is a coordinated grants management and oversight and monitoring process. The grant funding is linked to pass-through funding calculations, which are completed annually based on data that states must report back to the departments every year to fulfill regulatory oversight, monitoring, and compliance requirements. The state is entitled to the equivalent of forgone exchange financial assistance (e.g., Premium Tax Credits) that the state would have received absent the waiver. This requires modeling both the waiver and non-waiver health insurance markets in the state, specifically exchange premiums, and the resulting financial assistance the state would have received absent the waiver. This provides for little discretion related to the amount of pass-through funding and

grant-award amount except to devise the most appropriate methodology to model the waiver and non-waiver markets in the state. State Innovation Waivers are available for effective dates beginning on or after January 1, 2017. Funds are available for expenditure by grantees for a period of up to five years effective on the date specified in the grant specific terms and conditions (STCs), and states have the option to extend their waiver program beyond the initial five-year period of performance.

Source of Governing Requirements

The 1332 waiver program is authorized by the PPACA (Pub. L. No. 111-148) (March 23, 2010), which was amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. No. 111-152). The Departments promulgated implementing regulations in 2012, which are codified at 45 CFR Part 155 (Health and Human Services) and 31 CFR Part 33 (Treasury), respectively.

Availability of Other Program Information

1. CCIIO has published general program information, including guidance on application requirements on its website at https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Section_1332_State_Innovation_Waivers-.html.
2. CCIIO has also developed a checklist for Section 1332 State Innovation Waiver applications, including specific items applicable to high-risk pool/state-operated reinsurance program applications at <https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Downloads/Checklist-for-Section-1332-State-Innovation-Waiver-Applications-5517-c.pdf>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	N	Y	N	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Individual awards are based on the waiver application approved by the Departments and are subject to the STCs in the Notice of Award (NoA). Activities are allowable as indicated in the grant STCs.
- b. 1332 waivers allow the state to waive certain provisions of PPACA and the Internal Revenue Code (IRC) to allow for state innovation. Activities are allowable (as approved in the waiver application approval process) that enable the state to:
 - (1) Modify or eliminate qualified health plan (QHP) certification and the exchanges as the vehicle for determining eligibility for subsidies and enrolling consumers in coverage.
 - (a) *Waives Part I of Subtitle D of the PPACA related to the establishment of QHPs.*
 - (b) *Waives Part II of Subtitle D of the PPACA related to the establishment of health insurance exchanges and related activities.*
 - (2) Modify the rules governing covered benefits and subsidies.
 - (a) *Waives Section 1402 of the PPACA related to cost-sharing subsidies to eligible individuals who purchase non-group health insurance through a health insurance exchange.*
 - (b) *Waives Section 36B of IRC related to premium tax credits to eligible individuals who purchase non-group health insurance through an exchange.*

- (3) Modify or eliminate penalties on large employers who fail to offer affordable coverage to their full-time employees.
 - (a) *Waives Section 4980H of the IRC shared responsibility requirement for large employers (employer mandate).*
 - (b) *Waives Section 5000A of the IRC related to the requirement for individuals to maintain health insurance coverage (individual mandate).*
- c. 1332 waiver funds may be used for all program services consistent with the four criteria or “guardrails” in the statute:
 - (1) *Comprehensive Coverage* – States must provide coverage that is “at least as comprehensive” as coverage absent the waiver.
 - (2) *Affordable Coverage* – States must provide “coverage and cost-sharing protections against excessive out-of-pocket spending that are at least as affordable” as coverage absent the waiver.
 - (3) *Scope of Coverage* – States must provide coverage to “at least a comparable number of residents” as would have been covered without the waiver.
 - (4) *Federal Deficit* – The waiver must not increase the federal deficit.
 - (a) 1332 waivers allow states to modify the rules regarding covered benefits, subsidies, insurance marketplaces, and individual and employer mandates **only** if they meet these statutory “guardrails.”
2. *Activities Unallowed*
 - a. 1332 waiver funds may not be used for any program activities that are beyond the scope of the “guardrails” or are not consistent with the state’s approved waiver application and the grant STCs.
 - b. Promotional items and capital or operating costs unassociated with the approved activities are not allowable.

B. Allowable Costs/Cost Principles

1. Costs charged to federal funds under the 1332 Waiver program must comply with the cost principles at 45 CFR Part 75, Subpart E, and any other requirements or restrictions on the use of federal funding outlined in the grant STCs.
2. Grantees should supplement 1332 waiver funds with state funds or other sources of funding to implement the waiver program as needed. States are responsible for

making up any budget shortfalls to ensure that they fully implement the activities of their waiver program.

3. Grantees must comply with the HHS Grants Policy Statement and have approved documentation to prove pass-through funds were used for approved 1332 waiver activities. Sufficient evidence (as indicated in the approved waiver application) is required to substantiate any drawdown of funding from the Payment Management System (PMS).
4. Prospective and retroactive payments are allowed depending on the business model and grantee need in congruence with the STCs.
 - a. Grantees may make **prospective drawdowns** of funds prior to the completion of approved, funded activities after providing sufficient evidence of need when requesting to drawdown funds (as outlined in the waiver application).
 - b. Grantees may make **retroactive drawdowns** of funds as reimbursement for invoices received following completion of approved waiver activities (Reinsurance and Small Business Health Options program waivers fall under this category).
5. Agreed upon indirect costs are allowable using the current approved Negotiated Indirect Cost Rate Agreement.

C. Cash Management

1. Under the 1332 Waiver program, funds awarded in a fiscal year are not required to be expended in that same fiscal year. Grantees may roll over unused funds awarded during the prior year for use in the following fiscal year for purposes of implementing the waiver program.
2. Grantees must comply with the HHS Grants Policy Statement and are required to maintain written policies and procedures to minimize the time elapsing between the transfer of funds from PMS and the disbursement of those funds by the recipient. The amount of time a grantee holds funds may not exceed three days. However, grantees are permitted to have access to the entire award amount in PMS until business needs dictate that they drawdown funds for the 1332 Waiver program.
3. Grantees must comply with the fiscal and budgetary reporting requirements and the grant STCs (SF424 and SF424a).
4. Unless otherwise specified in the grant STCs, grantees will request funds directly from PMS and are not able to hold drawdown funds in their bank account for longer than three days. All funds must either be distributed by the grantee or returned to the Treasury within three days.

5. Grantees are encouraged to use the cash-basis accounting method.
6. Grantees are not required to track the hourly wages of each employee that was paid by the grant vs. paid by program revenue. It is not a program requirement that these employees be tracked by the hour, but rather tracked by a percentage.

I. Procurement and Suspension and Debarment

1. States must comply with the same policies and procedures they use for procurements from their nonfederal funds. Nonfederal entities other than states, including those operating federal programs as subrecipients of states, must follow the procurement standards set out in 2 CFR 200. They must use their own documented procurement procedures, which reflect applicable state and local laws and regulations, provided that the procurements conform to applicable federal statutes and the procurement requirements identified in 2 CFR 200.
2. Nonfederal entities and contractors are subject to the non-procurement debarment and suspension regulations. Grantees must regularly monitor the System for Award Management (SAM) for suspensions and debarments prior to issuing any subawards or contracts. Any parties that are debarred, suspended, or otherwise excluded are ineligible for participation in federal assistance programs or activities.
3. Grantees must comply with the requirement to maintain an active SAM registration. This requires that grantees review and update Central Contractor Registration (CCR) information at least annually after the initial registration, and more frequently if required by changes in the information.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not applicable.

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L. for audit guidance.

M. Subrecipient Monitoring

See Part 3.M. for audit guidance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**ASSISTANCE LISTING 93.461 HRSA COVID-19 CLAIMS REIMBURSEMENT FOR THE UNINSURED PROGRAM AND THE COVID-19 COVERAGE ASSISTANCE FUND****I. PROGRAM OBJECTIVES**

The HRSA COVID-19 Claims Reimbursement to Health Care Providers and Facilities for Testing, Treatment, and Vaccine Administration for the Uninsured program (HRSA COVID-19 Uninsured Program) and the COVID-19 Coverage Assistance Fund (HRSA COVID-19 CAF) are administered by the Health Resources and Services Administration (HRSA). The HRSA COVID-19 Uninsured Program provides claims reimbursements to eligible health care providers for conducting COVID-19 testing for the uninsured, treating uninsured individuals with a COVID-19 diagnosis, and administering FDA-authorized or FDA-licensed COVID-19 vaccines to uninsured individuals. The HRSA COVID-19 CAF provides COVID-19 vaccine administration fee claims reimbursement to eligible health care providers who provide COVID-19 vaccines to patients enrolled in health coverage that either does not cover vaccine administration fees or does cover the administration fees but has patient cost-sharing.

II. PROGRAM PROCEDURES

This program is administered as a claims reimbursement program for eligible health care providers. For the HRSA COVID-19 Uninsured Program, health care providers who have conducted COVID-19 testing or provided treatment for uninsured individuals with a COVID-19 diagnosis on or after February 4, 2020, or administered FDA authorized or FDA-licensed COVID-19 vaccines on or after December 14, 2020, can electronically request claims reimbursement through the program and will be reimbursed generally at Medicare rates, subject to available funding. This program does not provide coding guidance to providers. Rather, the program provides billing guidance to allow providers to identify and submit only claims eligible for reimbursement under this program, which is exclusively for reimbursing providers for COVID-19 testing of uninsured individuals, treatment for uninsured individuals when COVID-19 is the primary reason for treatment, and the administration of licensed or authorized COVID-19 vaccines to uninsured individuals.

Prior to paying claims, HRSA's claims processing contractor performs procedures to identify and reject claims for patients with insurance coverage. If errors or additional coverage are found, the provider receives notice of rejection and may request reconsideration.

For the HRSA COVID-19 CAF, health care providers who have administered FDA authorized or FDA-licensed COVID-19 vaccines on or after December 14, 2020, for individuals whose insurance health plans either do not cover vaccination fees or cover them with patient cost-sharing (underinsured individuals) can electronically request claims reimbursement through the program and will be reimbursed generally at Medicare rates, subject to available funding. Providers will be reimbursed at the national Medicare rate for vaccine administration, and for patient charges related to COVID-19 vaccination, including co-payments for vaccine administration, deductibles for vaccine administration, and co-insurance, subject to available

funding. Prior to paying claims, HRSA’s claims processing contractor performs procedures to identify and reject claims for patients who have insurance coverage. If errors or additional coverage are found, the provider receives notice of rejection and may request reconsideration.

For both the UIP and the CAF, steps involve voluntarily enrolling as a provider participant (recipient), signing attesting to the terms and conditions of the program, checking patient eligibility, submitting patient information, submitting claims electronically (subject to Medicare timely filing requirements), and receiving payment via direct deposit.

Source of Governing Requirements

The HRSA COVID-19 Uninsured Program has the following two components:

1. Testing – The reimbursement for COVID-19 testing services is authorized via:
 - Families First Coronavirus Response Act (Pub. L. No. 116-127) (FFCRA) [Division A, Title V, Office of the Secretary, Public Health and Social Service Emergency Fund 134 Stat. 182]
 - Paycheck Protection Program and Health Care Enhancement Act (PPPHCA) (Pub. L. No. 116-139) [134 Stat. 626]

The FFCRA and PPPHCA “testing fund” was fully disbursed on February 17, 2021. As a result, the HRSA COVID-19 Uninsured Program reimbursement of COVID-19 testing services is subsequently authorized via:

- The Coronavirus Aid, Relief, and Economic Security (CARES) Act (Pub. L. No. 116-136, 134 Stat. 563)
 - Paycheck Protection Program and Health Care Enhancement Act (PPPHCA) (Pub. L. No. 116-139)
 - Coronavirus Relief and Response Supplemental Appropriations Act (CRRSA) (Pub. L. No. 116-260)
 - The American Rescue Plan Act (ARPA) (Pub. L. No. 117-2)
2. Treatment and Vaccine Administration – The reimbursement for COVID-19 treatment services and vaccine administration is authorized via:
 - The Coronavirus Aid, Relief, and Economic Security CARES Act (Pub. L. No. 116-136, 134 Stat. 563)
 - Paycheck Protection Program and Health Care Enhancement Act (PPPHCA) (Pub. L. No. 116-139)
 - Coronavirus Relief and Response Supplemental Appropriations Act (CRRSA) (Pub. L. No. 116-260)

The HRSA COVID-19 CAF is authorized via:

- The Coronavirus Aid, Relief, and Economic Security (CARES) Act (Pub. L. No. 116-136, 134 Stat. 563)
- Paycheck Protection Program and Health Care Enhancement Act (PPPHCA) (Pub. L. No. 116-139)
- Coronavirus Relief and Response Supplemental Appropriations Act (CRRSA) (Pub. L. No. 116-260)

Under the definition of federal financial assistance, claims paid under the HRSA COVID-19 Uninsured Program and the HRSA COVID-19 CAF are considered other financial assistance. Per the applicability table in 45 CFR section 75.101(b)(1), other financial assistance is not subject to the post federal award or cost principles requirements in 45 CFR Part 75, subparts C, D, and E, respectively, with the exception that 45 CFR section 75.303 (Internal Controls) and sections 75.351 through 75.353 (Subrecipient Monitoring and Management) are applicable.

Under the terms and conditions of the awards, the HRSA COVID-19 Uninsured Program and the HRSA COVID-19 CAF are subject to 45 CFR section 75.302 (Financial management and standards for financial management systems) and 45 CFR sections 75.361 through 75.365 (Record Retention and Access).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	N	N	N	N	N	N	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

Required health services as described in the terms and conditions for uninsured individuals:

- a. Reimbursement of payments for COVID-19 testing and testing-related items for individuals who do not have any health care coverage at the time the services were rendered.

- b. Reimbursements of payments for COVID-19 treatment as determined by the program for individuals who do not have any health care coverage at the time the services were rendered.
- c. Reimbursements of payments for COVID-19 vaccine administration fee(s) as determined by the program for individuals who do not have any health care coverage at the time the services were rendered.

Required health services as described in the terms and conditions for underinsured individuals:

- a. Reimbursement for administering COVID-19 vaccinations to individuals with health plans that do not cover, or only partially cover, COVID-19 vaccine administration fees.

2. *Activities Unallowed*

As described in the terms and conditions.

- a. Funds provided will not be used to reimburse expenses that have been reimbursed from other sources or that other sources are obligated to reimburse. The recipient will not include costs for which payment was received in cost reports or otherwise seek uncompensated care reimbursement through federal or state programs for items or services for which payment was received.
- b. If the recipient subsequently receives reimbursement for any items or services for which the recipient requested Payment from the Provider Relief Fund, the recipient will return to HHS that portion of the Payment which duplicates payment or reimbursement from another source.
- c. (HRSA COVID-19 Uninsured Program only) If the recipient, prior to attesting to these terms and conditions, charged any uninsured individuals a fee for COVID-19 testing, testing-related items and services, treatment, or vaccine administration fees for which the recipient subsequently received a payment from this program, the recipient will communicate to the uninsured individuals they do not owe recipient any money for that care or treatment. If an uninsured individual paid the recipient for any portion of such care or treatment, the recipient must return the payment to the uninsured individual in a timely manner.
- d. (HRSA COVID-19 Uninsured Program only) Services not covered by traditional Medicare will also not be covered under this program. (For Medicare coverage see: <https://www.cms.gov/files/document/03052020-medicare-covid-19-fact-sheet.pdf>.) In addition, the following services are excluded: any treatment without a COVID-19 primary diagnosis, except for

pregnancy when the COVID-19 code may be listed as secondary; hospice services; and outpatient prescription drugs.

B. Allowable Costs/Cost Principles

While 45 CFR 75, Subpart E – Cost Principles do not apply to the HRSA COVID-19 Uninsured Program and the HRSA COVID-19 CAF, allowable costs charged to the HRSA COVID-19 Uninsured Program and the HRSA COVID-19 CAF must conform to, including the limitations and exclusions of, the terms and conditions.

E. Eligibility

1. Eligibility for Individuals

Services must be for individuals, who at the time the services were provided, were uninsured (UIP) or underinsured (CAF) as described in the terms and conditions.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

N. Special Tests and Provisions

1. Balance Billing

Compliance Requirements Under the terms and conditions of the award the recipient will not engage in “balance billing” or charge any type of cost sharing for any COVID-19 testing, testing-related items and services provided, treatment, or vaccination administration fees for which the recipient receives a payment from this program. The recipient shall consider payment received under this program to be payment in full for such care or treatment. The recipient will not bill the patient for any remaining balance.

Audit Objectives Determine whether recipient complied with the requirement to reframe from “balance billing” or charging any type of cost sharing.

Suggested Audit Procedures

- a. Review the recipients’ billing policies and procedures applicable to patients for which claim reimbursements were received.
- b. Perform procedures to identify client payments or third-party billings for patients for which claim reimbursements were received.

IV. OTHER INFORMATION

Guidance documents on HRSA webpages on the [Official web site of the U.S. Health Resources & Services Administration | \(hrsa.gov\)](https://www.hrsa.gov) website, such as those listed under “Availability of Other Program Information,” are provided only to clarify the applicable laws, regulations, and terms and conditions. Such guidance documents do not create new compliance requirements. However, non-federal entities in substantial compliance with the guidance applicable in these guidance documents at the time of a transaction are considered in compliance with the underlying compliance requirements.

The time between claim submission and verification of allowable claims from the contractor is minimal, therefore, auditees should use the accounting principles applicable for the recipients accounting basis for reporting program expenditures.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.498 PROVIDER RELIEF FUND (PRF) AND AMERICAN RESCUE PLAN (ARP) RURAL DISTRIBUTION

I. PROGRAM OBJECTIVES

Note: This program is considered a “higher risk” program for 2023, pursuant to 2 CFR section 200.519(c)(2). Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process.

The PRF and ARP Rural Distribution are administered by the Health Resources and Services Administration (HRSA) and support eligible health care providers in the battle against the COVID-19 pandemic. PRF provides relief funds to eligible providers of health care services and support for health care-related expenses or lost revenues attributable to coronavirus. ARP Rural Distribution addresses the disproportionate impact that COVID-19 has had on rural communities and rural health care providers. PRF and ARP Rural Distribution recipients must only use payments for eligible expenses, including services rendered, and lost revenues during the period of availability, as outlined in the table below. Providers must use a consistent basis of accounting to determine expenses. PRF and ARP Rural Distribution recipients may use payments for eligible expenses incurred prior to receipt of those payments (i.e., pre-award costs) dating back to January 1, 2020, so long as they are to prevent, prepare for, and respond to coronavirus.

	Payment Received Period (Payments Exceeding \$10,000 in Aggregate Received)	Period of Availability	PRF and ARP Rural Portal Reporting Time Period
Period 1	April 10, 2020 to June 30, 2020	January 1, 2020 to June 30, 2021	July 1, 2021 to September 30, 2021
Period 2	July 1, 2020 to December 31, 2020	January 1, 2020 to December 31, 2021	January 1, 2022 to March 31, 2022
Period 3	January 1, 2021 to June 30, 2021	January 1, 2020 to June 30, 2022	July 1, 2022 to September 30, 2022
Period 4	July 1, 2021 to December 31, 2021	January 1, 2020 to December 31, 2022	January 1, 2023 to March 31, 2023
Period 5	January 1, 2022 to June 30, 2022	January 1, 2020 to June 30, 2023	July 1, 2023 to September 30, 2023
Period 6	July 1, 2022 to December 31, 2022	January 1, 2020 to December 31, 2023	January 1, 2024 to March 31, 2024

II. PROGRAM PROCEDURES

The PRF and ARP Rural Distribution include the following components and may include additional components established after the date of this Supplement:

For the first phase of the PRF General Distributions, money was distributed proportionate to providers’ share of Medicare fee-for-service reimbursements in 2019. A portion of providers

were automatically sent an advance payment based off the revenue data they submit in CMS cost reports. Providers without adequate cost report data on file needed to submit their revenue information to the General Distribution Portal for additional funds.

For the second and third phases of the PRF General Distribution, Medicaid, Children's Health Insurance Program (CHIP), dental, assisted living, and behavioral health providers were eligible to apply for funds, along with Medicare providers paid under Phase 1 who qualified to receive additional funds.

For the fourth phase of the PRF General Distribution, consistent with the requirements included in the Coronavirus Relief and Response Supplemental Appropriation (CRRSA) Act (Pub. L. No. 116-260), PRF Phase 4 payments were based on providers' changes in operating revenues and expenses from July 1, 2020 to March 31, 2021. Phase 4 also included new elements specifically focused on equity, including reimbursing smaller providers for their changes in operating revenues and expenses at a higher rate compared to larger providers, and bonus payments based on the amount of services providers furnish to Medicaid/CHIP and Medicare beneficiaries. In addition, eligible applicants applied for the ARP Rural funds through the same Application and Attestation Portal that was available to apply for the Phase 4 General Distribution.

Funding for high-impact areas was distributed to hospitals in areas that were particularly impacted by the COVID-19 outbreak based on submission of the hospital's: Tax Identification Number, National Provider Identifier, total number of Intensive Care Unit beds as of April 10, 2020 and June 10, 2020, and total number of admissions with a positive diagnosis for COVID-19 from January 1, 2020 to April 10, 2020, and January 1, 2020 to June 10, 2020.

Funding for Indian Health Service/Tribal facilities was distributed on the basis of operating expenses. Prior to the availability of ARP Rural funding, funding for rural providers was distributed on the basis of operating expenses.

Funding for safety net hospitals was based on Centers for Medicare & Medicaid Services (CMS) cost report data.

Funding for children's hospitals was based on patient service revenue.

Funding for skilled nursing facilities and nursing homes was primarily based on the number of certified beds in the facility, and for the Nursing Home Infection Control Quality Incentive Program payments, data submission to the Centers for Disease Control and Prevention's (CDC) National Healthcare Safety Network (NHSN) Long-term Care Facility Component COVID-19 Module.

Most payments were sent out to providers without application, with requirement for recipients to accept the terms and conditions through an online portal or return funds. The Assistance Listing numbers were not provided at time of payments or included in initial terms and conditions.

Source of Governing Requirements

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) (Pub. L. No. 116-136, 134 Stat. 563)

Paycheck Protection Program and Health Care Enhancement Act (PPHCA) (Pub. L. No. 116-139, 134 Stat. 622)

Coronavirus Relief and Response Supplemental Appropriations (CRRSA) Act (Pub. L. No. 116-260)

The American Rescue Plan Act (ARPA) (Pub. L. No. 117-2)

Under the definition of federal financial assistance, PRF and ARP Rural Distributions are considered other financial assistance. Per the applicability table in 45 CFR section 75.101(b)(1), other financial assistance is not subject to the post federal award or cost principles requirements in 45 CFR Part 75, subparts C, D, and E, respectively, with the exception that 45 CFR section 75.303 (Internal Controls) and sections 75.351 through 75.353 (Subrecipient Monitoring and Management) are applicable.

Under the terms and conditions of the award, PRF and ARP Rural Distributions are subject to 45 CFR section 75.302 (Financial management and standards for financial management systems) and 45 CFR sections 75.361 through 75.365 (Record Retention and Access).

Additionally, under the terms and conditions of the award, PRF (Phase 4) and ARP Rural Distributions are subject to 45 CFR section 75.371 (Remedies for non-compliance) and 45 CFR sections 75.305(b)(8).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2,

“Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	N	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed (All distributions except Skilled Nursing Facility Infection Control Distribution)*

Law (Pub. L. No. 116-136, 134 Stat. 563 and Pub. L. No. 116-139, 134 Stat. 622 and 623, Pub. L. No. 117-2)

To prevent, prepare for, and respond to coronavirus and COVID-19, domestically or internationally, for necessary expenses to reimburse, through grants or other mechanisms, eligible health care providers for health care related expenses or lost revenues that are attributable to coronavirus. (Note: Auditors are not expected to test the funding reported as lost revenues to determine if it was expended only for federally defined allowable activities.)

That funds appropriated under this paragraph in this Act shall be available for building or construction of temporary structures, leasing of properties, medical supplies and equipment, including personal protective equipment and testing supplies, increased workforce and trainings, emergency operation centers, retrofitting facilities, and surge capacity.

Payment means a pre-payment, prospective payment, or retrospective payment.

Terms and Conditions

- a. The recipient certifies that the payment will only be used to prevent, prepare for, and respond to coronavirus and COVID-19, and that the payment shall reimburse the recipient only for health care related expenses or lost revenues that are attributable to coronavirus and COVID-19.
- b. The recipient certifies that retaining the payment for at least 90 days without contacting HHS regarding remittance of those funds, is deemed to have accepted the Terms and Conditions.
- c. The recipient must provide or have provided after January 31, 2020, diagnoses, testing, or care for individuals with possible or actual cases of COVID-19. The Department of Health and Human Services (HHS) broadly views every patient as a possible case of COVID-19.

2. *Activities Allowed (Skilled Nursing Facility Infection Control Distribution)*

Terms and Conditions

Funds may only be used to reimburse the recipient for costs associated with the following items and services (“Infection Control Expenses”):

- a. Costs associated with administering COVID-19 testing, which means an in vitro diagnostic test defined in section 809.3 of title 21, *Code of Federal Regulations* (or successor regulations) for the detection of SARS-CoV-2 or the diagnosis of the virus that causes COVID-19, and the administration of such a test, that:
 - Is approved, cleared, or authorized under section 510(k), 513, 515, or 564 of the Federal Food, Drug, and Cosmetic Act (21 USC 360(k), 360c, 360e, 360bbb-3);
 - The developer has requested, or intends to request, emergency use authorization under section 564 of the Federal Food, Drug, and Cosmetic Act (21 USC 360bbb-3), unless and until the emergency use authorization request under such section 564 has been denied or the developer of such test does not submit a request under such section within a reasonable timeframe;
 - Is developed in and authorized by a state that has notified the secretary of HHS of its intention to review tests intended to diagnose COVID-19; or
 - Other test that the secretary determines appropriate in guidance.
- b. Reporting COVID-19 test results to local, state, or federal governments.

- c. Hiring staff, whether employees or independent contractors, to provide patient care or administrative support.
- d. Expenses incurred to improve infection control, including activities such as implementing infection control “mentorship” programs with subject matter experts or changes made to physical facilities.
- e. Providing additional services to residents, such as technology that permits residents to connect with their families if the families are not able to visit in person.
- f. The recipient must provide or have provided after January 31, 2020, diagnoses, testing, or care for individuals with possible or actual cases of COVID-19.

3. *Activities Allowed (Rural distribution)*

Terms and Conditions

Funds may only be used to reimburse the provider(s) associated with the applicable subsidiary or billing TIN and cannot be transferred or allocated to another entity not associated with the subsidiary or billing TIN. Control and use of the Payment must be delegated to the Recipient that was eligible for and received the Payment.

4. *Activities Unallowed (All distributions)*

Law (Pub. L. No. 116-136, 134 Stat. 563 and Pub. L. No. 116-139, 134 Stat. 622, Pub. L. No. 117-2)

That these funds may not be used to reimburse expenses or losses that have been reimbursed from other sources or that other sources are obligated to reimburse.

Terms and Conditions

Payments may not be used to reimburse expenses or losses that have been reimbursed from other sources or that other sources are obligated to reimburse.

B. Allowable Costs/Cost Principles

While 45 CFR 75 Subpart E – Cost Principles do not apply to the PRF and the ARP Rural Distribution, charges to the PRF and the ARP Rural Distribution must be necessary, reasonable, accorded consistent treatment, and conform to the limitations and exclusions of the terms and conditions of the award. The PRF and ARP Rural Distribution Frequently Asked Questions referenced under Availability of Other Information above provides additional guidance and examples.

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting*PRF Report*

PRF Reporting Portal (A Public Health Emergency Declaration-PRA Waiver Notice was issued January 14, 2021, applicable to the financial information collected by HRSA from eligible healthcare providers (<https://aspe.hhs.gov/public-health-emergency-declaration-pra-waivers>)).

The PRF reporting portal was launched on July 1, 2021 (<https://prfreporting.hrsa.gov/s/>); refer to the table in the Program Objective section for reporting time period(s). Auditors are expected to test this special reporting for fiscal years ending on or after June 30, 2021. Since the PRF and ARP Rural Distribution amounts to be reported on a recipient's Schedule of Expenditures of Federal Awards (SEFA) are based on the PRF report (see the Other Information section below), and since the PRF report is to be tested as part of the Reporting type of compliance requirement, auditors should consider delaying the commencement of the compliance audit of the PRF program until recipients have completed the PRF report.

Key Line Items – The following line items contain critical information (items are not numbered in report):

1. Total Reportable Nursing Home Infection Control Expenses Used in the Reporting Period
 - a. Total Nursing Home Infection Control Expenses – Cell that contains the aggregated total sum
2. Total Reportable Other PRF Expenses for Payments Received During Payment Period

- a. Total Other PRF Expenses – Cell that contains the aggregated total sum
3. Calculation of Lost Revenues Attributable to Coronavirus
 - a. 2019 Actuals
 - (1) Total Column for Total Revenue/Net Charges from Patient Care (2019 Actuals) – Each cell at the bottom of each quarter (Total revenue/Net Charges from Patient Care) and for each year, 2019, 2020, 2021, 2022 and 2023.
 - b. 2020 Budgeted
 - (1) Total Column for Total Revenue/Net Charges from Patient Care (Budgeted) – Each cell at the bottom of each quarter (Total revenue/Net Charges from Patient Care) and for each year, 2020, 2021, 2022 and 2023.
 - (2) Total Column for Total Revenue/Net Charges from Patient Care (Actuals) – Each cell at the bottom of each quarter (Total revenue/Net Charges from Patient Care) and for each year, 2020, 2021, 2022 and 2023.
 - c. Alternate Method of Calculating Lost Revenues Attributable to Coronavirus
 - (1) Each individual cell in the alternative method – audit back to the narrative and underlying supporting documentation. **(Note:** The auditor is not responsible for determining the reasonableness of the alternative method described in the narrative.)

4. **Special Reporting for Federal Funding Accountability and Transparency Act**

See Part 3.L for audit guidance.

IV. **OTHER INFORMATION**

Note: Since the PRF and ARP Rural Distribution amounts to be reported on a recipient's Schedule of Expenditures of Federal Awards (SEFA) are based on the PRF report (see Other Information below), and the PRF report is to be tested as part of the Reporting compliance requirement, auditors should consider delaying the commencement of the compliance audit of the PRF and ARP Rural Distribution program until recipients have completed the PRF report.

1. *Webpage Guidance*

Guidance documents accessed by links on the HRSA.gov website such as those listed under “Availability of Other Program Information” are provided only to clarify the applicable laws, regulations, and terms and conditions of the award and do not create new compliance requirements. However, nonfederal entities in substantial compliance with the guidance applicable in these guidance documents are considered in compliance with the underlying compliance requirements.

2. *Schedule of Expenditures of Federal Awards (SEFA) Reporting*

SEFA reporting amounts for this program (including both expenditures and lost revenues) are based upon the PRF report that is required to be submitted to the HRSA reporting portal (described in “L.3 Special Reporting;” <https://prfreporting.hrsa.gov/s/>). Therefore, it is first important to understand the HRSA PRF and ARP Rural Distribution reporting requirements, which are summarized in the following table.

For the PRF and Rural Distribution it is the last day a provider can use the funds (end of the period of availability), which drives inclusion of the PRF amount on the Schedule of Expenditures for Federal Awards (SEFA) in a Single Audit report.

	Payment Received Period (Payments Exceeding \$10,000 in Aggregate Received)	Period of Availability	PRF Portal Reporting Time Period	Fiscal Year Ends (FYE) to include each PRF Period on the Schedule of Expenditures for Federal Awards (SEFA) Reporting
Period 1	April 10, 2020 to June 30, 2020	January 1, 2020 to June 30, 2021	July 1, 2021 to September 30, 2021	Fiscal Year End (FYE) of June 30, 2021 through June 29, 2022
Period 2	July 1, 2020 to December 31, 2020	January 1, 2020 to December 31, 2021	January 1, 2022 to March 31, 2022	FYE of December 31, 2021 through FYEs December 30, 2022
Period 3	January 1, 2021 to June 30, 2021	January 1, 2020 to June 30, 2022	July 1, 2022 to September 30, 2022	FYE of June 30, 2022 through June 29, 2023
Period 4	July 1, 2021 to December 31, 2021	January 1, 2020 to December 31, 2022	January 1, 2023 to March 31, 2023	FYE of December 31, 2022 through FYEs December 30, 2023
Period 5	January 1, 2022 to June 30, 2022	January 1, 2020 to June 30, 2023	July 1, 2023 to September 30, 2023	FYE of June 30, 2023 through June 29, 2024
Period 6	July 1, 2022 to December 31, 2022	January 1, 2020 to December 31, 2023	January 1, 2024 to March 31, 2024	FYE of December 31, 2023 through FYEs June 29, 2024

Summary of SEFA Reporting of PRF for Fiscal Year Ends (FYE) Covered by the 2023 Compliance Supplement

For FYEs of June 30, 2023, and through FYEs of December 30, 2023 recipients should report in the SEFA, the expenditures and lost revenues from the **Period 4 and Period 5** PRF report.

For a FYE of December 31, 2023 and through FYEs of June 29, 2024, recipients should report in the SEFA, the expenditures and lost revenues from both the **Period 5 and Period 6** PRF reports.

For FYEs on or after June 30, 2024, SEFA reporting guidance will be provided in covered under the 2024 Compliance Supplement.

3. *Defining the Entity to be Audited*

The reporting entity required for PRF and ARP Rural Distribution reporting purposes may not align to the reporting entity as defined for financial reporting purposes. It is important to note that the required PRF level of reporting has no bearing on the application of the requirements in 2 CFR 200.514 for defining the entity to be audited for single audit purposes. Thus, for single audits that include PRF and ARP Rural Distribution, the Single Audit must cover the entire operations of the auditee, or, at the option of the auditee, such audit must include a series of audits that cover departments, agencies, and other organizational units that expended or otherwise administered federal awards during such audit period, provided that each such audit must encompass the financial statements and schedule of expenditures of federal awards for each such department, agency, and other organizational unit, which must be considered to be a nonfederal entity.

As a best practice, the recipients may wish to include a footnote disclosure on the SEFA to identify which providers by TIN are included in the audit.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.499 LOW-INCOME HOUSEHOLD WATER ASSISTANCE PROGRAM

I. PROGRAM OBJECTIVE

Congress established the Low-Income Household Water Assistance Program (LIHWAP) as part of the federal government's response to the COVID-19 pandemic. This emergency formula grant program is designed to target assistance to those households with the lowest incomes that pay a high proportion of household income for water and wastewater services. The federal grant is awarded to states, territories and Indian Tribes who will issue funds on behalf of eligible, applicant households to owners or operators of public water systems or treatment works to reduce arrearages of and rates charged to such households for those services.

States, territories, and Indian tribes—the LIHWAP grantees—shall, as appropriate and to the extent practicable, use existing processes, procedures, policies, and systems in place to provide assistance on behalf of low-income households, particularly in coordination with the federal Low Income Home Energy Assistance Program (LIHEAP), except where otherwise noted. Grantees shall provide LIHWAP benefits according to the following priorities: (1) households whose services are disconnected due to non-payment, (2) households whose services are facing an imminent disconnection due to non-payment, and (3) households with only a current bill due (no past due/arrearage amount). Grantees must ensure that benefits and other interventions are sufficient to ensure restoration and/or continuity of services.

II. PROGRAM PROCEDURES

A. LIHWAP Formula Grants

The US Department of Health and Human Services (HHS), Administration for Children and Families (ACF), Office of Community Services (OCS), administers LIHWAP at the federal level. LIHWAP grant funds are distributed by formula to the states, the District of Columbia, and the territories. In addition, federally or state-recognized Indian tribes (including tribal consortia) that received fiscal year (FY) 2021 LIHEAP funding were eligible to serve as recipients of direct funding from ACF.

Each grantee is responsible for designing and implementing its own LIHWAP within broad federal guidelines. Grantees must administer their LIHWAP according to their ACF approved plan, and any amendments, and in conformance with the federal ACF Mandatory General Terms and Conditions and the LIHWAP Specific Terms and Conditions. Grantees must establish appropriate systems and procedures to prevent, detect and correct waste, fraud, and abuse, by clients, vendors, and administering agencies.

In order to receive funding, each grantee was required to submit a LIHWAP implementation plan that served as the grantee's application for federal funding and describes how the grantee's LIHWAP will be administered, including a set of program

integrity questions in which the grantee must describe the systems in place to detect and deter fraud, waste, and abuse in its LIHWAP program.

All grantees must have allowed for public participation in the development of their annual plans prior to submission to ACF.

Source of Governing Requirements

LIHWAP was authorized under the Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260) and the American Rescue Plan Act of 2021 (Pub. L. No. 117-2).

LIHWAP is subject to all of 45 CFR Part 75, which is the HHS implementation of 2 CFR Part 200, commonly known as the Office of Management and Budget's Uniform Administrative Guidance.

In addition, LIHWAP grantees must administer their LIHWAP according to their respective Plans that they submitted to HHS. Grantees are permitted to submit revised LIHWAP plans within a reasonable amount of time after making significant changes to their policies and/or procedures referenced in their plans.

Grantees must also abide by the [LIHWAP Specific Terms and Conditions](#) and the [ACF General Mandatory Grant Terms and Conditions](#). Both sets of Terms and Conditions can be found here: <https://acf.hhs.gov/grants/mandatory-formula-block-and-entitlement-grants>.

Availability of Other Program Information

The ACF LIHWAP web page (<https://www.acf.hhs.gov/ocs/programs/lihwap>) provides general information about this program, including a section on Policy and Guidance.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	Y	Y	N	N	Y	Y	N

B. Allowable Costs/Cost Principles

1. *Allowable Costs*

Grantees must provide the bill payment benefits directly to the owners or operators of public water systems or treatment works on behalf of specific, approved households with accounts with such providers.

Benefits on behalf of households are limited to credits to the households’ accounts to pay towards arrearages, current and/or future water charges (e.g., a credit to the account). This can include payment towards reconnection fees, late payment fees, and other fees to the extent they are charged to the recipient household in the same fashion as any other account holder with the water provider (no discrimination in fees charged to program recipients or low income customers).

Funds must not be used towards infrastructure purchases, repairs or improvements (e.g., repair or replacement of toilets, pipes, and other related equipment). Funding must not be used towards in-kind benefits to the household.

A reasonable amount of funds may be used for related program outreach and eligibility intake activities.

2. *Cost Principles*

All of 45 CFR Part 75 applies to this program. Of particular note, grantees must establish and maintain accurate central office cost allocation plans in addition to negotiated indirect cost agreements (see 45 CFR section 75.416).

E. Eligibility

1. **Eligibility for Individuals**

Grantees must provide benefit payments to water/wastewater companies on behalf of households that are income eligible based on either (a) one or more individuals

are receiving assistance from the LIHEAP, TANF, SSI, SNAP benefits, or certain needs-tested veterans' benefits; or (b) total household income that does not exceed the greater of 150 percent of the state's established poverty level or 60 percent of the state median income. Grantees may establish lower income eligibility criteria, but no household may be excluded solely on the basis of income if the household income is less than 110 percent of the state's poverty level. Grantees must give priority to those households with the highest home water and wastewater costs or needs in relation to income and household size. This includes targeting households with vulnerable members, including a senior (60 years or older), a young child (5 years or younger), and/or a disabled member (disabled defined by the grantee).

Households whose water bills are included in their rent are eligible for program benefits to the extent the household pays rent and provides adequate documentation to show water is provided by the landlord. Payments on behalf of renters must still be made to the owners or operators of public water systems or treatment works, those payments must reduce arrearages of and rates charged to the landlord's account, and the landlord must pass the benefit in full to eligible households in the form of lower rent payments. Grantees must establish consumer protections, such as by issuing two-party checks, sufficient to ensure that the water provider correctly credits the account and that the landlord credits the household's rent bill to reflect the LIHWAP benefit amount.

Grantees must provide funds to owners or operators of public water systems or treatment works ("owners or operators") to reduce arrearages of and rates charged to eligible households for such services. For all payments to owners or operators on behalf of individual households, the grantee must establish procedures to:

- a. notify, or require the owner or operator to notify, each participating household of the amount of assistance paid on its behalf;
- b. assure that the owner or operator will charge the eligible household, in the normal billing process, the difference between the actual amount due and the amount of the payment made by the LIHWAP grant;
- c. assure that any agreement the grantee enters into with an owner or operator under this paragraph will contain provisions to assure that no household receiving assistance under this grant will be treated adversely because of such assistance under applicable provisions of State law or public regulatory requirements;
- d. ensure that the provision of payments to the owner or operator remains at the option of the grantee, in consultation with local subgrantees; and
- e. ensure that the owner or operator provides written reconciliation and confirmation on a regular basis that benefits have been credited appropriately to households and their services have been restored on a

timely basis or disconnection status has been removed if applicable.

Households that rely entirely on well water and/or septic service are ineligible for assistance under this program, unless they qualify for a special other water service such as delivered water under extenuating circumstances.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

To the extent it is necessary to designate local administrative agencies, the grantee is to give special consideration to local public or private non-profit agencies (or their successor agencies) which were receiving energy assistance or weatherization funds under the Economic Opportunity Act of 1964 or other laws, provided that the grantee finds that they meet program and fiscal requirements set by the grantee.

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

Not Applicable

3. Earmarking

The following limitations apply to LIHWAP formula grants:

a. *Administrative Costs*

- (1) No more than 15 percent of a state's LIHWAP funds for each appropriation (Pub. L. No. 116-260 and Pub. L. No. 117-2) may be used for administrative costs, including both direct and indirect costs. This limitation applies, in the aggregate, to administrative costs at both the state and subrecipient levels. This cap must not be exceeded by supplementing with other federal funds.

H. Period of Performance

Period of Performance/Obligation Period: The LIHWAP formula grant funds payable to the grantee in federal fiscal year 2021 must be obligated by the grantee by September 30, 2023. Funds not obligated by September 30, 2023, must be returned to ACF.

Per 45 CFR section 75.2, the term “obligation” is defined as: “when used in connection with a non-federal entity's utilization of funds under a federal award, *obligations* means orders placed for property and services, contracts and subawards made, and similar transactions during a given period that require payment by the non-federal entity during the same or a future period.”

Expenditure: Grantees must expend (liquidate) the funds, based upon prior valid obligations, no later than 90 calendar days after the close of FY 2023 (i.e., by December 31, 2023).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* - Not Applicable.
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Program* -Not Applicable.
- c. *SF-425, Federal Financial Report* – Applicable – due 90 days after the close of each federal fiscal year

2. Performance Reporting

- a. *LIHWAP Annual Performance and Management Data Report (OMB No - 0970-0578)* – All grantees will need to submit this report by December 31st following each federal fiscal year (e.g., December 31, 2021 for FY 2021 obligations and expenditures and December 31, 2022 for FY 2022 obligations and expenditures, and December 31, 2023 for FY 2023 obligations and expenditures). The report is required per the terms and agreements (see Attachment [A LIHWAP Terms and Conditions State Signature Block \(hhs.gov\)](#)). The report includes key performance indicators such as the number and types of households assisted, the average benefit amount provided to households, and performance measures related to targeting assistance to high water burden households (i.e., households that incur the greatest water bills in relation to household income). [A link to a blank copy of the report and report instructions can be found at the following:](#)

[RPT_LIHWAP_Annual Report_FY2022 \(Not 508-compliant\).xlsx \(live.com\)](#)

and [COMM_LIHWAP_Annual Report Instructions_FY2022\(hhs.gov\)](#).

Key Line Items – The following line items contain critical information:

Section 1. Grant Award Amounts #6. The actual administrative cost must not exceed 15% of the total award.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

Grantees must follow the specific LIHWAP Terms and Conditions associated with the grant awards. They include a number of provisions related to consumer protections, etc. They are accessible here:

<https://www.acf.hhs.gov/sites/default/files/documents/LIHWAP%20Terms%20and%20Conditions%20for%20States.pdf>.

They are also bound by the General Mandatory Terms and Conditions, which are posted here:

https://www.acf.hhs.gov/sites/default/files/documents/general_terms_and_conditions_2019_final.pdf.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.545 CONSUMER OPERATED AND ORIENTED PLAN [CO-OP] PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Consumer Operated and Oriented Plan (CO-OP) program is to foster the creation of qualified nonprofit health insurance issuers to offer qualified health plans in the individual and small group markets in the states in which the issuers are licensed to offer such plans. These CO-OPs are consumer-governed, private, nonprofit health insurers.

II. PROGRAM PROCEDURES

At the federal level, the CO-OP program is administered by the Department of Health and Human Services, through the Centers for Medicare and Medicaid Services (CMS)/Center for Consumer Information and Insurance Oversight (CCIIO). In addition to improving consumer choice and plan accountability, the CO-OP program also seeks to promote integrated models of care and enhance competition in the Health Insurance Exchanges established under sections 1311 and 1321 of the Affordable Care Act (ACA).

Established under Section 1322 of the ACA, the CO-OP program provides loans to capitalize eligible prospective CO-OPs with a goal of having at least one CO-OP in each state, although the statute permits the funding of multiple CO-OPs in any state, provided that there is sufficient funding to capitalize at least one CO-OP in each state.

Solvency loans are loans provided by CMS to a loan recipient in order to meet state solvency and reserve requirements, and start-up loans are loans provided by CMS to a loan recipient for costs associated with establishing a CO-OP. Both types of loans must be used consistent with the loan agreement and applicable statutory and regulatory requirements. Solvency loans are structured in a manner that ensures that the loan amount is recognized by state insurance regulators as “surplus notes” pursuant to National Association of Insurance Commissioners Statutory Statement of Accounting Principles No. 41 (SSAP 41) so that the proceeds of the loans may be counted as assets and contribute to the state-determined capitalization reserve requirements or other solvency requirements (rather than debt) as specified in the insurance regulations for the state in which the loan recipient will offer a CO-OP qualified health plan. Several, but not all, start-up loans to loan recipients have also been structured as surplus notes in the years subsequent to first issuance on a case-by-case basis using specified criteria. For both types of loans, the loan recipient must make loan payments in accordance with the approved repayment schedule in the loan agreement until the loan is paid in full consistent with state reserve requirements, solvency regulations, and requisite surplus note arrangements. For the Start-up Loans, interest accrues from the date of drawdown on the loan amounts that have been drawn down and not yet repaid by the loan recipient. For Solvency Loans, interest accrues in a manner consistent with the requirements of SSAP 41, and/or any applicable state law or regulation. The interest rate for each loan is determined based on the date of award.

Information on what happens when loan recipients fail to make loan payments and conversions can be found in 45 CFR section 156.520 or under 42 USC 18042.

Source of Governing Requirements

The CO-OP program is authorized by the Patient Protection and Affordable Care Act (Pub. L. No. 111-148, which was enacted on March 23, 2010), which was amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. No. 111-152). The two laws are collectively referred to as the “Affordable Care Act.” Section 1322 of the ACA created the Consumer Operated and Oriented Plan program, which is codified at 42 USC 18042, and program regulations are found at 45 CFR sections 156.500 through .520 (45 CFR Part 156, Subpart F– Consumer Operated and Oriented Plan program).

Availability of Other Program Information

Additional information is available on the CCIIO website at <http://cciio.cms.gov/> or at <http://www.cms.gov/CCIIO/Programs-and-Initiatives/Insurance-Programs/Consumer-Operated-and-Oriented-Plan-Program.html>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	N	N	N	N	N	N	N	N	Y	N	N

A. Activities Allowed or Unallowed1. *Activities Allowed*

In accordance with the loan agreement, these include the following categories and specified limitations:

- a. Start-up loan funds must only be used in accordance with the Business Plan and the Start-Up Loan Disbursement Plan.
- b. For both types of loans, the borrower must use the loan funds only for the following purposes: costs identified in the Business Plan and Disbursement plans, and costs associated with establishing the CO-OP as an operating business.
- c. Costs associated with the initial operations of a CO-OP, including the following:
 - (1) Renting space for issuer administrative operations.
 - (2) Renting or developing information technology systems.
 - (3) Renting or developing provider networks.
 - (4) Hiring a management team with adequate insurance expertise and other administrative personnel.
 - (5) Hiring counsel and consultants to assist with state insurance laws and other licensure requirements.
 - (6) Negotiating and contracting with providers and vendors.
 - (7) Hiring actuaries.
 - (8) Conducting community and prospective member education and educating CO-OP members on the rights and responsibilities of member governance.
 - (9) Developing strategic plans to build enrollment.
 - (10) Establishing and participating in a private purchasing council.
 - (11) Paying for the initial costs of operational and administrative staff.
- d. Cost associated with establishing and maintaining capital and surplus for borrower (including Risk-Based Capital Reserves) consistent with state solvency requirements.

- e. Costs associated with providing information to members regarding their coverage, rights, and responsibilities.

2. *Activities Unallowed*

- a. Start-up loan funds cannot be used to pay for costs associated with purchase of land and construction of facilities, including clinical facilities.
- b. Start-up loan funds cannot be used for clinical expenses, such as medical services providers' salaries or payments; provider clinical space; clinical equipment; administrative staff associated with clinical functions; and clinical equipment (excluding clinical information technology).
- c. Borrowers cannot use any part of the loan funds for any of the following purposes or activities:
 - (1) To carry on propaganda or other activities attempting to influence legislation at the federal, state, or local level of government.
 - (2) To conduct marketing. "Marketing" for this purpose means activities that promote the purchase of a specific health care plan or explain a product's benefit structure to a specific customer. However "marketing" does not include activities related to community outreach, membership development, and membership education.
 - (3) To meet the matching requirements of any other federal program.
 - (4) To cover or pay excessive executive compensation as determined by the lender in its sole but reasonable discretion.
 - (5) To fund activities unrelated to CO-OP planning and establishment, including, but not limited to, staff retreats and promotional giveaways.
 - (6) To pay for services described in Section 1303(b)(1)(B)(i) of the ACA, which states "Abortions for which public funding is prohibited....The services described in this clause are abortions for which the expenditure of federal funds appropriated for the Department of Health and Human Services is not permitted, based on the law as in effect as of the date that is 6 months before the beginning of the plan year involved."

L. **Reporting**

1. **Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs – Not Applicable*
- c. *SF-425, Federal Financial Report – Not Applicable*
- d. *CMS-10392, Monthly Reporting Requirements (OMB No. 0938-1139)*
- e. *CMS-10392, Quarterly Financial Statement or Annual Financial Statement (OMB No. 0938-1139) – Attachment 4, National Association of Insurance Commissioners (NAIC) Quarterly Statement and Annual Statement: Financial Statement Underwriting and Investment Exhibit Part 3 – Analysis of Expenses*

2. Performance Reporting

Not Applicable.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

CO-OPs are required to execute promissory notes for both the start-up and solvency loans. Prior loans have continuing compliance requirements. Therefore, the full outstanding balance on the notes must be considered federal awards expended, included in determining Type A programs, and reported as loans on the Schedule of Expenditures of Federal Awards in accordance with 2 CFR Part 200, Subpart F. Since the loan agreements require audited financial statements, CO-OPs may not elect a program-specific audit and must have an annual single audit.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.556 MARYLEE ALLEN PROMOTING SAFE AND STABLE FAMILIES

I. PROGRAM OBJECTIVES

The MaryLee Allen Promoting Safe and Stable Families (PSSF) program provides funds to states and federally recognized Indian tribes, tribal organizations, and tribal consortia (hereafter “tribe”) to prevent the unnecessary separation of children from their families, improve the quality of care and services to children and their families, and ensure permanency for children by reuniting them with their parents, by adoption or by another permanent living arrangement. The program includes family support, family preservation, family reunification, and adoption promotion and support services.

II. PROGRAM PROCEDURES

The Children’s Bureau, Administration on Children, Youth, and Families, Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS), administers the PSSF. To be eligible for funds, each state and tribe must submit a five-year comprehensive plan, the Child and Family Services Plan (CFSP). This plan encompasses planning and service delivery for the full child welfare services spectrum. This includes (1) child welfare services under Title IV-B, subparts 1 and 2; (2) a child welfare staff development and training plan; (3) a diligent recruitment of foster and adoptive families plan that reflects the ethnic and racial diversity of children in the state for whom foster and adoptive homes are needed; and (4) child abuse and neglect prevention, foster care, adoption, and foster care independence services, including an education and training voucher program for foster care youth. An Annual Progress and Services Report (APSR) is required that identifies the specific accomplishments and progress made in the past fiscal year toward meeting each goal and objective in the five-year comprehensive plan and any revisions in the statement of goals and objectives or to the training plan, if necessary, to reflect changed circumstances.

The Associate Commissioner of the ACF Children’s Bureau has approval authority for the Title IV-B plans. Following ACF approval, allotments to states are based on the number of children in the states who received supplemental nutrition assistance program benefits in the previous three years. Grants may also be made to tribes that qualify from reserved funds under the allotment formula; no tribe may be funded if its allotment is less than \$10,000. PSSF services are based on several key principles. The welfare and safety of children and of all family members should be maintained while strengthening and preserving the family. It is advantageous for the family as a whole to receive services, which identify and enhance its strengths while meeting individual and family needs. Services should be easily accessible, often delivered in the home or in community-based settings, and respect cultural and community differences. In addition, they should be flexible, responsive to real family needs, and linked to other supports and services outside the child welfare system. Services should involve community organizations and residents, including parents, in their design and delivery. They should be intensive enough to keep children safe and meet family needs, varying between preventive and crisis services. Note: Additional fiscal year (FY) 2021 emergency supplemental

funding was provided for the PSSF program under Pub. L No. 116-260, the Consolidated Appropriations Act, 2021 in section 6(a) of Division X. The PSSF program portion of this funding, totaling \$72,450,000 was allocated to all title IV-B agencies using the existing statutory formula. Program Instruction ACYF-CB-PI-21-04, dated March 8, 2021, contains details and is available as follows: <https://www.acf.hhs.gov/sites/default/files/documents/cb/pi2104.pdf>.

Source of Governing Requirements

PSSF is authorized under Title IV-B, subpart 2 of the Social Security Act, as amended, and is codified at 42 USC 629 through 629f. Implementing program regulations are published at 45 CFR parts 1355 and 1357.

Availability of Other Program Information

The Children’s Bureau manages a policy issuance system that provides further clarification of the law and guides states and tribes in implementing the PSSF program. This information may be accessed at <https://www.acf.hhs.gov/cb/resource/pi1009>

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Programs delivered in accessible settings in the community and responsive to the needs of the community and the individuals and families residing therein. These services may be provided under public or private non-profit auspices (45 CFR section 1357.10(c)).
- b. Services for children and families designed to protect children from harm and help families (including foster, adoptive, and extended families) at risk or in crisis, including (42 USC 629a(a)(1) and 45 CFR section 1357.10(c)):
 - (1) Pre-placement preventive services programs, such as intensive family preservation programs, designed to help children at risk of foster care placement remain with their families, where possible;
 - (2) Service programs designed to help children, where appropriate, return to families from which they have been removed; or be placed for adoption, with a legal guardian, or, if adoption or legal guardianship is determined not to be appropriate for a child, in some other planned, permanent living arrangement;
 - (3) Service programs designed to provide follow-up care to families to whom a child has been returned after a foster care placement;
 - (4) Respite care of children to provide temporary relief for parents and other caregivers (including foster parents);
 - (5) Services designed to improve parenting skills (by reinforcing parents' confidence in their strengths, and helping them to identify where improvement is needed and to obtain assistance in improving those skills) with respect to matters such as child development, family budgeting, coping with stress, health, and nutrition;
 - (6) Infant safe haven programs to provide a way for a parent to safely relinquish a newborn infant at a safe haven designated pursuant to a state law; and
 - (7) Case management services designed to stabilize families in crisis such as transportation, assistance with housing and utility payments, and access to adequate health care.
- c. Community-based services to promote the well-being of children and families designed to increase the strength and stability of families

(including adoptive, foster, and extended families); increase parents' confidence and competence in their parenting abilities; afford children a stable and supportive family environment; strengthen parental relationships and promote healthy marriages and otherwise enhance child development, including through mentoring. Beginning on February 9, 2018, and thereafter, services may also be provided to support and retain foster families so they can provide quality family-based settings for children in foster care. Family support services may include (42 USC 629a(a)(2); 45 CFR section 1357.10(c)):

- (1) Services, including in-home visits, parent support groups, and other programs designed to improve parenting skills (by reinforcing parents' confidence in their strengths, and helping them to identify where improvement is needed and to obtain assistance in improving those skills) with respect to matters such as child development, family budgeting, coping with stress, health, and nutrition;
- (2) Respite care of children to provide temporary relief for parents and other caregivers;
- (3) Structured activities involving parents and children to strengthen the parent-child relationship;
- (4) Drop-in centers to afford families opportunities for informal interaction with other families and with program staff;
- (5) Transportation, information, and referral services to afford families access to other community services, including child care, health care, nutrition programs, adult education literacy programs, legal services, and counseling and mentoring services; and
- (6) Early developmental screening of children to assess the needs of such children, and assistance to families in securing specific services to meet these needs.

d.

Services and activities that are provided to a child who is removed from his/her home and placed in a foster family home or a child care institution and to the parents or primary caregiver of such a child, in order to facilitate the reunification of the child safely and appropriately within a timely fashion and to ensure the strength and stability of the reunification. These family reunification services may be provided on behalf of a child in foster care without a time limit. Additionally, in the case of a child who has been returned home, these services and activities may also be provided, but shall only be provided during the 15-month period that begins on the date that the child returns home.

The services and activities for family reunification services are the following (42 USC 629a(a)(7)):

- (1) Individual, group, and family counseling;
 - (2) Inpatient, residential, or outpatient substance abuse treatment services;
 - (3) Mental health services;
 - (4) Assistance to address domestic violence;
 - (5) Services designed to provide temporary child care and therapeutic services for families, including crisis nurseries;
 - (6) Peer-to-peer mentoring and support groups for parents and primary caregivers;
 - (7) Services and activities designed to facilitate access to and visitation of children by parents and siblings; and
 - (8) Transportation to or from any of the services and activities described above.
- e. Services and activities designed to encourage more adoptions out of the foster care system, when adoption promotes the best interest of the child, including such activities as pre- and post-adoptive services and activities designed to expedite the adoption process and support adoptive families (42 USC 629a(a)(8)).
- f. Administrative costs (defined as costs of auxiliary functions as identified through an agency's accounting system that are allocable, in accordance with the agency's approved cost allocation plan, to the Title IV-B, subpart 2 program cost centers; necessary to sustain the direct effort involved in administering the state plan or an activity providing service to the programs, and centralized in the grantee department or in some other agency) are allowable. Administrative costs include, but are not limited to, the following: procurement; payroll; personnel functions; management; maintenance and operation of space and property; data processing and computer services; accounting; budgeting; and auditing (45 CFR sections 1357.32(h)(1) and (2)). See III.G.3, "Matching, Level of Effort, Earmarking – Earmarking," for a limitation on the amount of administrative costs.
- g. Program costs, which are costs other than administrative costs, incurred in connection with developing and implementing the CFSP (e.g., delivery of services, planning, consultation, coordination, training, quality assurance

measures, data collection, evaluations, and supervision) (45 CFR section 1357.32(h)(3)).

- h. The Supplemental FY 2021 PSSF funds may be used for the same purposes as the regular annual PSSF grant, i.e., to provide community-based family support, family preservation, family reunification and adoption promotion and support services, consistent with the purposes and definitions in sections 430 and 431 of the Social Security Act (42 USC 629 and 629a).

2. *Activities Unallowed*

Funds awarded under Title IV-B, subpart 2, may not be used for the purchase or construction of facilities (45 CFR section 1357.32(e)).

G. Matching, Level of Effort, Earmarking

1. Matching

Funds are federally reimbursed at 75 percent of allowable expenditures. The Title IV-B agency's contribution may be in cash, donated funds, and non-public third party in-kind contributions (45 CFR section 1357.32(d)). Note: The Supplemental FY 2021 PSSF funds do not require a non-federal share match (100 percent federally reimbursed).

2. Level of Effort

2.1 Level of Effort – Maintenance of Effort

Not Applicable

2.2 Level of Effort – Supplement Not Supplant

- a. States and tribes (42 USC 629c) may not use federal funds under Title IV-B, subpart 2 (including Supplemental FY 2021 PSSF funds), to supplant federal or non-federal funds for existing services.
 - (1) “Non-Federal” funds are defined at 42 USC 629a(a)(9) as “State funds, or at the option of a State, State and local funds.” Although state matching may be in the form of cash, donated funds, or non-public third party in-kind contributions, the “supplement not supplant” requirement is limited to non-federal funds as defined in 42 USC 629a(a)(9).
 - (2) The base year for determining compliance with this requirement is the amount of funds that the state expended

for services in the state’s fiscal year 1992 (42 USC 629b(a)(7); 45 CFR section 1357.32(f)). The regulations have not been updated to reflect the amendments to the Social Security Act made by the Adoption and Safe Families Act (ASFA) that added two new service categories (i.e., time-limited family and reunification services and adoption promotion and support services) to those specified in 45 CFR section 1357.32(f); however, the base year (1992) remains the same for all four service areas under Title IV-B, subpart 2 (42 USC 629b(a) and (b)(1); ACYF-CB-PI-99-07).

- b. The state may not use the amount specified in III.G.3.c, “Matching, Level of Effort, Earmarking – Earmarking,” to supplant any federal funds paid to the state under part E that could be used for monthly caseworker visitation with children who are in foster care and activities designed to improve caseworker retention, recruitment, training, and ability to access the benefits of technology (42 USC 629f(4)(B)(ii)).

3. Earmarking

- a. States must generally expend a significant portion of their grant (including Supplemental FY 2021 PSSF funds), defined as an amount approximating 20 percent, on each of the following: (1) programs of family preservation services, (2) community-based family support services, (3) time-limited family reunification services, and (4) adoption promotion and support services. ACF may approve a state to spend less than 20 percent on a services category if the state provides a strong justification in its CFSP or APSR. (42 USC 629b(a)(4); 45 CFR section 1357.15(s); ACYF-CB-PI-20-13 (found at <https://www.acf.hhs.gov/cb/policy-guidance/pi-20-13>)). This provision is not applicable to tribes per exemption authority (42 USC 629b(b)(2)(A)); 45 CFR section 1357.50(f)(1)(iii)).
- b. States may not expend more than 10 percent of the total program expenditures (Federal and State share) during the fiscal year under the State plan (including Supplemental FY 2021 PSSF funds) for administrative costs (42 USC 629d(d)). This provision is not applicable to tribes per exemption authority (42 USC 629b(b)(2)(A)); 45 CFR section 1357.50(f)(1)(i)).
- c. A state shall use the special allocation provided pursuant to Pub. L. No. 112-34 to support monthly caseworker visits with children who are in foster care with a primary emphasis on activities designed to improving caseworker decision making on the safety, permanency, and well-being of foster children and on activities designed to increase retention, recruitment and training of caseworkers (42 USC 629f(b)(4)(B)(i)). The limitation on

the use of federal funds for administrative costs described in paragraph G.3.b also applies to this special allocation.

H. Period of Performance

Funds under Title IV-B, subpart 2, must be obligated by September 30 of the fiscal year following the fiscal year in which the funds were awarded (45 CFR section 1357.32(g) and Supplemental Terms and Conditions available through a link as follows:

https://www.acf.hhs.gov/sites/default/files/documents//acyf.cb_93.556.promoting-safe-and-stable-families-program-supplemental-terms-and-conditions-fy22.pdf). Note: Supplemental FY 2021 PSSF funds must be obligated by September 30 of the fiscal year following the fiscal year in which the funds were awarded (September 30, 2021).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable.
- c. *SF-425, Federal Financial Report* – Applicable (expenditure reporting only) Note: Separate SF-425 reporting is required for Supplemental FY 2021 PSSF funding.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.558 TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF)

I. PROGRAM OBJECTIVES

The objectives of the state and tribal TANF programs are to provide time-limited assistance to needy families with children so that the children can be cared for in their own homes or in the homes of relatives; to end dependence of needy parents on government benefits by promoting job preparation, work, and marriage; to prevent and reduce out-of-wedlock pregnancies, including establishing prevention and reduction goals; and to encourage the formation and maintenance of two-parent families.

II. PROGRAM PROCEDURES

A. Overview

The Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS), administers the TANF program on behalf of the federal government. To be eligible for the TANF block grant, a state (including the District of Columbia, the Commonwealth of Puerto Rico, the US Virgin Islands, Guam, and American Samoa) must periodically submit a state plan containing specified information and assurances.

1. *States*

Following ACF review of the state plan and determination that it is complete, ACF awards the basic “State Family Assistance Grant” (SFAG) to the state using a formula allocation derived from funding levels under TANF’s predecessor programs. The SFAG is a fixed amount to the state subject to reductions based on any penalties assessed. In addition, SFAG amounts will be adjusted for any federally recognized Indian tribes within the state that operate separate tribal TANF programs. States have significant flexibility in designing programs and determining eligibility requirements within broad federal parameters. While states have flexibility and discretion, there are provisions to ensure accountability for results, including requirements for reporting data on expenditures and individuals receiving benefits under the program, and monetary penalties for failure to meet programmatic requirements such as work participation requirements.

The federal TANF block grant program also has an annual cost-sharing requirement, known as maintenance-of-effort (MOE). A state must spend each fiscal year at least 80 percent of its historic state expenditures to provide benefits and services to eligible clientele. If the state meets both its required minimum overall (“all-family”) and two-parent work participation rates for a federal fiscal year (FFY), then the required MOE spending level decreases to 75 percent of its FFY 1994 historic state expenditures. “Historic state expenditures” means the state’s FFY 1994 share of expenditures in the former Aid to Families with

Dependent Children (AFDC), EA, AFDC-Related Child Care, Transitional Child Care, At-Risk Child Care, and JOBS programs. States may not use more than 15 percent of the total amount of countable expenditures for the fiscal year for administrative activities.

2. *Tribes*

Tribal Family Assistance Plans (TFAP) are developed for a three-year period and submitted to ACF for review and approval. The Tribal Family Assistance Grant (TFAG) is derived from an amount equal to the federal share of expenditures, other than child care costs, by the state or states under the former AFDC, EA, and JOBS programs for FFY 1994 for all American Indian families residing in the service area identified in the TFAP. The TFAG is a fixed amount, subject to reductions based on any penalties assessed. As long as the minimum requirements are met, Indian tribes (tribes) have significant flexibility in designing programs and determining eligibility requirements and may use grant funds to provide cash or non-cash assistance, including direct services, and for administrative activities.

As also stated in IV, “Other Information - Tribal TANF Grantees under a Pub. L. No. 102-477 Demonstration Project (477),” audits of Indian tribal governments with Tribal TANF in their approved 477 plan must follow the guidance in the 477 Cluster found in the Department of the Interior’s section of Part 4 for this Supplement.

B. Funding

1. *States*

States have options for how to expend federal grant funds and state MOE funds. Certain statutory and regulatory requirements apply depending on whether the source of the funding for a service or benefit is federal funds alone, state MOE funds, or a combination of the two. For this reason, this supplement explains requirements based on how the state reports expenditures for a given service or benefit.

- a. *Federal Only* – A state should report an expenditure as “federal only” when it uses only federal grant funds, without including any MOE funds.
- b. *Commingled Federal/State* – A state should report an expenditure as “commingled” when it uses both federal grant and MOE funds for the benefit or service. Commingled funding of a service or benefit means that the expenditure is subject to all federal funding restrictions, TANF requirements, and MOE limitations, or the most restrictive of these if they conflict.
- c. *Segregated State* – A state should report an expenditure as “segregated state” if it uses MOE funds in the TANF program operated by the state and uses no federal grant funds for the benefit or service.

- d. *Separate State Program (SSP)*– A state should report an expenditure as funded by a “separate state program” if it reports state expenditures as MOE as part of a program, operated outside of the TANF program operated by the state.

Federal grant funds and MOE funds must both be used for “expenditures.” A definition of the term “expenditure” is found in 45 CFR section 260.30. In addition, 45 CFR section 260.33 explains the circumstances under which certain state tax relief provisions would count as expenditures.

2. *Tribes*

Similar to states, tribes have options for how to expend federal grant funds and, where applicable, state MOE funds. Certain statutory and regulatory requirements apply depending on whether the source of the funding for a service, or benefit, is federal funds alone, state MOE funds, or a combination of the two. For this reason, throughout this supplement, we explain requirements based on how the tribe reports expenditures for a given service or benefit.

- a. *Federal Only* – A tribe should report an expenditure as “federal only” when it uses only federal grant funds, without including any state-donated MOE funds or tribal funds that are expended in the TANF program operated by the tribe.
- b. *Commingled Federal/State-donated MOE* – A tribe should report an expenditure as “commingled” when it uses both federal grant and state-donated MOE funds for the benefit or service. Commingled funding of a benefit or service means that the expenditure is subject to all federal funding restrictions and state MOE limitations, or the most restrictive of these if they conflict.
- c. *Segregated Tribal* – A tribe should report an expenditure as “segregated tribal” if it uses state MOE funds expended separately in the TANF program operated by the tribe and uses no federal grant funds for the benefit or service. See IV., “Other Information,” for guidance on state MOE expended by tribes.

American Rescue Plan Act of 2021

On March 11, 2021, the president signed the American Rescue Plan Act of 2021 into law (Pub. L. No. 117-2). It establishes the Pandemic Emergency Assistance Fund (PEAF) in section 403(c) of the Social Security Act (the Act). The PEAF provides funding to states (which includes the District of Columbia), tribes administering a TANF program, and five US territories (Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands) to assist needy families impacted by the Coronavirus Disease 2019 (COVID-19) pandemic.

Source of Governing Requirements

These programs are authorized under Title IV-A of the Social Security Act, as amended by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) (Pub. L. No. 104-193) and subsequent amendments thereto and are codified at 42 USC 601-619.

The governing regulations for states are those in 45 CFR parts 260–265. Regulations for tribal TANF are in 45 CFR Part 286.

All state and all tribal TANF programs are subject to the provisions in the HHS implementation of 2 CFR Part 200 at 45 CFR Part 75.

Availability of Other Program Information

TANF-ACF-PI-2007-08, dated November 28, 2007, on *Using Federal TANF and State Maintenance-of-Effort (MOE) Funds for Families in Areas Covered by a Federal or State Disaster Declaration* presents items to consider with respect to the current TANF program when addressing the needs of families affected by a federally or state-declared disaster. TANF-ACF-PI-2007-08 is available at <https://www.acf.hhs.gov/ofa/resource/policy/pi-ofa/2007/200708/pi200708>.

Other general program information regarding the state and tribal TANF programs is available from the Office of Family Assistance (OFA) website at <https://www.acf.hhs.gov/ofa/programs>.

TANF-ACF-PI-2021-02, dated April 9, 2021, *The Pandemic Emergency Assistance Fund*, provides initial guidance to state, tribal, and territorial agencies administering the TANF program, and other eligible territories, regarding the newly established PEAFF.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	Y	N	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

This program refers to states; however, in some cases, subrecipients of states (e.g., local governments) may be responsible for compliance requirements that are referred to in this Supplement as “state.” The auditor should adjust accordingly for the entity being audited (typical for all requirements).

1. *States*

a. Federal Only

- (1) Funds may be used for expenditures for activities that are not permissible under 42 USC 601, but for which the state was authorized to use Title IV-A or IV-F funds under prior law. The previously authorized activities must have been included in a state’s approved state AFDC plan, JOBS plan, or Supportive Services plan, as in effect on September 30, 1995, or at the state’s option, on August 21, 1996. Examples of such activities are authorized juvenile justice and foster care activities (42 USC 604(a)(2); 45 CFR section 263.11(a)(2)).
- (2) A state may transfer up to 30 percent of its total of current fiscal year funds (not prior fiscal year funds carried into the current fiscal year) received under the SFAG to carry out programs under the Social Services Block Grant (Title XX) (Assistance Listing 93.667) and/or the Child Care and Development Block Grant (Assistance Listing 93.575). However, no more than 10 percent may be transferred to Title XX, and such amounts may be used only for programs or services to children or their families whose income is less than 200 percent of the poverty level. Neither TANF contingency funds under 42 USC 603(b) nor pandemic emergency assistance funds under 42 USC 603(c) (Pub. L. No. 117-2) may be transferred under this authority (42 USC 604(d)). The poverty guidelines are issued each year in the *Federal Register* and HHS

maintains a website that provides the poverty guidelines (<https://aspe.hhs.gov/poverty-research>). When transferred, the funds are subject to the rules of the program to which they are transferred (within statutory restrictions) and should be audited under that program. Please refer to Part IV Item 1, “Transfers out of TANF.”

b. Federal Only and Commingled Federal/State

Funds may not be used to provide medical services other than pre-pregnancy family planning services (42 USC 608(a)(6)).

c. Federal Only, Commingled Federal/State, Segregated State, Separate State Program

- (1) A state may use funds in any manner reasonably calculated to accomplish the purposes of the program, including providing low-income households with assistance in meeting home heating and cooling costs (42 USC 604(a)(1) and 45 CFR section 263.11(a)(1)). As specified in 42 USC 601 and 45 CFR section 260.20, the TANF program has the following purposes (Note: In the following sections of this program supplement, these are referenced as TANF purposes 1, 2, 3, and 4, respectively):
 - (a) Provide assistance to needy families so that children may be cared for in their own homes or in the homes of relatives;
 - (b) End dependence of needy parents on government benefits by promoting job preparation, work, and marriage;
 - (c) Prevent and reduce the incidence of out-of-wedlock pregnancies and establish annual numerical goals for preventing and reducing the incidence of these pregnancies; and
 - (d) Encourage the formation and maintenance of two-parent families.
- (2) A state may use funds for programs to prevent and reduce the number of out-of-wedlock pregnancies, including programs targeted to law enforcement officials, the educational system, and counseling services that provide education and training of women and men on the problem of statutory rape (42 USC 602(a)(1)(A)(v) and (vi)).

- (3) A state may use funds to make payments or provide job placement vouchers to state-approved public and private job placement agencies providing employment placement services to individuals receiving assistance under TANF (42 USC 604(f)).
- (4) A state may use funds to implement electronic benefits transfer system (42 USC 604(g)).
- (5) A state may use funds to carry out a program to fund individual development accounts (42 USC 604(h)(2); 45 CFR sections 263.20 through 263.23) established by individuals eligible to receive assistance under TANF (42 USC 604(h); 45 CFR Part 263, Subpart C).
- (6) A state may contract with charitable, religious, and private organizations to provide administrative and programmatic services and may provide beneficiaries of assistance with certificates, vouchers, or other forms of disbursement that are redeemable with such organization (42 USC 604a(b), 42 USC 604a(k), and 45 CFR section 260.34). However, funds provided directly to participating organizations may not be used for inherently religious activities, such as worship, religious instruction, or proselytization (42 USC 604a(j); 45 CFR section 260.34(c)).

d. Prohibition on Use of Federal TANF and State MOE funds for Juvenile Justice Services

See IV, "Other Information," for area of risk of non-compliance for juvenile justice services.

2. Tribes

a. Federal Only

- (1) A tribe may use funds for expenditures for activities that are not permissible under 42 USC 601, but for which the state or tribe was authorized to use Title IV-A or IV-F funds under prior law. The previously authorized activities must have been included in a state's approved state AFDC plan, JOBS plan, or Supportive Services plan, as in effect on September 30, 1995, or at the state's option, on August 21, 1996. Examples of such activities are authorized juvenile justice and foster care activities (42 USC 604(a)(2); 45 CFR section 263.11(a)(2)). Use of such funds in the tribal TANF program is allowed if the geographic area of the tribal TANF program is within the state(s) having had an approved AFDC state plan(s) under Title IV-A that included these activities. If the tribe plans to exercise this option, these activities must be included in the approved tribal TFAP.

- (2) Tribes may not transfer any federal TANF funds to the Social Services Block Grant (Title XX) (Assistance Listing 93.667) or the Child Care and Development Block Grant (Assistance Listing 93.575). Funds may not be used to contribute to or subsidize non-TANF programs (42 USC 604(d); 45 CFR section 286.45 (b)).
- b. Federal Only, Commingled Federal/State-donated MOE, Segregated Tribal
- (1) A tribe may use funds in any manner reasonably calculated to achieve the purposes of the tribal TANF program, including providing low-income households with assistance in meeting home heating and cooling costs (42 USC 604(a)(1) and 45 CFR section 286.35(a)(1)). As specified in 42 USC 601 and 45 CFR section 286.35, the tribal TANF program has the following purposes (Note: In the following sections of this program supplement, these are referenced as TANF purposes 1, 2, 3, and 4, respectively):
 - (a) Provide assistance to needy families so that children may be cared for in their own homes or in the homes of relatives;
 - (b) End dependence of needy parents on government benefits by promoting job preparation, work, and marriage;
 - (c) Prevent and reduce the incidence of out-of-wedlock pregnancies and establish annual numerical goals for preventing and reducing the incidence of these pregnancies; and
 - (d) Encourage the formation and maintenance of two-parent families.
 - (2) A tribe may use funds for programs to prevent and reduce the number of out-of-wedlock pregnancies, including programs targeted to law enforcement officials, the educational system, and counseling services that provide education and training of women and men on the problem of statutory rape (42 USC 602(a)(1)(A)(v) and (vi)).
 - (3) A tribe may use funds to make payments or provide job placement vouchers to tribe-approved public and private job placement agencies providing employment placement services to individuals receiving assistance under TANF (42 USC 604(f)).
 - (4) A tribe may use funds to implement electronic benefits transfer system (42 USC 604(g)).

- (5) A tribe may use funds to carry out a program to fund individual development accounts (42 USC 604(h)(2)) established by individuals eligible to receive assistance under Tribal TANF (42 USC 604(h); 45 CFR section 286.40).
- (6) A tribe may contract with charitable, religious, and private organizations to provide administrative and programmatic services and may provide beneficiaries of assistance with certificates, vouchers, or other forms of disbursement which are redeemable with such organization (42 USC 604a(b) and 42 USC 604a(k)). However, tribes that operate their own TANF program under section 412 of the Social Security Act are not required to follow the Charitable Choice rules because the statutory provisions on Charitable Choice apply only to state and local governments (42 USC 604a(j); September 30, 2003, *Federal Register*, (68 FR 56450 and 56463)).
- (7) Tribal TANF grantees that expend federal funds on economic development activities must adhere to the instructions contained in the TANF Program Instruction, TANF-ACF-PI-2005-02, dated April 19, 2005, pertaining to economic development expenditures. This program instruction is available at <https://www.acf.hhs.gov/ofa/resource/policy/pi-ofa/2005/pi2005-2htm> (45 CFR section 286.35(a)(1)).
- (8) Unlike states, tribes are not prohibited from expending funds for medical expenses, if the expenditure is in the context of removing barriers to employment, training, or job-related education. However, funds cannot be used for general medical expenses for families. The expenditure of TANF funds is not intended to subsidize, contribute to, or supplant other available medical services or funding (i.e., Indian Health Service, Public Health Service, tribal health services, state, county, and local health services, or other services covered by Medicaid, Medicare, or private health insurance (42 USC 608(a)(6), 45 CFR section 286.45(b))).

3. *Pandemic Emergency Assistance Fund*

a. All grantees

- (1) States, tribes, and territories (grantees) may use funds to provide certain non-recurrent, short-term (NRST) benefits (described below). Additionally, they may use funds for administrative costs (up to a 15 percent cap for states and territories and up to the negotiated cap for tribes).

- (2) For the purposes of PEAFF, NRST benefits mean cash payments or other benefits that meet the regulatory definition (45 CFR 260.31(b)(1)), but are limited to those that fall into the specific expenditure reporting category mentioned in the legislation (line 15 of the [ACF-196R](#) (PDF), the state financial reporting form for the TANF program). In other words, for this fund, NRST benefits, like all NRSTs under TANF, must: be designed to deal with a specific crisis situation or episode of need; not be intended to meet on-going needs; and not extend beyond four months; **and** (as explained in the instructions for reporting on line 15 of the ACF-196R) NRSTs paid for with PEAFF funds: must only include expenditures such as emergency assistance and diversion payments, emergency housing and short-term homelessness assistance, emergency food aid, short-term utilities payments, burial assistance, clothing allowances, and back-to-school payments; and may **not** include tax credits, child care, transportation, or short-term education and training.

E. Eligibility

1. Eligibility for Individuals

The state or tribal plan provides the specifics on the state or tribal area's definition of financially needy which the state or tribal area uses in determining eligibility. Whenever used in this section, "assistance," has the meaning in 45 CFR section 260.31(a) of the TANF regulations for states and 45 CFR section 286.10 of the tribal TANF regulations for federally recognized tribes operating an approved tribal TANF program. Plan and eligibility requirements must comply with the following federal requirements:

a. States

- (1) Federal Only, Commingled Federal/State, Segregated State, and Separate State Program
 - (a) Only a financially needy family that consists of, at a minimum, a minor child living with a parent or other caretaker relative, or a pregnant woman may receive TANF "assistance" or most MOE-funded benefits, services, or "assistance" regardless of the TANF purpose that the expenditure is reasonably calculated to accomplish (see III.A.1.c, "Activities Allowed or Unallowed – *Federal Only, Commingled Federal/State, Segregated State, Separate State Program*"). The child must be less than 18 years old, or, if a full-time student in a secondary school (or the equivalent level of vocational or technical training), less than 19 years old. (With respect to segregated or separate

state MOE funds, the state could use the definition for minor child given in section 419(2) of the Social Security Act or some other definition applicable in state law provided the state can articulate a rational basis for the age it chooses.) Financially “needy” means financially eligible according to the state’s quantified income and resource (if applicable) criteria to receive the benefit (42 USC 602 and 602(a)(1)(B)(iii), 42 USC 609(a)(7)(B)(IV), and 42 USC 608(a)(1), 619(2); 45 CFR section 263.2(b)(2)). See III.G.2.1, “Matching, Level of Effort, Earmarking – Level of Effort – *Maintenance of Effort*,” for the limited MOE pro-family exception to this requirement.

Note: A state may continue to provide federally funded (*Federal Only*) TANF “assistance” pursuant to 42 USC 604(a)(2) using the financial eligibility criteria contained in the state’s approved AFDC, EA, JOBS, or Supportive Services plan as of September 30, 1995 (or at state option, as of August 21, 1996). A state may also continue this assistance notwithstanding the family composition requirement described above. (See III.A.1.a(1), “Activities Allowed or Unallowed.”)

Only the financially “needy” are eligible for services, benefits, or “assistance” pursuant to TANF purpose 1 or 2 (see III.A.1.c., “Activities Allowed or Unallowed – *Federal Only, Commingled Federal/State, Segregated State, Separate State Program*”) (42 USC 601(a)(1) and (2); 45 CFR sections 260.20(a) and (b)). Financially “needy” for TANF and MOE purposes means financial deprivation (i.e., lacking adequate income and resources). For example, a needy family or a needy parent is one who is financially eligible according to the state’s quantified financial eligibility criteria (income and resource (if applicable) standards, April 12, 1999, *Federal Register* (64 FR 17825), 45 CFR section 263.2(b)(3)).

States may choose to use federal only TANF funds to provide benefits that do not constitute “assistance” to the non-needy pursuant to TANF purpose 3 or 4 only (see III.A.1.c., “Activities Allowed or Unallowed – *Federal Only, Commingled Federal/State, Segregated State, Separate State Program*”) (42 USC 601(a)(3) and (4); 45 CFR sections 260.20(c) and (d)). States may also choose to use MOE funds to provide certain pro-family non-assistance benefits to the non-needy under TANF purpose 3 or 4 (see III.G.2.1, “Matching, Level of Effort, Earmarking

– Level of Effort – *Maintenance of Effort*,” for the limited MOE pro-family exception to this requirement).

- (b) Qualified aliens, as defined in 8 USC 1641(b), are the only non-citizens who may receive a TANF public benefit, as defined in 8 USC 1611(c)), using federal TANF or commingled funds. Qualified aliens are lawful permanent residents, asylees, refugees, aliens paroled into the United States for at least one year, aliens whose deportations are being withheld, aliens granted conditional entry, Cuban/Haitian entrants, and certain battered aliens. Victims of severe forms of trafficking and certain family members are also eligible for federally funded or administered public benefits and services to the same extent as refugees.

Qualified aliens, nonimmigrants under the Immigration and Nationality Act, and individuals paroled into the United States for less than a year are the only noncitizen groups that are eligible for a non-commingled state or local MOE-funded public benefit, as defined in 8 USC 1621(c). Aliens that are not lawfully present in the United States may also be eligible for a state or local MOE-funded public benefit if the state has enacted a law after August 22, 1996, affirmatively providing for such eligibility (8 USC 1621(d)). All expenditures must meet all MOE requirements at 45 CFR Part 263, Subpart A. See III.G.2.1, “Matching, Level of Effort, Earmarking – Level of Effort – Maintenance of Effort.”

States have the authority to decide whether or not to provide a federal TANF-funded public benefit or an MOE-funded public benefit to otherwise qualified aliens (including nonimmigrants and individuals paroled in the US for less than a year in the case of a non-commingled state or local MOE-funded public benefit) (8 USC 1612(b)(1) and 8 USC 1622(a)). If a state has decided not to help eligible aliens, then the state may not deny eligibility to refugees, asylees, aliens whose deportation has been withheld, Amerasians, and Cuban/Haitian entrants for a period of five years after the date of entry into the United States or the date asylum or withholding of deportation was granted. Also, such states may never deny eligibility to legal permanent residents who have worked 40 qualifying quarters after December 31, 1996, and have not received any federal means-tested public benefit during such period (once the five-year bar has expired for a qualified alien entering the United States on or after August 22, 1996, as

described in the next paragraph), or to aliens who are veterans, members of the military on active duty, and their spouses and unmarried dependents (8 USC 1612(b)(2)(A)(ii) 8 USC 1621(2)(B) and (C), 8 USC 1622(b)(1)-(3)). In other words, Congress did not give states the authority to deny eligibility to all eligible aliens. If the state elects to help all otherwise eligible aliens (as described in the preceding two paragraphs), then this paragraph does not apply.

Unless exempt under 8 USC 1613(b), qualified aliens, as defined in 8 USC 1641(b), entering the United States on or after August 22, 1996, are not eligible for a federal means-test public benefit (e.g., federally funded TANF assistance), as defined in 8 USC 1611(c), for a period of five years (8 USC 1613(a)). The five-year bar begins either on the date of the alien's entry into the United States as a qualified alien or on the date the alien residing in the United States becomes a qualified alien, whichever is later. If the alien entered the United States on or after August 22, 1996 but does not have an immigration status that qualifies (as defined in 8 USC 1641(b)), the individual is not eligible for a federal public benefit (as defined in 8 USC 1611(c)). The following qualified aliens are exempt from the five-year bar: refugees, asylees, aliens whose deportation is being withheld, Amerasians, Cuban/Haitian entrants, as well as veterans, members of the military on active duty, and their spouses and unmarried dependent children (8 USC 1613(b)).

If a noncash federal or state and local public benefit meets the specifications in the Attorney General's Final Order (Order No. 2353-2001 published January 16, 2001, at 66 FR 3613), then the state may provide the benefit regardless of immigration status (8 USC 1611 (b)(1)(D) and 8 USC 1621(b)(4)).

- (2) Federal Only and Commingled Federal/State
 - (a) Any family that includes an adult or minor child head of household or a spouse of the head of household who has received assistance under any state program funded by federal TANF funds for 60 months (whether or not consecutive) is ineligible for additional federally funded TANF assistance. However, the state may extend assistance to a family on the basis of hardship, as defined by the state, or if a family member has been battered or subjected to

extreme cruelty. In determining the number of months for which the head of household or the spouse of the head of household has received assistance, the state must not count any month during which the adult received the assistance while living in Indian country or in an Alaskan Native Village and the most reliable data available with respect to that month (or a period including that month) indicate at least 50 percent of the adults living in Indian country or in the village were not employed (42 USC 608(a)(7); 45 CFR sections 264.1(a), (b), and (c)).

(See III.G.3, “Matching, Level of Effort, Earmarking – Earmarking,” for testing the limits related to the number of exemptions.)

- (b) A state may not provide assistance to an individual who is under age 18, is unmarried, has a minor child at least twelve weeks old, and has not successfully completed high school or its equivalent unless the individual either participates in education activities directed toward attainment of a high school diploma or its equivalent, or participates in an alternative education or training program approved by the state (42 USC 608(a)(4); 45 CFR section 263.11(b)).
- (c) A state may not provide assistance to an unmarried individual under 18 caring for a child, if the minor parent and child are not residing with a parent, legal guardian, or other adult relative, unless one of the statutory exceptions applies (42 USC 608(a)(5)).
- (d) A state may not provide assistance for a minor child who has been or is expected to be absent from the home for a period of 45 consecutive days or, at the option of the state, such period of not less than 30 and not more than 180 consecutive days unless the state grants a good cause exception, as provided in its state plan (42 USC 608(a)(10)).
- (e) A state may not provide assistance for an individual who is a parent (or other caretaker relative) of a minor child who fails to notify the state agency of the absence of the minor child from the home within five days of the date that it becomes clear to that individual that the child will be absent for the specified period of time (42 USC 608(a)(10)(C)).

- (f) A state may not use funds to provide cash assistance to an individual during the ten-year period that begins on the date the individual is convicted in federal or state court of having made a fraudulent statement or representation with respect to place of residence in order to simultaneously receive assistance from two or more states under TANF, Title XIX, or the Food Stamp Act of 1977, or benefits in two or more states under the Supplemental Security Income program under Title XVI of the Social Security Act. If the President of the United States grants a pardon with respect to the conduct that was the subject of the conviction, this prohibition will not apply for any month beginning after the date of the pardon (42 USC 608(a)(8)).
 - (g) A state may not provide assistance to any individual who is fleeing to avoid prosecution, or custody or confinement after conviction, for a felony or attempt to commit a felony (or in the state of New Jersey, a high misdemeanor), or who is violating a condition of probation or parole imposed under federal or state law (42 USC 608(a)(9)(A)).
- (3) Federal Only, Commingled Federal/State, Segregated State
- (a) A state shall require that, as a condition of providing assistance, a member of the family assign to the state the rights the family member may have for support from any other person. This assignment may not exceed the amount of assistance provided (42 USC 608(a)(3)).
 - (b) An individual convicted under federal or state law of any offense which is classified as a felony and which involves the possession, use, or distribution of a controlled substance (as defined in the Controlled Substances Act (21 USC 802(6))) is ineligible for assistance if the conviction was based on conduct occurring after August 22, 1996. A state shall require each individual applying for TANF assistance to state in writing whether the individual or any member of their household has been convicted of such a felony involving a controlled substance. However, a state may by law enacted after August 22, 1996, exempt any or all individuals from this prohibition or limit the time period that this prohibition applies to any or all individuals (21 USC 862a).
 - (c) If an individual in a family receiving assistance refuses to engage in required work, a state must reduce assistance to the family, at least pro rata, with respect to any period

during the month in which the individual so refuses or may terminate assistance. Any reduction or termination is subject to good cause or other exceptions as the state may establish (42 USC 607(e)(1); 45 CFR sections 261.13 and 261.14(a) and (b)). However, a state may not reduce or terminate assistance based on a refusal to work if the individual is a single custodial parent caring for a child who is less than 6 years of age if the individual can demonstrate the inability (as determined by the state) to obtain child care for one or more of the following reasons: (a) the unavailability of appropriate care within a reasonable distance of the individual's work or home; (b) unavailability or unsuitability of informal child care; or (c) unavailability of appropriate and affordable formal child care (42 USC 607(e)(2); 45 CFR sections 261.15(a), 261.56, and 261.57).

b. Tribes: Federal Only, Commingled Federal/State-Donated MOE

Eligibility for tribal TANF is defined in the approved TFAP. See IV, "Other Information," for guidance on state MOE expended by tribes.

The approved TFAP includes the tribe's proposal for time limits for the receipt of TANF assistance (45 CFR section 286.115), as well as the percentage of the caseload to be exempted from the time limit. These proposed time limits must be approved by ACF (45 CFR section 286.115).

2. Eligibility for the Pandemic Emergency Assistance Fund

- a. The recipients of PEAFF-funded NRSTs must be financially needy families with children but they do not necessarily have to be eligible for TANF cash assistance. A grantee has the flexibility to determine what needy means for each NRST and may wish to set a higher standard than it does for TANF cash assistance, such as aligning with SNAP or Medicaid income eligibility criteria.
- b. The Income Eligibility Verification System (IEVS) does apply to the PEAFF, as it is funded under Title IV-A; however, tribes are not subject to the IEVS requirements.

3. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

4. Eligibility for Subrecipients

Not Applicable

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – Maintenance of Effort

See IV, “Other Information,” for guidance on state MOE expended by tribes.

The following MOE provisions apply to any state funds that are counted towards the MOE for TANF, whether such state funds are expended as commingled federal/state, segregated state, or separate state program funds. Note that MOE requirements do not apply to subrecipients.

- a. *State MOE* – Every fiscal year, a state must maintain an amount of “qualified state expenditures” (as defined in 42 USC 609(a)(7)(B) and 45 CFR section 263.2) for eligible families (as defined in 42 USC 609(a)(7)(B)(i)(IV) and 45 CFR section 263.2(b)) at least at the applicable percentage of the state’s historic state expenditures. Therefore, all amounts claimed for or on behalf of eligible families, including amounts that result from state tax provisions, must be the result of expenditure (42 USC 609(a)(7)(A) and (B)(i)(I); 45 CFR sections 260.30 (“expenditure”) and 260.33, 45 CFR section 92.3, and 45 CFR section 92.24). States may claim qualified expenditures for eligible family members who are citizens or aliens. However, the particular aliens for whom a state may claim qualified expenditures will depend on the state funds used to provide the benefit or service (see III.E.1.a.(2), “Eligibility – Eligibility for Individuals, *Federal Only, Commingled Federal/State, Segregated State, or Separate State Program*”) and whether the benefit or service is a federal, state, or local public benefit (8 USC 1611, 1612(b), 1613, 1621-1622, and 1641(b)).

The applicable percentage for each fiscal year is 80 percent of the amount of non-federal funds the state spent in FY 1994 on AFDC or 75 percent if the state meets the TANF work participation rate requirements (42 USC 607(a)) for the fiscal year. This is termed “basic MOE” and the requirement is based on the federal fiscal year. Any MOE expenditures above this required amount are referred to as “excess MOE.”

Except as provided in paragraph b, immediately below, qualified expenditures with respect to eligible families may come from all programs (i.e., the state's TANF program as well as programs separate from the state's TANF program). This requirement may be met through allowable state or local cash expenditures for goods and services, cash donations by non-governmental third parties (e.g., a non-profit organization, corporation, or other private party), or the value of third-party in-kind contributions. A state's records must show that all the costs are verifiable and meet all applicable requirements in 45 CFR sections 263.2 through 263.6. Third parties must be aware of and agree with the state's intentions and, accordingly, the state's records must include an agreement between the state and the third party permitting the state to count the expenditure toward its MOE requirement (42 USC 609(a)(7)(A) and 609(a)(7)(B)(i)(I); 45 CFR sections 263.1 and 263.2(e)).

Effective October 1, 2008 (i.e., FY 2009 awards), states may claim only *certain* pro-family non-assistance expenditures that are reasonably calculated to accomplish TANF purpose 3 or TANF purpose 4. These pro-family expenditures consist of the allowable healthy marriage promotion and responsible fatherhood non-assistance activities enumerated in Title IV-A of the Social Security Act, sections 403(a)(2)(A)(iii) and 403(a)(2)(C)(ii), unless a limitation, restriction, or prohibition under 45 CFR Part 263, Subpart A applies (45 CFR section 263.2(a)(4)(ii); TANF-ACF-PI-2008-10, dated October 23, 2008, available at <https://www.acf.hhs.gov/ofa/programs/tanf/policy>).

States may claim for MOE purposes the qualified pro-family healthy marriage and responsible fatherhood expenditures for *non-assistance* benefits and services provided to or on behalf of an individual or family, regardless of financial need or family composition. States must limit the provision of all other qualified MOE-funded assistance and non-assistance benefits to eligible families as defined at 45 CFR section 263.2(b), regardless of the TANF purpose that the expenditure is reasonably calculated to accomplish.

Section 409(a)(7)(B)(iv)(IV) of the Social Security Act prohibits states from counting toward their MOE requirement expenditures made as a condition of receiving federal funds, unless allowed under Title IV, part A of the Social Security Act.

If a state does not meet the basic MOE requirement, a penalty results. The penalty consists of a reduction of the state's federal

TANF grant for the following fiscal year in the amount of the difference between the state's qualified expenditures and the state's basic MOE (42 USC 609(a)(7)(A) and 45 CFR section 263.8). If application of a penalty results in a reduction of federal TANF funding, the state is required in the immediately succeeding fiscal year to spend from state funds an amount equal to the total amount of the reduction, in addition to the otherwise required basic MOE. The additional funds must be spent in the TANF program, not under "separate state programs." Such expenditures may not be claimed toward MOE (42 USC 609(a)(12); 45 CFR sections 263.6(f) and 264.50).

- b. *Limitations on "Qualified State Expenditures"* – Expenditures under pre-existing programs, other than those that would have been previously authorized and allowable under the former AFDC, JOBS, Emergency Assistance, Child Care for AFDC recipients, At-Risk Child Care, or Transitional Child Programs may not count toward the state's MOE requirement for the current year except to the extent that the current year's expenditures with respect to eligible families exceed the expenditures made under the state or local program in FY 1995.

Exception: If the expenditures are for non-assistance pro-family activities as addressed in paragraph a., then current year expenditures are not limited to those made with respect to eligible families. If total current fiscal year expenditures for allowable pro-family activities within TANF purpose three or TANF purpose 4 exceed total state expenditures in the program during FY 1995, then the state may claim the excess toward the state's MOE requirement. Thus, to be considered as "exceeding" the FY 1995 level, the expenditures must be new or additional expenditures. (42 USC 609(a)(7)(B)(i)(II)(aa) and 45 CFR section 263.5). Additional information on application of the "new spending test" for new or additional expenditures may be found in TANF-ACF-PI-2016-04 (<https://www.acf.hhs.gov/ofa/resource/tanf-acf-pi-2016-04>).

In addition, expenditures by the state from amounts that originated from federal funds may not count toward meeting a MOE requirement even if the expenditures "qualify" (42 USC 609(a)(7)(B)(iv)(I)).

Except for child care expenditures, double-counting of expenditures to meet the basic MOE requirement is prohibited (42 USC 609(a)(7)(B)(iv)(II-IV); 45 CFR section 263.6). States may count state funds expended to meet the requirements of the Child Care Development Fund Matching Fund (Assistance Listing 93.596) as basic MOE expenditures, as long as such expenditures

meet the requirements of 42 USC 609(a)(7). The maximum amount of child care expenditures that a state may double-count under this provision is the state's Matching Fund MOE amount under Assistance Listing 93.596 (42 USC 609(a)(7)(B)(iv); 45 CFR sections 263.3 and 263.6).

Expenditures for educational services/activities for eligible families to increase self-sufficiency, job training, and work count if the activities or services are not generally available to other state residents without cost and without regard to their income (42 USC 609(a)(7)(B)(i)(I)(cc); 45 CFR section 263.4, TANF-ACF-PI-2005-01, dated April 14, 2005, at <https://www.acf.hhs.gov/ofa/programs/tanf/policy>).

Administrative costs in connection with the activities that correspond to the qualified expenditures may not exceed 15 percent of the total amount of countable expenditures for the fiscal year (42 USC 609(a)(7)(B)(i)(I)(dd); 45 CFR section 263.2(a)(5)).

The basic MOE requirement expressly does not count expenditures for services or activities that only fall under 42 USC 604 (a)(2) (see III.A.1.a(1), "Activities Allowed or Unallowed"). Such expenditures are not considered "qualified expenditures" (42 USC 609(a)(7)(B)(i)(I); 45 CFR section 263.2(a)(4)).

- c. *Contingency Fund MOE* – A state must spend more than 100 percent of its historic state expenditures for FY 1994 to keep any of the federal contingency funds it received (42 USC 603(b), and 45 CFR sections 264.72(a)(2) and 264.70 through 77). This is termed "Contingency Fund MOE." The Contingency Fund MOE requirement may be met only through qualified expenditures under the state's TANF program. Qualified expenditures consist of those defined and provided under 42 USC 609(a)(7)(B)(i) and 45 CFR sections 263.2 (a)(1),(a)(3) through (a)(5), and 263.2(b), but excludes those expenditures described in 42 USC 609(a)(7)(B)(i)(I)(bb) and 45 CFR section 263.2(a)(2) (42 USC 603(b)(6)(B)(ii)(I) and 609(a)(10)).
- d. *1108(b) Territorial Matching Fund MOE Requirement* – See IV, "Other Information," for guidance on the spending requirements applicable to the receipt of Matching Grant funds under section 1108(b) of the Social Security Act (section 1108(b)) (42 USC 1308(b)).
- e. *Prohibition on Use of Federal TANF and State MOE funds for Juvenile Justice Services* – See IV, "Other Information" for area of risk of non-compliance for juvenile justice services.

2.2 Level of Effort – Supplement Not Supplant

1. *Pandemic Emergency Assistance Fund*

States, tribes and territories (grantees) may use funds to provide certain non-recurrent, short term (NRST) benefits (described in section A. 3. a. 2.). Additionally, they may use funds for administrative costs (up to a 15-percent cap for states and territories and up to the negotiated cap for tribes). All grantees must use funds to supplement, and not supplant, other federal, state, tribal, territorial, or local funds. Note that the Supplement Not Supplant requirements do not apply to subrecipients.

3. Earmarking

a. *Federal Only and Commingled Federal/State*

A state may not spend more than 15 percent for administrative purposes, excluding expenditures for information technology and computerization needed for required tracking and monitoring, of the total combined amounts available under the state family assistance grant, supplemental grant for population increases, and contingency funds (42 USC 604(b)(1) and (2); 45 CFR sections 263.0 and 263.13).

b. *Federal Only and Commingled Federal/State*

The average monthly number of families that include an adult or minor child head of household, or the spouse of the head of household, who has received assistance under any state program funded by federal TANF funds for more than 60 countable months (whether or not consecutive) may not exceed 20 percent of the average monthly number of all families to which the state provided assistance during the fiscal year or the immediately preceding fiscal year (but not both), as the state may elect. To make this determination for a fiscal year, the average monthly number of families with a head of household or spouse of a head of household who received assistance for more than 60 months would be divided by the average monthly number of families that received assistance in that fiscal year, or, if the state chooses, in the previous fiscal year (42 USC 608(a)(7)(C)(ii); 45 CFR sections 264.1(c) and (e)).

(See III.E.1, “Eligibility – Eligibility for Individuals,” for related eligibility testing.)

c. *Tribes: Federal Only and Commingled Federal/State-donated MOE*

The approved TFAP includes a negotiated administrative cost rate for that tribe for that particular year. As approved in the TFAP, no tribal TANF grantee may expend more than 35 percent of the total combined federal TANF funds for administrative costs during the first year, 30 percent during the second year, and 25 percent for the third and all subsequent grant periods. The approved tribal administrative cost rate may be found in a letter of approval issued by the ACF/Division of Tribal Services and/or in the approved TFAP. The tribal administrative cost cap is determined by multiplying the TFAG by the negotiated administrative rate for the fiscal year being tested (45 CFR section 286.50).

d. *Pandemic Emergency Assistance Fund*

Grantees may use funds for administrative costs, within limitations. For states (including the District of Columbia) and territories, the law provides a 15 percent cap on administrative expenditures. For tribes, the same cap will apply to administrative costs in the PEAFF that a tribe negotiated for administrative costs in its approved tribal TANF plan.

Note that the Earmarking requirements do not apply to subrecipients.

Indirect costs may be applied to the federal TANF funds based on the indirect cost rate negotiated by the Bureau of Indian Affairs, the Department of Health and Human Services' Division of Cost Allocation, or another federal agency. However, indirect costs applied to TANF funding are subject to and included within the administrative cap limits (45 CFR section 285.55(d)).

L. Reporting

States/Tribes:

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable. [ACF-196T](#), *Tribal TANF Financial Report Form (OMB No. 0970-0345)* – Applicable to tribes; Not Applicable to states. This form is not applicable to tribes administering TANF programs under a Pub. L. No. 102-477 demonstration project. Beginning with the FY 2009 award, tribes must use this form to report TANF expenditures quarterly.

- e. *ACF-196R, TANF Financial Report (OMB No. 0970-0446)* – States are required to submit this report quarterly, beginning in FY 2015, in lieu of the SF-425, *Federal Financial Report* (financial status). Each state files quarterly expenditure data on the state’s use of federal TANF funds, state TANF MOE expenditures, and state expenditures of MOE funds in separate state programs. If a state is expending federal TANF funds received in prior fiscal years, it must file a separate quarterly TANF Financial Report for each fiscal year that provides information on the expenditures of that year’s TANF funds. This form must be used for reporting regular TANF grant funds and Contingency Fund expenditures. See TANF-ACF-PI-2014-02, available at <http://www.acf.hhs.gov/programs/ofa/resource/tanf-acf-pi-2014-02>, for more information.
- f. [ACF-196-TR](#), *Territorial Financial Report* – Territories report their expenditures and other fiscal data in this report (45 CFR section 265.3(c)). The territories must report quarterly on their use of federal TANF funds, Territorial TANF MOE expenditures, expenditures of MOE funds in separate “state” programs, expenditures made as a result of receiving matching grant funds under 42 USC 1308(b), and expenditures made under the federal Adult Assistance programs (titles I, X, XIV, and XVI of the Social Security Act) (42 USC subchapters I, X, XIV, and XVI and 42 USC 1308(a)).
- See IV, “Other Information,” for additional guidance on territories’ spending levels.

2. Performance Reporting

- a. [ACF-199, TANF Data Report \(OMB No. 0970-0338\)](#) and [ACF-343, Tribal TANF Data Report \(OMB No. 0970-0215\)](#) (65 FR 8545, Appendix A, February 18, 2000)

One of the critical areas of this reporting is the work participation data, which serve as the basis for ACF to determine whether states and tribes have met the required work participation rates. A penalty may apply for failure to meet the required rates.

State Work Participation Rates

State agencies must meet or exceed their minimum annual work participation rates. The minimum work participation rates are 50 percent for the overall rate and 90 percent for the two-parent rate. A state’s minimum work participation rate may be reduced by its caseload reduction credit. HHS may penalize the state by an amount of up to 21 percent of the SFAG for violation of this provision (42 USC 609(a)(4); 45 CFR section 262.1(a)(4)).

Key Line Items – The following ACF-199 (TANF Data Report) line items contain critical information for making the preceding determinations and for other program purposes. Compare the data entered on the file for the key line items below to the documentation in the case file for completeness, accuracy, and consistency:

1. Section One – Family-Level Data
 - Item 12 *Type of Family for Work Participation*
 - Item 17 *Receives Subsidized Child Care*
 - Item 28 *Is the TANF family exempt from the federal time limit provisions*

2. Section One – Person-Level Data
 - Item 30 *Family Affiliation Code*
 - Item 32 *Date of Birth*
 - Item 38 *Relationship to Head-of-Household*
 - Item 39 *Parents with a Minor Child*
 - Item 44 *Number of months countable toward the federal time limit*

 - Item 48 *Work-Eligible Individual Indicator*
 - Item 49 *Work Participation Status*

3. Section One – Adult Work Participation Activities
 - Items 50 – 62 *Work Participation Activities*
 - Item 63 *Number of Deemed Core Hours for Overall Rate*
 - Item 64 *Number of Deemed Core Hours for the Two-Parent Rate*

4. Section Three – Active Cases
 - Item 8 *Total Number of Families*

Tribal Work Participation Rates

Tribal TANF agencies must meet or exceed their minimum annual work participation rates. The minimum work participation rates are contained in the respective tribal TANF plans. Tribal TANF agencies have the option to negotiate and choose from among a number of work participation rates (e.g., separate rates for one- and two-parent families or an “all-families with parents” rate when one- and two-parent families are combined). HHS may penalize the tribe by a maximum of 5 percent of the TFAG for the first violation of this provision. The penalty increases by an additional 2 percent for each subsequent violation up to a maximum of 21 percent (42 USC 612(c) and 612(g)(2); 45 CFR sections 286.195(a)(3) and 286.205).

Key Line Items – The following ACF-343 (Tribal TANF Data Report) line items contain critical information used in making a determination of a tribe's Work Participation Rates.

1. Review the tribe's TANF plan for a fiscal year to identify the type of family required to participate in work activities and the minimum number of hours per week that the adults and minor heads of household in the family must participate in work activities (45 CFR section 286.80). Compare the data entered on the file for the key line items below to the documentation in the case file for completeness, accuracy, and consistency:

Item 30 *Family Affiliation*
 Item 48 *Work Participation Status*
 Items 49–62 *Adult Work Participation Activities*

- b. [ACF 209, SSP-MOE Data Report](#) (OMB No. 0970-0338) – This report is submitted quarterly beginning with the first quarter of FFY 2000.

Key Line Items – The following line items contain critical information:

1. Section One – Family-Level Data
 - Item 9 *Type of Family for Work Participation*
 - Item 15 *Receives Subsidized Child Care*
2. Section One – Person-Level Data
 - Item 28 *Date of Birth*
 - Item 34 *Relationship to Head-of-Household*
 - Item 41 *Work-Eligible Individual Indicator*
 - Item 42 *Work Participation Status*
3. Section One – Adult Work Participation Activities
 - Items 43 – 55 *Work Participation Activities*
 - Item 56 *Number of Deemed Core Hours for Overall Rate*
 - Item 57 *Number of Deemed Core Hours for the Two-Parent Rate*
4. Section Three – Active Cases
 - Item 3 *Total Number of SSP-MOE Families*

3. Special Reporting

- a. [ACF-204, Annual Report including the Annual Report on State Maintenance-of-Effort Programs](#) (OMB No. 0970-0248) – Each state must file an annual report containing information on the TANF program and the state's MOE program(s) for that year, including strategies to implement the Family Violence Option, state diversion programs, and other program characteristics. Each state must complete the ACF-204 for each program

for which the state has claimed basic MOE expenditures for the fiscal year. States may submit this electronically through the On-Line Data Collection (OLDC) System.

Key Line Items – The following line items contain critical information.:

1. *Program Name*
2. *Description of Major Program Activities*
3. *Program Purpose(s)*
4. *Program Type*
5. *Total State MOE Expenditures*
6. *Number of Families Served with MOE Funds*
7. *Eligibility Criteria*
8. *Prior Program Authorization*
9. *Total Program Expenditures in FY 1995*

The total MOE expenditures reported in item 5 of the ACF-204 should equal the total MOE expenditures reported in line 24, columns (B) plus (C) of the 4th quarter ACF-196R *TANF Financial Report*; or line 17, column (B) of the ACF-196-TR, *Territorial Financial Report*.

- b. Each grantee must submit form [ACF-196P](#) (OMB No. 0970-0510) to report expenditures for the Pandemic Emergency Assistance Fund within 90 days of the end of each federal fiscal year.

Key Line Items – The following line items contain critical information:

1. *Administrative Costs (listed as “Administration” on the form)*
2. *Non-Recurrent, Short-Term Benefits*

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

Special Tests and Provisions one through five apply to a state’s TANF program, not to a Tribal TANF program.

1. Child Support Non-Cooperation

Compliance Requirements If the state agency responsible for administering the state plan approved under Title IV-D of the Social Security Act determines that an individual is not cooperating with the state in establishing paternity, or in establishing, modifying or enforcing a support order with respect to a child of the individual, and reports that information to the state agency responsible for TANF, the state TANF agency must (1) deduct an amount equal to not less than 25 percent from the TANF assistance that would otherwise be provided to the family of the individual, and (2) may deny the family any TANF assistance. HHS may penalize a state for up to 5 percent of the SFAG for failure to substantially comply with this required state child support program (42 USC 608(a)(2) and 609(a)(8); 45 CFR sections 264.30 and 264.31).

Audit Objectives Determine whether, after notification by the state Title IV-D agency, the TANF agency has taken necessary action to reduce or deny TANF assistance.

Suggested Audit Procedures

- a. Review the state's TANF policies and operating procedures concerning this requirement.
- b. Test a sample of cases referred by the Title IV-D agency to the TANF agency to ascertain if benefits were reduced or denied as required.

2. Income Eligibility and Verification System

Compliance Requirements Each state shall participate in the Income Eligibility and Verification System (IEVS) required by Section 1137 of the Social Security Act as amended. Under the state plan the state is required to coordinate data exchanges with other federally assisted benefit programs, request and use income and benefit information when making eligibility determinations and adhere to standardized formats and procedures in exchanging information with other programs and agencies. Specifically, the state is required to request and obtain information as follows (42 USC 1320b-7; 45 CFR section 205.55):

- a. Wage information from the state Wage Information Collection Agency (SWICA) should be obtained for all applicants at the first opportunity following receipt of the application, and for all recipients on a quarterly basis.
- b. Unemployment Compensation (UC) information should be obtained for all applicants at the first opportunity, and in each of the first three months in which the individual is receiving aid. This information should also be obtained in each of the first three months following any recipient-reported loss of employment. If an individual is found to be receiving UC, the information should be requested until benefits are exhausted.
- c. All available information from the Social Security Administration (SSA) for all applicants at the first opportunity (see *Federal Tax Return Information* below).

- d. Information from the US Citizenship and Immigration Services and any other information from other agencies in the state or in other states that might provide income or other useful information.
- e. Unearned income from the Internal Revenue Service (IRS) (see *Federal Tax Return Information* below).

Federal Tax Return Information – Information from the IRS and some information from SSA is federal tax return information and subject to use and disclosure restrictions by 26 USC 6103. Individual data received from the SSA’s Beneficiary Earnings Exchange Record (BEER), consisting of wage, self-employment, and certain other income information is considered federal tax return information. However, benefits payments such as Supplemental Security Income (SSI) are SSA data and not federal tax return information. Under 26 USC 6103, disclosure of federal tax return information from IEVS is restricted to officers and employees of the receiving agency. Outside (non-agency) personnel (including auditors) are not authorized to access this information either directly or by disclosure from receiving agency personnel.

The state is required to review and compare the information obtained from each data exchange against information contained in the case record to determine whether it affects the individual’s eligibility or level of assistance, benefits or services under the TANF program, with the following exceptions:

- a. The state is permitted to exclude categories of information items from follow-up if it has received approval from ACF after having demonstrated that follow-up is not cost effective.
- b. The state is permitted, with ACF approval, to exclude information items from certain data sources without written justification if it followed up previously through another source of information. However, information from these data sources that is not duplicative and provides new leads may not be excluded without written justification.

The state shall verify that the information is accurate and applicable to the case circumstances either through the applicant or recipient, or through a third party, if such determination is appropriate based on agency experience or is required before taking adverse action based on information from a federal computer matching program subject to the Computer Matching and Privacy Protection Act (45 CFR section 205.56).

For applicants, if the information is received during the application process, the state must use the information, to the extent possible, to determine eligibility. For recipients or individuals for whom a decision could not be made prior to authorization of benefits, the state must initiate a notice of case action or an entry in the case record that no case action is necessary within 45 days of its receipt of the information. Under certain circumstances, action may be delayed beyond 45 days for no more than 20 percent of the information items targeted for follow-up (45 CFR section 205.56).

HHS may penalize a state for up to 2 percent of the SFAG for failure to participate in IEVS (42 USC 609(a)(4) and 1320b-7; 45 CFR sections 264.10 and 264.11).

Audit Objectives Determine whether the state has established and implemented the required IEVS system for data matching, and verification and use of such data. (This audit objective does not include federal tax return information, as discussed in the compliance requirements.)

Suggested Audit Procedures

- a. Review state operating manuals and other instructions to gain an understanding of the state's implementation of the IEVS system.
- b. Test a sample of TANF cases subject to IEVS to ascertain if the state:
 - (1) Used the IEVS to determine eligibility in accordance with the state plan.
 - (2) Requested and obtained the data from the state wage information collection agency, the state unemployment agency, SSA (excluding federal tax return information, as discussed in the compliance requirements), the US Citizenship and Immigration Services, and other agencies, as appropriate, and performed the required data matching.
 - (3) Properly considered the information obtained from the data matching in determining eligibility and the amount of TANF benefits.

3. Penalty for Refusal to Work

Compliance Requirements State agency must reduce or terminate the assistance payable to the family if an individual in a family receiving assistance refuses to work, subject to any good cause or other exemptions established by the state. HHS may penalize the state by an amount not less than 1 percent and not more than 5 percent of the SFAG for violation of this provision (42 USC 609(a)(14); 45 CFR sections 261.14, 261.16, and 261.54).

Audit Objectives Determine whether the state agency is reducing or terminating the assistance grant of those individuals who refuse to engage in work and are not subject to good cause or other exceptions established by the state.

Suggested Audit Procedures

- a. Review the state's TANF policies and operating procedures concerning this requirement.
- b. Test a sample of TANF cases where the individual is not working and ascertain if benefits were reduced or denied to individuals who are not exempt under state rules or do not meet state good cause criteria.

4. Lack of Child Care for Single Custodial Parent of Child under Age Six

Compliance Requirements If an individual is a single custodial parent caring for a child under the age of 6, the state may not reduce or terminate assistance for the individual's refusal to engage in required work if the individual demonstrates to the state an inability to obtain needed child care for one or more of the following reasons: (a) unavailability of appropriate child care within a reasonable distance from the individual's home or work site; (b) unavailability or unsuitability of informal child care by a relative or under other arrangements; or (c) unavailability of appropriate and affordable formal child care arrangements. The determination of inability to find child care is made by the state. HHS may penalize a state for up to 5 percent of the SFAG for violation of this provision (42 USC 607(e)(2) and 609(a)(11); 45 CFR sections 261.15, 261.56, and 261.57).

Audit Objectives Determine whether the state has improperly reduced or terminated assistance to single custodial parents who refused to work because of inability to obtain child care for a child under the age of 6.

Suggested Audit Procedures

- a. Gain an understanding of the criteria established by the state to determine benefits for a single custodial parent who refused to work because of inability to obtain child care for a child who is under the age of 6.
- b. Select a sample of single custodial parents caring for a child who is under 6 years of age whose benefits have been reduced or terminated.
- c. Ascertain if the benefits were improperly reduced or terminated because of inability to obtain child care.

5. Penalty for Failure to Comply with Work Verification Plan

Compliance Requirements The state agency must maintain adequate documentation, verification, and internal control procedures to ensure the accuracy of the data used in calculating work participation rates. In so doing, it must have in place procedures to (a) determine whether its work activities may count for participation rate purposes; (b) determine how to count and verify reported hours of work; (c) identify who is a work-eligible individual; and (d) control internal data transmission and accuracy. Each state agency must comply with its HHS-approved Work Verification Plan in effect for the period that is audited. HHS may penalize the state by an amount not less than 1 percent and not more than 5 percent of the SFAG for violation of this provision (42 USC 601, 602, 607, and 609); 45 CFR sections 261.60, 261.61, 261.62, 261.63, 261.64, and 261.65).

Audit Objectives Determine whether the state agency is complying with its Work Verification Plan, including adequate documentation, verification, and internal control procedures.

Suggested Audit Procedures

- a. Review the state's Work Verification Plan and operating procedures concerning this requirement.
- b. Test a sample of TANF cases that have been reported to HHS under 45 CFR sections 265.3(b)(1) and 265.3(d)(1) and ascertain if the work participation rate data have been documented, verified, and reported in accordance with the state's Work Verification Plan.

IV. OTHER INFORMATION

1. *Transfers out of TANF*

As described in III.A.1.a (2), "Activities Allowed or Unallowed," states (not tribes) may transfer a limited amount of federal TANF funds into the Social Services Block Grant (Title XX) (Assistance Listing 93.667) and the Child Care and Development Block Grant (Assistance Listing 93.575). These transfers are reflected in lines 2 and 3 of both the quarterly *TANF Financial Report* ACF-196R, and the quarterly *Territorial Financial Report* ACF-196-TR. The amounts transferred out of TANF are subject to the requirements of the program into which they are transferred and should not be included in the audit universe and total expenditures of TANF when determining Type A programs. The amount transferred out should not be shown as TANF expenditures on the Schedule of Expenditures of Federal Awards but should be shown as expenditures for the program into which they are transferred.

2. *State MOE Expended by Tribes*

A state may provide a tribe state-donated MOE funds that are expended by the tribe. For the tribe, state-donated MOE funds are not federal awards expended, shall not be considered in determining Type A programs, and shall not be shown as expenditures on the Schedule of Expenditures of Federal Awards. However, state-donated MOE funds expended by a tribe shall be included by the auditor of the state when testing III.G.2.1, "Matching, Level of Effort, Earmarking – Level of Effort – *Maintenance of Effort.*"

Tribes may choose to commingle their state-donated MOE funds with federal grant funds. Because of the commingling, the audit of the tribe will include testing of the state-donated MOE and the auditor of the state should consider relying on this testing in accordance with auditing standards and 2 CFR Part 200, Subpart F. However, the state-donated MOE is not considered federal awards expended by the tribe.

3. *Tribal TANF Grantees under a Pub. L. No. 102-477 Demonstration Project (477)*

Audits of Indian tribal governments with tribal TANF in their approved 477 plan must follow the guidance in the 477 Cluster found in the Department of the Interior's section of Part IV of this Supplement.

4. *Spending Levels of the Territories*

A funding ceiling applies to Guam, the Virgin Islands, American Samoa and Puerto Rico. The programs subject to the funding ceiling are the Adult Assistance programs under Titles I, X,

XIV, and XVI of the Social Security Act; TANF; Foster Care (Assistance Listing 93.658); Adoption Assistance (Assistance Listing 93.659) and Independent Living (Assistance Listing 93.674) programs under Title IV-E of the Social Security Act; and the matching grant under section 1108(b). Total payments to each Territory may not exceed the following: Guam – \$4,686,000; Virgin Islands – \$3,554,000; Puerto Rico – \$107,255,000; and American Samoa – \$1,000,000. However, the TANF Family Assistance Grant cannot exceed the Territory’s fixed annual amount (42 USC 1308(a) and (c)).

5. *Prohibition on Use of Federal TANF and State MOE funds for Juvenile Justice Services*

ACF has identified juvenile justice services expenditures as an area of risk for non-compliance and issued a Program Instruction (TANF-ACF-PI-2015-02) (<http://www.acf.hhs.gov/ofa/resource/tanf-acf-pi-2015-02>) to remind TANF jurisdictions that federal TANF and state MOE funds must not be used to provide juvenile justice services, except where authorized under prior law, as explained in the program instruction.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.563 CHILD SUPPORT ENFORCEMENT

I. PROGRAM OBJECTIVES

The objectives of the Child Support Enforcement programs are to (1) locate absent parents, (2) establish paternity, (3) obtain child and spousal support, and (4) enforce support obligations owed by non-custodial parents.

II. PROGRAM PROCEDURES

The Child Support Enforcement programs are administered at the federal level by the Office of Child Support Enforcement (OCSE), Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS). Under the State Child Support Enforcement program (state program), funding is provided to the 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam, based on a state plan and amendments, as required by changes in statutes, rules, regulations, interpretations, and court decisions, submitted to and approved by OCSE. Under the Tribal Child Support Enforcement program (tribal program), funding is provided to federally recognized tribes and tribal organizations based on applications, plans, and amendments, as required by changes in statutes, rules, regulations, and interpretations, submitted to and approved by OCSE.

The state program is an open-ended entitlement program that allows the state to be funded at the federal financial participation (FFP) rate of 66 percent for eligible program costs. Under the tribal program, tribes receive funding for a specified percentage of program costs (during the first three-year period, federal grant funds equal to 90 percent, and for all periods following the initial three-year period 80 percent).

State child support agencies are required to conduct self-reviews of their programs (42 USC 654(15) and 45 CFR part 308).

Source of Governing Requirements

The Child Support Enforcement programs are authorized under Title IV-D of the Social Security Act, as amended. This includes amendments as the result of the Deficit Reduction Act of 2005 (DRA) (Pub. L. No. 109-171). The state program is codified at 42 USC 651 through 669. Implementing program regulations for the state program are published at 45 CFR parts 301 through 308. In addition, with regard to eligibility and other provisions, these programs are closely related to programs authorized under other titles of the Social Security Act, including the Temporary Assistance for Needy Families (TANF) program (Assistance Listing 93.558), the Medicaid program (Assistance Listing 93.778), and the Foster Care (Title IV-E) program (Assistance Listing 93.658).

The tribal program is authorized under Title IV-D of the Social Security Act, as amended, at 42 USC 655. Implementing program regulations are published at 45 CFR parts 309 and 310.

Both the state and tribal programs are subject to the administrative requirements of 45 CFR part 92 and 2 CFR part 200, as implemented by HHS at 45 CFR part 75, depending on when the award was made. Both state and tribal programs also are subject to the OMB cost principles under 2 CFR part 225 – Cost Principles for state, local, and Indian Tribal governments (OMB Circular A-87) or 45 CFR part 75, subpart E, depending on when the award was made. However, except for 45 CFR section 75.202, the guidance in subpart C of 45 CFR part 75 does not apply to federal awards to carry out Title IV-D of the Social Security Act (45 CFR section 75.101(e)). The state and tribal programs are also subject to 45 CFR part 95.

States and tribes are required to adopt and adhere to their own statutes and regulations for program implementation, consistent with the requirements of Title IV-D and the approved state plan/tribal plan and application.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment/Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement Suspension & Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	N	N	N	Y	N

A. Activities Allowed or Unallowed1. *Activities Allowed*

Consistent with the approved Title IV-D plan, allowable activities include the following. A more complete listing of allowable types of activities with examples, as appropriate, is included at 45 CFR sections 304.20 through 304.22 for the state program and 45 CFR sections 309.145(a) through (o) for the tribal program.

a. State and tribal programs

- (1) Parent locator services for eligible individuals (45 CFR sections 304.20(a)(2), 304.20(b), and 302.35(c); 45 CFR section 309.145).
- (2) Paternity and support services for eligible individuals (45 CFR section 304.20(a)(3); 45 CFR sections 309.145(b) and (c)).
- (3) Program administration, including establishment and administration of the state plan/tribal plan, purchase of equipment, and development of a cost allocation system and other systems necessary for fiscal and program accountability (45 CFR sections 304.20(b)(1) and 304.24; 45 CFR sections 309.145(a)(1) and (a)(2), 309.145(h), 309.145(i), and 309.145(o)).
- (4) Establishment of agreements with other state, tribal, and local agencies and private providers, including the costs of agreements with appropriate courts and law enforcement officials in accordance with the requirements of 45 CFR section 302.34, and associated administration and short-term training of staff (see paragraph A.2.b, below, for costs of agreements that are unallowable under state programs) (45 CFR section 304.21(a)(state programs); 45 CFR sections 309.145(a)(3)(iii) and 309.145(m) (tribal programs)).

b. State programs

- (1) Necessary expenditures for support enforcement services and activities provided to individuals from whom an assignment of support rights (as defined in 45 CFR section 301.1) is obtained (45 CFR sections 304.20, 304.21, and 304.22).
- (2) Federal financial participation (FFP) is available for services and activities that are necessary and reasonable to carry out the Title IV-D state plan. This change reflects 45 CFR Part 75, Subpart E Cost Principles which all state child support agencies must use in

determining allowable costs for work performed under federal grants (45 CFR section 304.20(a)(1)).

- (3) FFP is available for bus fare and other minor transportation expenses to allow participation of parents in child support proceedings and related activities such as genetic testing appointments (45 CFR section 304.20(b)(3)(v)).
- (4) FFP is available to increase pro se access to adjudicative and alternative dispute resolution processes in IV-D cases related to the provision of child support services (45 CFR section 304.20(b)(3)(vi)).
- (5) FFP for educational and outreach activities intended to inform the public, parent and family members, and young people who are not yet parents about the Child Support Enforcement program, responsible parenting and co-parenting, family budgeting, and other financial consequences of raising children when the parents are not married to each other (45 CFR section 304.20(b)(12)).

c. Tribal programs

- (1) The portion of salaries and expenses of a tribe's chief executive and staff that is directly attributable to managing and operating a Tribal Title IV-D program (45 CFR section 309.145(j)).
- (2) The portion of salaries and expenses of tribunals and staff that is directly related to required tribal Title IV-D program activities (45 CFR section 309.145(k)).
- (3) Service of process (45 CFR section 309.145(l)).
- (4) Costs associated with obtaining technical assistance from non-federal third-party sources, including other tribes, tribal organizations, state agencies, and private organizations, that are directly related to operating a Title IV-D program, and costs associated with providing such technical assistance to public entities (45 CFR section 309.145(n)).

2. *Activities Unallowed*

a. State and tribal programs

The following costs and activities are unallowable pursuant to 45 CFR sections 304.23 and 309.155:

- (1) Activities related to administering other titles of the Social Security Act.

- (2) Construction and major renovations.
- (3) Any expenditures that have been reimbursed by fees or costs collected.
- (4) Any expenditures for jailing of parents in child support enforcement cases.
- (5) Costs of counsel for indigent defendants in Title IV-D actions.
- (6) Costs of guardians *ad litem* in Title IV-D actions.

b. State programs

The following costs and activities are unallowable pursuant to 45 CFR section 304.23:

- (1) Education and training programs other than those for Title IV-D agency staff or as described in 45 CFR section 304.20(b)(2)(viii).
- (2) Any expenditures related to carrying out an agreement under 45 CFR section 303.15.
- (3) Any costs of caseworkers (45 CFR section 303.20(e)).
- (4) Medical support enforcement activities performed under cooperative arrangements in accordance with Section 1912(a)(2) of the Act (42 USC 1396k).
- (5) The following costs associated with agreements with courts and law enforcement officials are unallowable: service of process and court filing fees unless the court or law enforcement agency would normally be required to pay the costs of such fees; costs of compensation (salary and fringe benefits) of judges; costs of training and travel related to the judicial determination process incurred by judges; office-related costs, such as space, equipment, furnishings and supplies incurred by judges; compensation (salary and fringe benefits), travel and training, and office-related costs incurred by administrative and support staffs of judges; and costs of agreements that do not meet the requirements of 45 CFR section 303.107 (45 CFR section 304.21(b)).
- (6) FFP is not available for purchased support enforcement services which are not secured in accordance with 304.22 (45 CFR section 304.23(b)).

G. Matching, Level of Effort, Earmarking**1. Matching***State programs*

The federal share of program costs related to determining paternity, including those related to the planning, design, development, installation, and enhancement of the statewide computerized support enforcement system is 66 percent.

Tribal programs

The federal share of program costs is 90 percent for the first three years and 80 percent thereafter. Unless waived by the Secretary, the tribe or tribal organization must provide the 10 percent and 20 percent share, respectively (45 CFR sections 309.130(c), (d), and (e)).

2. Level of Effort

Not Applicable

3. Earmarking

Not Applicable

H. Period of Performance

1. *State programs* – This program operates on a cash accounting basis and each year’s funding and accounting is discrete; i.e., there is no carry-forward of unobligated funds. To be eligible for federal funding, claims must be submitted to ACF within two years after the calendar quarter in which the state made the expenditure. This limitation does not apply to any claim for an adjustment to prior year costs or resulting from a court-ordered retroactive adjustment (45 CFR sections 95.7, 95.13, and 95.19).
2. *Tribal programs* – A tribe or tribal organization must obligate its Federal Title IV-D grant funds no later than the last day of the funding period (equivalent to the federal fiscal year) for which they were awarded (“obligation period”) or the funds must be returned to ACF. Unless an extension is granted by ACF, valid obligations must be liquidated no later than the last day of the 12-month period immediately following the obligation period or the funds must be returned to ACF (45 CFR sections 309.135(b), (c), and (e)).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.566 REFUGEE AND ENTRANT ASSISTANCE—STATE-ADMINISTERED PROGRAMS

I. PROGRAM OBJECTIVES

The objective of the Refugee and Entrant Assistance program is to provide states and replacement designees (referred to as states throughout the remainder of this document, unless specifically discussed as replacement designees) with funds to assist refugees in attaining economic self-sufficiency as soon as possible after their initial placement in United States communities. (The term “refugee” is used to mean an individual who meets the immigration status or category requirements under 45 CFR 400.43 or the additional authorities listed in section II. A., items 3-6, of this document.)

II. PROGRAM PROCEDURES

The Department of Health and Human Services (HHS), Administration for Children and Families (ACF), Office of Refugee Resettlement (ORR), administers the Refugee and Entrant Assistance program on behalf of the federal government. ORR provides funds to states through two grant programs: (1) Cash and Medical Assistance (CMA) and (2) Refugee Support Services (RSS).

Source of Governing Requirements

The Refugee and Entrant Assistance program is governed under the following authorities:

1. The Refugee Act of 1980 (Pub. L. No. 96-212) (8 USC 1522), as amended by the Refugee Education Assistance Act of 1980 (Pub. L. No. 96-422), Refugee Assistance Amendments of 1982 (Pub. L. No. 97-363), and Refugee Assistance Extension Act of 1986 (Pub. L. No. 99-605).
2. Section 584(c) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act (as included in the fiscal year (FY) 1988 Continuing Resolution (Pub. L. No. 100-202)), insofar as it incorporates by reference with respect to certain Amerasians from Vietnam the authorities pertaining to assistance for refugees established by Section 412(c)(2) of the Immigration and Nationality Act, as amended, including certain Amerasians from Vietnam who are United States citizens; and, as provided under Title II of the Foreign Operations, Export Financing, and Related Programs Appropriations Acts, 1989 (Pub. L. No. 100-461), 1990 (Pub. L. No. 101-167), and 1991 (Pub. L. No. 101-513).
3. Section 107(b)(1)(A) of the Trafficking Victims Protection Act of 2000 (Pub. L. No. 106-386) (22 USC 7101), as amended by the Trafficking Victims Protection Reauthorization Act of 2003 (Pub. L. No. 108-193) and 2005 (Pub. L. No. 109-164), and Section 107(b)(1)(F) of the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (Pub. L. No. 110-457), insofar as they

state that a victim of a severe form of trafficking in persons, potential child victims, and certain other specified family members shall be eligible for federally funded or administered benefits and services to the same extent as a refugee.

4. Section 525, Title V, Division G, Pub. L. No. 110-161 in relation to Iraqi and Afghan aliens granted special immigrant status under Section 101(a)(27) of the Immigration and Nationality Act and their eligibility for resettlement assistance and other benefits available to refugees admitted under Section 207 of the Immigration and Nationality Act; and Sections 1244, Pub. L. No. 110-181 Section 602(b), Title VI, Division F, Pub. L. No. 111-8, regarding the special immigrant status of certain Iraqis and certain Afghans, respectively, as amended by Section 8120, Title VIII, Pub. L. No. 111-118.
5. Division C, Title III, Pub. L. No. 117-43, and Division B, Title III, Pub. L. No. 117-70 in relation to Afghan SQ/SI parolees, Afghan Special Immigrant Conditional Permanent Residents, and Afghan Humanitarian Parolees.

Title IV, Pub. L. 117-128, and Section 147, Division A, Pub. L. 117-180 in relation to Ukrainian Humanitarian Parolees.

Program regulations are at 45 CFR Part 400.

In addition to the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards at 45 CFR Part 75, this program also is subject to 45 CFR Part 95, subparts E (Cost Allocation Plans) and F (Automatic Data Processing Equipment and Services Conditions for Federal Financial Participation (FFP)).

Availability of Other Program Information

Additional information is available on the ORR website at <https://www.acf.hhs.gov/orr>.

Subprograms/Program Elements

1. *Cash and Medical Assistance Grants*

CMA grants are made to states following submission of annual program estimates. CMA grants have four major cost components:

- Refugee Cash Assistance (RCA)
- Refugee Medical Assistance (RMA), including Medical Screening
- Unaccompanied Refugee Minor (URM) programming
- Program Administration (overall state Planning and Coordination)

A state may administer the RCA program as a publicly administered program or may form a public/private partnership (PPP) by engaging nonprofit organizations to deliver assistance. A publicly administered RCA program must follow the TANF rules on financial eligibility and payment levels unless the state receives an approved waiver under 45 CFR 400.300 to continue administering RCA according to the rules of the former Aid to Families with Dependent Children (AFDC) program. A public/private program (PPP) may operate according to the content of an ORR-approved PPP plan in alignment with regulation and ORR policy. A replacement designee may base its RCA administration on a state's TANF program or administer a PPP plan, subject to ORR's approval..

a. *Refugee Cash Assistance Eligibility*

(1) *Eligibility Criteria*

Eligibility for RCA is limited to refugees who meet all of the following criteria:

- (a) They have resided in the United States less than the RCA eligibility period ([currently twelve months](#)) determined by the ORR director in accordance with 45 CFR 400.211 (45 CFR 400.53).
- (b) They have been determined ineligible for other federally funded cash assistance programs, such as the following programs authorized by the Social Security Act: TANF, SSI, Old Age Assistance (OAA)(Title I), Aid to the Blind (AB)(Title X), Aid to the Permanently and Totally Disabled (APTD)(Title XIV), and Aid to the Aged, Blind, and Disabled (AABD)(Title XVI)(45 CFR 400.51 and 400.53).
- (c) They meet the financial eligibility requirements of the applicable type of RCA program: AFDC-type (45 CFR 400.45), public/private (45 CFR 400.59), or publicly administered (45 CFR 400.66). In all three types, the administering agency may not treat the following as income or resources available to the applicant: resources remaining in the applicant's country of origin, income earned by the applicant's sponsor, or cash assistance the applicant may have received under reception and placement programs administered by the departments of State or Justice (45 CFR 400.45(f)(2), 400.59(b) through (d), and 400.66(b) through (d)).
- (d) They are not full-time students in institutions of higher education, as defined by the director (45 CFR 400.53).

- (e) If they are mandatory work registrants, they have not, without good cause, failed or refused to meet the work requirements of 45 CFR 400.75(a), or voluntarily quit a job or refused an offer of appropriate employment within 30 consecutive calendar days immediately prior to the application for assistance. The payment of RCA assistance to an otherwise eligible client must be terminated if the client fails to meet this requirement (45 CFR 400.77 and 400.82(a)).
- (2) Benefit payments in a state-administered AFDC-type RCA program must be based on the AFDC rate (45 CFR 400.45(f)(2)). Benefit payments in a state-administered TANF-type RCA program must be based on the TANF rate (45 CFR 400.66(a)). Benefit payments in a public/private RCA program may neither exceed the rate described in [ORR PL 22-01](#) (increased from the rate specified in 45 CFR 400.60(a) as authorized by 45 CFR 400.60(d)), nor be less than the state's TANF payment rate (45 CFR 400.60(b)).

b. *Refugee Medical Assistance Eligibility*

(1) *Eligibility Criteria*

Eligibility for RMA is limited to refugees who meet one of the following sets of conditions:

- (a) They are not eligible for Medicaid or Children's Health Insurance Program (CHIP) but currently receive RCA (45 CFR 400.100(d)); or
- (b) They meet all of the following criteria:
 - (i) They have met the same time eligibility requirement as for RCA (see paragraph E.1.b.(1)(a), above).
 - (ii) They are determined ineligible for Medicaid or CHIP (45 CFR 400.100(a)(1)).

- (iii) They meet one of the following financial eligibility requirements:
 - (A) In a state with a Medicaid medically needy program, they meet the state's Medicaid medically needy financial eligibility standards or a financial eligibility standard established at 200 percent of the national poverty level (45 CFR 400.101(a)).
 - (B) In a state without a Medicaid medically needy program, they meet the state's AFDC payment standards and methodologies in effect as of July 16, 1996, or a financial eligibility standard established at 200 percent of the national poverty level (45 CFR 400.101(b)).
 - (C) They did not meet either of these standards but spent their resources down to the applicable standard using an appropriate method for deducting incurred medical expenses. States must allow applicants for RMA to do this (45 CFR 400.103).
- (iv) They are not full-time students in institutions of higher education unless the state has approved their enrollment as part of the refugee's employability plan under 45 CFR 400.79 or a plan for an unaccompanied minor in accordance with 45 CFR 400.112.
- (2) Earnings from employment do not affect refugees' eligibility for RMA. They remain eligible for RMA through the remainder of the time eligibility period after receiving earnings from employment. Refugees who become ineligible for Medicaid due to employment earnings and have resided in the United States less than the time eligibility period will become eligible for RMA for the remainder of the time eligibility period (45 CFR 400.104) without an additional eligibility determination.

States may not require that a refugee actually receive or apply for RCA as a condition of eligibility for RMA (45 CFR 400.100(c)).

- (3) In providing medical assistance services to eligible refugees, a state must provide at least the same services in the same manner and to the same extent as under the state's Medicaid program (45 CFR 400.105). A state may provide additional services beyond the scope of the state's Medicaid program to eligible refugees if the state provides these services through public facilities to its indigent residents (45 CFR 400.106). A state may provide medical screening to a refugee provided the screening is in accordance with requirements prescribed by ORR and with written approval from ORR (45 CFR 400.107).

c. *Unaccompanied Refugee Minor Assistance Eligibility*

- (1) A person must meet the definition of an unaccompanied minor (45 CFR 400.111).
- (2) A URM remains eligible for assistance until he/she (a) is reunited with a parent; (b) is united with a nonparental adult to whom legal custody or guardianship has been granted; or (c) has reached the age of 18, or older if the state's Title IV-B plan so prescribes (45 CFR 400.113).

2. *Refugee Support Services Grants*

Beginning in FY 2018, Refugee Social Services funding was renamed to Refugee Support Services (RSS). RSS grants are made to states following submission of an Annual Service Plan. RSS grants are allocated to states by formula according to each state's percentage of the national refugee and entrant population for up to the most recent three years. States are required to use these funds to help refugees become economically self-sufficient as quickly as possible, primarily through the provision of employment services. Under RSS, four set-aside grants are issued, Refugee School Impact (RSI), Services to Older Refugees (SOR), Youth Mentoring (YM), and Refugee Health Promotion (RHP) to provide services to specific refugee populations. RSI targeted population is refugee children from birth until 18 years of age. SOR targeted population is 60 and older. YM targeted population is individuals between the ages of 15–24. RHP targeted population is refugees in need of health and well-being support.

a. *Refugee Support Services Eligibility*

- (1) In providing support services, the state must serve refugees in the following order of priority listed under 45 CFR 400.147:
 - (a) All refugees who have resided in the United States less than a year and who apply for services;
 - (b) Refugees receiving cash assistance;

- (c) Unemployed refugees who are not receiving cash assistance; and
 - (d) Employed refugees in need of services to retain employment.
- (2) A state may limit eligibility for services to refugees who are 16 or older who are not full-time students in secondary school, except that such a student may be provided services in order to obtain part-time or temporary (summer) employment while a student or permanent, full-time employment upon completion of schooling (45 CFR 400.152 (a)).
 - (3) Except for citizenship and naturalization services and referral and interpreter services, a state may not provide refugee social services to refugees who have been in the United States for more than 60 months (45 CFR 400.152(b)).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A. Activities Allowed or Unallowed

CMA program funds are to be used to pay for:

1. *Refugee Cash Assistance (RCA)* – monthly cash benefits for refugees who do not meet the eligibility requirements of the TANF (Assistance Listing 93.558) or Supplemental Security Income (SSI) (Assistance Listing 96.006) programs (45 CFR 400.53) (see III.E.1, “Eligibility – Eligibility for Individuals”).
2. *Refugee Medical Assistance (RMA)* – medical assistance to refugees who do not meet all eligibility requirements for Medicaid (Assistance Listing 93.778) and CHIP (Assistance Listing 93.767) and medical screening to RMA-eligible refugees (45 CFR 400.100) (see III.E.1, “Eligibility – Eligibility for Individuals”).
3. *Medical Screening* – A state may charge refugee medical screening costs to RMA if part of the state plan approved by the ORR director (45 CFR 400.107). If such screening is done during the first 90 days after a refugee’s initial date of ORR eligibility, it may be provided without prior determination of the refugee’s eligibility under 45 CFR 400.94 or 400.100 and may be charged to RMA. States may charge to RMA the cost of medical screenings done later than 90 days after the refugees’ eligibility date only if the refugees had been determined ineligible for Medicaid or CHIP under 45 CFR 400.94 and 400.100 (45 CFR 400.107).
4. *Unaccompanied Refugee Minor (URM) Assistance* – child welfare services and foster care to unaccompanied refugee minors (until age 18 or higher age as the state’s Title IV-B plan prescribes) (45 CFR 400.113) (see III.E.1, “Eligibility – Eligibility for Individuals”).
5. *Program Administration* – A state may claim against its CMA grant the reasonable, necessary, and allocable administrative costs:
 - a. Associated with providing RCA, RMA, including medical screening, and assistance and services to unaccompanied refugee minors (45 CFR 400.207).
 - b. Incurred by the local resettlement agencies for providing cash assistance under the public/private RCA program (45 CFR 400.13(e)).
 - c. Incurred for the overall management of the state’s refugee program. Such costs may include development of the state plan, overall program coordination, and salary and the travel costs of the state Refugee Coordinator (45 CFR 400.13(c)).

RSS program funds are to be used to pay for:

- Employability Services
- Other Services

- Refugee School Impact (RSI) Set-aside Services
 - Services to Older Refugees (SOR) Set-aside Services
 - Youth Mentoring (YM) Set-aside Services
 - Refugee Health Promotion (RHP) Set-aside Services
1. *Employability Services* – A state may provide the following employability services through the RSS grant:
 - a. Employment services, including development of a family self-sufficiency plan and individual employment plan, job development, job search, and job placement (45 CFR 400.154(a));
 - b. Aptitude and skills testing, employability assessment (45 CFR 400.154(b));
 - c. On-the-job training at the employment site (45 CFR 400.154(c));
 - d. English language training with emphasis on job-related language skills (45 CFR 400.154(d));
 - e. Vocational training when part of an employability plan (45 CFR 400.154(e));
 - f. Skills recertification (45 CFR 400.154(f));
 - g. Child care when necessary for job retention/acceptance or participation in an employability service (45 CFR 400.154(g));
 - h. Transportation when necessary for job retention/acceptance or participation in an employability service (45 CFR 400.154(h));
 - i. Translation and interpreter services when necessary for job retention/acceptance or participation in an employability service (45 CFR 400.154(i));
 - j. Case management services directed toward a refugee’s attainment of employment as soon as possible after arrival in the United States (45 CFR 400.154(j)), and
 - k. Assistance in obtaining employment authorization documents (45 CFR 400.154(k)).
 2. *Other Services* – A state may other support services, which may include:

- a. Information and referral services (45 CFR 400.155(a));
 - b. Outreach services designed to familiarize refugees with available services and facilitate access to them (45 CFR 400.155(b));
 - c. Social adjustment services including emergency services, health-related services, and home management services (45 CFR 400.155(c));
 - d. Child care, transportation, translation and interpreter services, and case management services which are not directly related to employment or an employability service, when necessary for purposes other than employment or participation in employability services (45 CFR 400.155(d) through 155(g));
 - e. Any other service approved by the ORR director that is aimed at helping the refugee attain economic self-sufficiency, family stability, or community integration (45 CFR 400.155(h)); and
 - f. Citizenship and naturalization preparation services (45 CFR 400.155(i)).
3. *Refugee School Impact Services* – A state may provide [Refugee School Impact Services](#), which may include, but are not limited to:
- a. Specialized services and support for eligible youth, which may include English as a Second Language classes, tutoring, newcomer, or transitional programs, after school and summer programs, mentoring, behavioral health supports, programming that supports integration, and services that support the cognitive, social, and emotional growth of preschool-aged children.
 - b. Support for families learning to navigate the US education system, which may include school-specific orientation for both families and students, navigators or cultural brokers, and language access.
 - c. Capacity development for school systems, including education and training for staff around the unique and varied needs of refugees and access to necessary resources. Examples of this allowance may include specialized trainings for school staff, ensuring language access by offering translated documentation, interpretation, and specialized staff dedicated to working with the population.
 - d. Capacity development to remove barriers to culturally responsive child care access.
 - e. Holistic sessions with parents and children to support English language literacy, school preparedness, and community orientation through the promotion of parent-child interactions.

4. *Services to Older Refugees* – A state may provide Services to Older Refugees, which may include, but are not limited to :
 - a. Helping older ORR-eligible populations access mainstream aging services in the community such as information about supportive services, nutrition services, meal delivery, elder abuse, senior community centers, and intergenerational activities.
 - b. Providing older ORR-eligible populations with appropriate services that are not available in the communities, such as interpretation and translation services.
 - c. Creating opportunities for older ORR-eligible populations to live independently as long as possible, including transportation, home care, adult day care, and respite care.
 - d. Developing opportunities for older ORR-eligible populations to connect with their communities to avoid isolation, such as mental health support, community navigators, and opportunities for engagement in social and cultural activities.
 - e. Assisting older ORR-eligible populations on the path to citizenship, especially those at risk of losing Supplemental Security Income or other federal benefits, to naturalize. Services may include civics instruction, counseling, and application assistance.

5. *Youth Mentoring* – A state may provide Youth Mentoring activities, which may include:
 - a. Development of social and life skills.
 - b. Helping youth to learn American culture while maintaining and celebrating the youth’s cultural heritage.
 - c. Providing opportunities for social engagement with peers.
 - d. Providing information about opportunities to participate in civic and community services activities.
 - e. Supporting youth in learning English, math, and other skills.
 - f. Providing academic support, such as helping with homework, and assisting with transitions in school such as the transition between middle school and high school or high school to post-secondary education.

trafficking victims, must have received a certification or eligibility letter from ACF's Office on Trafficking in Persons (OTIP). Those meeting this status will be collectively referred to as "refugees."

- b. A client's eligibility period generally begins on the date he/she arrived in the United States (45 CFR 400.203(a) and 400.204(a)). The eligibility period for asylees begins from the date the person receives a final grant of asylum. The eligibility for a Cuban or Haitian entrant begins from the date the individual was paroled as an entrant or the first time they entered the community, whichever is later. The eligibility period for victims of trafficking begins from the date the person received a certification or eligibility letter from ACF/OTIP. The eligibility date for Afghan humanitarian parolees is October 1, 2021 or the date they entered the community, whichever is later. The eligibility date for humanitarian parolees from Ukraine is May 21, 2022 or the date they received humanitarian parole, whichever is later.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

H. Period of Performance

1. *CMA*

A state must obligate its CMA funds awarded for costs attributable to RCA, RMA, and administration during the federal fiscal year (FFY) in which the grant was awarded. Funds awarded for URM assistance remain available for obligation in the FFY following the FFY in which the grant was awarded. However, all CMA funds, including funds awarded for URM services, must be expended by the end of the FFY following the FFY in which the grant was awarded (45 CFR 400.210(a)).

2. *Refugee Support Services*

A state must obligate its Refugee Support Services funds within one year after the end of the FFY in which the grant was awarded and must expend these funds within two years after the end of the FFY in which the grant was awarded (45 CFR 400.210(b)).

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271 – Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable (RSS)
- d. *ORR-2, CMA Quarterly Report on Expenditures and Obligations* – Applicable (CMA)

2. Performance Reporting

ORR-6, *Performance Report (OMB No. 0970-0036)* – A state is required to submit the ORR-6, Performance Report, on a semi-annual and annual reporting basis. The report contains a narrative and statistical information on program performance for cash assistance, medical assistance, medical screening, the provision of services to unaccompanied minors, and support services. The current ORR-6 was approved by OMB and all descriptions, schedules, and reporting timelines described here are according to the approved ORR-6. Auditors should check if reports are submitted timely. The ORR-6 is available on this page:

<https://www.acf.hhs.gov/orr/form/report-forms>

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

Note: In instances where a state has elected to withdraw from the program, ORR has the authority to select a nonprofit agency to administer the program as a replacement designee (RD) 45 CFR 400.301(c). The term “state” is used throughout this document to refer to both state governments and replacement designees.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.568 LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM

I. PROGRAM OBJECTIVES

The Low-Income Home Energy Assistance Program (LIHEAP) is a block grant program in which states (including Territories and Native American tribes) design their own programs, within very broad federal guidelines. There are four components of LIHEAP: (1) block grants, (2) energy emergency contingency funds, (3) leveraging incentive awards, and (4) the Residential Energy Assistance Challenge Program (REACH). The latter three components are only administered when funding for those programs is available and allocated to them.

The objectives of LIHEAP are to help low-income households meet the costs of home energy (defined as heating and cooling of residences), increase their energy self-sufficiency, and reduce their vulnerability resulting from energy needs. A primary purpose is meeting immediate home energy needs. The target population is low-income households, especially those with the lowest incomes and the highest home energy costs or needs in relation to income, taking into account family size. Additional targets are low-income households with members who are especially vulnerable, including the older individuals, persons with disabilities, and young children.

II. PROGRAM PROCEDURES

A. LIHEAP Block Grants

The U.S. Department of Health and Human Services (HHS), Administration for Children and Families (ACF), Office of Community Services, administers LIHEAP at the federal level. LIHEAP block grant funds are distributed by formula to the states, the District of Columbia, and the territories. In addition, federally or state-recognized Native American tribes (including tribal consortia) have the option of requesting direct funding from ACF, rather than being served by the state in which they are located. Tribes that are directly funded by HHS statutorily receive a share of the funds that would otherwise be allotted to the states in which they are located, based on the number of income-eligible households in the tribal service area as a percentage of the income-eligible households in the state, or a larger amount agreed upon in a state/tribe agreement. Over half the states agree to give the tribes located within their state a larger amount than required by the statute.

Under the block grant principle, each grant recipient is responsible for designing and implementing its own LIHEAP program, within very broad federal guidelines. Grant recipients must administer their LIHEAP programs according to their HHS accepted LIHEAP Model Plan and any amendments and in conformance with their own implementing rules and policies. Grant recipients must establish appropriate systems and procedures to prevent, detect and correct waste, fraud, and abuse, by clients, vendors, and administering agencies.

To receive funding, each grant recipient is required to submit annually a LIHEAP Model Plan which is an application that describes how the grant recipient's LIHEAP will be

administered. The LIHEAP Model Plan includes a set of program integrity questions in which the grant recipient must describe the systems in place among others to detect and deter fraud, waste, and abuse in its LIHEAP program.

State grant recipients are required to hold a public hearing each year on the proposed Plan for the upcoming federal fiscal year. All grant recipients must allow for public participation in the development of these Plans. If HHS issues a Notice of Funding Opportunity, a separate application is required for those LIHEAP grant recipients that wish to apply for a leveraging incentive award or a REACH grant.

B. Energy Emergency Contingency Funds

In addition to appropriations for the LIHEAP block grant program, Congress may appropriate contingency funds that may be awarded to meet the additional home energy assistance needs of LIHEAP grant recipients for a natural disaster or other emergency. Contingency funds that are awarded generally must be used under the normal statutory and regulatory requirements that apply to the LIHEAP block grants, unless special conditions are placed upon their use at the time of the award.

C. Leveraging Incentive Awards

Of the funds appropriated for LIHEAP each year, HHS is allowed to earmark a portion to reward those LIHEAP grant recipients that have acquired non-federal resources to help low-income persons meet their home heating and cooling needs, as an incentive to augment the federal dollars. This could involve the grant recipient or private organizations allocating some of their own funds into LIHEAP or similar state or private programs, buying fuel at reduced or discount prices through bulk purchases or negotiated agreements, obtaining donations of weatherization materials or fuels, waiving utility fees, or any number of other activities with nonfederal resources. Grant awards in the current federal fiscal year are based on leveraging activities carried out during the previous federal fiscal year. Leveraging grants are subject to special terms and conditions, which are specified in the grant awards. To receive the leveraging grant, current LIHEAP grant recipients must submit a Leveraging Report detailing leveraged resources, when ACF solicits such Leveraging Report. Grant recipients must keep sufficient documentation, or have access to it, to support the calculations in the report.

D. Residential Energy Assistance Challenge Program

Of the funds appropriated for leveraging incentive awards, HHS may set aside a portion for the REACH program. The REACH program makes competitive grants to LIHEAP grant recipients to help LIHEAP-eligible households reduce their energy vulnerability. The purposes of REACH are to (1) minimize health and safety risks that result from high energy burdens on low-income households, (2) prevent homelessness as a result of inability to pay energy bills, (3) increase efficiency of energy usage by low-income families, and (4) target energy assistance to individuals who are most in need. REACH grants are optional to current LIHEAP grant recipients that submit a separate REACH Plan (when solicited by ACF). State and territory grant recipients that are awarded

REACH grants must administer their REACH grants through community-based organizations. REACH grants are subject to special terms and conditions, which are specified in the grant awards ([42 USC section 8626 b](#)).

Source of Governing Requirements

LIHEAP is authorized under Title XXVI of the Omnibus Budget Reconciliation Act of 1981, as amended (Pub. L. No. 97-35, as amended, also known as OBRA 1981), which is codified at 42 USC 8621-8629. Implementing regulations for this and other HHS block grant programs authorized by OBRA 1981 are published at 45 CFR Part 96. Those regulations include general administrative requirements for the covered block grant programs. Requirements specific to LIHEAP are in 45 CFR sections 96.80 through 96.89. LIHEAP is also subject to 45 CFR Part 75, which is the HHS implementation of 2 CFR Part 200, commonly known as the Office of Management and Budget's Uniform Administrative Guidance. According to 45 CFR section 75.101(d), the requirements in Subpart C, Subpart D, and Subpart E do not apply to LIHEAP except for section 75.202 of Subpart C and sections 75.351 through 75.353 of Subpart D. In addition, grant recipients are to administer their LIHEAP according to the statutorily required Plans that they submitted to HHS. Grant recipients are permitted to submit revised LIHEAP Plans within a reasonable amount of time after making substantive changes to their policies and/or procedures referenced in their Plans.

As discussed in Appendix I to the Supplement, "Federal Programs Excluded from the A-102 Common Rule and Portions of 2 CFR Part 200," grant recipients are to use the fiscal policies (including obligation and expenditure of funds) that apply to their own funds in administering LIHEAP. Procedures must be adequate to ensure the proper disbursement of and accounting for federal funds paid to the grant recipient, including procedures for monitoring the assistance provided (42 USC 8624(b)(10); 45 CFR section 96.30).

Availability of Other Program Information

The ACF LIHEAP web page (<https://www.acf.hhs.gov/ocs/low-income-home-energy-assistance-program-liheap>) provides general information about this program.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"). Next the auditor will determine which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below). Finally, the auditor will determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not

expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
N	N	Y	Y	N	Y	Y	N	N	Y	Y	N

C. Cash Management

Recipients are limited to draw down only a reasonable amount of federal LIHEAP funding on an incremental basis throughout the year to meet immediate needs. The proportion of funds that are drawn should be directly related to the expenditure of program funds incurred. An excess draw of funds should not occur where interest can be accrued if the funds drawn remain in an interest-bearing bank account for an extended period without being issued out.

E. Eligibility

1. Eligibility for Individuals

Grant recipients may provide assistance to (a) households in which one or more individuals are receiving Temporary Assistance for Needy Families (TANF), Supplemental Security Income (SSI), Supplemental Nutrition Assistance Program (SNAP) benefits, or certain needs-tested veterans’ benefits; or (b) households with incomes which do not exceed the greater of 150 percent of the state’s established poverty level, or 60 percent of the state median income. Grant recipients may establish lower income eligibility criteria, but no household may be excluded solely based on income if the household income is less than 110 percent of the state’s poverty level (42 USC 8624(b)(2)). Grant recipients must give priority to those households with the highest home energy costs or needs in relation to income and household size (42 USC 8624(b)(5)).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

To the extent it is necessary to designate local administrative agencies, the grant recipient is to give special consideration to local public or private nonprofit agencies (or their successor agencies) which were receiving energy assistance or weatherization funds under the Economic Opportunity Act of 1964 or other laws, provided that the grant recipient finds that they meet program and fiscal requirements set by the grant recipient (42 USC 8624(b)(6)).

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

Not Applicable

3. Earmarking

The following limitations apply to LIHEAP block grants and leveraging incentive award funds, as noted. Energy emergency contingency funds generally are subject to the requirements applicable to LIHEAP block grant funds, but the contingency grant award letter should be reviewed to see if different requirements were applied. REACH grants are subject to special terms and conditions described in the award.

a. *Planning and Administrative Costs*

- (1) No more than 10 percent of a state's LIHEAP funds for a federal fiscal year may be used for planning and administrative costs, including both direct and indirect costs. This limitation applies, in the aggregate, to planning and administrative costs at both the state and subrecipient levels. This cap may not be exceeded by supplementing with other federal funds (42 USC 8624(b)(9)(A); 45 CFR section 96.88(a)).
- (2) A tribal or territorial grant recipient may spend up to 20 percent of the first \$20,000 and 10 percent of the amount above \$20,000 for administration and planning (45 CFR section 96.88(b)).
- (3) Although as indicated in III.A.5, leveraging incentive award funds may not be used for planning and administrative costs, they may be added to the base on which the maximum amount allowed for planning and administration is calculated according to the federal fiscal year in which the leveraging funds are obligated (45 CFR section 96.87(j)).

b. *Weatherization*

- (1) No more than 15 percent of the greater of the funds allotted or the funds available to the grant recipient for a federal fiscal year may be used for low-cost residential weatherization or other energy-related home repairs. The secretary may grant a waiver beginning April 1st, and the grant recipient may then obligate and spend up to 25 percent for residential weatherization or energy-related home repairs (42 USC 8624(k)).
- (2) Leveraging incentive award funds may be used for weatherization without regard to the weatherization maximum in the statute. However, they cannot be added to the base on which the weatherization maximum is calculated (45 CFR section 96.87(j)).

c. *Energy Need Reduction Services* – No more than five percent of the LIHEAP funds may be used to provide services that encourage and enable households to reduce their home energy needs and, thereby, the need for energy assistance. Such services may include needs assessments, counseling, and assistance with energy vendors (42 USC 8624(b)(16)).

d. *Identifying and Developing Leveraging Programs*

- (1) The greater of 0.08 percent of a state's LIHEAP funds (other than leveraging incentive award funds) or \$35,000 may be spent to identify, develop, and demonstrate leveraging programs, without regard to the limit on planning and administering LIHEAP (42 USC 8626a(c)(2); 45 CFR section 96.87(c)(2)).
- (2) Native American tribes/tribal organizations and territories may spend up to the greater of 2 percent or \$100 on such activities (45 CFR section 96.87(c)(1)).

H. **Period of Performance**

1. At least 90 percent of the LIHEAP block grant funds payable to the grant recipient must be obligated in the first federal fiscal year in which they are awarded. Up to 10 percent of the funds payable may be held available (or "carried over") for obligation no later than the end of the following federal fiscal year. Funds not obligated by the end of the second fiscal year of the award must be returned to ACF. There are limits on the time period for expenditure of funds (42 USC 8626) which are communicated to all recipients of the award. Grant recipients must expend funds according to rules that govern their own public assistance funds.
2. Leveraging incentive award funds and REACH funds must be obligated in the federal fiscal year in which they are awarded or the following federal fiscal year, without regard to the carryover limit. However, they may not be added to the base

on which the carryover limit is calculated (45 CFR sections 96.87(j)(1) and (k)). Funds not obligated within these time periods must be returned to ACF (45 CFR section 96.87(k)).

3. LIHEAP emergency contingency funds are generally subject to the same obligation and expenditure requirements applicable to the LIHEAP block grant funds, but the contingency award letter should be reviewed to see if different requirements were imposed.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

LIHEAP Performance Data Form (OMB No 0970-0449) – State grant recipients must submit this report by January 31st regarding the prior federal fiscal year. The first section of the report is the Grant recipient Survey that collects and reports data on sources and uses of LIHEAP funds. The Grant recipient Survey includes Section III: Estimated Sources of Funds and Section IV: Estimated Use of LIHEAP Funds. Note: that these are referencing obligated not expended funding. The rest of the report is regarding performance metrics, mostly related to home energy burden targeting and reduction, as well as the continuity of home energy service. The Grantee Survey obligation amounts should be compared with the Carryover and Reallotment and FFR-425 reports. This reconciliation is needed to make sure the obligated balances for the program year being tested are accurate. See [LPMD Instructions](#) for more background.

Key Line Items ():

1. *“Uses of Funds” represent a state’s obligation of federal LIHEAP funds, not expenditure of federal LIHEAP funds. In some cases, obligated funds are not actually expended until after the end of the federal fiscal year.*
2. *The total “Uses of Funds” (shown in Item 45 of Section IV) should equal the total “Sources of Funds” (shown in Item 16 of Section III).*

3. *“Other LIHEAP assistance.” This would include federal LIHEAP funds used to provide “other crisis assistance,” such as furnace or air conditioner repairs or replacements.*

3. Special Reporting

- a. *LIHEAP Carryover and Reallotment Report (OMB No. 0970-0106) – <https://omb.report/icr/202204-0970-018/doc/120709300> Grant recipients must submit this report no later than August 1 indicating the amount expected to be carried forward for obligation in the following fiscal year and the planned use of those funds. Funds more than the maximum carryover limit are subject to reallotment to other LIHEAP grant recipients in the following fiscal year and must also be reported (42 USC 8626).*

Key Line Items:

1. *“Carryover amount”*
2. *“Reallotment amount”*

- b. *Annual Report on Households Assisted by LIHEAP (OMB No. 0970-0060) <https://omb.report/icr/202211-0970-005> – As part of the application for block grant funds each year, a report is required for the preceding fiscal year of (1) the number and income levels of the households assisted for each component and any type of LHEAP assistance (heating, cooling, crisis, and weatherization); and (2) the number of households served that contained young children, elderly, or persons with disabilities, or any vulnerable household for each component. Territories with annual allotments of less than \$200,000 and all Native American tribes are required to report only on the number of households served for each program component (42 USC 8629; 45 CFR section 96.82).*

Key Line Items – The following line items contain critical information:

1. *Section 1 – LIHEAP Assisted Households*
2. *Section 2 – LIHEAP Applicant Households*

- c. *Quarterly Performance and Management Report (OMB No. 0970-0589) <https://omb.report/icr/202205-0970-017/doc/121847100> – Grant recipients must submit data and information about LIHEAP during the current FY, including success, challenges, needs and innovations. The quarterly reports focus on assisted households, performance management, obligation of funding, changes made due to anticipated increase in energy bills, collaboration with other utility programs, and training and technical assistance needs.*

Key Line Items – The following line items contain critical information:

1. *Section 1* – Total Households Assisted
 2. *Section 2* – Performance Management
 3. *Section 3* – Estimated Use of Funds
 4. *Section 4* – LIHEAP Program Implementation and Support
- 4. Special Reporting for Federal Funding Accountability and Transparency Act**
- See Part 3.L for audit guidance.

M. Subrecipient Monitoring

Grant recipients must ensure that subrecipients are using LIHEAP grant funds from the grant recipient for their intended purposes. Up to 10% of a subrecipient's LIHEAP grant can be used for administrative transactions and any administrative expenditures that exceed 10% must be from non-federal sources. If a weatherization program is implemented, up to 15% of a subrecipient's LIHEAP grant can be used towards weatherization. A grant recipient may request that a special waiver be approved by the HHS to exceed this 15% threshold. If the special waiver is approved by the HHS, the maximum amount that the subrecipient can use towards weatherization cannot exceed 25% of the LIHEAP grant. Up to 5% of a subrecipient's LIHEAP grant can be used for Assurance 16 administration which is intended to develop information and energy education materials to LIHEAP clients over an extended period. Up to a 10% maximum of a subrecipient's LIHEAP grant can be carried over from the first year into the second year. In addition to ensuring that the previously described thresholds of a subrecipient's LIHEAP grant are properly met, a grant recipient's monitoring activity should ensure that subrecipient LIHEAP grant expenditures are energy related transactions, which are allowable, reasonable, and allocable. This will ensure that the proper financial and management of controls are in place for LIHEAP administration.

ASSISTANCE LISTING 93.569 COMMUNITY SERVICES BLOCK GRANT

I. PROGRAM OBJECTIVES

The objective of the Community Services Block Grant (CSBG) is to provide assistance to states and local communities, working through a network of community action agencies and other neighborhood-based organizations, for the reduction of poverty, the revitalization of low-income communities, and the empowerment of low-income families and individuals in rural and urban areas to become fully self-sufficient (particularly families who are attempting to transition off a state program carried out under part A of Title IV of the Social Security Act) and (1) to provide services and activities having a measurable and potential major impact on causes of poverty in the community or those areas of the community where poverty is a particularly acute problem; (2) to provide activities designed to assist low-income participants, including the elderly poor, to: (a) secure and retain meaningful employment; (b) attain an adequate education; (c) make better use of available income; (d) obtain and maintain adequate housing and a suitable living environment; (e) obtain emergency assistance through loans or grants to meet immediate and urgent individual and family needs, including health services, nutritious food, housing, and employment-related assistance; (f) remove obstacles and solve problems which block the achievement of self-sufficiency; (g) achieve greater participation in the affairs of the community; and (h) make more effective use of other related programs; (3) to provide on an emergency basis for the provision of such supplies and services, nutritious foodstuffs, and related services, as may be necessary to counteract conditions of starvation and malnutrition among the poor; and (4) to coordinate and establish linkages between governmental and other social services programs to assure the effective delivery of such services to low-income individuals.

In addition to the CSBG block grants to states, the Office of Community Services funds additional discretionary projects for technical assistance include the Center of Excellence (COE) for Human Capacity and Community Transformation (HCCT), eleven Regional Performance and Innovation Consortia (RPIC), a Learning Communities Resource Center, and a Legal Training and Technical Assistance Center.

II. PROGRAM PROCEDURES

CSBG is administered at the federal level by the Office of Community Services (OCS), Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS). CSBG funds are awarded to states, territories, and federally and state-recognized Indian tribes and tribal organizations. Funds are distributed in accordance with a pre-established formula after submission of an application to OCS and acceptance of that application as complete in accordance with statutory requirements. In turn, states subgrant the CSBG funds according to statewide formulae to designated community-based nonprofit organizations (and, in special circumstances, public organizations) that plan, develop, implement, and evaluate local programs. These instructions are provided for audits of states as defined by the CSBG Act at 42 USC 9902(5), for audits of eligible entities as defined by the CSBG Act at 42 USC 9902(1) and audits of other subrecipients expending CSBG funds. Eligible entities are those entities that were in place the day before October 27, 1998, or as designated by the process codified at 42 USC

9909. For all practical purposes, eligible entities are those entities identified in the state CSBG plan that are designated to receive a portion of at least 90 percent of the CSBG funds provided to a state. Auditors may obtain the state plan from the state or review the contract/grant provided by the state to the entity to determine if they are an eligible entity or other subrecipient. For tribes and tribal organizations that receive CSBG as part of the Pub. L. No. 102-477 demonstration projects, refer to the 477 cluster at 4-15.025 for testing guidance. For tribes and tribal organizations that receive CSBG funding directly from the federal government, the auditor should use the testing guidance for the states.

Source of Governing Requirements

CSBG was reauthorized under the Community Opportunities, Accountability, and Training and Education Act of 1998 (Pub. L. No. 105-285) and is codified at 42 USC 9901 et seq. The implementing regulations for this and other block grant programs are published at 45 CFR Part 96. Those regulations include both specific requirements and general administrative requirements for the covered block grant programs in lieu of 45 CFR Part 75 (the HHS implementation of 2 CFR Part 200). Requirements specific to CSBG are in 45 CFR sections 96.90 through 96.92. Separate regulations governing religious organizations as nongovernmental providers of service (Charitable Choice) are codified at 45 CFR Part 1050.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	N	Y	N	N	N	Y	Y

A. Activities Allowed or Unallowed1. *Activities Allowed*

- a. *States*: States are required to distribute at least 90 percent of CSBG funds to eligible entities, see Special Tests and Provisions for testing of the amounts distributed to these entities. States may use retained funds to achieve CSBG goals through activities, including, but not limited to:
- (1) Training and technical assistance;
 - (2) Statewide coordination and communication among eligible entities;
 - (3) Analysis to better target the distribution of funds to the areas of greatest need;
 - (4) Individual development accounts and other asset-building programs for low-income individuals;
 - (5) Coordinating state-operated programs and services targeted to low-income children and families;
 - (6) State charity tax credits;
 - (7) Supporting innovative programs and activities conducted by community-based organizations to address the goals of the program; and
 - (8) Administrative functions (42 USC 9901 and 9907(b)).
- b. *Eligible Entities and Other Subrecipients*: Eligible entities and other subrecipients may use CSBG funds for any programs, services, or other activities related to achieving the broad goals of CSBG, such as reducing poverty, revitalizing low-income communities, and assisting low-income individuals and families. Funds may be used to:
- (1) Promote economic self-sufficiency, employment, education and literacy, housing, and civic participation;
 - (2) Support community youth development programs;
 - (3) Fill gaps in services through information dissemination, referrals, and case management;
 - (4) Provide emergency assistance through grants and loans, and provision of supplies, services, and food stuffs;

- (5) Secure more active involvement of the private sector, faith-based institutions, neighborhood-based organizations, and charitable groups; and
 - (6) Plan, coordinate, and develop linkages among public (federal, state, and local), private, and nonprofit resources, including religious organizations, to improve their combined effectiveness in ameliorating poverty (42 USC 9901, 42 USC 9907(1)).
 - c. Supplemental funds appropriated by the Coronavirus Aid, Relief, and Emergency Services (CARES) Act (Pub. L. No. 116-136) may be used for allowable CSBG purposes to prevent, prepare for, and respond to the coronavirus. In responding to the coronavirus, CSBG grantees may consider the economic impact of the coronavirus.
 2. *Activities Unallowed: Applicable to States and Eligible Entities/Other Subrecipients*
 - a. Funds may not be used to purchase or improve land or to purchase, construct, or permanently improve buildings or facilities, other than low-cost residential weatherization or other energy-related home repairs (this limitation may be waived by ACF) (42 USC 9918(a)).
 - b. Funds may not be used to support any partisan or non-partisan political activity or to provide voters or prospective voters with transportation to the polls or provide similar assistance in connection with an election or any voter registration (42 USC 9918(b)).
 - c. No CSBG funding provided directly to a religious organization may be used for inherently religious activities, such as worship, religious instruction, or proselytization (42 USC 9920(c); 45 CFR section 1050.3(b)).

B. Allowable Costs/Cost Principles

1. *States:* CSBG is exempt from the provisions of OMB cost principles at the state level. As a block grant, state cost principles requirements apply to CSBG at the state level. However, states must apply OMB administrative cost principles (45 CFR Part 75, Subpart E) to subgrantees receiving CSBG funds (42 USC 9916(a)(1)(B)), 45 CFR 75.101(d)(1)).
2. *Eligible Entities and Other Subrecipients:* Eligible entities and other subrecipients of CSBG funds are subject to the cost principles in the Uniform Administrative Requirements in 45 CFR Part 75, Subpart E.

E. Eligibility

1. Eligibility for Individuals or Households

- a. *States:* The official poverty guideline as revised annually by HHS shall be used to determine eligibility. The poverty guidelines are issued each year in the *Federal Register* and on the HHS website (<http://aspe.hhs.gov/poverty/>). A state may adopt a revised poverty guideline but it may not exceed 125 percent of the HHS-determined poverty guidelines (42 USC 9902(2)).

Update: The CARES Act allows a state to adopt a revised poverty guideline but it may not exceed 200 percent of the HHS-determined poverty guidelines. This permission is in effect for fiscal years 2020 and 2021.

- b. *Eligible Entities/Other Subrecipients:* The official poverty guidelines as revised annually by HHS shall be used to determine eligibility. The poverty guidelines are issued each year in the *Federal Register* and on the HHS website (<http://aspe.hhs.gov/poverty/>). The CSBG Act, at 42 USC 9902(2), grants the state the authority to adopt a revised poverty threshold but it may not exceed 125 percent of the HHS-determined poverty guidelines. Audit procedures should be designed to test whether recipients of CSBG services meet the federal poverty guidelines, or a more restrictive poverty threshold established by a state.

Update: The CARES Act allows a state to adopt a revised poverty guideline but it may not exceed 200 percent of the HHS-determined poverty guidelines. This permission is in effect for fiscal years 2020 and 2021.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not applicable to eligible entities and other subrecipients.

H. Period of Performance

1. *States:* Amounts unobligated by the state at the end of the fiscal year in which they were first allotted shall remain available for obligation during the succeeding fiscal year (45 CFR section 96.14(a)).
2. *Eligible Entities:* CSBG funds granted by the state to subgrantees are available to the subgrantee for obligation during the federal fiscal year that the grant was made and in the following federal fiscal year (42 USC 9 section 9907(a)(2)).

- a. Note: The CSBG Act, at 42 USC 9907(a)(3), requires states to recapture and redistribute unused CSBG funds. However, this provision has been overridden by annual appropriations law by requiring states to carryforward unused funds to be used by the specific entity. Auditors should determine the legal requirements for the period under review.

M. Subrecipient Monitoring

1. *States*

States must conduct full on-site reviews of each eligible entity once every three years to check conformity with performance goals, administrative standards, financial management rules, and other requirements. States must conduct an onsite review of each newly designated entity immediately after the completion of the first year in which such entity receives CSBG funding. Follow-up reviews, including prompt return visits to eligible entities and their programs, are required for entities that fail to meet the goals, standards, and requirements established by the state (42 USC 9914(a)). Audit tests should be designed to test whether the state:

- (1) Has performed a full onsite monitoring of each eligible entity within the past three years;
- (2) Has completed a full onsite monitoring of a newly designated entity immediately after the completion of the first year in which the entity received CSBG funds;
- (3) Has conducted appropriate follow up reviews if necessary; and
- (4) Has conducted other reviews as appropriate, including reviews of entities with programs that have had other federal, state, or local grants terminated for cause.
- (5) If a state finds a need for corrective action, the state must (1) inform the subgrantee of the deficiency and require correction; (2) offer training and technical assistance and report to OCS on that assistance or explain why providing such assistance was not appropriate; (3) receive an improvement plan from the subgrantee within 60 days; and (4) not later than 30 days after receiving the improvement plan either approve it or specify the reasons why it cannot be approved (42 USC 9915). If the subgrantee fails to remedy the deficiency, the state may initiate proceedings to terminate the subgrantees eligibility or reduce its funding (42 USC 9908(b)(8) and 42 USC 9915(a)(5)).

2. *Eligible Entities/Other Subrecipients*

If eligible entities or other subrecipients of CSBG use a subaward to achieve the objectives of CSBG, the eligible entities and other subrecipients are required to comply with the provisions of 45 CFR 75.351 through 75.353 (45 CFR 75.101(d)).

Audit Objectives To determine if the eligible entity or other subrecipient complied with the subrecipient monitoring and management requirements.

Suggested Audit Procedures

- a. Select a sample of CSBG sub-awards or contracts during the period.
- b. Examine the procedures performed to determine if the subrecipient/contractor determination was made in accordance with 45 CFR 75.351.
- c. Examine the contract or sub-award to determine if the eligible entity or other subrecipient communicated the required information as detailed in 45 CFR 75.352(a).
- d. For the sub-awards and contracts that were determined to be subrecipients, review the procedures for compliance of 45 CFR 75.352(b) through (h) to determine that there is reasonable assurance that the CSBG funds were adequately protected, and services were provided to the community as expected.

N. **Special Tests and Provisions**

1. States: Subgrant Award and Administration

Compliance Requirements States must (1) use at least 90 percent of their allotted funds under this program for subgrants to eligible entities, (2) subgrant funds in a timely manner to allow subgrantees a sufficient opportunity to obligate the funds to accomplish program purposes, and (3) adhere to expense limits for administrative activities performed (42 USC 9907(a)(1), (a)(2), (a)(3), and (b)(2)). There is a concern that some states are (1) not allotting the funds to subgrantees early enough to allow a full period of performance by subgrantees without the possibility of recapture, resulting in unobligated balances of funds; and (2) inappropriately claiming administrative expenses for subgrant award and monitoring.

Audit Objectives To determine if the state (1) complied with the requirement to subgrant 90 percent of its allotted funds in a timely manner, and (2) claimed appropriate administrative expenses.

Suggested Audit Procedures

- a. Determine the state's procedures for issuance of subgrant awards or contracts, including any standards for administrative lead time.
 - b. Determine if the subgrants were made in a timely manner, consistent with CSBG requirements and the state's own procedures.
 - c. Determine if the state tracks, by each individual subgrant, the issuance date, expenditure by the subgrantee, and the associated administrative costs.
 - d. Determine if the state is appropriately claiming administrative costs in relation to its award and administration of subgrants.
2. Tri-Partite Board Compliance – Only Applicable to Eligible Entities

The CSBG Act at 42 USC 9910(a), requires nonprofit organizations administer CSBG through a board comprising:

- One-third (1/3) of the members be elected representatives in the community or their designee (the elected official must be holding office on the date of selection). There is a provision that allows for appointed government officials, or their designee, to be counted in meeting this requirement.
- Not fewer than one-third (1/3) of the board members are chosen in a democratic selection process adequate to assure that these members of the board are representative of the low-income individuals and families served. Additionally, each low-income representative must reside in the neighborhood served.
- The remaining board members are officials and members of business, industry, labor, religious, law enforcement, education, or other major groups and interests in the community served.

The CSBG Act at 42 USC 9910(b), requires that public organizations administer CSBG through a Tri-Partite board. This board shall have members selected by the organization and shall be composed so as to assure that no less than one-third (1/3) of the members are chosen in accordance with democratic selection procedures adequate to assure that these members:

- Are representative of low-income individuals and families served in the neighborhood served;
- Reside in the neighborhood served; and
- Are able to actively participate in the development, planning, implementation, and evaluation of the programs funded by CSBG; or

- The statute allows states to specify, in the alternative, another mechanism for public organizations to assure decision making and participation by low-income individuals in the development, planning, implementation, and evaluation of programs funded by CSBG.

The CSBG Act does not provide for a grace period for eligible entities to get into compliance, though it is not prohibited by the Act. There are provisions within the Act that prevent the state from delaying or stopping funding or de-designating an eligible entity without providing technical assistance and the opportunity to correct deficiencies. For this reason, the states are encouraged to develop a policy or procedure that allows a grace period to fill Tri-Partite board vacancies.

Compliance Requirements Eligible entities must comply with the Tri-Partite board requirement. If an eligible entity has vacancies during the audit period that reduce the representation of low-income communities or public elected/appointed officials, that exceed the length of time permitted by the state, the auditor should report a finding. If the state has not elected to create a policy or procedure to permit a reasonable amount of time to fill a vacancy, the auditor should report a finding for any vacancy during the period that reduced the required representation below the required threshold.

Audit Objectives To determine if the eligible entity maintained a Tri-Partite board during the audit period.

Suggested Audit Procedures

- a. Obtain the board rosters, including the areas of representation at the beginning and end of the audit period.
- b. For any changes in the board roster, inquire of organization management the dates of the changes.
- c. Obtain the policy or procedure communicated by the state to the eligible entity for adherence to the Tri-Partite board requirement.
- d. Determine if the low-income or public representation vacancies exceeded the length of time permitted by the state.

IV. OTHER INFORMATION

Transfers

As described in Part 4, Social Services Block Grant (SSBG) program (Assistance Listing 93.667), III.A. “Activities Allowed or Unallowed,” a state may transfer up to 10 percent of its annual allotment under SSBG to CSBG and other specified block grant programs for support of health services, health promotion and disease prevention activities, low-income home energy assistance, or any combination of these activities. Amounts transferred into the CSBG are subject to the requirements of the CSBG when expended and should be included in the audit universe and total expenditures of this program when determining Type A programs. On the Schedule of

Expenditures of Federal Awards, the amounts transferred in should be shown as expenditures of this program when such amounts are expended.

McKinney-Vento Homeless Assistance Programs and Corporation for National and Community Service AmeriCorps Programs

Since FY 2009, the appropriations acts providing funds for the McKinney-Vento Homeless Assistance programs has included language authorizing grantees under those programs to use other federal funds as match unless prohibited by the statute of the other program. OCS has determined that the CSBG Act does not prohibit the use of CSBG funds as match for the McKinney-Vento Homeless Assistance programs and the Corporation for National and Community Service' AmeriCorps programs. Any CSBG funds claimed as match for these Homeless Assistance programs must be used for CSBG purposes and in accordance with the CSBG requirements.

Tribal CSBG Grantees under a Pub. L. No. 102-477 Demonstration Project (477)

Audits of Indian tribal governments with the CSBG program in their approved 477 Plan will follow Version 2 reporting and, therefore, must follow the guidance in the 477 Cluster found in the Department of the Interior's section of Part 4 of this Supplement. See the "Note" at the beginning of the 477 Cluster for additional information.

2019 CSBG Disaster Supplemental

In federal fiscal year 2019, Congress appropriated additional CSBG funds under the Additional Supplemental Appropriations for Disaster Relief Act, 2019 (Pub. L. No. 116-20). These funds are to be issued to states to address the consequences of hurricanes Florence and Michael, Typhoon Mangkhut, Super Typhoon Yutu, and wildfires and earthquakes occurring in calendar year 2018 and tornadoes and floods occurring in calendar year 2019 in those areas for which a presidential disaster has been declared. These funds are to be reported on the Schedule of Expenditures of Federal Awards as CSBG funds, though the states and entities are required to account for these expenditures separately. CSBG Disaster Supplemental funds are subject to the requirements of the CSBG and the additional requirement that these funds must be used to address needs directly resulting from the presidentially declared disaster. CSBG Disaster Supplemental funds, when expended, should be included in the audit universe and total expenditures of this program when determining Type A programs. On the Schedule of Expenditures of Federal Awards, the amounts of CSBG Disaster Supplemental funds should be shown as expenditures of this program when such amounts are expended.

2020 CARES Act Supplemental

In federal fiscal year 2020, Congress appropriated additional CSBG funds under the CARES Act (Pub. L. No. 116-136). These funds are to be issued to states, tribes, and territories to prevent, prepare for, and respond to coronavirus. These funds are to be reported on the Schedule of Expenditures of Federal Awards as CSBG funds, though the states and entities are required to account for these expenditures separately in their own accounting records. CSBG CARES Supplemental funds are subject to the requirements of the CSBG and the additional requirement

that these funds must be used to prevent and prepare for the coronavirus and to respond to the impact of the coronavirus. CSBG CARES Supplemental funds, when expended, should be included in the audit universe and total expenditures of this program when determining Type A programs. On the Schedule of Expenditures of Federal Awards, the amounts of CSBG CARES Supplemental funds should be shown as expenditures of this program when such amounts are expended.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.489 CHILD CARE DISASTER RELIEF

ASSISTANCE LISTING 93.575 CHILD CARE AND DEVELOPMENT BLOCK GRANT

ASSISTANCE LISTING 93.596 CHILD CARE MANDATORY AND MATCHING FUNDS OF THE CHILD CARE AND DEVELOPMENT FUND

I. PROGRAM OBJECTIVES

The Child Care and Development Fund (CCDF) provides funds to states, territories, and Indian tribes (tribes) to increase the availability, affordability, and quality of child care services. Funds are used to subsidize child care for low-income families where the parents are working or attending training or educational programs, as well as for activities to promote overall child care quality for all children, regardless of subsidy receipt.

II. PROGRAM PROCEDURES

The Office of Child Care (OCC), Administration for Children and Families (ACF), Department of Health and Human Services (HHS), administers the CCDF. The CCDF consists of three distinct funding sources: Discretionary Fund (Assistance Listing 93.575), Mandatory Fund (Assistance Listing 93.596), and Matching Fund (Assistance Listing 93.596). Some states, territories, and tribes are also eligible for Child Care Disaster Relief funds (Assistance Listing 93.489); these funds may be used for any allowable CCDF activity as well as for construction or renovation of child care facilities to support recovery from specified federally declared disasters and emergencies. Additionally, under the Temporary Assistance for Needy Families (TANF) program (Assistance Listing 93.558), a state may transfer TANF funds to CCDF and, if so, the funds transferred in are treated as Discretionary Funds (42 USC 604(d); 45 CFR section 98.54(a)).

To receive funds, a state, territory, or tribe must submit a plan containing specific information and assurances. The plan serves as the application for funding for states, territories, and tribes, and is effective for a three-year period. For states, the current three-year plan covers FY2022-2024. For tribes, the three-year plans relevant to this audit period cover FY2020-2022 and FY2023-2025 (see “Source of Governing Requirements” below for more context).

Following ACF approval of the plan, funds are awarded to a Lead Agency based on statutory/regulatory formulas. The Lead Agency is the designated state, territorial or tribal entity that is accountable for administering the CCDF program. State awards are not adjusted by separate direct federal funding of counterpart tribal programs within the state. As long as statutory and regulatory requirements are met (e.g., that the state and territory Lead Agencies offer parents certificates for the purchase of child care services), grantees have flexibility in designing programs and offering services. For example, CCDF funds may be used in collaborative efforts with Head Start (Assistance Listing 93.600), including Early Head Start, programs to provide comprehensive child care and development services for children who are eligible for both programs. In fact, the coordination and collaboration between Head Start/Early

Head Start and the CCDF is strongly encouraged by sections 640(g)(1)(D) and (E), 640(h), 641(d)(2)(H)(v), and 642(e)(3) of the Head Start Act in the provision of full working day, full calendar year comprehensive services. In order to implement such collaborative programs, which share, for example, space, equipment or materials, grantees may layer several funding streams so that seamless services are provided.

Pub. L. No. 102-477

Tribes may operate the CCDF program under a consolidated Pub. L. No. 102-477 project. Pub. L. No. 102-477 refers to the Indian Employment, Training, and Related Services Demonstration Act of 1992, which was amended by the Indian Employment, Training, and Related Services Consolidation Act of 2017 (Pub. L. No. 106-568). The purpose of this initiative is to provide for the integration of employment, training, and related services to improve the effectiveness of those services. Under Pub. L. No. 102-477, funds received from a program must be used and spent in accordance with the applicable rules for that program, subject to any waivers granted by the Secretary of HHS. Tribes participating under a Pub. L. No. 102-477 project submit consolidated plans and reports to the Department of the Interior, which serves as the lead federal agency for Pub. L. No. 102-477. The separate 477 Cluster is applicable for an audit of an Indian tribal government's approved 477 Plan. See IV, "Other Information" – Tribal CCDF grantees under a Pub. L. No. 102-477 Project (477).

Source of Governing Requirements

The Discretionary Fund (Assistance Listing 93.575) is authorized by the CCDBG Act of 1990, as amended (most recently by the CCDBG Act of 2014 (Pub. L. No. 113-186), discussed further below), and codified at 42 USC 9857 et seq. The Mandatory and Matching Funds (Assistance Listing 93.596) are authorized under section 418 of Title IV-A of the Social Security Act as amended and codified at 42 USC 618. The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) (Pub. L. No. 116-136) and the Consolidated Appropriations Act of 2021 and Coronavirus Response and Relief Supplemental Appropriations Act (CRRSA Act) of 2021 (Pub. L. No. 116-260) both provide supplemental appropriations to prevent, prepare for, and respond to the coronavirus. The American Rescue Plan Act (ARP Act) (Pub. L. No. 117-2) (<https://www.congress.gov/public-laws/117th-congress>) provided supplemental funds for child care stabilization to support the child care sector during and after the COVID-19 public health emergency as well as additional supplemental appropriations that can be used for broader CCDF purposes and are not limited to addressing coronavirus impacts. The Child Care Disaster Relief funds (Assistance Listing 93.489) are appropriated by the Supplemental Appropriations for Disaster Relief Act of 2019 (Pub. L. No. 116-20). The CCDF (i.e., Assistance Listings 93.575, 93.596, and 93.489) is subject to the regulations at 45 CFR parts 98 and 99.

The CCDBG Act of 2014 made a number of substantive changes to program requirements, including provisions related to eligibility of children, consumer education, and health and safety (including monitoring inspections and criminal background checks).

On September 30, 2016, HHS published a final rule to update the CCDF regulations at 45 CFR parts 98 and 99 based on the reauthorized Act.

The reauthorized Act did not address how most of its provisions apply to tribal Lead Agencies, so this was clarified in the final rule. Under the rule, tribal Lead Agencies are subject to a tiered set of requirements based on the size of their CCDF funding allocation. For the FY2020–FY2022 and FY2023–2025 CCDF plan cycles, the allocation size was based on the FY 2016 allocation.

Other than 2 CFR section 200.202 and sections 200.330 through 200.332, as implemented by 45 CFR sections 75.202 and 75.351 through 75.353, CCDF is not subject to the post federal award or cost principles requirements in 2 CFR Part 200, subparts D and E, respectively, or the associated HHS implementing regulations at 45 CFR Part 75.

Availability of Other Program Information

OCC’s website (<https://www.acf.hhs.gov/occ>) provides general information on this program.

For guidance on CCDF CARES Act funding, see Information Memorandum 2020-01 at <https://www.acf.hhs.gov/occ/policy-guidance/ccdf-discretionary-funds-appropriated-cares-act-public-law-116-136-passed-law>

For guidance on CCDF CRRSA Act funding, see Information Memorandum 2021-01 at <https://www.acf.hhs.gov/occ/policy-guidance/ccdf-discretionary-funds-appropriated-crrsa-act-public-law-116-260-signed-law>

For guidance on CCDF ARP Act supplemental funding, see Information Memorandum 2021-03 at <https://www.acf.hhs.gov/occ/policy-guidance/ccdf-acf-im-2021-03>

For guidance on CCDF ARP Act stabilization funding, see Information Memorandum 2021-02 at <https://www.acf.hhs.gov/occ/policy-guidance/ccdf-acf-im-2021-02>

For FAQs on CCDF COVID supplemental funding, see: <https://www.acf.hhs.gov/occ/faq/stabilizing-child-care-and-covid-19-faqs>

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Note: To address program monitoring risk associated with the CCDF Stabilization grants added to this program as part of the ARP Act, OMB has authorized HHS to add “Reporting” as a

compliance requirement subject to audit. This requirement will be included as an additional requirement in the supplement until the CCDF Stabilization grants are fully expended.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	Y	Y	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed for CCDF Funds Other Than ARP Act Stabilization Funds*

- a. Funds may be used for child care services in the form of certificates, grants, or contracts (42 USC 9858c(c)(2)(A)).
- b. Funds may be used for activities that improve the quality or availability of child care services, consumer education, and parental choice (42 USC 9858e).
- c. Funds may be used for activities that improve access to child care services, including the use of procedures to permit enrollment of homeless children (after an initial eligibility determination) while required documentation is obtained; training and technical assistance on identifying and serving homeless children and their families; and specific outreach to homeless families (42 USC 9858c(c)(3)(B)(i)).
- d. Funds may be used for any other activity that the Lead Agency deems appropriate to (a) promote parental choice; (b) provide comprehensive consumer education information to help parents and the public make informed choices about child care services and promote involvement by parents and family members in the development of their children in child care settings; (c) deliver high-quality, coordinated early childhood care and education services to maximize parents’ options and support parents trying to achieve independence from public assistance; (d) improve the overall quality of child care services and programs by implementing the health, safety, licensing, training and oversight standards established in the CCDBG Act and in state law and regulations; (e) improve child care and development of participating children; and (f) increase the number and

percentage of low-income children in high-quality child care settings (42 USC 9857 and 9858c(c)(3)(B)).

- e. Improvements or upgrades to a facility which are not specified under the definitions of construction or major renovation (see III.A.2.c(1) below) may be considered minor remodeling and are, therefore, allowed as follows:
 - (1) For other than sectarian organizations, funds may be used for the minor remodeling of child care facilities
 - (2) For sectarian organizations, funds may be used for the renovation or repair of facilities only to the extent that it is necessary to bring the facility into compliance with the health and safety standards required by 42 USC 9858c(c)(2)(F) (42 USC 9858d(b)).
- f. Supplemental funds appropriated by the CARES Act (Pub. L. No. 116-136) and the CRRSA Act (Pub. L. No. 116-260) may be used for allowable CCDF purposes to prevent, prepare for, and respond to the coronavirus. For example, funds from both of these supplemental appropriations may be used to provide continued payments and assistance to child care providers in the case of decreased enrollment or closures related to coronavirus, and to assure that they are able to remain open or reopen.
- g. Additional supplemental discretionary funds provided by the ARP Act (other than the stabilization funds) are not limited to addressing coronavirus but can be spent for any allowable CCDF uses.

2. *Activities Allowed for CCDF ARP Act Stabilization Funds*

- a. States, territories, and tribes shall use stabilization funds appropriated by the ARP Act (Pub. L. No. 117-2) to make awards to child care providers to support the stability of the child care sector during and after the COVID-19 public health emergency. Child care providers may use stabilization funds to cover the following expenses: (A) personnel costs, including payroll and salaries or similar compensation for an employee (including any sole proprietor or independent contractor), employee benefits, premium pay, or costs for employee recruitment and retention; (B) rent (including rent under a lease agreement) or payment on any mortgage obligation, utilities, facility maintenance or improvements, or insurance; (C) personal protective equipment, cleaning and sanitization supplies and services, or training and professional development related to health and safety practices; (D) purchases of or updates to equipment and supplies to respond to the COVID-19 public health emergency; (E) goods and services necessary to maintain or resume child care services; and (F) mental health supports for children and employees.

3. *Activities Unallowed*

- a. No funds may be expended through any grant or contract for child care services for any sectarian purpose or activity, including sectarian worship or instruction (42 USC 9858k(a)).
- b. With regard to services to students enrolled in grades 1 through 12, no funds may be used for services provided during the regular school day, for any services for which the students receive academic credit toward graduation, or for any instructional services that supplant or duplicate the academic program of any public or private school (42 USC 9858k(b)).
- c. No funds can be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement (other than minor remodeling) of any building or facility (42 USC 9858d(b)).
 - (1) “Construction” is defined as the erection of a facility that does not currently exist. “Major renovation” is considered permanent improvement and is defined as (1) structural changes to the foundation, roof, floor, exterior or load-bearing walls of a facility, or the extension of a facility to increase its floor area; or (2) extensive alteration of a facility such as to significantly change its function and purpose, even if such renovation does not include any structural change (45 CFR section 98.2).
 - (2) *Exception:* Tribal Lead Agencies may use funds for the construction and major renovation of child care facilities with ACF approval (42 USC 9858m c)(6); 45 CFR section 98.
 - (3) *Exception:* State, territory, and tribal Lead Agencies may use Child Care Disaster Relief Funds (Assistance Listing 93.489) for renovating, repairing, or rebuilding child care facilities with ACF approval (Pub. L. No. 116-20).

B. Allowable Costs/Cost Principles

As indicated in Appendix I to the Supplement, “Federal Programs Excluded from the A-102 Common Rule and Portions of 2 CFR Part 200,” grantees (Lead Agencies) expend and account for CCDF funds in accordance with the laws and procedures they use for expending and accounting for their own funds (45 CFR section 98.67).

E. Eligibility

1. Eligibility for Individuals

Eligibility for Children Receiving CCDF Subsidies. Lead Agencies must have in place procedures for documenting and verifying eligibility in accordance with the following federal requirements, as well as the specific eligibility requirements

selected by each Lead Agency in its approved Plan. A Lead Agency is the designated state, territorial, or tribal entity to which the CCDF grant is awarded and that is accountable for administering the CCDF program.

- a. For state Lead Agencies and territory Lead Agencies, and for those tribal Lead Agencies with Grant Year 2016 allocations of at least \$250,000, children must be under age 13 (or up to age 19, if incapable of self-care or under court supervision), who reside with a family whose income does not exceed 85 percent of state/territorial/tribal median income for a family of the same size, and reside with a parent (or parents) who is working or attending a job-training or education program; or are in need of, or are receiving, protective services. Lead Agencies may choose to provide services during periods of job search. Tribal Lead Agencies may elect to use state or tribal median income (42 USC 9858n(4); 45 CFR sections 98.20(a) and 98.81(b)). Tribal Lead Agencies also have the option for categorical eligibility (considering any Indian child within the service area eligible for services) if the tribe's median income is below 85 percent of the state median income, provided that services go to those with the highest need.

State, territory, and tribal Lead Agencies may use supplemental funds appropriated by the CARES Act (Pub. L. No. 116-136), the CRRSA Act (Pub. L. No. 116-260), and the ARP Act (Pub. L. No. 117-2) to provide child care assistance to health care sector employees, emergency responders, sanitation workers, and other workers deemed essential during the response to the coronavirus, without regard to the income eligibility requirements. The Lead Agency may define which workers are considered essential in accordance with any relevant state, territorial, and tribal laws or policies.

- b. State Lead Agencies, territory Lead Agencies, as well as those tribal Lead Agencies with Grant Year 2016 allocations of at least \$250,000, must establish minimum 12-month eligibility periods before re-determining eligibility of CCDF families and must consider a child to be eligible between eligibility re-determinations, regardless of (1) changes in income (as long as income does not exceed 85 percent of state/territory/tribal median income); or (2) temporary changes in participation in work, training, or education activities. If a parent experiences a non-temporary loss of job, education, or training that affects eligibility, Lead Agencies have the option—but are not required—to terminate assistance prior to the next re-determination (i.e., prior to the end of the minimum 12-month eligibility period). However, if a Lead Agency exercises this option, the Lead Agency must provide (prior to terminating the subsidy) a period of continued assistance of at least three months to allow parents to engage in job search, resume work, or attend an education or training program as soon as possible. (42 USC 9858c(c)(2)(N)).

- c. Because a child meeting eligibility requirement at the most recent eligibility determination or re-determination is considered eligible between re-determinations as described in paragraph b. above, any payment for such a child shall not be considered an error or improper payment due to a change in the family's circumstances (45 CFR sections 98.21(a)(4) and 98.68(c)(2)). There is no federal requirement for Lead Agencies to recoup CCDF overpayments, except in instances of fraud as defined by the Lead Agency (45 CFR section 98.68(b)(2)).
- d. States and territories must have procedures to permit enrollment of homeless children (after an initial eligibility determination) while required documentation is obtained. States and territories must also have a grace period that allows children experiencing homelessness and children in foster care to receive services while providing families a reasonable time to take any necessary action to comply with immunization and health and safety requirements.
- e. State Lead Agencies, territory Lead Agencies, as well as those tribal Lead Agencies with Grant Year 2016 allocations of \$250,000 or more, must establish a sliding fee scale, based on family size, income, and other appropriate factors, that provides for cost sharing by families that receive CCDF child care services (42 USC 9858c(c)(3)(B)(i); 45 CFR section 98.45(k)). Lead Agencies may exempt families meeting criteria established by the Lead Agency from making copayments and must establish a payment rate schedule for child care providers caring for subsidized children (45 CFR section 98.45). State, territory, and tribal Lead Agencies may use supplemental funds appropriated by the CRRSA Act (Pub. L. No. 116-260) for costs of providing relief from copayments and tuition payments for families and for paying that portion of the child care provider's costs ordinarily paid through family copayments.
- f. State Lead Agencies, territory Lead Agencies, as well as those tribal Lead Agencies with Grant Year 2016 allocations of \$250,000 or more, must, to the extent practicable, implement enrollment and eligibility policies that support the fixed costs of providing child care services by delinking provider reimbursement rates from an eligible child's occasional absences, for example by paying based on a child's enrollment rather than attendance or paying for a specified amount of absences (42 USC 9858c(c)(2)(S), 45 CFR 98.45(l)(2)). Lead Agencies are not required to limit authorized child care services strictly based on the work, training, or educational schedule of the parent(s) or the number of hours the parent(s) spend in work, training, or educational activities (45 CFR section 98.21(g)).

2. Eligibility for Group of Individuals or Area of Service Delivery

The award of CCDF funds to a tribe shall not affect the eligibility of any Indian child to receive CCDF services in the state or states in which the tribe is located (42 USC 9858m(c)(5); 45 CFR section 98.80(d)).

3. Eligibility for Subrecipients

Lead agencies determine eligibility for any subrecipients used to implement portions of the CCDF program, such as entities implementing quality improvement activities.

4. Eligibility for Child Care Providers Receiving CCDF ARP Act Stabilization Funds

States, territories, and tribes shall use stabilization funds appropriated by the ARP Act (Pub. L. No. 117-2) to make payments to qualified child care providers to support the stability of the child care sector during and after the COVID-19 public health emergency. To be qualified to receive stabilization funds, a provider on the date of application for the award must either be: (1) open and available to provide child care services, or (2) closed due to public health, financial hardship, or other reasons relating to the COVID-19 public health emergency. In addition, the provider must either (1) be eligible to serve children who receive CCDF subsidies at the time of application for stabilization funds, or (2) be licensed, regulated, or registered in the state, territory, or tribe as of March 11, 2021, and meet applicable state and local health and safety requirements at the time of application for stabilization funds.

Child care providers include centers, family child care providers, and other providers that meet the qualifying eligibility criteria. Child care stabilization funds included in the ARP Act are for the benefit of qualified child care providers and are considered payments made to beneficiaries of a federal program. Qualified providers receiving ARP Act Stabilization funds are therefore not categorized as “sub-recipients” as defined at 45 CFR 75.2 but instead as beneficiaries. The Single Audit Act requirements at 45 CFR Subpart F and the sub-recipient monitoring requirements at 45 CFR 75.352 do not apply to beneficiaries.

In their application for stabilization funds, a child care provider must certify:

1. That the provider will, when open and providing services, implement policies in line with guidance and orders from corresponding state, territorial, tribal, and local authorities and, to the greatest extent possible, implement policies in line with guidance from the Centers for Disease Control and Prevention (CDC).

2. For each employee, the provider must pay at least the same amount in weekly wages and maintain the same benefits for the duration of the stabilization funding.
3. The provider will provide relief from copayments and tuition payments for the families enrolled in the provider's program, to the extent possible, and prioritize such relief for families struggling to make either type of payment.

Lead Agency must maintain documentation for child care providers receiving ARP Act stabilization funds to verify that child care providers met eligibility criteria, and that the providers gave the required certifications as part of their applications for funding.

G. Matching, Level of Effort, Earmarking

The matching and MOE requirements apply only to the Matching Fund (Assistance Listing 93.596). The state's matching and MOE expenditures are closely related. For a state to receive the allotted share of the Matching Fund, the state must meet the MOE requirement and obligate the Mandatory Fund by year end (see III.H, "Period of Performance"). The matching and MOE amounts are reported on the CCDF Financial Report (ACF-696) (see III.L., "Reporting – Financial Reporting").

1. Matching

- a. A state is eligible for federal matching funds (limit specified in 42 USC 618 and 45 CFR section 98.63) only for those allowable state expenditures that exceed the state's MOE requirement, provided all of the Mandatory Funds (Assistance Listing 93.596) allocated to the state are also obligated by the end of the fiscal year (45 CFR section 98.53).
- b. State expenditures will be matched at the Federal Medical Assistance Percentage (FMAP) rate for the applicable fiscal year. This percentage varies by state and is available at <http://www.aspe.hhs.gov/health/fmap.htm>. To be eligible an activity must be allowable and be described in the approved state plan (45 CFR section 98.53). The ARP Act (Pub. L. No. 117-2) increased the amount of matching funds and waived the matching requirement on the increased portion of funds for FY 2021 and FY 2022. Information about matching fund amounts and other CCDF allocation amounts can be found at <https://acf.hhs.gov/occ/grant-funding/ccdf-funding-allocations>.
- c. Private or public donated funds may be counted as state expenditures for this purpose subject to the limitations in 45 CFR section 98.53.
- d. No more than 30 percent of state matching claims may be for pre-kindergarten services (45 CFR section 98.53(h)(3)). The same expenditure

may not be used for both MOE and matching purposes (45 CFR sections 98.53(d) and 98.53(h)).

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

If a state requests Matching Funds (Assistance Listing 93.596), state MOE (non-federal) funds for child care activities must be expended in the year for which Matching Funds are claimed in an amount that is at least equal to the state's share of expenditures for FY 1994 or 1995 (whichever is greater) under former sections 402(g) and (i) of the Social Security Act (42 USC 618). Private or public donated funds may be counted as state expenditures for this purpose (45 CFR section 98.53).

No more than 20 percent of the MOE requirement may be met with state expenditures for pre-kindergarten services. The same expenditure may not be used for both MOE and matching purposes (45 CFR sections 98.53(d) and 98.53(h)).

2.2 Level of Effort – *Supplement Not Supplant*

The annual appropriations law for CCDF Discretionary Funds (Assistance Listing 93.575), the CARES Act (Pub. L. No. 116-136), and the CRRSA Act (Pub. L. No. 116-260) all specify that funds shall be used to supplement, not supplant State general revenue funds for child care assistance for low-income families. Funds appropriated by the ARP Act (Pub. L. No. 117-2) shall be used to supplement and not supplant other federal, state, and local public funds expended to provide child care services for eligible individuals.

3. Earmarking

- a. *Administrative Earmark* – A state/territory Lead Agency may not spend on administrative costs more than five percent of total CCDF awards expended (i.e., the total of Assistance Listings 93.575, 93.596, and 93.489 with the exception of any ARP Act stabilization funds and of any Disaster Relief funds spent on construction and renovation) and any state expenditures for which Matching Funds (Assistance Listing 93.596) are claimed (42 USC 9858c(c)(3)(C); Pub. L. No. 116-20; 45 CFR section 98.52).

Tribal Lead Agencies are allowed 15 percent of the amount expended under Assistance Listings 93.575, 93.596, and 93.489 (with the exception of any ARP Act stabilization funds and of any Disaster Relief funds spent on construction and renovation) for administrative costs. Tribes with at least 50 children under age 13 are provided a base amount, which may be expended for any purpose consistent with the purpose and requirements of

the CCDF. Tribes with fewer than 50 children who are members of a consortium receive a pro rata amount of the base amount in proportion to the number of children under age 13 in relation to 50. The base amount is not included in the amount against which the administrative earmark is calculated. For FY 2017 and later fiscal years, the base amount was \$30,000 (45 CFR sections 98.61(c), 98.83(h), and 98.83(i)).

The administrative costs maximum applies to all CCDF expenditures in the aggregate, including supplemental CCDF funding provided by the CARES Act (Pub. L. No. 116-136), the CRRSA Act (Pub. L. No. 116-260), and the ARP Act (Pub. L. No. 117-2), excluding the stabilization funds provided by ARP.

The following activities are not considered administrative costs (45 CFR section 98.54(b)):

- (1) Eligibility determination and redetermination.
- (2) Preparation and participation in judicial hearings.
- (3) Child care placement.
- (4) Recruitment, licensing, inspection, review, and supervision of child care placements.
- (5) Rate-setting.
- (6) Resource and referral services.
- (7) Training of child care staff.
- (8) Establishment and maintenance of computerized child care information systems.
- (9) Establishment and operation of a certificate program.

Child care stabilization funds provided by the ARP are not subject to the CCDF administrative cost limitation. Rather, a state or territory that receives these funds shall reserve not more than 10 percent to administer stabilization funds, provide technical assistance and support for applying for and accessing the funding opportunity, publicize the availability of the funds, carry out activities to increase the supply of child care, and provide technical assistance to help child care providers. A tribal lead agency may reserve up to 20 percent of stabilization funds for these activities.

- b. *Quality Earmark* – For FY 2020 and succeeding fiscal years, states and territory Lead Agencies must spend on quality activities, as provided in the state/territorial plan, not less than nine percent of CCDF funds

expended (i.e., the total of Assistance Listings 93.575, 93.596, and 93.489 with the exception of any CARES Act, CRRSA Act, and ARP Act, and of any Disaster Relief funds spent on construction and renovation) and any state expenditures for which Matching Funds (Assistance Listing 93.596) are claimed (45 CFR section 98.53). States and territory Lead Agencies must spend at least an additional three percent on quality improvement for infants and toddlers (45 CFR section 98.50(b)).

All tribal Lead Agencies must spend at least eight percent on quality activities for FY 2020 and FY 2021. Tribal Lead Agencies with CCDF allocations of \$250,000 and higher must spend at least an additional three percent on quality improvement for infants and toddlers starting in FY 2019. The base amount (discussed in paragraph 3.a above, *Administrative Earmark*) is not included in the amount against which the quality earmark is calculated (45 CFR sections 98.53(a), and 98.83(g)).

Quality spending requirements do not apply to supplemental funds provided by the CARES Act (Pub. L. No. 116-136), the CRRSA Act (Pub. L. No. 116-260), and the ARP Act (Pub. L. No. 117-2).

c. *Direct Spending Earmarks*

- (1) From the aggregate amount of Discretionary funds (Assistance Listing 93.575) and Disaster Relief funds (Assistance Listing 93.489) provided for a year (with the exception of any CARES Act, CRRSA Act, and ARP Act, and of any Disaster Relief funds used for construction or major renovation), state Lead Agencies, territory Lead Agencies, as well as those tribal Lead Agencies with allocations of at least \$250,000 must reserve funds for administrative costs (described in paragraph 3.a above, *Administrative Earmark*) and the minimum amount required for quality activities (described in paragraph 3.b above, *Quality Spending Earmark*).
- (2) From the remainder, the Lead Agency must use not less than 70 percent to fund direct services. In addition, states and territories must spend not less than 70 percent of the Mandatory and federal and state share of Matching funds (Assistance Listing 93.596) to provide child care assistance to families who: (1) receive Temporary Assistance for Needy Families (TANF) assistance; (2) are attempting through work activities to transition off TANF; and (3) are at risk of becoming dependent on TANF (45 CFR section 98.50(e) and (f)).
- (3) Direct spending requirements do not apply to supplemental funds provided by the CARES Act (Pub. L. No. 116-136), the CRRSA Act (Pub. L. No. 116-260) and the ARP Act (Pub. L. No. 117-2).

H. Period of Performance

1. Discretionary Funds (Assistance Listing 93.575) must be obligated by the end of the succeeding fiscal year after award and expended by the end of the third fiscal year after award (42 USC 9858h(c); 45 CFR section 98.60).
2. Mandatory Funds (Assistance Listing 93.596) for states must be obligated by the end of the fiscal year in which they are awarded if the state also requests Matching Funds (Assistance Listing 93.596). If no Matching Funds are requested for the fiscal year, then the Mandatory Funds (Assistance Listing 93.596) are available until liquidated (45 CFR section 98.60(d)).
3. Mandatory Funds (Assistance Listing 93.596) for territories must be obligated by the end of the fiscal year in which they are awarded and liquidated by the end of the succeeding fiscal year after award.
4. Mandatory Funds (Assistance Listing 93.596) for tribes must be obligated by the end of the succeeding fiscal year after award and liquidated by the end of the third fiscal year after award (45 CFR section 98.60(e)).
5. Matching Funds (Assistance Listing 93.596) must be obligated by the end of the fiscal year in which they are awarded and liquidated by the end of the succeeding fiscal year after award (45 CFR section 98.60(d)).
6. Child Care Disaster Relief Funds (Assistance Listing 93.489) not used for construction or renovation must be obligated by the end of the succeeding fiscal year after award and expended by the end of the third fiscal year after award (Pub. L. No. 116-20).
7. Child Care Disaster Relief Funds (Assistance Listing 93.489) used for construction or renovation must be obligated by the end of the fourth fiscal year after award and expended by the end of the fifth fiscal year after award (Pub. L. No. 116-20).

For example, availability periods for grant year 2021 funds awarded on any date in FY 2021 (October 1, 2020 through September 30, 2021):

If Source of Obligation Is –	Obligation must Be Made by End of –	Obligation must Be Liquidated by End of –
FY 2021 Discretionary (Assistance Listing 93.575)	FY 2022 (i.e., by 9/30/2022)	FY 2023 (i.e., by 9/30/2023)
FY 2021 Mandatory (State) (Assistance Listing 93.596)	FY 2021 (i.e., by 9/30/2021 but ONLY if Matching Funds are used)	No requirement for liquidation by a specific date
FY 2021 Mandatory (Territories) (Assistance Listing 93.596)	FY 2021 (i.e., by 9/30/2021)	FY 2022 (i.e., by 9/30/2022)
FY 2021 Mandatory (Tribes) (Assistance Listing 93.596)	FY 2022 (i.e., by 9/30/2022)	FY 2023 (i.e., by 9/30/2023)
FY 2021 Matching (Assistance Listing 93.596)	FY 2021 (i.e., by 9/30/2021)	FY 2022 (i.e., by 9/30/2022)

If Source of Obligation Is –	Obligation must Be Made by End of –	Obligation must Be Liquidated by End of –
FY 2021 Child Care Disaster Relief— Not Used for Construction or Renovation (Assistance Listing 93.489)	FY 2022 (i.e., by 9/30/2022)	FY 2023 (i.e., by 9/30/2023)
FY 2021 Child Care Disaster Relief— Used for Construction or Renovation (Assistance Listing 93.489)	FY 2024 (i.e., by 9/30/2024)	FY 2025 (i.e., by 9/30/2025)

TANF funds (Assistance Listing 93.558) transferred to the CCDF during a fiscal year are treated as Discretionary Funds of the year they are transferred for purposes of the period of availability (45 CFR section 98.54(a)(1)).

In lieu of the obligation and liquidation requirements cited above, tribes are required to liquidate CCDF funds used for construction or major renovation by the end of the second fiscal year following the fiscal year for which the grant is awarded (45 CFR section 98.84(e)).

Supplemental funds provided under the CARES Act (Pub. L. No. 116-136), the CRRSA Act (Pub. L. No. 116-260), and the ARP Act (Pub. L. No. 117-2) have specific obligation and liquidation timeframes that are outlined below:

	Obligation must Be Made by End of –	Obligation must Be Liquidated by End of –
FY 2020 Discretionary supplemental funds provided under the CARES Act (Pub. L. No. 116-136) (Assistance Listing 93.575)	FY 2022 (i.e., by 9/30/2022)	FY 2023 (i.e., by 9/30/2023)
FY 2021 Discretionary supplemental funds provided under the CRRSA Act (Pub. L. No. 116-260) (Assistance Listing 93.575)	FY 2022 (i.e., by 9/30/2022)	FY 2023 (i.e., by 9/30/2023)
FY 2021 Discretionary supplemental funds provided under the ARP Act (Pub. L. No. 117-2) (Assistance Listing 93.575)	FY 2023 (i.e., by 9/30/2023)	FY 2024 (i.e., by 9/30/2024)
FY 2021 Child care stabilization funds provided by the ARP Act (Pub. L. No. 117-2) (Assistance Listing 93.575)	FY 2022 (i.e., by 9/30/2022)	FY 2023 (i.e., by 9/30/2023)

In accordance with the CCDBG Act of 2014 and 45 CFR 98.19, The Office of Child Care approved waivers for some tribes and territories, upon request, to extend the obligation and liquidation periods of some CCDF funding (both regular CCDF and COVID supplemental funds).

L. Reporting

1. Financial Reporting

ACF-696, *Child Care and Development Fund Financial Report (OMB No 0970-0510)* is due quarterly from states and territories. The ACF-696T, *Child Care and*

Development Fund Financial Report for Tribes (OMB No. 0970-0510) is due annually from tribes except for tribes operating their CCDF program under a Pub. L. No. 102-477 project. These reports are in lieu of the SF-425, *Federal Financial Report* (financial status). Each fiscal year's expenditure report must be separate; therefore, multiple reports may be required if awards from more than one fiscal year are expended in a given quarter. Any funds transferred from TANF are treated as Discretionary Funds for reporting on the ACF-696 (42 USC 604(d); 45 CFR section 98.54(a)).

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

M. Subrecipient Monitoring

Lead Agencies that use other governmental or non-governmental subrecipients to administer the program must have written agreements in place outlining roles and responsibilities for meeting CCDF requirements. The contents of the written agreement may vary based on the role the subrecipient is asked to assume or the type of product undertaken, but must include, at a minimum, tasks to be performed, a schedule for completing tasks, a budget which itemizes categorical expenditures, and indicators or measures to assess performance. Lead Agencies shall oversee the expenditure of funds by sub-grantees, monitor programs and services, and ensure that sub-grantees that determine individual eligibility operate according to rules established by the program (45 CFR section 98.11).

N. Special Tests and Provisions

1. Health and Safety Requirements

Compliance Requirements As part of their CCDF plans, Lead Agencies must certify that procedures are in effect (e.g., monitoring and enforcement) to ensure that providers serving children who receive subsidies comply with all applicable health and safety requirements. This includes verifying and documenting that child care providers (unless they meet an exception, e.g., family members who are caregivers or individuals who object to immunization on certain grounds) serving children who receive subsidies meet requirements pertaining to health and safety. These requirements must address eleven specific areas—including first aid and CPR, safe sleeping practices, and administration of

medication—and child care workers must be trained in these areas (42 USC 9858c(c)(2)(I); 45 CFR section 98.41).

Audit Objectives Determine whether Lead Agencies ensure that child care providers serving children who receive subsidies meet applicable health and safety requirements.

Suggested Audit Procedures

- a. Request that the Lead Agency identify state health and safety requirements for child care providers serving children who receive subsidies.
- b. Review the Lead Agency’s procedures, including any monitoring and enforcement procedures, for ensuring child care provider compliance with relevant health and safety requirements for those providers serving children who receive subsidies. This review should include, at a minimum, relevant information in the Lead Agency’s CCDF Plan.
- c. Review a sample of Lead Agency files for child care providers serving children who receive subsidies to verify that the Lead Agency followed its procedures for ensuring child care provider compliance with relevant state health and safety requirements, including training requirements.

2. Fraud Detection and Repayment

Compliance Requirements Lead Agencies shall recover child care payments that are the result of fraud. These payments shall be recovered from the party responsible for committing the fraud (45 CFR section 98.60).

Audit Objectives Determine if the Lead Agency correctly identified and reported fraud and took steps to recover payment.

Suggested Audit Procedures

- a. Review the Lead Agency’s procedures for identifying and recovering payments resulting from fraud, including the Lead Agency’s definition of fraudulent child care payments.
- b. Request documentation of any fraudulent payments that have been identified by the Lead Agency. If fraudulent payments occurred, review a sample of those payments to verify that the Lead Agency followed its procedures related to authenticating that a payment was actually fraudulent and as applicable recover payment.

3. Tribal Lead Agencies - Protection of Federal Interest in Real Property and Facilities

Compliance Requirements CCDF can only be used for construction or major renovation of child care facilities in two instances: (1) a tribal Lead Agency that is approved to use CCDF for construction or major renovation; or (2) a state, territory, or tribal Lead Agency that is approved to use Disaster Relief funds (Assistance Listing 93.489) for construction or major renovation. The requirements for construction and renovation of child care facilities by tribal Lead Agencies are described in 45 CFR section 98.84. As required by this section, OCC established uniform procedures in program instruction CCDF-ACF-PI-2016-05, “Procedures for Requests for Tribal Lead Agencies to Use Child Care and Development Fund (CCDF) Funds for Construction or Renovation of Child Care Facilities” (<https://www.acf.hhs.gov/occ/resource/ccdf-acf-pi-2016-05>). The requirements for using Disaster Relief funds (Assistance Listing 93.489) for construction and renovation are described in program instruction CCDF-ACF-PI-2019-06.

Facilities activities (construction, major renovation, and disposition) are initiated through the submission of Form SF-429 (cover sheet) and applicable Attachments B (*Request to Acquire, Improve or Furnish*) or C (*Disposition or Encumbrance Request*).

In instances where federal interest provisions apply, at the commencement of construction or major renovation of a facility with CCDF funds, the tribal Lead Agency must record a Notice of Federal Interest in the appropriate official records of the jurisdiction in which the facility will be located (unless the facility will be located on tribal lands held in trust by the US government). In the case of Disaster Relief funds (Assistance Listing 93.489), federal interest is limited to 10 years, and does not apply to privately-owned family child care homes. The full requirements for the protection of the federal interest are described in program instructions CCDF-ACF-PI-2016-05 and CCDF-ACF-PI-2019-06.

Audit Objectives Determine whether the federal interest in real property and facilities is protected by the required Notice of Federal Interest and language content and the required prior written approvals were obtained from ACF.

Suggested Audit Procedures

- a. Review the appropriate documentation (e.g., Lead Agency’s general ledger accounts and the meeting minutes of its governing body) and inquire of the tribal Lead Agency’s management to identify if any of the following transactions, which are subject to the requirements for protecting the federal interest, occurred during the audit period and, if so, that the required prior written approvals were obtained from ACF:
 - (1) Construction or major renovation of a facility, including a modular unit.
 - (2) Sale, lease, or encumbrance, such as a mortgage of real property or a facility (including modular units).

- (3) Changes in approved use of facilities.
 - b. For construction, or major renovation during the audit period, ascertain if the Notice of Federal Interest was required, and if so, whether it was properly recorded in the locality's official real property records and, for a modular unit, if this Notice was properly posted in a conspicuous place. A Notice is not required for a facility on tribal lands held in trust by the US government; however, there is still a federal interest in any facility constructed or renovated with CCDF funds.
 - c. Review the Notices of Federal Interest and mortgage agreements and other security instruments executed during the audit period to ascertain if the documents include the required language content.
 - d. For sales, leases, and encumbrances and property used for a different purpose during the audit period, review the change in use to ascertain if the tribal Lead Agency obtained and complied with the requirement for ACF prior written approval.

4. Child Care Provider Eligibility for ARP Act Stabilization Funds

Compliance Requirements To be qualified to receive ARP Act stabilization funds, a provider on the date of application for the award must either be: (1) open and available to provide child care services, or (2) closed due to public health, financial hardship, or other reasons relating to the COVID-19 public health emergency. In addition, the provider must either (1) be eligible to serve children who receive CCDF subsidies at the time of application for stabilization funds, or (2) be licensed, regulated, or registered in the state, territory, or tribe as of March 11, 2021 and meet applicable state and local health and safety requirements at the time of application for stabilization funds. In their application for stabilization funds, a child care provider must certify:

- a. That the provider will, when open and providing services, implement policies in line with guidance and orders from corresponding state, territorial, tribal, and local authorities and, to the greatest extent possible, implement policies in line with guidance from the CDC.
- b. For each employee, the provider must pay at least the same amount in weekly wages and maintain the same benefits for the duration of the stabilization funding.
- c. The provider will provide relief from copayments and tuition payments for the families enrolled in the provider's program, to the extent possible, and prioritize such relief for families struggling to make either type of payment.

Audit Objectives Determine whether Lead Agencies ensure that child care providers receiving ARP Act stabilization funds meet eligibility criteria, including providing required certifications.

Suggested Audit Procedures

- a. Review a sample of Lead Agency documentation for child care providers receiving ARP Act stabilization funds to verify that child care providers met eligibility criteria, and that the providers gave the required certifications as part of their applications for funding.

IV. OTHER INFORMATION

Funding Sources Within the CCDF Cluster

In federal fiscal year 2019, Congress appropriated additional CCDF funds under the Supplemental Appropriations for Disaster Relief Act of 2019 (Pub. L. No. 116-20). In federal fiscal year 2020, Congress appropriated additional CCDF funds under the CARES Act (Pub. L. No. 116-136). In fiscal year 2021, Congress appropriated additional CCDF funds under the CRRSA Act (Pub. L. No. 116-260) and the ARP Act (Pub. L. No. 117-2). The ARP funds included both supplemental CCDF funds and child care stabilization funds. Although there are some differences in the rules governing each funding source, expenditures of funds from all of these sources should be included in the audit universe for CCDF Lead Agencies and the total expenditures of the CCDF Cluster for purposes of (1) determining Type A programs and (2) completing the Schedule of Expenditures of Federal Awards (SEFA). However, CCDF Lead Agencies are required to account for these expenditures separately in their own accounting records. Furthermore, a footnote on the SEFA showing amounts by funding source (CCDBG, CCDF Mandatory and Matching, CCDF Disaster Relief, CCDF CARES, CCDF CRRSA, CCDF ARP supplemental, CCDF ARP child care stabilization funds) in the CCDF Cluster is encouraged.

Transfer of Funds to CCDF

Under the TANF program (Assistance Listing 93.558), a state may transfer TANF funds to CCDF and the funds transferred are treated as Discretionary Funds under CCDF. The amounts transferred into CCDF should be included in the audit universe and in total expenditures of CCDF when determining Type A programs. On the Schedule of Expenditures of Federal Awards (SEFA), the amount transferred in should be shown as CCDF expenditures when expended.

Tribal CCDF Grantees under a Pub. L. No. 102-477 Project

Audits of Indian tribal governments with tribal CCDF in their approved 477 Plan with reporting under Version 2 forms (75 FR 57970 (September 26, 2014)) must follow the guidance in the 477 Cluster found in the Department of the Interior's section of Part 4 of this Supplement.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**ASSISTANCE LISTING 93.356 HEAD START DISASTER RECOVERY FROM HURRICANES HARVEY, IRMA, AND MARIA****ASSISTANCE LISTING 93.600 HEAD START****I. PROGRAM OBJECTIVES**

The objective of the Assistance Listing 93.600 Head Start program (including Early Head Start and Early Head Start-Child Care Partnerships) is to promote school readiness of low-income children (including American Indians, Alaska Natives, and migrant and seasonal farm workers) by enhancing children's cognitive, social, and emotional development.

The objective of Coronavirus Aid, Relief, and Economic Security Act (CARES Act) funding in the amount of \$750,000,000 appropriated for the Office of Head Start (OHS) is to pay the costs associated with Head Start program actions and activities undertaken to prevent, prepare for, and respond to the impacts of the coronavirus.

The objective of Coronavirus Response And Relief Supplementary Appropriation Act (CRRSA) funding in the amount of \$250,000,000 appropriated for OHS is to pay the costs associated with Head Start program actions and activities undertaken to prevent, prepare for, and respond to the impacts of the coronavirus.

The objective of American Rescue Plan (ARP) funding in the amount of \$1,000,000,000 appropriated for OHS is not limited to actions and activities undertaken to prevent, prepare for, and respond to the coronavirus and may also be used for the same objective as Assistance Listing 93.600: to promote school readiness of low-income children (including American Indians, Alaska Natives, and migrant and seasonal farm workers) by enhancing children's cognitive, social, and emotional development.

CARES Act, CRRSA and ARP funding was awarded in an amount that bears the same ratio to the portion available for allocation as the number of enrolled children served by the Head Start agency bears to the number of enrolled children served by all Head Start agencies. The objective of the Consolidated Appropriations Act (CCA) funding of \$11,036,820,000, an increase of \$289 million over fiscal year (FY) 2021, is to carry out the purposes of the Head Start Act. The CCA specifies that any amount of the funds provided for Quality Improvement may be used on any of the activities specified in the Head Start Act. Programs are not bound by the requirements that at least 50% of the funds be used for staff compensation or that no more than 10% of funds be used on transportation. The CCA also provides a Cost-of-Living Adjustment which must be used to permanently increase the Head Start pay scale by no less than 2.28% and be applied from the start of a recipient's FY 2022 budget period, which may need to be retroactively applied.

Comprehensive services are provided to enrolled children, pregnant women, and their families, which include health, nutrition, social, and other services determined to be necessary by family needs assessments, in addition to education and cognitive development services.

Assistance Listing 93.356

The objective of the Assistance Listing 93.356 disaster recovery is to provide for Head Start expenses directly related to the consequences of 2017 hurricanes Harvey, Irma, and Maria, including making payments under the Head Start Act.

The objective of Public Law No: 116-20, Additional Supplemental Appropriations for Disaster Relief Act of 2019, provides \$55,000,000 in emergency funding for necessary Head Start expenses directly related to the consequences of Hurricanes Florence and Michael, Typhoon Mangkhut, Super Typhoon Yutu, wildfires and earthquakes occurring in calendar year 2018 and floods occurring in calendar year 2019.

II. PROGRAM PROCEDURES

The OHS, Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS), administers the Head Start program, COVID-19 response funds, and disaster recovery funds.

Services for children ages 3–5 are funded by a Head Start award and services for pregnant women and children ages 0–3 are funded by an Early Head Start award. Early Head Start services may include those delivered through a partnership with existing child care centers or family child care homes under funding specially designated as an Early Head Start – Child Care Partnership award. Grant recipients may receive one-time awards, primarily for health and safety-related facility improvement activities.

Comprehensive center-based or home-based services are provided to enrolled children, pregnant women, and their families. These include health, nutrition, social, and other services determined to be necessary by a family needs assessment, in addition to education and cognitive development services. Services are designed to be responsive to each child’s and family’s ethnic, cultural, and linguistic heritage.

OHS makes Head Start awards to local public, nonprofit agencies, and for-profit entities known as Head Start Agencies (HSA). The awards are made for a period not-to-exceed five years. A HSA may enter into an agreement with a delegate agency (subrecipient) for delivery of Head Start services; however, the HSA (pass-through entity) retains legal and fiscal responsibility for the grant. Delegate agencies may be public, nonprofit, or for-profit organizations. HSAs must establish and implement procedures for the ongoing monitoring of each delegate agency (42 USC 9836a(d) and 45 CFR sections 1303.30 and 32).

Assistance Listing 93.356 funds may be used for allowable Head Start expenditures as specified in the terms and conditions of the grant award.

CARES Act and CRRSA funds may be used to pay the costs associated with Head Start program actions and activities undertaken to prevent, prepare for, and respond to the impacts of the coronavirus.

Source of Governing Requirements

The Head Start program is authorized under the Improving Head Start for School Readiness Act of 2007 (Pub. L. No. 110-134 (42 USC 9831-9852)).

On September 7, 2016, OHS promulgated new regulations governing program operations, referred to as the Head Start Program Performance Standards (HSPPS) (45 CFR parts 1301 through 1305). HSPPS became effective beginning November 7, 2016, although some provisions are deferred as noted in the regulations. The full implementing program regulations are 45 CFR parts 1301 through 1305.

Assistance Listing 93.356 was established based on appropriations in the Bipartisan Budget Act of 2018 (Pub. L. No. 115-123, 132 Stat. 93) and supplemental appropriations for fiscal year ending September 30, 2018 (Pub. L. No. 116-20).

Requirements for use of CARES Act funds to prevent, prepare for, and respond to the coronavirus were established by The Coronavirus Aid, Relief, and Economic Security (CARES) Act, 2020 (Pub. L. No. 116-136).

Requirements for use of CRRSA funds to prevent, prepare for, and respond to the coronavirus were established by the Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260).

Requirements for use of ARP funds were established by the American Rescue Plan Act of 2021 (Pub. L. No. 117-2).

Requirements for the use of the FY 2022 Head Start appropriation were established by the Consolidated Appropriations Act, 2022 (Public Law No: 117-103).

Availability of Other Program Information

The Early Childhood Learning and Knowledge Center (ECKLC) (<http://eclkc.ohs.acf.hhs.gov/hslc>) is the OHS website that provides information about the Head Start program. ECKLC also provides information specific to Assistance Listing 93.356 in ACF-IM-HS-17-02, dated September 20, 2017, *Disaster Recovery from 2017 Hurricanes* and ACF-PI-HS-18-02, dated April 9, 2018, *Hurricanes Harvey, Irma, and Maria Disaster Assistance Funds*. Information about funds available for expenses directly related to the consequences of natural disasters that occurred in 2018 and 2019 can be found in ACF-PI-HS-19-01, dated September 17, 2019, *Disaster Recovery Funding for 2018 and 2019 Disasters*. Information about available COVID-19 supplemental funds for Head Start programs can be found in ACF-PI-HS-20-04, dated May 21, 2020, *Update to Funding for FY 2020 Supplemental Funds in Response to the Coronavirus Disease 2019 (COVID-19)*; ACF-PI-HS-21-01, dated February 19, 2021, *FY 2021 Head Start Funding Increase*; and ACF-PI-HS-21-03, dated May 4, 2021, *FY 2021 American Rescue Plan Funding Increase for Head Start Programs*. Information about the use of the FY 2022 Head Start appropriation is further outlined in ACF-PI-HS-22-02, dated April 14, 2022, *FY 2022 Head Start Funding Increase*.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a

direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	Y	N	N	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. Funds may be used for the following program services consistent with HSPPS:
 - a. Providing for the direct participation of parents of children in the development, conduct, and program direction at the local community level (42 USC 9833 and 42 USC 9837(b)(1));
 - b. Training and technical assistance activities which may include the establishment of local or regional agreements with community experts, institutions of higher education, or private consultants, to make program improvements (42 USC 9835(a)(2)(C));
 - c. Improving the compensation (including benefits) of educational personnel, family service workers, and child counselors to—
 - (1) ensure that compensation is adequate to attract and retain qualified staff;
 - (2) improve staff qualifications and assist with the implementation of career development programs for staff that support ongoing improvement of their skills and expertise; and
 - (3) provide educational and professional development to enable teachers to meet professional standards, including providing assistance to complete post-secondary course work, improve the

qualifications and skills of educational personnel to become certified and licensed as bilingual education teachers, or as teachers of English as a second language, and improve the qualifications and skills of educational personnel to teach and provide services to children with disabilities (42 USC 9835(a)(5)(A) and 42 USC 9835(j));

- d. Supporting staff training, child counseling, and other services necessary to address the challenges of children from immigrant, refugee, and asylee families, homeless children, children in foster care, limited English proficient children, children of migrant or seasonal farmworker families, children from families in crisis, children referred to Head Start programs by child welfare agencies, and children who are exposed to chronic violence or substance abuse (42 USC 9835(a)(5)(B)(i));
- e. Ensuring the physical environment is conducive to providing effective program services to children and families and are accessible to children and others with disabilities (42 USC 9835(a)(5)(B)(ii));
- f. Employing additional qualified classroom staff to reduce the child-to-teacher ratio in the classroom and additional qualified family service workers to reduce the family-to-staff ratio for those workers (42 USC 9835(a)(5)(B)(iii));
- g. Ensuring that programs have qualified staff that promote the language skills and literacy growth of children and that provide children with a variety of skills that have been identified, through scientifically based reading research, as predictive of later reading achievement (42 USC 9835(a)(5)(B)(iv));
- h. Increasing the duration of hours of program operation, including the conversion of part-day programs to full-working day programs and increasing the number of weeks of operation in a calendar year (42 USC 9835(a)(5)(B)(v));
- i. Improving community-wide strategic planning and needs assessments and collaboration efforts, including outreach (42 USC 9835(a)(5)(B)(vi));
- j. Transporting children safely except that not more than 10 percent of designated quality improvement funds may be used for transportation costs (42 USC 9835(a)(5)(B)(vii) and 45 CFR Part 1310);
- k. Establishing and implementing procedures to evaluate the performance of delegate agencies and ensure corrective action for deficiencies identified through such evaluations (42 USC 9836a(d));
- l. Correcting areas of noncompliance or deficiencies and developing quality improvement plans (42 USC 9836a(e));

- m. Carrying out activities related to operation of the governing body. This includes activities related to administering and overseeing the Head Start grant; developing or implementing practices that ensure active, independent, and informed governance of the HSA; and ensuring the necessary membership on the governing body (42 USC 9837(c)(1));
 - n. With the consultation and participation of policy councils, and as appropriate, policy committees and community members, the conduct of an annual self-assessment of the HSA's effectiveness and progress in meeting program goals and objectives as well as in implementing and complying with HSPPS (42 USC 9836a(g));
 - o. Offering directly, or through referral to local entities, family literacy services, parenting skills training, substance abuse counseling, including information on the effect of drug exposure on infants and fetal alcohol syndrome (42 USC 9837(b)(4) and 42 USC 9837(b)(5));
 - p. Provision of family needs assessments that include consultation with parents (including foster parents, grandparents, and kinship caregivers) (42 USC 9837(b)(7));
 - q. Outreach and information to parents of limited English proficient children in an understandable and uniform format (42 USC 9837(b)(11));
 - r. Collaboration and coordination with public and private entities to improve the availability and quality of services to Head Start children and families, including outreach to the schools in which children participating in Head Start programs will enroll (42 USC 9837(e) and 42 USC 9837A(a));
 - s. Implementation of a research-based early childhood curriculum (42 USC 9837(f)(3)); and
 - t. In the case of an Early Head Start program or program component, provision, either directly or through referral, of early continuous, intensive, and comprehensive child development and family support services that enhance the physical, social, emotional, and intellectual development of children under the age of 3 (42 USC 9840A(b)).
2. Funds may be used for development and administrative costs, subject to the limitation that no financial assistance shall be extended in any case in which the costs of developing and administering a program exceed 15 percent of the total costs, including the required nonfederal contributions to such costs. The term "development and administrative costs" means costs incurred in accordance with an approved Head Start budget that do not directly relate to the provision of program component services, as described under paragraph 1, above (42 USC 9839(b) and 45 CFR section 1301.32 (a)).

3. With ACF prior written approval, HSAs may use funds for capital expenditures (including paying the cost of amortizing the principal, and paying interest on, loans), such as construction of new facilities, purchase of new or existing facilities, major renovations of existing facilities, and purchase of vehicles used for programs conducted at the Head Start facilities (42 USC 9839(f) and (g)). *Major renovation* means any individual or collection renovation that has a cost equal to or exceeding \$250,000. It excludes minor renovations and repairs except when they are included in a purchase application (45 CFR section 1305.2).
4. Funds may not be used by HSAs to engage in any partisan or nonpartisan political activity associated with a candidate, or contending faction or group, in an election for public or party office or any activity to provide voters or prospective voters with transportation to the polls or similar assistance in connection with any such election (42 USC 9851(b)(1)). These prohibitions do not apply to the use of Head Start facilities during hours of operation for any nonpartisan organization to increase the number of eligible citizens who register to vote in elections for federal office (42 USC 9851(b)(2)).
5. HSAs and delegate agencies must use funds from USDA's Child and Adult Care Food Program (Assistance Listing 10.558) as the primary source of payment for children's nutritional services (meals and snacks). Head Start funds may be used only to cover those allowable costs not covered by USDA (45 CFR section 1302.44(b)).
6. Funds may be used for professional medical and oral health services when no other funding source is available. When funds are used for such services, HSAs and delegate agencies must have written documentation of their efforts to access other available sources of funding (45 CFR section 1302.42(e)(2)).
7. Additional requirements for awards made under Assistance Listing 93.356:
 - a. The terms and conditions of the award specify the allowable Head Start expenditures for which the funds must be used. ACF-PI-HS-18-02 lists the following types of allowable expenses.
 - (1) Facilities
 - (2) Materials, Supplies, and Equipment
 - (3) Program Operations
 - (4) Additional Health, Mental Health, Dental, and Nutrition Services
 - (5) Training and Technical Assistance (T/TA)
 - (6) Disaster Recovery Expenses Incurred Prior to Availability of Funds

- b. HSAs are eligible to submit more than one application for disaster recovery funds and may receive multiple awards depending on the type of funds requested and complexity (e.g., facilities) of funded projects.
 - c. Funds may not be used to pay for costs that are reimbursed by the Federal Emergency Management Agency (FEMA), under a contract for insurance, or by self-insurance. HSAs must advise ACF in writing of the receipt of such funds and reimburse ACF for any costs incurred under the award that are subsequently reimbursed by FEMA, under a contract for insurance or self-insurance. HSAs may submit Head Start disaster recovery applications during the pendency of FEMA requests and insurance claims (Pub. L. No. 115-123, 132 Stat. 93).
8. Additional requirements for awards made from CARES Act and CRRSA funds:
- a. [ACF-PI-HS-20-04](#) describes the funding process and allowable use of CARES Act and CRRSA funds. Grantees are afforded broad discretion to utilize CARES Act and CRRSA funds to respond to COVID-19 in consideration of community circumstances and programmatic needs.
 - b. Extensive guidance to grantees to support their response to the coronavirus has been provided by OHS through its official website, the Early Childhood Learning and Knowledge Center (ECLKC), at the following link: <https://eclkc.ohs.acf.hhs.gov/about-us/coronavirus/ohs-covid-19-updates>.

B. Allowable Costs/Cost Principles

1. Costs meet general criteria for allowability, including being necessary and reasonable for the performance of the federal award, allocable thereto and adequately documented (45 CFR sections 75.403, 75.404, and 75.405).
2. Shared and indirect costs attributable to common or joint use of personnel, facilities, or services by Head Start programs and other programs must be fairly allocated among the various programs that utilize such services (42 USC 9839(c)).
3. Federal funds (including charges to indirect cost pools) may not be used to pay any part of the compensation of an individual employed by a HSA, if such compensation, including nonfederal funds, exceeds an amount equal to the rate payable for level II of the Executive Schedule under section 5313 of title 5, United States Code (42 USC 9848(b)).

F. Equipment and Real Property Management

1. Real property, equipment, and intangible property, that are acquired or improved with a federal award must be held in trust by the nonfederal entity as trustee for the beneficiaries of the project or program under which the property was acquired or improved. The HHS awarding agency may require the nonfederal entity to record liens or other appropriate notices of record to indicate that personal or real property has been acquired or improved with a federal award and that use and disposition conditions apply to the property (45 CFR section 75.323 and 45 CFR section 1303 – Subpart E).
2. Real property acquired or improved under a federal award must be used for the authorized purpose so long as it is needed for that purpose, during which time the HSA may not dispose of, replace or encumber the property without prior ACF approval (45 CFR section 75.318; 45 CFR section 75.308(c)(1)(xi)).
3. Equipment acquired under a federal award must be used for the authorized purposes of the project during the period of performance, or until the property is no longer needed for the purposes of the project. A HSA may not dispose of, replace, or encumber title to equipment without prior ACF approval (45 CFR section 75.319; 45 CFR section 75.308(c)(1)(xi)).
4. Property records must be maintained for equipment acquired under a federal award that include a description of the property, a serial number or other identification number, the source of funding for the property (including the FAIN), who holds title, the acquisition date, and cost of the property, percentage of federal participation in the project costs for the federal award under which the property was acquired, the location, use and condition of the property, and any ultimate disposition data including the date of disposal and sale price of the property. A physical inventory of the property must be taken and the results reconciled with the property records at least once every two years.

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

SF-429 – Real Property Status Report and SF-429-A General Reporting (OMB No. 4040-0016). These forms are filed annually based upon the end of the budget period. The annual SF-429 is required for all grantees and must indicate whether the grantee has reportable real property. If so, a separate SF-429-A must be completed for each parcel of real property reported and accompany the annual SF-429. Auditors should check for timely submission of SF-429 reports.

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

M. Subrecipient Monitoring

HSAs must establish and implement procedures for the ongoing monitoring of their own Head Start and Early Head Start operations, as well as those of their delegate agencies, to ensure that these operations effectively implement federal regulations, including procedures for evaluating delegate agencies and procedures for defunding them. Grant recipients must inform delegate agency governing bodies of any identified deficiencies in delegate agency operations identified in the monitoring review and assist them in developing plans, including timetables, for addressing identified problems (42 USC 9836a(d) and 45 CFR sections 1304.51(i)(2) and (3)).

N. Special Tests and Provisions

1. Protection of Federal Interest in Real Property and Facilities

Compliance Requirements Head Start uses specific terms related to real property and facilities, which are defined at 45 CFR section 1305.2, including construction, facility, federal interest, major renovation, and modular unit.

Facilities activities (purchase, construction, major renovation, subordination of a federal interest, refinancing, and disposition) are initiated through the submission of Form SF-429 (cover sheet) and applicable attachments B (*Request to Acquire, Improve or Furnish*) or C (*Disposition or Encumbrance Request*).

With written prior approval from ACF, a HSA may use Head Start funds to purchase, construct, or renovate (major) a facility, including using Head Start funds to pay ongoing purchase costs which include principal and interest on approved loans (45 CFR sections 1303.40 through 1303.44).

A HSA that uses Head Start funds to purchase real property or purchase, construct, or renovate (major) a facility appurtenant to real property (either owned or leased) must record a Notice of Federal Interest (also referred to as “reversionary interest”) (45 CFR sections 1303.46). The Notice of Federal Interest must include the required language content from 45 CFR section 1303.47(a) and be properly recorded in the official real

property records for the jurisdiction where the facility is or will be located. A similar Notice of Federal Interest is required for leased facilities on land the HSA does not own (45 CFR section 1303.47(b)).

An HSA that uses Head Start funds to purchase or renovate (major) a modular unit must post a Notice of Federal Interest which includes the required language content in clearly visible locations on the exterior and the interior of the modular unit (45 CFR sections 1303.46(b)(4) and 47(c)).

An HSA cannot mortgage, use as collateral for a credit line or for other loan obligations, or sell or transfer to another party, a facility, real property, or a modular unit it has purchased, constructed, or renovated (major) with Head Start funds, without the prior written approval of ACF (45 CFR sections 1303.48 and 1303.51). A HSA must include specific language in any mortgage agreement or other security instrument that encumbers real property or a modular unit constructed or purchased with Head Start fund to ensure protection of ACF interests (45 CFR section 1303.49).

An HSA must have written approval from ACF before it can use real property, a facility, or a modular unit subject to federal interest for a purpose other than that for which the HSA's application was approved (45 CFR section 1303.48(b)).

Audit Objectives Determine whether the federal interest in real property and facilities is protected by the required Notice of Federal Interest and language content and the required prior written approvals were obtained from ACF.

Suggested Audit Procedures

- a. Review the HSA's general ledger accounts and the meeting minutes of its governing body and inquire of HSA management to identify if any of the following transactions, which are subject to the requirements for protecting the Federal interest, occurred during the audit period and, if so, that the required prior written approvals were obtained from ACF:
 - (1) Purchase of real property or purchase, construction, or major renovation of a facility, including a modular unit.
 - (2) Sale, lease, or encumbrance, such as a mortgage of real property or a facility (including modular units).
 - (3) Changes in approved use of facilities.
- b. For purchase, construction, or major renovation during the audit period, ascertain if the required Notice of Federal Interest was properly recorded in the locality's official real property records and, for a modular unit, if this notice was properly posted on the exterior and interior of the modular unit.

- c. Review the notices of federal interest and mortgage agreements and other security instruments executed during the audit period to ascertain if the documents include the required language content.
- d. For sales, leases, and encumbrances and property used for a different purpose during the audit period, review the change in use to ascertain if the HSA obtained and complied with the requirement for ACF prior written approval.

2. Program Governance

Compliance Requirements OHS has found a high correlation between HSAs that fail to comply with the program governance requirements and HSAs that have serious fiscal problems, which puts both the HSA and the Head Start programs they administer at risk.

The governing body has legal and fiscal responsibility for the HSA. The HSA governing body must include not less than one member with a background and expertise in fiscal management or accounting and not less than one licensed attorney familiar with issues that come before the governing body. If the types of persons described above are not available to serve as members of the governing body, the governing body must use a consultant, or other individual(s) with relevant expertise who must work directly with the governing body (42 USC 9837(c)(1)(B)).

A HSA must share accurate and regular financial information with the governing body and the policy council, including monthly financial statements, including credit card expenditures and the financial audit (42 USC 9837(d)(2)(A) and (E)).

The governing body's responsibilities include approving financial management, accounting, and reporting policies, and compliance with laws and regulations related to financial statements, including the

- a. approval of all major financial expenditures of the agency;
- b. annual approval of the operating budget of the agency;
- c. selection (except when a financial auditor is assigned by the state under state law or is assigned under local law) of independent financial auditors; and
- d. monitoring of the agency's actions to correct any audit findings and of other action necessary to comply with applicable laws (including regulations) governing financial statement and accounting practices (42 USC 9837(c)(1)(E)(iv)(VII)(aa) through (dd)).

The auditee has provided training and technical assistance to the governing body and policy council to support understanding of financial information provided to them and support effective oversight of the Head Start award (42 USC 9837(d)(3)).

Audit Objectives Determine whether the entity complied with the program governance requirements for (a) composition and qualifications of board members, (b) providing

financial information to the governing body and policy council, and (c) providing training to the governing body and policy council.

Suggested Audit Procedures

1. Identify the HSA's governing body member who is an attorney and ascertain if that individual is licensed and has the required familiarity with issues that come before the governing body, or that the governing body used a consultant, or another individual with relevant expertise with the required qualifications who worked directly with the governing body.
2. Identify the HSA's governing body member with fiscal management or accounting expertise and ascertain if that individual has the required background and expertise or that the governing body used a consultant, or another individual with the required qualifications who worked directly with the governing body.
3. Ascertain if the HSA shared the required monthly financial information with the governing body and the policy council.
4. Determine whether the HSA has established written policies and procedures that identify major financial expenditures approvable by the governing body. If the HSA does not have written policies and procedures that identify or define major financial expenditures determine whether the HSA has an identifiable practice for identifying major financial expenditures submitted for approval to the governing body. Ascertain if written policies and procedures or an identifiable procedure exists and whether the policy, procedure or practice was followed by the HSA. If no such policy, procedure or practice exists and no governing body minutes reflect approval of expenditures identified as major financial expenditures, the auditor should determine that major financial expenditures are not submitted to the governing body for approval.
5. Governing body minutes or similar records should also reflect approval of all funding applications (Head Start and disaster recovery), selection of the independent auditor, attention to corrective action on audit findings and the annual report to the public.
- 6.
7. Ascertain if governing body and policy council members have received training and technical assistance related to their fiscal responsibilities.

IV. OTHER INFORMATION

Monitoring of HSAs and delegate agencies by OHS has identified the following areas of risk for deficiencies in internal controls and noncompliance.

B. Allowable Costs/Cost Principles

1. Many Head Start grantees, such as community action agencies, have multiple funding streams and few revenue sources other than federal awards. Federal programs only cover costs that are reasonable, allowable, and allocable for the accomplishment of the program objectives leaving the entity with limited options to cover unallowable costs.
2. The Head Start program often provides the largest proportion of the overall funding of HSAs and funds are immediately available to be drawn down in the Payment Management System. These factors create a risk that shared costs are over-allocated or billed entirely to Head Start. In some cases, costs of shared central services, such as equipment, information and communications systems, and rent are charged entirely to Head Start when the costs should be allocated to all programs that benefit.
3. A large portion of Head Start costs are payroll and grantees may fail to maintain adequate documentation of shared staff time or charge those costs based on the application budget rather than reconciling to actual hours worked. For example:
 - a. A teacher working for both Head Start and Child Care or a director for multiple programs erroneously charged entirely to Head Start.
 - b. Double charging the same costs by including them in the indirect cost rate and direct charging them through allocation (e.g., administrative staff).
 - c. Large dollar costs charged through journal entries to move costs between programs or between program years without adequate support.
 - d. Rent charged at full fair market value instead of depreciation or use allowance under capital or related party leases.
4. Transactions with related parties resulting in excessive charges. For example, paying rental rates in excess of fair market value.
5. Applicable only to expenditures charged to Assistance Listing 93.356:
 - a. Failure to notify ACF of FEMA or insurance proceeds or reimbursements for expenses already funded with Head Start disaster recovery funds.
 - b. Failure to obtain required prior written approval from ACF for purchase, construction, or major renovation of facilities. Major renovation means any individual or collection renovation that has a cost equal to or exceeding \$250,000. It excludes minor renovations and repairs except when they are included in a purchase application (45 CFR section 1305.2).
 - c. Failure to document costs and their relationship to the consequences of hurricanes Harvey, Irma, Maria, and allowability based on the specific terms and conditions of the award.

6. Applicable only to CARES Act and CRRSA funds:

- a. Failure to maintain documentation to demonstrate that the use of CARES Act and CRRSA funds was related to the coronavirus.
- b. Expenses charged to CARES Act and CRRSA funds awarded by OHS also charged to another federally financed program.
- c. CARES Act and CRRSA funds are subject to certain fiscal flexibilities established by OHS and continuing through December 31, 2020, described in [ACF-IM-HS-20-03](#). See, in particular, paragraphs 5 and 6 regarding allowable costs.
- d. CARES Act and CRRSA funds must be spent in accordance with cost principles described in 45 CFR Part 75, Subpart E taking into account the unique circumstances affecting spending decisions during COVID-19. Per 45 CFR Part 75, Subpart E CARES Act and CAA funds may not be included as a cost or used to meet cost sharing or matching requirements of any other federally financed program in either the current or a prior period.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.645 STEPHANIE TUBBS JONES CHILD WELFARE SERVICES PROGRAM

I. PROGRAM OBJECTIVES

The purpose of the Stephanie Tubbs Jones Child Welfare Services (CWS) program is to promote state and tribal flexibility in the development and expansion of a coordinated child and family services program that utilizes community-based agencies and ensures all children are raised in safe, loving families.

II. PROGRAM PROCEDURES

The Department of Health and Human Services (HHS), Administration for Children and Families (ACF), Administration on Children, Youth and Families, Children's Bureau, administers the CWS program on the federal level. Funds are awarded directly to states and tribes. State agencies can have agreements and contracts with other public agencies and with private agencies for provision of appropriate services. Each state receives a base amount of \$70,000. Additional funds are distributed in proportion to the state's population of children under age 21 multiplied by the complement of the state's average per capita income. The funds must go to, and be administered only by, the state child welfare agency, federally recognized tribes, tribal organizations, or tribal consortia (hereafter "tribe"). Note: Supplemental fiscal year (FY) 2020 funding was provided for the CWS program under Pub. L No. 116-136, Title VIII of Division B, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act). This funding, totaling \$45 million, was allocated to all title IV-B agencies using the existing statutory formula. Program Instruction ACYF-CB-PI-20-11, dated June 8, 2020, contains details and is available through a link as follows: <https://www.acf.hhs.gov/cb/policy-guidance/pi-20-11>.

To be eligible for funds, each state and tribe must submit a five-year comprehensive plan, the Child and Family Services Plan (CFSP). This plan encompasses planning and service delivery for the full child welfare services spectrum. This includes (1) Child Welfare Services, services promoting safe and stable families under Title IV-B, subpart 2; (2) a child welfare staff development and training plan; (3) a diligent recruitment of foster and adoptive families plan that reflects the ethnic and racial diversity of children in the state for whom foster and adoptive homes are needed; (4) and child abuse and neglect prevention, foster care, adoption, and foster care independence services. The plan must include how the state or tribe intends to meet specific goals, provide services, and coordinate services. The Children's Bureau has approval authority for the CFSP. An Annual Progress and Services Report (APSR) is required that identifies the specific accomplishments and progress made in the past FY toward meeting each goal and objective in the five-year comprehensive plan and any revisions in the statement of goals and objectives or to the training plan, if necessary, to reflect changed circumstances. The Associate Commissioner of the ACF Children's Bureau has approval authority for the Title IV-B plans.

Source of Governing Requirements

The CWS program is authorized under Title IV-B, subpart 1 (sections 421–428) of the Social Security Act as amended, and is codified at 42 USC 620-628a. Implementing program regulations are published at 45 CFR parts 1355 and 1357.

Availability of Other Program Information

The Children’s Bureau manages a policy issuance system that provides further clarification of the law and guides states and tribes in implementing the CWS program. This information may be accessed at <https://www.acf.hhs.gov/cb/laws-policies>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment/Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement Suspension & Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	N	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Funds may be used for the following purposes (42 USC 621):
 - (1) Protecting and promoting the welfare of all children;
 - (2) Preventing the abuse, neglect, or exploitation of children;

- (3) Supporting at-risk families through services that allow children to remain with their families or return to their families in a timely manner;
- (4) Promoting the safety, permanence, and well-being of children in foster care and adoptive families; and
- (5) Providing training, professional development, and support to ensure a well-qualified workforce.
- (6) Supplemental FY 2020 CARES Act funding may be used to prevent, prepare for, or respond to, coronavirus in a manner consistent with the above listed CWS program purposes. See Program Instruction ACYF-CB-PI-20-11, dated June 8, 2020, contains details and is available as follows:
<https://www.acf.hhs.gov/cb/policy-guidance/pi-20-11>.

- b. Funds may be used for administrative costs, subject to the limitation in III.G.3.b, “Matching, Level of Effort, Earmarking – Earmarking,” below. The term “administrative costs” means costs for the following but only to the extent incurred in administering the state plan for this program: procurement; payroll management; personnel functions (other than the portion of the salaries of supervisors attributable to time spent directly supervising the provision of services by caseworkers); management; maintenance and operation of space and property; data processing and computer services; accounting; budgeting; auditing; and travel expenses (except those related to the provision of services by caseworkers or oversight of the program) ((42 USC 622(b)(14) and (c) and 624(e)).

2. *Activities Unallowed*

Funds may not be used for the purchase or construction of facilities (45 CFR section 1357.30(f)).

G. **Matching, Level of Effort, Earmarking**

1. **Matching**

Funds are federally reimbursed at 75 percent of allowable expenditures. The Title IV- B agency’s contribution may be in cash, donated funds, and non-public third-party in-kind contributions (42 USC 623 and 45 CFR section 1357.30(e)(1)). The Federal Financial Participation (FFP) rate may be reduced (and the state matching rate increased by a corresponding amount) based on a determination that the state failed to meet performance standards for caseworker visits with children in foster care in the preceding federal fiscal year (FFY) (see II.L.2 ”Performance Reporting” below). The Children’s Bureau notifies states of any adjustment to the matching requirements through correspondence to the state agency. (Tribes are not subject to the caseworker visit data requirements.) Note: The

Supplemental FY 2020 CARES Act funds do not require a non-federal share match (100 percent FFP rate). Any reduction in FFP applying to a state's regular allotment under the CWS program for not meeting the caseworker visit standards, per 42 USC 624(f), does not apply to the Supplemental FY 2020 CARES Act funds.

2. Level of Effort

Not Applicable

3. Earmarking

- a. No more than 10 percent of the federal share of expenditures of the state or tribe with respect to activities funded from amounts provided under Title IV-B, subpart 1 (including any Supplemental FY 2020 CARES Act funds) may be used for administrative costs (42 USC 622(b)(14) and (c) and 624(e)).
- b. A state may not use federal funds under Title IV-B, subpart 1 (including any Supplemental FY 2020 CARES Act funds) for child care, foster care maintenance or adoption assistance payments in excess of the amount of Title IV-B, subpart 1 funds it spent on these activities from such payments for FY 2005 (42 USC 624(c)). This limitation is not applicable to tribes.
- c. A state cannot use more than the amount it spent in FY 2005 using non-federal funds on foster care maintenance payments as match for the Title IV-B, subpart 1, program (42 USC 624(d)). This limitation is not applicable to tribes.

H. Period of Performance

Funds under Title IV-B, subpart 1, must be obligated by September 30 of the fiscal year following the fiscal year in which the funds were awarded (45 CFR section 1357.30(i) and Supplemental Terms and Conditions available through a link as follows:

https://www.acf.hhs.gov/sites/default/files/documents/FY%2022%20ACYF.CB_.93.645.Stephania%20Tubbs%20Jones%20Child%20Welfare%20Services%20Program%20Supp%20TCs%20-%20rev%20011022.pdf). Note: Supplemental FY 2020 CARES Act

funds must be obligated by September 30 of the fiscal year following the fiscal year in which the funds were awarded (September 30, 2021). These funds may also be used to restore amounts for obligations incurred to prevent, prepare for, and respond to, COVID-19 beginning January 20, 2020 and prior to the effective date of the Federal award.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable Note: Separate SF-425 reporting is required for Supplemental FY 2020 CARES Act funding.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.658 FOSTER CARE–TITLE IV-E

I. PROGRAM OBJECTIVES

The objective of the Foster Care program is to help agencies authorized to administer Title IV-E programs to provide safe, appropriate, 24-hour, substitute care for children who are under the jurisdiction of the administering Title IV-E agency and need temporary placement and care outside their homes.

II. PROGRAM PROCEDURES

Overview

The Foster Care program is administered at the federal level by the Children’s Bureau, Administration on Children, Youth and Families, Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS). Funding is provided to the 50 states, the District of Columbia, Puerto Rico, the US Virgin Islands, and federally recognized Indian tribes, Indian tribal organizations, and tribal consortia with approved Title IV-E plans, based on a Title IV-E plan and amendments, as required by changes in statutes, rules, and regulations submitted to and approved by the ACF Children’s Bureau Associate Commissioner. This program is considered an open-ended entitlement program and allows the state or tribe to be funded at a specified percentage (federal financial participation) for program costs for eligible children.

The Foster Care program provides federal matching funds to Title IV-E agencies with approved Title IV-E plans for maintenance assistance payments to provide safe and stable out-of-home care to eligible children placed in qualifying foster care settings. The program also provides matching funds for child placement and other administrative or training costs associated with serving these children and others determined to be candidates for the Title IV-E Foster Care program or those either found to be at-risk of becoming or identified as a sex trafficking victim.

The designated state or tribal agency for this program, which is authorized under Title IV-E of the Social Security Act, as amended, also administers ACF funding provided for other Title IV-E programs (e.g., Adoption Assistance (Assistance Listing 93.659); Guardianship Assistance (Assistance Listing 93.090) at agency option; Kinship Navigator (Assistance Listing 93.471) at agency option; Prevention (Assistance Listing 93.472) at agency option; and John H. Chafee Foster Care Program for Successful Transition to Adulthood (Assistance Listing 93.674), as well as Child Welfare Services (Assistance Listing 93.645) and Promoting Safe and Stable Families (Assistance Listing 93.556) programs (Title IV-B of the Social Security Act, as amended) (Assistance Listing 93.556) funds available to states and those tribes qualifying for at least a minimum grant of \$10,000); and the Social Services Block Grant program (Assistance Listing 93.667) (Title XX of the Social Security Act, as amended) (states only)). The Title IV-E agency may either directly administer the Foster Care program or supervise its administration by local level agencies. When the program is administered by a state, in accordance with the approved Title IV-E plan, it must be in effect in all political subdivisions of the state, and, if administered by them, program requirements must be mandatory upon them. When the program is

administered by a tribe, it must be in effect in all political subdivisions within the tribal service area(s) and for all populations to be served under the plan. If the program is administered by a political subdivision of a tribe, program requirements must be mandatory upon them (42 USC 671(a)(1-4) and 42 USC 679B(c)(1)(B)).

Source of Governing Requirements

The Foster Care program is authorized by Title IV-E of the Social Security Act, as amended (42 USC 670 et seq.). This includes those amendments made by the Preventing Sex Trafficking and Strengthening Families Act (Pub. L. No. 113-183 and the Family First Prevention Services Act (Pub. L. No. 115-123). Implementing regulations are at 45 CFR parts 1355, 1356, and 1357.

States and tribes are required to adopt and adhere to their own statutes and regulations for program implementation, consistent with the requirements of Title IV-E and the approved Title IV-E plan.

The regulations at 45 CFR Part 75 specifying uniform administrative requirements, cost principles, and audit requirements for HHS awards are applicable to the Foster Care program. However, in accordance with 45 CFR sections 75.101(e)(1)(iii) and 75.101(e)(2), except for 45 CFR section 75.202, the guidance in Subpart C of 45 CFR Part 75 does not apply.

Availability of Other Program Information

The Children’s Bureau manages a policy issuance system that provides further clarification of the law and guides states and tribes in implementing the Foster Care program. This information may be accessed at <https://www.acf.hhs.gov/cb/laws-policies>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Y	Y	N	Y	N	N	N	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Funds may be expended for foster care maintenance payments on behalf of eligible children, in accordance with the Title IV-E agency’s foster care maintenance payment rate schedule and in accordance with 45 CFR section 1356.21, to individuals serving as foster family homes, to child-care institutions, or to public or private child-placement or child-care agencies. Such payments may include the cost of (and the cost of providing, including certain associated administrative and operating costs of a child care institution) food, clothing, shelter, daily supervision, school supplies, personal incidentals, liability insurance with respect to a child, and reasonable travel to the child’s home for visitation, as well as reasonable travel for the child to remain in the same school he or she was attending prior to placement in foster care (42 USC 672(b)(1) and (2), (c)(2), and 675(4)).
- b. Title IV-E agencies may claim Title IV-E foster care maintenance payments and administrative costs consistent with 45 CFR 1356.60(c) for a child placed with a parent in a licensed residential family-based treatment facility for substance abuse for up to 12 months (42 USC 672(j) and 672(a)(2)(C)).
- c. Funds may be expended for training (including both short- and long-term training at educational institutions through grants to such institutions or by direct financial assistance to students enrolled in such institutions) of personnel employed or preparing for employment by the agency administering the plan (42 USC 674(a)(3)(A)). All training activities and costs funded under Title IV-E shall be included in the Title IV-E agency’s training plan for Title IV-B (45 CFR section 1356.60(b)(2)).
- d. Funds may be expended for short-term training of (1) relative guardians; (2) state/tribe-licensed or state/tribe-approved child welfare agencies

providing services to children receiving Title IV-E assistance; (3) child abuse and neglect court personnel; (4) agency, child or parent attorneys; (5) guardians ad litem; and (6) court appointed special advocates (42 USC 674(a)(3)(B B)).

- e. Funds may be expended for short-term training, including associated travel and per diem, of current or prospective foster parents and staff of licensed or approved child-care institutions at the initiation of or during their period of care (45 CFR section 1356.60(b)(1)(ii)).
- f. Funds may be expended for costs directly related to the administration of the program that are necessary for the proper and efficient administration of the Title IV-E plan. The approved public assistance cost allocation plan (states) or approved cost allocation methodology (tribes) shall identify which costs are allocated and claimed under this program. Examples of allowable costs for the administration of the Foster Care program include those associated with eligibility determination and redetermination; independent legal representation by an attorney for a title IV-E eligible child in foster care, a child who has been determined as a candidate for placement in title IV-E-Foster Care or for the parents of such a child; referral to services; preparation for and participation in judicial determinations; hearings and appeals; rate setting; placement of the child; development of the case plan; case reviews; case management and supervision; recruitment and licensing of foster homes and institutions; costs related to data collection and reporting; and a proportionate share of related agency overhead (45 CFR section 1356.60(c) and Child Welfare Policy Manual section 8.1B Q/A's #30-32).
- g. Funds may be expended for activities defined as sex trafficking administrative activities (see list of examples below). These activities are meant to combat sex trafficking on behalf of any child or youth in the placement, care, or supervision of the Title IV-E agency who is at-risk of becoming a sex trafficking victim or who is identified as a sex trafficking victim. Such children do not need to be Title IV-E eligible and include those who are not removed from home; those who have run away from foster care and are under age 18 or such higher age elected under Section 475(8) of the Social Security Act; and youth who are not in foster care who are receiving services under the John H. Chafee Foster Care Program for Successful Transition to Adulthood (Assistance Listing 93.674) and at the option of the agency, youth under age 26 who were or were never in foster care (42 USC 671(a)(9), USC 671(a)(34), and 671(a)(35)).

Examples of activities allowable as sex trafficking administration include:

- developing and implementing policies and procedures to identify, document in agency records, and determine appropriate services for victims of sex trafficking

- conducting sex trafficking screenings and documenting victims of sex trafficking in agency files
- determining appropriate services for individuals identified as such victims, including referrals to services
- completing reports required for law enforcement and ACF of children or youth who the agency identifies as being a sex trafficking victim
- developing and implementing protocols to locate and assess children missing from foster care, including screening the child to identify if the child is a possible sex trafficking victim

Since the Title IV-E agency is not limited to performing the activities described above on behalf of individuals meeting Title IV-E eligibility requirements, application of a Title IV-E foster care participation rate is not needed in allocating these allowable administrative costs to the Title IV-E Foster Care program (42 USC 671(a)(9) and (a)(34), as amended by Pub. L. No. 113-183, and the Child Welfare Policy Manual section 8.1 Q/A#7).

- h. To the extent that allowable activities constituting training and administrative costs are allocated to the program through application of a Title IV-E participation rate (sometimes called the eligibility, penetration, or discount rate), this rate must be calculated by dividing the number of Title IV-E foster care eligible children by the total number of children in foster care pursuant to the definition of foster care in 45 CFR section 1355.20. The numerator is comprised of the total number of children in foster care determined to meet all Title IV-E eligibility requirements. A Title IV-E agency may also include in the numerator otherwise eligible children placed with relatives pending foster family home approval or licensure (for the lesser of the average time it takes to license a foster home or 12 months) and children moving from a facility that is not licensed to one that is for up to one month pursuant to Section 472(i)(1) of the Social Security Act. The denominator comprises the total number of children who are in foster care, including those that are Title IV-E eligible and those that are not or have not yet been determined Title IV-E eligible. Any methodology for claiming administrative costs, including the calculation of the participation rate described above, must be a part of the state's approved cost allocation plan or a tribe's approved cost allocation methodology (42 USC 672(i) and 674(a)(3), 2 CFR Part 225 or 45 CFR Part 75, as applicable, in accordance with 45 CFR section 75.110, 45 CFR section 95.507(b)(4), 45 CFR section 1355.20, and Child Welfare Policy Manual section 8.1C Q/A#8).

- i. With any required ACF approval, funds may be expended for costs related to design, implementation and operation of a statewide or tribal service area-wide data collection system (45 CFR sections 1356.60(d) and 95.611).
- j. Funds may be expended for costs related to design, implementation, and operation of a statewide or tribal automated child welfare information system (S/TACWIS) that received any required ACF approval by July 31, 2016, or a comprehensive child welfare information system (CCWIS), which receives any required ACF approval on or after August 1, 2016. Funds for S/TACWIS costs are available only for expenditures made prior to or during the transition period of August 1, 2016 through July 31, 2018. Funds are available for CCWIS qualifying costs for expenditures made on or after August 1, 2016. CCWIS expenditures must be separately reported from other automated systems costs and are limited to automated systems that have been classified as such by ACF and that comport with all applicable project and design requirements as well as approved funding levels. CCWIS developmental and operational costs for specific automated functions may or may not qualify for CCWIS cost allocation. This determination is based on whether the involved functionality meets applicable project and non-duplication requirements. These amounts must thus be further separately reported based on the cost allocation classification. (45 CFR sections 1355.52, 1355.53, 1355.54, 1355.56, 1355.57, 1356.60(e) and 95.611).
- k. Under Section 1130 of the Social Security Act, Title IV-E agencies may be granted authority to operate a demonstration project as set forth in ACF-approved terms and conditions. Any such terms and conditions applicable to the program identify the specific provisions of the Social Security Act that are waived, the additional activities deemed allowable, and the scope and duration (which may not exceed a maximum of five total years unless specifically approved for further continuation) of the demonstration project. All demonstration project operational activities, excluding project evaluation, must have ended no later than September 30, 2019. The demonstration project must remain cost neutral to the federal government, as provided for in a methodology contained in the approved project terms and conditions involving either a matched comparison group or a capped allocation (42 USC 1320a–9 and Section 201 of Pub. L. No. 112-34).

Allowable activities for which funds may be expended under an approved demonstration project are as follows:

- (1) Costs incurred prior to project implementation for the development of the project that are included in an approved Developmental Cost Plan (42 USC 1320a–9 and Section 201 of Pub. L. No. 112-34).

- (2) Costs incurred at any point during the project lifespan for project evaluation in accordance with an approved Project Evaluation Plan (42 USC 1320a–9 and Section 201 of Pub. L. No. 112-34).
- (3) Costs for otherwise Title IV-E allowable program activities provided as part of the operation of a demonstration project (i.e., to the extent that geographic and Title IV-E funding category components are included in the scope of the approved project) on behalf of Title IV-E eligible children to the extent that the approved cost neutrality limit or payment schedule (if applicable) is not exceeded (42 USC 1320a–9 and Section 201 of Pub. L. No. 112-34).
- (4) Costs for approved specified project intervention activities performed as part of the operation of a demonstration project on behalf of designated children and families (including those approved activities cited as otherwise Title IV-E unallowable) to the extent that the approved cost neutrality limit or payment schedule (if applicable) is not exceeded (42 USC 1320a–9 and Section 201 of Pub. L. No. 112-34).
- (5) Costs for other activities performed throughout the jurisdiction of the Title IV-E agency deemed as allowable through specifically approved Title IV-E waiver provisions (including those approved activities cited as otherwise Title IV-E unallowable) to the extent that the approved cost neutrality limit or payment schedule (if applicable) is not exceeded (42 USC 1320a–9 and Section 201 of Pub. L. No. 112-34).

2. *Activities Unallowed*

- a. Costs of social services provided to a child, the child’s family, or the child’s foster family which provide counseling or treatment to ameliorate or remedy personal problems, behaviors, or home conditions are unallowable (45 CFR section 1356.60(c)(3)).
- b. Costs claimed as foster care maintenance payments that include medical, educational (except for school supplies and the cost of reasonable travel for the child to remain in the school in which the child is enrolled at the time of placement in foster care) or other expenses not outlined in 42 USC 675(4)(A).
- c. Costs of conducting investigations of allegations of sex trafficking or other forms of child abuse or neglect or for providing social services, such as counseling or treatment, to victims of sex trafficking or other children or youth (Child Welfare Policy Manual section 8.1 Q/A#7 available at

https://acf.hhs.gov/cwpm/public_html/programs/cb/laws_policies/laws/cwpm/policy_dsp.jsp?citID=34).

B. Allowable Costs/Cost Principles

Both states and tribes are subject to the requirements of 2 CFR Part 200, Subpart E, as implemented by HHS at 45 CFR Part 75. States also are subject to the cost allocation provisions and rules governing allowable costs of equipment of 45 CFR Part 95 (45 CFR sections 1355.57, 95.503, and 95.705).

E. Eligibility

1. Eligibility for Individuals

Foster care benefits may be paid on behalf of a child only if all of the following requirements are met:

- a. Foster care maintenance payments are allowable only if the foster child was removed from the home of a relative specified in Section 406(a) of the Social Security Act, as in effect on July 16, 1996, and placed in foster care by means of a judicial determination, as defined in 42 USC 672(a)(2), or pursuant to a voluntary placement agreement, as defined in 42 USC 672(f), (42 USC 672(a)(1) and (2) and 45 CFR section 1356.21).

(1) Judicial Determination

- (a) *Contrary to the welfare determination* – A child’s removal from the home (unless removal is pursuant to a voluntary placement agreement) must be in accordance with a judicial determination to the effect that continuation in the home would be contrary to the child’s welfare, or that placement in foster care would be in the best interest of the child. The judicial determination must be explicitly stated in the court order and made on a case-by-case basis. The precise language “contrary to the welfare” does not have to be included in the removal court order, but the order must include language to the effect that remaining in the home will be contrary to the child’s welfare, safety, or best interest (45 CFR section 1356.21(c)).

For a child who enters foster care on or after March 27, 2000, the judicial determination of contrary to the welfare must be in the first court ruling that sanctions the child’s removal from home (45 CFR section 1356.21(c)). Acceptable documentation is a court order containing a judicial determination regarding contrary to the welfare or a transcript of the court proceedings reflecting this determination (45 CFR section 1356.21(d)). For the first 12

months that a tribe's Title IV-E plan is in effect, the tribe may use *nunc pro tunc* orders and affidavits to verify reasonable efforts and contrary to the welfare judicial determinations for Title IV-E foster care eligibility (42 USC 679c(c)(1)(C)(ii)(I), as added by Section 301, Pub. L. No. 110-351).

- (b) *Reasonable efforts to prevent removal determination* – Within 60 days from the date of the removal from home pursuant to 45 CFR section 1356.21(k)(ii), there must be a judicial determination as to whether reasonable efforts were made or were not required to prevent the removal (e.g., child subjected to aggravated circumstances such as abandonment, torture, chronic abuse, sexual abuse, parent convicted of murder or voluntary manslaughter or aiding or abetting in such activities) (45 CFR sections 1356.21(b)(1) and (k)). The judicial determination must be explicitly documented (i.e., so stated in the court order and made on a case by case basis).

For a child who enters foster care on or after March 27, 2000, the judicial determination that reasonable efforts were made to prevent removal or were not required must be made no later than 60 days from the date of child's removal from the home (45 CFR section 1356.21(b)(1)). Acceptable documentation is a court order containing a judicial determination regarding reasonable efforts to prevent removal or a transcript of the court proceedings reflecting this determination (45 CFR section 1356.21(d)). For the first 12 months that a tribe's Title IV-E plan is in effect, the tribe may use *nunc pro tunc* orders and affidavits to verify reasonable efforts and contrary to the welfare judicial determinations for Title IV-E foster care eligibility (42 USC 679c(c)(1)(C)(ii)(I), as added by Section 301, Pub. L. No. 110-351).

- (c) *Reasonable efforts to finalize a permanency plan* – A judicial determination regarding reasonable efforts to finalize the permanency plan must be made within 12 months of the date on which the child is considered to have entered foster care and at least once every 12 months thereafter while the child is in foster care. The judicial determination must be explicitly documented and made on a case by case basis. If a judicial determination regarding reasonable efforts to finalize a permanency plan is not made within this timeframe, the child is ineligible at the end of the twelfth month from the date the child was

considered to have entered foster care or at the end of the month in which the subsequent judicial determination of reasonable efforts was due, and the child remains ineligible until such a judicial determination is made (45 CFR section 1356.21(b)(2)).

For a child who enters foster care on or after March 27, 2000, the judicial determination of reasonable efforts to finalize the permanency plan must be made no later than 12 months from the date the child is considered to have entered foster care (45 CFR section 1356.21(b)(2)).

Acceptable documentation is a court order containing a judicial determination regarding reasonable efforts to finalize a permanency plan or a transcript of the court proceedings reflecting this determination (45 CFR section 1356.21(d)). For the first 12 months that a tribe's Title IV-E plan is in effect, the tribe may use *nunc pro tunc* orders and affidavits to verify reasonable efforts and contrary to the welfare judicial determinations for Title IV-E foster care eligibility (42 USC 679c(c)(1)(C)(ii)(I), as added by Section 301 Pub. L. No. 110-351).

(2) Voluntary Placement

(a) *Agreement* – A voluntary placement agreement must be entered into by a parent or legal guardian of the child who is a relative specified in Section 406(a) (as in effect on July 16, 1996) and from whose home the child was removed (42 USC 672(a)(2)(A)(i); 45 CFR section 1356.22(a)). A voluntary placement agreement entered into between a youth age 18 or older and the Title IV-E agency can meet the removal criteria in Section 472(a)(2)(A)(i) of the Social Security Act. In this situation, the youth age 18 or older is able to sign the agreement as his/her own guardian (Program Instruction ACYF-CB-PI-10-11 dated July 9, 2010, section B).

(b) *Best interests of the child determination* – If the removal was by a voluntary placement agreement, it must be followed within 180 days by a judicial determination to the effect that such placement is in the best interests of the child (42 USC 672(e); 45 CFR section 1356.22(b)).

b. The child's placement and care are the responsibility of either the Title IV-E agency administering the approved Title IV-E plan or any other public agency under a valid agreement with the cognizant Title IV-E agency (42 USC 672(a)(2)).

- c. A child (except if in placement (new or an existing placement) on or after October 1, 2018, with a parent residing in a licensed residential family-based treatment facility for substance abuse) must meet the eligibility requirements of the former Aid to Families with Dependent Children (AFDC) program (i.e., meet the state-established standard of need as of July 16, 1996, prior to enactment of the Personal Responsibility and Work Opportunity Reconciliation Act) (42 USC 672(a)). Tribes must use the Title IV-A state plan (as in effect as of July 16, 1996) of the state in which the child resided at the time of removal (42 USC 679c(c)(1)(C)(ii)(II)). Program eligibility is limited to an individual defined as a “child.” This classification ordinarily ceases at the child’s 18th birthday (42 USC 672(a)(3), and 42 USC 675(8)(A)). If, however, the state in which the child was living at removal had as a Title IV-A state plan option (as in effect as of July 16, 1996), a Title IV-E agency may provide foster care maintenance payments on behalf of youth who have attained age 18, but are under the age of 19, and who are full-time students expected to complete their secondary schooling or equivalent vocational or technical training before reaching age 19 (45 CFR section 233.90(b)(3)).

A Title IV-E agency may also amend its Title IV-E plan to provide that an individual in foster care who is over age 18 (where an existing eligibility age extension provision for a full-time student expected to complete secondary schooling prior to attaining age 19 is not applicable) and has not attained 19, 20, or 21 years of age (as the Title IV-E agency may elect) remains eligible as a child when the youth meets prescribed conditions for continued maintenance payments. For a youth age 18 or older, who is entering or re-entering foster care after attaining age 18 consistent with the criteria above, AFDC eligibility is based on the youth without regard to the parents/legal guardians or others in the assistance unit in the home from which the youth was removed as a younger child (e.g., a child-only case). A youth over age 18 must also (as elected by the Title IV-E agency) be (1) completing secondary school (or equivalent), (2) enrolled in post-secondary or vocational school, (3) participating in a program or activity that promotes or removes barriers to employment, (4) employed 80 hours a month, or (5) incapable of any of these due to a documented medical condition (42 USC 675(8)(B) and Program Instruction ACYF-CB-PI-10-11 dated July 9, 2010, section B). For the period from December 27, 2020 through September 30, 2021 (hereinafter, COVID-19 flexibility period), the title IV-E agency may not require a youth to leave foster care solely due to age and must permit any youth who left foster care due to reaching the state/tribe’s maximum age to voluntarily re-enter foster care. There is no upper age limit on remaining in foster care or re-entering foster care during this period. The title IV-E agency, during this period, also may not determine a youth in care or one who re-enters foster care as ineligible for title IV-E foster care maintenance payments due to failure to meet the education and employment conditions. These changes are addressed in Program Instruction ACYF-CB-PI-21-04, dated March 9, 2021 and

available as follows: <https://www.acf.hhs.gov/cb/policy-guidance/pi-21-04>

Title IV-E agencies may also request ACF approval of flexibility as per the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Specifically, a request may be made to allow claiming of title IV-E reimbursement on behalf of an otherwise eligible youth up to age 19, 20 or 21 who is unable to fulfill the education or employment conditions outlined in §475(8)(B)(iv) of the Act as a direct result of the pandemic. The title IV-E agency must provide notice of the option to re-enter foster care to each youth who aged out during the COVID-19 flexibility period. (Division X, Sections 4(a), 4(b) and 4(d)(2)(D) of Pub. Law No. 116-260, 42 U.S.C. §5121 et seq. and Program Instruction ACYF-CB-PI-20-10 dated May 8, 2020).

The requirement to conduct annual AFDC redeterminations for purposes of determining continuing Title IV-E eligibility has been eliminated to ease an administrative burden. The Title IV-E agency must (for periods beginning on or after April 8, 2010) establish AFDC eligibility only at the time the child is removed from home or a voluntary placement agreement is entered (42 USC 672(a)(3)(A) and section 8.4A, Question and Answer No. 24 of the Child Welfare Policy Manual available at https://acf.hhs.gov/cwpm/public_html/programs/cb/laws_policies/laws/cwpm/policy_dsp.jsp?citID=8).

- d. Beginning October 1, 2018, a child placed with a parent residing in a licensed residential family-based treatment facility for substance abuse who meets all the Title IV-E foster care eligibility requirements except the AFDC eligibility requirements in sections 472(a)(1)(B) and (3) of the Social Security Act shall be eligible for Title IV-E foster care maintenance payments for a period of not more than 12 months. The recommendation for such placement must be specified in the child’s case plan before the placement. The treatment facility must provide, as part of the treatment for substance abuse, parenting skills training, parent education, and individual and family counseling and these services must be provided under an organizational structure and treatment framework that involves understanding, recognizing, and responding to the effects of all types of trauma and in accordance with recognized principles of a trauma-informed approach and trauma-specific interventions to address the consequences of trauma and facilitate healing. Although the treatment facility must be licensed, there is no requirement that it meet the Title IV-E licensing and background check requirements for a child care institution. Eligibility is limited for a period of not more than 12 months to foster care maintenance payments which includes such things as the cost of providing food, clothing, shelter, and daily supervision. Since a licensed residential family-based treatment facility for substance abuse is not a child care institution, the Title IV-E foster care maintenance payments may not

include the costs of administration and operation of the facility. Title IV-E agencies may claim administrative costs during the 12-month period consistent with 45 CFR 1356.60(c) for the administration of the Title IV-E program, which includes such things as case management (42 USC 672(a)(2)(C) and 672(j)).

- e. The provider, whether a foster family home or a child-care institution, must be fully licensed by the proper state or tribal foster care licensing authority responsible for licensing such homes or child care institutions. During the COVID-19 public health emergency period as declared by the Secretary of HHS, title IV-E agencies may request ACF approval of flexibility as per the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Specifically, a request may be made to allow claiming of title IV-E reimbursement on behalf of an otherwise eligible child who is placed in a foster family home that is provisionally or conditionally approved or licensed, if the declared major disaster precludes full completion of the licensing process. The title IV-E agency must complete as many of the requirements for licensure as practicable, considering local requirements related to physical/social distancing guidelines and shelter in place orders. The title IV-E agency must complete any remaining licensing requirements as soon as it is safe to do so in accordance with local and state health authorities. The title IV-E agency also must ensure that the foster family home is safe for children (42 U.S.C. §5121 et seq. and Program Instruction ACYF-CB-PI-20-10 dated May 8, 2020).

The term “child care institution” as defined in 45 CFR section 1355.20 includes a private child care institution, or a public child care institution that accommodates no more than 25 children, which is licensed by the state in which it is situated or has been approved by the agency of such state responsible for licensing or approval of institutions of this type, as meeting the standards established for such licensing, but does not include detention facilities, forestry camps, training schools, or facilities operated primarily for the purpose of detention of children who are determined to be delinquent (42 USC 671(a)(10) and 672(c)). Effective October 1, 2010, the existing statutory definition of a child care institution includes a supervised setting in which an individual who has attained 18 years of age is living independently, consistent with conditions the secretary establishes in regulations (42 USC 672(c)(2)).

- f. Beginning October 1, 2019 (or the elected delayed effective date of up to two years), limitations on Title IV-E foster care maintenance payments are applicable for new placements made in a child care institution if that facility does not meet specified setting requirements. A “specified setting”, as per Section 472(k) of the Social Security Act (Act) (42 USC 672) includes only those child care institutions as follows:

- (1) A qualified residential treatment program (QRTP) as defined in Section 472(k)(4) of the Act. (42 USC 672). During the COVID-19 public health emergency period as declared by the Secretary of HHS, title IV-E agencies may request ACF approval of flexibility as per the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Specifically, if conditions related to the COVID-19 pandemic prevent a facility from completing its accreditation or reaccreditation as a QRTP, the title IV-E agency may request flexibility to allow claiming reimbursement of title IV-E expenses on behalf of an otherwise eligible child who is placed in the QRTP only during the time the requirement is unable to be met as a result of the major disaster. The facility must meet all other statutory requirements, including that the QRTP is licensed or approved (42 U.S.C. §5121 et seq. and Program Instruction ACYF-CB-PI-20-10 dated May 8, 2020).
- (2) A setting specializing in providing prenatal, post-partum, or parenting supports for youth.
- (3) In the case of a child who has attained 18 years of age, a supervised setting in which the child is living independently.
- (4) A setting providing high-quality residential care and supportive services to children and youth who have been found to be, or are at risk of becoming, sex trafficking victims, in accordance with section 471(a)(9)(C) of the Act.

A QRTP placement must also meet additional requirements to avoid Title IV-E funding limitations as follows:

- (5) An assessment to determine the appropriateness of such placement must be completed by a “qualified individual” within 30 days after the placement as per Section 475A(c)(1) of the Act. If this deadline is not met, no foster care maintenance payments may be claimed for the duration of the placement (including those for the first two weeks of care) on behalf of the child.
- (6) A court determination on the appropriateness of this placement must be made within 60 days of the start of each such placement. If this deadline is not met, foster care maintenance payments on behalf of the child may be Title IV-E claimed for only the first 60 days of the placement.
- (7) If the required assessment determines that the placement of a child in a QRTP is not appropriate, a court disapproves such a placement under Section 475A(c)(2) of the Act, or other circumstances exist where the child is transitioning from a QRTP placement to another

setting further Title IV-E foster care maintenance payments claiming is limited, as per Section 472(k)(3)(B) of the Act, to the period necessary to transition, up to 30 days after the cited action takes place.

If the placement in a child care institution does not meet the requirements for a specified setting, Title IV-E foster care maintenance payments are limited to covering a two-week period for each placement. Payments for any continuous child care institution placements with a start date prior to the effective date for Section 472(k)(2) of Act are not time limited.

Otherwise, allowable administrative costs for an eligible child placed in a child care institution may be Title IV-E claimed for the period of such placement regardless of whether the facility meets the specified setting requirements (42 USC 672(k) and 42 USC 675A(c)).

- g. Beginning October 1, 2019 (or the elected delayed effective date of up to two years for Section 472(k) of the Act), the definition of a foster family home is revised from the one in federal regulations at 45 CFR 1355.20(a) to include only the home of an individual or family that meets requirements as follows:
- (1) Is licensed or approved by the Title IV-E agency in the state in which it is situated as a foster family home.
 - (2) Is licensed or approved by a tribal authority with respect to a foster family home on or near an Indian Reservation, or a tribal authority of a tribal Title IV-E agency with respect to a foster family home in the tribal Title IV-E agency's service area
 - (3) Meets the standards established for the licensing or approval.
 - (4) Provide care for not more than six children in foster care. This limitation may be exceeded, at the option of the Title IV-E agency as requested, for any of the reasons specified at Section 472(c)(1)(B)(i-iv) of the Act.
 - (5) The individual(s) in whose care a child has been placed in foster care reside in the home with the child and the Title IV-E agency has determined such individual(s) as being:
 - (a) Licensed or approved to be a foster parent; and
 - (b) Deemed capable of adhering to the reasonable and prudent parent standard; and
 - (c) Providing 24-hour substitute care for children placed away from their parents or other caretakers.

A foster family home may not then include “group homes, agency-operated boarding homes or other facilities licensed or approved for the purpose of providing foster care...” as previously permitted in federal regulations at 45 CFR 1355.20(a) if that facility is not the home of an individual or family where the foster parent resides (42 USC 672(c)(1)).

- h. The foster family home provider must satisfactorily have met a criminal records check, including a fingerprint-based check, with respect to prospective foster and adoptive parents (42 USC 671(a)(20)(A)). This involves a determination that such individual(s) have not committed any prohibited felonies in accordance with 42 USC 671(a)(20)(A)(i) and (ii). The requirement for a fingerprint-based check took effect on October 1, 2006, unless prior to September 30, 2005, the state had elected to opt out of the criminal records check requirement or state legislation was required to implement the fingerprint-based check, in which case a delayed implementation is permitted until the first quarter of the state’s regular legislative session following the close of the first regular session beginning after October 1, 2006. Effective October 1, 2008, a state is no longer permitted to opt out of the fingerprint-based check requirement. The opt-out provision does not impact tribes since they only became eligible to administer a Title IV-E plan on October 1, 2009.

The statutory provisions apply to all prospective foster parents who are newly licensed or approved after the Title IV-E agency’s authorized date for implementation of the fingerprint-based background check provisions. Title IV-E agencies may also require that certain other adult individuals living in the home be subject to a criminal records check. The completion or lack of completion of criminal records checks for persons other than prospective foster parents does not, however, impact Title IV-E eligibility (42 USC 671(a)(20)(B); Pub. L. No. 109-248, Section 152(c)(2); 45 CFR sections 1356.30(b) and (c); and the Child Welfare Policy Manual section 8.4F Q/A#4 available at https://acf.hhs.gov/cwpm/public_html/programs/cb/laws_policies/laws/cwpm/policy_dsp.jsp?citID=62). During the COVID-19 public health emergency period as declared by the Secretary of HHS, title IV-E agencies may request ACF approval of flexibility as per the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Specifically, in situations where only name-based criminal record checks were completed for prospective foster parents, the title IV-E agency may request flexibility to complete the fingerprint-based checks of national crime information databases (NCID) by as soon as it can safely do so (42 U.S.C. §5121 et seq. and Dear Colleague Letter dated April 15, 2020). <https://www.acf.hhs.gov/cb/policy-guidance/guidance-regarding-fingerprint-and-caseworker-visit-requirements-during-covid-19>

- i. A Title IV-E agency must check, or request a check of, a state-maintained child abuse and neglect registry in each state the prospective foster and

adoptive parents and any other adult(s) living in the home have resided in the preceding five years before the state can license or approve a prospective foster or adoptive parent. This requirement became effective on October 1, 2006, unless the state requires legislation to implement the requirement, in which case a delayed implementation is permitted until the first quarter of the state's regular legislative session following the close of the first regular session beginning after October 1, 2006. The requirement applies to foster care maintenance payments for calendar quarters beginning on or after that date. Tribes first became eligible to administer a Title IV-E plan effective October 1, 2009, and must, therefore, comply with this requirement (42 USC 671(a)(20)(B); Pub. L. No. 109-248, Section 152(c)(2) and (3)).

- j. The licensing file for the child-care institution must contain documentation that verifies that safety considerations with respect to staff of the institution have been addressed (45 CFR section 1356.30(f)). Effective October 1, 2018, unless a legislative delay is approved, the safety considerations in the child-care institution licensing file must consist of proof that criminal background checks, including fingerprint-based criminal records checks of national crime information databases (as defined in section 534(f)(3)(A) of Title 28, United States Code) and child abuse and neglect registry checks for all adults working at the child-care institution were conducted. Title IV-E agencies may use alternative procedures to conduct these criminal records and child abuse registry checks. However, if the agency elects to use an alternate procedure, such procedures must still provide for conducting both checks on every adult working in the institution and the agency must describe in its approved Title IV-E Plan why alternative procedures for conducting the checks are appropriate for the agency (42 USC 671(a)(20)(D)). During the COVID-19 public health emergency period as declared by the Secretary of HHS, title IV-E agencies may request ACF approval of flexibility as per the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Specifically, in situations where only name-based criminal record checks were completed, the title IV-E agency may request flexibility to complete the fingerprint-based checks of NCID for adults working in a child care institution as soon as it can safely do so (42 U.S.C. §5121 et seq. and Dear Child Colleague Letter dated April 15, 2020). <https://www.acf.hhs.gov/cb/policy-guidance/guidance-regarding-fingerprint-and-caseworker-visit-requirements-during-covid-19>
- k. Foster care administrative costs for the provision of child-placement services generally are allowable only when performed on behalf of a foster child that is eligible to receive Title IV-E foster care maintenance payments (42 USC 674(a)(3)(E) and 45 CFR section 1356.60). The following exceptions apply:

- (1) Activities specifically associated with the determination or redetermination of Title IV-E eligibility are allowable regardless of the outcome of the eligibility determination (DAB Decision No. 844).
- (2) Otherwise allowable activities performed on behalf of Title IV-E eligible foster children placed in unallowable facilities and unlicensed relative homes can be allowable under limited circumstances as follows:
 - (a) For the lesser of 12 months or the average length of time it takes the state or tribe to issue a license or approval of the home when the child, otherwise Title IV-E eligible, is placed in the home of a relative who has an application pending for a foster family home license or approval (42 USC 672(i)(1)(A)).
 - (b) For not more than one calendar month for an otherwise Title IV-E eligible child transitioning from an unlicensed or unapproved facility to a licensed or approved foster family home or child care institution (42 USC 672(i)(1)(B)).
- (3) In the case of any other child not in foster care who is potentially eligible for benefits under a Title IV-E plan approved under this part and at imminent risk of removal from the home, only if—
 - (a) Reasonable efforts are being made in accordance with 42 USC 671(a)(15) to prevent the need for, or if, necessary to pursue, removal of the child from the home.
 - (b) The Title IV-E agency has made, not less often than every six months, a determination (or redetermination) as to whether the child remains at imminent risk of removal from the home (42 USC 672(i)(2)).
 - (c) Pre-placement administrative costs may be paid on behalf of a child determined to be a candidate for foster care only if all of the following requirements are met:
 - (i) A child who is a potentially Title IV-E eligible child is at imminent risk of removal from the home and the Title IV-E agency is either pursuing the removal of the child from the home or providing reasonable efforts to prevent the removal in accordance with Section 471(a)(15) of the Social Security Act (42 USC 672(i)(2)(A)).

- (ii) No earlier than the month in which the Title IV-E agency has made and documented a determination that the child is a candidate for foster care as evidenced by at least one of the following (section 8.1D, Question and Answer No. 2 of the Child Welfare Policy Manual):
 - (A) A defined case plan, which clearly indicates that absent effective preventive services, foster care is the planned arrangement for the child.
 - (B) An eligibility determination form which has been completed to establish the child's eligibility under Title IV-E. Eligibility forms used to document a child's candidacy for foster care should include evidence that the child is at serious risk of removal from home.
 - (C) Evidence of court proceedings in relation to the removal of the child from the home, in the form of a petition to the court, a court order, or a transcript of the court's proceedings. These proceedings include those where the Title IV-E agency is required to obtain a judicial determination sanctioning or approving such an attempt to prevent removal with respect to reasonable efforts or initiates efforts to obtain the judicial determinations related to the removal of a child from home.
- (iii) The Title IV-E agency determines that the planned out-of-home placement for the child will be a foster care setting (section 8.1D, Question and Answer No. 11 of the Child Welfare Policy Manual).
- (iv) In order to claim child specific candidate administrative costs, the Title IV-E agency may either (section 8.1C, Question and Answer No. 3 of the Child Welfare Policy Manual):
 - (A) individually determine those children who are Title IV-E foster care candidates and claim 100 percent of the child specific

allowable administrative costs incurred on behalf of these children, or

- (B) allocate costs to benefiting programs considering a determination both of candidacy for foster care and of potential Title IV-E eligibility; using a Title IV-E foster care participation rate is one acceptable means of allocation.

- (v) The Title IV-E agency re-determines at least every six months that the child remains at imminent risk of removal from the home. If the Title IV-E agency does not make this determination at the six-month point, it must cease claiming administrative costs on behalf of the child (42 USC 672(i)(2)(B) and section 8.1D, Question and Answer No. 5 of the Child Welfare Policy Manual).

- (vi) Candidate administration on behalf of eligible children is limited to any allowable Title IV-E administrative cost that comports with or is closely related to one of the listed activities at 45 CFR section 1356.60(c)(2). The costs of investigations, physical or mental examinations or evaluations and services related to the prevention of placement are not foster care administrative costs and are therefore not reimbursable (section 8.1B, Question and Answer No. 1 of the Child Welfare Policy Manual).

- 2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

- 3. Eligibility for Subrecipients

Not Applicable

L. Reporting

- 1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable

- c. *SF-425, Federal Financial Report* – Not Applicable

- d. *CB-496, Title IV-E Programs Quarterly Financial Report (OMB No. 0970-0510)* – Title IV-E agencies report current expenditures and information on children assisted for the quarter that has just ended and estimates of expenditures and children to be assisted for the next quarter. Prior quarter adjustment (increasing and decreasing) expenditures applicable to earlier quarters must also be separately reported on this form.

Key Line Items – The following line items contain critical information:

1. *Part 1, Expenditures, Estimates and Caseload Data*, columns (A) through (D) (sections A and E (Foster Care Program))
 2. *Part 2, Prior Quarter Expenditure Adjustments – Foster Care*, columns (A) through (E)
 3. *Part 3, Foster Care, Adoption Assistance and Guardianship Demonstration Projects, Foster Care Post-Demonstration Costs and Funding Certainty Grant Calculations*, columns (A) through (F)
2. Performance Reporting
Not Applicable
 3. Special Reporting
Not Applicable
 4. Special Reporting for Federal Funding Accountability and Transparency Act
See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Payment Rate Setting and Application

Compliance Requirements Title IV-E agencies establish payment rates for maintenance payments (e.g., payments to foster parents, child care institutions or directly to youth). Payment rates may also be established for Title IV-E administrative expenditures (e.g., payments to child placement agencies or other contractors, which may be either subrecipients or vendors) and for other services. Payment rates must provide for proper allocation of costs between foster care maintenance payments, administrative expenditures, and other services in conformance with the cost principles. The Title IV-E agency's plan approved by ACF must provide for periodic review of payment rates for foster care maintenance payments at reasonable, specific, time-limited periods established by the Title IV-E agency to ensure the rate's continuing appropriateness for the administration of the Title IV-E program (42 USC 671(a)(11); 45 CFR section 1356.21(m)(1); 45 CFR section 1356.60(a)(1) and (c)).

Audit Objectives Determine whether (1) the Title IV-E agency reviewed foster care maintenance payment rates for continued appropriateness in accordance with its established periodicity schedule; (2) the Title IV-E agency established foster care maintenance and administrative expenditure payment rates which provide only for costs which are necessary for the proper and efficient administration of the program and which are for allowable costs (i.e., reasonable, allowable, and properly allocated in compliance with the applicable cost principles and program requirements); and (3) charges to the program were based upon the established payment rates properly applied and the charges to the program were properly classified as foster care maintenance payments or administrative expenditures.

Suggested Audit Procedures

- a. Identify the Title IV-E agency's schedule for the required periodic review to determine the continued appropriateness of amounts paid as foster care maintenance payments and ascertain if the current foster care maintenance payment rates were last reviewed and adjusted in accordance with the Title IV-E agency established schedule.
 - b. Review the Title IV-E agency's policies and procedures for establishing foster care maintenance and administrative expenditure payment rates to ascertain if these policies and procedures will properly determine that the costs charged to the program based upon these payment rates will be allowable.
 - c. Test a sample of Title IV-E foster care maintenance and administrative expenditure payment rates to ascertain if the rates have been properly calculated in accordance with the Title IV-E agency's policies and procedures to ensure only allowable costs are charged to the program.
 - d. Test a sample of Title IV-E foster care rate-based maintenance payments to ascertain if they were based upon the established payment rates per the Title IV-E agency's rate schedule and that these rates were properly applied to ensure that only costs allowable as maintenance payments were charged to the program.
 - e. Test a sample of Title IV-E foster care rate based administrative expenditures to ascertain if they were based upon the established payment rates per the Title IV-E agency's rate schedule and that these rates were properly applied to ensure that only costs allowable as administrative expenditures were charged to the program.
2. Former Operation of a Foster Care Demonstration Project (Applicable Only for Title IV-E Agencies with ACF Approval to Operate a Foster Care Demonstration Project)

Compliance Requirements Those Title IV-E agencies that receive approval to operate a foster care demonstration project for a specified period of time must do so in accordance with ACF-approved terms and conditions that define the operational parameters and the waivers granted. The funding for operation of such a project is subject to a cost neutrality limit that is calculated either through an experimental design (involving experimental

group cases and either a control or matched comparison group process) or an established capped allocation table for identified populations (including agency-wide) in specific funding categories.

All Title IV-E agencies that operate a foster care demonstration project are also simultaneously continuing to operate the traditional (non-demonstration) foster care program for some portion of the agency's service population and/or funding. Operation of a foster care demonstration project, therefore, includes both the continuation of assistance payments and, where applicable, administration or training under the existing approved Title IV-E Plan and provision of project interventions or other waiver-based services for an identified population. Demonstration project operational costs, to the extent that they provide payments, administration or training that is allowable for traditional Title IV-E foster care funding, must be in compliance with all applicable Title IV-E requirements (unless waived) and are subject to separate identification as part of financial reporting. Funding is also available, subject to separate ACF approvals, for the costs of demonstration project developmental and evaluation costs.

Audit Objectives Determine for those Title IV-E agencies with an approved operational foster care demonstration project whether (1) the Title IV-E agency properly tracked and classified those costs consisting of demonstration project operational, developmental, or evaluation costs; (2) the Title IV-E agency separately identified those project operational costs that are reportable as Title IV-E allowable costs (without a waiver) from other project operational costs; (3) the Title IV-E agency properly identified the applicable project operational cost neutrality limits and cumulative project operational costs for each relevant funding category; and (4) the Title IV-E agency properly tracked and classified those costs consisting of Title IV-E foster care (non-demonstration) costs.

Suggested Audit Procedures

- a. Determine whether a Title IV-E agency is operating a foster care demonstration project and, if so, review the applicable terms and conditions as approved by ACF.
- b. Review the Title IV-E agency's cost tracking procedures for segregating costs properly classified as a component of the approved foster care demonstration project as developmental costs, evaluation costs, or operational costs.
- c. Test a sample of Title IV-E claims (current quarter and any prior quarter adjustments) reported on Form CB-496 Part 3 designated as foster care demonstration project developmental or evaluation costs to determine that the claims are properly classified and reported and that they comply with applicable approvals.
- d. Test a sample of Title IV-E claims (current quarter and any prior quarter adjustments) reported on Form CB-496 Part 3 designated as foster care demonstration project operational costs in each of the funding categories reported to determine that the claims are properly classified as project operational costs

based on (1) the funding category is within the scope of the project’s operational costs, (2) the type of cost, (3) the population served, and (4) the applicable period.

- e. Test a sample of Title IV-E claims (current quarter and any prior quarter adjustments) reported on Form CB-496 Part 3 designated as foster care demonstration project operational costs in each of the funding categories reported to determine that the claims are properly reported as either “Title IV-E Operations” costs (i.e., Title IV-E allowable without the approved demonstration project) or as “Project Intervention and Other Waiver Based Expenditures” (i.e., Title IV-E allowable only with the approved demonstration project).
 - f. Review the Title IV-E agency’s Form CB-496 Part 3 reported “Cumulative Cost Neutrality Limit” (for the current quarter and the next quarter estimate) in applicable funding categories to ensure that it is consistent with a calculation through the applicable period as designated in the demonstration project’s approved terms and conditions or, if applicable, an ACF approved quarterly payment schedule.
 - g. Review the Title IV-E agency’s Form CB-496 Part 3 reported “Currently Reported and Cumulatively Funded Operational Costs” (for the current quarter and the next quarter estimate) in applicable funding categories to ensure that it is consistent with a calculation through the applicable period based on any such claims submitted on reports for previous periods.
 - h. Test a sample of Title IV-E claims (current quarter and any prior quarter adjustments) reported on Form CB-496 Part 1 as foster care (non-demonstration) costs in each of the funding categories identified in the project’s approved terms and conditions as included within project operational costs to determine that the claims are properly classified as outside of project operational costs based on (1) specific exclusions contained in the project’s approved terms and conditions, (2) the type of cost, (3) the population served, and (4) the applicable period.
3. Post-Demonstration Costs (Applicable Only for Title IV-E Agencies with ACF Approval to Operate a Foster Care Demonstration Project Which Was Operational Through September 30, 2019)

Compliance Requirements Those Title IV-E agencies that were formerly approved to operate a foster care waiver demonstration project under section 1130 of the Social Security Act (Act) (42 USC 1320a-9) and operated such a project through September 30, 2019 may elect to separately report specified costs for applicable periods in FFYs 2020 and 2021 to be considered for a Funding Certainty Grant for each of these FFYs as per section 602(c)(2)(A) of Public Law (P.L.) No. 116-94 (the Family First Transition Act) (42 USC 1320a-9 (g)). If so, the former waiver demonstration project agency must separately report all title IV-E foster care quarterly expenditures and/or estimates for applicable periods in FFYs 2020 and 2021 (i.e. the two FFYs after the demonstration project operational period ended) that are classifiable as post-demonstration costs in Part 3, section E of Form CB-496 in accordance with specified reporting form instructions. A

Funding Certainty Grant is payable only if, and to the extent, that the reported total federal share post-demonstration cost claims for all applicable periods in each of the two FFYs (assessed separately for each FFY) is lower than the established Annual Funding Certainty Level for the involved Title IV-E agency.

The costs to be reported as “post demonstration costs” are for performance of activities that would have been classified as within project operations chargeable or allocable to a former title IV-E foster care demonstration project which was operational on September 30, 2019 in accordance with Section 1130 of the Act (42 USC 1320a-9) and with the approved terms and conditions for that project. All post-demonstration costs must be title IV-E allowable without consideration of any waivers that were formerly in effect as per the terms and conditions (in effect on August 30, 2019) of a demonstration project.

If post-demonstration cost reporting is elected, such costs must be fully reported in applicable funding categories for all applicable periods in FFYs 2020 and 2021. This includes current quarter claims and any prior quarter adjustment claims made within two years of the last day of the fiscal quarter in which the expenditure was made. Therefore, the last available reporting period for post-demonstration costs for the fourth quarter of FFY 2021 applicable period will be on the CB-496 report for the quarter ending June 30, 2023. Although that report will be due on July 30, 2023, a revision may be submitted as late as September 30, 2023 (two years after the end of the last quarter considered for Funding Certainty Grant purposes).

Audit Objectives Determine for those Title IV-E agencies that qualify for and elect to report post-demonstration costs whether (1)) the Title IV-E agency properly tracked and classified those costs in all applicable funding categories consisting of post-demonstration costs; (2) the Title IV-E agency did not report the same program costs as both regular program and post-demonstration costs; (3) all reported post-demonstration costs consist of Title IV-E allowable costs (without a waiver); (3) the Title IV-E agency properly reported post-demonstration costs based on the FFY of the applicable period when the expenditure was made (either FFY 2020 or FFY 2021); and (4) the Title IV-E agency properly tracked and classified those FFY 2020 and FFY 2021 Title IV-E foster care program expenditures not reportable as post-demonstration costs.

Suggested Audit Procedures

- a. Determine whether a Title IV-E agency that formerly operated a foster care demonstration project as of September 30, 2019 is, or is not, reporting title IV-E foster care claims post-demonstration cost for FFYs 2020 and 2021 applicable periods. If not, determine if this is based on its election not to seek a Funding Certainty Grant for or one or both of these FFYs. If post-demonstration cost claims are being reported, review the applicable terms and conditions of the title IV-E agency’s demonstration project that were in effect on August 30, 2019 as approved by ACF.

- b. Review the Title IV- E agency’s cost tracking procedures for identifying those funding categories and segregating costs properly classified as post-demonstration costs.
- c. Compare total quarterly Title IV-E claims (current quarter and any prior quarter adjustments for that applicable period) reported on Form CB-496 Part 3, Section E as foster care post-demonstration costs for FFY 2020 and FFY 2021 in each of the funding categories to determine whether there is any indication that a significant portion of such claims were not reported for one or more quarters. If so, identify whether underreporting has occurred and, that the title IV-E agency has controls in place to report any such omitted claims within the permitted two-year period for that quarter.
- d. Test a sample of Title IV-E claims (current quarter and any prior quarter adjustments) reported on Form CB-496 Part 3, Section E designated as foster care post-demonstration costs in each of the funding categories reported to determine that the claims are properly classified as post-demonstration costs for either FFY 2020 or FFY 2021 based on (1) the funding category is within the scope of the former project’s title IV-E allowable operational costs, (2) the type of cost, (3) the population served, and (4) the applicable period.
- e. Test a sample of Title IV-E claims for applicable periods in FFY 2020 and FFY 2021 (current quarter and any prior quarter adjustments) reported on Form CB-496 Part 1 as foster care (non-demonstration related) costs in each of the funding categories identified in the former demonstration project’s approved terms and conditions (as of August 31, 2019) as included within project operational costs to determine that the claims are properly classified as outside of the scope of post-demonstration costs based on (1) specific exclusions contained in the former project’s approved terms and conditions, (2) the type of cost, (3) the population served, and (4) the applicable period. A further assessment should be made to assure that the claim was not duplicative of an amount reported on Form CB-496 Part 3 in section E as post-demonstration costs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.659 ADOPTION ASSISTANCE—TITLE IV-E

I. PROGRAM OBJECTIVES

The objective of the Adoption Assistance program is to facilitate the placement of children with special needs in permanent adoptive homes and thus prevent long, inappropriate stays in foster care.

II. PROGRAM PROCEDURES

A. Overview

The Adoption Assistance program is administered at the federal level by the Children's Bureau, Administration on Children, Youth and Families, Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS). The Adoption Assistance program provides federal matching funds to Title IV-E agencies with approved Title IV-E plans that provide ongoing subsidy and/or non-recurring payments to parents who adopt eligible children with special needs and enter into an adoption assistance agreement.

Funding is provided to the 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. Federally recognized Indian tribes, Indian tribal organizations and tribal consortia may also apply for Title IV-E funding via the submission of a Title IV-E plan. Funding is based on an approved Title IV-E plan and amendments, as required by changes in statutes, rules, and regulations, submitted to and approved by the ACF Children's Bureau Associate Commissioner. The Adoption Assistance program is an open-ended entitlement program. Federal financial participation in state or tribal expenditures for adoption assistance agreements is provided at the Medicaid match rate for medical assistance payments, which varies among states and tribes. Monthly payments to families made on behalf of eligible adopted children also vary from Title IV-E agency to Title IV-E agency. Federal financial participation (FFP) is made at an open-ended 50 percent match rate for administrative expenditures and at an open-ended 75 percent for most categories of state/tribal Title IV-E training expenditures. In addition, the program authorizes federal matching funds for Title IV-E agencies that reimburse the non-recurring adoption expenses of adoptive parents of special needs children (regardless of AFDC or SSI eligibility) as administrative expenditures at an open-ended 50 percent FFP rate.

The designated Title IV-E agency for this program also administers ACF funding provided for other Social Security Act programs (e.g., Foster Care (Assistance Listing 93.658), Guardianship Assistance (Assistance Listing 93.090) at agency option and John H. Chafee Foster Care Program for Successful Transition to Adulthood (Assistance Listing 93.674) programs (Title IV-E of the Social Security Act); Child Welfare Services (Assistance Listing 93.645) and Promoting Safe and Stable Families (Assistance Listing 93.556) programs (Title IV-B of the Social Security Act, as amended) (Assistance Listing 93.556 funds available to states and those tribes qualifying for at least a minimum grant

of \$10,000); and the Social Services Block Grant program (Assistance Listing 93.667) (Title XX of the Social Security Act, as amended) (states only). The Title IV-E agency may either directly administer the Adoption Assistance program or supervise its administration by local level agencies. Where the program is administered by a state, in accordance with the approved Title IV-E plan, it must be in effect in all political subdivisions of the state, and, if administered by them, program requirements must be mandatory upon them. Where the program is administered by a tribe, it must be in effect in all political subdivisions within the tribal service area(s) and for all populations to be served under the plan. If the program is administered by a political subdivision of a tribe, program requirements must be mandatory upon them.

Depending on the circumstances, the child may also need to meet the eligibility requirements of the Aid to Families with Dependent Children (AFDC) program (i.e., meet the state-established standard of need as of July 16, 1996, prior to enactment of the Personal Responsibility and Work Opportunity Reconciliation Act [PRWORA]) or the Supplemental Security Income (SSI) program. In cases where program eligibility requires an assessment of SSI program eligibility, the child will need to meet either all criteria or for an applicable child [defined in III.E.1.a.(1)(a), Eligibility for Individuals, of this program supplement] only the medical and disability criteria. Tribes must use the Title IV-A state plan (as in effect as of July 16, 1996) of the state in which the child resided at the time of removal in determining the child's AFDC eligibility.

An adoption assistance agreement is a written agreement between the prospective adoptive parents, the Title IV-E agency, and other relevant agencies (such as a private adoption agency) specifying the nature and amount of assistance to be given on a monthly basis to parents who adopt eligible special needs children. A child with special needs is defined as a child who the Title IV-E agency has determined cannot or should not be returned home; has a specific factor or condition, as defined by the state or tribe, because of which it is reasonable to conclude that the child cannot be adopted without financial or medical assistance; and for whom a reasonable effort has been made to place the child without providing financial or medical assistance.

B. Other

Adoption Savings

Title IV-E agencies are required to enter into an adoption assistance agreement with the prospective adoptive parents of any child who meets specified criteria by applying differing, and less restrictive, program eligibility criteria (specified in III.E.1.a.(1)(a) and (c), "Eligibility - Eligibility for Individuals," of this program supplement). This results in some number of children who, under previously applied program eligibility criteria, would not have been determined as Title IV-E eligible, but who will now be determined as Title IV-E eligible for adoption assistance. Each Title IV-E agency is required to calculate and spend an amount equal to any savings in Title IV-E agency expenditures as a result of applying the differing program eligibility criteria for a FFY for services permitted under Title IV-B or IV-E. These non-federal funds are a component of this program and are hereafter referred to as "adoption savings."

Beginning in FFY 2015, each Title IV-E agency is required to annually calculate and report on adoption savings. The calculation must be in accordance with procedures established by the Children's Bureau. The report must identify the methodology used to calculate the savings, how savings are spent, and on what services.

Source of Governing Requirements

The Adoption Assistance program is authorized by Title IV-E of the Social Security Act, as amended (42 USC 670 *et seq.*). This includes those amendments made by the Preventing Sex Trafficking and Strengthening Families Act (Pub. L. No. 113-183) and the Family First Prevention Services Act (Pub. L. No. 115-123). Implementing regulations are published at 45 CFR parts 1355 and 1356.

States and tribes are required to adopt and adhere to their own statutes and regulations for program implementation, consistent with the requirements of Title IV-E and the approved Title IV-E Plan.

The regulations at 45 CFR part 75 specifying uniform administrative requirements, cost principles, and audit requirements for HHS awards are applicable to the Adoption Assistance program. However, in accordance with 45 CFR sections 75.101(e)(1)(iii) and 75.101(e)(2), except for 45 CFR section 75.202, the guidance in subpart C of 45 CFR part 75 does not apply.

Availability of Other Program Information

The Children's Bureau manages a policy issuance system that provides further clarification of the law and guides states and tribes in implementing the Adoption Assistance program. This information may be accessed at <https://www.acf.hhs.gov/cb/laws-policies>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment/Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement Suspension & Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	Y	N	N	N	Y	N	N

A. Activities Allowed or Unallowed

1. *Adoption Assistance Subsidies*

Funds may be expended for adoption assistance subsidy payments made on behalf of eligible children (see III.E.1, “Eligibility – Eligibility for Individuals”), in accordance with a written and binding adoption assistance agreement. Subsidy payments are made to adoptive parents based on the need(s) of the child (i.e., developmental, cognitive, emotional behavioral) and the circumstances of the adopting parents (42 USC 673(a)(2)). Subsidy payment amounts cannot be based on any income eligibility requirements of the prospective adoptive parents (45 CFR section 1356.41(c)). Adoption assistance subsidy payments cannot exceed the foster care maintenance payment (in accordance with the Title IV- E agency’s rate schedule) the child would have received in a foster family home; however, the amount of the subsidy payments may be up to 100 percent of that foster care maintenance payment rate (42 USC 673(a)(3)).

2. *Administrative Costs*

- a. Program Administration – Funds may be expended for costs directly related to the administration of the program. Approved public assistance cost allocation plans (states) or approved cost allocation methodologies (tribes) will identify which costs are allocated and claimed under this program (45 CFR section 1356.60(c)).
- b. Nonrecurring Costs – Funds may be expended by a Title IV-E agency under an adoption assistance agreement for nonrecurring expenses up to \$2,000 (gross amount), for any adoptive placement (45 CFR section 1356.41(f)(1)). Nonrecurring adoption expenses are defined as reasonable and necessary adoption fees, court costs, attorney fees and other expenses that are directly related to the legal adoption of a child with special needs. Other expenses may include those costs of adoption incurred by or on behalf of the adoptive parents, such as, the adoptive home study, health and psychological examination, supervision of the placement prior to

adoption, transportation and the reasonable costs of lodging and food for the child and/or the adoptive parents when necessary to complete the placement or adoptions process (45 CFR section 1356.41(i)).

- c. Adoption Placement Costs – Funds expended by the Title IV-E agency for adoption placements (including nonrecurring costs) are considered an administrative expenditure and are subject to the matching requirements in III.G.1.e, “Matching, Level of Effort, Earmarking – Matching” (45 CFR section 1356.41(f)(1)).

3. *Training*

- a. Funds may be expended for short-term training of current or prospective adoptive parents and members of the staff of state/tribe-licensed or state/tribe-approved child care institutions (including travel and per diem) at the initiation of or during their period of care (42 USC 674(a)(3)(B) and 45 CFR section 1356.60(b)(1)(ii)).
- b. Funds may be expended for short-term training of (1) relative guardians; (2) state/tribe-licensed or state/tribe-approved child welfare agencies providing services to children receiving Title IV-E assistance; (3) child abuse and neglect court personnel; (4) agency, child or parent attorneys; (5) guardians ad litem; and (6) court appointed special advocates (42 USC 674(a)(3)(B)).
- c. Funds may be expended for training (including both short- and long-term training at educational institutions through grants to such institutions or by direct financial assistance to students enrolled in such institutions) of personnel employed or preparing for employment by the agency administering the plan (42 USC 674(a)(3)(A)).

4. *Demonstration Projects*

Under Section 1130 of the Social Security Act, Title IV-E agencies may be granted authority to operate a demonstration project as set forth in ACF-approved terms and conditions. Any such terms and conditions applicable to the program identify the specific provisions of the Social Security Act that are waived, the additional activities that are deemed as allowable, and the scope and duration (which may not exceed a maximum of 5 total years unless specifically approved for further continuation) of the demonstration project. The demonstration project must remain cost neutral to the federal government, as provided for in a methodology contained in the approved project terms and conditions involving either a matched comparison group or a capped allocation. All approved demonstration projects were required to end no later than September 30, 2019 (42 USC 1320a–9 and Section 201 of Pub. L. No. 112-34).

B. Allowable Costs/Cost Principles

Both states and tribes are subject to the requirements of OMB cost principles in 2 CFR part 200, subpart E, as implemented by HHS at 45 CFR part 75. States also are subject to the cost allocation provisions and rules governing allowable costs of equipment of 45 CFR part 95 (45 CFR sections 1355.57, 95.503, and 95.705).

E. Eligibility**1. Eligibility for Individuals**

- a. Adoption assistance subsidy payments may be paid on behalf of a child only if all the following requirements are met:

- (1) Categorical Eligibility

- (a) Applicable and Non-Applicable Children – An applicable child is a child for whom an adoption assistance agreement was entered into in fiscal year (FY) 2010 or later and who meets the applicable age requirement (differs over a multi-fiscal year phase-in period beginning in FY 2010), or a child who has been in foster care under the responsibility of the Title IV-E agency for at least 60 consecutive months, or a sibling to either such child if both are to have the same adoption placement (42 USC 673(e)(2) and (e)(3)). The applicable age requirement is met only if the child has attained that age any time before the end of the federal fiscal year during which the adoption assistance agreement is entered into. The applicable age for FY 2010 agreements includes children who will turn age 16 or older in that FY. In subsequent FYs through FY 2017, the age to apply the revised “applicable child” program rules decreases by two years. The applicable age for agreements entered into in FY 2018 through FY 2024 is dependent on the date of the agreement. For agreements entered into in FY 2018 between October 1 and December 31, 2017, children of any age may be eligible according to the revised criteria in FY 2018. However, for agreements entered into between January 1, 2018 and June 30, 2024, only those children who turn 2 or older in the FY the agreement is entered into may be eligible according to the revised criteria. As of July 1, 2024, a child of any age covered by a newly entered into agreement will meet the applicable child definition (see applicable age table below) (42 USC 673(e)(1)(B)).

Applicable Age Table – Based on Date Adoption Assistance Agreement is Entered Into

In the case of fiscal year:	The applicable age is:
2010	16
2011	14
2012	12
2013	10
2014	8
2015	6
2016	4
2017	2
2018 (through December 31, 2017)	Any age
2019 to 2023	2
2024 (through June 30, 2024)	2
2024 (July 1, 2024 or later)	Any age
2025 (or fiscal years thereafter)	Any age

A child who is referred to as “not an applicable child” is one for whom an adoption assistance agreement was entered into in FY 2009 or earlier or in a later FY if the applicable child requirements pertinent to the FY in which the adoption assistance agreement was entered into are not satisfied. In this instance, the revised “applicable child” eligibility criteria do not apply and the eligibility requirements in place prior to October 1, 2009, apply (42 USC 673(a)(2)(A)(i)).

- (b) Adoption agreements entered into prior to the beginning of FY 2010, or agreements entered into during FY 2010 or *thereafter for a “non-applicable child”* – The child is categorically eligible if:
- (i) the child was eligible, or would have been eligible, for the former AFDC program (i.e., met the state-established standard of need as of July 16, 1996, prior to enactment of the PRWORA (tribes must use the Title IV-A state plan in effect as of July 16, 1996 of the state in which the child resided at the time of removal in determining the child’s AFDC eligibility (42 USC 679c(c)(1)(C)(ii)(II))) except for his/her removal from the home of a relative pursuant to either a voluntary placement agreement or as a result of a judicial determination to the effect that continuation in the home of removal would have been contrary to the welfare of the child; or

- (ii) the child is eligible for SSI; or
 - (iii) the child is a child whose costs in a foster family home or childcare institution are covered by the foster care maintenance payments being made with respect to his/her minor parent (42 USC 673(a)(2)(A)(i)(I)).
- (c) Adoption agreements entered into during FY 2010 or *thereafter for an “applicable child”* – The child is categorically eligible if the child:
 - (i) at the time of the initiation of adoption proceedings, was in the care of a public or private child placement agency by way of a voluntary placement, voluntary relinquishment or a court-ordered removal with a judicial determination that remaining at home would be contrary to the child’s welfare; or
 - (ii) meets the disability or medical requirements of the SSI program; or
 - (iii) was residing with a minor parent in foster care (who was placed in foster care by way of a voluntary placement, voluntary relinquishment, or court-ordered removal); or
 - (iv) was eligible for adoption assistance in a previous adoption in which the adoptive parents have died or had their parental rights terminated (42 USC 673(a)(2)(A)(ii)(I) and 673(a)(2)(C)(ii)); and
 - (v) does not fit within the following prohibited class for the payment of an adoption assistance payment (including payments of non-recurring expenses under 42 USC 673(a)(1)(B)(i)), i.e., an “applicable child” who is not a citizen or resident of the U.S. and was either adopted outside the U.S. or brought to the U.S. for the purpose of being adopted (42 USC 673(a)(7) as added by Pub. L. No. 110-351).
- (2) The following additional eligibility provisions must be met in addition to the establishment of categorical eligibility:
 - (a) The child was determined by the Title IV-E agency as someone who cannot or should not be returned to the home of his or her parents (42 USC 673(c)(1));

- (b) The child was determined by the Title IV-E agency to be a child with special needs. Special needs means that there is a specific factor or condition (such as ethnic background, age, or membership in a minority or sibling group, or the presence of factors such as medical conditions or physical, mental, or emotional handicaps) because of which it is reasonable to conclude that the child cannot be placed with adoptive parents without providing adoption assistance under Title IV-E and medical assistance under Title XIX. In the case of an applicable child, the child is also considered to have special needs if that applicable child meets all of the medical or disability requirements for SSI and the Title IV-E agency determines that it is reasonable to conclude that the child cannot be placed with adoptive parents without providing adoption assistance under Title IV-E and medical assistance under Title XIX. The criteria for the factor or condition element of the special needs determination will be met if an applicable child meets all the medical or disability requirements for SSI (42 USC 673(c)(1)(B) and 673(c)(2)(B), as amended/added by Pub. L. No. 110-351).
- (c) The Title IV-E agency has made reasonable efforts to place the child for adoption without a subsidy. The only exception to this requirement is where it would be against the best interests of the child because of such factors as the existence of significant emotional ties with prospective adoptive parents while in the care of the parents as a foster child (42 USC 673(c)(1)(B) and 673(c)(2) as amended/added by Pub. L. No. 110-351).
- (d) The agreement for the subsidy was signed and was in effect before the final decree of adoption and contains information concerning the nature of services; the amount and duration of the subsidy; the child's eligibility for Title XX services and Title XIX Medicaid; and covers the child should he/she move out of state with the adoptive family (42 USC 675(3)).
- (e) The prospective adoptive parent(s) must satisfactorily have met a criminal records check, including a fingerprint-based check (42 USC 671(a)(20)(A)). This involves a determination that such individual(s) have not committed any prohibited felonies in accordance with 42 USC 671(a)(20)(A)(i) and (ii). The requirement for a fingerprint-based check took effect on October 1, 2006, unless prior to September 30, 2005, the state has elected to

opt out of the criminal records check requirement or state legislation was required to implement the fingerprint-based check, in which case a delayed implementation is permitted until the first quarter of the state's regular legislative session following the close of the first regular session beginning after October 1, 2006. The requirement applies to adoption assistance payments for calendar quarters beginning on or after the state's effective date for implementation (Pub. L. No. 109-248, Section 152(c)(1) and (3)). States that opted out of the criminal records check requirement at Section 471(a)(20) of the Social Security Act prior to September 30, 2005 had until October 1, 2008 to implement the fingerprint-based check requirement. Effective October 1, 2008, a state is no longer permitted to opt out of the fingerprint-based check requirement. The opt-out provision does not impact tribes since they only became eligible to administer a Title IV-E plan on October 1, 2009.

The statutory provisions apply to all prospective adoptive parents who are newly approved after the Title IV-E agency's authorized date for implementation of the fingerprint-based background check provisions. Title IV-E agencies may also require that certain other adult individuals living in the adoptive home be subject to a criminal records check. The completion or lack of completion of criminal records checks for persons other than prospective adoptive parents does not, however, impact Title IV-E eligibility (42 USC 671(a)(20)(B); Pub. L. No. 109-248, Section 152(c)(2); 45 CFR sections 1356.30(b) and (c); and the Child Welfare Policy Manual section 8.4F Q/A#4).

- (f) The prospective adoptive parent(s) and any other adult living in the home who has resided in the provider home in the preceding five years must satisfactorily have met a child abuse and neglect registry check. This requirement became effective on October 1, 2006, unless the state requires legislation to implement the requirement, in which case a delayed implementation is permitted until the first quarter of the state's regular legislative session following the close of the first regular session beginning after October 1, 2006. The requirement applies to foster care maintenance payments for calendar quarters beginning on or after that date. Tribes first became eligible to administer a Title IV-E plan effective on October 1, 2009, and must, therefore, comply with this requirement (42 USC

671(a)(20)(B); Pub. L. No. 109-248, Sections 152(c)(2) and (3)).

- (g) Once a child is determined eligible to receive Title IV-E adoption assistance, he or she remains eligible and the subsidy continues until (i) the age of 18 (or 21 if the Title IV-E agency determines that the child has a mental or physical disability which warrants the continuation of assistance); (ii) the Title IV-E agency determines that the parent is no longer legally responsible for the support of the child; or (iii) the Title IV-E agency determines the child is no longer receiving any support from the parents (42 USC 673(a)(4)(A) and (B)).

Beginning on October 1, 2010, a Title IV-E agency may amend its Title IV-E plan to provide for a definition of a “child” as an individual who has not attained 19, 20, or 21 years of age (as the Title IV-E agency may elect) (42 USC 675(8)(B)(iii)). This definition of a child will then permit payment of adoption assistance for a child who is over age 18 (where the Title IV-E agency does not determine that the child has a mental or physical disability which warrants the continuation of assistance up to age 21) if such a youth is part of an adoption assistance agreement that is in effect under Section 473 of the Social Security Act and the youth had attained 16 years of age before the agreement became effective. As an additional requirement, a youth over age 18 must also (as elected by the Title IV-E agency) be (i) completing secondary school (or equivalent), (ii) enrolled in post-secondary or vocational school, (iii) participating in a program or activity that promotes or removes barriers to employment, (iv) employed 80 hours a month, or (v) incapable of any of these due to a documented medical condition (42 USC 675(8)(B)).

- b. Nonrecurring expenses of adoption may be paid on behalf of a child only if all of the following requirements are met:
- (1) The agreement may be a separate document or part of an agreement for state/tribe or federal adoption assistance payment or services (45 CFR section 1356.41(b)).
 - (2) The agreement indicates the nature and amount of the nonrecurring expenses to be paid (45 CFR section 1356.41(a)).
 - (3) The agreement was signed at the time of, or prior to, the final decree of adoption and claims must be filed with the Title IV-E

agency within two years of the date of the final decree of adoption (45 CFR section 1356.41(e)(2)).

- (4) The state or tribe has determined that the child is a child with special needs (45 CFR section 1356.41(d)).
 - (5) The child has been placed for adoption in accordance with applicable state or tribal laws (45 CFR section 1356.41(d)).
 - (6) The child need not meet the categorical eligibility requirements at Section 473(a)(2) (45 CFR section 1356.41(d)).
 - (7) The costs incurred by or on behalf of adoptive parents are not otherwise reimbursed from other sources (45 CFR section 1356.41(g)).
- c. There may be no income-eligibility requirement (means test) for the prospective adoptive parent(s) in determining eligibility for adoption assistance subsidy payments or nonrecurring expenses of adoption (45 CFR sections 1356.40(c) and 1356.41(c)).
 - d. In the case of a child adopted after the dissolution of a guardianship where the child was receiving Title IV-E guardianship assistance payments, the child's eligibility for adoption assistance is to be determined without consideration of the placement of the child with the relative guardian and any kinship guardianship assistance payments made on behalf of the child. Thus, if such a child is adopted, the Title IV-E agency would apply the adoption assistance criteria for the child as if the guardianship had never occurred (42 USC 673(a)(1)(D) as added by Section 101(c) of Pub. L. No. 110-351).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

G. Matching, Level of Effort, Earmarking

1. Matching

The percentage of required state/tribal funding and associated federal funding ("federal financial participation" (FFP)) varies by type of expenditure as follows:

- a. Third party in-kind contributions cannot be used to meet the state's cost sharing requirements (Child Welfare Policy Manual Section 8.1F Q/A#2)

8/16/02). The matching and cost sharing provisions of 45 CFR section 75.306 do not apply to this program (45 CFR sections 1355.30(i) and 1355.30(n)(1); 45 CFR section 201.5(e)). However, for program expenditures made in FY 2012 and thereafter, tribes receiving Title IV-E are permitted to use in-kind funds from any allowable third-party sources to provide up to the full required non-federal share of administrative or training costs (42 USC 679c(c)(1)(D), 45 CFR section 1356.68(c)).

- b. Adoption Assistance Subsidy Payments – The percentage of Title IV-E funding in Adoption Assistance subsidy payments will be the federal Medical Assistance Program (FMAP) percentage. This percentage varies by state and is available at <http://www.aspe.hhs.gov/health/fmap.htm> (42 USC 674(a)(1); 45 CFR section 1356.60(a)).

Separate tribal FMAP rates, which are based upon the tribe's service area and population, apply to Foster Care program maintenance payments incurred by tribes that are participating in Title IV-E programs through either direct operation of an approved Title IV-E plan or through operation of a Title IV-E agreement or contract with a state Title IV-E agency. The methodology for calculating tribal FMAP rates was provided through a final notice in the *Federal Register* that is available at <http://www.gpo.gov/fdsys/pkg/FR-2011-08-01/pdf/2011-19358.pdf>. Information on specific tribal FMAP rates for many tribes applicable for each FY and a table where such rates can be calculated for unlisted tribes is posted on the Children's Bureau's website and is available at <https://www.acf.hhs.gov/cb/focus-areas/tribes>. The calculated FMAP rate for each tribe applies unless it is exceeded by the FMAP rate for any state in which the tribe is located (42 USC 679B(d) and 42 USC 679B(e)).

- c. Staff and Adoptive Parent Training – The percentage of federal funding in expenditures for short- and long-term training at educational institutions of employees or prospective employees, and short-term training of current or prospective foster or adoptive parents and members of staff of state/ tribe-licensed or state/tribe-approved child care institutions (including travel and per diem) is 75 percent (42 USC 674(a)(3)(A) and (B); 45 CFR section 1356.60(b)).
- d. Professional Partner Training – The percentage of federal funding in expenditures for short-term training of (1) relative guardians; (2) state/tribe-licensed or state/tribe-approved child welfare agencies providing services to children receiving Title IV-E assistance; (3) child abuse and neglect court personnel; (4) agency, child or parent attorneys; (5) guardians ad litem; and (6) court appointed special advocates is 75 percent in FY 2013 and thereafter (42 USC 674(a)(3)(B)).
- e. Administrative Costs

- (1) The percentage of federal funding for expenditures for planning, design, development, and installation and operation of a statewide or tribal service area-wide automated child welfare information system meeting specified requirements (and expenditures for hardware components for such systems) is 50 percent (42 USC 674(a)(3)(C) and (D); 45 CFR sections 1355.52 and 1356.60(d)).
- (2) The percentage of federal funding for adoption placement non-recurring cost expenditures is 50 percent for Title IV-E agency expenditures up to \$2000 for each adoptive placement (45 CFR section 1356.41(f)(1)).
- (3) The percentage of federal funding of all other allowable administrative expenditures, is 50 percent (42 USC 674(a)(3)(E); 45 CFR sections 1356.41(f) and 1356.60(c)).

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

A Title IV-E agency is required to spend an amount equal to any savings (hereafter referred to as “adoption savings”) in state or tribal expenditures under Title IV-E as a result of applying the differing program eligibility rules to applicable children for a fiscal year for any services that may be provided under Title IV-B or IV-E (42 USC 673(a)(8)) as follows:

- a. For periods prior to FFY 2015, Title IV-E agencies had the flexibility to determine the methodology for calculating adoption savings and were not required to provide a specific accounting of adoption savings funds to ACF.
- b. Effective October 1, 2014, all Title IV-E agencies must:
 - (1) Calculate the adoption savings (if any) resulting from the application of differing program eligibility rules (42 USC 673(a)(2)(A)(ii)) to all applicable children for a fiscal year, using a methodology specified by ACF or an alternate methodology proposed by the Title IV-E agency and approved by ACF (42 USC 673(a)(8)(A) as amended by Pub. L. No. 113-183 and Program Instruction ACYF-CB-PI-15-06, dated May 22, 2015).
 - (2) Report (see III.L.1.d, “Reporting – Financial Reporting,” of this program supplement) annually to ACF (i) the methodology used to make the calculation of adoption savings, without regard to whether any savings are found; (ii) the amount of any annual adoption savings; and (iii) how such adoption savings are spent, accounting for and

reporting the spending separately from any other spending reported to ACF under Title IV-B or IV-E ((42 USC 673(a)(8)(B) as amended by Pub. L. No. 113-183 and Program Instruction ACYF-CB-PI-15-09, dated December 2, 2015).

- (3) Adoption savings must be expended for services that may be provided under the Title IV-B or IV-E programs; at least 30 percent of which must be spent on post-adoption services, post-guardianship services and services to support positive permanent outcomes for children at risk of entering foster care. At least two-thirds (2/3) of the 30 percent must be spent on post-adoption and post-guardianship services ((42 USC 673(a)(8)(D)(i) as amended by Pub. L. No. 113-183).
- (4) There is no requirement that adoption savings be expended in the same FFY for which they are calculated. Title IV-E agencies must, however, use adoption savings to supplement and not supplant any federal or non-federal funds used to provide any service under Title IV-B or IV-E ((42 USC 673(a)(8)(D)(ii), as amended by Pub. L. No. 113-183). (**Note:** The auditor would be required to test compliance with the earmarking requirements of paragraph (b)(3) only during the audit period in which the Title IV-E agency reports (or expects to report) in its annual report (see paragraph (b)(2)) that the earmarking percentages have been met for one or more FFYs for which they are applicable).

2.2 Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

Not Applicable

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

- d. *CB-496, Title IV-E Programs Quarterly Financial Report (OMB No. 0970-0205)* – Title IV-E agencies report current expenditures and information on children assisted for the quarter that has just ended and estimates of expenditures and children to be assisted for the next quarter. Prior quarter adjustment (increasing and decreasing) expenditures applicable to earlier quarters must also be separately reported on this form.

Beginning with the FFY 2015 reporting period, the Annual Adoption Savings Calculation and Accounting Report, CB-496 Part 4, must be submitted to provide information on the calculation and expenditure of adoption savings. The CB-496 Part 4 is due once a year with the CB-496 quarterly submission for the fourth quarter of the FFY. This report captures adoption savings calculations based on utilization of the Children's Bureau methodology, or an approved alternate methodology, and relevant CB-496 Part 1 reported expenditures submitted on quarterly reports for the current FFY.

A separate calculation of adoption savings is required for the current FFY (Column A) and for prior reported FFYs (Column B). The current FFY calculation considers title IV-E Adoption Assistance claims reported on Form CB-496 Part 1 quarterly submissions for the current FFY as current quarter amounts and any prior-quarter adjustment of expenditures (increasing or decreasing) identified (Part 2, Column D) as for applicable periods within the current FFY. The prior reported FFYs calculation considers any relevant reported prior-quarter adjustment of expenditures (increasing or decreasing) submitted on a Form CB-496 Part 1 report for quarterly periods within the current FFY but identified (Part 2, Column D) as applicable to periods in prior FFYs subject to adoption savings reporting.

The CB-496 Part 4 also contains a report of the expenditure of adoption savings for the current reporting FFY. The report separately identifies amounts expended during the current reporting FFY (Column A) and amounts spent in an earlier FFY subject to adoption savings reporting (Column B), but either not previously reported or adjusted from a previously reported amount.

The CB-496 Part 4 report further contains information on cumulative (beginning with FFY 2015) calculated and expended adoption savings amounts.

Key Line Items – The following line items contain critical information:

1. *Part 1, Expenditures, Estimates and Caseload Data*, columns (A) through (D) (Sections B and E (Adoption Assistance Program))

2. *Part 2, Prior Quarter Expenditure Adjustments – Adoption Assistance*, columns (A) through (E)
3. *Part 3, Foster Care, Adoption Assistance and Guardianship Assistance Demonstration Projects*, columns (A) through (F)
4. *Part 4, Annual Adoption Savings Calculation and Accounting Report*, columns (A) through (C)

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.667 SOCIAL SERVICES BLOCK GRANT

I. PROGRAM OBJECTIVES

The purpose of the Social Services Block Grant (SSBG) program is to provide funds to states including the District of Columbia and five territories to provide services for individuals, families, and entire population groups in one or more of the following areas: (1) achieving or maintaining economic self-support and self-sufficiency to prevent, reduce, or eliminate dependency; (2) preventing or remedying neglect, abuse, or exploitation of children and adults unable to protect their own interests; (3) preserving, rehabilitating, or reuniting families; (4) preventing or reducing inappropriate institutional care by providing for community-based care, home-based care, or other forms of intensive care; and (5) securing referral or admission for institutional care when other forms of care are not appropriate, or providing services to individuals in institutions. The funds transferred by the US insular areas or territories for administration under the authority of SSBG and known as the Consolidated Block Grant or CBG subscribe to the objectives and principles of SSBG.

II. PROGRAM PROCEDURES

The SSBG program is administered by the Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS). Funds are awarded based on the state's and territory's population following receipt and review of the state's and territory's report on the proposed use of funds for the coming year, which serves as the state's and territory's plan. States and territories have the flexibility to determine what services will be provided, consistent with the statutory goals and objectives, who is eligible, and how funds will be distributed among services and entities within the state, including whether to provide services directly or obtain them from other public or private agencies and individuals. The state and territory must also conduct a public hearing on the proposed use and distribution of funds, as included in the report, as a prerequisite to the receipt of SSBG funds.

Under the block grant philosophy, each state and territory is responsible for designing and implementing its own SSBG program, within very broad federal guidelines. States and territories must administer their SSBG program according to their approved plan and any amendments and in conformance with their own implementing rules and policies.

Source of Governing Requirements

The SSBG program is authorized under Title XX of the Social Security Act, as amended, and is codified at 42 USC 1397 through 1397e. Governing requirements pertaining to the consolidated grants to the territories, also known as the Consolidated Block Grant (CBG), may be found at Title V of the Omnibus Territories Act (Pub. L. 95-134), as amended. The implementing regulations for SSBG and other block grant programs authorized by Omnibus Budget Reconciliation Act of 1981 are published at 45 CFR Part 96. Those regulations include both specific requirements and general administrative requirements in lieu of 45 CFR Part 75 (the

HHS implementation of 2 CFR Part 200) for the covered block grant programs. Requirements specific to SSBG are in 45 CFR sections 96.70 through 96.74.

As discussed in Appendix I to this Supplement, “Federal Programs Excluded from the A-102 Common Rule and Portions of 2 CFR Part 200,” states and territories are to use the fiscal policies that apply to their own funds in administering SSBG. Procedures must be adequate to ensure the proper disbursement of and accounting for federal funds paid to the grantee, including procedures for monitoring the assistance provided (45 CFR section 96.30).

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

Y	Y	Y	N	N	N	Y	N	N	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Services provided with SSBG funds may include, but are not limited to, child care services, protective services for children and adults, services for children and adults in foster care, services related to the management and maintenance of the home, day care services for adults, transportation services, family planning services, training and related services, employment services, information, referral, counseling services, the

preparation and delivery of meals, health support services, and appropriate combinations of services designed to meet the special needs of children, seniors, individuals with developmental or physical disabilities, and individuals facing substance use disorders (42 USC 1397a(a)). Uniform definitions for these services are included in Appendix A to 45 CFR Part 96 – Uniform Definitions of Services.

Expenditures for these services may include expenditures for administration, including planning and evaluation, personnel training and retraining directly related to the provision of those services (including both short- and long-term training at educational institutions), and conferences and workshops, and assistance to individuals participating in such activities (42 USC 1397a(a)).

- b. A state and territory may purchase technical assistance from public or private entities if the state determines that such assistance is required in developing, implementing, or administering the SSBG program (42 USC 1397a(e)).
- c. A state and territory may transfer up to 10 percent of its annual allotment to the following block grants for support of health services, health promotion and disease prevention activities, low-income home energy assistance, or any combination of these activities: Preventive Health and Health Services Block Grant (Assistance Listing 93.991); Block Grants for Prevention and Treatment of Substance Abuse (Assistance Listing 93.959); Maternal and Child Health Services Block Grant to the states (Assistance Listing 93.994); Low-Income Home Energy Assistance (Assistance Listing 93.568); and Community Services Block Grant (93.569) (42 USC 1397a(d); 45 CFR section 96.72).

2. *Activities Unallowed*

Funds may not be used for:

- a. Purchase or improvement of land, or the purchase, construction, or permanent improvement (other than minor remodeling) of any facility (unless the restriction is waived by ACF) (42 USC 1397(d)(a)(1)).
- b. Cash payments for costs of subsistence or for the provision of room and board (other than costs of subsistence during rehabilitation, room and board provided for a short term as an integral but subordinate part of a social service, or temporary shelter provided as a protective service) (42 USC 1397(d)(a)(2)).
- c. Wages of any individual as a social service (other than payment of wages of Temporary Assistance for Needy Families (TANF) (Assistance Listing 93.558) recipients employed in the provision of child day care services) (42 USC 1397(d)(a)(3)).

- d. Medical care (other than family planning services, rehabilitation services, or initial detoxification of an alcoholic or drug-dependent individual) unless it is an integral but subordinate part of an allowable social service under SSBG (unless the restriction is waived by ACF) (42 USC 1397(d)(a)(4)).
- e. Social services (except services to substance use disorder or rehabilitation services) provided in and by employees of any hospital, skilled nursing facility, intermediate care facility, or prison, to any individual living in such institution (42 USC 1397(d)(a)(5)).
- f. The provision of any educational service that the state makes generally available to its residents without cost and without regard to their income (42 USC 1397(d)(a)(6)).
- g. Any child day care services unless such services meet applicable standards of state and local law (42 USC 1397(d)(a)(7)).
- h. The provision of cash payments as a service (this limitation does not apply to payments to individuals with respect to training or attendance at conferences or workshops) (42 USC 1397(d)(a)(8)).
- i. Any item or service (other than an emergency item of service) furnished by an entity, physician, or other individual during the period of exclusion from reimbursement by various provisions of federal regulations (42 USC 1397(d)(a)(9)).
- j. The state may not use the amount transferred in from TANF (Assistance Listing 93.558) for programs, services or activities for individuals, children, or their families whose incomes exceed the 200 percent of the federal poverty guidelines. The official poverty guideline is revised annually by HHS (42 USC 604(d)(3)(A) and 9902(2)). The poverty guidelines are issued each year in the *Federal Register* and HHS maintains a web page that provides the poverty guidelines (<http://aspe.hhs.gov/poverty/>). Additional information on this transfer in is provided in IV, "Other Information."

B. Allowable Costs/Cost Principles

The Omnibus Budget Reconciliation Act of 1981 authorized the SSBG. In 45 CFR 75.101(d)(1), this award has been exempted from most of the cost principles (Subpart E) of the Uniform Administrative Requirements. This applies to states, territories, and subrecipients.

The HHS block grant rules allow block grantees to obligate and expend SSBG funds in accordance with the laws and procedures applicable to the obligation and expenditure of their own funds at 45 CFR 96.30(a). States and territories may apply their own

accounting standards on subrecipients, apply the Uniform Administrative Requirements, or allow subrecipients to use their own policies and procedures.

H. Period of Performance

SSBG funds must be expended by the state in the fiscal year allotted or in the succeeding fiscal year (42 USC1397a(c)).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

- a. Post-Expenditure Report (OMB #0970-0234):
<https://omb.report/omb/0970-0234>

The 42 USC 1397e requires states and territories to submit to the federal administering agency, the Office of Community Services, an annual Post Expenditure Report no later than six months following the close of the fiscal year.

Key Line Item

- (1) The number of eligible individuals who received services paid for in part or in whole with federal funds under the SSBG.
- (2) The amount of Social Services Block Grant funds spent in providing each service;
- (3) The method(s) by which each service is provided, showing separately services provided by public agencies, private agencies, or both;
- (4) The criteria applied in determining eligibility for each service such as income eligibility guidelines, sliding fee scales, the effect of public assistance benefits, and any requirements for enrollment in school or training programs; and
- (5) Each state or territory's definition of "child," "adult," and "family."
- (6) **TANF Funds** Transferred into SSBG –Amount reported on this line item should be consistent with the TANF federal financial report (ACF-196R).

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION*Transfers out of SSBG*

As discussed in III.A, “Activities Allowed or Unallowed,” funds may be transferred out of SSBG to other federal programs. The amounts transferred out of SSBG are subject to the requirements of the program into which they are transferred and should not be included in the audit universe and total expenditures of SSBG when determining Type A programs. On the Schedule of Expenditures of Federal Awards, the amount transferred out should not be shown as SSBG expenditures but should be shown as expenditures for the program into which they are transferred.

Transfers into SSBG

A state and territory may transfer up to 10 percent of the combined total of the state family assistance grant, supplemental grant for population increases, and bonus funds for high performance and illegitimacy reduction, if any, (all part of TANF) for a given fiscal year to carry out programs under the SSBG. Such amounts may be used only for programs or services to children or their families whose income is less than 200 percent of the poverty level. The amount of the transfers is reflected on the quarterly ACF-196/ACF-196R, TANF Financial Report. The amounts transferred into this program are subject to the requirements of this program when expended and should be included in the audit universe and total expenditures of this program when determining Type A programs. On the Schedule of Expenditures of Federal Awards, the amounts transferred in should be shown as expenditures of this program when such amounts are expended.

Consolidation of Grants to the Insular Islands

Insular areas, including the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, may apply for a consolidated grant under 45 CFR Part 97. A consolidated grant award administratively combines allocations from two or more programs into one award. An insular area may apply for a consolidated grant in lieu of filing an individual application for any eligible.

The application process requires grantees to specify the amount of funds proposed for consolidation and the titles of the programs that are the sources of funds that are to be consolidated in their SSBG Intended Use Plan and Pre-Expenditure Report. Requests are reviewed by the program office and approval is recommended to the Office of Grants Management for processing.

Funds awarded under a consolidated grant must adhere to the statute and regulations of the SSBG program. Programs eligible for consolidation are specified in 45 CFR Part 97.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.671 FAMILY VIOLENCE PREVENTION AND SERVICES/DOMESTIC VIOLENCE SHELTER AND SUPPORTIVE SERVICES

I. PROGRAM OBJECTIVES

The purpose of this program is to assist states and Native American tribes (including Alaska Native Villages), tribal organizations (tribes) and territories in efforts to increase public awareness about, and primary and secondary prevention of family violence, domestic violence, and dating violence; and assist states and tribes in efforts to provide immediate shelter and supportive services for victims of family violence, domestic violence, or dating violence, and their dependents.

II. PROGRAM PROCEDURES

The Family Violence Prevention and Services Act (FVPSA) is designed to assist states in their efforts to support the establishment, maintenance, and expansion of programs and projects to: (1) prevent incidents of family violence, domestic violence, and dating violence; (2) provide immediate shelter, supportive services, and access to community-based programs for victims of family violence, domestic violence, or dating violence, and their dependents; and (3) provide specialized services for children exposed to family violence, domestic violence, or dating violence, including victims who are members of underserved populations (45 CFR 1370.10(a)).

The FVPSA states and tribal formula grant funds shall be used to identify and provide subawards to eligible entities for programs and projects within the state that are designed to prevent incidents of family violence, domestic violence, and dating violence by providing immediate shelter and supportive services; grant use may include paying for the operating and administrative expenses of the facilities for a shelter for adult and youth victims of family violence, domestic violence, or dating violence, and their dependents; and may be used to provide prevention services to prevent future incidents of family violence, domestic violence, and dating violence (42 USC 10408(a) and 42 USC 10408(b)(1)(A)).

To be eligible for funds, each state and tribe must submit an annual application. States and tribes are required to develop and submit a plan detailing the establishment, maintenance, and expansion of programs and projects to prevent incidents of family violence, domestic violence, and dating violence; to provide immediate shelter, supportive services, and access to community-based programs for victims of family, domestic, and dating violence, and their dependents; and to provide specialized services for children exposed to family, domestic, or dating violence, including victims who are members of underserved populations. This plan should look at all the needs across the state to help it distribute funding, conduct outreach, and provide training and technical assistance as appropriate with all its available resources

State Formula Grants

The state is required to distribute no less than 95 percent of the funds awarded to it from FVPSA.

Each state's grant award shall be \$600,000 with the remaining funds allotted to each state based on the ratio of the population of all states (42 USC 10405(a)(2)).

Tribal Formula Grants

Ten percent of the amount appropriated to FVPSA is allocated to tribal programs according to 42 USC 10403(a)(1) of FVPSA that is not reserved under 42 USC 10403(a)(2)(A)(i).

Source of Governing Requirements

The FVPSA program is authorized under 42 USC 10408 for states and 42 USC 10401 for tribes and implementing regulations at 45 CFR 1370.

On March 11, 2021, [the American Rescue Plan Act of 2021](#) was signed into law, which provided a total of \$152 million to State and Tribal Domestic Violence and Shelter Programs. The funds were awarded in FFY 2021 and are available until September 30, 2025.

Availability of Other Program Information

Additional information can be found in the Notice of Funding Opportunities (NOFO) and Program Information (PI) Memorandums issued by the Family Violence Prevention and Services Program Office, specifically:

- Standing Announcement for Family Violence Prevention and Services/Domestic Violence Shelter and Supportive Services/Grants to Native American Tribes (including Alaska Native Villages) and Tribal Organizations – [HHS-2021-ACF-ACYF-FVPS-1961](#)
- Standing Announcement for Family Violence Prevention and Services/Domestic Violence Shelter and Supportive Services/Grants to States – [HHS-2021-ACYF-FVPS-1962](#)

- Program Instruction: 2021 American Rescue Plan – Supplemental COVID-19 Testing, Vaccine Access, Mobile Health Units Access Funds ([ACF-PI-FVPSA-21-03, issued October 25, 2021](#))
- Program Instruction: 2021 American Rescue Plan – Supplemental COVID 19 Funds - Rape Crisis Centers and Sexual Assault Programs ([ACF-PI-FVPSA-21-4, issued October 29, 2021](#))
- Program Instruction: 2021 American Rescue Plan – Supplemental COVID 19 Funds – Culturally Specific; Sexual Assault; Domestic Violence; Community-Based ([ACF-PI-FVPSA-21-05, issued October 29, 2021](#))

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment/ Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement Suspension & Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	Y	N	N	N	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. State and tribal funds may be used for the following activities – but not limited to these activities:
 - (1) Provision of immediate shelter and related supportive services to adult and youth victims of family violence, domestic violence, or dating violence, and their dependents, on a regular basis, including paying for the operating and administrative expenses of the facilities for such shelter ([42 USC 10408\(b\)\(1\)\(A\)](#));
 - (2) Assistance in developing safety plans and supporting efforts of victims of family violence, domestic violence, or dating violence to make decisions related to their ongoing safety and well-being ([42 USC 10408\(b\)\(1\)\(B\)](#));

- (3) Provision of individual and group counseling, peer support groups, and referral to community-based services to assist family violence, domestic violence, and dating violence victims, and their dependents, in recovering from the effects of the violence (42 USC 10408(b)(1)(C));
- (4) Provision of services, training, technical assistance, and outreach to increase awareness of family violence, domestic violence, and dating violence, and increase accessibility to services (42 USC 10408(b)(1)(D));
- (5) Provision of culturally and linguistically appropriate services (42 USC 10408(b)(1)(E));
- (6) Provision of services for children exposed to family violence, domestic violence, or dating violence, including age-appropriate counseling, supportive services, and services for the non-abusing parent that support that parent's role as a caregiver, which may, as appropriate, include services that work with the non-abusing parent and child together (42 USC 10408(b)(1)(F));
- (7) Provision of advocacy, case management services, and information and referral services concerning issues related to family, domestic, or dating violence intervention and prevention, including the following: (1) assistance in accessing related federal and state financial assistance programs; (2) provision of legal advocacy to assist victims and their dependents; (3) provision of medical advocacy, including referrals for appropriate health care (including mental health, alcohol, and drug abuse treatment), but not to include reimbursement for any health care services; (4) assistance locating and securing safe and affordable permanent housing and homelessness prevention services; (5) provision of transportation, child care, respite care, job training and employment services, financial literacy services and education, financial planning, and related economic empowerment services; and (6) provision of parenting and other educational services for victims and their dependents (42 USC 10408(b)(1)(G)); and
- (8) Provision of prevention services, including outreach to underserved populations (42 USC 10408(b)(1)(H)); Additional detail or "bullets."

As detailed in ACF-PI-FVPSA-21-01, 2021 American Rescue Plan Act Supplement grant funds may be used to:

- (1) **Prevent:** Activities that assist domestic violence survivors by providing supportive services, shelter options, and supplies, which will reduce the exposure and risk of COVID-19.

- (2) **Prepare:** Activities that include assessing needs of survivors during the COVID-19 public health emergency. Activities that provide training, information, and assistance necessary to ensure the continuity of domestic violence services. Assessing the capacity of local domestic violence programs and tribes' emergency operation plans and plans to address the needs of survivors and reduce the exposure and risk of COVID-19. Please note that the provision of remote services continues to be an allowable activity.
- (3) **Respond:** Activities and technical assistance for ensuring the continuity of domestic violence services during the COVID-19 public health crisis which includes responding to issues including adapting to fluctuating needs and circumstances. Please note that the provision of remote services continues to be an allowable activity.

As detailed in ACF-PI-FVPSA-21-4, 2021 American Rescue Plan Act Rape Crisis Centers and Sexual Assault Program Supplemental COVID-19 Funds may be used to:

- (1) **Transition to Virtual Services:** Funding may be used to develop, implement, and assess innovative virtual services that increase access to rape crisis and sexual assault services for survivors in the service area, as well as for underserved communities; and can be adapted and scaled across the state, territory, tribe or local community. All costs associated with designing, implementing, and assessing ways to optimize the use of virtual services for survivors of sexual assault that have been impacted by the COVID-19 public health emergency.
- (2) **Data Security:** Costs associated with protecting the confidentiality, integrity, and availability of survivor services information, including safeguarding data from accidental and intentional disclosure. Funds may be used to support the safety of survivor data, including servers, firewall protection software, and training for personnel and survivors on topics such as proper use of devices and service portals, security of passwords, and available data safety features.
- (3) **Prevent:** Activities that assist sexual assault survivors by providing virtual services, supportive services, temporary housing assistance, mobile advocacy services, and supplies that will ensure survivors of sexual assault receive the care, support and services they need while reducing the exposure to and risk of contracting the COVID-19 virus.

- (4) **Prepare:** Activities and technical assistance that include assessing needs of sexual assault survivors during the COVID-19 public health emergency. Activities that provide training, information, and assistance necessary to ensure the continuity of rape crisis centers and sexual assault services.
- (5) **Respond:** Activities and technical assistance for ensuring the continuity of sexual assault programs and rape crisis center services, culturally specific programs, and tribal programs during the COVID-19 public health emergency, which includes responding to issues such as adapting to fluctuating needs and changing circumstances.
- (6) **Workforce Expansion, Capacity Building and Supports:** Utilized for workforce-related expansions and supports, or to reimburse sub-recipients or contractors.

As detailed in ACF-PI-FVPSA-21-03, 2021 American Rescue Plan Act Supplemental COVID-19 Testing, Vaccine Access, Mobile Health Units Access Funds may be used for:

- (1) **COVID-19 Testing:** Can be used for COVID-19 testing and mitigation-related expenses or to reimburse subrecipients for such expenses. Assist states, territories and tribes with expanding testing and mitigation-related activities to the best address the needs of the local communities in the service area(s).
- (2) **COVID-19 Vaccine Access:** Provide resources for states, territories and tribes to provide access to COVID-19 vaccines for domestic violence survivors and their dependents including individuals from vulnerable and medically underserved communities. Funds may be used to address any barriers to vaccines that may be experienced by domestic violence survivors and their dependents.
- (3) **Mobile Health Units:** Funding to assist states, territories, tribes, domestic violence shelters, domestic violence programs, culturally specific programs, and rural communities with establishing partnerships with health departments, hospitals, and Indian Health Services facilities to access mobile health units to mitigate the spread of COVID-19. The funding can be used to establish and maintain contracts with mobile health units for regularly scheduled visits or on-call visits to domestic violence program, culturally specific organizations, tribes, or rural communities to mitigate the spread of COVID-19.
- (4) **Workforce Expansion, Capacity Building, and Supports:** Funds can be used for COVID-19 workforce related expansion

and supports, or to reimburse subrecipients for such costs.

Expenses to secure and maintain adequate personnel to carry out COVID-19 testing, COVID-19 mitigation activities, or mobile health unit coordination activities.

- b. Funds may be used for administrative costs, subject to the limitation in G.3.a, “Matching, Level of Effort, Earmarking – Earmarking.”

2. *Activities Unallowed*

Funds may not be used for the purchase or construct facilities.

E. Eligibility

1. **Eligibility for Individuals**

Not Applicable

2. **Eligibility for Group of Individuals or Area of Service Delivery**

Not Applicable

3. **Eligibility for Subrecipients**

Eligible entities for state subawards under 42 USC section 10408(c): To be eligible to receive a subaward from a state, an entity shall be—

- (1) a local public agency, or a nonprofit private organization (including faith-based and charitable organizations, community-based organizations, tribal organizations, and voluntary associations) that assists victims of family violence, domestic violence, or dating violence, and their dependents, and has a documented history of effective work concerning family violence, domestic violence, or dating violence; or
- (2) a partnership of two or more agencies or organizations that includes (i) an agency or organization described in paragraph (1), and (ii) an agency or organization that has a demonstrated history of serving populations in their communities, including providing culturally appropriate services.

G. Matching, Level of Effort, Earmarking

1. **Matching**

Grants funded by the states will meet the matching requirements in 42 USC section 10406(c)(4). No grant shall be made to any entity other than a state or tribe unless the entity agrees that, with respect to the cost to be incurred by the entity in carrying out the program or project for which the grant is awarded, the entity will make available (directly or through donations from public or private entities) nonfederal contributions in an amount that is not less than \$1 for every \$5 of federal funds provided under the grant. The nonfederal contributions

required may be in cash or in kind.

Tribal Grantees Only: A tribe, as defined as defined in 42 USC section 10402(5), is exempt from the match requirement under the FVPSA. Tribes are not required to provide match (see 42 USC 10406(c)(4)).

The determination of whether the match is exempt or required for a tribal consortium depends on the entities that comprise or make up the consortium. Tribal consortium is “a partnership between one or more tribes (including qualifying Alaska Native villages and entities) that authorizes a single tribal organization or nonprofit organization to submit an application and administer the FVPSA grant funds on their behalf. A tribal consortium may also consist of a group of tribal organizations or nonprofit organizations.” A tribal consortium comprised of a group of tribes is exempt from providing a match, and a tribal consortium comprised of a group of tribal organizations or nonprofit organizations is required to provide a match.

2021 American Rescue Plan Act Supplemental Funds (1) Rape Crisis Centers and Sexual Assault Program Supplemental COVID-19; (2) COVID-19 Testing, Vaccine Access, Mobile Health Units Access Funds; (3) Culturally Specific Special Issue Resource Centers: There is no matching requirement for state or tribal grantees for the ARP supplemental grant funds.

2. Level of Effort

Not Applicable

3. Earmarking

- a. States may use no more than 5 percent for costs related to administration, monitoring, or oversight, including the cost to attend required FVPSA grantee meetings.

2021 American Rescue Plan Act Supplemental COVID-19 Funds: Not more than five (5) percent of the FVPSA grant funds may be used for state administrative costs.

2021 American Rescue Plan Act Rape Crisis Centers and Sexual Assault Program Supplemental COVID-19 Funds: Each state, territory, or tribe may not use more than five (5) percent of grant funds for administrative costs.

2021 American Rescue Plan Act Supplemental COVID-19 Testing, Vaccine Access, Mobile Health Units Access Funds: Each state, territory, or tribe may not use more than five (5) percent of grant funds for administrative costs.

2021 American Rescue Plan Act Culturally Specific Special Issue Resource Centers Supplemental COVID 19 Funds: Each Culturally Specific Special Issue Resource Center, National Indian Resource Center, and Alaskan Native Tribal Resource Center on Domestic

Violence are allowed to use five (5) percent of grant funds for administrative and evaluation costs to administer, monitor, evaluate, and report on subrecipient' implementation.

M. Subrecipient Monitoring

1. The Office of Management and Budget Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards (45 CFR Part 75) require pass-through entities to evaluate each subrecipient's risk for noncompliance in order to determine the appropriate monitoring level, monitor the activities of the subrecipient organizations to ensure that the subaward is in compliance with applicable federal statutes and regulations and terms of the subaward, and verify that subrecipients are audited as required by Subpart F of the Uniform Guidance. (See 45 CFR 75.352 (a) through (h)).
 - a. Recipients must ensure that all requirements imposed by the federal government are flowed down to subrecipients so that the federal award is used in accordance with federal statutes, regulations, and the terms and conditions of the federal award.
 - b. Recipients are also responsible for monitoring any additional requirements that its subrecipient must meet for the state to meet its own responsibility to HHS, including identification of any required financial and performance reports.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.676 UNACCOMPANIED ALIEN CHILDREN PROGRAM

I. PROGRAM OBJECTIVES

The objective of the Unaccompanied Alien Children Program is to provide for the care and placement of unaccompanied alien children who are apprehended by the US Department of Homeland Security, Immigration, and Customs Enforcement agents, Border Patrol agents, or other federal law enforcement agencies and transferred into the custody of the Office of Refugee Resettlement pending resolution of their claims for relief under US immigration law case or release to parent, adult family members or another responsible adult sponsor.

II. PROGRAM PROCEDURES

The Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), a component of the Department of Health and Human Services (HHS), administers this program. ORR enters into cooperative agreements with nonfederal entities to provide temporary shelter and other child welfare-related services to unaccompanied alien children in ORR custody. Residential care services begin once an unaccompanied alien child (UAC) arrives at an ORR facility and ends when the UAC is released from ORR custody to a sponsor, turns 18 years of age, or the UAC's immigration case results in a final disposition of removal from the United States. Residential care and other child welfare-related services are provided by state-licensed residential care programs in the least restrictive setting appropriate for the UAC's age and needs.

Source of Governing Requirements

This program is authorized under the Homeland Security Act of 2002 (Pub. L. No. 107-296) (6 USC 279).

Availability of Other Program Information

An ORR policy guide is on the ORR website (<https://www.acf.hhs.gov/orr>) at <https://www.acf.hhs.gov/orr/resource/children-entering-the-united-states-unaccompanied>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not

being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	Y	N	Y	Y	N

A. Activities Allowed or Unallowed

Funds may only be used for activities and categories listed in the approved budget to provide temporary shelter and other child welfare-related services for the care of an UAC placed with the nonfederal entity by ORR.

B. Allowable Costs/Cost Principles

1. Less-than-arm’s-length leasing arrangements exceeding allowable costs. Grantees may lease facilities from parties with which they have a less-than-arm’s-length relationship but are limited in what amount they may charge based on 45 CFR 75.465(b) and (c). Under these limitations, only costs of ownership such as depreciation, maintenance costs, taxes, and insurance are allowable. Common arrangements that fall within these restrictions are leases with parent or affiliated organizations, leases with partially or wholly-owned subsidiaries, and leases where the lessor is an entity that is partially or wholly-owned by individuals who are executives, board members, or employees of the grantee organization.
2. Excessive charges for facility expenditures related to leasing agreements. Grantees that lease facilities under an arm’s length arrangement are unable to incur and charge ownership type costs to the grant. This includes normal costs of ownership such as depreciation, maintenance costs, taxes, and insurance.

The portion of arm’s length leases, in which the grantee is required to pay any combination of property taxes, property insurance, and maintenance/repair costs (also referred to as single, double, or triple net leases) separate from the base rental amount, are unallowable for the purposes of reimbursement eligibility under the federal award.

Costs associated with leasing arm’s length facilities are limited to fair market rental fees as explained in 45 CFR 75.465(a).

3. Improper direct charging of costs related to the acquisition, construction, or major capital improvements of real property. Funding under this program cannot be directly used for any of these purposes. Expenses such as direct charges of acquisition costs, mortgage principal and interest payments, and direct charges for alterations to real property which are considered major capital improvements* and required to be capitalized and depreciated under GAAP, are unallowable as direct charges to UAC awards (except based on explicit written prior approval from the grants official at the awarding agency). Only depreciation properly calculated (see 45 CFR 75.436), recorded, and supported by the grantee organization in accordance with GAAP may be charged to UAC awards.

*Major capital improvements are those alterations and renovations (A&R) which exceed \$150,000. The UAC grants may pay for up to an aggregate of \$150,000 in “minor” alterations and renovations (those that are not major), per parcel, per project period. Further information is available at the ACF Property Guidance site: <https://www.acf.hhs.gov/grants/real-property-and-tangible-personal-property>.

4. Related party transactions improperly categorized by the grantee. Procurements that are issued to parent/subsidiary/affiliated organizations where the relationship falls within the definition of less-than-arm’s-length when there is a real or apparent conflict of interest cannot be considered competitively awarded as defined by 45 CFR 75.327(c). Consequently, it is improper to categorize these transaction types under the contract budget line item and include additional revenue in excess of actual expenditures incurred (i.e., profit). These transactions should be treated under the original nature of the work performed (i.e., salaries, supplies) and charged based on the actual expenditures incurred and evidenced by the grantee.
5. Budgeted costs are being utilized as the basis for estimated drawdown of funds and completing required reporting to ACF. Amounts approved under budget line items in grant awards are not automatically approved for drawdown. Drawdowns and the related reporting of expenditures to ACF via the Standard Form (SF)-425, “Federal Financial Report,” must be based on actual expenditures incurred. Additionally, SF-425 reporting must be based on the entity’s basis for accounting (e.g., cash or accrual).
6. Cost categories which are not always clearly direct or indirect by nature (administrative staff, depreciation) and therefore could easily be charged as either under this program are in some instances being charged as both. Costs may be charged as either direct or indirect, but not both, in accordance with 45 CFR 75.412.
7. Record retention non-compliance regarding facility files/depreciation schedules. An organization’s records pertinent to a federal award must be retained for a period of three years from the date of submission of the final expenditure report in accordance with 45 CFR 75.361. Therefore, records related to depreciation

expense (purchase settlements, appraisals, construction invoices, useful life determinations) charged to a federal award for such events as the acquisition (through any method, including donation) and major A&R of real property must be maintained for the life of the period that depreciation is being expensed.

8. Prior written approval is required for the expenditures outlined in 45 CFR 75.407. The grantee must request prior approval in writing to ACF before obligating or incurring the costs. Requests for prior approval must be explicit enough so that ACF can identify the purpose and cost of the expenditure. Approval of budgets that include general budgetary descriptions and budget line-item totals are insufficient. Additionally, grantees must receive written approval from an authorized member of ACF. A lack of response is not, in itself, approval.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable
- d. *SF-428 Tangible Personal Property Report* – Submission within 90 days of project period end (close-out of the award) including all applicable attachments

2. Performance Reporting

- a. *SF-PPR ACF, Performance Progress Report* - Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.686 ENDING THE HIV EPIDEMIC: A PLAN FOR AMERICA

I. PROGRAM OBJECTIVES

The objective of this program is to reduce new Human Immunodeficiency Virus (HIV) infections in the United States to fewer than 3,000 per year by 2030. To achieve this objective, the program provides financial and technical resources to the 39 Ryan White HIV/AIDS Program (RWHAP) Part A funded Eligible Metropolitan Areas (EMAs) or Transitional Grant Areas (TGAs) whose service area includes one or more of the identified 48 HIV high burden counties and the EMAs of Washington, DC, and San Juan, PR; the RWHAP Part B funded states identified as having a rural HIV burden (Alabama, Arkansas, Kentucky, Mississippi, Missouri, Oklahoma, and South Carolina); and the RWHAP Part B Program of the state of Ohio on behalf of Hamilton County. These resources are awarded to the indicated RWHAP Part As and Bs to implement strategies, interventions, approaches, and core medical and support services to reduce new HIV infections in the United States.

II. PROGRAM PROCEDURES

The Department of Health and Human Services (HHS) leads the planning efforts for the Ending the HIV Epidemic in the U.S. (EHE), which is implemented through the Health Resources and Services Administration (HRSA) and other HHS Agencies. While the EHE initiative is a multi-agency effort, the program procedures outlined in this Compliance Supplement are only applicable to assistance awards issued and managed by HRSA's HIV/AIDS Bureau.

Under this program, cooperative agreements are awarded annually to 39 RWHAP Part A funded Eligible Metropolitan Areas (EMAs) or Transitional Grant Areas (TGAs) whose service area includes one or more of the identified 48 HIV high burden counties and the EMAs of Washington, DC, and San Juan, PR; seven RWHAP Part B funded states identified as having a rural HIV burden (Alabama, Arkansas, Kentucky, Mississippi, Missouri, Oklahoma, and South Carolina); and the RWHAP Part B Program of the state of Ohio on behalf of Hamilton County. (For a complete list of EHE initiative eligible jurisdictions visit: <https://www.hrsa.gov/grants/find-funding/hrsa-20-078> and download Notice of Funding Opportunity-HRSA 20-078.)

HRSA assesses the technical merit of each funding application through an objective review process. Application instructions and critical indicators for review criteria are provided to inform applicants and reviewers of proposal expectations and standards for evaluation. Competing applications are reviewed by nonfederal reviewers for technical merit recommendations. Applications are reviewed and evaluated against the following criteria: (1) Need; (2) Response; (3) Evaluative Measures; (4) Impact; (5) Resources and Capabilities; and (6) Support Requested. The highest ranked applications receive consideration for award within available funding ranges.

Applicants must describe how proposed activities will expand access to HIV care and treatment in the targeted jurisdictions to treat people with HIV rapidly and to effectively reach sustained

viral suppression. Additionally, applicants must demonstrate how their proposed strategy will respond quickly to HIV cluster detection efforts for those people with HIV needing care and treatment.

Jurisdictions funded under the EHE initiative use assistance resources in conjunction with the RWHAP parts A and B systems of HIV care and treatment to develop, implement, and/or enhance innovative approaches to engage people with HIV who are newly diagnosed, not in care, and/or not virally suppressed, as well as to provide rapid access to a comprehensive continuum of high-quality HIV care and treatment services. This program is designed to provide additional funding to EHE initiative jurisdictions to deliver HIV care and treatment services and systems enhancements to meet the goals of the initiative. Technical assistance and systems coordination services are also provided to jurisdictions to assist the recipients on (1) implementing work plan activities, innovative approaches, and interventions, (2) coordinating and integrating their initiative plans, funding sources, and programs with the existing HIV care delivery systems, and (3) identifying existing and new stakeholders to build capacity and advance progress in achieving the goals of the initiative.

Funded jurisdictions may use a variety of service delivery mechanisms. Jurisdictions may provide some or all services directly or through subaward agreements with other service providers/subrecipients.

Source of Governing Requirements

The EHE initiative is authorized under Section 311(c) (42 USC 243(c)) and title XXVI (42 USC 300ff-11 et seq.) of the Public Health Service Act.

The EHE initiative has no specific program regulations.

Availability of Other Program Information

Further information about the EHE initiative is available at <https://ryanwhite.hrsa.gov/>.

Information on allowable uses of funds under the RWHAP is contained in policy notices and standards found at <https://ryanwhite.hrsa.gov/grants/policy-notice>. However, due to the unique nature of this funding, EHE initiative recipients have the opportunity to implement a broader approach to addressing HIV in their communities than what exists in services authorized by the RWHAP legislation. Notice of Funding Opportunity HRSA-20-078 (https://grants.hrsa.gov/2010/Web2External/Interface/Common/EHBDisplayAttachment.aspx?dm_rtc=16&dm_attid=81272b5b-dc96-4828-97db-67a83536da45) provides additional information regarding the use of these funds, including which of the RWHAP statutory requirements are applicable to this funding.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then

determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	N	Y	Y	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Funds may be used to support EHE initiative services and infrastructure associated with a broader approach to addressing HIV in the community than exists in services authorized by the RWHAP legislation. For example, the only requirement for determining eligibility is that the individual has an HIV diagnosis. There is no requirement that individuals served are low-income or that initial eligibility is documented prior to services being provided. Initiative services (e.g., linkage to care) are services and activities that do not fit neatly within the RWHAP service categories. These services may be innovative and creative with a focus on ending the HIV epidemic. HRSA prior approval is required for use of funds outside of existing allowable RWHAP costs and service categories. Infrastructure activities are associated with the development and expansion of data systems. This may include technical assistance on the type, design, and building of new data systems, bridging existing systems to achieve data integration, improving data entry to decrease burden and increase accuracy, training of staff and providers on collecting and using data, and employing experts to provide accurate and in-depth data analysis.
- b. Funds may be used to support core medical services for eligible clients. Core medical services encompass the following services: (1) outpatient and ambulatory health services; (2) AIDS Drug Assistance Program

treatments defined under 42 USC 300ff-26; (3) AIDS pharmaceutical assistance; (4) oral healthcare; (5) early intervention services described in 42 USC 300ff-51(e); (6) health insurance premium and cost sharing assistance for low-income individuals in accordance with 42 USC 300ff-15; (7) home healthcare; (8) medical nutrition therapy; (9) hospice services; (10) home and community-based health services as defined under 42 USC 300ff-14(c); (11) mental health services; (12) substance abuse outpatient care; and (13) medical case management, including treatment adherence services. Core medical and support services are important to assist in the diagnosis of HIV infection, linkage to care for people with HIV, retention in care, and the provision of HIV treatment. Services must relate to HIV diagnosis, care, and support, and must adhere to established clinical practice standards consistent with [HHS HIV clinical treatment guidelines](#). However, to increase innovation and to ensure access to the hardest-to-reach populations, there is no requirement to expend 75 percent of the award on core medical services (PCN 16-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/service-category-pcn-16-02-final.pdf>)

- c. Funds may be used to pay the costs of providing support services that are needed for people with HIV to achieve their medical outcomes. These services include, but are not limited to, outreach services, nonmedical case management, medical transportation, translation, and referrals for healthcare and support services. Support services are subject to approval of the secretary of HHS or designee (PCN 16-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/service-category-pcn-16-02-final.pdf>).
- d. Funds may be used for administrative expenses. However, no more than 10 percent of the award can be used for administrative expenses. Administrative expenses at the recipient level are activities related to: routine grant administration and monitoring activities, including the receipt and disbursement of program funds, the development and establishment of reimbursement and accounting systems, the preparation of routine programmatic and financial reports, compliance with grant conditions and audit requirements; and all activities associated with the recipient's contract award procedures; the development of requests for proposals, contract proposal review activities, negotiation and awarding of contracts, monitoring of contracts through telephone consultation, written documentation or onsite visits, reporting on contracts, and funding reallocation activities.

Administrative expenses at the subrecipient level include: (1) usual and recognized overhead activities, including established indirect rates for agencies; (2) management oversight of specific programs funded under the EHE initiative; and (3) other types of program support such as quality assurance, quality control, and related activities (exclusive of clinical

quality management (PCN 15-01, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/pcn-15-01.pdf>).

- e. Funds may be used for the establishment of a clinical quality management (CQM) program to assess the extent to which medical services that are provided to patients are consistent with the most recent HHS HIV clinical treatment guidelines and related opportunistic infections, and, as applicable, to develop strategies for ensuring that such services are consistent with the guidelines, and to ensure that improvements in the access to and quality of HIV health services are addressed. However, no more than 5 percent of the award can be used for clinical quality management expenses. For further guidance on CQM programs, refer to PCN 15-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/pcn-15-02-cqm.pdf>.
- f. Funds may be used for planning and evaluation activities. Planning and evaluation cost are associated with stakeholder engagement and process and outcome evaluation activities. Planning and evaluation costs may not exceed 10 percent of the grant award. Collectively, recipient administration and planning and evaluation cost may not exceed 15 percent of the grant award (42 USC 300ff-28(b)(4)).

2. *Activities Unallowed*

- a. Funds may not be used to make payments for any item or service to the extent that payment has been made or can reasonably be expected to be made for that item or service under any state compensation program, under an insurance policy (except for a program administered by or providing the services of the Indian Health Service), or under any federal or state health benefits program or by an entity that provides health services on a prepaid basis (42 USC 300ff-15(a)(6) and 300ff-27(b)(7)(f)).
- b. Funds may not be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug (Consolidated Appropriations Act, 2016 (Pub. L. No. 114-113), Division H, Title V, Section 520, and subsequent appropriations, as applicable. Other elements of syringe services programs may be allowable if in compliance with applicable HHS and HRSA-specific guidance. For further guidance on use of HRSA funds on syringe services programs, see <https://www.hiv.gov/federal-response/policies-issues/syringe-services-programs>.
- c. Funds may not be used to purchase or improve land or to purchase, construct or make permanent improvement to any building (42 USC 300ff-14(i) and 300ff-22(f)). (Minor alterations and renovations to an

existing facility to make it more suitable for the purposes of the award program are allowable with prior HRSA approval.)

- d. Funds may not be used to contract with or grant financial assistance to any providers of care that do not have a participation agreement under the state plan approved under title XIX of the Social Security Act, or, if not qualified to receive payments under such state plan (42 USC 300ff-14(g)).
- e. Funds may not be used to support clinical research.
- f. Funds may not be used to purchase Pre-Exposure Prophylaxis (PrEP) medications and related medical services or Post-Exposure Prophylaxis (PEP), as the person using PrEP or PEP does not have HIV and therefore not eligible for EHE initiative-funded or RWHAP-funded medication. For further guidance, see the HAB Program Letter on PrEP at <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/prep-letter-06-22-2016.pdf>.
- g. Funds may not be used to support international travel.
- h. Funds may not be used to make cash payments to intended recipients of services (42 USC 300ff-14(i) and 300ff-22(f)).

B. Allowable Costs/Cost Principles

Costs charged to federal funds under this program must comply with the cost principles at 45 CFR Part 75, Subpart E, and any other requirements or restrictions on the use of federal funding.

J. Program Income

The Notice of Award provides guidance on the use of program income. The addition method is used for EHE initiative award recipients. Program income must be used for activities described in III.A.1, “Activities Allowed.”

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**ASSISTANCE LISTING 93.767 CHILDREN'S HEALTH INSURANCE PROGRAM
(CHIP)****I. PROGRAM OBJECTIVES**

Title XXI of the Social Security Act (Act) authorizes the Children's Health Insurance Program (CHIP) to assist state efforts in initiating and expanding the provision of child health assistance to uninsured, low-income children. CHIP is a joint federal and state program that provides health coverage to uninsured children in families with incomes too high to qualify for Medicaid, but too low to afford private coverage. States may also choose to provide CHIP coverage, such as prenatal, delivery and postpartum care to targeted low-income uninsured individuals. See [Children's Health Insurance Program \(CHIP\) | Medicaid](#) for published guidance and information. Under Title XXI, states may provide child health assistance primarily for obtaining health benefits coverage through (1) obtaining coverage under a separate child health program that meets specific requirements, (2) expanding benefits under the state's Medicaid plan under Title XIX of the Act, or (3) a combination of both.

II. PROGRAM PROCEDURES**A. Overview**

The following paragraphs are intended to provide a high-level, overall description of how CHIP generally operates. It is not practical to provide a complete description of program procedures because CHIP operates under both federal and state laws and regulations and states are afforded flexibility in program administration. Accordingly, the following paragraphs are not intended to be used in lieu of or as a substitute for the federal and state laws and regulations applicable to this program.

Administration

Title XXI authorizes grants to states that initiate and expand health insurance programs for uninsured, low-income children. CHIP is administered by the states but is jointly funded by the federal government and states. Within broad federal guidelines, each state determines the design of its program, eligible groups, benefit packages, payment levels for coverage and administrative and operating procedures. States can design their CHIP program in one of three ways:

1. **Separate CHIP:** a program under which a state receives federal funding to provide child health assistance to uninsured, low-income children that meets the requirements of section 2103 of the Act.
2. **Medicaid expansion CHIP:** a program under which a state receives federal funding to expand Medicaid eligibility to optional targeted low-income children that meets the requirements of section 2103 of the Act.

3. Combination CHIP: a program under which a state receives federal funding to implement both a Medicaid expansion and a separate CHIP.

Each state is provided an annual CHIP allotment. States must provide matching funds to get their federal funding allotment. Federal payments under Title XXI to states are based on state expenditures under approved plans that could be effective on or after October 1, 1997. CHIP expenditures are matched by the federal government according to the states Enhanced Federal Medical Assistance Percentage (E-FMAP) and subject to their annual allotment.

To be eligible for funds under this program, states must submit a state child health plan (CHIP state plan). CHIP state plans and amendments to those plans are approved by CMS on behalf of the Secretary of the Department of Health and Human Services. The amendments are reviewed by an intra-departmental team, which must decide whether to approve or disapprove the amendment within a 90-day period. This “90-day clock” can be stopped by CMS sending the state a formal written request for additional information from the state and can be restarted at the same point when a response is formally received from the state. Copies of CHIP state plans are available on Medicaid.gov at <https://www.medicaid.gov/chip/state-program-information/index.html>.

Pursuant to section 2107(e)(1)(B) of the Act, cross referencing Title XIX requirements at 1902(a)(25) of the Act, states must take reasonable measures to determine the legal liability of third parties to pay for services furnished under the CHIP state plan. Such reasonable measures could include:

- Collect health insurance information during the initial eligibility application process and the redetermination process.
- Conduct diagnosis and trauma code edits to identify specific codes which could denote trauma related injury.
- Conduct data exchanges with:
 - state wage information collection agencies,
 - SSA wage and earnings files,
 - state title IV-A agencies,
 - state motor vehicle accident report files, and
 - state workers' compensation or Industrial Accident Commission files.

Waivers

The state may apply for a waiver of CHIP federal requirements under section 1115 of the Act. Waivers are intended to provide the flexibility needed to enable states to try

experimental, pilot, or demonstration projects that, in the judgment of the Secretary, are likely to assist in promoting the objectives of the CHIP program. Where approved by the Secretary, and subject to specific safeguards for the protection of beneficiaries and the program, waivers allow exceptions to CHIP state plan requirements and permit the state to implement innovative programs or activities on a time-limited basis, permit states to try new or different approaches to the efficient and cost-effective delivery of health care services to children or adapt their programs to the special needs of particular areas or groups of beneficiaries. The Secretary will approve only demonstration projects that are consistent with key principles of the CHIP statute. States' waiver authority is found at section 2107(e)(2)(A) of the Act (42 USC 1397gg(e)(2)(A)), which extends to CHIP the Medicaid waiver authority at section 1115 of the Act (42 USC 1315).

Medicaid and the CHIP play critical roles in helping states and territories respond to public health emergencies (PHEs) and disasters, including the outbreak of the Novel Coronavirus Disease 2019 (COVID-19). Over the course of the COVID-19 PHE, state Medicaid and CHIP agencies adopted many flexibilities offered by the CMS to respond effectively to local outbreaks, including changes to modify eligibility requirements and benefit packages. In addition, states made program changes to comply with the requirements of the Families First Coronavirus Response Act (FFCRA) (Pub. L. No. 116-127), as amended by the Coronavirus Aid, Relief, and Economic Security (CARES) Act (Pub. L. No. 116-136). Section 6008 of the FFCRA provides states with a temporary 6.2 percentage increase to the Federal Medical Assistance Percentage (FMAP) under section 1905(b) of the Act for certain Medicaid expenditures if states meet certain conditions, including a continuous enrollment condition for most Medicaid beneficiaries who were enrolled in the program as of March 18, 2020 through the end of the month in which the COVID-19 PHE ends.

CMS provided program flexibilities and federal matching funds for certain services that should be considered when planning single audits, as described below. In some instances, certain audit steps may not be relevant during this review period in light of the flexibilities offered to states. The flexibilities are unique to individual states and follow the typical documentation process, including CMS approval of state plans and waivers, in accordance with regulations and guidance. Note that CMS guidance on COVID-related flexibilities is updated regularly, and auditors should reference the latest CMS guidance available on Medicaid.gov at Tools and Checklists for States.

On March 3, 2022, CMS issued [State Health Official letter #22-001](#), which expands on earlier guidance designed to ensure that when the PHE ends and states resume routine operations, renewals of eligibility and transitions between coverage programs occur in an orderly process that minimizes beneficiary burden and promotes continuity of coverage. It is important for auditors to be aware of the requirements and flexibilities implemented by the state Medicaid or CHIP agency in response to the COVID-19 PHE so that a state is not determined to be out of compliance with requirements that would have been in place absent the PHE.

Background

On January 31, 2020, the Secretary of Health and Human Services (HHS) declared a PHE, effective as of January 27, 2020, for the entire United States to aid the nation's health care community in responding to COVID-19. On March 13, 2020, the president declared the ongoing COVID-19 pandemic of sufficient severity and magnitude to warrant an emergency declaration for all states, tribes, territories, and the District of Columbia pursuant to section 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 USC 5121-5207 (the "Stafford Act"), with a retroactive effective date of March 1, 2020. Since the initial declaration, the PHE has been renewed several times, with the latest renewal effective January 14, 2022, for an additional 90 days. During a PHE or disaster, CMS can rely on various legal authorities to grant states emergency flexibilities critical to ensuring that states can respond to the crisis expeditiously to protect and serve the general public.

On December 22, 2020, CMS issued State Health Official (SHO) letter #20-004, entitled Planning for the Resumption of Normal State Medicaid, CHIP, and Basic Health Program (BHP) Operations Upon Conclusion of the COVID-19 Public Health Emergency (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho20004.pdf>). This SHO letter provided guidance on returning to regular operations, including ending temporary authorities when the PHE concludes, making temporary changes permanent where legally permissible and otherwise appropriate, ending the expiring FFCRA provisions, and addressing pending eligibility and enrollment actions that developed during the PHE. As the PHE has been extended, the December 2020 guidance was updated through SHO letter #21-002 (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho-21-002.pdf>) and SHO letter #22-001 (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho22001.pdf>). States should have documentation available to describe the temporary changes made to their programs in response to the PHE as well as their plans for returning to normal operations following the PHE.

Some of the major areas to note include the following:

a. Telehealth

Federal telehealth requirements provide states with significant flexibility, and states have broad variability in their approaches to incorporating telehealth into their Medicaid and CHIP programs. CMS also recognizes that, in many circumstances, states have adopted Medicaid and CHIP telehealth policies that mirror Medicare telehealth policies, for which regulatory flexibilities have been provided during the COVID-19 PHE. To assist states with understanding the flexibilities regarding Medicaid and CHIP telehealth policy as it relates to COVID-19, CMS issued a COVID-19 Telehealth Toolkit, which was updated on October 14, 2020, that highlighted policy and operational questions that a state may consider when designing their approach (State Medicaid & CHIP Telehealth Toolkit, *Policy Considerations for States Expanding Use of Telehealth - COVID-19 Version* <https://www.medicaid.gov/medicaid/benefits/downloads/medicaid-chip-telehealth-toolkit.pdf>) (State Medicaid & CHIP Telehealth Toolkit, *Policy Considerations for States Expanding Use of Telehealth - COVID-19 Version: Supplement #1*. <https://www.medicaid.gov/medicaid/benefits/downloads/medicaid-chip-telehealth-toolkit-supplement1.pdf>). To support health care delivery while minimizing face-to-face

encounters during the COVID-19 PHE, many states have significantly accelerated adoption of telehealth, including through telephonic modalities, across a wide variety of disciplines.

b. Beneficiary Eligibility and Enrollment

States are facing a number of challenges due to the ongoing COVID-19 PHE that will leave many states with large volumes of pending eligibility and enrollment actions when the PHE ends. Different states have utilized different eligibility and enrollment flexibilities available during the PHE. As each state determines which flexibilities to maintain and which flexibilities to end, states are expected to develop an operational plan that documents and tracks compliance, including the timelines for making changes to application and renewal processing and verifications. Additional information is provided in SHO letter #21-002 and SHO letter #22-001 on planning for the resumption of normal operations at the conclusion of the PHE, which is available on Medicaid.gov at [SHO# 21-002: Updated Guidance Related to Planning for the Resumption of Normal CHIP and BHP Operations Upon Conclusion of the COVID-19 PHE \(medicaid.gov\) and sho22001.pdf \(medicaid.gov\)](#)

All states will need to develop a comprehensive “unwinding operational plan” to restore routine operations in Medicaid when the PHE eventually ends. States are permitted to use a phased approach to complete processing of any pending applications and resume timely and accurate determinations of eligibility on all new applications within four months after the eventual end of the PHE. To account for the time needed to complete renewals, CMS will consider states to be in compliance with the 12-month unwinding period announced in the August 2021 SHO provided that the state has initiated all renewals and other outstanding eligibility actions by the last month of the 12-month period. States will have two additional months (14 months total) to complete all pending actions initiated during the 12-month unwinding period.

The flexibilities afforded to states as they respond to the PHE related to beneficiary eligibility and enrollment could lead to unintended vulnerabilities and risks. CMS reiterates the importance of states considering the appropriate program integrity activities related to beneficiary eligibility and enrollment.

c. Managed Care

As previously described in CMS guidance (<https://www.medicaid.gov/state-resource-center/downloads/covid-19-faqs.pdf>), if a benefit or other identified flexibility is covered under a state plan, waiver, or demonstration, CMS encourages states to amend their managed care plan contracts, if not already included, to extend the same flexibilities to the managed care plans during the COVID-19 PHE. States may also amend their managed care contracts and assess if changes are needed to capitation rates to account for the COVID-19 PHE.

d. Other Benefits and Changes

In response to the COVID-19 PHE, many states have implemented emergency measures to ensure that Medicaid and CHIP beneficiaries continue to have access to essential health services. Specific to CHIP, states have submitted disaster relief state plan amendments (SPAs) to suspend, add, and revise policies that could prevent enrollees from accessing needed care during the PHE.

Payment Error Rate Measurement (PERM) Program

The PERM program is utilized by HHS to calculate national improper payment rates in Medicaid and CHIP. The regulations at 42 CFR Part 431, Subpart Q, specify requirements for estimating improper payments in Medicaid and CHIP. The PERM program annually measures the national Medicaid and CHIP improper payment rates and uses a 17-state, three-year rotation process. The national Medicaid and CHIP improper payment rates include findings from the most recent three cycle measurements so that all states are captured in one rate. The national improper payment rates are comprised of three components: fee-for-service, managed care, and eligibility. States are expected to issue corrective action plans to address the root cause of errors and deficiencies.

Source of Governing Requirements

This program is authorized by Section 4901(a) of the Balanced Budget Act of 1997 (BBA), Pub. L. No. 105-33, as amended by Pub. L. No. 105-100, which added Title XXI to the Social Security Act and made subsequent amendments to Title XXI. Title XXI authorizes CHIP to assist state efforts to initiate and expand the provision of child health assistance to uninsured, low-income children. Title XXI is codified at 42 USC 1397aa-1397jj. The regulations for this program are found at 42 CFR Part 457.

The Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA) (Pub. L. No. 111-3) reauthorized CHIP through fiscal year (FY) 2013. The Patient Protection and Affordable Care Act (ACA) (Pub. L. No. 111-148) reauthorized CHIP through 2019 and extended CHIP funding through FY 2015. The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. No. 114-10) extended CHIP funding through FY2017. Most recently, Congress extended federal funding for the CHIP through September 30, 2027, through the Helping Ensure Access for Little Ones, Toddlers, and Hopeful Youth by Keeping Insurance Delivery Stable Act (referred to as the HEALTHY KIDS Act and included in Pub. L. No. 115-120) and the Advancing Chronic Care, Extenders, and Social Services Act (referred to as the ACCESS Act and included in Pub. L. No. 115-123).

The Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260) established a new requirement to extend full Medicaid eligibility to citizens of the Freely Associated States who are living in the United States under the Compacts of Free Association (COFA).

This program is subject to the requirements of 45 CFR Part 75 (the HHS implementation of 2 CFR Part 200) and 45 CFR Part 95.

Availability of Other Program Information

States and other interested parties can access information on the department’s policies on this and other issues at <http://www.medicaid.gov/>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	Y	Y	N	N	Y	N	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

States have general flexibility in allocating their individual allotments toward activities needed to operate the CHIP (section 2105 of the Act (42 USC 1397ee(a)). In addition to expenditures for child health assistance under the plan for targeted low-income children, other allowable activities, to the extent permitted by 42 USC 1397ee(c), include payment of other child health assistance for targeted low-income children; expenditures for health services initiatives for improving the health of children (targeted and other low income) under the plan; expenditures for outreach activities; expenditures for translation or interpretation services in connection with the enrollment of, retention of, and use of services under Title XXI by individuals for whom English is not their primary language

(as found necessary by the Secretary for the proper and efficient administration of the state plan); and other reasonable costs incurred by the state to administer the plan (42 USC 1397ee).

Managed Care

A state may use managed care for the delivery of some or all its CHIP benefits and services for either all or a subset of the CHIP populations served under the CHIP state plan. Under managed care, the delivery of benefits and services are through contracted arrangements between state CHIP agencies and managed care plans that accept a set per member per month (capitation) payment for the services.

States must comply with the managed care regulations at 42 CFR Part 457, Subpart L, for utilization of a managed care delivery system. These regulations align CHIP rules with those of other health insurance coverage programs, such as Medicaid and the Marketplace, to reflect how states purchase managed care for beneficiaries and to strengthen the consumer experience and key consumer protections.

CHIP managed care guidance can be found at <https://www.medicaid.gov/chip/managed-care/index.html>.

Health Services Initiatives (HSI)

Under section 2105(a)(1)(D)(ii) of the Act (42 USC 1397ee(a)(1)(D)(ii)), states have the option to develop state-designed HSIs that improve the health of low - income and targeted low-income children. Under implementing regulations at 42 CFR § 457.10, HSIs are activities that protect the public health, protect the health of individuals, improve or promote a state's capacity to deliver public health services, or strengthen the human and material resources necessary to accomplish public health goals related to improving the health of children. HSIs may also be directed at low-income pregnant women or parents; however, HSIs may only provide services for adults if the project directly improves the health of children.

Federal funding for HSIs is expended from a state's available CHIP allotment for a fiscal year. Under section 2105(c)(2)(A) of the Act (42 USC 1397ee(c)(2)(A)), claims for HSIs and certain other expenditures such as administrative expenses cannot exceed 10 percent of the total amount of title XXI funds expended for a fiscal year, calculated as described at 42 CFR 457.618(c). . States must fund all CHIP state plan benefits before using allotment for HSIs.

HSIs are implemented through an amendment to the CHIP state plan. States' approved HSI programs are described in section 2.2 of the CHIP state plan template. HSI budget information is provided at section 9.10 of the CHIP state plan.

CHIP HSI guidance can be found at <https://www.medicaid.gov/federal-policy-guidance/downloads/cib090420.pdf>.

Premium Assistance

A state may pay premiums for employer sponsored insurance on behalf of a CHIP beneficiary if it is cost effective to do so. When providing premium assistance, states must ensure that children have access to all mandatory benefits provided under the CHIP state plan, and that they are not required to incur greater out-of-pocket costs for premiums, deductibles, co-payments, or similar cost sharing charges than under the CHIP state plan. Individual state premium assistance programs are described in the CHIP state plan.

2. Activities Unallowed

Federal funds may not be expended under the CHIP state plan to pay for any abortion or to assist in the purchase, in whole or in part, of health benefit coverage that includes coverage of abortion, except, if necessary, to save the life of the mother or if the pregnancy is the result of incest or rape (Section 2105(e) of the Act (42 USC 1397ee(c)(7))).

B. Allowable Costs/Cost Principles

1. CHIP regulations under 42 CFR 457.628(a) make the Medicaid requirements at 42 CFR 433.50 through 433.74 regarding sources of nonfederal share and Health Care-Related Taxes and Provider Related Donations applicable to CHIP in the same manner as they apply to state Medicaid programs. Before calculating the amount of FFP, certain revenues received by a state will be deducted from the state's medical assistance expenditures. The revenues to be deducted are (1) donations made by health care providers or related entities (except for bona fide donations and, subject to a limitation, donations made by providers for the direct costs of out-stationed eligibility workers); and (2) impermissible health care-related taxes that exceed a specified limit (Section 1903(w) of the Act (42 USC 1396b(w)); 42 CFR 433.57).

- (a) "Provider-related donations" are any donations or other voluntary payments (in-cash or in-kind) made directly or indirectly to a state or unit of local government by: (1) a health care provider, (2) an entity related to a health care provider, or (3) an entity providing goods or services under the CHIP state plan and paid as administrative expenses. "Bona fide provider-related donations" are donations that have no direct or indirect relationship to payments made under Title XIX (42 USC 1396 et seq.) to (1) the donating provider, (2) providers furnishing the same class of items and services as the donating provider, or (3) any related entity (42 CFR 433.58(d) and 433.66(b)).
- (b) Permissible health care-related taxes are those taxes that are broad-based; uniformly applied to a class of health care items, services, or providers;

and do not hold a taxpayer harmless for the costs of the tax. A tax program for which CMS has granted a waiver may also be considered permissible health care-related taxes. Health care-related taxes that do not meet these requirements are impermissible health care-related taxes (42 CFR 433.68(b)).

These provisions apply to the 50 states and the District of Columbia, except those states whose entire Medicaid program is operated under a waiver granted under Section 1115 of the Act (42 CFR 433.50(c)).

2. The 42 CFR 457.628(b) makes 45 CFR Part 75—Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards (except as specifically excepted) applicable to the CHIP program.
3. The 42 CFR 457.1203 requires each CHIP managed care plan to calculate and report a medical loss ratio (MLR) for rating periods in CHIP managed care contracts as of the state fiscal year beginning on or after July 1, 2018. Under 42 CFR 457.1203(f), if a state elects to mandate a minimum MLR for a CHIP managed care program, that minimum MLR must be at least 85 percent.

With regard to capitation rate setting for CHIP managed care plans, under 42 CFR 457.1203(a), states must use payment rates based on public or private payment rates for comparable services for comparable populations, consistent with actuarially sound principles as defined at Section 457.10. In addition, for Medicaid and CHIP managed care plans, the rates must be developed so that the managed care plan is projected to meet an 85 percent MLR (42 CFR 457.1203(c)(1)).

E. Eligibility

Auditors may combine III.A, “Activities Allowed or Unallowed,” III.B, “Allowable Costs/Cost Principles,” and III.E, “Eligibility.” Therefore, compliance requirements related to amounts provided to, or on behalf of, eligible individuals and presumptively eligible individuals may be combined with III.A, “Activities Allowed or Unallowed” and III.B, “Allowable Costs/Cost Principles” such as, was the service incurred during the period the individual was eligible to receive benefits and was the provider paid the correct amount for the service billed.

The state verifies the financial and nonfinancial factors of eligibility, with two exceptions described below, by checking electronic data sources in accordance with federal requirements at 42 CFR 457.380 and state requirements (as documented in the CHIP state plan, verification plan, and eligibility manual). The state is required (as described at 42 CFR 457.965) to maintain facts in the case file to support the eligibility determination. When data sources used by the state are not available to the auditor, or information is not required to be available for the period under audit, auditors would not be expected to test verification other than the requirement to maintain information in the case file. For states that accept applicant self-attestation for household size or income, and do not require

further verification or documentation, the auditors are not expected to test beyond the requirements of the state.

The exceptions to the verification process described above are eligibility determinations made by an Exchange, either the Federally-facilitated Exchange (FFE) or a State-based Exchange (SBE), elements of a determination made by an express lane agency, and presumptive eligibility determinations made by qualified entities. In states that have an agreement with the FFE or SBE, through which the Exchange determines CHIP eligibility, the state relies on the verifications conducted by the Exchange and auditors are not expected to test verification. When express lane eligibility is used, the CHIP agency relies upon elements of a determination made by an express lane agency. For presumptive eligibility determinations, the qualified entity accepts attestation of all needed information and states may not require verification or documentation of any eligibility criteria. When testing a presumptive eligibility determination, auditors are not expected to test verification.

1. Eligibility for Individuals

a. Eligibility Determination

- (1) Eligibility for CHIP is based on the application of modified adjusted gross income and household definition, in addition to other permissible eligibility standards, for example standards relating to geographic area, age (up to, but not including age 19), and insurance status. In addition to meeting these standards, in order to be eligible for CHIP, a child must be uninsured (determined ineligible for Medicaid and not covered through a group health plan or creditable health insurance, a citizen or meet immigration requirements, a resident of the state, and eligible within the state's CHIP income range, based on family income, and any other specified rules in the CHIP state plan) see <https://www.medicaid.gov/chip/eligibility/index.html>. States have flexibility in determining eligibility levels for individuals for whom the state will receive enhanced matching funds within the guidelines established under the Act. Generally, a state may not cover children with a higher household income without covering children with a lower household income, nor deny eligibility based on a child having a preexisting medical condition. States are required to include in their CHIP state plans a description of the standards used to determine the eligibility of targeted low-income children. CHIP state plans should be consulted for specific information concerning individual eligibility requirements (42 CFR 457.315 and 457.320, 42 USC 1397bb(b)).

States have the option to extend eligibility to low-income targeted pregnant women. There is no income eligibility level for pregnant women in CHIP that is lower than the state's Medicaid level, and

states must cover pregnant women up to 185 percent of the federal poverty level before they can elect the option to include pregnant women in its CHIP state plan (Section 2112(b) of the Act).

- (2) CHIP beneficiaries must either be US citizens or qualified noncitizens (aliens). Qualified aliens, as defined at 8 USC 1641, who entered the United States on or after August 22, 1996, are not eligible for a separate child health program under Title XXI (CHIP) for a period of five years, beginning on the date the alien became a qualified alien, unless the alien is exempt from this five-year bar under the terms of 8 USC 1613, or unless the state has adopted the option to provide coverage to these lawfully residing children, as authorized under Section 214 of CHIPRA (42 USC 1396b(v)(4)(ii)). States must provide coverage under a separate child health program under Title XXI to all other otherwise eligible qualified aliens who are not barred from coverage under 8 USC 1613 (42 CFR 457.320(b)(6)).

States may elect to provide medical assistance, notwithstanding section 401(a), 402(b), 403, and 421 of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, to children and pregnant women who are lawfully residing in the United States, including lawfully residing COFA migrants, and who are otherwise eligible for such assistance. This optional coverage in CHIP is only applicable if the state has elected to apply this allowance with respect to such category of children or pregnant women under Title XIX (Pub. L. No. 111-3, Section 214 (codified at section 2107(e)(1)(N) of the Act, cross referencing section 1903(v)(4) of the Act (42 USC 1396b(v)(4)).

The Extending Government Funding and Delivering Emergency Assistance Act (Pub. L. No. 117-43) provided that Afghan evacuees who enter the United States as parolees or with a Special Immigrant Visa are eligible for CHIP to the same extent as refugees, for a limited time period, provided that they meet all other eligibility requirements. Additional information is provided in the November 1, 2021 fact sheet on Health Coverage Options for Afghan Evacuees at <https://www.medicaid.gov/medicaid/eligibility/downloads/hlth-cov-option-afghan-evac-fact-sheet.pdf>.

- (3) States must accept applications submitted online, by telephone, via mail, or in person. This includes electronic, telephonically recorded, and handwritten signatures. The CHIP agency must have facts in the case record to support the agency's eligibility determination, including a record of verification of income and citizenship or satisfactory immigration status for each individual.

The state must provide notice of its decision concerning eligibility and provide timely and adequate notice of the basis for discontinuing assistance (42 CFR sections 457.330, 457.340).

- (4) States are directed, at 42 CFR 457.340(d), to determine eligibility promptly and without undue delay. The determination of eligibility may not exceed 45 days (42 CFR 435.912).
- (5) Regulations 42 CFR 457.348 and 457.350 require coordination between the CHIP agency and other insurance affordability programs, including an Exchange. Typically, electronic accounts must be transferred from the CHIP agency to the Exchange and vice versa. States utilizing the FFE must enter into an agreement in which the FFE makes either a determination or an assessment of CHIP eligibility and sends the individual's electronic account to the agency for enrollment (FFE determination) or a final determination and enrollment (FFE assessment). Additional information may be found in the July 25, 2016 CMCS Informational Bulletin on Coordination of Eligibility and Enrollment between Medicaid, CHIP and the Federally Facilitated Marketplace (FFM or "Marketplace") (<https://www.medicaid.gov/sites/default/files/federal-policy-guidance/downloads/cib072516.pdf>).
- (6) When determining eligibility for a child, the CHIP agency may rely on elements of a determination made by an express lane agency (as defined in Section 4 of the CHIP state plan template) as to whether a child satisfies one or more requirements of CHIP eligibility. The CHIP agency may use an income determination from an express lane agency without regard to differences in budget unit, income disregards, deeming, or other differences in methodology between the express lane agency and CHIP. Auditors are not expected to test verification of express lane determinations relied upon by the CHIP Agency. This policy is set out at sections 2107(e)(1)(H) and 1902(e)(13) of the Act (42 USC 1397gg(e)(1)(H) and 1396a(e)(13) respectively); more information is available in state Health Official Letter #10-003, issued on February 4, 2010 (<https://downloads.cms.gov/cmsgov/archived-downloads/SMDL/downloads/SHO10003.pdf>).

b. Eligibility Verification

- (1) States must request information from reliable electronic data sources, including other agencies in the state and other state and federal programs to the extent that such information is determined useful in verifying the financial eligibility of an individual. As described in the state's verification plan and in state policies and

procedures, this may include information from agencies such as the state Wage Information Collection Agency, the Social Security Administration, and the Internal Revenue Service. States may also use information related to eligibility or enrollment from other state programs such as the Supplemental Nutrition Assistance Program. If information provided by or on behalf of an individual is reasonably compatible with information obtained from the electronic data sources, as described in the state's verification plan, then the agency must determine or renew eligibility based on such information and may not require the individual to provide any further documentation. If the information is not reasonably compatible, then the agency must provide the individual with a reasonable period of time to explain the discrepancy or furnish additional information (42 CFR 457.380; 42 CFR 435.952).

- (2) States may choose to accept self-attestation of information needed to determine or renew eligibility except with respect to income and citizenship or immigration status. When self-attestation is accepted, further information, including documentation, cannot be required from the individual. In such cases, the auditor would not be expected to test documentation other than required by the state. States must follow the requirements described at 42 CFR 457.380 for verification and documentation of income and citizenship and immigration status.

c. Periodic Renewal

As required at 42 CFR 435.916 and 42 CFR 457.343, states must renew enrollees' CHIP eligibility once every 12 months and no more frequently than once every 12 months. When renewing eligibility, states must first attempt to renew based on reliable information available to the agency without requiring information from the individual. If sufficient information is not available to complete a renewal, or if the state has information that suggests that the beneficiary is ineligible, the state must provide the beneficiary with a prepopulated renewal form and inform the individual of any additional information or documentation needed to determine eligibility. Additional information may be found in the CMCS Informational Bulletin on Medicaid and Children's Health Insurance Program (CHIP) Renewal Requirements issued on December 4, 2020 ([Medicaid and Children's Health Insurance Program Renewal Requirements](#)).

d. Continuous Eligibility During Pregnancy & Postpartum Coverage

Pregnant adolescents eligible as "targeted low-income children" in CHIP can receive prenatal and postpartum care along with other child health assistance, and states may extend CHIP eligibility to "targeted low-income

pregnant individuals” too, through the end of the 60-day postpartum period. Section 9812 of the American Rescue Plan Act (Pub. L. 117-2) gave states a new state plan option, beginning April 1, 2022, to provide 12 months of extended postpartum coverage to pregnant individuals enrolled in Medicaid and CHIP. If a state elects the option in Medicaid, pregnant “targeted low-income children,” and individuals eligible as “targeted low-income pregnant individuals” who are enrolled in a separate CHIP must also receive the extended postpartum coverage. The 12-month postpartum period begins on the last day of a beneficiary’s pregnancy and extends through the end of the month in which the 12-month period ends. Individuals eligible for extended postpartum coverage are also entitled to continuous eligibility, so they remain eligible during pregnancy and the postpartum period regardless of any changes in circumstances including income. States have the option to extend child health assistance to “unborn children” who meet other applicable eligibility criteria for coverage under the CHIP state plan, thereby providing prenatal coverage to pregnant individuals who themselves are not eligible for CHIP. However, postpartum coverage for pregnant individuals who received services during pregnancy on behalf of their unborn child is limited and these individuals are not eligible for extended postpartum coverage. Additional information may be found in SHO# 21-007 (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho21007.pdf>).

e. Presumptive Eligibility

Presumptive eligibility (PE) is a state option to facilitate enrollment and immediate access to services for children who are likely eligible for CHIP without having to wait for a full application to be processed. CHIP regulations at 42 CFR 457.355 outline the requirements for establishing a program of presumptive eligibility for children. The options elected by each state are described in the CHIP state plan.

When electing the PE option, states designate qualified entities, such as health care providers, community-based organizations, and schools to make PE determinations. These qualified entities are trained on the state’s PE screening process and state-specific requirements for PE. In many states, qualified entities also help individuals to complete the full application process. A qualified entity is responsible for collecting and recording all information necessary to make a PE determination.

To be determined presumptively eligible, an individual must meet the basic requirements of eligibility as a targeted low-income child, including household income at or below the standard established by the state. In addition to the basic requirements of the eligibility group, states may, but are not required to, consider state residency and US citizenship or eligible

immigration status when making a PE determination. Other information that would be collected on a full application, cannot be required for a PE determination. In addition, individuals attest to all information needed for a PE determination. States may not require verification or documentation of any eligibility criteria as a condition of presumptive eligibility.

The PE period begins the day on which the qualified entity makes the PE determination. The end date varies depending on whether or not the individual submits a CHIP application. If the individual submits a CHIP application by the last day of the month following the month in which PE was determined, the PE period will continue until full CHIP eligibility is either approved or denied. If the individual does **not** submit a CHIP application, the PE period ends on the last day of the month following the month in which PE was determined. States must adopt reasonable standards regarding the number of PE periods that will be authorized for an individual.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

G. Matching, Level of Effort, Earmarking

1. Matching

- a. The state matching rate for its CHIP expenditures is determined in accordance with the federal matching rate for such expenditures, referred to as the enhanced federal medical assistance percentage (Enhanced FMAP) for a state. That is, the CHIP state matching rate is calculated by subtracting the 1905(b) of the Act Medicaid FMAP rate from 100, taking 30 percent of the difference, and then adding it to the 1905(b) Medicaid FMAP rate. The Enhanced FMAP for CHIP is generally about 15 percentage points higher than the Medicaid rate. For example, if a state has a 50% match rate for Medicaid, they may have a 65% match rate for CHIP. The Enhanced FMAP is calculated in accordance with section 2105(b) of the Act, 42 USC 1397ee(b), which provides that the Enhanced FMAP for a state shall not exceed 85 percent except during the periods of October 1, 2015 through September 30, 2019, where the enhanced FMAP was increased by 23 percentage points (not to exceed 100 percent) and October 1, 2019 through September 30, 2020, where the enhanced FMAP is reduced to an increase of 11.5 percentage points (not to exceed 100 percent). The increase to the enhanced FMAP does not apply to certain categories of expenditures as described in the last sentence of 42 USC 1397ee(b).

Calculated FMAPs and enhanced FMAPs may be found at [Federal Register: Federal Financial Participation in State Assistance Expenditures; Federal Matching Shares for Medicaid, the Children's Health Insurance Program, and Aid to Needy Aged, Blind, or Disabled Persons for October 1, 2021 Through September 30, 2022](#) (42 USC 1397ee(a) and (b)). Because the EFMAP under section 2105(b) of the Act is calculated using the 1905(b) FMAP as a “base,” in general, any fluctuations to the 1905(b) FMAP amount for a period will affect the EFMAP determination under 2105(b) of the Act for such period unless otherwise precluded in statute.

- b. A qualifying state as described under section 2105(g) of the Act, 42 USC 1397ee(g) may elect to be paid from the state’s allotment for any of FYs 2009 through 2027, an amount equal to the additional amount that would have been paid to the state under Title XIX with respect to expenditures if the enhanced FMAP had been substituted for the FMAP (section 2105(g)(4) of the Act (42 USC 1397ee(g)(4)). The qualifying states are Connecticut, Hawaii, Maryland, Minnesota, New Hampshire, New Mexico, Rhode Island, Tennessee, Vermont, Washington, and Wisconsin (as determined by CMS on the basis of the criteria in Pub. L. No. 108-74, Section 1(g)(2) and Pub. L. No. 108-127, Section 1).

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

- a. In order to receive federal matching funds for CHIP expenditures at the enhanced matching rate, each state must continue to maintain its Medicaid eligibility standards and the methodologies that were applied in its Medicaid state plans as of June 1, 1997 (42 USC 1397ee(d)(1) and 1397jj(b)).
- b. The maintenance of effort (MOE) provisions at section 2105(d)(3) and sections 1902(a)(74) and 1902(gg)(2) of the Act (42 USC 1397ee(d)(3) and 1396a(a)(74) and (gg)(2)) specify that as a condition of receiving federal funding for CHIP or Medicaid (with certain exceptions), states must maintain Medicaid and CHIP “eligibility standards, methodologies, and procedures” for children that are no more restrictive than those in effect on March 23, 2010. The MOE requirement was first implemented under the American Recovery and Reinvestment Act (ARRA) and extended by the Patient Protection and Affordable Care Act (ACA). Section 3002 of the Helping Ensure Access for Little Ones, Toddlers, and Hopeful Youth by Keeping Insurance Delivery Stable Act (referred to as the HEALTHY KIDS Act and included in Pub. L. No. 115-120) extends the MOE requirements for children in CHIP and Medicaid through FY 2023, and Section 50101 of the Advancing

Chronic Care, Extenders and Social Services Act (referred to as the ACCESS Act and included in Pub. L. No. 115-123), extends the MOE requirements for children in CHIP and Medicaid through FY 2027. Section 3002 of the HEALTHY KIDS Act amends the MOE provisions such that starting in FY 2020 and through FY 2027, the MOE provision is applicable to children in families with incomes that do not exceed 300 percent of the FPL. States with eligibility levels above 300 percent of the Federal Poverty Level (FPL) will have the option of maintaining or reducing existing coverage levels to 300 percent FPL at that time.

2.2 Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

Expenditures not directly related to providing child health insurance assistance under the plan are limited to 10 percent of the state's total expenditures through CHIP. The following expenditures are subject to the 10 percent limit: (a) payment for other child health assistance for targeted low-income children; (b) expenditures for health services initiatives under the state child health assistance plan for improving the health of children; (c) expenditures for outreach activities; (d) expenditures for translation and interpretation services in connection with the enrollment, retention, and use of services under Title XXI by individuals for whom English is not their primary language (as found necessary by the Secretary for the proper and efficient administration of the CHIP state plan); and (e) other reasonable costs incurred by the state to administer the state child health assistance plan (42 USC 1397ee(c)). States may apply for a waiver, or variance of this 10 percent cap under 42 USC 1397ee(c)(2). If applicable, information regarding such a waiver is in the CHIP state plan.

The 10 percent limit is applied on an annual fiscal-year basis and is calculated based on (a) the total amounts of expenditures, and (b) the quarter in which such expenditures are claimed by the state for the fiscal year (42 USC 1397ee).

H. Period of Performance

The availability of allotment amounts determined under section 2104(m) of the Act for FY 2009 and each fiscal year thereafter, shall remain available for expenditure by the state through the end of the succeeding fiscal year as provided under section 2104(e) of the Act. (i.e., the year of award and one subsequent fiscal year) (42 USC 1397dd(e)).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable

- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable for cash status; Not Applicable for expenditure reporting
- d. *CMS-21, Quarterly Children’s Health Insurance Program Statement of Expenditures for Title XXI (OMB No. 0938-0731)*

Key Line Items – The following line items contain critical information:

- 1. *CMS-21 Base* – The CMS-21 consists of three parts: CMS-21 Base, CMS-21B, and CMS-21C. Only CMS-21 Base is expected to be tested for compliance.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Provider Eligibility (Screening and Enrollment)

Compliance Requirements In order to receive CHIP payments, CHIP providers must: (1) be licensed in accordance with federal, state, and local laws and regulations to participate in the CHIP program (42 CFR 457.900); (2) screened and enrolled in accordance with 42 CFR Part 455, Subpart E (sections 455.400 through 455.470); and make certain disclosures to the state (42 CFR 457.990(a), cross referencing 455.107). CHIP managed care network providers are subject to the same disclosure, screening, enrollment, and termination requirements that apply to Medicaid fee-for-service providers in accordance with 42 CFR Part 438, Subpart H. Guidance was provided to states in the Medicaid Provider Enrollment Compendium (MPEC) at <https://www.medicaid.gov/sites/default/files/2021-05/mpec-3222021.pdf> to enroll CHIP providers into their Medicaid programs to ensure that they meet federal requirements. Providers who have been barred from participation by the OIG exclusion list are not eligible to be enrolled in the CHIP program (42 CFR 457.990, 42 CFR 455 Subpart E). Lists may be found at https://oig.hhs.gov/exclusions/?utm_source=oigNewsletter&utm_medium=oig-nl-nav&utm_campaign=leie-nl.

Audit Objectives Determine whether CHIP providers of medical services have the required medical licenses and are eligible to participate in CHIP in accordance with federal, state, and local laws and regulations.

Suggested Audit Procedures

- a. Obtain an understanding of the CHIP state plan's provisions required licensure and entering into agreements with providers.
- b. Select samples from both CHIP fee-for-service providers and managed care network providers to ascertain if the:
 - (1) The provider is screened, licensed, and enrolled in accordance with the CHIP state plan and the requirement of 42 CFR 455 Subpart E.
 - (2) The provider complied with the requirements of the CHIP state plan.
 - (3) The provider was not on the OIG's exclusion list at the time the services were provided.

2. Refunding of Federal Share of CHIP Overpayments to Providers

Compliance Requirements Federal regulations at 42 CFR 457.628 make the regulations at CFR 433.312 through 433.322 regarding overpayments applicable to CHIP. CMS rules at 42 CFR 433 Subpart F describe the requirements State Medicaid Agencies (SMAs) are to follow related to refunding the federal share of Medicaid overpayments made to providers. Pursuant to 1903(d)(2)(C) of the Act (42 USC 1396b), states have up to one (1) year from the date of discovery of the overpayment to recover or attempt to recover the overpayment before the federal share must be refunded to CMS via Form CMS-64 Summary, Line 9C1- Fraud, Waste & Abuse Amounts, regardless of whether recovery is made from the provider, for which the federal share must be refunded to CMS via Form CMS-21 Summary, Line 4 - Adjustments Decreasing Claims - Collections. The state must credit the federal share to CMS as outlined under 42 CFR 433.320(a)(2) either in the quarter in which the recovery is made or in the quarter in which the one-year period following discovery ends, whichever is earlier, with limited exceptions. Under 42 CFR 433.316(d), for overpayments resulting from fraud, if not collected within one year of discovery, the SMA has until 30 days after the final judgment of a judicial or administrative appeals process to return the federal share.

Additionally, in accordance with 42 CFR 433.320(a)(4), the state will be charged interest for any non-recovered, non-refunded overpayment amounts. Any appeal rights extended to a provider does not extend the date of discovery (42 CFR 433.316(h)).

The repayment of the federal share is not required in cases where the state is unable to obtain recovery because the provider has filed for bankruptcy or the provider is otherwise out of business as outlined in 42 CFR 433.318.

The 42 CFR 433.320(c)(1) allows for downward adjustment previously credited to CMS if it is properly based on the approved CHIP state plan, federal law and regulations governing Medicaid, and the appeals resolution process specified in state administrative policies and procedures. States are not able to enter into settlement agreements with providers that reduces the federal share of the overpayment in order to avoid the expense of litigation. The Departmental Appeals Board (DAB) decision No. 1391 from February 19, 1993 (<https://www.hhs.gov/sites/default/files/static/dab/decisions/board-decisions/1993/dab1391.html>), addressed overpayment settlements between the states and providers. This decision affirmed that states may not reduce the federal share by settling overpayment receivables for less than the actual amount of the overpayment based on anticipated success in litigation or made simply to avoid administrative costs or litigation expenses.

For managed care, SMAs are required per 42 CFR 438.608(d)(1) to specify in each managed care contract how recoveries of provider overpayments must be treated. The refunding of the federal share of any overpayment recovered by an MCP is dependent on the retention policy outlined in the contract between the state and the MCP as required under 42 CFR 438.608(d)(1). If the state requires the MCP to refund overpayments to the state, the state must refund the federal share of that overpayment to CMS in accordance with the regulations at 42 CFR 433.312. The state must apply the FMAP rate in effect at the time the overpayment was made to determine the amount to be refunded to CMS.

Audit Objectives Determine whether the SMA reported and returned CHIP provider overpayments in accordance with federal requirements.

Suggested Audit Procedures

- a. Review applicable federal laws and regulations, including 1903(d)(2)(C) of the Act (42 USC 1396b), 42 CFR 433 Subpart F, and the Departmental Appeals Board Decision No. 1391.
- b. Obtain an understanding of the process to identify overpayments.
- c. Obtain managed care contract(s) to determine how recoveries made by managed care plans to providers are treated.
- d. Perform tests to ascertain if the federal share has been returned accurately in accordance with federal laws and regulations, including ensuring the full amount was refunded and any downward adjustment was made.

3. Medical Loss Ratio (MLR)

Compliance Requirements For all contracts, the state must ensure that each managed care organization (MCO), prepaid inpatient health plan (PIHP), and prepaid ambulatory health plan (PAHP) submits a report described in 42 CFR 457.1203(e), which cross-references the data elements for Medicaid managed care plans in 42 CFR 438.8(k) and 438.8. The report should contain the required 13 data elements in the regulation, reflect the correct reporting years, and contain an attestation of accuracy regarding the

calculation of the MLR. The state should have a method to indicate when the report(s) are due from plans and should not accept multiple submissions from plans unless the capitation rates are revised retroactively.

Audit Objectives Determine whether the state's oversight of the content and submission of MLR reports meets the federal requirements.

Suggested Audit Procedures

- a. Perform procedures to ascertain if the state obtained the required MLR reports;
- b. Verify the 13 required elements are included;
- c. Verify the reporting period covered is 12 months;
- d. Verify the report contains an attestation statement to address accuracy;
- e. Ascertain if the state did not permit plans to submit multiple MLR reports for a specific reporting year except when a state had retroactive changes to capitation payments.

4. Managed Care Financial Audit

Compliance Requirements Two types of audits are required for managed care:

1. Audited Financial Reports – The contract with each MCO, PIHP, and PAHP must require them to submit to the state audited financial reports specific to the Medicaid contract on an annual basis. The audit must be conducted in accordance with generally accepted accounting principles and generally accepted auditing standards (42 CFR 438.3(m)).
2. Periodic Audits – Effective no later than for rating periods for contracts starting on or after July 1, 2017, the state must periodically, but no less frequently than once every three years, conduct, or contract for an independent audit of the accuracy, truthfulness, and completeness of the encounter and financial data submitted by, or on behalf of each MCO, PIHP, and PAHP and post the results of these audits on its website (42 CFR Part 438, Subpart H (as adopted in CHIP at 42 CFR 457.1285); May 6, 2016, *Federal Register* (81 FR 27497); OMB No. 0938-0920)).

Audit Objectives Determine whether the required audits were conducted and the audit reports for the Periodic Audits were posted on the state's website.

Suggested Audit Procedures

- a. Review the state's policies and operating procedures for obtaining audited financial reports, conducting these required audits, and for posting the Periodic Audits on the state's website.

- b. Perform tests to ascertain if: (1) the state obtained annually the required Audited Financial Reports from each MCO, PIHP, and PAHP; and (2) the independent auditor's reports on the financial report stated the audit was conducted in accordance with generally accepted auditing standards.
- c. Perform tests to ascertain if: (1) the state conducted or contracted for the required Periodic Audits for each MCO, PIHP, and PAHP at least once in the most recent three-year period; and (2) the audits were posted on the state's website.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**ASSISTANCE LISTING 93.775 STATE MEDICAID FRAUD CONTROL UNITS****ASSISTANCE LISTING 93.777 STATE SURVEY AND CERTIFICATION OF HEALTH CARE PROVIDERS AND SUPPLIERS (Title XVIII) MEDICARE****ASSISTANCE LISTING 93.778 MEDICAL ASSISTANCE PROGRAM (Medicaid; Title XIX)**

Medicaid is the largest dollar federal grant program and, under OMB budgetary guidance and Pub. L. No. 107-300, HHS is required to provide an estimate of improper payments for Medicaid. Improper payments mean any payments that should not have been made or that were made in an incorrect amount (including overpayments and underpayments) under statutory, contractual, administrative, or other legally applicable requirements. This includes payments for services provided to ineligible providers, payments for an ineligible service, duplicate payments, payments for services not received, payments for ineligible or unenrolled individuals, claims that do not have necessary documentation, and payments that do not account for credit for applicable discounts.

I. PROGRAM OBJECTIVES

Note: This program is considered a “higher risk” program for 2022, pursuant to 2 CFR section 200.519. Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process.

Medical Assistance Program

The Social Security Amendments of 1965 created Medicaid by adding Title XIX to the Social Security Act, 42 USC 1396 et seq. Under the program, the federal government provides matching funds to states to enable them to provide medical assistance to residents who meet certain eligibility requirements. The objective is to help states provide medical assistance to residents whose incomes and resources are insufficient to meet the costs of necessary medical services. Medicaid serves as the nation's primary source of health coverage for low-income populations.

States are not required to participate. Those that do must comply with federal Medicaid laws under which each participating state administers its own Medicaid program, establishes eligibility standards, determines the scope and types of services it will cover, and sets the rate of payment. Eligibility requirements vary from state to state, and because someone qualifies for Medicaid in one state, it does not mean he or she will qualify in another. The federal Centers for Medicare & Medicaid Services (CMS) monitors the state-run Medicaid programs and establishes requirements for service delivery, quality, funding, and eligibility standards.

While not precluding an auditor from determining that the Medicaid cluster qualifies as a low-risk program (if prior audits have shown strong internal controls and compliance with Medicaid requirements), the above should be considered as part of the risk assessment process and audit

documentation should support the consideration. In addition, even though the state Medicaid Fraud Control Units (MFCUs) and State Survey and Certification of Health Care Providers and Suppliers have substantially fewer federal expenditures than Medicaid, they are clustered with Medicaid because these programs provide significant controls over the expenditures of Medicaid funds. It is unlikely that the expenditures for these two programs would be material to the Medicaid cluster; however, noncompliance with the requirements to administer these controls may be material.

Medicaid Fraud Control Units (MFCUs)

Under section 1902(a)(61) of the Social Security Act, states are required as part of their Medicaid state plans to maintain a MFCU, unless the Secretary of HHS waives the requirement after making the determination that a MFCU would not be cost-effective because minimal fraud exists in connection with the provision of covered services to eligible individuals under the state plan and that beneficiaries under the plan will be protected from abuse and neglect in connection with the provision of medical assistance under the plan without a MFCU. The primary mission of the MFCUs is to investigate and prosecute fraud by Medicaid providers, to review and investigate complaints alleging abuse or neglect of patients in Medicaid-funded health care facilities, and, as an optional authority, to review and investigate complaints of patient abuse or neglect in board and care facilities or involving Medicaid beneficiaries in non-institutional and other settings. States are required to refer to the MFCU all cases of suspected provider fraud.

State Survey and Certification of Health Care Providers and Suppliers

The objective of the State Survey and Certification of Health Care Providers and Suppliers program is to determine whether the providers and suppliers of health care services under the Medicare program are in compliance with regulatory health and safety standards and conditions of participation/coverage. For certain types of providers, compliance with these health and safety standards are also required as a condition of Medicaid participation, and the Medicaid program contributes to program costs accordingly.

II. PROGRAM PROCEDURES

A. Overview

The following paragraphs are intended to provide a high-level, overall description of how Medicaid generally operates. It is not practical to provide a complete description of program procedures because Medicaid operates under both federal and state laws and regulations and states are afforded flexibility in program administration. Accordingly, the following paragraphs are not intended to be used in lieu of or as a substitute for the federal and state laws and regulations applicable to this program.

Administration

The Medicaid program is jointly financed by the federal and state governments and administered by the states. For purposes of this program, the term “state” includes the 50 states, the District of Columbia, and five United States territories: the US Virgin Islands, Puerto Rico, Guam, American Samoa, and the Commonwealth of the Northern Mariana

Islands. Medicaid operates through state Medicaid agencies, with states paying providers of medical services directly or through the use of managed care plans. Participating providers must accept the Medicaid payment amount as payment in full. Federal law and regulation set forth mandatory and optional eligibility groups and services. States are required to cover mandatory eligibility groups and services and may elect to cover optional groups and services. Within these broad federal rules, each state decides eligible beneficiary groups, types and range of services, payment levels for services, and administrative and operating procedures. CMS administers the Medicaid program in cooperation with state governments. CMS oversees state operations through its organization consisting of a headquarters and field offices. CMS uses technical assistance extensively to promote improvements in state operation of the program, and compliance with federal rules, as well as enforcement mechanisms as the agency deems appropriate. The HHS Office of Inspector General (OIG) is the agency responsible for the federal oversight of the state MFCUs. As stated in 42 CFR 1007.5, a key requirement of the governing regulations is that a unit must be a single identifiable entity of the state government. In order to receive the federal grant funds necessary to sustain their operations, the MFCUs must submit a reapplication for federal assistance to the OIG on an annual basis.

The State Survey and Certification of Health Care Providers and Suppliers program is administered by CMS in a manner similar to Medicaid and includes an approved state plan that addresses federal requirements.

Medicaid State Plans

States administer the Medicaid program under a CMS-approved state plan for each state. The Medicaid state plan is a comprehensive written statement submitted by the State Medicaid Agency (SMA) describing the nature and scope of its Medicaid program. A state plan for Medicaid consists of preprinted material that covers the basic requirements, and individualized content that reflects the characteristics of each particular state's program. The state plan references the applicable federal regulation and statute for each requirement.

The state plan contains all information necessary for CMS to determine whether the state plan can be approved to serve as a basis for determining the availability of federal financial participation. The state plan must specify a single state agency (hereinafter referred to as the "State Medicaid Agency – SMA") established or designated to administer or supervise the administration of the state plan. The state plan must also include a certification by the state attorney general that cites the legal authority for the SMA to administer or supervise the administration of the state plan and make rules and regulations that it follows in administering the plan or that are binding upon local agencies that administer the plan.

The state plan also describes methodologies to pay providers for covered care and services under the Medicaid program. The payment methodologies must be clear and auditable to ensure that payments are disbursed only to qualified providers, in the appropriate amount, for medically necessary services covered by the Medicaid program

and provided to eligible beneficiaries under a fee-for-service arrangement. Payments must also be based on claims that are adequately supported by medical records, and payments must not be duplicated.

At any time, a state may propose changes to the state plan through a state plan amendment (SPA). A state submits a SPA to CMS when a state proposes to modify its state plan to make changes to its Medicaid program design, policies, or operational approach. States must submit SPAs to CMS to reflect changes in federal and state law, regulation, policy, or court decisions. States must also seek amendments to the state plan whenever necessary to reflect material changes in State law, organization, or policy, or in the State's operation of the Medicaid program. This is outlined at 42 CFR 430.12. Federal and state governments use the SPA process to negotiate and agree on the terms of the amendment.

The SPA submission is reviewed by CMS to determine whether the proposal meets federal requirements. A SPA will be considered approved unless CMS, within 90 days after receipt of the SPA, sends the state written notice of disapproval. If more information is required to determine whether the proposal can be approved, CMS sends the state a request for additional information (RAI) within 90 days after receipt of the SPA. States have 90 days from the issuance of the RAI to provide a response to CMS. If the state does not respond within this 90-day period, CMS may choose to disapprove the SPA. Once the state submits the requested information, a new 90-day review clock begins and CMS must decide to approve or disapprove the SPA. While CMS maintains state submission records, copies of approved SPAs are available on CMS' Medicaid.gov website <https://www.medicaid.gov/state-resource-center/medicaid-state-plan-amendments/index.html> or can be obtained from the SMA. More information about SPA and 1915 waiver processing can also be found at Medicaid.gov at <https://www.medicaid.gov/state-resource-center/spa-and-1915-waiver-processing/index.html>.

In accordance with an approved state plan or approved waiver (see the Waivers and Demonstrations section below), CMS makes quarterly grant awards to the state to cover the federal share of Medicaid expenditures for services and program administration. The grant award authorizes the state to draw federal funds as needed to pay the federal portion, as determined through the application of the Federal Medical Assistance Percentage (FMAP) or other applicable federal matching rate set by statute, of approved Medicaid expenditures. The amount of the quarterly grant is initially determined on the basis of quarterly budget estimates submitted by the SMA on the Form CMS-37. Thirty days after the end of the quarter, states must submit the Form CMS-64, which includes expenditures and recoveries and other items that reduce expenditures for the quarter and prior period expenditures. Quarterly, CMS reviews the state's expenditures for accuracy and allowability, then CMS issues a finalization grant reconciling the initial grant award determined on the basis of budget estimates to the actual expenditures reported on the Form CMS-64. The amounts reported on the Form CMS-64 and its attachments must be actual expenditures for which all supporting documentation, in readily reviewable form, has been compiled and is available immediately at the time the claim is filed. States use

the Medicaid Budget and Expenditure System (MBES) to electronically submit the Form CMS-37 and Form CMS-64 directly to CMS.

Waivers and Demonstrations

The SMA may apply for a waiver of federal requirements, subject to CMS approval. The most common modes to waive federal requirements are under the authority of section 1115 called demonstrations and waivers under section 1915 of the Social Security Act (the Act). Additionally, section 1115(a) demonstration authority permits states to request federal financial participation for costs that would not otherwise be included as expenditures under section 1903 of the Act, and to request waiver authority of requirements under section 1902(a) of the Act.

Section 1115(a) demonstrations and section 1915 waivers are intended to provide the flexibility needed to enable states to test new or different approaches to the efficient and cost-effective delivery of health care services, or to adapt their programs to the special needs or groups of beneficiaries. Demonstrations and waivers are not interchangeable. However, both of them allow exceptions to state plan requirements and permit a state to implement innovative programs or activities on a time-limited basis, subject to specific safeguards for the protection of beneficiaries and the program, and provided that there is an evaluation of the program.

Actions that states may take under waivers of section 1915 of the Act include, but are not limited to: (1) implementing a primary care case-management system or a specialty physician system; (2) designating an entity to act as a central broker in assisting Medicaid beneficiaries to choose among competing health care plans; (3) limiting beneficiaries' choice of providers to providers that fully meet reimbursement, quality, and utilization standards, which are established under the state plan and are consistent with access, quality, and efficient and economical furnishing of care; and (4) including as medical assistance, under its state plan, home and community-based services (HCBS) furnished to beneficiaries who would otherwise need inpatient care that is furnished in a hospital, nursing facility or other institutional settings, and is reimbursable under the state plan. A state may also obtain a waiver of statutory requirements to provide an array of HCBS, which may permit an individual to avoid institutionalization (42 CFR Part 441, Subpart G). Depending on the type of requirement being waived, a waiver may be effective for initial periods ranging from two to five years, with varying renewal periods. Copies of approved SPAs are available on CMS' Medicaid.gov website <https://www.medicaid.gov/state-resource-center/medicaid-state-plan-amendments/index.html>. More information about SPA and 1915 waiver processing can also be found at Medicaid.gov at <https://www.medicaid.gov/state-resource-center/spa-and-1915-waiver-processing/index.html>. The section 1115 demonstrations main page is located at <https://www.medicaid.gov/medicaid/section-1115-demonstrations/index.html>. Lists of states 1115 demonstrations can be found at <https://www.medicaid.gov/medicaid/section-1115-demo/demonstration-and-waiver-list/index.html>. CMS approves a state's Medicaid section 1115 demonstration only if it determines the demonstration to be likely to assist in promoting the objectives of title XIX of the Act.

Actions that states may take under a section 1115 demonstration to promote the objectives of Title XIX of the Act include, but are not limited to: (1) removing barriers to coverage and care; (2) sharing with beneficiaries (through the provision of additional services) cost-savings made possible through the beneficiaries' use of more cost effective medical care; (3) enhancing alignment between Medicaid policies and commercial health insurance products to facilitate smoother beneficiary transition between types of health insurance; and (4) advancing innovative delivery system and payment models to strengthen provider network capacity and drive greater value for Medicaid.

Beneficiary Eligibility

Beneficiary eligibility for Medicaid is generally based on financial (e.g., income and resources, as applicable) and non-financial (e.g., age, pregnancy, disability, and citizenship/immigration status, as applicable) criteria. Income eligibility is most often expressed in terms of a percent of the Federal Poverty Level (FPL), which is defined and updated by the HHS on an annual basis. Resources may include things such as savings, non-home property, stocks, and other non-cash assets.

States must cover mandatory eligibility groups. States may provide coverage to members of optional groups and medically needy individuals (i.e., individuals who are eligible for Medicaid after deducting medical expenditures from their income). The eligibility groups covered in a state and the eligibility criteria are specified in the state plan. The state plan will also describe the income methodology used for determining eligibility.

States must provide payment for Medicare premiums and cost-sharing for certain older adults and people with disabilities who are entitled to Medicare Part A, and whose income and resources do not exceed specified standards (Section 1902(a)(10)(E)) of the Act (42 USC 1396a(a)(10)(E)). There are four mandatory eligibility groups, collectively called the Medicare savings program eligibility groups, each of which has its own eligibility requirements and coverage limitations. Depending on the group, the medical assistance available ranges from payment of all Medicare premiums and cost-sharing expenses to payment of only the Medicare Part A or Part B premiums.

The state plan will specify if determinations of eligibility are made by agencies other than the SMA and will define the relationships and respective responsibilities of the SMA and the other agencies. States must allow individuals and families to apply online, by telephone, via mail, or in person and must require that all initial applications be signed under penalty of perjury. Electronic signatures, including those that are telephonically recorded, and handwritten signatures transmitted via any other electronic method, must be accepted. The state agency must have facts in the case record to support the agency's eligibility determination, including a record of citizenship or immigration status verification for each individual. The state must provide notice of its decision concerning eligibility and provide timely and adequate notice of the basis for denial or terminating assistance (42 CFR sections 431.17, 431.210, 431.211, 435.907, 435.914, 435.917, 435.918; 42 USC 1320b-7).

Services

Medicaid expenditures include payments for services rendered to eligible beneficiaries, such as inpatient and outpatient hospital services, prescribed drugs, nursing facility services, and physicians' services. A listing of mandatory and optional Medicaid benefits can be found at <https://www.medicaid.gov/medicaid/benefits/list-of-benefits/index.html>. For a Medicaid payment to be considered valid, it must comply with the requirements of Title XIX, as amended (42 USC 1396 et seq.), and implementing federal regulations. Determinations of payment validity are made by individual states in accordance with approved state plans under broad federal guidelines.

Some states have managed care arrangements under which the state enters into a contract with a managed care plan, such as an insurance company, to arrange for or provide medical services. The state pays a risk-based periodic fixed rate per person (capitation payment) to the managed care plan for each beneficiary enrolled in that plan; the capitation payment is paid without regard to the actual medical services utilized by each beneficiary for the time period covered by the payment. There are three types of managed care plans that can be paid capitation rates: managed care organizations, prepaid inpatient health plans, and prepaid ambulatory health plans (42 CFR 438.2). Managed care plans are required to provide covered services in accordance with the managed care plan's contract with the state and pursuant to federal regulations at 42 CFR Part 438.

Medicaid expenditures also include administration and training, the State Survey and Certification Program, and the establishment and operation of state MFCUs.

Addendum for the Public Health Emergency (PHE)

Medicaid and the Children's Health Insurance Program (CHIP) play critical roles in helping states and territories respond to public health emergencies (PHEs) and disasters, including the outbreak of the Novel Coronavirus Disease 2019 (COVID-19). Over the course of the COVID-19 PHE, state Medicaid and CHIP agencies adopted many flexibilities offered by the CMS to respond effectively to local outbreaks, including changes to modify eligibility requirements and benefit packages, ensure access to home and community-based services (HCBS), and support health care providers' access by adjusting enrollment and screening processes. In addition, states made program changes to comply with the requirements of the Families First Coronavirus Response Act (FFCRA) (Pub. L. No. 116-127), as amended by the Coronavirus Aid, Relief, and Economic Security (CARES) Act (Pub. L. No. 116-136). Section 6008 of the FFCRA provides states with a temporary 6.2 point percentage increase to the Federal Medical Assistance Percentage (FMAP) under section 1905(b) of the Act for certain Medicaid expenditures if states meet certain conditions, including a continuous enrollment condition that applies with respect to most Medicaid beneficiaries who were enrolled in the program as of or after March 18, 2020.

CMS provided for program flexibilities and federal matching funds for certain services that should be considered when planning single audits, as described below. In some instances, certain audit steps may not be relevant during this review period in light of the flexibilities offered to states. The flexibilities are unique to individual states and follow the typical documentation process, including CMS approval of state plans and waivers, in

accordance with regulations and guidance. Note that [CMS guidance](#) on COVID-related flexibilities is updated regularly, and auditors should reference the latest CMS guidance available on Medicaid.gov at [Tools and Checklists for States | Medicaid](#). It is important for auditors to be aware of the requirements and flexibilities implemented by the state Medicaid or CHIP agency in response to the COVID-19 PHE so that a state is not determined to be out of compliance with requirements that would have been in place absent the PHE. In addition, to be eligible to receive the temporary FMAP increase under section 6008 of FFCRA states are required to maintain the enrollment of all Medicaid beneficiaries who were enrolled as of or after March 18, 2020, through the end of the month in which the PHE ends, with certain exceptions. This requirement, described at section 6008(b)(3) of the FFCRA and 42 CFR 433.400 is often referred to as the continuous enrollment condition. The continuous enrollment condition does not impact a state's obligation to continue to conduct renewals of eligibility and to act on changes in beneficiary circumstances. However, it does prohibit a state from disenrolling a beneficiary who is determined ineligible, except under certain circumstances and many states have been unable to complete the full renewal process for beneficiaries in order to ensure they remain enrolled through the end of the month in which the PHE ends to comply with the continuous enrollment condition.

CMS recognizes that states will not be able to immediately complete the large volume of eligibility and enrollment work before them when the PHE ends. On March 3, 2022, CMS issued [State Health Official letter #22-001](#), which expands on earlier guidance designed to ensure that when the PHE eventually ends and states resume routine operations, including terminations of eligibility, renewals of eligibility and transitions between coverage programs occur in an orderly process that minimizes beneficiary burden and promotes continuity of coverage. States will have a 12 month "unwinding period" to distribute and initiate renewals for their total Medicaid and CHIP caseload. [CMS guidance](#) on unwinding requirements, strategies, and flexibilities is updated regularly, and auditors should reference the latest CMS guidance available on www.Medicaid.gov/unwinding.

Background

On January 31, 2020, the Secretary of Health and Human Services (HHS) declared a PHE, effective as of January 27, 2020, for the entire United States to aid the nation's health care community in responding to COVID-19. On March 13, 2020, the president declared the ongoing COVID-19 pandemic of sufficient severity and magnitude to warrant an emergency declaration for all states, tribes, territories, and the District of Columbia pursuant to section 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 USC 5121-5207 (the "Stafford Act"), with a retroactive effective date of March 1, 2020. Since the initial declaration, the PHE has been renewed several times, with the latest renewal effective through May 11, 2023 and will end thereafter. During a PHE or disaster, CMS can rely on various legal authorities to grant states emergency flexibilities critical to ensuring that states can respond to the crisis expeditiously to protect and serve the general public.

On December 22, 2020, CMS issued State Health Official (SHO) letter #20-004, entitled Planning for the Resumption of Normal State Medicaid, Children’s Health Insurance Program (CHIP), and Basic Health Program (BHP) Operations Upon Conclusion of the COVID-19 Public Health Emergency (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho20004.pdf>). This SHO letter provided guidance on returning to regular operations, including ending temporary authorities when the PHE concludes, making temporary changes permanent where legally permissible and otherwise appropriate, ending the expiring FFCRA provisions, and addressing pending eligibility and enrollment actions that developed during the PHE. As the PHE has been extended, the December 2020 guidance was updated through SHO letter #21-002 (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho-21-002.pdf>) and SHO letter #22-001 (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho22001.pdf>). States should have documentation available to describe the temporary changes made to their programs in response to the PHE, as well as their plans for returning to normal operations following the PHE.

Some of the major areas to note include the following:

1. *Telehealth*

Federal telehealth requirements provide states with significant flexibility, and states have broad variability in their approaches to incorporating telehealth into their Medicaid and CHIP programs. CMS also recognizes that in many circumstances, states have adopted Medicaid and CHIP telehealth policies that mirror Medicare telehealth policies, for which regulatory flexibilities have been provided during the COVID-19 PHE. To assist states with understanding the flexibilities regarding Medicaid and CHIP telehealth policy as it relates to COVID-19, CMS issued a COVID-19 Telehealth Toolkit, which was updated on October 14, 2020, that highlighted policy and operational questions that a state may consider when designing their approach (State Medicaid & CHIP Telehealth Toolkit, *Policy Considerations for States Expanding Use of Telehealth - COVID-19 Version* <https://www.medicaid.gov/medicaid/benefits/downloads/medicaid-chip-telehealth-toolkit.pdf>) (State Medicaid & CHIP Telehealth Toolkit, *Policy Considerations for States Expanding Use of Telehealth - COVID-19 Version: Supplement #1* <https://www.medicaid.gov/medicaid/benefits/downloads/medicaid-chip-telehealth-toolkit-supplement1.pdf>). To support health care delivery while minimizing face-to-face encounters during the COVID-19 PHE, many states have significantly accelerated adoption of telehealth, including through telephonic modalities, across a wide variety of disciplines.

2. *Beneficiary Eligibility and Enrollment*

States are facing a number of challenges due to the ongoing COVID-19 PHE that will leave many states with large volumes of pending eligibility and enrollment actions when the PHE ends. Different states have utilized different approaches to implement the continuous enrollment condition and the eligibility and enrollment

flexibilities available during the PHE. For example, some states adopted the optional COVID-19 eligibility group (extended under the American Rescue Plan (Pub. L. No. 117-2) to include treatments for COVID-19) and other states adopted new income and/or resource disregards under the state plan for the period of the PHE. As each state determines which flexibilities to maintain and which flexibilities to end, states are expected to develop an operational plan that documents and tracks compliance, including the timelines for making changes to application and renewal processing and verifications. Additional information is provided in SHO letter #21-002 and [SHO letter #22-001](#) on planning for the resumption of normal operations at the conclusion of the PHE.

All states will need to develop a comprehensive “unwinding operational plan” to restore routine operations in Medicaid when the PHE eventually ends. CMS is not requiring states to use a particular template to document their plan and states do not need to submit their plans to CMS for approval. States are permitted to use a phased approach to complete processing of any pending applications and resume timely and accurate determinations of eligibility on all new applications within four months after the eventual end of the PHE. To account for the time needed to complete the large volume of eligibility and enrollment work when the PHE ends, states may take 12-months to initiate all renewals and other outstanding eligibility actions and have two additional months (14 months total) to complete all pending actions initiated during the 12-month unwinding period. States may adopt strategies to ensure renewals are distributed and processed in a manner that maintains continuity of coverage for eligible individuals and facilitates seamless coverage transitions for those who become eligible for other insurance programs. As discussed in SHO letter #22-001, CMS has determined that states may seek approval to use section 1902(e)(14)(A) authority in a time-limited manner to implement strategies to protect beneficiaries in addressing the challenges states may face as they transition to routine operations during the unwinding period.

The flexibilities afforded to states as they respond to the PHE and restore operations during the unwinding period related to beneficiary eligibility and enrollment could lead to unintended vulnerabilities and risks. CMS reiterates the importance of states considering the appropriate program integrity activities related to beneficiary eligibility and enrollment. When considering statutory changes and other beneficiary eligibility waivers and flexibilities, CMS particularly encourages states to consider FFCRA requirements for the 6.2 percentage increase FMAP and other related provisions, as described below, when designing program integrity actions.

3. *Managed Care*

As previously described in CMS guidance <https://www.medicaid.gov/state-resource-center/downloads/covid-19-faqs.pdf>, if a benefit or other identified flexibility is covered under the Medicaid state plan, Medicaid waiver, or a state demonstration, CMS encourages states to amend their managed care plan contracts, if not already included, to extend the same flexibilities to managed care

plans (MCPs) during the COVID-19 PHE. States may also amend their managed care contracts and assess if changes are needed to capitation rates to: (1) reflect temporary increases in Medicaid fee-for-service (FFS) provider payment rates where an approved state directed payment requires plans to pay FFS rates; (2) require MCPs to make certain retainer payments allowable under existing authorities to certain habilitation and personal care providers; and (3) utilize state directed payments, when in compliance with 42 CFR 438.6(c) and CMS guidance, to require MCPs to temporarily enhance provider payment under the MCP contract.

States must obtain prior approval from CMS to contractually require MCPs to make state directed payments to providers; in addition to other requirements specified in 42 CFR 438.6(c), such state-directed payments must be tied to the delivery of services under the contract. To help mitigate the impacts of the COVID-19 PHE, in May 2020, CMS provided a framework through a CMCS Informational Bulletin for states to use in developing state directed payments (<https://www.medicaid.gov/federal-policy-guidance/downloads/cib051420.pdf>). In addition, on January 8, 2021, CMS released additional guidance that discusses enhanced program integrity in the use of state directed payments, such as requiring additional documentation and justification from states as to their rationale for incorporating state directed payments through means other than adjustments to the base capitation rates as part of the preprint review (<https://www.medicaid.gov/Federal-Policy-Guidance/Downloads/smd21001.pdf>).

B. Control Systems

Utilization Control and Program Integrity

The state plan must provide methods and procedures to safeguard against unnecessary or improper utilization of care and services.

In addition, the state must have (1) methods of determining criteria for identifying suspected fraud cases; (2) methods for investigating these cases; and (3) procedures, developed in cooperation with legal authorities, for referring credible allegation of fraud cases to law enforcement officials. Credible allegations of provider fraud must be referred to the state MFCU or an appropriate law enforcement agency in states with no certified MFCU.

Inpatient Hospital and Long-Term Care Facility Audits

States are required to establish, as part of the state plan, standards and methodologies for reimbursing inpatient hospital and long-term care facilities based on payment rates that represent the cost to operate such facilities efficiently and economically and provide services to Medicaid beneficiaries. The SMA must provide for the filing of uniform cost reports by each participating provider. These cost reports are used by the SMA to aid in

the establishment of payment rates. The SMA must provide for periodic audits of the financial and statistical records of the participating providers. Such audits could include desk audits of cost reports in addition to field audits. These audits are an important control for the SMA in ensuring that established payment rates are proper.

Automated Data Processing (ADP) Risk Analyses and System Security Reviews

The Medicaid program is highly dependent on extensive and complex computer systems that include controls for ensuring the proper payment of Medicaid benefits. States are required to establish a security plan for ADP systems that include policies and procedures to address: (1) physical security of ADP resources; (2) equipment security to protect equipment from theft and unauthorized use; (3) software and data security; (4) telecommunications security; (5) personnel security; (6) contingency plans to meet critical processing needs in the event of short- or long-term interruption of service; (7) emergency preparedness; and (8) designation of an agency ADP security manager.

State agencies must establish and maintain a program for conducting periodic risk analyses to ensure appropriate, cost effective safeguards are incorporated into new and existing systems. State agencies must perform risk analyses whenever significant system changes occur. On a biennial basis, state agencies shall review the ADP system security of installations involved in the administration of HHS programs. At a minimum, the reviews shall include an evaluation of physical and data security operating procedures, and personnel practices.

As part of complying with the above requirement, a state may obtain a statement on Standards for Attestation Engagements (AT) Section 801, Reporting on Controls at a Service Organization Service Organization Control (SOC) 1 type 2 report from its service organization (if the state has a service organization). A SOC 1 type 1 report does not address the effectiveness of a service organization's controls and would need to be supplemented by additional testing of controls at the service organization.

The specific areas covered by a SOC 1 type 2 report differ according to each individual service organization's operations; however, in every instance, the type 2 report procedures assess the sufficiency of the design of an organization's controls and test their effectiveness. A number of commonly covered areas include:

- a. Control Environment
- b. Systems Development and Maintenance
- c. Logical Security
- d. Physical Access
- e. Computer Operations
- f. Input Controls

- g. Output Controls
- h. Processing Controls

Medicaid–Enterprise Systems

The MES are the set of required mechanized claims processing and information retrieval systems, including the eligibility and enrollment systems and other supporting systems, unless this requirement is waived. CMS provides general systems guidelines (42 CFR 433.110 through 433.131) but does not provide detailed system requirements or specifications for states to use in the development of MES systems. As a result, these systems will vary from state to state. The system may be maintained and operated by the state or a contractor overseen by the state.

A module of the MES is normally used to process payments for most Medicaid services. The Operations Management business area supports the Claims Receipt, Claims Adjudication, and Point-of-Service subsystems to process provider claims for Medicaid care and services to eligible medical assistance recipients. Many edits and controls are generally implemented to identify aberrant billing practices for follow-up by the state. The state plan will describe the administration of each state’s claims-processing subsystems.

The state may use other MES modules, or other systems, to process some or all Medicaid payments, such as claims from state agencies (e.g., state-operated intermediate care facility for individuals with intellectual disabilities (ICF/IID) and certain selected types of claims). The claims payments processed these ways may be material to the Medicaid program.

C. Related Programs

Medicare Savings Program

The Medicare Buy-In Program, which includes QMB (Qualified Medicare Beneficiary), SLMB (Specified Low-Income Medicare Beneficiary), QI (Qualified Individual), and Qualified Disabled and Working Individuals (QDWI), commonly referred to as the Medicare savings program, is designed to protect low-income Medicare beneficiaries from the significant and growing costs required to cover Medicare premiums, deductibles, coinsurance, and copayments. The program connects the two largest public health programs in the country, Medicare and Medicaid, as Medicaid pays for all or part of the Medicare premium and/or cost-sharing amounts for individuals who are financially eligible.

The QMB program serves individuals with modest assets with combined incomes that do not exceed 100 percent of the federal poverty level. For example, in 2022 the asset limit for the QMB program is \$8,400 for an individual and \$12,600 for couples and the monthly income limits in 2022 are \$1,153 for an individual and \$1,546 for couples for all

states excluding Alaska and Hawaii. If individuals are eligible for the QMB program, the state Medicaid program pays their Medicare Part B premiums as well as Medicare Part A premiums for those who are not eligible for premium-free Part A, and their Medicare deductibles, coinsurance, and copayments.

For individuals with slightly higher incomes, the SLMB program pays only the Part B premium. To be eligible for the SLMB program, an individual must have income that exceeds 100 percent but is less than 120 percent of the federal poverty level. The SLMB program has the same asset limits as the QMB program.

The QI program also pays only the Part B premium. The QI program serves individuals with income at or above 120 percent but less than 135 percent of the federal poverty level. The QI program has annual allotments for each state. The QI program has the same asset limits as the QMB program.

QDWI program pays the Part A premium for working disabled persons under 65 who lost their premium-free Part A when they went back to work. These individuals are eligible for the QDWI program if their income does not exceed 200 percent of the federal poverty level and their resources do not exceed two times the SSI resource limit.

Indian Health Care

Federal Medicaid statute includes several protections specific to American Indians and Alaska Natives (AI/AN). These include:

- a. Special treatment for certain AI/AN financial interests—as described at 42 CFR 435.603(e)(3), certain types of AI/AN income are excluded when determining household income based on modified adjusted gross income (MAGI).
- b. Protections related to the imposition of enrollment fees, premiums, and cost sharing charges—as described at 42 CFR 447.56(a)(1)(x), AI/ANs cannot be charged any enrollment fees or premiums if they are eligible to receive items or services furnished by an Indian health care provider, and they are exempt from all cost sharing if they are both eligible to receive and have received items or services furnished by an Indian health care provider or through referral under contract health services (CHS), now, Purchased Referred Care (PRC). In addition, 42 CFR 447.56(c)(2) prohibits any cost sharing-related reduction in payment due under Medicaid to the Indian health care provider serving an AI/AN (i.e., a state must pay these providers the full Medicaid payment rate for furnishing the service).
- c. Managed care protections – Network and coverage requirements related to AI/AN protections within managed care are codified at 42 CFR 438.14(b). These protections address network adequacy, access, claims payment, and disenrollment for AI/AN beneficiaries.

- d. Requirements for payment to Indian Health Service (IHS)/Tribal facilities – States receive 100 percent FMAP for Medicaid services provided to AI/ANs through an IHS /Tribal facility. Per SHO letter #16-002, states receive 100 percent FMAP for services provided to AI/ANs by non-IHS/Tribal providers when a care coordination agreement is in place between an IHS/Tribal facility and a non-IHS provider, and other requirements of the SHO letter are met. Payment methodologies, including rates, for all services provided by IHS/Tribal facilities and non-IHS/Tribal providers are described in the Medicaid state plan.
- e. Per January 18, 2017 FAQs (<https://www.medicaid.gov/federal-policy-guidance/downloads/faq11817.pdf>), CMS provided a grace period to permit IHS/Tribal facilities to continue to claim Medicaid reimbursement under the clinic services benefit at 42 C.F.R. § 440.90 (including at the IHS All Inclusive Rate (AIR)) for services provided outside of the “four walls” of the facility. The grace period ended January 30, 2021. Recognizing the need to focus limited resources on addressing the COVID-19 PHE, CMS extended a grace period previously granted to permit such claims through October 31, 2021; a CMCS Informational Bulletin issued on October 4, 2021, further extended this grace period to nine months after the COVID-19 PHE ends (<https://www.medicaid.gov/sites/default/files/2021-10/cib10421.pdf>).

Payment Error Rate Measurement (PERM) Program

The PERM program is utilized by HHS to calculate national improper payment rates in Medicaid and CHIP. The regulations at 42 CFR Part 431, Subpart Q, specify requirements for estimating improper payments in Medicaid and CHIP. The PERM program annually measures the national Medicaid and CHIP improper payment rates and uses a 17-state three-year rotation process. The national Medicaid and CHIP improper payment rates include findings from the most recent three cycle measurements so that all states are captured in one rate. The national improper payment rates are comprised of three components: fee-for-service, managed care, and eligibility. States are expected to issue state-specific corrective action plans to address the root cause of errors and deficiencies.

Medicaid Eligibility Quality Control (MEQC) Program

The regulations at 42 CFR Part 431, Subpart Q, specify the requirements for the MEQC program, which is designed to reduce erroneous expenditures by monitoring the accuracy of eligibility determinations, and work in conjunction with the PERM program. The MEQC program requires each state to conduct a MEQC pilot in the two years between the state’s PERM review periods and report case findings to CMS and implement corrective actions to address all errors and technical deficiencies found to ensure continuous oversight of both Medicaid and CHIP state eligibility determinations. States have flexibility to review error prone areas identified through their PERM findings and must review areas not reviewed under the PERM program, such as denials and terminations.

Source of Governing Requirements

The federal law that authorizes these programs is Title XIX of the Social Security Act (Title XIX), enacted in 1965 and subsequently amended (42 USC 1396 et seq.). The federal regulations applicable to the Medicaid program are found in 42 CFR parts 430 through 456, 1002, and 1007.

The Families First Coronavirus Response Act (Pub. L. No. 116-127), as amended by section 9811 of the American Rescue Plan (Pub. L. No. 117-2).

Awards under the Medical Assistance Program (Assistance Listing 93.778) are subject to the requirements of 45 CFR Part 95 and the cost principles under Office of Management and Budget Circular A-87/2 CFR Part 200, Subpart E.

Federal requirements for the establishment and continued operations of the MFCUs are contained in 42 USC 1396b(a)(6), 1396b(b)(3), and 1396b(q); and 42 CFR Part 1007.

This program is subject to the requirements of 45 CFR Part 75 (the HHS implementation of 2 CFR Part 200) and 45 CFR Part 95.

Availability of Other Program Information

The HHS OIG issues fraud alerts, some of which relate to the Medicaid program. These alerts are available from the HHS OIG home page, Special Fraud Alerts section (<https://oig.hhs.gov/compliance/alerts/index.asp>).

Up-to-date program information, including State Medicaid Director and State Health Official letters, is available through Medicaid.gov at <http://www.medicaid.gov/Federal-Policy-Guidance/Federal-Policy-Guidance.html>.

Up-to-date information on Medical Loss Ratio is available at <https://www.medicaid.gov/medicaid/managed-care/guidance/medical-loss-ratio/index.html>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	Y	N	N	N	Y	N	Y

General Audit Approach for Medicaid Payments

To be allowable, Medicaid costs for medical services must be (1) covered by the state plan or CMS approved waivers/demonstrations; (2) reviewed by the state consistent with the state’s documented procedures and system for determining medical necessity of claims; (3) properly coded; and (4) paid at the rate allowed by the state plan. Furthermore, beneficiaries must be eligible (or presumptively eligible) at the time of service, whether covered under fee-for-service or managed care. Additionally, Medicaid costs must be net of beneficiary cost-sharing obligations and applicable credits (e.g., insurance, recoveries from other third parties who are responsible for covering the Medicaid costs, and drug rebates), paid to eligible providers, and only provided on behalf of eligible individuals.

Due to the complexity of Medicaid program operations, it is unlikely the auditor will be able to support an opinion that Medicaid expenditures are in compliance with applicable laws and regulations (i.e., are allowable under the state plan) without relying upon the systems and internal controls. Examples of complexities include:

1. Dependence upon large and complex ADP systems to process the large volume of Medicaid transactions for fee for services arrangements.
2. Medical services are normally provided directly to an eligible beneficiary without prior approval by the state.
3. Medical service providers normally determine the scope and medical necessity of the services.
4. Notice to the state that a service was rendered is after-the-fact when a claim for payment is issued.
5. Payments systems do not include a review of original detailed documentation supporting the claim prior to payment.
6. Complex payment structures for various medical services may exist, including significance of proper coding of services for fee for service (e.g., billing by diagnosis-related groupings (DRG)). Managed care and waiver based programs

are dependent on the respective SPA and resulting agreements with the providers. Managed care programs are dependent on the authority for the program and the contracts with the managed care plans.

7. Payment rates and policies differ among service types and delivery methods, such as fee for service arrangements, managed care, and waivers (e.g., inpatient hospital, physicians, prescription drugs and drug rebates, and risk-based capitation payments for a specific set of covered services).
8. State contracts with third parties, such as managed care plans, to provide or arrange for services for all or part of beneficiary care. Managed care plans have contracts with providers to create networks. Managed care plans may also subcontract with other managed care plans and/or administrative services organizations to delegate some of their contractual obligations.

Medicaid has required control systems that should aid the auditor in obtaining necessary audit evidence for Medicaid expenditures. These control systems are discussed in the preceding Program Procedures section under Control Systems and are: (1) utilization control and program integrity; (2) inpatient hospital and long-term care facility audits; (3) ADP risk analyses and system security reviews (e.g., of the MES); and (4) MES claims processing and other modules normally include edits and controls that identify unusual items for follow up by the utilization control and program integrity function. The first three generally are performed by specialists retained by the SMA. The following table indicates the major types of Medicaid services (i.e., excludes administrative expenses) to which these controls will likely relate:

Type of Medicaid Payment	1	2	3	4
Inpatient Hospital	X	X	X	X
Physicians (including dental)	X		X	X
Prescription Drugs (net of rebates)	X		X	X
Institutional Long-Term Care	X	X	X	X
Managed Care Waiver	X	X	X	X
Home and Community Based Waiver Program	X		X	

Each of the above Medicaid payment types is tested for compliance with applicable laws and regulations under one of the following: III.A, “Activities Allowed or Unallowed;” III.B, “Allowable Costs/Cost Principles;” or III.E.1, “Eligibility – Eligibility for Individuals.” Based on the assessed level of control risk, the auditor should design appropriate tests of the allow-ability of Medicaid payments, which may include a sample of medical claims. Given the complexity of medical records, if medical claims are sampled, the auditor should consider engaging the assistance of specialists in the medical community to assist in the review. The auditor may consider using the same specialists used by the state. Appropriate privacy measures must be taken to protect health information (i.e., medical claims).

A. Activities Allowed or Unallowed

1. *Summary* – FFP funds can be used only for Medicaid benefit payments (as specified in the state plan, federal regulations, or an approved waiver/demonstration), expenditures for administration and training, expenditures for the State Survey and Certification Program, and expenditures for the establishment and operation of state MFCUs (42 CFR 435.10, 440.210, 440.220, and 440.180). Payments may only be made to providers determined by the SMA to be eligible to participate in the Medicaid program. See III.N.4., “Provider Eligibility (Screening and Enrollment)” for related testing.
2. *Case Management Services* – Medicaid case management services may fall under the category of an administrative expense or as an optional medical state plan benefit. The term “case management services” means services that will assist individuals eligible under the plan in gaining access to needed medical, social, educational, and other services. Services, programs, and providers to which the individual is gaining access do not have to be specifically medical in nature and may include services for securing shelter, personal needs, and so forth (e.g., services provided by community mental health boards, county offices of aging). Case management services are an area of risk because of the high growth of expenditures and prior experience that indicates problems with the documentation of case management expenditures.

With the exception of case management services (covered under a periodic payment (usually monthly) for each beneficiary) or risk-based managed care, federal regulations typically require the following documentation for case management services: date of service; name of recipient; name of provider agency and person providing the service; nature, extent, or units of service; and place of service (section 1915(g) of the Act (42 USC 1396n(g)); 42 CFR Part 434).

Administrative case management – Services must be assessed as a Title XIX benefit (e.g., outreach services provided by public school districts to Medicaid recipients).

Case Management/targeted case management provided as an optional state plan service – Services must be provided to an eligible Medicaid recipient, and must include: a comprehensive assessment and periodic reassessment of individual needs, development (and periodic revision) of a care plan that is based on the information collected through the assessment, making referrals to help the eligible individual obtain needed services and monitoring to ensure that the care plan is implemented and services are meeting the individual’s needs.

3. *Managed Care* – A state may obtain a waiver of statutory requirements under 1915(a) or (b) waivers, or amend its state plan under 1932(a) authority, or use 1115(a) demonstration authority, in order to develop a managed care delivery system that is intended to more effectively address the health care needs of its population. For example, a waiver/SPA/Demonstration may involve the use of

managed care plans for the delivery of some or all Medicaid benefits for selected beneficiaries. Managed care plans' networks of providers must be eligible to participate in the program at the time services are rendered, payments to managed care plans should only be for eligible beneficiaries for the proper period and use the proper rate cell, and the capitation rates must be actuarially sound. Generally, FFS Medicaid should not pay a beneficiary's claims for services that are covered by the managed care plan contract. States should ensure that capitated payments to managed care plans are discontinued when a beneficiary is no longer enrolled in a plan. All Medicaid managed care guidance can be found at <https://www.medicaid.gov/medicaid/managed-care/guidance/index.html>.

Payment risks in Medicaid managed care can exist at the state level, the plan level, and the network provider level. At the state level, inaccurate state payments can be made to plans/managed care organizations because of inaccurate data or because the capitation rate setting includes costs that should be excluded when developing capitation rates.

4. *Medicaid Health Insurance Premiums* – A state may pay premiums for employer sponsored insurance or private group health insurance, on behalf of a Medicaid beneficiary, if it is cost effective to do so. When providing premium assistance, states must ensure that participating beneficiaries have access to all benefits available to other Medicaid beneficiaries, and that they are not required to incur greater out-of-pocket costs for premiums, deductibles, co-payments, or similar cost sharing charges than other Medicaid beneficiaries. A state's policy related to premium assistance is described in the Medicaid state plan.
5. *Disproportionate Share Hospital* – FFP is available for payments to states for qualifying hospitals that serve a disproportionate number of low-income patients with special needs. The state plan must specifically define a disproportionate share hospital and the method of calculating the rate for these hospitals. Section 1923 of the Act limits DSH payments on a state-wide basis to annual DSH allotments and on a hospital-specific basis to each qualifying hospital's uncompensated care costs. Section 1923(j) of the Act (42 USC 1396r(4) (*OMB PRA 0938-0746*)) also requires each state to obtain, and submit to CMS, an annual independent certified audit of their Medicaid DSH to determine compliance with the hospital-specific DSH limit for individual hospitals within their program. These audits must be completed no later than the last day of the Federal fiscal year ending three years from the end of the Medicaid State plan rate year. Completed audit reports are due to CMS no later than 90 days after completion. 42 CFR 455.300-304 specifies the details and timing for these audits. If the audit identifies an individual hospital overpayment the auditor should determine whether the state plan allows for redistribution to other hospitals that were reimbursed under their hospital specific DSH limit. Please see <https://www.Medicaid.gov/medicaid/financial-management/medicaid-disproportionate-share-hospital-dsh-payments/index.html>.

6. *Home and Community-Based Services (HCBS)* – A state may obtain a waiver of statutory requirements to provide an array of HCBS which may permit an individual to avoid institutionalization primarily through 1915(c) of the Act (42 CFR Part 441, Subpart G). States may also offer HCBS under their state plan under authority provided by section 1915(i) of the Act. States must operate their HCBS programs in accordance with certain “assurances,” including three assurances related to quality of care. To meet these assurances, states must demonstrate that they have systems to effectively monitor the adequacy of service plans, the qualifications of providers, and the health and welfare of beneficiaries.
7. *Medicare Part B Buy-In* – 42 CFR 431.625(d)(1) specify

FFP funds are available for state payment of

- Medicare Part B premiums for cash assistance recipients (SSI/SSP) and “deemed” cash recipients;
- Part A or B premiums, deductibles, coinsurance, and copays for QMBs; and
- Part B premiums for SLMBs and QIs.

FFP is not available for state payment of Part B premiums for other categories of Medicaid for individuals 65 years old and older or who have blindness and disability.

B. Allowable Costs/Cost Principles

1. States must have a system to identify medical services that are the legal obligation of third parties, such as private health or accident insurers. Such third party resources should be exhausted prior to paying claims with program funds. Where third party liability is established after the claim is paid, reimbursement from the third party should be sought (section 1915 of the Act 42 USC 1396k; 42 CFR 433.135 through 433.154).
2. Before calculating the amount of FFP, certain revenues received by a state will be deducted from the state’s medical assistance expenditures. The revenues to be deducted are (1) donations made by health care providers or related entities (except for bona fide donations and, subject to a limitation, donations made by providers for the direct costs of out-stationed eligibility workers); and (2) impermissible health care-related taxes. The requirements for provider-related donations and health care-related taxes are specified in section 1903(w) of the Act and implementing regulations at 42 CFR 433 Subpart B.

These provisions apply to the 50 states and the District of Columbia, except those states whose entire Medicaid program is operated under a waiver granted under Section 1115 of the Social Security Act (42 CFR Part 433.50(c)).

3. Section 1927 of the Act (42 USC 1396r-8) requires manufacturers that wish to have their covered outpatient drugs covered by Medicaid to enter into an agreement with CMS under which the manufacturers agree to pay rebates for drugs dispensed and paid for by state Medicaid agencies under the state plan (“rebate agreement”). Those rebates are shared between the state and federal governments. Claims are submitted on a National Council of Prescription Drug Program (NCPDP) transaction using a National Drug Code (NDC) or a medical claim transaction using either Healthcare Common Procedure Coding System (HCPCS) or revenue codes in the authoritarian context of China. In addition to identifying the claims that are for covered outpatient drugs (CODs), the units need to be appropriate to the definition of the rebate program. Within 30 days of state invoicing, manufacturers are required to pay the rebate or provide the state with written notice of disputed units not paid because of discrepancies found.

In addition, to receive FFP states must invoice for covered outpatient single source and certain multiple (top 20 multiple source drugs as published by the Secretary) source physician-administered drugs (42 USC 1396r-8(a)(7)), states must also provide for collection and submission of such utilization data using the NDC pursuant to Section 1927 (a)(7) of the Act and codified under 42 CFR 447.520. Physician-administered drugs include both injectable and non-injectable drugs. They are typically administered by medical professionals in physicians’ offices, clinics, or hospital outpatient departments.

Generally, in order for payment to be available for covered outpatient drugs, drug manufacturers are required to have entered into a rebate agreement and meet various product and price reporting requirements, in addition to paying rebates. As part of the product and price reporting requirements, manufacturers must certify to CMS all covered outpatient drugs and, on a quarterly basis, are required to provide their average manufacturer’s price and their best price for each covered outpatient drug, as applicable. Based on these data, CMS calculates a unit rebate amount for each drug, which it then provides to states. No later than 60 days after the end of the quarter, the SMA must provide drug utilization data to manufacturers, including drug utilization data of those Medicaid beneficiaries enrolled in managed care plans.

4. In the “Medicaid and Children’s Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care, and Revisions Related to Third Party Liability” final rule, published in the *Federal Register* on May 6, 2016 (81 FR 27498), CMS adopted medical loss ratio (MLR) requirements for Medicaid and CHIP managed care programs. The state must require each Medicaid managed care plan to calculate and report a MLR for rating periods starting on or after July 1, 2017; and require each CHIP managed care plan to calculate and report a MLR for rating periods in CHIP managed care contracts as of the state fiscal year beginning on or after July 1, 2018. If a state elects to mandate a minimum MLR, that minimum MLR must be at least 85 percent.

With regard to capitation rate setting for Medicaid managed care plans, under 42 CFR sections 438.4 and 438.5, several requirements exist: (1) states must provide all the validated encounter data, FFS data (as appropriate), and audited financial reports to be served by the managed care organization (MCO), prepaid inpatient health plan (PIHP) or prepaid ambulatory health plan (PAHP) to the actuary developing the capitation rates for at least the three most recent and complete years prior to the rating period, (2) the rates must be approved by CMS, which uses the services and expertise of the Office of the Actuary, and (3) the rate adjustments must be approved and valid. In addition, for Medicaid and CHIP managed care plans, the rates must be developed so that the managed care plan is projected to meet an 85 percent MLR (42 CFR 438.4(b)(9) and 457.1203(c)(1)).

5. *Non-Disproportionate Share Hospital Supplemental Payments* – States make supplemental payments to hospitals and other providers such as nursing homes and physician groups that serve high-cost Medicaid beneficiaries. The upper payment limit (UPL) against which non-disproportionate share hospital supplemental payments are measured is codified at 42 CFR 447.272 for Institutional Services and 42 CFR 447.321 for Outpatient Hospital and Clinic Services.
6. *Non-Risk Contracts* – Non-risk contracts are defined in 42 CFR 438.2 as contracts between a state and a PIHP or PAHP under which the contractor (1) is not at financial risk for changes in utilization or for costs incurred under the contract that do not exceed the upper payment limits specified in 42 CFR 447.362 of this chapter; and (2) may be reimbursed by the state at the end of the contract period on the basis of the incurred costs, subject to the specified limits.
7. *American Rescue Plan Act of 2021 (ARP) section 9817* - provides qualifying states with a temporary 10 percentage point increase to the federal medical assistance percentage (FMAP) for certain Medicaid expenditures for home and community-based services (HCBS) beginning April 1, 2021 and ending March 31, 2022. CMS released State Medicaid Director SMD letter #21-003, <https://www.medicaid.gov/federal-policy-guidance/downloads/smd21003.pdf>, on May 13, 2021, to provide guidance to states on the implementation of section 9817 of the ARP, and subsequently released SMD letter #22-002 extending the deadline to fully expend state funds equivalent to the amount of federal funds attributable to the increased FMAP (<https://www.medicaid.gov/federal-policy-guidance/downloads/smd22002.pdf>). CMS expects states to expend the funds by March 31, 2025.

As described in SMD #21-003, states must comply with two program requirements to receive the increased FMAP for HCBS expenditures: (1) federal funds attributable to the increased FMAP must be used to supplement existing state funds expended for Medicaid HCBS in effect as of April 1, 2021; and (2) states must use the state funds equivalent to the amount of federal funds attributable to the increased FMAP to implement or supplement the implementation of one or more activities to enhance, expand, or strengthen HCBS

under the Medicaid program. CMS requires participating states to submit both an initial and quarterly HCBS spending plan and narrative to CMS on the activities that the state has implemented and/or intends to implement to enhance, expand, or strengthen HCBS under the Medicaid program to demonstrate that the state is supplementing, but not supplanting, existing state funds expended for Medicaid HCBS. Many of these activities are eligible for Medicaid matching funds after states submit Form CMS-64 after the end of each quarter. However, some of the activities are not eligible for Medicaid matching funds, and states are only required to report spending on quarterly Spending Plans submitted to CMS. A state's approved Spending Plan and subsequent quarterly updates are listed on the CMS website (<https://www.medicaid.gov/medicaid/home-community-based-services/guidance/arp-section-9817-state-spending-plans-and-narratives-and-cms-approval-letters/index.html>) or obtained from the state.

Discrepancies between what the state reported spending on its Spending Plan and documentation of actual spending would constitute a potential violation of the 9817 requirements that states must use the state funds equivalent to the amount of federal funds attributable to the increased FMAP to implement or supplement existing state funds expended for Medicaid HCBS.

E. Eligibility

As discussed in the General Audit Approach for Medicaid Payments, the auditor may coordinate III.A, "Activities Allowed or Unallowed," III.B, "Allowable Costs/Cost Principles," and III.E, "Eligibility." Therefore, compliance requirements related to amounts provided to, or on behalf of, eligible individuals and presumptively eligible individuals are combined with III.A, "Activities Allowed or Unallowed" and III.B, "Allowable Costs/Cost Principles" such as, was the service incurred during the period the individual was eligible to receive benefits and was the provider paid the correct amount for the service billed."

The state verifies the financial and nonfinancial factors of eligibility, with the exceptions described below, by checking electronic data sources in accordance with federal requirements at 42 CFR 435.948 through 435.956 and state requirements (as documented in the state plan, verification plan and eligibility manual). The state is required (as described at 42 CFR 435.914) to maintain facts in the case file to support the eligibility determination. When data sources used by the state are not available to the auditor, or information is not required to be available for the period under audit, auditors would not be expected to test verification other than the requirement to maintain information in the case file. For states that accept applicant self-attestation for certain factors of eligibility such as household composition, and do not require further verification or documentation, the auditors are not expected to test beyond the requirements of the state.

The exceptions to the verification process described above are eligibility determinations made by an Exchange, either the Federally Facilitated Exchange (FFE) or a State-based Exchange (SBE), elements of a determination made by an express lane agency, and presumptive eligibility (PE) determinations made by qualified entities. In states that have delegated eligibility determinations to the FFE or a SBE, the state relies on the

verifications conducted by the Exchange and auditors are not expected to test verification. When express lane eligibility is used, the SMA relies upon elements of the determination made by an express lane agency. For PE determinations, the qualified entity accepts attestation of all needed information and states may not require verification or documentation of any eligibility criteria. When testing a PE determination, auditors are not expected to test verification.

1. Eligibility for Individuals

To participate in Medicaid, federal law requires states to cover certain groups of individuals. Examples of these mandatory eligibility groups are Infants and Children under Age 19, Pregnant Women, and Individuals Receiving Supplemental Security Income (SSI). States may also elect to extend coverage to optional groups of individuals. Examples of optional eligibility groups are Individuals Needing Treatment for Breast or Cervical Cancer, Optional State Supplement Recipients, and Family Opportunity Act Children with a Disability. The Families First Coronavirus Response Act (Pub. L. No. 116-127), as amended by section 9811 of the American Rescue Plan (Pub. L. No. 117-2), established a new optional Medicaid eligibility group at section 1902(a)(10)(A)(ii)(XXIII) of the Act (42 USC 1396a(a)(10)(A)(ii)(XXIII)) for individuals who are uninsured; this eligibility group is available only during the period of the COVID-19 PHE and coverage under the group is limited to testing and treatment for COVID-19. In addition, states have the option to provide coverage to medically needy individuals who have income and/or resources that exceed the eligibility standards otherwise applicable to such individuals. Mandatory, optional, and medically needy coverage options are described at 42 CFR Part 435, subparts B, C, and D and the options elected by a state are detailed in its Medicaid state plan.

Eligibility for Medicaid includes both financial and nonfinancial requirements and each eligibility group can have its own specific standards. Financial eligibility for most individuals is based on MAGI, which is described at 42 CFR 435.603. MAGI-based income is calculated using the financial methodologies defined in section 36B of the Internal Revenue Code with certain exceptions, such as the exclusion of certain types of AI/AN income (described above) and special rules for individuals who do not expect to file taxes or to be claimed as a tax dependent (non-filer rules). MAGI-based financial eligibility determinations include only an income test; states cannot apply a resource test when determining eligibility based on MAGI.

Certain groups of individuals are excepted from the use of MAGI. MAGI-excepted individuals are described at 42 CFR 435.603(j) and include individuals whose eligibility does not require a determination of income by the agency, such as individuals who are eligible based on their receipt of SSI; individuals whose eligibility for Medicaid is determined based on being age 65 or older or having blindness or a disability (often referred to as aged, blind or disabled, or ABD); and individuals being evaluated for coverage as medically needy.

When making non-MAGI financial eligibility determinations, states generally apply the income and resource methodologies of the most closely associated cash assistance program. For most individuals, the SSI financial eligibility methodology would be applied, including SSI rules related to both income and resources, in accordance with 42 CFR 435.601 and 435.602. Most MAGI-excepted eligibility determinations include a resource (sometimes called “asset”) standard. However states have flexibility to modify resource standards by disregarding certain types or amounts of resources.

Certain nonfinancial requirements, such as age limitations, pregnancy, or parent/caretaker requirements, apply only to specific eligibility groups. Other non-financial requirements apply to all eligible individuals. Medicaid beneficiaries must generally be residents of the state in which they are receiving Medicaid, and they must be either US citizens or qualified non-citizens (referred to as aliens in the statute). Many qualified aliens, as defined at 8 USC 1641, who entered the United States on or after August 22, 1996, are not eligible for Medicaid for a period of five years, beginning on the date the alien was granted the qualified alien immigration status, unless the alien is exempt from the five-year waiting period under 8 USC 1613. States must provide Medicaid to certain qualified aliens in accordance with the terms of 8 USC 1612(b)(2), provided that they meet all other eligibility requirements. States may provide Medicaid to all other otherwise eligible qualified aliens, subject to the five-year waiting period under 8 USC 1613. States also have the option to provide Medicaid coverage to lawfully residing pregnant women and children under age 21 in accordance with 42 USC 1396b(v)(4), which provides coverage to all lawfully present non-citizens who are otherwise eligible for Medicaid, including during the five-year waiting period, for those otherwise subject to it under 8 USC 1613. All aliens who otherwise meet the Medicaid eligibility requirements are eligible for treatment of an emergency medical condition under Medicaid, as defined in 8 USC 1611(b)(1)(A), regardless of immigration status or date of entry.

The Consolidated Appropriations Act, 2021 (Pub. L. No. 116-260) established a new requirement effective December 27, 2020, for states to extend full Medicaid eligibility to citizens of the Freely Associated States (the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau) living in the United States under the Compacts of Free Association (COFA). Additional information is provided in SHO letter #21-005 regarding Medicaid Eligibility for COFA Migrants available at <https://www.medicaid.gov/sites/default/files/2021-10/sho21005.pdf>.

The Extending Government Funding and Delivering Emergency Assistance Act (Pub. L. No. 117-43) provided that Afghan evacuees who enter the United States as parolees or with a Special Immigrant Visa are eligible for Medicaid or CHIP to the same extent as refugees, for a limited time period, provided that they meet all other eligibility requirements. Additional information is provided in the November 1, 2021 fact sheet on Health Coverage Options for Afghan Evacuees at

<https://www.medicaid.gov/medicaid/eligibility/downloads/hlth-cov-option-afghan-evac-fact-sheet.pdf>.

To facilitate immediate access to services for individuals who are likely Medicaid eligible, without having to wait for a final eligibility determination to be made, states may establish a program of PE. Under this option, the state authorizes certain health care providers, schools, and/or other outside entities (referred to as “qualified entities”) to screen for Medicaid eligibility and immediately enroll individuals who appear to be eligible. PE is time limited and ends within two months unless the individual submits a full Medicaid application.

The processes used by states to determine and renew eligibility for Medicaid must comply with certain federal requirements, which are described at 42 CFR Part 435, Subpart J. State processes for presumptive eligibility are described at 42 CFR Part 435, Subpart L. However, states have flexibility within this framework to establish processes that meet the unique needs of their state. Specific requirements to be considered when auditing eligibility determinations for individuals include:

a. Eligibility Determination

- (1) States must accept applications submitted online, by telephone, via mail, or in person. This includes electronic, telephonically recorded, and handwritten signatures. The SMA must have documentation in the case record to support the agency’s eligibility determination, including a record of verification of income and citizenship or satisfactory immigration status for each individual. The state must provide notice of its decision concerning eligibility and provide timely and adequate notice of the basis for denial or termination of assistance (section 1137(d) of the Act 42 USC 1320b-7(d); 42 CFR 435.907, 435.914, 435.917, 431.17, 431.211, 431.213, 431.214).
- (2) Federal law requires that certain types of information be collected during the application process. As a condition of eligibility, each individual seeking Medicaid must furnish his or her Social Security number (SSN) as described at 42 CFR 435.910. If the individual does not recall his/her SSN or has not been issued an SSN, the state must assist the individual in obtaining or applying for an SSN. This requirement does not apply if the individual (a) is not eligible to receive an SSN, (b) does not have an SSN and may be issued an SSN only for a valid non-work reason, or (c) refuses to obtain a SSN because of well-established religious objections.
- (3) States are directed, at 42 CFR 435.912, to determine eligibility promptly and without undue delay. For individuals applying for Medicaid on the basis of disability, the determination of eligibility

may not exceed 90 days. For all other applicants, the determination of eligibility may not exceed 45 days.

- (4) The 42 CFR 435.1200 requires coordination between SMAs and other insurance affordability programs, including an Exchange. Typically, electronic accounts must be transferred from the Medicaid/CHIP agency to the Exchange and vice versa. States utilizing the FFE must enter into an agreement in which the FFE makes either a determination or an assessment of MAGI Medicaid/CHIP eligibility and sends the individual's electronic account to the SMA for enrollment (FFE determination) or a final determination and enrollment (FFE assessment). Additional information may be found in the July 25, 2016, CMCS Informational Bulletin on Coordination of Eligibility and Enrollment between Medicaid, CHIP, and the Federally Facilitated Marketplace (FFM or "Marketplace") <https://www.medicaid.gov/federal-policy-guidance/downloads/cib072516.pdf>.
- (5) When determining eligibility for a child, SMAs may rely on elements of a determination made by an express lane agency (as defined in section 2.1(e) of the Medicaid state plan) as to whether a child satisfies one or more requirements of Medicaid eligibility. The SMA may use an income determination from an express lane agency without regard to differences in budget unit, income disregards, deeming, or other differences in methodology between the express lane agency and Medicaid. Auditors are not expected to test verification of express lane determinations relied upon by the SMA. Additional information may be found in section 1902(e)(13) of the Act (42 USC 1396a(e)(13)) and SHO letter #10-003 issued on February 4, 2010.

b. Eligibility Verification

- (1) States must request information from reliable electronic data sources, including other agencies in the state and other state and federal programs to the extent that such information is determined useful in verifying the financial eligibility of an individual. As described in the state's verification plan for MAGI determinations, and in state policies and procedures for both MAGI and non-MAGI determinations, this may include information from agencies such as the State Wage Information Collection Agency, the Social Security Administration, and the Internal Revenue Service. States may also use information related to eligibility or enrollment from other state programs such as the Supplemental Nutrition Assistance Program. For MAGI determinations, if information provided by or on behalf of an individual is reasonably compatible with

information obtained from the electronic data sources, as described in the state's verification plan, then the agency must determine or renew eligibility based on such information and may not require the individual to provide any further documentation. If the information is not reasonably compatible, then the agency must provide the individual with a reasonable period of time to explain the discrepancy or furnish additional information (42 CFR 435.948 and 435.952).

- (2) States may choose to accept self-attestation of information needed to determine or renew eligibility except with respect to income, SSN, and citizenship or immigration status. When self-attestation is accepted, further information, including documentation, cannot be required from the individual. In such cases, the auditor would not be expected to test documentation other than required by the state. States must follow the requirements described at 42 CFR 435.948 through 435.956 for verification and documentation of income and citizenship and immigration status.
- (3) Asset Verification Program – Section 1940 of the Act (42 USC 1396w) requires states to have a mechanism in place to verify assets, through access to information held by financial institutions, for purposes of determining or renewing Medicaid eligibility when an asset test is applicable for aged, blind, and disabled Medicaid applicants or beneficiaries.

c. Periodic Renewal

As required at 42 CFR 435.916, states must renew MAGI-based determinations of eligibility once every 12 months and no more frequently than once every 12 months. For non-MAGI beneficiaries, states must renew eligibility at least once every 12 months as described in the Medicaid state plan. When renewing eligibility, states must first attempt to renew based on reliable information available to the agency without requiring information from the individual. If sufficient information is not available to complete a renewal, or if the state has information that suggests that the beneficiary is ineligible, the state must provide the beneficiary with a renewal form and inform the individual of any additional information or documentation needed to determine eligibility. For MAGI-based determinations, the renewal form must be prepopulated with the most recent and reliable information known to the agency. Consistent with regulations at 42 CFR 435.930(b), the agency must continue to furnish Medicaid to beneficiaries who have returned their renewal form and all requested documentation unless and until they are determined to be ineligible for eligibility under all groups covered by the

state. Additional information may be found in the CMCS Informational Bulletin on Medicaid and Children's Health Insurance Programs (CHIP) Renewal Requirements issued on December 4, 2020

(<https://www.medicaid.gov/federal-policy-guidance/downloads/cib120420.pdf>).

d. Continuous Eligibility During Pregnancy & Postpartum Coverage

All pregnant Medicaid beneficiaries are eligible under the state plan for at least pregnancy-related services through the end of the month in which the 60-day period, beginning on the last day of pregnancy, ends regardless of the eligibility group in which the beneficiary is enrolled, and regardless of any changes in income that would otherwise result in a loss of eligibility. Section 9812 of the American Rescue Plan Act (Pub. L. 117-2) gave states a new state plan option, beginning April 1, 2022, to provide 12 months of extended postpartum coverage to pregnant individuals enrolled in Medicaid. The 12-month postpartum period begins on the last day of a beneficiary's pregnancy and extends through the end of the month in which the 12-month period ends. Similar to the 60-day postpartum period, individuals are entitled to the extended postpartum coverage regardless of the eligibility group in which the individual is enrolled. However, pregnant individuals eligible for extended postpartum coverage are also entitled to continuous eligibility, so they remain eligible during pregnancy and the postpartum period regardless of any changes in circumstances including income and other factors of categorical eligibility.

The availability of continuous coverage under the extended postpartum coverage option renders any regular renewal scheduled before the end of the 12-month postpartum period unnecessary. Rather, the Medicaid agency must conduct the renewal at the end of the individual's extended 12-month postpartum period in accordance with renewal regulations at 42 CFR 435.916. A state may, but is not required to, conduct redeterminations and periodic renewals of eligibility based on available information without requesting information from the individual during a period of continuous eligibility, and if appropriate, move the individual to a new eligibility group as long as the transition to the new group would not result in a loss of or reduction in coverage (e.g., reduction in benefits, increase in premiums or cost sharing).

Additional information on the extended postpartum coverage option may be found in SHO# 21-007 (<https://www.medicaid.gov/federal-policy-guidance/downloads/sho21007.pdf>).

e. Presumptive Eligibility

States have the option to establish PE for specific eligibility groups, as described at 42 CFR Part 435 Subpart L. In general, states must provide

PE for pregnant women and children before extending PE to most other MAGI-based eligibility groups. The options elected by each state are described in the Medicaid state plan.

When electing the PE option, states designate qualified entities, such as health care providers, community-based organizations, and schools to make PE determinations. These qualified entities are trained on the state's PE screening process and state-specific requirements for PE. In many states, qualified entities also help individuals to complete the full application process. A qualified entity is responsible for collecting and recording all information necessary to make a PE determination.

To be determined presumptively eligible, an individual must meet the basic requirements of an eligibility group for which PE is available. For example, to be presumptively eligible for the Infants and Children Under Age 19 group, the individual must be a child aged 18 or younger and must have household income at or below the standard established by the state for this group. When determining income, states may use a simplified method such as gross income. In addition to the basic requirements of the eligibility group, states may, but are not required to, consider state residency and US citizenship or eligible immigration status when making a PE determination. Other information that would be collected on a full application, cannot be required for a PE determination. In addition, individuals attest to all information needed for a PE determination. States may not require verification or documentation of any eligibility criteria as a condition of presumptive eligibility.

The PE period begins the day on which the qualified entity makes the PE determination. The end date varies depending on whether or not the individual submits a Medicaid application. If the individual submits a Medicaid application by the last day of the month following the month in which PE was determined, the PE period will continue until full Medicaid eligibility is either approved or denied. If the individual does not submit a Medicaid application, the PE period ends on the last day of the month following the month in which PE was determined. States must adopt reasonable standards regarding the number of PE periods that will be authorized for an individual.

f. Eligibility for Inmates of Public Institutions

As described in subdivision (A) in the matter following section 1905(a)(30) of the Act (42 USC 1396d(a)(30)) the provision of FFP for inmates of public institutions (in this case, correctional institutions) is limited to inpatient services furnished to inmates when they are patients in a medical institution. To implement this payment exclusion, states historically terminated the eligibility and enrollment of beneficiaries when they entered a correctional institution. However, section 1001 of the

Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (Pub. L. No. 115-271) added a new paragraph (84) to section 1902(a) of the Act (42 USC 1396a), which (1) prohibits states from terminating the Medicaid eligibility of an “eligible juvenile” who becomes an inmate of a public institution, (2) requires states to process applications submitted by incarcerated youth, and (3) requires states to redetermine the Medicaid eligibility of eligible juveniles before their release from a public institution. State Medicaid Director letter #21-002 (available at <https://www.medicaid.gov/Federal-Policy-Guidance/Downloads/smd21002.pdf>) describes the options available to states to suspend eligibility or benefits rather than terminating Medicaid eligibility, and it describes the requirements for renewals, notices, fair hearings and other related matters.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Sub-recipients

Not Applicable

G. Matching, Level of Effort, Earmarking

1. Matching

The state is required to pay part of the costs of providing Medicaid services and part of the costs of administering the program. The percentage of federal funding is determined based on the amount of the expenditure and the application of the FMAP that is determined for each state using a formula set forth in section 1905(b) of the Act (42 USC 1396d), or other applicable federal matching rates specified by the statute. In particular, the matching rates for states’ administrative expenditures authorized by the Act are found in section 1903(a) of the Act (42 USC 1396b).

2. Level of Effort

American Rescue Plan Act of 2021 (ARP) Section 9817. To demonstrate compliance with the requirement to supplement, not to supplant existing state funds expended for Medicaid HCBS, states must: not impose stricter eligibility standards, methodologies, or procedures for HCBS programs and services than were in place on April 1, 2021; preserve covered HCBS, including the services themselves and the amount, duration, and scope of those services, in effect as of April 1, 2021; and maintain HCBS provider payments at a rate no less than those in place as of April 1, 2021. These requirements are commonly referred to as “maintenance of effort” (MOE) requirements for ARP section 9817.

Please note that these requirements do not supersede other statutory or regulatory requirements that apply to section 1915(c) waivers, or other requirements under other provisions authorizing HCBS, including requirements set forth in Special Terms and Conditions under section 1115 demonstrations and managed care authorities under which states are delivering HCBS. For example, if states have implemented temporary changes to HCBS eligibility, covered services, and/or payment rates through the Appendix K template for section 1915(c) waivers, a disaster relief state plan amendment for section 1915(i) or (k) programs, or an Attachment K for HCBS services under a section 1115 demonstration, states are expected to retain those changes for as long as allowable under those authorities (e.g., according to the end date approved under an Appendix K but no later than six months post PHE). However, CMS will not apply penalties or non-compliance restrictions on the receipt of the increased FMAP once the authority for those temporary changes has expired or if the state needs to implement changes to comply with other federal statutory or regulatory requirements.

3. Earmarking

A state waiver may contain an earmarking requirement.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable for expenditure reporting for the administrative costs of the state MFCUs; not applicable for expenditure reporting all other components of the cluster
- d. *CMS-64, Quarterly Statement of Expenditures for the Medical Assistance Program (OMB No. 0938-1265)* – Required to be used in lieu of the SF-425, Federal Financial Report (for all components of the cluster other administrative costs of the state MFCUs), prepared quarterly, and submitted electronically to CMS within 30 days after the end of the quarter. Various provisions of the Act provide for an FMAP that is increased either permanently, or temporarily. Lines and forms on the CMS-64 that reflect these increases present more risk than others. States must report expenditures on the CMS-64 that reflect the date of payment, not the date of service, to obtain the correct FMAP (see 42 CFR 430.30(c)).

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Utilization Control

Compliance Requirements The state plan must provide methods and procedures to safeguard against unnecessary utilization of care and services (42 CFR Part 456). The SMA must implement a statewide surveillance and utilization control program that (1) safeguards against unnecessary or inappropriate use of Medicaid services against excess payments, (2) assess the quality of those services, and (3) provides for the control of the utilization of all services provided under the state plan in accordance with 42 CFR 456 Subparts B-I. The SMA must establish and use written criteria for evaluating the appropriateness and quality of Medicaid services. The agency must have procedures for the ongoing post-payment review, on a sample basis, of the need for, and the quality and timeliness of, Medicaid services. The SMA may conduct this review directly or may contract with an independent entity (42 CFR sections 456.5, 456.22 and 456.23).

Audit Objectives Determine whether the state has established and implemented procedures to safeguard against unnecessary utilization of care and services.

Suggested Audit Procedures

- a. Determine if the SMA established and implemented procedures to conduct utilization reviews.
 - (1) Obtain an understanding of the procedures used by the SMA to conduct utilization reviews.
 - (2) Evaluate the qualifications of the personnel conducting the reviews. Ascertain that the individuals possess the necessary skill or knowledge by considering the following:
 - (a) professional certification, license, or specialized training;
 - (b) the reputation and standing of licensed medical professionals in the view of peers if relevant; and
 - (c) experience in the type of tasks to be performed.

- (3) Ascertain if the personnel performing the utilization review are organized sufficiently independent of other Medicaid operations to objectively perform their function.
 - (4) Ascertain if the SMA or independent entity's sampling plan was properly designed and executed.
- b. Test a sample of the cases examined by SMA or the independent entity and ascertain if such examinations were in accordance with the SMA's procedures or in accordance with the SMA's contract with the independent entity.

2. Inpatient Hospital and Long-Term Care Facility Audits

Compliance Requirements The SMA pays for inpatient hospital services and long-term care facility services through the use of rates that are economic and efficient and are in accordance with the state plan. To the extent the state pays reconciled costs, the SMA must provide for the filing of uniform cost reports for each participating provider in order to establish payment rates. The SMA must provide for the periodic audits of financial and statistical records of participating providers. The specific audit requirements will be established by the state plan (42 CFR 447.253).

Audit Objectives Determine whether the SMA performed inpatient hospital and long-term care facility audits as required and established in the state plan.

Suggested Audit Procedures

- a. Review the state plan and SMA operating procedures and document the types of audits performed (e.g., desk audits, field audits), the methodology for determining when audits are conducted, and the objectives and procedures of the audits.
- b. Through examination of documentation, determine if the sampling plan was carried out as planned.
- c. Select a sample of audits and ascertain if the audits were in compliance with the SMA's audit procedures.

3. ADP Risk Analysis and System Security Review

Compliance Requirements SMAs must establish and maintain a program for conducting periodic risk analyses to ensure that appropriate and cost effective safeguards are incorporated into new and existing systems. SMAs must perform risk analyses whenever significant system changes occur. SMAs shall review the ADP system security installations involved in the administration of HHS programs on a biennial basis. At a minimum, the reviews shall include an evaluation of physical and data security operating procedures, and personnel practices. The SMA shall maintain reports on its biennial ADP system security reviews, together with pertinent supporting documentation, for HHS on-site reviews (45 CFR 95.621).

Audit Objectives Determine whether the SMA has performed the required ADP risk analyses and system security reviews.

Suggested Audit Procedures

- a. Review the SMA's policies and procedures, and document the frequency, timing, and scope of ADP security reviews. This should include any Service Organization Control (SOC) 1 type 2 reviews following statement on Standards for Attestation Engagements (AT) Section 801, Reporting on Controls at a Service Organization that may have been performed on outside processors (service organizations).
- b. Evaluate the appropriateness and extent of reliance on such reviews based on the qualifications of the personnel performing the risk analyses and security reviews and their organizational independence from the ADP systems.
- c. Review the work performed during the most recent risk analysis and security review to determine if findings were identified and what actions the SMA took to address the findings.

4. Provider Eligibility (Screening and Enrollment)

Compliance Requirements In order to receive Medicaid payments, providers must: (1) be licensed in accordance with federal, state, and local laws and regulations to participate in the Medicaid program (42 CFR 431.107 and 447.10; and Section 1902(a)(9) of the Act (42 USC 1396a(a)(9)); (2) screened and enrolled in accordance with 42 CFR Part 455, Subpart E (sections 455.400 through 455.470); and make certain disclosures to the state (42 CFR Part 455, Subpart B, sections 455.100 through 455.106). Medicaid managed care network providers are subject to the same disclosure, screening, enrollment, and termination requirements that apply to Medicaid fee-for-service providers in accordance with 42 CFR Part 438, Subpart H. States must also follow guidance issued in the Medicaid Provider Enrollment Compendium (MPEC) at <https://www.medicaid.gov/sites/default/files/2021-05/mpec-3222021.pdf> to enroll providers into their Medicaid programs.

Providers who have been barred from participation by the OIG exclusion list are not eligible to be enrolled in the Medicaid program (see 42 CFR 455.436). Lists may be found at https://oig.hhs.gov/exclusions/?utm_source=oigNewsletter&utm_medium=oig-nl-nav&utm_campaign=leie-nl.

Audit Objectives Determine whether Medicaid providers of medical services have the required medical licenses and are eligible to participate in the Medicaid program in accordance with federal, state, and local laws and regulations, and whether the providers have made the required disclosures to the state.

Suggested Audit Procedures

- a. Obtain an understanding of the state plan's provisions for licensing and entering into agreements with providers.

- b. Select samples from both Medicaid fee-for-service providers and managed care network providers to ascertain if:
 - (1) The provider is screened, licensed, and enrolled in accordance with the state plan and the requirement of 42 CFR 455 Subpart E.
 - (2) The agreement with the provider complies with the requirements of the state plan, including the disclosure requirement of 42 CFR 455 Subpart B.
 - (3) The provider complied with the requirements of the state plan, including the disclosure requirements of 42 CFR 455 Subpart B and Section 1.4 of the MPEC at <https://www.medicaid.gov/sites/default/files/2021-05/mpec-3222021.pdf>.
 - (4) The provider was not on the OIG's exclusion list at the time the services were provided.

5. Provider Health and Safety Standards

Compliance Requirements Providers must meet the prescribed health and safety standards for hospital, nursing facilities, and ICF/IID (42 CFR Part 442). The standards may be modified in the state plan.

Audit Objectives Determine whether the state ensures that hospitals, nursing facilities, and ICF/IID that serve Medicaid patients meet the prescribed health and safety standards.

Suggested Audit Procedures

- a. Obtain an understanding of the state plan provisions that ensure that payments are made only to institutions that meet prescribed health and safety standards.
- b. Select a sample of providers who received payments for each provider type (i.e., hospitals, nursing facilities, and ICF/IID) and ascertain if the SMA has documentation that the provider has met the prescribed health and safety standards.

6. Medicaid Fraud Control Unit (MFCU)

Compliance Requirements States must have (1) methods and criteria for identifying suspected fraud cases; (2) methods for investigating these cases; and (3) procedures, developed in cooperation with legal authorities, for referring credible allegations of fraud cases to law enforcement officials (42 CFR 455.13). Credible allegations of provider fraud must be referred to the state MFCU or an appropriate law enforcement agency in states with no certified MFCU (42 CFR 455.21). For those States that rely on Medicaid managed care organizations, regulations require that managed care contracts include provisions for the prompt referral of any potential fraud to the State Medicaid agency or directly to the MFCU. 42 CFR 438.608(a)(7).

States are required as part of their Medicaid state plans to maintain a MFCU, unless the HHS Secretary determines that a MFCU would not be cost-effective. States must have an agreement between the MFCU and the SMA, which includes methods of coordination and procedures for referring potential fraud, including potential fraud arising in managed care networks. 42 CFR 455.21(c); 1007.9(d).

Audit Objectives Determine whether the state has established and implemented procedures to: (1) identify suspected fraud cases; (2) investigated these cases; and (3) referred credible allegations of fraud cases to the MFCU, or in jurisdictions without a MFCU, to another office with authority to prosecute cases of provider fraud, and to ensure that the state accurately reports overpayment recoveries resulting from MFCU activities on the CMS-64 in accordance with sections 1903(d)(2)(C) and (D) of the Act.

Suggested Audit Procedures

- a. Ascertain if the Medicaid Agency has a program integrity function with qualified staff to comply with the requirements contained in 42 CFR 455.13.
- b. Ascertain if the state has a MFCU and, if not, it has received a waiver from the HHS Secretary and has alternate policies and procedures in place to detect Medicaid fraud and abuse.
- b. Examine the current memorandum of understanding (MOU) between the MFCU and State Medicaid Agency and ascertain whether the MOU for the MFCU and state comply with the requirements of sections 455.21(c) and 1007.9(d)
- c. Obtain an understanding of the State's policies and procedures that ensure credible allegations of provider fraud are identified and referred from the Medicaid Agency to the MFCU or in jurisdictions without an MFCU, to another office with authority to prosecute.

For States in which Medicaid services are delivered in whole or in part by managed care organizations, obtain an understanding of how referrals originating from managed care organizations are referred to the Medicaid agency and/or to the MFCU when Medicaid services are delivered by in whole or in part by a managed care organization.

- d. Select a sample of cases maintained by the Medicaid Agency involving the identification and investigation of potential fraud. Ascertain whether those cases identified credible allegations of provider fraud and if those cases were referred to the state MFCU or, if the state does not have a MFCU, to an office with authority to prosecute cases of provider fraud.

To the extent that the auditor selects a sample of MFCU cases to verify that credible allegations of fraud were referred to the MFCU, confine the sample to closed, rather than open, investigative cases.

For those States that deliver some or all Medicaid services through managed care organizations, ascertain that credible allegations of fraud originating from the managed care organizations were referred to the MFCU.

- e. Obtain records monetary recoveries identified as a result of MFCU activities and ascertain whether the overpayments and other recoveries were appropriately reported on the CMS-64.

7. Refunding of Federal Share of Medicaid Overpayments to Providers

Compliance Requirements The 42 CFR 433 Subpart F outlines the requirements SMAs are to follow related to refunding the federal share of Medicaid overpayments made to providers. Pursuant to 1903(d)(2)(C) of the Act (the Act) (42 USC 1396b), states have up to one (1) year from the date of discovery of the overpayment to recover or attempt to recover the overpayment before the federal share must be refunded to CMS via Form CMS-64 Summary, Line 9.C1- Fraud, Waste & Abuse Amounts, Line 9.C2-OIG Complaint False Claims Act, 9.D Other, 9.E. – RAC Collections, 9.F. – PERM Collections or 9.G. – MEQC Collections regardless of whether recovery is made from the provider. The state must credit the federal share to CMS as outlined under 42 CFR 433.320(a)(2) either in the quarter in which the recovery is made or in the quarter in which the one-year period following discovery ends, whichever is earlier, with limited exceptions. Under 42 CFR 433.316(d), for overpayments resulting from fraud, if not collected within one year of discovery, the SMA has until 30 days after the final judgment of a judicial or administrative appeals process to return the federal share.

Additionally, in accordance with 42 CFR 433.320(a)(4), the state will be charged interest for any non-recovered, non-refunded overpayment amounts. Any appeal rights offered to the provider does not extend the date of discovery per 42 CFR 433.316(h).

The repayment of the federal share is not required in cases where the state is unable to obtain recovery because the provider has filed for bankruptcy or the provider is otherwise out of business as outlined in 42 CFR 433.318.

The 42 CFR 433.320(c)(1) allows for downward adjustments previously credited to CMS if it is properly based on the approved state plan, federal law and regulations governing Medicaid, and the appeals resolution process specified in state administrative policies and procedures. States are not able to enter into settlement agreements with providers that reduces the federal share of the overpayment in order to avoid the expense of litigation. The Departmental Appeals Board (DAB) decision No. 1391 from February 19, 1993 (<https://www.hhs.gov/sites/default/files/static/dab/decisions/board-decisions/1993/dab1391.html>), addressed overpayment settlements between the states and providers. This decision affirmed that states may not reduce the federal share by settling overpayment receivables for less than the actual amount of the overpayment based on anticipated success in litigation or made simply to avoid administrative costs or litigation expenses.

For managed care, SMAs are required per 42 CFR 438.608(d)(1) to specify in each managed care contract how recoveries of provider overpayments must be treated. The refunding of the federal share of any overpayment recovered by an MCP is dependent on the retention policy outlined in the contract between the state and the MCP as required under 42 CFR 438.608(d)(1). If the state requires the MCP to refund overpayments to the state, the state must refund the federal share of that overpayment to CMS in accordance with the regulations at 42 CFR 433.312. The state must apply the FMAP rate in effect at the time the overpayment was made to determine the amount to be refunded to CMS.

Audit Objectives Determine whether the SMA reported and returned Medicaid provider overpayments in accordance with the federal requirements.

Suggested Audit Procedures

- a. Review applicable federal laws and regulation, including 1903(d)(2)(C) of the Act (42 USC 1396b), 42 CFR 433 Subpart F, and the Departmental Appeals Board Decision No. 1391.
- b. Obtain an understanding of the process to identify overpayments.
- c. Obtain managed care contract(s) to determine how recoveries made by MCPs to providers are treated.
- d. Perform tests to ascertain if the federal share has been returned accurately in accordance with federal laws and regulations, including ensuring the full amount was refunded and any downward adjustments were made.

8. Medicaid Recovery Audit Contractors (RACs)

Compliance Requirements Under Section 1902(a)(42)(B)(i) of the Act (42 USC 1396a) and 42 CFR section 455 Subpart F, states and territories are required to establish programs to contract with one or more Medicaid RAC for the purpose of identifying underpayments and overpayments, and recouping overpayments under the state plan and under any waiver of the state plan with respect to all services for which payment is made to any entity under such plan or waiver. States must establish these programs in a manner consistent with State law, and generally in the same manner as the Secretary contracts with contingency fee contractors for the Medicare Fee-For-Service RAC program under Section 1893(h) of the Act (42 USC 1395ddd).

Section 1902(a)(42)(B)(i) of the Act (42 USC 1396a) specifies that states shall establish programs under which they contract with Medicaid RACs subject to such exceptions or requirements as the Secretary may require for purposes of a particular state. Under 42 CFR section 445.516(a), a state may request an exception to some or all of the Medicaid RAC contracting requirements by receiving an approved State Plan Amendment. As such, not all states have Medicaid RAC programs.

Under 42 CFR section 455.502, states must comply with reporting requirements

describing the effectiveness of their Medicaid RAC programs by reporting overpayments that are collected in connection with the Medicaid RAC program on the CMS-64.

Under 42 CFR section 455.508, an entity that performs the functions of a Medicaid RAC must enter into a contract with a state to carry out any of the activities described in 42 CFR section 455.506. The entity must demonstrate to a state that it has the technical capability to carry out the activities described in 42 CFR section 455.506 (42 CFR section 455.508(a)); must hire a minimum of 1.0 FTE contractor Medical Director who is a Doctor of Medicine or Doctor of Osteopathy in good standing with the relevant state licensing authorities and has relevant work and educational experience (42 CFR section 455.508(b)); must hire certified coders unless the state determines that certified coders are not required for the effective review of Medicaid claims (42 CFR section 455.508(c)); must work with the state to develop an education and outreach program, which includes notification to providers of audit policies and protocols (42 CFR section 455.508(d)); and must provide minimum customer service measures including: a toll-free customer service telephone number in all correspondence sent to providers and staffing the toll-free number during normal business hours from 8:00 a.m. to 4:30 p.m. in the applicable time zone; compiling and maintaining provider approved addresses and points of contact; mandatory acceptance of provider submissions of electronic medical records on CD/DVD or via facsimile at the providers' request; and notifying providers of overpayment findings within 60 calendar days (42 CFR section 455.508(e)).

Under 42 CFR section 455.506, Medicaid RACs must review claims submitted by providers for which payment has been made under section 1902(a) of the Act (42 USC 1396a) or under any waiver of the state plan to identify underpayments and overpayments and recoup overpayments for the states. States may exclude Medicaid managed care claims from review by Medicaid RACs (42 CFR section 455.506(a)(1)); may coordinate with Medicaid RACs regarding the recoupment of overpayments (42 CFR section 455.506(b)); must coordinate the recovery audit efforts of their RACs with other auditing entities (42 CFR section 455.506(c)); must make referrals of suspected fraud and/or abuse, as defined in 42 CFR section 455.2, to the MFCU or other appropriate law enforcement agency (42 CFR section 455.506 (d)); and must set limits on the number and frequency of medical records to be reviewed by the RACs, subject to requests for exception from RACs to states (42 CFR section 455.506(e)).

Audit Objectives To determine whether the state has established a Medicaid RAC (42 CFR section 455.502) with an eligible contractor (42 CFR section 455.508) and is conducting the required Medicaid RAC activities (42 CFR section 455.506) in accordance with the approved state plan, and any approved exceptions (42 CFR section 455.516).

Suggested Audit Procedures

Obtain an understanding of the state plan's provisions and approved exceptions for Medicaid RACs.

- a. Ascertain whether waivers approved under 42 CFR section 445.516(a), and their expiration dates, are applied as required by the State.
- b. Verify the state entered into a contract(s) with a Medicaid RAC(s) consistent with federal requirements (42 CFR section 455.508).
- c. Verify the state is coordinating the recovery audit efforts of their RACs with other auditing entities (42 CFR section 455.506(c)).
- d. Verify the state has procedures to make referrals of suspected fraud and/or abuse, as defined in 42 CFR section 455.2, to the MFCU or other appropriate law enforcement agency (42 CFR section 455.506(d)). Verify if the state has made referrals of suspected fraud and/or abuse in accordance with their procedures.
- e. Verify the state set limits on the number and frequency of medical records to be reviewed by the RACs and complied with those limits (42 CFR section 455.506(e)).
- f. Ascertain whether the state complied with reporting requirements by providing Medicaid RAC program performance results on its CMS-64 report on Form CMS 64.90 RAC (42 CFR section 455.502).

9. Medical Loss Ratio (MLR)

Compliance Requirements For all contracts, the state must ensure that each MCO, PIHP, and PAHP submits a report with the data elements specified in 42 CFR 438.8(k). The report should contain the required 13 data elements noted in the regulation, reflect the correct reporting years, and contain an attestation of accuracy regarding the calculation of the MLR as required in 42 CFR 438.8(n). The state should have a policy and procedure to indicate when the report(s) are due from plans and should not accept multiple submissions from plans unless the capitation payments are revised retroactively.

Audit Objectives Determine whether the state's oversight of the content and submission of MLR reports meets the requirements.

Suggested Audit Procedures

- a. Perform procedures to ascertain if the state obtained the required MLR reports;
- b. Verify the 13 required elements are included;
- c. Verify the reporting period covered is 12 months;
- d. Verify the report contains an attestation statement to address accuracy;
- e. Ascertain if the state did not permit plans to submit multiple MLR reports for a specific reporting year except when a state had retroactive changes to capitation payments.

10. Managed Care Financial Audit

Compliance Requirements Two types of audits are required for managed care:

1. Audited Financial Reports – The contract with each MCO, PIHP, and PAHP must require them to submit to the state an audited financial report specific to the Medicaid contract on an annual basis. These audits must be conducted in accordance with generally accepted accounting principles and generally accepted auditing standards (42 CFR section 438.3(m)).
2. Periodic Audits – Effective no later than for rating periods for contracts starting on or after July 1, 2017, the state must periodically, but no less frequently than once every three years, conduct, or contract for an independent audit of the accuracy, truthfulness, and completeness of the encounter and financial data submitted by, or on behalf of each MCO, PIHP, and PAHP and post the results of these audits on its website (42 CFR section 438.602(e) and (g); May 6, 2016, *Federal Register* (81 FR 27497); OMB No. 0938-0920).

Audit Objectives Determine whether the required audits were conducted and the audit reports for the Periodic Audits were posted on the state’s website.

Suggested Audit Procedures

- a. Review the state’s policies and operating procedures for obtaining audited financial reports, conducting these required audits and for posting the Periodic Audits on the state’s website.
- b. Perform tests to ascertain if: (1) the state obtained annually the required Audited Financial Reports from the MCO, PIHP, and PAHP; and (2) the independent auditor’s report on the financial report stated the audit was conducted in accordance with generally accepted auditing standards.
- c. Perform tests to ascertain if: (1) the state conducted or contracted for the required Periodic Audits for the-MCO, PIHP, and PAHP at least once in the most recent three year period; and (2) the audits were posted on the state’s website.

11. External Quality Review Organization (EQRO)

Compliance Requirements The SMA must ensure that each managed care organization is evaluated annually on quality, timeliness, and access to the health care services by an EQRO. The state must ensure that the EQRO conducting such reviews is competent and independent (42 CFR 438 Subpart E, 42 CFR 438.354).

Audit Objectives Determine whether the SMA has ensured the EQRO’s conducting the annual reviews meet the requirements for competence and independence.

Suggested Audit Procedures

- a. For states with managed care perform procedures to ascertain if:
 - (1) The SMA's policies and procedures meet the requirement to ensure the EQROs are competent and independent.

IV. OTHER INFORMATION

Portion of Medicaid (Title XIX) Expenditures Claimed at CHIP Enhanced FMAP

As described in Part 4, CHIP (Assistance Listing 93.767), III.A.1, "Activities Allowed or Unallowed," certain qualifying states meeting the criteria provided in section 2105(g) of the Social Security Act, 42 USC 1397ee(g), may opt to receive the CHIP enhanced FMAP for certain Medicaid program expenditures. For certain qualifying states that choose this option, the enhanced portion of such expenditures (that is, the portion that is equal to the difference between the CHIP enhanced FMAP and the standard Medicaid FMAP) is funded by their available CHIP allotments. Qualifying states were permitted to use up to 20 percent of their CHIP allotment to fund the enhanced portion of such Medicaid expenditures for allotments through the fiscal year 2008 CHIP allotment and up to 100 percent of their available CHIP allotments beginning with the fiscal year 2009 CHIP allotment. The qualifying states, determined by CMS under section 2105(g) of the Act, 42 USC 1397ee(g) are Connecticut, Hawaii, Maryland, Minnesota, New Hampshire, New Mexico, Rhode Island, Tennessee, Vermont, Washington, and Wisconsin.

Amounts transferred into the state's Medicaid program are subject to the requirements of the Medicaid program when expended and should be included in the audit universe and total expenditures of this program when determining Type A programs. On the Schedule of Expenditures of Federal Awards, the amounts transferred in should be shown as expenditures of this program when such amounts are expended.

Improper Payment Findings

Auditors should be alert to the following that have been identified in audit findings both as noncompliance and material weaknesses: If these items are identified, the auditors should determine if further review is appropriate.

1. Beneficiary Eligibility Determinations

Findings related to internal control deficiencies for eligibility determinations include:

- eligibility determination and renewal were not performed timely and/or performed within the timeliness standards;
- eligibility determinations are not made accurately;
- lack of internal controls over obtaining adequate documentation to support eligibility determinations, when applicable;
- eligibility system data was not accurate;

- beneficiary information was not verified according to the state's verification plan;
- program staff did not have sufficient knowledge of program requirements and policies due to high turnover and/or a lack of training; and
- MEQC review staff were not functionally and physically separate from both the eligibility determination staff and the Medicaid policy staff.

2. Medicaid Claims Processing

Findings related to significant weaknesses in Medicaid claims processing include:

- inadequate documentation to support the payments claimed in the CMS-64;
- payments reported on the CMS-64 were not readily traceable to the individual claims or information in the sub-system or the financial statements;
- inadequate internal control over utilization, fraud, and accuracy of the Medicaid claims;
- lack of understanding of when to report payments in the CMS-64;
- inadequate internal control to assure that payments to providers were made in compliance with federal regulations (e.g., payments for services that were not medically necessary and providers were not eligible Medicaid providers);
- review of cost report and recoupment of rate adjustments were not timely.

3. Other areas of weaknesses identified include:

- inadequate monitoring and oversight of subcontractors;
- inadequate monitoring and oversight to assure provider licensing, agreements or required certification were in effect and up-to-date, and that the related documentation was in file or in the state MES;
- inadequate internal control related to implementation of MES module;
- inadequate internal control regarding user access to the MES modules, including terminated employees' user access rights; and
- MES module was not programmed and updated timely and accurately with proper information.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.870 MATERNAL, INFANT, AND EARLY CHILDHOOD HOME VISITING GRANT PROGRAM

I. PROGRAM OBJECTIVES

The goals of the Maternal, Infant, and Early Childhood Home Visiting (MIECHV) programs are to (1) strengthen and improve the programs and activities carried out under Title V of the Social Security Act, (2) improve coordination of services for at-risk communities, and (3) identify and provide comprehensive services to improve outcomes for families who reside in at-risk communities.

The MIECHV programs include grants to states and six jurisdictions (District of Columbia, Puerto Rico, US Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands). Per Section 511(h)(2)(B) of the Social Security Act (42 USC 711(h)(2)(B)), nonprofit organizations with an established record of providing early childhood home visiting programs or initiatives in a state or several states are eligible for funding to provide services in states that are not participating in the programs. The legislation requires that awardees demonstrate improvement in six benchmark areas: improved maternal and newborn health; prevention of child injuries, child abuse, neglect, or maltreatment, and reduction of emergency department visits; improvement in school readiness and achievement; reduction in crime or domestic violence; improvement in family economic self-sufficiency; and improvements in the coordination and referrals for other community resources and supports.

These programs are intended to support and strengthen cooperation and coordination and promote linkages among various programs that serve pregnant women, expectant fathers, young children, and families in tribal communities and result in high-quality, comprehensive early childhood systems in every community.

II. PROGRAM PROCEDURES

The Health Resources and Services Administration (HRSA) administers the MIECHV programs in partnership with the Administration for Children and Families (ACF), with awards under this Assistance Listing number made by HRSA (ACF awards are made under Assistance Listing 93.508). HRSA and ACF are Operating Divisions of the Department of Health and Human Services (HHS).

Grants are awarded to states, the District of Columbia, Puerto Rico, Guam, the US Virgin Islands, the Commonwealth of the Northern Mariana Islands, and America Samoa to conduct needs assessments, and to those entities and nonprofit organizations providing services in states that are not participating in the programs, to develop the infrastructure needed for the widespread planning, adopting, implementing, and sustaining of evidence-based maternal, infant, and early childhood home visiting programs; and provide high-quality, voluntary, evidence-based home visiting services to pregnant women and families with young children from birth to age 5. Nonprofit organizations are required to carry out the program based on the needs assessment conducted by the state.

Also, to the greatest extent practicable, nonprofit organizations are subject to the program requirements that apply to states (e.g., coordination with other programs under Title V of the Social Security Act and the 10 percent limitation on costs associated with administering the award).

Source of Governing Requirements

These programs are authorized under the Social Security Act, Title V, 511(c) (42 USC 711(c)), as amended by the Bipartisan Budget Act of 2018 (Pub. L. No. 115-123), Title VI, Subtitle A.

Availability of Other Program Information

The HRSA Maternal and Child Health Bureau website provides general information on this program at <http://mchb.hrsa.gov/programs/homevisiting/>.

The Notices of Funding Opportunity (NOFO) under Assistance Listing 93.870 include HRSA-21-050 (formula grants), HRSA-17-102, and HRSA-17-101. These may be found online at <https://grants.hrsa.gov/webexternal/fundingOpp.asp>. The NOFOs also are available in the archives at <https://www.grants.gov/> through an advanced search using Assistance Listing 93.870.

HHS launched Home Visiting Evidence of Effectiveness (HomVEE) to conduct a thorough and transparent review of the home visiting research literature and provide an assessment of the evidence of effectiveness for home visiting programs models that target families with pregnant women and children from birth to age 5. Information on this process and a list of the 19 evidence-based models can be found at <https://homvee.acf.hhs.gov/HRSA-Models-Eligible-MIECHV-Grantees>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	N	N	Y	Y	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

As specified in the NOFOs, funds may be used to:

- a. identify unmet needs and target at-risk communities; based on the most recent and approved statewide needs assessment, or as updated to meet the requirement set forth in section 50603 of the Bipartisan Budget Act of 2018.
- b. develop the infrastructure and capacity needed to implement and sustain evidence-based maternal, infant, and early childhood home visiting programs in those communities; and
- c. provide home visiting services to eligible families (home visiting is defined as an evidence-based program, implemented in response to findings from a needs assessment, that includes home visiting as a primary service delivery strategy (excluding programs with infrequent or supplemental home visiting), and is offered on a voluntary basis to pregnant women or children birth to age 5 targeting the participant outcomes in the legislation which include improved maternal and child health, prevention of child injuries, child abuse, or maltreatment, and reduction of emergency department visits, improvement in school readiness and achievement, reduction in crime or domestic violence, improvements in family economic self-sufficiency, and improvements in the coordination and referrals for other community resources and supports).

2. *Activities Unallowed*

As stated in the NOFOs, funds may not be used to support the delivery or costs of direct medical, dental, mental health, or legal services; however, some limited

direct services may be provided (typically by the home visitor) to the extent required in fidelity to an evidence-based model approved for use.

B. Allowable Costs/Cost Principles

Costs charged to federal funds under this program must comply with the cost principles at 45 CFR Part 75, Subpart E, and any other requirements or restrictions on the use of federal funding.

J. Program Income

The Notice of Award provides guidance on the use of program income. The addition method is used for this program.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

Part 3.L for audit guidance.

M. Subrecipient Monitoring

1. The HHS Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards (45 CFR Part 75) requires pass-through entities: (1) to evaluate each subrecipient's risk of noncompliance in order to determine the appropriate monitoring level; (2) monitor the activities of subrecipient organizations to ensure that the subaward is in compliance with applicable federal statutes and regulations and terms of the subaward; and (3) verify that subrecipients are audited as required under this guidance. Specifically, the grantee must conduct monitoring activities in accordance with sections 75.351 through 75.353 of Subpart D of 45 CFR Part 75.

2. Grantees must ensure that all requirements imposed by the federal government are passed down to subrecipients so that the HHS award is used in accordance with federal statutes, regulations, and the terms and conditions of the award.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.914 HIV EMERGENCY RELIEF PROJECT GRANTS (RYAN WHITE HIV/AIDS PROGRAM PART A)

I. PROGRAM OBJECTIVES

The objective of this program is to improve access to a comprehensive continuum of high-quality, community-based primary medical care and support services in metropolitan areas that are disproportionately affected by the incidence of Human Immunodeficiency Virus (HIV)/Acquired Immune Deficiency Syndrome (AIDS). The statute refers to both people with HIV and those who have AIDS (as reported to and confirmed by the Centers for Disease Control and Prevention (CDC)). These terms are used interchangeably in this compliance supplement but refer to this total universe of eligible individuals.

Emergency financial assistance in the form of formula-based funding, supplemental project-based funding, and formula-based Minority AIDS Initiative (MAI) funding is provided to eligible metropolitan areas (EMAs) and transitional grant areas (TGAs) to develop, organize, and operate health and support services programs for people with HIV and their care givers.

The supplemental grants are discretionary awards and are awarded, following competition, to EMAs and TGAs that demonstrate need beyond that met through the formula award. They must also demonstrate the ability to use the supplemental amounts quickly and cost effectively. Other criteria contained in annual application guidance documents may also apply. All EMAs and TGAs that are receiving formula assistance are also receiving supplemental assistance and will continue to receive such assistance unless they fail to meet the legislative requirements related to unobligated balances.

II. PROGRAM PROCEDURES

The Health Resources and Services Administration (HRSA), a component of the Department of Health and Human Services (HHS), administers the HIV emergency relief programs. Eligibility for Ryan White HIV/AIDS Program (RWHAP) Part A grants depends, in part, on the number of confirmed AIDS cases within a statutorily specified “metropolitan area.” The secretary of HHS uses the Office of Management and Budget’s (OMB) census-based definitions of a Metropolitan Statistical Area (MSA) in determining the geographic boundaries of a RWHAP metropolitan area. HHS relies on the OMB geographic boundaries in effect when a jurisdiction was or is (if newly eligible) initially funded under RWHAP Part A. A metropolitan area is not eligible if it does not have an overall population of 50,000 or more.

HRSA uses data reported to and confirmed by CDC to determine eligibility. An EMA is a metropolitan area for which there has been reported to, and confirmed by, the director of the CDC a cumulative total of more than 2,000 cases of AIDS for the most recent five calendar-year periods for which data are available. A TGA is a metropolitan area for which there has been reported to, and confirmed by, the director of the CDC a cumulative total of at least 1000, but fewer than 2000, cases of AIDS during the most recent period of five calendar years for which data are available. MAI funding is awarded using a formula that is based on the distribution of HIV/AIDS cases among racial and ethnic minorities.

After subtracting the amount available for MAI project assistance, HRSA must make at least two-thirds (66 2/3 percent) of the appropriated amount available for the EMAs' and TGAs' formula allocation and award the remainder as supplemental funding on the basis of demonstrated need and other factors. EMAs and TGAs are funded from the formula, supplemental, and MAI allocation on the basis of a single application and a combined award.

Funds are made available to the chief elected official of the EMA or TGA in accordance with statutory requirements and program guidelines. Day-to-day responsibility for the grant is ordinarily delegated to the jurisdiction's public health department, and some administrative functions may be outsourced to a private entity. The chief elected official of the jurisdiction is also required to establish or designate an HIV health services planning council, which carries out a planning process, coordinating with other state, local, and private planning and service organizations, and establishes the priorities for allocating funds. Newly eligible areas designated as TGAs in fiscal year (FY) 2007 and beyond are exempt from the requirement to establish and use an HIV health services planning council but must provide a process for obtaining community input as prescribed in the RWHAP Part A legislation.

Consistent with funding and service priorities established through the public planning process, the receiving jurisdiction uses the funds to provide assistance to public entities or private nonprofit or for-profit entities to deliver or enhance HIV/AIDS-related core medical and support services and, within established limits, for associated administrative and clinical quality management activities. Administrative activities include EMA or TGA oversight of service provider performance and adherence to their subrecipient obligations. Most of these service providers are nonprofit organizations.

Source of Governing Requirements

This program is authorized under sections 2601–2610 of Title XXVI of the Public Health Service Act, as amended by the Ryan White HIV/AIDS Treatment Extension Act of 2009 (Pub. L. No. 111-87) and is codified at 42 USC 300ff-11 through 300ff-20. The MAI is authorized under Section 2693(b)(2)(A) of the Public Health Service Act, 42 USC 300ff- 121(b)(2)(A).

All HRSA awards are subject to the Uniform Administrative Requirements, Cost Principles, and Audit Requirements at 45 CFR Part 75. As per 45 CFR parts 75.201 and 301, recipients may use a fixed-award instrument to obtain services based on a reasonable estimate of actual cost and based on performance and results related to improvement of program outcomes.

There are no program regulations specific to this program.

Availability of Other Program Information

Additional information about this program is available at <https://ryanwhite.hrsa.gov/>.

Additional information on allowable uses of funds under this program is contained in policy notices and standards found at <https://ryanwhite.hrsa.gov/grants/policy-notices> and <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/2022-rwhap-nms-part.pdf>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	N	N	N	Y	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

Funds may be used only for core medical services, support services, clinical quality management, and administrative expenses (42 USC 300ff-14(a)).

- a. Core medical services with respect to people with HIV (including co-occurring conditions (i.e., one or more adverse health conditions of an individual with HIV, without regard to whether the individual has AIDS or whether the conditions arise from HIV) means (1) outpatient and ambulatory health services; (2) AIDS Drug Assistance Program treatments; (3) AIDS pharmaceutical assistance; (4) oral health care; (5) early intervention services meeting the requirements of 42 USC 300ff-14(e); (6) health insurance premium and cost sharing assistance for low-income individuals; (7) home health care; (8) medical nutrition therapy; (9) hospice services; (10) home and community-based health services;

(11) mental health services; (12) substance abuse outpatient care; and (13) medical case management, including treatment adherence services (42 USC 300ff-14(c)(3)).

- b. Support services means services that are needed for people with HIV to achieve their medical outcomes (those outcomes affecting the HIV-related clinical status of an individual with HIV) (for example, respite care for persons caring for people with HIV, outreach services, medical transportation, linguistic services, referrals for health care and support services, and such other services specified by HRSA) (42 USC 300ff-14(d)).
- c. Clinical quality management means assessing the extent to which HIV health services provided to patients under the grant are consistent with the most recent Public Health Service guidelines for the treatment of HIV/AIDS and related opportunistic infections, and as applicable, developing strategies for ensuring that such services are consistent with the guidelines for improvement in the access to and quality of HIV health services (42 USC 300ff-14(h)(5)(A)). Policy Clarification Notice #15-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/pcn-15-02-cqm.pdf>.
- d. Administrative expenses at the recipient level include (1) activities related to routine grant administration and monitoring (for example, development of applications, receipt and disbursement of program funds, development and establishment of reimbursement and accounting systems, development of a clinical quality management program, preparation of routine programmatic and financial reports, and compliance with grant conditions and audit requirements); (2) contract development, solicitation review, award, monitoring, and reporting; and (3) activities carried out by the HIV health services planning council (42 USC 300ff-14(h)(3) and 300ff-12(b)).
- e. Subrecipient administrative expenses include usual and recognized overhead activities, including those that are reimbursed through approved indirect cost rates; management oversight of funded activities; and other types of program support such as quality assurance, quality control, and related activities (42 USC 300ff-14(h)(4)).

2. *Activities Unallowed*

- a. Funds may not be used to make payment for any item or service if payment has already been made or can reasonably be expected to be made under any state compensation program, under an insurance policy or any federal or state health benefits program, or by an entity that provides health services on a pre-paid basis except for programs administered by or providing the services of the Indian Health Service (42 USC 300ff-15(a)(6)).

- b. Funds may not be used to purchase or improve land or to purchase, construct, or make permanent improvement to any building. Minor remodeling is allowed (42 USC 300ff-14(i)).
- c. Funds may not be used to make cash payments to intended recipients of RWHAP services (42 USC 300ff-14(i)) and Ryan White HIV/AIDS Program Services: Eligible Individuals and Allowable Uses of Funds, Policy Clarification Notice #16-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/service-category-pcn-16-02-final.pdf>.
- d. Funds may not be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug (Consolidated Appropriations Act, 2016, Division H, Title V, Section 520 (Pub. L. No. 114-113) and subsequent appropriations, as applicable). Other elements of syringe services programs may be allowable if in compliance with applicable HHS and HRSA-specific guidance.
- e. Funds may not be used for AIDS programs or to develop materials, designed to promote or encourage, directly, intravenous drug use or sexual activity, whether homosexual or heterosexual (42 USC 300ff-84).

E. Eligibility

1. Eligibility for Individuals

Eligible beneficiaries are low-income individuals with HIV or, in certain circumstances, families of people with HIV. To the maximum extent practicable, services are to be provided to eligible individuals regardless of their ability to pay for the services and their current or past health condition (42 USC 300ff-15(a)(7)(A)).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

The EMA or TGA may make funds available to public or private nonprofit entities or to private for-profit entities if they are the only available providers of quality HIV care in the area (42 USC 300ff-14(b)(2)).

J. Program Income

The Notice of Award provides guidance on the use of program income. The addition method is used for this program. Program income must be used for activities described in III.A.1, "Activities Allowed."

M. Subrecipient Monitoring

1. The HHS Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards (45 CFR Part 75) requires pass-through entities: (1) to evaluate each subrecipient's risk of noncompliance in order to determine the appropriate monitoring level; (2) to monitor the activities of subrecipient organizations to ensure that the subaward is in compliance with applicable federal statutes and regulations and terms of the subaward; and (3) to verify that subrecipients are audited as required under this guidance. Specifically, the recipient must conduct monitoring activities in accordance with sections 75.351 through 75.353 of Subpart D of 45 CFR Part 75.
2. Recipients must ensure that all requirements imposed by the federal government are passed down to subrecipients so that the HHS award is used in accordance with federal statutes, regulations, and the terms and conditions of the award.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.917 HIV CARE FORMULA GRANTS (RYAN WHITE HIV/AIDS PROGRAM PART B)

I. PROGRAM OBJECTIVES

The objective of this program is to assist states and territories in improving the quality, availability, and organization of healthcare and support services for low-income, uninsured, and underinsured people with Human Immunodeficiency Virus (HIV).

II. PROGRAM PROCEDURES

The Department of Health and Human Services (HHS) administers the Ryan White HIV/AIDS Program (RWHAP) Part B through the Health Resources and Services Administration's (HRSA) HIV/AIDS Bureau (HAB). Grants are awarded annually, on a formula basis, to all 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands following submission of an application to, and approval by, HAB. The responsible state agency, usually the state health department, is designated by the governor.

The application addresses how the state plans to address each of the six specified program components: (1) HIV care consortia, (2) home and community-based care, (3) health insurance continuation program, (4) provision of treatments, (5) state direct services, and (6) Minority AIDS Initiative (MAI). This includes the state's plans for the AIDS Drug Assistance Program (ADAP). ADAP funding is provided to the state as a separate formula amount in addition to the base formula grant amount and can only be used for ADAP services.

States may use a variety of service delivery mechanisms. States may provide some or all services directly or may enter into subawards with local HIV care consortia, associations of public and nonprofit healthcare and support service providers, and community-based organizations that plan, develop, and deliver services for low-income, uninsured, and underinsured people with HIV. The state also may delegate some of its authority to monitor provider agreements to a "lead agency" (fiscal agent), with specific responsibilities contained in a formal agreement between the state and that agency. Finally, the state may provide subawards to healthcare or other service providers.

Source of Governing Requirements

The RWHAP Part B formula grant program is authorized under Sections 2611-2623 of Title XXVI of the Public Health Service Act as amended by the Ryan White HIV/AIDS Treatment Extension Act of 2009 (Pub. L. No. 111-87) and codified at 42 USC 300ff-21 through 300ff-31b. The MAI is authorized under Section 2693(b)(2)(B) of the Public Health Service Act, 42 USC 300ff-121(b)(2)(B).

There are no regulations specific to the RWHAP Part B.

Availability of Other Program Information

Further information about the RWHAP Part B is available at <https://ryanwhite.hrsa.gov/>.

Additional information on allowable uses of funds under this program is contained in policy notices and standards found at <https://ryanwhite.hrsa.gov/grants/policy-notice> and <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/fiscal-monitoring-partb.pdf>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N

Y	Y	Y	Y	N	Y	N	N	Y	N	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Grant funds (and required matching funds) may be used for core medical services, support services, planning and evaluation, clinical quality management, and administrative expenses (42 USC 300ff-22(a); 42 USC 300ff-28(b)).

- (1) Core medical services with respect to people with HIV (including the co-occurring conditions of the individual) means (1) outpatient and ambulatory health services; (2) AIDS Drug Assistance program treatments; (3) AIDS pharmaceutical assistance; (4) oral healthcare; (5) early intervention services meeting the requirements of 42 USC 300ff-22(d); (6) health insurance premium and cost sharing assistance for low-income individuals; (7) home healthcare; (8) medical nutrition therapy; (9) hospice services; (10) home and community-based health services; (11) mental health services; (12) substance abuse outpatient care; and (13) medical case management, including treatment adherence services (42 USC 300ff-22(b)(3)).
- (2) Support services means services that are needed for people with HIV to achieve their medical outcomes (those outcomes affecting the HIV-related clinical status of people with HIV) (for example, respite care for persons caring for people with HIV, outreach services, medical transportation, linguistic services, referrals for healthcare and support services, and such other services specified by HRSA). Expenditures for or through consortia are considered support services (42 USC 300ff-22(c); 42 USC 300ff-23(f)).
- (3) Clinical quality management means assessing the extent to which HIV health services provided to patients under the grant are consistent with the most recent Public Health Service guidelines for the treatment of HIV/AIDS and related opportunistic infections, and as applicable, developing strategies for ensuring that such services are consistent with the guidelines for improvement in the access to and quality of HIV health services (42 USC 300ff-28(b)(3)(E)(i) and Policy Clarification Notice #15-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/pcn-15-02-cqm.pdf>).
- (4) Administrative expenses at the recipient level include activities related to (1) routine grant administration and monitoring (for example, development of applications, receipt and disbursement of program funds, development and establishment of reimbursement and accounting systems, development of a clinical quality management program, preparation of routine programmatic and financial reports, and compliance with grant conditions and audit requirements); (2) contract development, solicitation review, award, monitoring, and reporting; and (3) planning and evaluation activities (42 USC 300ff-28(b)(3)(C)).
- (5) Subrecipient administrative expenses include usual and recognized overhead activities, including those that are reimbursed through

approved indirect cost rates; management oversight of funded activities; and other types of program support, such as quality assurance, quality control, and related activities (42 USC 300ff-28(b)(3)(D)).

- b. Any drug rebates received on drugs purchased from funds provided to establish a program of therapeutics must be used to support the types of activities otherwise eligible for funding under RWHAP Part B, with priority given to activities related to providing therapeutics (42 USC 300ff-26(g)). To assess whether a state or subrecipient is giving priority to activities related to providing therapeutics, the state (or subrecipient) should be able to demonstrate, that, before undertaking any type of activities other than ADAP purchases for medications or insurance that are allowed under paragraph 1.a. above, it (1) has no waiting list for ADAP services; (2) the ADAP formulary includes the required classes of HIV antiretroviral medications and opportunistic infection-related medications; and (3) the financial eligibility to access the ADAP is established at no less than 200 percent of the federal poverty level (the poverty guidelines are available at <https://aspe.hhs.gov/topics/poverty-economic-mobility/poverty-guidelines> and are also published each year in the *Federal Register*).
- c. Rebates may be used for allowable RWHAP Part B services that exceed the recipient's RWHAP Part B implementation work plan. Rebates are not part of the recipient's RWHAP Part B award, and, therefore, are not subject to the 10 percent administrative cost cap, the planning and evaluation cost cap, clinical quality management cost cap, nor to the requirement to spend 75 percent on core medical services (see III.G.3.b and h, "Matching, Level of Effort, and Earmarking – Earmarking" below). Rebates can be used to meet both a recipient's state matching and maintenance of effort (MOE) requirements (42 USC 300ff-26(g) and Policy Clarification Notice #15-04 Utilization and Reporting of Pharmaceutical Rebates, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/pcn-15-04-pharmaceutical-rebates.pdf>).

2. *Activities Unallowed*

- a. Funds may not be used to purchase or improve land, or to purchase, construct, or permanently improve (other than minor remodeling) any building or other facility (42 USC 300ff-28(b)(6)).
- b. Funds may not be used to make cash payments to intended recipients of RWHAP services. Where direct provision of the service is not possible or effective; store gift cards, vouchers, coupons, or tickets that can be exchanged for a specific service or commodity (e.g., food or transportation) must be used. Recipients are advised to administer voucher

and store gift card programs in a manner which assures that vouchers and store gift cards cannot be exchanged for cash or used for anything other than the allowable goods or services, and that systems are in place to account for disbursed vouchers and store gift cards (42 USC 300ff-28(b)(6)) and Ryan White HIV/AIDS Program Services: Eligible Individuals and Allowable Uses of Funds, Policy Clarification Notice #16-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/service-category-pcn-16-02-final.pdf>).

- c. Funds may not be used to make payments for any item or service to the extent that payment has been made or can reasonably be expected to be made for that item or service under any state/territory compensation program, under an insurance policy, or under any federal or state health benefits program or by an entity that provides health services on a prepaid basis except for a program administered by or providing the services of the Indian Health Service (42 USC 300ff-27(b)(7)(F)).
- d. Funds may not be used for inpatient hospital services, or nursing home or other long-term care facilities (42 USC 300ff-24(c)(3)).
- e. Funds may not be used to pay any costs associated with creation, capitalization, or administration of a liability risk pool (other than those costs paid on behalf of individuals as part of premium contributions to existing liability risk pools) or to pay any amount expended by a state/territory under Title XIX of the Social Security Act (Medicaid) (42 USC 300ff- 25(b)).
- f. Funds may not be used to develop materials designed to promote or encourage, directly, intravenous drug use or sexual activity, whether homosexual or heterosexual (42 USC 300ff-84).
- g. Funds may not be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug (Consolidated Appropriations Act (Pub. L. No. 114-113), 2016, Division H, Title V, Section 520 and subsequent appropriations, as applicable). Other elements of syringe services programs may be allowable if in compliance with applicable HHS and HRSA-specific guidance.
- h. ADAP rebates cannot be shared with other entities including, but not limited to, RWHAP Part A recipients, high-risk insurance pools, Marketplace plans, Medicaid, or any other state or federal program (42 USC 300ff- 31(b)).
- i. International travel.

E. Eligibility**1. Eligibility for Individuals**

- a. To be eligible to receive assistance in the form of therapeutics, an individual must have a medical diagnosis of HIV and be (1) a low-income individual (as defined by the state), and (2) a resident of the state (as defined by the state) (42 USC 300ff-26(b)).

2. Eligibility for Group of Individuals or Area of Service Delivery

A state must use Emerging Communities funding in the geographic area specified as an Emerging Community, as defined in 42 USC 300ff-30(d)—a metropolitan area for which there has been reported to and confirmed by the Centers for Disease Control and Prevention a cumulative total of at least 500, but fewer than 1,000, cases of AIDS during the most recent period of five calendar years for which such data are available (42 USC 300ff-32(b)(1) and 300ff-30).

3. Eligibility for Subrecipients

- a. To receive funding from the state under a consortium agreement, an applicant consortium must agree to provide, directly or through agreements with other service providers, essential health services, and essential support services, and must meet specified application and assurance requirements. These include conducting a needs assessment within the geographic area served and developing a plan (consistent with the state's comprehensive plan required by 42 USC 300ff-27(b)(5)) to meet identified service needs following a consultation process (42 USC 300ff-23(c)(2)).
- b. For consortia otherwise meeting these requirements, the state shall give priority first to consortia that are receiving assistance from HRSA for adult and pediatric HIV-related care demonstration projects and then to any other existing HIV care consortia (42 USC 300ff-23(e)).

G. Matching, Level of Effort, Earmarking**1. Matching**

- a. States and territories (excluding Puerto Rico) with greater than one percent of the aggregate number of national cases of HIV/AIDS in the two-year period preceding the federal fiscal year in which the state is applying for a grant must, depending on the number of years in which this threshold requirement has been met, provide matching funds as follows (42 USC 300ff-27(d)):

Year(s) in Which Matching Required	Minimum Percentage of Nonfederal Matching	Ratio of Nonfederal to Federal Expenditures
First	16 2/3	\$1 nonfederal/\$5 Federal
Second	20	\$1 nonfederal/\$4 Federal
Third	25	\$1 nonfederal/\$3 Federal
Fourth and subsequent	33 1/3	\$1 nonfederal/\$2 Federal

- b. All recipients are subject to a matching requirement for ADAP supplemental funds in an amount equal to \$1 for every \$4 of federal funds (42 USC 300ff-28(a)(2)(F)(ii)(III)). Those recipients that are required to match the base formula funds may request and receive a waiver from this additional matching requirement.

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

The state/territory will maintain HIV-related activities at a level that is equal to not less than the level of such expenditures by the state/territory for the one-year period preceding the fiscal year for which the state/territory is applying for RWHAP Part B funds (42 USC 300ff-27(b)(7)(E)).

2.2 Level of Effort – *Supplement Not Supplant*

Funds awarded under a grant must supplement and not supplant other funds available to the entity for the provision of early intervention services for the fiscal year involved (42 USC 300ff-22(d)(2)(B)).

3. Earmarking

- a. The state may not use more than 10 percent of the amounts received under the grant for planning and evaluation activities (42 USC 300ff-28(b)(2)).
- b. The state may not use more than 10 percent of the amounts received under the grant for administration (42 USC 300ff-28(b)(3)(A)).
- c. A state may not use more than a total of 15 percent of the amounts received for the combined costs for administration and planning and evaluation (42 USC 300ff-28(b)(4)). States and territories that receive a minimum allotment (between \$50,000 and \$500,000) may expend up to the amount required to support one full-time equivalent employee for any or all of these purposes (42 USC 300ff-28(b)(5)).
- d. The aggregate of expenditures for administrative expenses by subrecipients may not exceed 10 percent of the total amount of grant funds sub awarded by the state (without regard to whether particular entities

spend more than 10 percent for such purposes) (42 USC 300ff-28(b)(3)(B)).

- e. Unless waived by the secretary, for the purpose of providing health and support services to women, youth, infants, and children with HIV, including treatment measures to prevent the perinatal transmission of HIV, a state shall use for each of these populations not less than the percentage of RWHAP Part B funds in a fiscal year constituted by the ratio of the population involved (women, youth, infants, or children) in the state with AIDS to the general population in the state of individuals with AIDS (42 USC 300ff-22(e)). This information is provided to the state by HRSA with reporting requirements (i.e., annual progress report) as listed on the Notice of Award (NoA). Recipients demonstrate compliance with the WICY expenditure requirement in their annual progress report and may request a waiver as part of the annual progress report.
- f. A state shall use a portion of the funds awarded to establish a program to provide therapeutics to treat HIV/AIDS or prevent the serious deterioration of health arising from HIV/AIDS in eligible individuals, including measures for the prevention and treatment of opportunistic infections. The specific amount for ADAP will be provided in the grant agreement. Of the specific amount in the grant agreement for this purpose, the state may use not more than 5 percent to encourage, support, and enhance adherence to, and compliance with, treatment regimens (including related medical monitoring) unless the secretary (or designee) approves a 10 percent limit (42 USC 300ff-26(c)).
- g. A state shall establish a clinical quality management program to determine whether the services provided under the grant are consistent with the most recent Public Health Service guidelines for the treatment of HIV disease and related opportunistic infection and, as applicable, to develop strategies for bringing these services into conformity with the guidelines. Funds used for this purpose may not exceed the lesser of 5 percent of the amount received under the grant or \$3,000,000 and are not considered administrative expenses for purposes of the limitation under paragraph 3.b above (42 USC 300ff-28(b)(3)(E)).
- h. Unless waived by the secretary, HHS (or designee), not less than 75 percent of the amount remaining after reserving amounts for state administration, planning and evaluation, and a clinical quality management program shall be used to provide core medical services to eligible people with HIV (including services regarding the co-occurring conditions of those individuals) (42 USC 300ff-22(b)).

J. Program Income

1. The NoA provides guidance on the use of program income. Generally, the addition method is used for this program; program income may also be used to satisfy all or part of the state matching requirements. Program income must be used for activities described in III.A.1, “Activities Allowed.”
2. The terms and conditions of award under the RWHAP Part B regarding program income do not apply to drug rebates. Rather, drug rebates must be used as specified in III.A.1.b and c, “Activities Allowed or Unallowed – Activities Allowed.”

M. Subrecipient Monitoring

1. HHS Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards (45 CFR Part 75) requires pass-through entities: (1) to evaluate each subrecipient’s risk of noncompliance in order to determine the appropriate monitoring level; (2) monitor the activities of subrecipient organizations to ensure that the subaward is in compliance with applicable federal statutes and regulations and terms of the subaward; and (3) verify that subrecipients are audited as required under this guidance. Specifically, the grantee must conduct monitoring activities in accordance with sections 75.351 through 75.353 of Subpart D of 45 CFR Part 75.
2. Recipients must ensure that all requirements imposed by the federal government are passed down to subrecipients so that the HHS award is used in accordance with federal statutes, regulations, and the terms and conditions of the award.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.918 GRANTS TO PROVIDE OUTPATIENT EARLY INTERVENTION SERVICES WITH RESPECT TO HIV DISEASE (RYAN WHITE HIV/AIDS PROGRAM PART C)

I. PROGRAM OBJECTIVES

The objective of the Ryan White HIV/AIDS Program (RWHAP) Part C Early Intervention Services (EIS) is to provide outpatient, high-quality, early intervention services and primary care related to the Human Immunodeficiency Virus (HIV) and the Acquired Immune Deficiency Syndrome (AIDS).

II. PROGRAM PROCEDURES

The Department of Health and Human Services (HHS) administers the RWHAP Part C EIS through the Health Resources and Services Administration's (HRSA) HIV/AIDS Bureau (HAB). Grants are awarded to public and nonprofit private entities, including federally qualified health centers under Section 1905(1)(2)(B) of the Social Security Act (42 USC 1396d (1)(2)(B)).

Grants also are awarded to (1) grantees under Section 1001 (regarding family planning) other than states, (2) comprehensive hemophilia diagnostic and treatment centers, (3) rural health clinics, (4) health facilities operated by or pursuant to a contract with the Indian Health Service, (5) community-based organizations, clinics, hospitals, and other health facilities that provide early intervention services to those people with HIV, or (6) nonprofit private entities that provide comprehensive primary care services to populations at risk for HIV/AIDS, including faith-based and community-based organizations. Providers must be qualified Medicaid-participating providers unless an exception is granted by HRSA (42 USC 300ff-52(a)(1)(A) through (G) and 42 USC 300ff-52(b)).

The RWHAP Part C EIS enables provision of a comprehensive primary health care and support services in an outpatient setting, including (1) HIV counseling and testing, (2) periodic medical evaluation, clinical, and diagnostic services, (3) provision of therapeutic measures for preventing and treating the deterioration of the immune system and for preventing and treating conditions arising with HIV/AIDS; and (4) referrals to appropriate providers of health care and support services. RWHAP Part C EIS recipients work with their community and public health partners to improve outcomes across the HIV care continuum so that individuals diagnosed with HIV are linked and engaged in care and started on antiretroviral therapy (ART) as early as possible.

Minority AIDS Initiative (MAI) funds are provided to recipients based on the percentage of the RWHAP Part C EIS populations served within racial/ethnic minority communities.

Services may be provided directly by the recipient or through contractual agreements with other service providers/subrecipients.

Source of Governing Requirements

The RWHAP Part C EIS is authorized under sections 2651–2667 of Title XXVI of the Public Health Service (PHS) Act, as amended by the Ryan White HIV/AIDS Treatment Extension Act of 2009 (Pub. L. No. 111-87) and is codified at 42 USC 300ff-51 through 300ff-67. The MAI is authorized under Section 2693(b)(2)(C) of the Public Health Service Act (42 USC 300ff-121(b)(2)(C)).

The RWHAP Part C EIS has no specific program regulations.

Availability of Other Program Information

Further information about the RWHAP Part C EIS is available at <https://ryanwhite.hrsa.gov/>.

Additional information on allowable uses of funds under the RWHAP Part C EIS is contained in policy notices and standards found at <https://ryanwhite.hrsa.gov/grants/policy-notice>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	Y	Y	Y	N	N

A. Activities Allowed or Unallowed1. *Activities Allowed*

- a. Funds may be used for counseling (whether or not associated with HIV testing) and testing for HIV (42 USC 300ff-51(e)(1)(A) and (B) and 42 USC 300ff-62(f)).
- b. Funds may be used to provide clinical and diagnostic services regarding HIV/AIDS and periodic medical evaluations of individuals with HIV. Funds also may be used for providing therapeutic measures for preventing and treating the deterioration of the immune system and related conditions (including STD, hepatitis C, and tuberculosis) (42 USC 300ff- 51(e)(1)(D) and (E)).
- c. Funds may be used to refer people with HIV to providers of health and support services, as appropriate. This includes recipients of funding under the RWHAP Part A and Part B for the provision of health and support services; biomedical research facilities of institutions of higher education that offer experimental treatment for such disease; community-based organizations or other entities that provide such treatment; and, in the case of pregnant women, recipients of funding under RWHAP Part D (42 USC 300ff-51(e)(1)(C) and -51(e)(2)(A-C)).
- d. At least 75 percent of funds must be used for core medical services for an individual with HIV, including the co-occurring conditions of the individual. Core medical services encompass the following services: (1) outpatient and ambulatory health services; (2) AIDS Drug Assistance Program treatments defined under 42 USC 300ff-26; (3) AIDS pharmaceutical assistance; (4) oral healthcare; (5) early intervention services described in 42 USC 300ff-51(e); (6) health insurance premium and cost sharing assistance for low-income individuals in accordance with 42 USC 300ff-15; (7) home health care; (8) medical nutrition therapy; (9) hospice services; (10) home and community-based health services as defined under 42 USC 300ff-14(c); (11) mental health services; (12) substance abuse outpatient care; and (13) medical case management, including treatment adherence services (42 USC 300ff-51(b)(1)(A) and 51(c)).
- e. Funds may be used to pay the costs of providing support services that are needed for people with HIV to achieve their medical outcomes. These services include, but are not limited to, outreach services, nonmedical case management, medical transportation, translation, and referrals for healthcare and support services. Support services are subject to approval of the secretary of HHS or designee (42 USC 300ff-51(b)(1)(B) and 51(d)).

- f. Funds may be used for the establishment of a clinical quality management program to assess the extent to which medical services that are provided to patients are consistent with the most recent Public Health Service guidelines for the treatment of HIV/AIDS and related opportunistic infections, and, as applicable, to develop strategies for ensuring that such services are consistent with the guidelines, and to ensure that improvements in the access to and quality of HIV health services are addressed (42 USC 300ff-64 (g)(5)). Policy Clarification Notice #15-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/pcn-15-02-cqm.pdf>.
- g. Funds may be used for administrative expenses; no more than 10 percent on administrative expenses (42 USC 300ff-51(b)(1)(C)).

2. *Activities Unallowed*

- a. Funds may not be used to make payments for any item or service to the extent that payment has been made or can reasonably be expected to be made for that item or service under any state compensation program, under an insurance policy (except for a program administered by or providing the services of the Indian Health Service), or under any federal or state health benefits program or by an entity that provides health services on a prepaid basis (42 USC 300ff-64(f)(1)).
- b. Funds may not be awarded to for-profit entities to carry out required early intervention services unless they are the only available providers of quality HIV care in the area (42 USC 300ff-51(e)(3)(A)).
- c. Funds may not be used to fund AIDS programs or to develop materials, designed to promote or encourage, directly, intravenous drug abuse or sexual activity, whether homosexual or heterosexual (42 USC 300ff-84).
- d. Funds may not be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug (Consolidated Appropriations Act, 2016 (Pub. L. No. 114-113), Division H, Title V, Section 520, and subsequent appropriations, as applicable). Other elements of syringe services programs may be allowable if in compliance with applicable HHS and HRSA-specific guidance.
- e. Funds received under this grant will not be expended for any purpose other than the purposes for which the grant was awarded (42 USC 300ff-64(g)(1)).
- f. Funds may not be used to purchase or improve land or to purchase, construct, or make permanent improvement to any building (42 USC 300ff-64(g)(1)).
- g. Payments for clinical research.

- h. Payments for nursing home care.
- i. Pre-Exposure Prophylaxis (PrEP) or Post-Exposure Prophylaxis (nPEP) medications or medical services. As outlined in the June 22, 2016 RWHAP and PrEP program letter, the RWHAP legislation provides grant funds to be used for the care and treatment of People Living with HIV/AIDS (PLWH), thus prohibiting the use of RWHAP funds for PrEP medications or related medical services, such as physician visits and laboratory costs. However, RWHAP Part C recipients and subrecipients may provide prevention counseling and information, which should be part of a comprehensive PrEP program.
- j. International travel.
- k. Funds may not be used to make cash payments to intended recipients of RWHAP services (42 USC 300ff-28(b)(6) and Ryan White HIV/AIDS Program Services: Eligible Individuals and Allowable Uses of Funds, Policy Clarification Notice #16-02, <https://ryanwhite.hrsa.gov/sites/default/files/ryanwhite/grants/service-category-pcn-16-02-final.pdf>).

B. Allowable Costs/Cost Principles

Costs charged to federal funds under this program must comply with the cost principles at 45 CFR Part 75, Subpart E, and any other requirements or restrictions on the use of federal funding.

J. Program Income

The Notice of Award provides guidance on the use of program income. The additional method is used for RWHAP Part C EIS. Program income must be used for activities described in III.A.1, “Activities Allowed.”

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.958 BLOCK GRANTS FOR COMMUNITY MENTAL HEALTH SERVICES

I. PROGRAM OBJECTIVES

The objective of the Community Mental Health Services Block Grant (MHBG) program is to provide funds to states and territories to enable them to carry out their respective plans for providing comprehensive community-based mental health services for adults with serious mental illness and children with serious emotional disturbances. To ensure creative and cost-effective delivery of services, states are encouraged to develop solutions to address the specific mental health concerns of their local communities.

II. PROGRAM PROCEDURES

The Substance Abuse and Mental Health Services Administration (SAMHSA), an operating division of the Department of Health and Human Services (HHS), administers the block grant program. MHBG-funded activities include (1) a comprehensive, community-based system of mental health care for adults who have a serious mental illness and children and youth who have a serious emotional disturbances, including case management, treatment, rehabilitation, employment, housing, education, medical, dental, and other support services that enable individuals to function in the community and reduce the rate of psychiatric hospitalization; (2) outreach for homeless individuals who also suffer from serious mental illness and the development of special services for individuals with serious illness living in rural areas; (3) systemic integration of social, educational, juvenile justice, and substance abuse services with health and mental health services for children with a serious emotional disturbance to ensure that care is appropriate to their multiple needs (including services provided under the Individuals with Disabilities Act); (4) collecting and reporting an estimate of the incidence and prevalence in the state of serious mental illness among adults and serious emotional disturbance among children; and (5) staffing and training for mental health services providers necessary to implement the state plan.

MHBG funds are allocated to the states according to a formula legislated by Congress. States may then distribute these funds to cities, counties, or service providers within their jurisdictions. Funds may only be used for carrying out the state plan, evaluating programs and services carried out under the plan, or planning, administration, and education activities relating to providing services under the plan.

The state must submit to SAMHSA an annual application that includes a plan to meet the community mental health services objectives described above and signed assurances required by the Act. The state plan addresses how the state intends to comply with the various requirements of Title XIX, Part B, subparts I and III of the Public Health Service Act (42 USC 300x) and its program objectives by addressing the five criteria listed in the statute.

Source of Governing Requirements

This program is authorized under Title XIX, Part B, subparts I and III of the Public Health Service Act (42 USC 300x et seq.). Criteria for the state plan may be found at 42 USC 300x-1. The 45 CFR Part 96 provides regulations for the general administrative requirements for the covered block grant programs. These regulations are in lieu of the general administrative requirements included in 45 CFR Part 75 (the HHS implementation of 2 CFR Part 200). Section 75.202 and sections 75.351 through 75.353 of Subpart D, and Subpart F of 45 CFR 75 are applicable to the MHBG. In addition, states are to administer the MHBG program according to the plans that they submitted to SAMHSA.

States are to use the fiscal policies that apply to their own funds in administering MHBG. Procedures must be adequate to ensure the proper disbursement of and accounting for federal funds paid to the grantee, including procedures for monitoring the assistance provided (45 CFR section 96.30).

Under the block grant philosophy, each state is responsible for designing and implementing its own MHBG program, within very broad federal guidelines. States must administer their MHBG program according to their approved plan and any amendments and in conformance with their own implementing rules and policies.

Availability of Other Program Information

SAMHSA published a notice in the *Federal Register* on July 6, 2001 (66 FR 35658), that details approval requirements for nonrecurring expense exclusions from maintenance-of-effort calculations. A second SAMHSA *Federal Register* notice, published on November 23, 2001 (66 FR 58746-58747), addresses retroactive application of the nonrecurring expense exclusion.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	N	N	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

Services provided with grant funds shall be provided only through appropriate, qualified community programs (which may include community mental health centers, child mental health programs, psychosocial rehabilitation programs, mental health peer support programs and mental health primary consumer-directed programs). Services under the plan will be provided through community mental health centers only if the services are provided as follows:

- a. Services principally to individuals residing in a defined geographic area (service area);
- b. Outpatient services, including specialized outpatient services for children, the elderly, individuals with serious mental illness, and residents of the centers who have been discharged from inpatient treatment at a mental health facility;
- c. Twenty-four-hours-a-day emergency care services;
- d. Day treatment and other partial hospitalization services or psychosocial rehabilitation services; or
- e. Screening for patients being considered for admission to state mental health facilities to determine the appropriateness of such admission (42 USC 300x-2(b) and (c)).

2. *Activities Unallowed*

The state shall not use grant funds to:

- a. Provide inpatient hospital services. An inpatient is a person who is formally admitted to the inpatient service of a hospital for observation, care, diagnosis, or treatment;

- b. Make cash payments to intended recipients of health services;
- c. Purchase or improve land, purchase, construct, or permanently improve (other than minor remodeling) any building or any other facility, or purchase major medical equipment;
- d. Satisfy any requirement for the expenditure of nonfederal funds as a condition for the receipt of federal funding; or
- e. Provide financial assistance to any entity other than a public or nonprofit entity. A state is not precluded from entering into a procurement contract for services since payments under such a contract are not financial assistance to the contractor (42 USC 300x-5(a)).

B. Allowable Costs/Cost Principles

State cost principles requirements apply to MHBG (45 CFR section 96.30). As discussed in Appendix I to this Supplement, “Federal Programs Excluded from the A-102 Common Rule and Portions of 2 CFR Part 200,” MHBG is exempt from the provisions of OMB cost principles.

C. Cash Management

SAMHSA will make payments at such times and in such amounts to each state from its awards in advance or by way of reimbursement in accordance with 31 USC 6503(a) and Treasury Circular No. 1075 (31 CFR Part 205) (45 CFR section 96.12).

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

- a. The state shall for each fiscal year maintain aggregate state expenditures for community mental health services at a level that is not less than the average level of such expenditures maintained by the state for the two state fiscal years preceding the fiscal year of the grant. Expenditures for the two previous fiscal years are reported in the state plan. The secretary may exclude from the aggregate state expenditures funds appropriated to the principal agency for authorized activities which are of a nonrecurring nature and for a specific purpose (42 USC 300x-4(b); *Federal Register*, July 6, 2001 (66 FR 35658), and November 23, 2001 (66 FR

58746-58747), as specified in II, “Program Procedures – Availability of Other Program Information”).

- b. The state shall for each fiscal year expend an amount not less than an amount equal to the amount expended in fiscal year 1994 for systems of integrated services for children with serious emotional disturbance (42 USC 300x-2(a)(1)(C)). FY 1994 expenditures are reported in the state plan.

2.2 Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

- a. The state may not expend more than 5 percent of grant funds for administrative expenses with respect to the grant (42 USC 300x-5(b)).
- b. A state shall expend not less than 10 percent of grant funds for carrying out evidence-based programs that address the needs of individuals with early serious mental illness, including psychotic disorders, regardless of the age of the individual at onset. Evidence-based programs are interventions that are guided by the best research evidence with practice-based expertise, cultural competence, and the values of the persons receiving the services, that promote individual-level or population-level outcomes. Different evidence-based programs are available at: <https://www.samhsa.gov/resource-search/ebp>. In lieu of expending 10 percent of the amount received for a fiscal year, a state may elect to expend not less than 20 percent of such amount by the end of the succeeding fiscal year (42 USC 300x-9c).
- c. A state shall expend 5 percent of grant funds for evidence-based crisis care programs addressing the needs of individuals with serious mental illnesses (SMI) and children with serious mental and emotional disturbances (SED). SAMHSA guidance related to the 5 percent set-aside is available at: <https://www.samhsa.gov/sites/default/files/mhbg-crisis-set-aside-guidance.pdf> Definitions for SMI and SED can be found at: <https://www.samhsa.gov/sites/default/files/federal-register-notice-58-96-definitions.pdf> A state’s expenditures must be for core crisis care elements, such as: centrally deployed 24/7 mobile crisis units, short-term residential crisis stabilization beds, evidence-based protocols for delivering services to individuals with suicide risk, and regional or statewide crisis call centers coordinating in real time (P.L. 116-260 and MHBG document entitled, *Guidance for the Revision of the FY 2020-2021 for the Mental Health Block Grant Application for the New Crisis Services 5% Set-Aside*).

H. Period of Performance

Any amounts paid to the state for a fiscal year shall be available for obligation and expenditure until the end of the fiscal year following the fiscal year for which the amounts were paid (42 USC 300x-62).

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

M. Subrecipient Monitoring

The state must conduct monitoring activities in accordance with sections 75.351 through 75.353 of Subpart D of 45 CFR 75.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.959 BLOCK GRANTS FOR PREVENTION AND TREATMENT OF SUBSTANCE ABUSE

I. PROGRAM OBJECTIVES

The objective of the Substance Abuse Prevention and Treatment Block Grant (SABG) program is to provide funds to states, territories, and one Indian tribe for the purpose of planning, carrying out, and evaluating activities to prevent and treat Substance Abuse (SA) and other related activities as authorized by the statute.

The SABG is the primary tool the federal government uses to fund state SA prevention and treatment programs. While the SABG provides federal support to addiction prevention and treatment services nationally, it empowers the states to design solutions to specific addiction problems that are experienced locally.

II. PROGRAM PROCEDURES

The Substance Abuse and Mental Health Services Administration (SAMHSA), an operating division of the Department of Health and Human Services (HHS), administers the SABG program. For purposes of this guidance, the term “state” includes the 50 states, the District of Columbia, American Samoa, Guam, the Marshall Islands, the Federated states of Micronesia, the Commonwealth of the Northern Marianas, Palau, the Commonwealth of Puerto Rico, the US Virgin Islands, and the Red Lake Band of Chippewa Indians. The states generally subaward funds for the provision of services to public and nonprofit organizations. Service providers may include for-profit organizations, but for-profits may not receive financial assistance.

Examples of SABG activities are:

1. *Alcohol Treatment and Rehabilitation* – Direct services to patients experiencing primary problems for alcohol, such as community outreach, detoxification, outpatient counseling, residential rehabilitation, hospital based care (not inpatient hospital services), abuse monitoring, vocational counseling, case management, central intake, and program administration.
2. *Drug Treatment and Rehabilitation* – Direct services to patients experiencing primary problems with illicit drugs, such as outreach, detoxification, methadone maintenance and detoxification, outpatient counseling, residential rehabilitation, including therapeutic communities, hospital based care (not inpatient hospital services), vocational counseling, case management central intake, and program administration.
3. *Primary Prevention Activities* – Education, counseling, and other activities designed to reduce the risk of substance abuse.

The SABG funds are allocated to the states according to a formula legislated by Congress. States may then distribute these funds to cities, counties, or service providers within their jurisdictions

based on need. Of the SABG funds dispensed to each state annually, Congress has specified that the state will expend not less than 20 percent for programs for individuals who do not require treatment for substance abuse. The programs should (1) educate and counsel the individuals on such abuse; and (2) provide for activities to reduce the risk of such abuse by the individuals. SABG statutory “set asides” were established to fund programs targeting special populations, such as services for substance using pregnant women and women with dependent children, and, in certain “designated states,” for screening for human immunodeficiency virus (HIV).

The submit to SAMHSA for approval, an annual application which includes a state plan for SA prevention and treatment services objectives described above and signed assurances required by the Act and implementing regulations. The entire application, including the plan, must be reviewed by SAMHSA to ensure that all of the requirements of the law and regulations are met.

The state plan addresses how the state intends to comply with the various requirements of Title XIX, Part B, subparts II and III of the Public Health Service Act (42 USC 300x-21-66) and its program objectives and specific allocations by (1) conducting state and local demand and need assessments; (2) establishing statewide prevention and treatment improvement plans with specific multi-year goals for narrowing identified service gaps, implementing training efforts, and fostering coordination among SA treatment, primary health care, and human service agencies; and (3) addressing human resource requirements, clinical standards and identified treatment improvement goals, and ensuring coordination of all health and human services for addicted individuals.

Source of Governing Requirements

This program is authorized under Title XIX, Part B, subparts II and III of the Public Health Service Act (42 USC 300x-21-67). The implementing regulations are published at 45 CFR Part 96. Those regulations include general administrative requirements for the covered block grant programs in 45 CFR sections 96.46 through 96.120. Specific SABG requirements are included in 45 CFR sections 96.121 through 96.137. Section 75.202 and sections 75.351 through 75.353 of Subpart D, and Subpart F of 45 CFR 75 are applicable to the SABG. With the exceptions noted, 45 CFR 75.101(d) exempts SABG from the general administrative requirements of 45 CFR Part 75.

States are to administer their SABG programs according to the plan that they submitted to SAMHSA. States are to use the fiscal policies that apply to their own funds in administering the SABG. Procedures must be adequate to assure the proper disbursement of and accounting for federal funds paid to the grantee, including procedures for monitoring the assistance provided (45 CFR section 96.30).

Availability of Other Program Information

SAMHSA published a notice in the *Federal Register* on July 6, 2001 (66 FR 35658), that details approval requirements for nonrecurring expense exclusions from maintenance-of-effort calculations. A second SAMHSA *Federal Register* notice, published on November 23, 2001 (66 FR 58746-58747), addresses retroactive application of the nonrecurring expense exclusion.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	N	N	Y	Y	N

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. SABG funds may be expended to provide for a wide range of activities to prevent and treat substance abuse and may be expended to deal with the abuse of alcohol, the use or abuse of illicit drugs, the abuse of licit drugs, and the use or abuse of tobacco products as identified in the Overview section above (sections 1921 to 1954 of the PHS Act, 42 USC 300x-21–300x-35; 58 FR 17062 No. 60, March 1993).
- b. The state may use grant funds for loans from a revolving loan fund for provision of housing in which individuals recovering from alcohol and drug abuse may reside in groups. Individual loans may not exceed \$4,000 (45 CFR section 96.129).

2. *Activities Unallowed*

- a. The state shall not use grant funds to provide inpatient hospital services except when it is determined by a physician that (a) the primary diagnosis of the individual is SA and the physician certifies this fact; (b) the individual cannot be safely treated in a community-based non-hospital, residential treatment program; (c) the service can reasonably be expected to improve an individual's condition or level of functioning; and (d) the hospital based SA program follows national standards of SA professional practice. Additionally, the daily rate of payment provided to the hospital for providing the services to the individual cannot exceed the comparable daily rate provided for community based non-hospital residential programs of treatment for SA and the grant may be expended for such services only to the extent that it is medically necessary (i.e., only for those days that the patient cannot be safely treated in a residential community based program) (42 USC 300x-31(a) and (b); 45 CFR sections 96.135(a)(1) and (c)).
- b. Grant funds shall not be used to make cash payments to intended recipients of health services (42 USC 300x-31(a); 45 CFR section 96.135(a)(2)).
- c. Grant funds shall not be used to purchase or improve land, purchase, construct, or permanently improve (other than minor remodeling) any building or any other facility or purchase major medical equipment. The secretary may provide a waiver of the restriction for the construction of a new facility or rehabilitation of an existing facility, but not for land acquisition (42 USC 300x-31(a); 45 CFR sections 96.135(a)(3) and (d)).
- d. The state shall not use grant funds to satisfy any requirement for the expenditure of nonfederal funds as a condition for the receipt of federal funding (42 USC 300x-31(a); 45 CFR section 96.135(a)(4)).
- e. Grant funds may not be used to provide financial assistance (i.e., a subgrant) to any entity other than a public or nonprofit entity. A state is not precluded from entering into a procurement contract for services since payments under such a contract are not financial assistance to the contractor (42 USC 300x-31(a); 45 CFR section 96.135 (a)(5)).
- f. The state shall not expend grant funds to purchase sterile needles or syringes for the hypodermic injection of any illegal drug, provided that such limitation does not apply to the use of funds for elements of a program other than making such purchases if the relevant state or local health department, in consultation with the Centers for Disease Control and Prevention, determines that the state or local jurisdiction, as applicable, is experiencing, or is at risk for, a significant increase in hepatitis infections or an HIV outbreak due to injection drug use, and such program is operating in accordance with state and local law (42 USC

300ee-5; 45 CFR section 96.135 (a)(6); and Pub. L. No. 114-113, Division H, Title V, Section 520).

- g. Grant funds may not be used to enforce state laws regarding sale of tobacco products to individuals under the age of 18, except that grant funds may be expended from the primary prevention set-aside of SABG under 45 CFR section 96.124(b)(1) for carrying out the administrative aspects of the requirements such as the development of the sample design and the conducting of the inspections (45 CFR section 96.130 (j)).
- h. No funds provided directly from SAMHSA or the relevant state or local government to organizations participating in applicable programs may be expended for inherently religious activities, such as worship, religious instruction, or proselytization (42 USC 300x-65 and 42 USC 290kk; 42 CFR section 54.4).

B. Allowable Costs/Cost Principles

As specified in Appendix I to this Supplement, “Federal Programs Excluded from the A-102 Common Rule and Portions of 2 CFR Part 200,” SABG is exempt from the provisions of the OMB cost principles. State cost principles requirements apply to SABG.

C. Cash Management

SAMHSA will make payments at such times and in such amounts to each state from its awards in advance or by way of reimbursement in accordance with section 203 of the Intergovernmental Cooperation Act (42 USC 4213) and Treasury Circular No. 1075 (31 CFR Part 205) (45 CFR section 96.12).

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

- a. The state shall for each fiscal year maintain aggregate state expenditures for authorized activities by the principal agency at a level that is not less than the average level of such expenditures maintained by the state for the two state fiscal years preceding the fiscal year for which the state is applying for the grant. The “principal agency” is defined as the single state agency responsible for planning, carrying out, and evaluating activities to prevent and treat SA and related activities. The secretary may exclude from the aggregate state expenditures funds appropriated to the principal

agency for authorized activities which are of a non-recurring nature and for a specific purpose (42 USC 300x-30; 45 CFR sections 96.121 and 96.134; and *Federal Register*, July 6, 2001 (66 FR 35658), and November 23, 2001 (66 FR 58746-58747), as specified in II, “Program Procedures – Availability of Other Program Information”).

- b. The state must maintain expenditures at not less than the calculated fiscal year 1994 base amount for SA treatment services for pregnant women and women with dependent children. The fiscal year 1994 base amount was reported in the state’s fiscal year 1995 application (42 USC 300x-27; 45 CFR section 96.124(c)).
- c. Section 8002(c)(3) of the 21st Century Cures Act (Pub. L. No. 114-255 repealed section 1924(d) of Title XIX, Part B, Subpart II of the Public Health Service Act (42 USC 300x-24(d)). State and jurisdictions are no longer required to demonstrate compliance with the maintenance of effort requirement regarding tuberculosis and human immunodeficiency virus.

2.2 Level of Effort – *Supplement Not Supplant*

- a. The Block Grant will not be used to supplant state funding of alcohol and other drug prevention and treatment programs (45 CFR section 96.123(a)(10)).

3. Earmarking

- a. The state shall expend not less than 20 percent of SABG for primary prevention programs for individuals who do not require treatment of SA. The programs should educate and counsel the individuals on such abuse and provide for activities to reduce the risk of such abuse by the individuals (42 USC 300x-22; 45 CFR sections 96.124 (b)(1) and 96.125).
- b. Designated states (i.e., any state whose cases of Acquired Immunodeficiency Syndrome (AIDS) is 10 or more per 100,000 individuals (as indicated by the number of such cases reported to and confirmed by the Centers for Disease Control and Prevention for the most recent calendar year for which data are available)), shall expend not less than 2 percent and not more than 5 percent of the award amount to carry out one or more projects to make available to individuals early intervention services for HIV disease (EIS HIV) at the sites where the individuals are undergoing SA treatment. If the state carries out two or more projects, the state will carry out one such project in a rural area of the state unless the secretary waives the requirement (42 USC 300x-24; 45 CFR sections 96.128(a)(1), (b), and (d)). Note: The applicable percentage is based on the percent change in a current year allotment to the base year

allotment under the Alcohol, Drug Abuse and Mental Health Services (ADMS) Block Grant. Any “designated state” whose percentage change in allotment is greater than 5 percent is required to obligate and expend 5 percent of the SABG allotment for the applicable federal fiscal year (FFY) to establish one or more projects designed to provide EIS HIV at the site(s) at which individuals are receiving SA treatment.

In FFY 2011, SAMHSA amended the EIS HIV program policy to allow states that were previously considered a “designated state” during any of the three prior FFYs for which a state was applying for a grant and whose AIDS case rates dropped below the AIDS case rate threshold, to opt to continue to set aside 5 percent of the award amount for EIS HIV. Such states are authorized to obligate and expend 5 percent of SABG funds for EIS HIV in accordance with section 1924(b)(4) and 45 CFR section 96.128(a)(2).

- c. The state may not expend more than 5 percent of the grant to pay the costs of administering the grant (42 USC 300x-31; 45 CFR section 96.135(b)(1)).
- d. The state may not expend grant funds for providing treatment services in penal or correctional institutions in an amount more than that expended for such programs by the state for fiscal year 1991 (42 USC 300x-31; 45 CFR section 96.135(b)(2)).

H. Period of Performance

Any amounts awarded to the state for a fiscal year shall be available for obligation and expenditure until the end of the fiscal year following the fiscal year for which the amounts were awarded (42 USC 300x-62).

L. Reporting

1. Financial Reporting

- a. *SF- 270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

M. Subrecipient Monitoring

The state must conduct monitoring activities in accordance with sections 75.351 through 75.353 of Subpart D of 45 CFR 75.

IV. OTHER INFORMATION

As described in Part 4, Social Services Block Grant (SSBG) program (Assistance Listing 93.667), III.A, “Activities Allowed or Unallowed,” a state may transfer up to 10 percent of its annual allotment under SSBG to this and other specified block grant programs.

Amounts transferred into this program are subject to the requirements of this program when expended and should be included in the audit universe and total expenditures of this program when determining Type A programs. On the Schedule of Expenditures of Federal Awards, the amounts transferred in should be shown as expenditures of this program when such amounts are expended.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ASSISTANCE LISTING 93.994 MATERNAL AND CHILD HEALTH SERVICES BLOCK GRANT TO THE STATES

I. PROGRAM OBJECTIVES

The objective of the program of grants to states under the Maternal and Child Health (MCH) Block Grant program is to provide funds to the 50 states, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa, the Federated States of Micronesia, Palau, the Marshall Islands, and the Northern Marianas (States) for improvement of the health of all mothers and children consistent with applicable health status goals and national health objectives established under the Social Security Act.

Specifically, MCH Block Grants are intended to (1) provide and ensure mothers and children (especially those with low income or limited availability of services) access to quality maternal and child health services; (2) reduce infant mortality and the incidence of preventable diseases and disabling conditions among children; (3) reduce the need for inpatient and long-term care services; (4) increase the number of children appropriately immunized against disease and the number of low-income children receiving health assessments and follow-up diagnostic and treatment services; (5) promote the health of mothers and infants by providing prenatal, delivery, and postpartum care for low-income, at-risk pregnant women; (6) promote the health of children by providing preventive and primary care services for low-income children; (7) provide rehabilitation services for blind and disabled individuals under 16 years of age receiving benefits under Title XVI of the Social Security Act (Supplemental Security Income) to the extent medical assistance for such services is not provided under Title XIX (Medicaid); and (8) provide and promote family-centered, community-based, coordinated care for children with special health care needs and to facilitate the development of community-based systems of services for those children and their families.

II. PROGRAM PROCEDURES

The MCH Block Grant program was created by the Omnibus Budget Reconciliation Act (OBRA) of 1981. Under that legislation, a number of categorical grants programs were consolidated into the single MCH Block Grant program. These were maternal and child health services for children with special health care needs; supplemental security income for children with disabilities; lead-based paint poisoning prevention programs; genetic disease programs; sudden infant death syndrome programs; and adolescent pregnancy grants. Extensive amendments to the authorizing statute in 1989 increased state programmatic and fiscal accountability under the program. These include requirements for States to define health status measures and to develop measurable objectives for program efforts as well as to report progress on key maternal and child health indicators. The program is administered by the Division of State and Community Health, Maternal and Child Health Bureau (MCHB), Health Resources and Services Administration (HRSA), a component of the Department of Health and Human Services (HHS). MCH Block Grant funds are awarded to States in accordance with a pre-established formula after submission to and approval of their applications by HRSA. The application addresses how the state plans to implement prioritized tasks based on a statewide

needs assessment (required to be conducted every five years) for all mothers and children, including those with special health care needs. The state health agency is responsible for overall program administration according to its approved plan but services may be carried out by the recipient or by local nonprofit agencies that are funded in accordance with an allocation methodology determined by the recipient (and approved by HRSA).

Source of Governing Requirements

The MCH Block Grant program is authorized under the 1981 Omnibus Budget Reconciliation Act, as amended, and is codified at 42 USC 701 through 709. The implementing regulations for this and other HHS block grant programs are published at 45 CFR Part 96. Those regulations include both specific requirements and general administrative requirements for the covered block grant programs in lieu of 45 CFR Part 75 (the HHS implementation of 2 CFR Part 200).

Availability of Other Program Information

Further information about this program is available at <http://www.mchb.hrsa.gov/>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	Y	Y	N	N	Y	N	N

A. Activities Allowed or Unallowed1. *Activities Allowed*

- a. Funds may be used to provide health services and related activities, including planning, administration, education, and evaluation (42 USC 704(a)).
- b. Funds may be used to purchase technical assistance from public or private entities if required to develop, implement, or administer the MCH Block Grant (42 USC 704(c)).
- c. Funds may be used for salaries and other related expenses of National Health Service Corps personnel assigned to the state (42 USC 704(a)).
- d. Funds may be used to continue funding of special projects in the state funded under Title V of the Social Security Act prior to the enactment of the MCH Block Grant program on August 31, 1981 (42 USC 705(a)(5)(C)(i)).

2. *Activities Unallowed*

- a. Funds may not be used to purchase or improve land, to purchase, construct, or permanently improve buildings or facilities (other than minor remodeling), or to purchase major medical equipment unless a waiver has been granted by HRSA (42 USC 704(b)(3)).
- b. Funds may not be used to make cash payments to intended recipients of services (42 USC 704(b)(2)).
- c. Funds may not be provided for research or training to any entity other than a public or nonprofit private entity (42 USC 704(b)(5)).
- d. Funds may not be used for inpatient services, other than for children with special health care needs or high-risk pregnant women and infants or other inpatient services approved by the Associate Administrator for Maternal and Child Health (42 USC 704(b)(1)). Infants are defined as persons less than one year of age (42 USC 706(a)(2)(E)).
- e. Funds may not be used to make payments for any item or service (other than an emergency item or service) furnished by an individual or entity excluded under Titles V, XVIII (Medicare), XIX (Medicaid), or XX (Social Services Block Grant) of the Social Security Act (42 USC 704(b)(6)).
- f. MCH Block Grant funds may not be transferred to other block grant programs (42 USC 702(a)(3) and 705(a)(5)(B)).

B. Allowable Costs/Cost Principles

The MCH Block Grant program is exempt from the provisions of the OMB cost principles. State cost principles requirements apply to the MCH Block Grant program.

G. Matching, Level of Effort, Earmarking**1. Matching**

For every four dollars of federal funds expended, States must match three dollars of nonfederal funds (42 USC 703(a)).

2. Level of Effort**2.1. Level of Effort – *Maintenance of Effort***

The state must maintain the level of funds provided solely by the state for maternal and child health programs at a level at least equal to the level provided in FY 1989 (42 USC 705(a)(4)).

2.2. Level of Effort – *Supplement Not Supplant*

Not Applicable

3. Earmarking

- a. Unless a lesser percentage is established in the state's notice of award for a given fiscal year, the state must use at least 30 percent of payment amounts for preventive and primary care services for children (42 USC 705(a)(3)(A)).
- b. Unless a lesser percentage is established in the state's notice of award for a given fiscal year, the state must use at least 30 percent of payment amounts for services for children with special health care needs (42 USC 705(a)(3)(B)).
- c. A state may not use more than 10 percent of allotted funds for administrative expenses (42 USC 704(d)).

H. Period of Performance

Funds available to States from their allotment for any fiscal year are available for obligation by the state in that fiscal year or in the succeeding fiscal year. No payment may be made to a state from allotments for a fiscal year for expenditures made after the end of the following fiscal year (42 USC 703(b)).

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Maternal and Child Health Services Block Grant Application/Annual Report (OMB No. 0915-0172) – The state must submit an annual report by July 15 of each year (at the time it submits the annual application). The reporting forms and instructions are contained in a document entitled “Guidance and Forms for the Title V Application/Annual Report.” Reports are prepared electronically

Key Line Items – The following line items contain critical information:

1. *Form 2* – MCH Budget/Expenditure Details
 - 4:3 Match: For both the budget for the application year and the expenditure for the reporting year on Form 2, the 4:3 match is in place (comparing Line 1, Federal Allocation, with Line 7, Total State Match). If the match is not met for expenditures, a note is provided explaining the discrepancy.
 - 30% Preventative and Primary Services: For both the budget for the application year and the expenditure for the reporting year on Form 2, 30% of federal funding is allocated to preventative and primary services for children (Line 1A). If the percentage is not met for expenditures, a note is provided explaining the discrepancy.
 - 30% Children with Special Care Need: For both the budget for the application year and the expenditure for the reporting year on Form 2, 30% of federal funding is allocated to children with special health care needs (Line 1B). If the percentage is not met for expenditures, a note is provided explaining the discrepancy.
 - 10% Title V Admin Costs: For both the budget for the application year and the expenditure for the reporting year on Form 2, no more than 10% of federal funding is allocated to Title V administrative costs

(Line 1C). If the percentage is exceeded for expenditures, a note is provided explaining the discrepancy.

- **State Match =/+ State MOE:** For both the budget for the application year and expenditure for the reporting year on Form 2, the Total State Match (Line 7) is equal to or more than the State FY 1989 Maintenance of Effort Amount (Line 7A). If the amount is not met for expenditures, a note is provided explaining the discrepancy.
- **Form 4 – Number and Percentage of Newborns and Others Screened, Cases Confirmed and Treated**
- **Newborn Screening:** For the annual report year on Form 4, the number of newborns screened is broken out by the aggregate total number of newborns receiving at least one valid screen, the aggregate total number of out-of-range results, the aggregate total number of confirmed cases, and the aggregate total number of referred for treatment.

5. **Form 5a – Count of Individuals Served By Title V**

- **Individuals Served by Title V for Direct and Enabling Service:** For the annual report year on Form 5a, the count of individuals served by Title V are broken out by the types of individuals served (Pregnant Women, Infants, Children, Children with Special Health Care Needs, and All Others) and by Primary Source of Coverage.

6. **Form 5b – Total Percentage of Populations Served by Title V**

- **Populations served by Title V by Levels of Service:** For the annual report year on Form 5b, the count of individuals served by Title V are broken out by the types of individuals served by percentage (Pregnant Women, Infants, Children, Children with Special Health Care Needs, and All Others).

7. **Form 6 – Deliveries and Infants Served by Title V and Entitled to Benefits under Title XIX**

- **Deliveries and Infants Served by Title V and Entitled to Benefits under Title XIX:** For the annual report year on Form 6, the total number of deliveries and infants served by Title V and eligible for Title XIX are broken out by race and ethnicity.

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

Federal funds from other block grant programs (e.g., Social Services Block Grant (Assistance Listing 93.667) and Preventive Health and Health Services Block Grant (Assistance Listing 93.991)) may be transferred into the MCH Block Grant program. MCH Block Grant funds, however, may not be transferred to other block grant programs (42 USC 702(a)(3) and 705(a)(5)(B)). Funds transferred into the MCH Block Grant are subject to the requirements of this program when expended and should be included in the audit universe and total expenditures of this program when determining Type A programs. On the Schedule of Expenditures of Federal Awards, the amounts transferred in should be shown as expenditures of this program when such amounts are expended.

AMERICORPS
(Corporation for National and Community Service)

ASSISTANCE LISTING 94.006 AMERICORPS STATE AND NATIONAL

I. PROGRAM OBJECTIVES

The AmeriCorps State and National service program provides funds to national and locally based organizations to carry out national service programs described in 42 USC 12572(a) and (b).

II. PROGRAM PROCEDURES

Of the funds available for AmeriCorps State and National programs, AmeriCorps (the operating name of the Corporation for National and Community Service (CNCS)) allots 35.3 percent to State Service Commissions, 1 percent for Indian tribes, and 1 percent for the US territories. After setting aside the aforementioned funds, the remaining funds are distributed competitively by AmeriCorps—either to State Commissions for their subgrantees or directly to eligible nonfederal entities that will operate in two or more states. The State Commissions do not directly operate programs. State Commissions subgrant funds to organizations to operate community service programs within their states.

In addition to grants to fund AmeriCorps State and National programs, State Commissions also receive grants from AmeriCorps to support their administrative and training and technical assistance operations. These grants are made under programs titled State Commission Support Grants (Assistance Listing 94.003) and Commission Investment Fund Grants (Assistance Listing 94.008), which are not included in Part 4 of the Supplement.

AmeriCorps State and National grant recipients operate programs that recruit and train individuals as AmeriCorps members. Full-time AmeriCorps members receive a living allowance and are eligible for health insurance (if they are not otherwise covered while participating in the program), and childcare benefits (if they meet specific income thresholds). After the grant recipient operating a program certifies that an AmeriCorps member has satisfactorily and successfully completed the required term of service, the AmeriCorps members are eligible for the Segal AmeriCorps Education Award, which is held in the National Service Trust, and which may be used to repay qualified student loans or, qualified education costs. As directed under 42 USC 12606, AmeriCorps records the federal liability for an AmeriCorps member's education benefit at the time AmeriCorps awards a grant to an entity, based on a present value discount formula. Upon application from the AmeriCorps member and verification from the lender or educational institution, AmeriCorps' National Service Trust transmits the funds to the lender or institution. AmeriCorps members who successfully complete a term of service may also be eligible to have the National Service Trust pay qualified student loan interest that accrued during the period of their AmeriCorps member service.

Source of Governing Requirements

The AmeriCorps State and National program is authorized under the National and Community Service Act of 1990 (42 USC 12501 et seq.), as amended, and the implementing regulations in 45 CFR parts 2510, 2520–2554, and 2555.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	Y	N	Y	N	N	N	N	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

Funding is provided to carry out a community service program. Activities allowed include recruiting, training, and supervising AmeriCorps members, paying living allowances to AmeriCorps members, paying health insurance premiums and child-care benefits for eligible AmeriCorps members, paying certain employment-related taxes, paying staff and other costs for program management, evaluations, and reimbursement of grantee administrative costs (42 USC 12572, 12574, 12581, 12581a, 12583, and 12594; 45 CFR sections 2520 to 2524; 2540; and 2550).

2. *Activities Unallowed*

AmeriCorps grant funds may **not** be used for any of the following:

- a. Attempting to influence legislation;
- b. Organizing or engaging in protests, petitions, boycotts, or strikes;
- c. Assisting, promoting, or deterring union organizing;
- d. Impairing existing contracts for services or collective bargaining agreements;
- e. Engaging in partisan political activities or other activities designed to influence the outcome of an election to any public office;
- f. Participating in, or endorsing, events or activities that are likely to include advocacy for or against political parties, political platforms, political candidates, proposed legislation, or elected officials;
- g. Engaging in religious instruction, conducting worship services, providing instruction as part of a program that includes mandatory religious instruction or worship, constructing or operating facilities devoted to religious instruction or worship, maintaining facilities primarily or inherently devoted to religious instruction or worship, or engaging in any form of religious proselytization;
- h. Providing a direct benefit to—
 - (1) A business organized for profit;
 - (2) A labor union;
 - (3) A partisan political organization;
 - (4) A nonprofit organization that fails to comply with the restrictions contained in section 501(c)(3) of the [Internal Revenue Code of 1986](#) except that nothing in this section shall be construed to prevent participants from engaging in advocacy activities undertaken at their own initiative;
 - (5) An organization engaged in the religious activities described in paragraph (g) of this section, unless Corporation assistance is not used to support those religious activities; and

- i. Conducting a voter registration drive or using Corporation funds to conduct a voter registration drive;
- j. Providing abortion services or referrals for receipt of such services; and
- k. Such other activities as the Corporation may prohibit (45 CFR section 2520.65).

B. Allowable Costs/Cost Principles

Administrative Costs, generally: No more than 5 percent of assistance provided by AmeriCorps can be used for the combined administrative expenses of the grantee and its subgrantees (42 USC 12571(d); 45 CFR sections 2521.30(h) and 2540.110. Limitations on administrative costs do not apply to fixed-amount grants and Education Award Only program grants (42 USC 12581(l)(4) and 12581a(c)).

Allowable Direct and Indirect Costs: AmeriCorps grantees must comply with the cost principles in 2 CFR Part 200, including cost allocation requirements in 2 CFR 200.405, in determining costs that may be funded with AmeriCorps grant funds. AmeriCorps grantees for whom AmeriCorps is the cognizant agency for indirect costs can establish an indirect cost rate; additional instructions to grantees can be found in annual “AmeriCorps State and National Grants Terms and Conditions” at <https://americorps.gov/grantees-sponsors>.

E. Eligibility

1. Eligibility for Individuals

a. National Service Member Enrollment

The following form is submitted electronically to AmeriCorps for each AmeriCorps member and is used by AmeriCorps to support the member’s eligibility for a post-service education benefit. A roster of members enrolled/completed during the period should be obtained from AmeriCorps to ensure that the universe of forms submitted, as provided by the entity, is complete and matches the roster provided by AmeriCorps. Rosters may be obtained by contacting the National Service Trust at Trustcomm@cns.gov.

National Service Enrollment Form (OMB No. 3045-0006) – This form is used by AmeriCorps to enroll participants in the National Service Trust. Enrollment is the process through which a grantee notifies AmeriCorps that it has selected an individual to serve as an AmeriCorps member who may be eligible to receive a post-service education benefit upon successful completion of the individual’s term of service.

The following line item contains critical information:

- (1) *Part I* – AmeriCorps member enrollment information that may be helpful to ensure compliance is verification of the first name, last name, middle initial, and date of birth (which are all contained in Part I).

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

All requirements are passed through to subrecipients.

G. Matching, Level of Effort, Earmarking

1. Matching

- a. Statute superseded by Section (c), below.
- b. Unless AmeriCorps grants a waiver, the grant recipient's required share of program costs under a cost-reimbursement grant, including member support and operating costs, will incrementally increase to a 50 percent overall share by the tenth year and any year thereafter that it receives a grant without a break in funding of five years or more (45 CFR sections 2521.60 and 2521.80). The timetable is included in 45 CFR section 2521.60(a), although annual appropriations legislation, as specified in Section (c), below, has modified the overall match requirement for the first three years. Other requirements that govern matching are included in 45 CFR sections 2521.35, 2521.40, 2521.45, and 2521.50.
- c. Pursuant to annual appropriations legislation, grant recipients are required to meet an overall minimum share requirement of 24 percent for the first three years that they receive AmeriCorps funding. Grantees in their fourth or subsequent years of funding will be required to meet the overall minimum share requirements specified in 45 CFR section 2521.60. Grantees may apply for and receive a waiver of the overall matching requirements under 45 CFR section 2521.70 (Pub. L. No. 115-245, Division B, Title IV, Section 402, Sept. 28, 2018).
- d. Matching requirements do not apply to fixed-amount grants and Education Award Only program grants (42 USC 12581(l)(4) and 12581a(c)).
- e. AmeriCorps has, under a limited scope, waived certain matching cost requirements on some grants due to challenges associated with COVID-19. This waiver applies to certain grants awarded in fiscal years 2019,

2020, and 2021 (more information can be found on the AmeriCorps website at this link: <https://americorps.gov/coronavirus/american-corps-state-national-questions>).

2. Level of Effort

2.1 Level of Effort – *Maintenance of Effort*

Not Applicable

2.2 Level of Effort – *Supplement Not Supplant*

Funds provided by AmeriCorps must be used to supplement the level of state and local public funds expended for services of the type being assisted in the previous fiscal year. This requirement is satisfied if the aggregate expenditure for a particular program for the fiscal year in which services are to be provided will not be less than the aggregate expenditure for the program in the previous fiscal year, excluding the amount of federal assistance provided and any other amounts used to pay the remainder of the costs of AmeriCorps state and national programs (42 USC 12633).

3. Earmarking

Not Applicable

N. Special Tests and Provisions

1. Living Allowances

Compliance Requirements

- a. Living allowances are paid on the basis of an AmeriCorps member's selection and enrollment as a full-time participant in a program. The living allowance that an AmeriCorps member receives is not a wage or a salary and must not be treated as such. The installment payments of living allowances are not dependent upon the actual number of hours spent on service and, unless waived, should be distributed in equal payments across the term of service. Most full-time AmeriCorps members are to receive a living allowance during the installment period of at least 100 percent, but not more than 200 percent, of the total average annual subsistence allowance provided to Volunteers in Service to America (VISTA) volunteers, another type of AmeriCorps program. For particular program years, the limits on the living allowances for full-time service members are as follows (42 USC 4955 and 12594; 45 CFR section 2522.240):

NOFO Year	Minimum Allowance	Maximum Allowance
2016	\$12,530	\$25,060
2017	\$12,630	\$24,930
2018	\$13,732	\$27,464
2019	\$13,992	\$27,984
2020	\$14,279	\$28,558
2021	\$16,000	\$32,000
2022	\$16,502	\$33,004

- b. The minimum and maximum living allowance amounts are listed on the AmeriCorps website. The living allowance amounts can be found in the individual Notice of Funding Opportunity or Availability for the specific grant competition. Previous Notices of Funding Availability/Opportunity for AmeriCorps State and National grant competitions dating back to 2006 are located at this link: <https://americorps.gov/partner/funding-opportunities>. If additional assistance is required, please contact the Office of Audit and Debt Resolution at AmeriCorps Headquarters at AuditResolution@cns.gov.
- c. Professional Corps programs allow individuals who are professionals to serve as AmeriCorps members. The compensation from their service site location may exceed the maximum living allowance amount but may not be lower than the minimum. Grant recipients operating a Professional Corps program may not use AmeriCorps funds to pay Professional Corps members' compensation (42 USC 12594(c); 45 CFR section 2522.240).
- d. A living allowance is not required for individuals serving in positions where the service commitment is less than 1700 hours. However, if a living allowance is provided, it must not exceed the maximum living allowance amount published in the Notice of Funding Opportunity for the position. AmeriCorps establishes pro-rated maximum living allowance amounts for each less-than-1700-hour position (42 USC 12593 and 12594; 45 CFR sections 2522.220 and 2522.240).
- e. Education Award only programs are not required to provide a living allowance, but if a living allowance is provided, it must comply with the maximum requirements set forth above (42 USC 12581a(c)).

Audit Objectives Ensure Full time AmeriCorps members are being paid living allowance amounts that fall within minimum and maximum living allowance amounts for the appropriate year as well as in accordance with amounts listed in member agreements.

Suggested Audit Procedures Auditors may request documentation supporting total living allowance amounts that full time members are eligible for and comparing them to the minimum and maximum amounts, as well as member agreements which list living allowance amounts and payroll records to determine amounts members are paid.

2. National Service Criminal History Checks

Compliance Requirements

For National Service Criminal History Checks Conducted on Persons Beginning Work or Service On or After May 1, 2021:

All three checks below must be conducted, reviewed, and an eligibility determination made by the grant recipient or subrecipient before a person begins to work or serve on an NSCHC-required grant.

- National Sex Offender Public Website nationwide check
- state of residence and state of service criminal history check(s)
- FBI fingerprint-based check

Review individual NSCHC grant records to determine compliance with the regulations (electronic and/or paper copies are acceptable).

Required documentation includes:

- Evidence that all required components (NSOPW, state(s), and FBI checks) were completed and on file ([34T45 CFR §2540.206](#)).
 - All required components (NSOPW, state(s), and FBI) were conducted on time ([34T45 CFR §2540.205](#)) and documentation reflects evidence of when checks were reviewed (adjudicated) and considered when making an eligibility determination.
- All required components (NSOPW, state(s), and FBI checks) were conducted through sources authorized by AmeriCorps ([34T45 CFR §2540.204](#)) and are consistent with the sources described in the grant recipient's adopted NSCHC policies and procedures.
- Evidence that NSOPW results include searches from all states, territories, and Indian tribes ([34T45 CFR §2540.204](#)).
- Evidence that First and Last Names used on name-based checks reflect the current name of the individual.
 - Documents used to determine an individual's first and last name must be consistent with sources described in the grant recipient's adopted NSCHC policies and procedures ([34TRefer to agency NSCHC manual for guidance on name-based checks](#)).

- Documentation of consent from the candidate to conduct state and FBI checks ([45 CFR §2540.206](#)) and of notice provided to the candidate that selection into the program is contingent upon the organization’s review of the individual’s NSCHC component results, if any ([45 CFR §2540.206](#)).
- Documentation that the candidate is eligible to serve/work if a vendor returns a “do not recommend” result for the candidate ([45 FR §2540.206](#)).
 - Note: A vendor’s adjudication recommendation not to “recommend” the candidate indicates that the selecting organization needs more information before it can make a final determination as to the fitness of the individual to work or serve. It does not mean that an individual is ineligible for work or service.
 - Grant recipients must maintain adequate documentation of the process implemented to make an eligibility determination and may include a contemporaneously dated memo to the file documenting determination of the individual’s eligibility.

For National Service Criminal History Checks Conducted on Persons Working or Serving in Positions Prior to May 1, 2021, Who Continued Working or Serving in a Position on or After November 1, 2021:

Prior to May 1, 2021, some individuals only required a two-part check consisting of:

- (1) A nationwide name-based search of the National Sex Offender Public Website (NSOPW); and
- (2) Either:
 - (a) A name- or fingerprint-based search of the statewide criminal history registry in the person’s state of residence and in the state where the person will serve/work; or
 - (b) A fingerprint-based FBI criminal history check.

Grant recipients were given until November 1, 2021 to ensure NSCHC records for individuals falling under this category are compliant with the three-part check. Individuals requiring an additional check under the NSCHC Rule, effective May 1, 2021, will have been cleared to work or serve under the grant with only two of the three checks. This is permissible. Individuals that fall into this timeframe are required to have all three National Service Criminal History Checks conducted, reviewed, and an eligibility determination made by the grant recipient or subrecipient by November 1, 2021.

Review individual NSCHC grant records to determine compliance with the regulations (electronic and/or paper copies are acceptable). Refer to section 2.a. for a list of documentation requirements.

For the purposes of this compliance element, auditors may elect not to test NSCHC records for individuals who began work or service **prior to May 1, 2021 and exited from work or service prior to November 1, 2021**, since the former NSCHC regulations apply to those individuals.

Waivers and Pre-Approved Waivers

AmeriCorps may waive provisions of NSCHC for good cause, or for any other lawful basis. Certain Pre-Approved Waivers exist that any grantee may use without additional written approval from AmeriCorps. Refer to the NSCHC Manual found on <https://americorps.gov/grantees-sponsors/history-check>. In addition, individual, grant-level waivers may be approved for grantees on a case-by-case basis. Grantees with waivers receive written approval from AmeriCorps that document the waived provisions of the NSCHC regulations and should be made available to auditors during testing.

Eligibility Criteria: An individual in a covered position is ineligible to serve or work if the individual:

- is registered or required to be registered on a sex offender registry;
- has been convicted of murder, as defined by 18 USC 1111;
- refuses to consent to a criminal registry check; or
- makes a false statement in connection with a grantee's inquiry concerning the individual's criminal history.

Reference: 45 CFR 2540.202; 72 FR 48574, August 24, 2007; 77 FR 60922, October 5, 2012.

Definitions

(1) Covered Positions (45 CFR section 2540.201)

Individuals in covered positions are AmeriCorps members or AmeriCorps grant-funded staff who receive a grant-funded salary, stipend, living allowance, education award, or other remuneration whether funded with AmeriCorps-provided funds or used to meet the grant matching requirement.

(2) **Designated Sources**

- (a) National Sex Offender Public Website (NSOPW) (45 CFR section 2540.204)

NSOPW checks must be sourced from either www.NSOPW.gov or AmeriCorps approved vendor, Truescreen, with an AmeriCorps-affiliated Truescreen account.

- (b) State (45 CFR section 2540.204)

Grantees must use either the AmeriCorps-approved state repository to conduct state checks or AmeriCorps approved vendor, Truescreen, with an AmeriCorps-affiliated Truescreen account in accordance with the Pre-Approved Alternative Search Procedure for Truescreen. The list of AmeriCorps-approved state repositories can be found in the Using NSOPW and State Repositories Manual, available at <https://americorps.gov/grantees-sponsors/history-check>.

- (c) FBI (45 CFR section 2540.2034)

Grantees must use either the AmeriCorps-approved state repository to conduct FBI checks or AmeriCorps approved vendor, Fieldprint, with a AmeriCorps-affiliated Fieldprint account. The list of AmeriCorps-approved state repositories can be found in the Using NSOPW and State Repositories Manual, available at <https://americorps.gov/grantees-sponsors/history-check>

Audit Objectives To ensure that required National Service Criminal History Checks are completed in accordance with AmeriCorps regulations (i.e., completing the required checks and making an eligibility determination within the required timelines and documenting them correctly).

Suggested Audit Procedures Auditors may request documentation of a grant recipient's or subrecipient's written processes and practices for conducting National Service Criminal History Checks (NSCHC) as well as documentation of a selected testing sample of individual NSCHC grant records for staff and members working or serving under the grant to determine completion of all required checks and evidence that an eligibility determination has been made by the grant recipient or subrecipient prior to the person beginning work or service on an NSCHC-required grant. For more information on which grant types and individuals fall under the NSCHC requirement, please reference "NSCHC Manual" under the NSCHC Guidance section, Appendix B: "Who is Required to Conduct NSCHC?" graphic (<https://americorps.gov/grantees-sponsors/history-check>).

AMERICORPS
(Corporation for National and Community Service)

ASSISTANCE LISTING 94.011 FOSTER GRANDPARENT PROGRAM

ASSISTANCE LISTING 94.016 SENIOR COMPANION PROGRAM

I. PROGRAM OBJECTIVES

Foster Grandparent Program grants are awarded to allow adults, ages 55 and older, to serve as mentors, tutors, and supportive adults to children and youth with special or exceptional needs or circumstances identified as limiting their academic, social, or emotional development. Foster Grandparents serve in community organizations such as schools, Head Start programs, and youth centers.

Senior Companion Program grants are awarded to allow adults, ages 55 and older, to provide assistance and friendship to older persons with special needs who are homebound and usually living alone. By taking care of simple chores, providing transportation to medical appointments, and offering social contact to the outside world, Senior Companions often fulfill essential human needs of vulnerable older persons. Senior Companions may also assume the duties of informal caretakers for short periods of time to give the caretakers a respite from their duties.

II. PROGRAM PROCEDURES

AmeriCorps (the operating name of the Corporation for National and Community Service (CNCS)) awards Foster Grandparent Program grants and Senior Companion Program grants only to state and local public agencies, private nonprofit organizations, and Indian tribes that have the capability to administer such grants. These grantees (also referred to as sponsors) are legally responsible for all programmatic and fiscal aspects of the project and may not delegate or contract these responsibilities to another entity. Also, the grantees have no subgrantees (subrecipients) (42 USC sections 5011(a) and 5013(a); 45 CFR sections 2551.22 and 2552.22).

In both programs, participants ages 55 and older serve from five to 40 hours per week and, if they meet income eligibility requirements, receive small non-taxable cash stipends and other direct benefits to help offset the costs of serving. In addition, participants who do not meet the income eligibility requirements may serve as non-stipended Foster Grandparents or Senior Companions. Those participants are eligible to receive the same training, supervision, and other support services and cost reimbursements (other than the stipend) available to participants who receive stipends (42 USC 5011(a) and (d) and 5013(a) and (b); 45 CFR Part 2551, Subpart J and 45 CFR Part 2552, Subpart J).

Prospective sponsors submit applications to AmeriCorps for Foster Grandparent or Senior Companion grants, and AmeriCorps reviews them and makes final funding decisions (45 CFR sections 2551.91 and 2552.91).

Source of Governing Requirements

These programs are authorized under the Domestic Volunteer Service Act of 1973, Title II (42 USC 5000 et seq.) and their implementing regulations are found in 45 CFR parts 2551 and 2552.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

Y	Y	N	Y	N	Y	N	N	N	Y	N	Y

A. Activities Allowed or Unallowed

1. *Stipends*

Grant funds may be used for stipends for participants who meet income levels set by AmeriCorps (42 USC 5011(a) and (d) and 5013(a) and (b); 45 CFR sections 2551.43, 2551.44, 2552.43, and 2552.44).

2. *Direct and Administrative Costs*

Grant funds can also be used for other direct benefits for stipended Foster Grandparents and Senior Companions, such as transportation costs; physical examinations; accident, liability, and excess automobile insurance covering participants during their volunteer activities; meals; and costs for recognition of participants’ volunteer efforts. Grant funds are also available for budgeted

amounts of staff, office space, staff travel, and other administrative costs of the organization sponsoring the program (42 USC 5011(a) and (d) and 5013(a) and (b); 45 CFR sections 2551.46 and 2552.46).

3. *Non-stipended Foster Grandparents and Senior Companions*

No federal or required nonfederal funds can be used to pay any costs, including direct benefits or administrative costs, associated with non-stipended Foster Grandparents and Senior Companions (42 USC 5011(f)(4) and 5013(b); 45 CFR sections 2551.104 and 2552.104).

4. *Unallowed Activities*

Foster Grandparent and Senior Companion grant funds may not be used for the following purposes:

a. *Political activities*

- (1) No part of any grant shall be used to finance, directly or indirectly, any activity to influence the outcome of any election to public office, or any voter registration activity.
- (2) No project shall be conducted in a manner involving the use of funds, the provision of services, or the employment or assignment of personnel in a matter supporting or resulting in the identification of such project with:
 - (a) Any partisan or nonpartisan political activity associated with a candidate, or contending faction or group, in an election; or
 - (b) Any activity to provide voters or prospective voters with transportation to the polls or similar assistance in connection with any such election; or
 - (c) Any voter registration activity, except that voter registration applications and nonpartisan voter registration information may be made available to the public at the premises of the sponsor. But in making registration applications and nonpartisan voter registration information available, employees of the sponsor shall not express preferences or seek to influence decisions concerning any candidate, political party, election issue, or voting decision.
- (3) The sponsor shall not use grant funds in any activity for the purpose of influencing the passage or defeat of legislation or proposals by initiative petition, except:

- (a) In any case in which a legislative body, a committee of a legislative body, or a member of a legislative body requests any volunteer in, or employee of such a program to draft, review or testify regarding measures or to make representation to such legislative body, committee or member; or
 - (b) In connection with an authorization or appropriations measure directly affecting the operation of the Senior Companion or Foster Grandparent Program.
- b. *Non-displacement of employed workers.* A Senior Companion or Foster Grandparent shall not perform any service or duty or engage in any activity which would otherwise be performed by an employed worker or which would supplant the hiring of or result in the displacement of employed workers or impair existing contracts for service.
- c. *Compensation for service*
 - (1) An agency or organization to which National Senior Service Corps (NSSC) volunteers are assigned or which operates or supervises any NSSC program shall not request or receive any compensation from NSSC volunteers or from beneficiaries for services of NSSC volunteers.
 - (2) This section does not prohibit a sponsor from soliciting and accepting voluntary contributions from the community at large to meet its local support obligations under the grant or from entering into agreements with parties other than beneficiaries to support additional volunteers beyond those supported by AmeriCorps.
 - (3) A Senior Companion or Foster Grandparent volunteer station may contribute to the financial support of the Senior Companion or Foster Grandparent Program. However, this support shall not be a required precondition for a potential station to obtain Senior Companion or Foster Grandparent service.
 - (4) If a volunteer station agrees to provide funds to support additional Senior Companions/Foster Grandparents or pay for other Senior Companion/Foster Grandparent support costs, the agreement shall be stated in a written Memorandum of Understanding. The sponsor shall withdraw services if the station's inability to provide monetary or in-kind support to the project under the Memorandum of Understanding diminishes or jeopardizes the project's financial capabilities to fulfill its obligations.

- (5) Under no circumstances shall a Senior Companion or Foster Grandparent receive a fee for service from service recipients, their legal guardian, members of their family, or friends.
- d. *Labor and anti-labor activity.* The sponsor shall not use grant funds directly or indirectly to finance labor or anti-labor organization or related activity.
- e. *Fair labor standards.* A sponsor that employs laborers and mechanics for construction, alteration, or repair of facilities shall pay wages at prevailing rates as determined by the secretary of labor in accordance with the Davis-Bacon Act, as amended, 40 USC 276a.
- f. *Nondiscrimination.* A sponsor or sponsor employee shall not discriminate against a Senior Companion on the basis of race, color, national origin, sex, age, religion, or political affiliation, or on the basis of disability, if the Senior Companion or Foster Grandparent with a disability is qualified to serve.
- g. *Religious activities*
- (1) A Senior Companion/ Foster Grandparent or a member of the project staff funded by AmeriCorps shall not give religious instruction, conduct worship services, or engage in any form of proselytization as part of his/her duties.
- (2) A sponsor or volunteer station may retain its independence and may continue to carry out its mission, including the definition, development, practice, and expression of its religious beliefs, provided that it does not use AmeriCorps funds to support any inherently religious activities, such as worship, religious instruction, or proselytization, as part of the programs or services funded. If an organization conducts such activities, the activities must be offered separately, in time or location, from the programs or services funded under this part.
- h. *Nepotism.* Persons selected for project staff positions shall not be related by blood or marriage to other project staff, sponsor staff or officers, or members of the sponsor Board of Directors, unless there is written concurrence from the Advisory Council or community group established by the sponsor under subpart B of this part, and with notification to AmeriCorps.

(45 CFR section 2551.121 and 2552.121)

E. Eligibility**1. Eligibility for Individuals**

- a. To be eligible to be paid a stipend, Foster Grandparents and Senior Companions must be at least 55 years old; meet income guidelines; and be physically, mentally, and emotionally capable of serving on a person-to-person basis. Income eligibility is based on the applicant's total annual income (including the total annual income of the applicant's spouse), less allowable medical expenses. To be income-eligible, an applicant's income must fall at or below 200 percent of the poverty level as annually established by the Department of Health and Human Services for the state in which he or she resides.

The eligibility requirements related to having a specific determination of physical, mental and emotional capability do not apply to AmeriCorps Seniors' awards made on or after January 31, 2019.

The annual income eligibility levels for all areas are available at the AmeriCorps website (<https://americorps.gov/grantees-sponsors>) by accessing the link for "Foster Grandparent Program grantees" or "Senior Companion Program grantees." You may also contact the Office of Audit and Debt Resolution at AuditResolution@cns.gov. Stipends for Foster Grandparents and Senior Companions are currently \$3.00 per hour. This may be increased by AmeriCorps from time to time (42 USC 5011 and 5013; 45 CFR sections 2551.41 through 2551.44 and 2552.41 through 2552.44).

Foster Grandparents and Senior Companion programs may enroll persons who are at least 55 years old, but who do not meet the income guidelines as non-stipended Foster Grandparents or Senior Companions (45 CFR Part 2551, Subpart J and 45 CFR Part 2552, Subpart J).

For awards made on or after January 31, 2019, participants may serve from five to 40 hours per week.

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

Not Applicable

G. Matching, Level of Effort, Earmarking**1. Matching**

The nonfederal entity is required to contribute at least 10 percent of the total cost of a project from nonfederal sources or authorized federal sources, unless the Notice of Grant Award specifies a lower percentage (42 USC 5011(a) and 5013(a); 45 CFR sections 2551.92(a) and 2552.92(a)).

AmeriCorps has, under a limited scope, waived certain matching cost requirements on some grants due to challenges associated with COVID-19. This waiver applies to certain grants awarded in fiscal years 2019, 2020, and 2021. (More information can be found on the AmeriCorps website at this link: <https://americorps.gov/coronavirus/americorps-seniors-questions>.)

2. Level of Effort

Not Applicable

3. Earmarking

Not Applicable

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. National Service Criminal History Checks

Audit Objectives To ensure that required National Service Criminal History Checks are completed in accordance with AmeriCorps regulations (i.e., completing the required checks and making an eligibility determination within the required timelines and documenting them correctly).

Suggested Audit Procedures Auditors may request documentation of a grant recipient's written processes and practices for conducting National Service Criminal History Checks (NSCHC) as well as documentation of a selected testing sample of individual NSCHC grant records for staff and members working or serving under the grant to determine completion of all required checks and evidence that an eligibility determination has been made by the grant recipient prior to the person beginning work or service on an NSCHC-required grant. For more information on which grant types and individuals fall under the NSCHC requirement, please reference "NSCHC Manual" under NSCHC Guidance section, Appendix B: "Who is Required to Conduct NSCHC?" graphic (<https://americorps.gov/grantees-sponsors/history-check>).

a. *For National Service Criminal History Checks Conducted on Persons Beginning Work or Service On or After May 1, 2021:*

All three checks below must be conducted, reviewed, and an eligibility determination made by the grant recipient before a person begins to work or serve on an NSCHC-required grant.

- National Sex Offender Public Website nationwide check
- state of residence and state of service criminal history check(s)
- FBI fingerprint-based check

Review individual NSCHC grant records to determine compliance with the regulations (electronic and/or paper copies are acceptable).

Required documentation includes:

- Evidence that all required components (NSOPW, state(s), and FBI checks) were completed and on file ([34T45 CFR §2540.206](#)).
 - All required components (NSOPW, state(s), and FBI) were conducted on time ([34T45 CFR §2540.205](#)) and documentation reflects evidence of when checks were reviewed (adjudicated) and considered when making an eligibility determination.

- All required components (NSOPW, state(s), and FBI checks) were conducted through sources authorized by AmeriCorps ([34T45 CFR §2540.204](#)) and are consistent with the sources described in the grant recipient’s adopted NSCHC policies and procedures.
 - Evidence that NSOPW results include searches from all states, territories, and Indian tribes ([34T45 CFR §2540.204](#)).
 - Evidence that First and Last Names used on name-based checks reflect the current name of the individual.
 - Documents used to determine an individual’s first and last name must be consistent with sources described in the grant recipient’s adopted NSCHC policies and procedures ([34TRefer to agency NSCHC manual for guidance on name-based checks](#)).
 - Documentation of consent from the candidate to conduct state and FBI checks ([45 CFR §2540.206](#)) and of notice provided to the candidate that selection into the program is contingent upon the organization’s review of the individual’s NSCHC component results, if any ([45 CFR §2540.206](#)).
 - Documentation that the candidate is eligible to serve/work if a vendor returns a “do not recommend” result for the candidate ([45 CFR §2540.206](#)).
 - Note: A vendor’s adjudication recommendation not to “recommend” the candidate indicates that the selecting organization needs more information before it can make a final determination as to the fitness of the individual to work or serve. It does not mean that an individual is ineligible for work or service.
 - Grant recipients must maintain adequate documentation of the process implemented to make an eligibility determination and may include a contemporaneously dated memo to the file documenting determination of the individual’s eligibility.
- b. *For National Service Criminal History Checks Conducted on Persons Working or Serving in Positions Prior to May 1, 2021, Who Continued Working or Serving in a Position on or After November 1, 2021:*

Prior to May 1, 2021, some individuals only required a two-part check consisting of:

- (1) A nationwide name-based search of the National Sex Offender Public Website (NSOPW); and
- (2) Either:

- (a) A name- or fingerprint-based search of the statewide criminal history registry in the person's state of residence and in the state where the person will serve/work; or
- (b) A fingerprint-based FBI criminal history check.

Grant recipients were given until November 1, 2021 to ensure NSCHC records for individuals falling under this category are compliant with the three-part check. Individuals requiring an additional check under the NSCHC Rule, effective May 1, 2021, will have been cleared to work or serve under the grant with only two of the three checks. This is permissible. Individuals that fall into this timeframe are required to have all three National Service Criminal History Checks conducted, reviewed, and an eligibility determination made by the grant recipient by November 1, 2021.

Review individual NSCHC grant records to determine compliance with the regulations (electronic and/or paper copies are acceptable). Refer to section 2.a. for a list of documentation requirements.

- c. For the purposes of this compliance element, auditors may elect not to test NSCHC records for individuals who began work or service **prior to May 1, 2021 and exited from work or service prior to November 1, 2021**, since the former NSCHC regulations apply to those individuals.
- d. *Waivers and Pre-Approved Waivers*

AmeriCorps may waive provisions of NSCHC for good cause, or for any other lawful basis. Certain Pre-Approved Waivers exist that any grantee may use without additional written approval from AmeriCorps. Refer to the NSCHC Manual found on <https://americorps.gov/grantees-sponsors/history-check>. In addition, individual, grant-level waivers may be approved for grantees on a case-by-case basis. Grantees with waivers receive written approval from AmeriCorps that document the waived provisions of the NSCHC regulations and should be made available to auditors during testing.

- e. Eligibility Criteria: An individual in a covered position is ineligible to serve or work if the individual:
 - is registered or required to be registered on a sex offender registry;
 - has been convicted of murder, as defined by 18 USC 1111;
 - refuses to consent to a criminal registry check; or
 - makes a false statement in connection with a grantee's inquiry concerning the individual's criminal history.

Reference: 45 CFR 2540.202; 72 FR 48574, August 24, 2007; 77 FR 60922, October 5, 2012.

Definitions:

(1) Covered Positions (45 CFR section 2540.201)

Individuals in covered positions are Foster Grandparents who receive a stipend, Senior Companions who receive a stipend, or AmeriCorps grant-funded staff who receive a grant-funded salary, whether funded with AmeriCorps-provided funds or used to meet the grant matching requirement.

(2) Designated Sources

(a) National Sex Offender Public Website (NSOPW) (45 CFR section 2540.204)

NSOPW checks must be sourced from either www.NSOPW.gov or AmeriCorps approved vendor, Truescreen, with an AmeriCorps-affiliated Truescreen account.

(b) State (45 CFR section 2540.204)

Grantees must use either the AmeriCorps-approved state repository to conduct state checks or AmeriCorps approved vendor, Truescreen, with an AmeriCorps-affiliated Truescreen account in accordance with the Pre-Approved Alternative Search Procedure for Truescreen. The list of AmeriCorps-approved state repositories can be found in the Using NSOPW and State Repositories Manual, available at <https://americorps.gov/grantees-sponsors/history-check>.

(c) FBI (45 CFR section 2540.2034)

Grantees must use either the AmeriCorps-approved state repository to conduct FBI checks or AmeriCorps approved vendor, Fieldprint, with an AmeriCorps-affiliated Fieldprint account. The list of AmeriCorps-approved state repositories can be found in the Using NSOPW and State Repositories Manual, available at <https://americorps.gov/grantees-sponsors/history-check>.

SOCIAL SECURITY ADMINISTRATION

ASSISTANCE LISTING 96.001 SOCIAL SECURITY – DISABILITY INSURANCE

ASSISTANCE LISTING 96.006 SUPPLEMENTAL SECURITY INCOME

I. PROGRAM OBJECTIVES

Note: This program is considered a “higher risk” program for 2023, pursuant to 2 CFR section 200.519(c)(2). Refer to the “Programs with Higher Risk Designation” section of Part 8, Appendix IV, Internal Reference Tables, for a discussion of the impact of the “higher risk” designation on the major program determination process.

The Disability Insurance (DI) program was established in 1954 under Title II of the Social Security Act and provides benefits to disabled wage earners and their families in the event the family wage earner becomes disabled (Section 201 et seq. of the Social Security Act). In 1974, Congress enacted Title XVI, the Supplemental Security Income (SSI) program, which provides payments to financially needy individuals who are aged, blind, or disabled (Section 1601 et seq. of the Social Security Act).

II. PROGRAM PROCEDURES

The Social Security Administration (SSA) is responsible for administering the DI and SSI programs. The disability process begins when a person, referred to as a “claimant,” completes an application for DI benefits or SSI payments (20 CFR 404.601 et seq.). SSA field office staff verifies the claimant’s nonmedical eligibility (Program Operations Manual System (POMS)([DI 10005.001](#)). SSA field office staff then forward the claim to the state Disability Determination Services (DDS) for a medical determination of disability. DDSs make disability determinations based on the law and regulations and on written guidelines issued by SSA (POMS [DI 22501.002](#)). To assist in making proper disability determinations, the DDS is authorized to purchase medical examinations, x-rays, and laboratory tests on a consultative basis to supplement evidence obtained from the claimant’s physicians or other treating sources (POMS [DI 39545.120](#)).

The SSA pays the DDS for 100 percent of the costs incurred in making disability determinations (POMS [DI 39501.020](#)). Each year the state DDS submits a budget request to SSA for review and approval (POMS [DI 39501.030](#)). SSA notifies the DDS of budget approval using Form SSA-872, State Agency Obligational Authorization for SSA Disability Programs. Once approved, the DDS is allowed to withdraw federal funds through the Department of the Treasury’s Automated Standard Application for Payment system to meet immediate program expenses (POMS [DI 39506.100](#)). At the end of each quarter of each fiscal year, the DDS submits a Form SSA-4513, State Agency Report of Obligations for SSA Disability Programs, to account for program disbursements and obligations and a Form SSA-4514, Time Report of Personnel Services for Disability Determination Services, to account for employee time (POMS [DI 39506.200](#) et seq.).

Source of Governing Requirements

It is important to note the Social Security Disability Insurance (SSDI) program (AL 96.001) is funded by the DI Trust Fund. All claims under the SSI program (AL 96.006), including disability, are funded by the General Fund.

11. [POMS DI 22510.010 – Selecting a Qualified Medical Source to Perform a Consultative Examination \(CE\)](#)

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2,

“Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	Y	N	Y	N	N	Y	N	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Reimbursement for the cost of activities shall be in accordance with the budget request approved by SSA (20 CFR 416.1026, POMS DI 39503.000 and 39506.000).
- b. Activities allowed under the disability programs include personnel services, purchased medical services, indirect costs, and other non-personnel costs (42 USC 421(e) and (f); 20 CFR sections 404.1626 and 416.1026).
- c. Purchased medical services, such as Medical Evidence of Record (MER) and Consultative Examinations (CE), must be in accordance with the DDS fee schedule for purchased medical services (POMS DI 39545.000).

2. *Activities Unallowed*

- a. Some state DDSs provide medical determinations for programs outside of SSA’s disability programs. Charges for these determinations are not allowable charges to SSA. Each state that makes decisions for other programs has a Memorandum of Understanding (MOU) with SSA to

document how the charges should be tracked. (20 CFR 404.1630, [POMS DI 39518.040](#), [POMS DI 39563.210](#), [POMS DI 39563.803](#))

B. Allowable Costs/Cost Principles

1. *Direct Costs* – The SSA POMS contains guidance on direct costs for both the DI and SSI programs.
 - a. Personnel services (POMS DI 39518.000, SSA-4513 line item 1) include personnel costs and employee benefits.
 - b. Purchased medical services (POMS DI 39545.000, SSA – 4513 line item 2) include MER and CE.
 - c. Other non-personnel costs (SSA – 4513 line item 4) include travel (POMS DI 39524.000, SSA – 4513 line item 4h), office space (POMS DI 39527.000, SSA – 4513 line item 4a), equipment (POMS DI 39530.000, SSA – 4513 line item 4e), and contracted services (POMS DI 39542.000, SSA 4513 line item 4b).
2. *Indirect Costs*- Indirect costs (SSA- 4513 line item 3) charged to the disability program should be based on the rate approved by the cognizant federal agency as evidenced by a written agreement. Indirect costs, which may be charged to the disability program, generally arise from three sources (POMS DI 39506.300 and 39503.275):
 - a. Administrative costs of the parent agency related to DDS;
 - b. Business costs associated with the accounting, billing, and procurement services provided by the parent agency for the DDS; and
 - c. Automated services provided to the DDS that are operated by the parent agency.
3. *Non-SSA Work* – Some DDSs make disability determinations for claims not related to SSA benefits. When a DDS performs non-SSA work, an MOU should exist between the state and the SSA regional commissioner that outlines the specifics of the non-SSA work. SSA should not be charged the costs on the non-SSA program work (POMS DI 39563.210).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable

- c. *SF-425, Federal Financial Report* – Not Applicable
- d. *SSA-4513, State Agency Report of Obligations for SSA Disability Programs* – This report is due quarterly for each fiscal year still open in order to account for program disbursements and unliquidated obligations (POMS DI 39506.202).
- e. *SSA-4514, Time Report of Personnel Services for Disability Determination Services* – This report is due quarterly to account for employee time (POMS DI 39506.230).

Note: Many state Disability Determinations Services group transactions at a batch level, rather than storing individual transaction detail. The report should specify whether the DDS was able to provide individual transaction detail for the selected sample.

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Qualified Providers

Compliance Requirement: Each state agency is responsible for comprehensive oversight management of its process and for ensuring accuracy, integrity, and economy of its process (20 CFR sections 404.1519g and 416.919g, and POMS DI 39569.300). As part of these duties, DDSs must have, and follow, procedures for performing medical license verifications to ensure that only qualified providers perform DDSs task. By “qualified,” SSA means that the medical source must:

Be currently licensed in the state and have the training and experience to perform the type of examination or test the DDS requests; and

- a. Not be barred from participation in Medicare or Medicaid programs or other federal or federally assisted programs (20 CFR sections 404.1519g and 416.919g).

Prior to using the services of any medical provider, the DDS must check the System of Award Management (SAM) website (<https://sam.gov/SAM/>) to verify

medical licenses, credentials, and certifications with state medical boards (POMS DI 39569.300). and ensure medical staff and CE providers are qualified to perform the assigned tasks. Assigned tasks may include, but are not limited to, providing consultative examinations (CE) or final review of disability determinations.

Audit Objective: Determine whether the DDS performed the required reviews to ensure medical staff and CE providers are qualified to perform the assigned tasks.

Suggested Audit Procedure:

- a. Determine whether the state agency has written procedures for verifying, before engaging the services of a provider and at least annually thereafter, whether providers have valid medical licenses and are not currently excluded, suspended, or barred from participation in federal or federally assisted programs; and whose license to provide health care is not currently lawfully revoked or suspended by any state licensing authority for reasons of fraud, abuse, or professional misconduct, as identified on the SAM website (<https://sam.gov/SAM/>). (20 CFR section 404.1519g and 416.919g, POMS DI 22510.010, POMS DI 39545.575, POMS DI 39545.525)
- b. Select a sample of CE service agreements entered into during the audit period and determine whether, before using the services of the CE provider, the state agency
 - (1) checked the SAM website; and
 - (2) verified medical licenses, credentials, and certifications with state medical boards.
- c. Select a sample of Medical Consultants (MCs) and Psychological Consultants (PCs) employed by the DDS to determine whether the agency
 - (1) checked the SAM website to verify medical licenses, credentials, and certifications with state medical boards.
- d. Determine whether
 - (1) The state agency performed an annual review for each selected CE, MC, and PC;
 - (2) The results were adequately documented; and
 - (3) As appropriate, actions were taken to terminate CE agreements.

DEPARTMENT OF HOMELAND SECURITY

ASSISTANCE LISTING 97.036 DISASTER GRANTS – PUBLIC ASSISTANCE (PRESIDENTIALLY DECLARED DISASTERS)

I. PROGRAM OBJECTIVES

The mission of the Federal Emergency Management Agency's (FEMA) Public Assistance (PA) grant program is to provide assistance to state, tribal, territorial, and local governments (SLTT), and certain types of private nonprofit (PNP) organizations so that communities can quickly respond to and recover from major disasters or emergencies declared by the president.

II. PROGRAM PROCEDURES

A. Overview

Following a presidential declaration of a major disaster or an emergency, the FEMA, Department of Homeland Security (DHS), awards grants to assist SLTT governments and certain PNP entities to respond to and recover from disasters. Specifically, through the PA program, FEMA provides supplemental federal disaster grants assistance for debris removal, emergency protective measures, and the restoration of disaster-damaged, publicly owned facilities and the facilities of certain PNP organizations. The PA program also encourages protection of these damaged facilities from future events by providing assistance for hazard mitigation measures during the recovery process.

The PA program is based on a partnership with the recipient (state, tribal, or territorial government), the subrecipient (local government or PNP) and FEMA. FEMA is responsible for managing the program, approving grants, and providing technical assistance to the SLTT and subrecipients. The state, in most cases, acts as the recipient for the PA program and is responsible for providing technical advice and assistance to eligible subrecipients, providing state support for damage survey activities, ensuring that all potential applicants are aware of funding assistance available, and submitting documents necessary for grant awards (44 CFR sections 206.200 through 206.349) (a Tribal and territorial government may also be a recipient). The subrecipient requests assistance, identifies the damaged facilities, provides information to support the request, maintains accurate documentation, and performs necessary work (a recipient can also be a subrecipient).

Public Assistance Terms and Definitions

* For a complete list of terms and definitions please refer to the most recent version of the Public Assistance Program and Policy Guide (PAPPG) available here:

https://www.fema.gov/sites/default/files/documents/fema_pappg-v4-updated-links_policy_6-1-2020.pdf (PAPPG v4) Page(s) 213-220 for a full list of terms and definitions).

Applicant – A nonfederal entity submitting an application for assistance under the recipient’s federal award.

Emergency Work – Work that must be done immediately to save lives, protect improved property, protect public health and safety, or avert or lessen the threat of a major disaster.

Emergency Management Mission Integrated. Environment (EMMIE) – FEMA’s legacy grants management system. All pre-award functions are conducted in the Grants Manager and Grants Portal system. Award and some post-award functions may still be conducted in EMMIE, but FEMA is currently transiting all remaining function from EMMIE to the Grants Manager and Grants Portal system. Only FEMA and Recipients typically have access to EMMIE.

Grants Manager and Grants Portal (GM/GP) - FEMA grants management system for all new events. It is used to formulate projects and conduct all other pre-award functions. Award and some post-award functions may still be conducted in EMMIE, but FEMA is currently transiting all remaining function from EMMIE to the Grants Manager and Grants Portal system. FEMA, Recipients, and Subrecipients have access to the Grants Manager and Grants Portal system.

Large Project – A project for which the final obligated (federal and nonfederal) amount is equal to or *greater* than the annually adjusted cost threshold for small project grants.

Management Cost – Any indirect cost, administrative expense, and any other expense that a recipient or subrecipient reasonably incurs in administering and managing the PA award.

Permanent Work – Restorative work that must be performed through repairs or replacement to restore an eligible facility on the basis of its pre-disaster design and current applicable codes and standards.

Private Nonprofit (PNP) Organization – Any nongovernmental agency or entity that currently has an effective ruling letter from the US Internal Revenue Service, granting tax exemption under sections 501(c), (d), or (e) of the Internal Revenue Code of 1954, or satisfactory evidence from the state that the nonrevenue producing organization or entity is a nonprofit one organized or doing business under state law.

Project – A logical grouping of work required as a result of the declared major disaster or emergency, with a scope of work and cost estimate. This was previously referred to as a Project Worksheet (PW). The approved project will be documented on either the Subgrant Application - FEMA Form 90-91 in EMMIE, or the Project Report in Grants Manager or Grants Portal.

Small Project – A project for which the final obligated (federal and non-federal) amount is less than the annually adjusted cost threshold for small project grants.

B. Funding

For more information on funding please refer to the most recent version of the PAPPG available here: www.fema.gov/assistance/public/policy-guidance-fact-sheets.

Through the PA program, FEMA provides

- Grant funding for emergency protective measures and debris removal (Emergency Work) (PAPPG v4) Chapter 7, page(s) 97-139 for a full overview of Emergency Work eligibility and considerations.)
- Grant funding for permanent restoration of damaged facilities, including cost-effective hazard mitigation to protect the facilities from future damage (Permanent Work) (PAPPG v4) Chapter 8, page(s) 140-182 for a full overview of Permanent Work eligibility and considerations.)
- Grant funding for building code and floodplain management administration and enforcement to provide communities with the resources needed to effectively administer and enforce building codes and floodplain management regulations (e.g., substantial damage, permitting, etc.) increasing the overall speed of recovery and enhancing National Flood Insurance Program (NFIP) compliance.

Project Funding

The PA Project Application is the form FEMA uses to document the details of the applicant's project and costs claimed. It contains the information necessary for FEMA to review and approve the scope of work (SOW) and costs.

Unlike many pass-through federal grants, FEMA directly approves individual subawards in the Public Assistance program. FEMA's approval of a subaward is indicated when FEMA obligates the federal share of the eligible project cost to the recipient. Once obligated, the Project Application constitutes the official record of the approved scope of work for the project.

The initial award date of a specific subaward can be confirmed by inspecting the Date Awarded at the top of the Subgrant Application - FEMA Form 90-91 in EMMIE, or on the Award Information page in the Project Report in Grants Manager or Grants Portal.

Project Thresholds

FEMA establishes a minimum project threshold for each federal fiscal year. The threshold applies to incidents declared within that fiscal year and is based on the Consumer Price Index. FEMA establishes a dollar threshold each federal fiscal year for the implementation of Simplified Procedures under Section 422 of the Stafford Act.

- A Large Project is a Project with a cost equal to or greater than the threshold.

- A Small Project is a Project with a cost below the threshold.

The threshold applies to incidents declared within that fiscal year. FEMA administers funding for Large and Small Projects differently. For Large Projects that are not capped, FEMA adjusts any estimated costs to the actual incurred amount so that the final approved funding is based on actual costs. For Small Projects, FEMA does not adjust estimated costs to the actual incurred amount. FEMA determines whether a project is large or small based on the final approved amount of eligible costs after any costs adjustments, including insurance reductions.

Exceptions to the fiscal year application of the threshold: For major disasters and emergencies declared between March 13, 2020, and Aug. 3, 2022, the Simplified Procedures threshold was adjusted to \$1 million, however the change only applies to projects whose initial award occurred on or after Aug 3, 2022. Projects that were initially awarded prior to Aug 3, 2022, will retain the threshold in effect at the time of their award, even if the project is later amended or provided supplemental funding.

*A listing of thresholds by fiscal year is available here:

<https://www.fema.gov/assistance/public/tools-resources/per-capita-impact-indicator>

*For more information on large projects and small projects refer to the most recent version of the PAPPG available here:

https://www.fema.gov/sites/default/files/documents/fema_pappg-v4-updated-links_policy_6-1-2020.pdf ((PAPPG v4) Chapter 9, page 183.)

Project Types

Expedited Projects. FEMA may provide expedited funding for Emergency Work Projects (Category A or B) that meet or exceed the Large Project threshold. FEMA awards an expedited project based on a conceptual estimate, and funds Expedited Projects at 50 percent of the Federal share of the estimated project cost. FEMA will amend the project and award the Federal cost share for the remaining 50 percent of the project cost once the Applicant provides all of the documentation required to support the estimated project cost for a non-Expedited Project.

Capped Projects. FEMA provides three options that provide flexibility for the applicant to use PA funding differently than restoring the pre-disaster design and function of the facility. For these options, FEMA caps the amount of PA funding based on the estimated amount to restore the damaged facility to its pre-disaster design and function, including applicable and federally required codes and standards.

Improved Project: A project that restores the pre-disaster function, and at least the same capacity, of the damaged facility and incorporates improvements or changes to its pre-disaster design not required by eligible codes or standards.

Alternate Projects: The use of funds toward a project that does not restore the pre-disaster function of the damaged facility. If the applicant determines the public welfare would not be best served by restoring a damaged public facility or its function, it may use

the funding toward a different facility (or facilities) that benefit the same community.

Alternative Procedures: Title IV of the Stafford Act (42 USC 5121 et seq.) (Stafford Act) Section 428, authorizes FEMA to implement alternative procedures for the PA program through a pilot program. FEMA is currently piloting these Alternative Procedures as optional procedures. These procedures are available to each Applicant on a voluntary basis.

See page(s) 163-168 of the PAPPG v4 for an overview of PA capped project funding for Improved, Alternate, and Alternative projects and procedures.)

*For more information on Public Assistance Capped Grants and Alternative Procedures, refer to the most recent version of the PAPPG available here: https://www.fema.gov/sites/default/files/documents/fema_pappg-v4-updated-links_policy_6-1-2020.pdf (Information regarding FEMA’s alternative procedures can be found on the following pages of the PAPPG: 156, 165, 188, 195, 202, 263.)

Source of Governing Requirements

This program is authorized by 42 USC 5121 et seq. Program regulations issued by FEMA are codified at 44 CFR sections 206.200 through 206.349. The program is also responsible for complying with other regulatory requirements, such as those found in 2 CFR, insurance requirements, floodplain management requirements, and environmental and historic preservation requirements.

Availability of Other Program Information

Additional program information is available on the FEMA website at: www.fema.gov/assistance/public.

The Public Assistance Program and Policy Guide (PAPPG) available here: www.fema.gov/assistance/public/policy-guidance-fact-sheets.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not

being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	Y	N	N	Y	Y	Y

B. Allowable Costs/Cost Principles

FEMA evaluates the eligibility of all costs claimed by the applicant. Not all costs incurred as a result of the incident are eligible. (PAPPG v4) Chapter 4, page(s) 51-54;

Chapter 6, page(s) 65 & 93-95. Cost must be:

- Directly tied to the performance of eligible work;
- Adequately documented (2 CFR section 200.403(g));
- Reduced by all applicable credits, such as insurance proceeds and salvage values (Stafford Act section 312, 42 USC section 5155, and 2 CFR section 200.406);
- Authorized and not prohibited under federal, state, territorial, tribal, or local government laws or regulations;
- Consistent with applicant’s internal policies, regulations, and procedures that apply uniformly to both federal awards and other activities of the applicant; and
- Necessary and reasonable to accomplish the work properly and efficiently (2 CFR section 200.403).

1. *Applicant (Force Account) Labor*

FEMA refers to the applicant’s personnel as “force account.” FEMA reimburses force account labor based on actual hourly rates plus the cost of the employee’s actual fringe benefits. FEMA calculates the fringe benefit cost based on a percentage of the hourly pay rate. Because certain items in a benefit package are

not dependent on hours worked (e.g., health insurance), the percentage for overtime is usually different than the percentage for straight-time.

* For more information of Force Account Labor refer to the most recent version of the PAPPG available here: www.fema.gov/assistance/public/policy-guidance-fact-sheets.(PAPPG v4) Chapter 6, page(s) 68-71.

2. *Applicant (Force Account) Equipment and Purchase Equipment*

FEMA provides PA funding for the use of applicant-owned equipment (force account equipment), including permanently mounted generators, based on hourly rates. FEMA may provide PA funding based on mileage for vehicles, if the mileage is documented and is less costly than hourly rates.

There are instances when an applicant does not have sufficient equipment to effectively respond to an incident. If the applicant purchases equipment that it justifiably needs to respond effectively to the incident, FEMA provides PA funding for both the purchase price and either:

- The use of the equipment based on equipment rates (without the ownership and depreciation components); or
- The actual fuel and maintenance costs.

FEMA provides PA funding for force account equipment usage based on FEMA, state, territorial, tribal, or local equipment rates in accordance with the specific criteria.

* For more information On Applicant (Force Account) Equipment and Purchase Equipment refer to the most recent version of the PAPPG available here: www.fema.gov/assistance/public/policy-guidance-fact-sheets. (Information regarding force account equipment and purchase can be found on pages 72-76.)

3. *Contracts*

FEMA reimburses costs incurred using three types of contract payment obligations: fixed-price, cost-reimbursement, and, to a limited extent, time and materials (T&M). The specific contract types related to each of these are described in FEMA's *Procurement Guidance for Recipients and Subrecipients Under 2 CFR Part 200 (Uniform Rules)*.

The applicant must include required provisions in all contracts awarded and maintain oversight to ensure that contractors perform according to the conditions and specifications of the contract and any purchase orders.

FEMA does not reimburse costs incurred under a cost plus a percentage of cost contract or a contract with a percentage of construction cost method.

* For more information on Contracts refer to the most recent version of the PAPPG available here:
https://www.fema.gov/sites/default/files/documents/fema_pappg-v4-updated-links_policy_6-1-2020.pdf (Information regarding contracts can be found on pages 76-85)

4. *Mutual Aid*

When an applicant does not have sufficient resources to respond to an incident, it may request resources from another jurisdiction through a “mutual aid” agreement. FEMA refers to the entity requesting resources as the Requesting Entity. FEMA refers to the entity providing the requested resource as the Providing Entity.

FEMA provides PA funding to the Requesting Entity as it is legally responsible for the work. FEMA does not provide PA funding directly to the Providing Entity. For the work to be eligible, the Requesting Entity must have requested the resources provided.

* For more information on Mutual Aid refer to the most recent version of the PAPPG available here:
https://www.fema.gov/sites/default/files/documents/fema_pappg-v4-updated-links_policy_6-1-2020.pdf (Information regarding mutual aid can be found on pages 85-86.)

5. *Donated Resources*

Individuals and organizations often donate resources (equipment, supplies, materials, or labor) to assist with response activities. FEMA does not provide PA funding for donated resources; however, the applicant may use the value of donated resources to offset the nonfederal share of its eligible projects and Direct Federal Assistance.

* For more information on Donated Resources refer to the most recent version of the PAPPG available here:
https://www.fema.gov/sites/default/files/documents/fema_pappg-v4-updated-links_policy_6-1-2020.pdf. (Information regarding donated resources can be found on pages 88-92.)

6. *Insurance Proceeds*

FEMA cannot provide PA funding that duplicates insurance proceeds. Consequently, FEMA reduces eligible costs by the amount of:

- Actual insurance proceeds, if known; or
- Anticipated insurance proceeds based on the applicant’s insurance policy if the amount of actual insurance proceeds is unknown. FEMA

subsequently adjusts the eligible costs based on the actual amount of insurance proceeds the applicant receives.

FEMA cannot provide financial assistance for any loss for which financial assistance has been received from any other source. For COVID-19 projects where an applicant received revenue from patient care, including medical insurance, FEMA identifies the potential duplication by conducting a project and applicant review and reduces the project if necessary to avoid duplication in accordance with the COVID-19 Patient Care Revenue Duplication of Benefits Recipient and Subrecipient Guide. A reduction following the procedures in this guide meets the intent of this section

* For more information on Insurance Proceeds refer to the most recent version of the PAPPG available here:

https://www.fema.gov/sites/default/files/documents/fema_pappg-v4-updated-links_policy_6-1-2020.pdf (Information regarding insurance proceeds can be found on pages 93-94.)

* The COVID-19 Patient Care Revenue Duplication of Benefits Recipient and Subrecipient Guide can be found here:

https://www.fema.gov/sites/default/files/documents/fema_covid-19-patient-care-revenue-duplication-benefits.pdf

G. Matching, Level of Effort, Earmarking

1. Matching

- a. Costs must be on a shared basis, as specified in the FEMA-State Agreement. The minimum federal share is 75 percent of eligible costs (44 CFR section 206.65). The nonfederal share that is split between the recipient and each subrecipient may vary. The accountability for meeting the matching requirement resides with the recipient and is determined at the time of project accounting as part of project closeout (i.e., the nonfederal share does not have to be met until the end of the project).
- b. Under certain circumstances, the president can authorize an increased Federal cost share for a limited timeframe for emergency work or for the duration of the disaster.
- c. *Common Exceptions to the standard Cost Share:*

There is no matching requirement for PA grants made to Louisiana, Mississippi, Florida, Alabama, and Texas in connection with hurricanes Katrina, Wilma, Dennis, and Rita (Title IV, Pub. L. No. 110-28). The minimum federal share is 90 percent for any emergency or major disaster with a declaration occurring or an incident period beginning between January 1, 2020, and December 31, 2021. (Sec. 311 Pub. L. No: 117-103).

There is no matching requirement for Emergency Work (Category B)

performed January 20, 2020, through July 1, 2022, under any emergency or major disaster declared for the COVID-19 Pandemic. (87 FR 26366)

2. Level of Effort

Not Applicable

3. Earmarking

Management Costs

a. For major disaster or emergency declarations prior to November 13, 2007, the recipient makes funding available to subrecipients for their direct costs to request, obtain, and administer PA projects according to the following formula: (a) 3 percent of the subrecipient's first \$100,000 of net eligible project costs; (b) 2 percent of the subrecipient's next \$900,000 of such costs; (c) 1 percent of the subrecipient's next \$4 million of such costs; and (d) 0.5 percent of the subrecipient's net eligible costs over \$5 million (interim final rule, 44 CFR section 207.9(b)(2), effective November 13, 2007, 72 FR 57878, October 11, 2007).

b. For major disaster or emergency declarations on or after November 13, 2007, until August 1, 2017, the recipient makes management cost funding available to subrecipients, as prescribed in the recipient's administrative plan, to administer PA projects (interim final rule, 44 CFR sections 206.207 and 206.228 and Part 207, effective November 13, 2007, 72 FR 57876 through 57878, October 11, 2007).

For major disaster or emergency declarations from August 1, 2017, through October 4, 2018, recipients and subrecipients with no awarded Direct Administrative Costs as of November 14, 2018, follow the management cost procedures in section c; all other recipients and subrecipients follow this section, unless they opted in writing to utilize section c by February 12, 2019.

c. For major disaster or emergency declarations on or after October 5, 2018, FEMA makes available up to an additional 12 percent of the total award amount with up to 7 percent for the recipient and 5 percent for the subrecipient. Management costs include both direct and indirect administrative expenses by the state, local, tribal, or territorial government.

For more information refer to the [Public Assistance Management Cost \(Interim\) Policy \(PA Management Costs Interim Policy \(FP 104-11-2\) \(fema.gov\)\)](#)

H. Period of Performance

The period of performance of a specific subaward can be confirmed by verifying the period of performance at the top of the Subgrant Application - FEMA Form 90-91 in EMMIE, or on the Activity Completion Deadline in the Project Report in Grants Manager or Grants Portal.

1. Debris Removal (Category A) and Emergency Protective Measures (Category B)
 - a. The default period of performance for Debris Removal (Category A) and Emergency Protective Measures (Category B) is six months from the date that a major disaster or emergency is declared and apply to all [projects](#).
 - b. The [recipient](#) may extend the period of performance for Debris Removal (Category A) and Emergency Protective Measures (Category B) for an additional 6 months
 - c. FEMA approval is required for further extensions.
2. Permanent Work (Categories C-G)
 - a. The default period of performance for Permanent Work is 18 months from the date that a major disaster or emergency is declared and apply to all [projects](#).
 - b. The [recipient](#) may extend the period of performance for Permanent Work for an additional 30 months
 - c. FEMA approval is required for further extensions.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Applicable only to those nonfederal entities who do not or are unable to utilize the Department of Health and Human Services, Payment Management System.
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Project Accounting

Compliance Requirements For large projects, the recipient is required to make an accounting to FEMA of eligible costs. Similarly, the subrecipient must make an accounting to the recipient. In submitting the accounting, the entity is required to certify that reported costs were incurred in performance of eligible work, that the approved work was completed, that the project is in compliance with the provisions of the FEMA-State Agreement, all grant conditions were met, and that payments for that project were made in accordance with the applicable payment provisions. For improved and alternate projects, if the total cost of the projects does not equal or exceed the approved eligible costs, then the auditor should expect to see an adjustment to reduce eligible costs (44 CFR section 206.205).

For Small Projects, FEMA does not adjust estimated costs to the actual incurred amount. The Subrecipient must certify that they completed the approved SOW, and the Recipient must certify that they made all payments in accordance with the FEMA-State/Territory/Tribe agreement. This is typically completed on a Small Project Completion Certification.

Audit Objectives Determine whether ongoing and completed projects were accounted for in accordance with the required certification.

Suggested Audit Procedures

Projects not completed – Select a sample of ongoing large projects and ascertain if costs submitted for reimbursement were in compliance with the requirements for eligible work under the applicable Project. Testing should consider the differences in the requirements and approvals required of improved and alternate projects.

Completed projects – Select a sample of large projects completed during the audit period and ascertain if the entity’s files document the total costs as allowable costs and if the costs are for allowable activities under the applicable Project. This testing should consider the differences in the requirements and approvals required of improved and alternate projects.

IV. OTHER INFORMATION

For more in-depth information please refer to the Public Assistance Program and Policy Guide (Version 4) found at www.fema.gov/assistance/public/policy-guidance-fact-sheets.

Nonfederal entities must record expenditures on the Schedule of Expenditures of Federal Awards (SEFA) when (1) FEMA has approved the nonfederal entity’s Project, and (2) the nonfederal entity has incurred the eligible expenditures. Federal awards expended in years subsequent to the fiscal year in which the Project is approved are to be recorded on the nonfederal entity’s SEFA in those subsequent years.

For example:

1. If FEMA approves the Project in the nonfederal entity's fiscal year 2024 and eligible expenditures are incurred in the nonfederal entity's fiscal year 2025, the nonfederal entity records the eligible expenditures in its fiscal year 2025 SEFA.
2. If the nonfederal entity incurs eligible expenditures in its fiscal year 2024 and FEMA approves the nonfederal entity's Project in the nonfederal entity's fiscal year 2025, the nonfederal entity records the eligible expenditures in its fiscal year 2025 SEFA with a footnote that discloses the amount included on the SEFA that was incurred in a prior year.

DEPARTMENT OF HOMELAND SECURITY

ASSISTANCE LISTING 97.039 HAZARD MITIGATION GRANT PROGRAM (HMGP)

I. PROGRAM OBJECTIVES

The purpose of the Hazard Mitigation Grant Program (HMGP) is to mitigate the vulnerability of life and property to future disasters during the recovery and reconstruction process following a disaster. HMGP provides funds to implement projects to reduce risk from future hazard events in accordance with priorities identified in state, Indian tribal government, territory, or local hazard mitigation plans. It also provides funds designed to develop state, Indian tribal government, and local mitigation plans that meet the planning requirements outlined in 44 CFR Part 201.

II. PROGRAM PROCEDURES

HMGP is a cost-shared program administered by the Federal Emergency Management Agency (FEMA), Department of Homeland Security (DHS). FEMA provides HMGP awards to states and federally recognized Indian tribal governments (recipients), which, in turn, may provide subawards to state agencies, local governments, Indian tribal governmental agencies, and other eligible entities (subrecipients). Each recipient administers the HMGP according to a FEMA-state or FEMA-Indian tribal government agreement, a comprehensive Standard or Enhanced Mitigation Plan, and a state or Indian tribal government HMGP Administrative Plan. These plans must be approved by FEMA before funds are awarded to the state or Indian tribal government. FEMA is responsible for approving or denying project applications and reviewing the recipient's quarterly and final reports.

FEMA also provides funding for costs incurred by recipients and their subrecipients in administering HMGP. For federal disasters declared prior to November 13, 2007, the recipient receives a statutory administrative cost allowance determined according to a formula based on percentages of the aggregate federal share of funding provided to subrecipients for hazard mitigation projects. Management costs not covered by the allowance may be allowed with FEMA prior approval. The recipient awards statutory administrative cost allowances to subrecipient according to a formula based on percentages of the subrecipient's net eligible project costs. If requested, management costs are awarded as a part of the HMGP ceiling.

For federal disasters declared on or after November 13, 2007, FEMA makes available funds for costs incurred by recipients and their subrecipients in administering and managing HMGP. These costs are now termed "management costs" and include any indirect costs, administrative expenses, and any other expenses not directly chargeable to a specific project that are reasonably incurred by a recipient or subrecipient in the administration and management of HMGP. Recipients may identify and make available a percentage or amount of pass-through funds for management costs to their subrecipients. The basis, criteria, or formula for equitable distribution is determined by the recipient and must be included in the FEMA-approved state or Indian tribal government HMGP Administrative Plan before funds for management costs can be awarded. Management costs are not subject to the federal funding limits for HMGP projects (see III.G.1, "Matching, Level of Effort, Earmarking – Matching") and are provided in addition to the HMGP program ceiling.

Application and Award Process

After determining that disaster relief and recovery needs cannot be met with resources available within the state, the governor requests a presidential major declaration designating the state a disaster area. Indian tribal governments may also submit a request for a major disaster declaration within their impacted area. Applicants have up to 12 months from the date the disaster is declared to review and submit applications. The application must identify the specific mitigation measure(s) for which the state or Indian tribal government requests funding, and any entities to which the recipient intends to make subawards.

In addition to submitting applications and supporting documents to FEMA, the recipient's authorized representative appoints a state hazard mitigation officer. This official ensures that all potential applicants are made aware of the assistance available under the HMGP and provides technical advice and assistance to eligible subrecipients. Indian tribal governments can receive HMGP assistance as subrecipients of states or apply directly to FEMA. Where FEMA provides an award directly to an Indian tribal government, the two entities enter into a FEMA-tribal agreement modeled on the FEMA-state agreement.

Source of Governing Requirements

HMGP is authorized by Section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (the Stafford Act), 42 USC 5170c. Program regulations are codified at 44 CFR parts 80; 201; 206, Subpart N (Hazard Mitigation Grant Program); and 207.

A. Performance Metrics

Performance metrics for this program are as follows:

1. Quarterly Progress Reports (QPR)
FEMA uses the QPR data reported by the recipient to evaluate project status and identify potential funding issues (e.g., cost overruns). The scorecard below evaluates the status and progress of quarterly progress reporting for all obligated projects using the following six criteria:
 - a) Timeliness
 - b) Regions submitted to HQ on time
 - c) Data Completeness
 - d) Critical data elements that are reported on each project – Cost Code, Status, Percentage Work Complete, Total Recipient Drawdown, and Sub-recipient Expenditures to date
 - e) Data Reasonableness and Accuracy
 - f) Comparative data analysis between current and previous QPRs

g) Closeout

FEMA (HMA) distributes closeout updates to help regional HMA branch chiefs and closeout POCs remain focused on closeout performance measures and established priorities for the fiscal year.

1. Disaster Closeout Initiative (DCI) reports show progress and work remaining to close grant awards eight years beyond the declaration date. The monthly report provides detailed information concerning the number of projects open in each disaster, the Period of Performance end dates for each HM Program and Period of Availability end date for State Management Cost.
2. HM Only Program Open Reports provide a list of HM programs that, if closed, would allow closure of FEMA-State Agreements (FSA).
3. HM Program Closeout Performance Report provides the monthly HMGP closeout performance status, by region. Regional goals to achieve expectation and excellence are established at the beginning of the fiscal year.
4. Government Performance and Results Act (GPRA) reports provide a summary of the progress made each month toward closing FSA/FEMA-Tribal Agreements (FTA) targeted for closure during the fiscal year.

a) Obligations

Aligning the 2014–2018 FEMA Strategic Plan, Strategic Priority 4: Enable Disaster Risk Reduction Nationally and Objective 4.2: Incentivize and facilitate investments to manage current and future risk, FEMA measures the aggregate of HMGP obligations per annual year.

b) Obligate HMGP grants

- i. Achieved Expectations
- ii. Achieved Excellence

Availability of Other Program Information

Other program information is available at <http://www.fema.gov/hazard-mitigation-grant-program>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about

each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	Y	N	N	Y	N	N	Y	N	N

A. Activities Allowed or Unallowed

The activities allowed for an HMGP project are those described in the grant application approved by FEMA and the supporting documentation. All projects funded must also conform to the state’s, and/or Indian tribal government’s (when applying directly to FEMA), comprehensive Hazard Mitigation Plan. Additionally, all subaward projects funded under HMGP must be in accordance with priorities identified in the Indian tribal government or local hazard mitigation plans (44 CFR sections 201.6 and 201.7). Eligible projects include, but are not limited to:

1. Structural hazard control or protection projects;
2. Construction activities that will result in protection from hazards;
3. Retrofitting of facilities;
4. Property acquisition or relocation;
5. Development of state, Indian tribal government, or local mitigation standards;
6. Development or improvement of warning systems; and
7. Development of a mitigation plan meeting the requirements of 44 CFR Part 201. (44 CFR section 206.436(d)(2)).

B. Allowable Costs/Cost Principles

1. *Administrative Costs for Federal Disasters Declared Prior to November 13, 2007*
 - a. *Recipient Direct Costs* – A state or Indian tribal government may use funds made available by FEMA under its administrative cost allowance only for extraordinary direct costs of preparing applications and quarterly reports and making final audits and related field inspections. Specific cost items allowable as direct administrative costs include overtime pay, per diem and travel expenses for state or Indian tribal government employees, but not their regular (straight-time) salaries. Cost items not eligible for funding from the state’s or Indian tribal government’s administrative cost allowance, but still related to managing the program, may be funded from the award if FEMA gives prior approval. Regular (straight-time) salaries may be funded in this way. In the case of staffing costs for the state’s or Indian tribal government’s portion of the Joint Field Office, FEMA gives prior approval by approving the state’s staffing plan (44 CFR section 207.9(b)(1)).
 - b. *Subrecipient Administrative Costs* – A subrecipient may use funds made available by the recipient in its administrative cost allowance only for direct costs of requesting, obtaining, and administering its subawards (44 CFR section 207.9(b)(2)).
 - c. *Indirect Costs* – Recipient indirect costs identified in accordance with the federal cost principles are allowable. Indirect costs at the subrecipient level are unallowable (44 CFR section 207.9(c)).
2. *Management Costs for Federal Disasters Declared on or after November 13, 2007*
 - a. *Recipient* – A state or Indian tribal government may use funds made available by FEMA under its management cost allowance for any indirect costs, any administrative expenses, and any other expenses not directly chargeable to a specific project that are reasonably incurred in administering and managing the HMGP. All charges must be in accordance with 44 CFR Part 207.
 - b. *Subrecipient* – A state or Indian tribal government may identify and make funds for management costs available to subrecipients in accordance with the FEMA-approved HMGP Administrative Plan. A subrecipient may use funds made available for management costs for any indirect costs, administrative expenses, and other expenses not directly chargeable to a specific project that are reasonably incurred in administering and managing the HMGP subaward (44 CFR section 207.6). See also definition of “Management Costs,” 44 CFR section 207.2.

E. Eligibility**1. Eligibility for Individuals**

Not Applicable

2. Eligibility for Group of Individuals or Area of Service Delivery

Not Applicable

3. Eligibility for Subrecipients

The following types of entities are eligible to apply for HMGP subawards. Additionally, an eligible entity must have a FEMA-approved Mitigation Plan to be eligible to receive a project subaward (44 CFR sections 201.6 and 201.7).

- a. State and local governments;
- b. Private nonprofit organizations or institutions that own or operate a private nonprofit facility as defined at 44 CFR section 206.221(e); and
- c. Indian tribal governments and Alaskan Native villages or organizations (44 CFR section 206.434(a)).

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

IV. OTHER INFORMATION

In the administration of this grant, the state or Indian tribal government may provide subaward funds to another part of the state (e.g., a state agency) or designated area within an Indian tribal government. If the part of the state or Indian tribal government receiving the subaward is included in the audit of the state, such as a state-wide audit, or Indian tribe, as applicable, then for purposes of determining Type A programs and reporting on the Schedule of Expenditures of Federal Awards, these subawards within the single audit reporting entity (state or Indian tribe) should be eliminated. However, all federal awards expended under this program (including subawards) are subject to 2 CFR Part 200, Subpart F.

DEPARTMENT OF HOMELAND SECURITY

ASSISTANCE LISTING 97.067 HOMELAND SECURITY GRANT PROGRAM (HSGP)

I. PROGRAM OBJECTIVES

The purpose of the Homeland Security Grant Program (HSGP) is to support state, local, tribal, and territorial efforts to prevent acts of terrorism and other catastrophic events, and to prepare the nation for the threats and hazards that pose the greatest risk to the security of the United States. The HSGP supports core capabilities across the five mission areas of Prevention, Protection, Mitigation, Response, and Recovery. The building, sustainment, and delivery of these core capabilities are not exclusive to any single level of government, organization, or community, but rather, require the combined effort of the whole community. HSGP comprises three grant programs: State Homeland Security Program (SHSP), Urban Area Security Initiative (UASI), and Operation Stonegarden (OPSG). Together, these grant programs fund a range of activities, including planning, organization, equipment purchase, training, exercises, and management and administration across all core capabilities and mission areas.

State Homeland Security Program: The SHSP assists state, local, tribal, and territorial preparedness activities that address high-priority preparedness gaps across all core capabilities where a nexus to terrorism exists. All supported investments are based on capability targets and gaps identified during the Threat and Hazard Identification and Risk Assessment (THIRA) process and assessed in the Stakeholder Preparedness Review (SPR).

Urban Area Security Initiative: The UASI program addresses the unique risk-driven and capabilities-based planning, organization, equipment, training, and exercise needs of high-threat, high-density urban areas based on the capability targets identified during the THIRA process and associated assessment efforts and assists them in building an enhanced and sustainable capacity to prevent, protect against, mitigate, respond to, and recover from acts of terrorism.

Operation Stonegarden: OPSG supports enhanced cooperation and coordination between Customs and Border Protection (CBP), the United States Border Patrol (USBP), and federal, state, local, tribal, and territorial law enforcement agencies in a joint mission to secure the United States' borders along routes of ingress/egress to and from international borders, to include travel corridors in states bordering Mexico and Canada, as well as states and territories with international water borders. The THIRA/SPR process is not required for OPSG.

II. PROGRAM PROCEDURES

All 56 states and territories, including any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the US Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, are eligible to apply for SHSP funds. The State Administrative Agency (SAA) is the only entity eligible to submit HSGP applications to DHS/FEMA, including those applications submitted on behalf of UASI and OPSG applicants. Tribal governments may not apply directly for HSGP funding; however, funding may be available to tribes under the SHSP and OPSG through the SAA.

Eligible high-risk urban areas for the fiscal year (FY) 2022 UASI program have been determined through an analysis of relative risk of terrorism faced by the 100 most populous Metropolitan Statistical Areas (MSAs) in the United States. Subawards will be made by the SAAs to the designated high-risk urban areas.

Eligible subrecipients under OPSG are local units of government at the county level or equivalent level of government and federally-recognized tribal governments in states on or near the border with Canada, or Mexico, and states and territories with international water borders. All applicants must have active ongoing USBP operations coordinated through a CBP sector office to be eligible for OPSG funding. Subrecipients eligible to apply for and receive a subaward directly from the SAAs are divided into three Tiers. Tier 1 entities are local units of government at the county level or equivalent and federally recognized tribal governments that are on a physical border in states bordering Canada or Mexico, and states and territories with international water borders. Tier 2 eligible subrecipients are those not located on the physical border or international water but are contiguous to a Tier 1 eligible subrecipient. Tier 3 eligible subrecipients are those not located on the physical border or international water but are contiguous to a Tier 2 eligible subrecipient. Tier 2 and Tier 3 eligible subrecipients may be eligible to receive funding based on border security risk as determined by the USBP.

Source of Governing Requirements

These programs are authorized under section 2002 of the Homeland Security Act of 2002 ((6 USC 603). This program is also funded through the following appropriations: Department of Homeland Security Appropriations Act, 2014 (Pub. L. No. 113-76); Department of Homeland Security Appropriations Act, 2015 (Pub. L. No. 114-4); Department of Homeland Security Appropriations Act, 2016 (Pub. L. No. 114-113); Department of Homeland Security Appropriations Act, 2017 (Pub. L. No. 115-31); Department of Homeland Security Appropriations Act, 2018 (Pub. L. No. 115-141); Department of Homeland Security Appropriations Act, 2019 (Pub. L. No. 116-6); and Department of Homeland Security Appropriations Act, 2020 (Pub. L. No. 116-93). There are no program regulations. The applicable program guidance is incorporated by reference into awards and becomes part of the terms and conditions of award.

Availability of Other Program Information

Additional information concerning this Program is available at <https://www.fema.gov/homeland-security-grant-program>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about

each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status Discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	N	N	N	Y	Y	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Activities Allowed*

- a. Funds may be used to enhance the capability of state, local, tribal, and territorial jurisdictions to prepare for and respond to terrorist acts, including events of terrorism involving weapons of mass destruction and biological, nuclear, radiological, incendiary, chemical, and explosive devices, and other catastrophic events. Allowable activities include management and administrative costs, the hiring of intelligence analysts, overtime costs for specific purposes, the purchase of needed equipment, the provision of training and technical assistance, and the conduction of exercises. Funds may be used under the following cost categories: planning, organization, equipment, training, and exercises.
- b. Funds may be used for management and administration of the grant (Consolidated Appropriations Act, 2012 (Pub. L. No. 112-74, 125 Stat. 961; Consolidated Appropriations Act, 2013 (Pub. L. No. 113-6, 127 Stat. 358; Consolidated Appropriations Act, 2014 (Pub. L. No. 113-76, 128 Stat. 262); Department of Homeland Security Appropriations Act, 2015 (Pub. L. No. 114-4, 129 Stat. 54); Department of Homeland Security Appropriations Act, 2016 (Pub. L. No. 114-113); the Department of Homeland Security Appropriations Act, 2017 (Pub. L. No. 115-31); and *Department of Homeland Security Appropriations Act, 2018* (Pub. L. No. 115-141)).

- c. OPSG funds may be used for operational overtime costs associated with law enforcement activities, in support of border law enforcement agencies for enhanced border security.

2. *Activities Unallowed*

- a. Funds awarded for law enforcement terrorism prevention activities under SHSP and UASI cannot be used for construction of facilities, except for a minor perimeter security project, not to exceed the greater of \$1,000,000 or 15 percent of the grant award, as determined necessary by the Secretary of Homeland Security.
 - (1) The erection of communication towers that are included in a jurisdiction's interoperable communications plan does not constitute construction.
 - (2) Subject to all applicable laws, regulations, and licensing provisions, projects for the installation of communication towers are typically eligible under the program. Such projects are not considered construction, and, therefore, are, not subject to the otherwise applicable funding limits on construction activities.
- b. HSGP funds may not be used to support the hiring of sworn public safety officers for purposes of fulfilling traditional public safety duties or to supplant traditional public safety positions and responsibilities (6 USC 609(b)(1)(A)). Per section 2008(b)(1)(A) of the Homeland Security Act of 2002 (codified as amended at 6 USC 609(b)(1)(A)), HSGP funds may not be used to supplant state or local funds, but there is no prohibition on using funds for otherwise permissible uses under section 2008(a) on the basis that state or high-risk urban area has previously used its funds to support the same or similar use.
- c. OPSG funds may not be used for the following:
 - (1) Evidence collection, arrest processing, prosecution, and Traffic/DUI checkpoints, such as evidence documentation cameras, fingerprinting supplies, alcohol breathalyzers, portable work lights, traffic barricades, and similar law enforcement expenses
 - (2) Staffing (other than overtime) and general information technology computing equipment and hardware, such as personal computers, faxes, copy machines, and modems
 - (3) Hiring full-time or permanent sworn public safety officers

- (4) Supplanting of inherent routine patrols and law enforcement operations or activities not directly related to providing enhanced coordination between local and federal law enforcement agencies
- (5) Constructing and/or renovating costs
- (6) Exercise expenses
- d. HSGP funds may not be used for the purchase of weapons and weapons accessories, including ammunition.
- e. HSGP funds may not be used for the purchase of equipment not approved by FEMA. The following equipment is prohibited from purchase with grant funds: firearms; ammunition; grenade launchers; bayonets; or weaponized aircraft, vessels, or vehicles of any kind with weapons installed.
- f. HSGP funds may not be used for reimbursement for the maintenance or wear and tear costs of general use vehicles (e.g., construction vehicles), medical supplies, and emergency response apparatus (e.g., fire trucks, ambulances).
- g. HSGP funds may not be used for equipment that is purchased for permanent installation and/or use, beyond the scope of the conclusion of the exercise (e.g., electronic messaging sign).

G. Matching, Level of Effort, Earmarking

1. Matching

Not Applicable

2. Level of Effort

Not Applicable

3. Earmarking

As directed by section 2008(b)(2) of the Homeland Security Act of 2002 (codified as amended at 6 USC 609(b)(2)), all personnel and personnel-related costs, including those of intelligence analysts and operational overtime, are allowed up to 50 percent of HSGP funding without time limitation placed on the period of time that such personnel can serve. FEMA may provide a waiver at the request of the recipient to allow personnel expenses to exceed 50 percent of the amount awarded.

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Not Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

a. ***Biannual Strategy Implementation Report (BSIR) (PRA 1660-0113).***

Recipients are responsible for completing and submitting BSIRs through the [Grants Reporting Tool \(GRT\)](#). The BSIR is due within 30 days after the end of the reporting period: July 30 for the reporting period of January 1 through June 30 (summer BSIR report); and January 30 for the reporting period of July 1 through December 31 (winter BSIR report).

All required attributes of each project and the key line items are:

- Expenditures at the subrecipient/project level
- Status on project progress in accordance to the milestones of the award
- BISR reporting on expenditure of funds base on the Planning, Organization, Equipment, Training, and Exercises (POETE). BISR recipient reported information is confirmed by the GMS to FEMA systems, grant award and application milestones.

The first BSIR will be due by January 30, or 30 days after the end of the first reporting period of the award. Subsequent BSIR reports will require recipients to report on a project-by-project basis.

Timely submission of the report is required.

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Subgrant Awards

Compliance Requirements States (with the exception of the District of Columbia, Guam, American Samoa, the US Virgin Islands, and the Commonwealth of the Northern Mariana Islands) must obligate at least 80 percent of the funds awarded to them under SHSP and UASI to local or tribal governments within 45 calendar days of receipt of the funds (6 USC 604(d)(2)). Recipients of OPSG funds must obligate 100 percent of their allocations to eligible jurisdictions within that same time frame. “Receipt of funds” occurs either when the recipient accepts the award or 15 calendar days after the recipient receives notice of the award, whichever is earlier. “Obligate” has the same meaning as in federal appropriations law (i.e., there must be an action by the state to establish a firm commitment; the commitment must be unconditional on the part of the state; there must be documentary evidence of the commitment; and the award terms must be communicated to the subrecipient and, if applicable, accepted by the recipient).

Audit Objectives To determine if (1) the state complied with the requirement to obligate 80 percent of the funds awarded under SHSP and UASI and 100 percent of the OPSG allocation passed through to local or tribal governments within 45 calendar days of receipt of the funds, and (2) subrecipients were able to draw down funds immediately following state obligation of funds.

Suggested Audit Procedures

- a. Determine if the state has written procedures for making SHSP, UASI, and OPSG subgrant awards to local and tribal governments, including any standards for administrative lead time for obligation of funds and issuance of awards.
- b. Review the state’s written procedures, if any, for consistency with the compliance requirement.
- c. Determine if subgrant amounts were obligated by the state in a timely manner, consistent with SHSP, UASI, and OPSG requirements and the state’s own procedures.
- d. Select a sample of subgrant awards under these funding streams and review the subrecipients’ payment requests to determine if funds were disbursed by the state to the local or tribal units of government consistent with the dates of their subawards, i.e., the date of obligation.
- e. Review the state required submissions for compliance with award requirements.

IV. OTHER INFORMATION

When completing the Schedule of Expenditures of Federal Awards (SEFA), recipients should record their expenditures using the Assistance Listings number(s) shown on the legal award document for the period in which the funds were awarded. Subawards issued by the primary recipient are legally binding agreements, and, therefore, Assistance Listings numbers cited by the recipient in the subgrant award must be used by the subrecipient as the Assistance Listings reference in the SEFA.

It also should be noted that, except as otherwise provided by statute, DHS awards of property and/or equipment are subject to the audit requirements of 2 CFR Part 200, Subpart F.

UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT**ASSISTANCE LISTING 98.007 FOOD FOR PEACE DEVELOPMENT ASSISTANCE PROGRAM****ASSISTANCE LISTING 98.008 FOOD FOR PEACE EMERGENCY PROGRAM****I. PROGRAM OBJECTIVES**

The United States Agency for International Development (USAID) donates agricultural commodities to foreign countries under Title II of the Food for Peace Act (formerly the Agricultural Trade Development and Assistance Act of 1954) (Pub. L. No. 480) (7 USC 1691 through 1738r). These programs include donated commodities, monetization proceeds from the sale of commodities, and cash assistance (referred to as Section 202(e) funding (7 USC 1722(e)), and International Transportation, Storage, and Handing (ITSH) funding (7 USC 1736 and 1736a).

II. PROGRAM PROCEDURES**A. General Overview**

As the primary conduit of humanitarian assistance for USAID, the Bureau for Democracy, Conflict, and Humanitarian Assistance (DCHA) is charged with the overall responsibility for USAID's response to humanitarian crises, both natural and complex. The Office of Food for Peace (FFP) manages the Pub. L. No. 480, Title II (7 USC 1721 through 1726b) provision of agricultural commodities channeled to foreign countries as food assistance. Food assistance is also authorized and delivered under titles I and III of Pub. L. No. 480, as well as under other legislation. This supplement covers only food assistance authorized and delivered under Title II.

USAID may transfer agricultural commodities to address famine or other urgent or extraordinary relief requirements; combat malnutrition, especially in children and mothers; carry out activities that attempt to alleviate the causes of hunger, mortality, and morbidity; promote economic and community development; promote sound environmental practices; and carry out feeding programs. Agricultural commodities may be provided to meet emergency food needs through foreign governments and private or public organizations, including intergovernmental organizations. Agricultural commodities also may be provided for nonemergency assistance through private voluntary organizations or cooperatives, which are to the extent practicable, registered with USAID and through intergovernmental organizations.

“Cooperating sponsor” is the term used to define the organization entering into an agreement with USAID for the use of agricultural commodities or funds. Cooperating sponsors may include governments and public or private agencies, including intergovernmental organizations such as the World Food Program, and nongovernmental organizations. Nongovernmental cooperating sponsors include private voluntary organizations and cooperatives. Title II assistance is provided to cooperating sponsors for emergency and nonemergency programs. Activities include direct distribution as well as

food assistance for programs that support smallholder agriculture, market liberalization through policy change, nutrition, and other child survival programs, community development, such as water and sanitation and environmental restoration, and small-scale infrastructure development. A portion of Title II commodities can be monetized (sold to obtain cash for use in US assistance programs) by cooperating sponsors to fund complementary interventions to enhance the impact of food programs and contribute to food security. Monetization of food aid under emergency programs occurs to fund complementary activities such as distribution, repackaging, and wet feeding in refugee camps.

B. Program Operation

1. General

Each cooperating sponsor is required to submit, for USAID approval, an application that typically includes a program description, along with purposes and goals; criteria for measuring program effectiveness; a description of the activities for which commodities, monetized proceeds, or program income will be provided or used; and other specific provisions as required by USAID. If a cooperating sponsor submits a multi-year Operational Plan that is approved by USAID, the Operational Plan provided with an Annual Estimate of Requirements (AER) each subsequent year will only cover those components, which require updating or the cooperating sponsor proposes to change. Operational plans are required for all nongovernmental cooperating sponsors' emergency programs along with the AER; however, emergency situations may not permit the same degree of detail and certainty of analysis that is expected in planning Title II development programs (22 CFR section 211.5).

USAID uses Transfer Authorization to make an award for commodities and supporting costs.

2. Host Country Food for Peace Program Agreement (HCFPPA)

Each nongovernmental cooperating sponsor is required to enter into a separate written agreement with the foreign government of each country for which Title II commodities are transferred to the cooperating sponsor. The agreement must establish terms and condition needed by the nongovernmental cooperating sponsor to conduct a Title II program in accordance with 22 CFR Part 211. When this is not appropriate or feasible, the USAID mission or diplomatic post may instead provide assurance to FFP that the program can be effectively implemented in compliance with 22 CFR Part 211 without a HCFPPA (22 CFR section 211.3(b)).

3. Recipient Agencies

A cooperating sponsor may enter into agreements with recipient agencies (e.g., schools, institutions, welfare agencies, disaster relief organizations, and public or private agencies) for the delivery of program services. Such an agreement must be

in place prior to the transfer of any commodities, monetized proceeds, or program income to the recipient agency. The agreement must require the recipient agency to compensate the cooperating sponsor for any assets generated by the foregoing sources that are not used for purposes expressly provided for in the agreement, or that are lost, damaged, or misused as the result of the recipient agency's failure to exercise reasonable care (22 CFR sections 211.2(s) and 211.3(c)).

4. *Monetization*

Monetization is a critical resource for cooperating sponsors. The cooperating sponsor remains responsible for the commodities, monetized proceeds, and program income in accordance with the Operational Plan or Transfer Authorization (22 CFR section 211.3(c)(3)).

C. **Other Resources**

In addition to commodities (including ocean and inland freight costs) and monetization proceeds, cash resources, from either Section 202(e) funds or ITSH funds, are made available to cooperating sponsors for establishing new programs and meeting the specific administrative, management, and personnel costs of programs (7 USC 1722 (e)), as well as in support of commodity transportation within the host country, warehousing, fumigation, and more ITSH-related costs of the program (7 USC 1736(b) and 1736a(c)).

Source of Governing Requirements

This program is authorized under Title II of the Food for Peace Act (formerly the Agricultural Trade Development and Assistance Act of 1954) (Pub. L. No. 480) (7 USC 1691 through 1738r). Implementing regulations are found at 22 CFR Part 211.

Availability of Other Program Information

USAID maintains a web page with information on the "Food for Peace" program, including laws, regulations, and other information at <https://www.usaid.gov/food-assistance>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, "Matrix of Compliance Requirements"), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a "Y" in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as "N," it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an "N." See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	N	N	Y	N	N	Y	Y	Y

A. Activities Allowed or Unallowed

1. *Use of Funds*

- a. *General* – The Operational Plan and Transfer Authorization set forth the description of the activities for which commodities, monetized proceeds, or program income shall be used.
- b. *Program Management (Section 202(e) Funds)* – Cash resources provided by USAID under this provision of Title II may be used for activities including (1) direct program costs of a Title II program – administrative, management, distribution, and other program implementation costs; (2) improving the impact of food aid—feasibility assessments, baseline studies, and technical assistance; and (3) costs of implementing audit and evaluation recommendations (7 USC 1722 (e) and (f)).
- c. *Internal Transportation, Storage and Handling* – Emergency and eligible nonemergency programs to cover ITSH costs (7 USC 1736 and 1736a(c)).

2. *Use of Commodities and Monetization Proceeds*

- a. Except as USAID may otherwise agree in writing, agricultural commodities donated by USAID shall not be distributed, handled, or allocated by any military forces (22 CFR section 211.5(e)).
- b. Within the limits of the total amount of commodities, monetized proceeds, and program income as approved by USAID in the Operational Plan or Transfer Authorization, the cooperating sponsor may increase or decrease by not to exceed 10 percent the amount of commodities, monetized proceeds, or program income allocated to approved program categories or components of the Operational Plan (22 CFR section 211.5(a)).
- c. A cooperating sponsor is required to provide proper storage, care, and handling of commodities. In determining whether there was a proper

exercise of the cooperating sponsor's responsibility, USAID considers normal commercial practices in the country of distribution and the problems associated with carrying out programs in developing countries (22 CFR section 211.9(d)).

- d. Cooperating sponsors are not required to monitor, manage, report on, or account for the distribution or use of commodities after title to the commodities has passed to buyers or other third parties pursuant to a sale under a monetization program and all sales proceeds have been fully deposited in the special interest-bearing account established by the cooperating sponsor for monetized proceeds (22 CFR section 211.5(j)).
- e. Monetized proceeds may not be used to pay for the performance of abortions as a method of family planning or to motivate or coerce any person to practice abortions (22 CFR section 211.5(k)(4)).

L. Reporting

1. Financial Reporting

- a. *SF-270, Request for Advance or Reimbursement* – Applicable
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Applicable

2. Performance Reporting

Not Applicable

3. Special Reporting

Not Applicable

4. Special Reporting for Federal Funding Accountability and Transparency Act

See Part 3.L for audit guidance.

N. Special Tests and Provisions

1. Recipient Agencies

Compliance Requirements Cooperating sponsors are responsible for determining that recipient agencies to which they distribute commodities are eligible in accordance with the Operational Plan or Transfer Authorization and 22 CFR Part 211.

Prior to the transfer of commodities, monetized proceeds or program income to a recipient agency, the cooperating sponsor is required to enter into a written agreement that (a) describes the approved uses of resources provided, (b) requires the recipient agency to pay the cooperating sponsor the value of any resources that are used for purposes not permitted under the agreement or that are lost, damaged, or misused as a result of the recipient agency's failure to exercise reasonable care of transferred resources, and (c) incorporate by reference or otherwise the terms and conditions set forth in 22 CFR Part 211 (22 CFR section 211.3(c)).

In entering into agreements with recipient agencies for the transfer of commodities, monetized proceeds, or program income, the cooperating sponsor remains responsible for such resources transferred in accordance with the Operational Plan or Transfer Authorization and 22 CFR Part 211 (22 CFR section 211.3(c)(3)). In monitoring recipient agencies, the cooperating sponsor is required to provide adequate supervisory personnel for the efficient operation of the program, including personnel to (a) plan, organize, implement, control, and evaluate programs involving distribution of commodities or use of monetized proceeds and program income; (b) make warehouse inspections, physical inventories, and end-use checks of food or funds, and (c) review books and records maintained by recipient agencies that receive monetized proceeds and/or program income (22 CFR section 211.5(b)).

Audit Objectives Determine whether (1) the cooperating sponsor entered into written agreements with the recipient agencies; (2) the use of the recipient agencies was consistent with the Operational Plan and Transfer Authorization; and (3) the cooperating sponsor monitored the activities of recipient agencies to ensure proper performance of assigned activities and use of commodities, monetized proceeds, and program income.

Suggested Audit Procedures

Select a sample of recipient agencies and ascertain if:

- a. The cooperating sponsor entered into a written agreement with the recipient agency.
- b. The cooperating sponsor's use of the recipient agency was consistent with the Operational Plan and Transfer Authorization.
- c. The cooperating sponsor appropriately monitored the activities of the recipient agency to ensure proper performance of assigned activities and use of commodities, monetized proceeds, and program income.

PART 5 – CLUSTERS OF PROGRAMS

INTRODUCTION

Part 5 identifies those programs that are considered to be clusters of federal programs. As defined by 2 CFR section 200.1, a cluster of programs means a grouping of closely related programs that share common compliance requirements. The clusters of programs included in this Part are research and development (R&D) and student financial assistance (SFA), as well as certain other programs included in Part 4, “Agency Program Requirements,” that are deemed to be clusters. A cluster of programs must be considered as one program for determining major programs, as described in 2 CFR section 200.518 (major program determination), and, with the exception of R&D as described in 2 CFR section 200.501(c), determining whether a program-specific audit may be elected.

“Other clusters” also may be designated by a state for federal awards the state provides to its subrecipients that meet the definition of a “cluster of programs.” When designating an “other cluster,” a state must identify the federal awards included in the cluster and advise the subrecipients of compliance requirements applicable to the cluster, consistent with 2 CFR section 200.331(a). This part of the Supplement does not identify any state-designated clusters of programs.

For the R&D and SFA clusters, this part is the equivalent of Part 4 coverage. In developing the audit procedures to test for compliance with the requirements for the R&D and SFA clusters, the auditor must determine which of the eight types of compliance requirements apply and then determine which of the applicable requirements is likely to have a direct and material effect on the cluster at the auditee. For each such requirement other than N, “Special Tests and Provisions,” the auditor must use Part 3 (which includes generic details about each compliance requirement, including audit objectives and suggested audit procedures) and this Part 5 (which includes any cluster-specific requirements) to perform the audit. For N, “Special Tests and Provisions,” Part 3 includes only audit objectives and suggested audit procedures for internal control; all other information is included in Part 5.

The descriptions of the compliance requirements in parts 3 and 5 are a general summary of the actual compliance requirements. The auditor must refer to the referenced citations (e.g., statutes and regulations) for the complete compliance requirements.

RESEARCH AND DEVELOPMENT PROGRAMS

I. PROGRAM OBJECTIVES

The federal government sponsors research and development (R&D) activities under a variety of types of awards, most commonly grants, cooperative agreements, and contracts, to achieve objectives agreed upon between the federal awarding agency and the non-federal entity. The types of R&D conducted under these awards vary widely. The objective of an individual project is explained in the federal award.

II. PROGRAM PROCEDURES

As defined in 2 CFR section 200.1, *Research and Development*, “research” is a systematic study directed toward fuller scientific knowledge or understanding of the subject studied.

“Development” is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. R&D means all research activities, both basic and applied, and all development activities performed by non-federal entities. The term “research” also includes activities involving the training of individuals in research techniques where such activities utilize the same facilities as other R&D activities and when such activities are not included in the instruction function. The absence of the words “research” and/or “development” in the title of the federal award does not indicate it should be excluded from the R&D cluster. The substance of the federal award should be evaluated by the recipient and the auditor to determine the proper inclusion/exclusion in the R&D cluster.

Grants, cooperative agreements, and contracts for R&D are awarded to non-federal entities on the basis of applications/proposals submitted to federal agencies or pass-through entities. These proposals are sometimes unsolicited. An award is then negotiated in which the purpose of the project is specified, the amount of the award is indicated, and terms and conditions are delineated.

The administrative requirements that apply to R&D grants and cooperative agreements arise from 2 CFR Part 200, and in some legacy situations, OMB Circular A-110 (2 CFR Part 215), as applicable to an award, and the federal agencies’ codification of the OMB circular/guidance. The administrative requirements that govern contracts are contained in the Federal Acquisition Regulation (FAR) and agency FAR supplements (e.g., the Defense Federal Acquisition Regulation Supplement (DFARS)). The cost principles that apply to R&D cost-reimbursement contracts to non-federal entities are found in FAR subparts 31.2, 31.3, 31.6, and 31.7, as applicable.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance

requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	Y	Y	N	Y	N	Y	Y	N	N	Y	Y

When selecting a sample for testing of compliance requirements, the auditor should choose a sample from the universe of R&D awards appropriate to the objective being tested. The selected items should incorporate a variety of award sizes, award types (grants, cooperative agreements, and cost-reimbursement contracts), funding sources, and federal awarding agencies.

In the Schedule of Findings and Questioned Costs, the auditor must associate any questioned costs with the specific award number(s) in the audit finding detail. When the finding applies to the entire R&D cluster (i.e., systemic findings), the auditor must clearly indicate that the finding applies to the R&D cluster and also identify by award number the questioned costs for the specific award(s) impacted. This information is necessary for the auditee to prepare the corrective action plan, and for federal awarding agencies and pass-through entities to issue a management decision on the audit findings in a timely manner.

A. Activities Allowed or Unallowed

The objectives of individual R&D projects are explained in the applicable award. Testing of compliance with this requirement should ensure that funds were used only for such objectives.

B. Allowable Costs/Cost Principles

Testing of compliance with this requirement should ensure that costs were reasonable and necessary for performance of the R&D effort identified in the applicable award.

Compensation

The auditor should give particular attention to individual employee compensation and related benefits costs. See Frequently Asked Question 200.430-1, which addresses changes to current processes and compliance with the documentation standards of 2 CFR section 200.431(i) ([2CFR-FrequentlyAskedQuestions_2021050321.pdf \(cfo.gov\)](#)).

The 2 CFR section 200.430 provides that federal agencies may approve alternative methods of accounting for salaries and wages based on achievement of performance outcomes, including instances when funding from multiple programs/awards is blended to achieve a combined outcome more efficiently.

1. In accordance with the documentation standards of 2 CFR section 200.430(i), costs of compensation for personal services are allowable to the extent the total compensation for individual employees:
 - a. Is reasonable for the services rendered and conforms to the established written policy of the non-federal entity consistently applied to both federal and non-federal activities;
 - b. Follows an appointment made in accordance with a non-federal entity's rules or written policies and meets the requirements of federal statute, where applicable; and
 - c. Is determined and supported as provided in 2 CFR section 200.430(i), including that charges to federal awards for salaries and wages must be based on records that accurately reflect the work performed.
2. The auditor should determine if the awards contain any negotiated wage or salary rates, or contain any restrictions on salaries and wages, such as the NIH restriction on the amount that may be charged for individual salaries (https://grants.nih.gov/grants/policy/salcap_summary.htm). If so, a sample of these should be included as a part of allowable costs testing.

Indirect (facilities and administrative) costs and cost transfers

1. Indirect or facilities and administrative (F&A) costs are a second major category of cost charged to R&D projects. (See the coverage in Part 3 relating to the review of indirect costs.)
2. Transfers of costs between cost centers or research projects are commonly used to correct the financial records (such as transfers of costs between projects when costs were initially charged to the wrong project and the non-federal entity's control system found the error) and for other valid reasons.
 - a. Cost transfers should be tested for allowability. A cost transfer from one project to another project may appear to be an unallowable charge to the second project. However, the auditor should assess whether, because of

the closely linked nature of the research as verified by the auditee, the costs would be allowable charges to either project. Alternatively, transfers would not be allowable under the second project if the terms and conditions of that project identify the costs as unallowable. Auditors should note that a significant number of cost transfers between unrelated projects could be an indication of poor internal controls and might result in a noncompliance finding.

F. Equipment and Real Property

Entities are required to appropriately safeguard and maintain all equipment purchased with federal funds. For the R&D cluster, only considering equipment purchased under federal awards during the current audit period to assess whether the requirement is direct and material may not properly address requirements for the continued use of equipment on federally sponsored projects or programs and the safeguarding of equipment that is maintained by entities over multiple years. When assessing whether this compliance requirement is direct and material, auditors should consider the significance, both qualitative and quantitative factors, of all equipment purchased with federal awards that are part of the R&D cluster. Based on this assessment, auditors should design appropriate procedures to determine internal control over and compliance with equipment management requirements.

M. Subrecipient Monitoring

When deciding whether the subrecipient monitoring compliance requirement applies, the auditor must assess whether the non-federal entity entered into any relationships under the federal award that it identified as subawards. A subrecipient relationship exists when funding from a pass-through entity is provided to another entity to perform a portion of the federal award. It does not include payments for the purpose of obtaining goods and services for the non-federal entity's own use. A subaward may be provided through any form of legal agreement, including an award that a pass-through entity makes under a federal cost-reimbursement contract that is subject to the FAR, in which case the subaward is termed a subcontract. In determining whether a subrecipient relationship exists, the substance of the relationship is more important than the term used to describe it (2 CFR section 200.331).

N. Special Tests and Provisions

R&D awards may contain special terms and conditions that could have a direct and material effect on the R&D cluster. The auditor should make inquiries of the non-federal entity's management and review a sample of the R&D awards to ascertain if such special terms and conditions exist. Entities should have internal controls to ensure that (1) federal awards are reviewed to identify special award terms and conditions, and (2) compliance with the special terms and conditions identified. When special terms and conditions exist that could have a direct and material effect on the R&D cluster, the auditor should determine the audit objectives and develop and perform procedures for internal control

and compliance as required under 2 CFR sections 200.514(c) and (d). One example of a specific cross-cutting special term and condition is key personnel.

Key Personnel

Applications/proposals or awards may include staffing proposals that specify individuals who will work on the project and the extent of the planned involvement of personnel. The non-federal entity may change the staffing mix and level of involvement within limits specified by agency policy or in the award but may be required to obtain federal awarding agency approval of changes in key personnel (as identified in the award, which may differ from the non-federal entity's designation in the application/proposal) and changes in the principal investigator's/project director's time commitment/level of participation in the project. For grants and cooperative agreements, this may include not only a change in the principal investigator or project director but also the disengagement from the project for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator 2 CFR sections 200.308(c) (2) and (3)). For cost-reimbursement contracts under the FAR, specific key personnel requirements are included in the contract (or task order).

Audit Objectives To determine whether the non-federal entity adhered to key personnel commitments specified in the application/proposal or award (which may be an incorporation by reference of the approved application/proposal) and obtained any required federal awarding agency approval for changes.

Suggested Audit Procedures

- a. Review the non-federal entity's procedures for determining if key personnel were involved in the project.
- b. Review a sample of projects and determine if key personnel identified in the application/proposal and award were involved in the project as required.
- c. Determine if the non-federal entity complied with any award requirements for approval of changes in key personnel or absence from, or changes in time committed to, the project by the approved project director or principal investigator.

STUDENT FINANCIAL ASSISTANCE PROGRAMS**Department of Education****Department of Health and Human Services**

ASSISTANCE LISTING 93.925 SCHOLARSHIPS FOR HEALTH PROFESSIONS STUDENTS FROM DISADVANTAGED BACKGROUNDS – SCHOLARSHIPS FOR DISADVANTAGED STUDENTS (SDS)

I. PROGRAM OBJECTIVES

The objective of the student financial assistance (SFA) programs is to provide financial assistance to eligible students attending eligible institutions of postsecondary education.

II. PROGRAM PROCEDURES**A. Overview**

Institutions must apply to either the Secretary of Education (ED) or Secretary of Health and Human Services (HHS) to participate in their particular SFA programs. Some applications must be filed annually, others upon initial entry and once approved,

periodically thereafter. Institutions may be approved to participate in only one program or a combination of programs. Institutions are responsible for: (1) determining student eligibility; (2) verifying student data (when required); (3) calculating, as required, the amount of financial aid a student can receive; (4) drawing funds from the federal government and disbursing SFA funds to students directly or by crediting students' accounts; (5) making borrowers aware of loan repayment responsibilities; (6) submitting, as requested, data on borrowers listed on National Student Loan Data System (NSLDS®) roster; (7) returning funds to students and programs, as appropriate, if students withdraw, drop out, or are expelled from their course of study; (8) collecting SFA overpayments; (9) establishing, maintaining, and managing (including collecting loan repayments) a revolving loan fund for applicable programs; and (10) reporting the use of funds. Institutions may contract with third-party servicers to perform many of these functions.

B. Title IV Programs - General

The Title IV programs cited in this cluster that are administered by the Department of Education (ED) (those with Assistance Listings beginning with 84) are authorized by Title IV of the Higher Education Act of 1965, as amended (HEA), and collectively are referred to as the "Title IV programs." Because they are administered at the institutional level, the Federal Perkins Loan Program, the Federal Work-Study Program, and Federal Supplemental Educational Opportunity Grant Program are referred to collectively as the "campus-based programs."

For Title IV programs, students complete a paper or electronic application (Free Application for Federal Student Aid (FAFSA®) and send it to a central processor (a contractor of ED that administers the Central Processing System). The central processor provides Student Aid Reports (SARs) to applicants and provides Institutional Student Information Records (ISIRs) to institutions. Among other things, the SAR contains the applicant's Expected Family Contribution (EFC). Students take their SARs to the institution (or the institution uses the ISIR) to help determine student eligibility, award amounts, and disbursements. (Note: The central processor is a service organization of ED, not of the institution. Therefore, AU-C Section 402, *Audit Considerations Relating to an Entity Using a Service Organization*, does not apply when auditing the institution.)

C. Federal Supplemental Educational Opportunity Grants (FSEOG) (Assistance Listing 84.007)

The FSEOG program provides grants to eligible undergraduate students. Priority is given to Pell recipients who have the lowest expected family contributions. Federal funds are matched with institutional funds (34 CFR 676.21(a) and (c) Title III and Title V institutions may obtain a waiver of the matching requirement under 34 CFR 676.21(b) of the FSEOG regulations.

D. Federal Work-Study (FWS) (Assistance Listing 84.033)

The FWS program provides part-time employment to eligible undergraduate and graduate students who need earnings to help meet the costs of postsecondary education. This program also authorizes the establishment of the Job Location and Development (JLD) program, the purpose of which is to expand off-campus part-time or full-time employment opportunities for all students, regardless of their financial need, who are enrolled in eligible institutions and to encourage students to participate in community service activities. Institutions that participate in the FWS program may also use their funds for the Work-Colleges program, whose purpose is to recognize, encourage, and promote the use of comprehensive work-learning programs as a valuable educational approach when it is an integral part of the institution's educational program and a part of a financial plan that decreases reliance on grants and loans and to encourage students to participate in community service activities (34 CFR 675.43).

Funds are provided to institutions upon submission of an annual application, *Fiscal Operations Report and Application to Participate* (FISAP) (OMB No. 1845-0030) (this application covers all campus-based programs), and in accordance with statutory formula. Institutions must provide matching funds unless they are an eligible Title III or Title V institution, or unless the student is employed in a position which is authorized for payment with 100 percent of federal funds (34 CFR 675.26(d)). The institution determines the award amount, places the student in a job, and pays the student or arranges to have the student paid by an off-campus employer. The institution may use a portion of FWS funds for a JLD program.

E. Federal Perkins Loan Program (Assistance Listing 84.038)

Under the Perkins Loan Extension Act of 2015 (Extension Act) (Pub. L. No. 114-105), the authority to award new Perkins Loans to graduate students expired on September 30, 2016, and the authority to award new Perkins Loans to undergraduate students expired September 30, 2017. No disbursements were permitted after June 30, 2018 (Pub. L. No. 114-105). Institutions are required to continue servicing their Perkins Loan portfolio (or contract with a third-party servicer for such servicing) and administrative and reporting requirements remain until the institution has completed the liquidation process and program closeout. Although the Federal Perkins Loan Program is a loan program in which the proceeds were received and expended in prior years, the federal government is at risk for the loans until the debt is repaid. The guidelines at 2 CFR 200.502(b) must be used to calculate the value of federal awards expended under the Federal Perkins Loan Program each year, because the HEA, regulations, and terms and conditions of the Federal Perkins Loan Program impose continuing compliance requirements other than to repay the loans.

F. Federal Pell Grant (Pell) (Assistance Listing 84.063)

The Federal Pell Grant program provides grants to eligible students enrolled in eligible undergraduate programs and certain eligible post-baccalaureate teacher certificate programs and is intended to provide a foundation of financial aid. The program is

administered by ED and postsecondary educational institutions. Maximum and minimum Pell Grant awards are established by statute, but the amount for which each student is eligible is based on Pell Grant Payment and Disbursement Schedules published every year by ED. ED provides funds to the institution based on actual and estimated Pell expenditures.

G. William D. Ford Federal Direct Loans (Direct Loan) (Assistance Listing 84.268) (Includes Direct Subsidized, Direct Unsubsidized, and Direct PLUS loans)

The Direct Loan Program makes Direct Subsidized Loans and Direct Unsubsidized Loans to eligible students, and Direct PLUS Loans to eligible graduate or professional students or to eligible parents of dependent undergraduate students, to pay for the cost of attending postsecondary educational institutions. Direct Loans are made by the Secretary of Education. The student's SAR or ISIR, along with other information, is used by the institution to originate a student's Direct Loan. The financial aid administrator is also required to provide and confirm certain information.

H. Teacher Education Assistance for College and Higher Education Grants (TEACH Grants) (Assistance Listing 84.379)

The TEACH Grant program is a non-need-based grant program for eligible students who are enrolled in an eligible program, and who agree to serve as a full-time teacher, in a high-need field, in an elementary school, secondary school, or educational service agency serving low-income students for at least four years within eight years of ceasing enrollment at the institution where the TEACH Grant was awarded (34 CFR 686.1). If the grant recipient fails to complete the required teaching service, the TEACH Grant is treated as a Direct Unsubsidized Loan (34 CFR 686.43).

I. Postsecondary Education Scholarships for Veteran's Dependents (Iraq and Afghanistan Service Grant (IASG)) (Assistance Listing 84.408)

The Higher Educational Technical Corrections, Pub. L. No. 111-39, amended the HEA to allow an eligible student (less than 24 years old or enrolled in college at time of parent or guardian's death) whose parent or guardian died as a result of US military service in Iraq or Afghanistan after September 11, 2001, to receive this non-need-based grant if he or she was not eligible to receive a Pell Grant.

J. Nurse Faculty Loan Program (NFLP) (Assistance Listing 93.264)

The Nurse Faculty Loan Program (NFLP), as authorized by Title VIII of the Public Health Service Act (PHS Act), Section 846A, as amended by the Patient Protection and Affordable Care Act of 2010, Pub. L. No. 111-148, Section 5311, provides funding to institutions of nursing to support the establishment and operation of a distinct NFLP loan fund at the institution to increase the number of qualified nursing faculty. The award to the institution, the Federal Capital Contribution (FCC) award, must be deposited into the NFLP loan fund. The institution is required to deposit the Institutional Capital

Contribution (ICC) that is equal to no less than one-ninth of the FCC award. Participating institutions make loans from the regular NFLP loan fund to eligible graduate (master's and doctoral) nursing students to complete the nursing education program. Accredited collegiate institutions of nursing are eligible to apply for funding. Eligible institutions must offer an advanced education nursing degree program(s) that will prepare the graduate student to teach. The institution is fully responsible for administering the program (i.e., approving, disbursing, and collecting the loans).

All funds awarded for the specified budget or project period should be drawn down from the Payment Management System (PMS) account and deposited in an appropriate loan fund. It is expected that loan activity will be conducted through the institutional NFLP loan fund rather than drawdowns from the PMS account.

Active NFLP grantees are permitted to maintain their loan fund balances in the revolving institutional NFLP loan fund account without fiscal year restriction. The loan fund balance should continue to be disbursed (expended) through the current budget or project period.

Program guidance is available at <https://www.hrsa.gov/grants/find-funding/HRSA-22-047>.

**K. Health Professions Student Loans (HPSL)/Primary Care Loans (PCL)/Loans for Disadvantaged Students (LDS) (Assistance Listing 93.342)
Nursing Student Loans (NSL) (Assistance Listing 93.364)**

The HPSL/PCL/LDS and NSL programs provide long-term low-interest loans to students who demonstrate the need for financial aid to pursue their course of study at postsecondary educational institutions. Revolving loan funds are established and maintained at institutions through applications to participate in the programs. The funds are started with the FCC and a matching ICC. Repayments of principal and interest, new FCC, and new ICC are deposited in the revolving funds. The institution is fully responsible for administering the program (i.e., approving, disbursing, and collecting the loans).

Primary Care Loans are a segment of HPSL/PCL/LDS loan funds that impose certain restrictions on new borrowers as of July 1, 1993. First-time recipients of these funds after July 1, 1993, must agree to enter and complete a residency training program in primary health care, not later than four years after the date on which the student graduates from medical school, and, for new loans issued after March 23, 2010, must practice in such care for ten years (including residency training in primary health care) or through the date on which the loan is paid in full, whichever occurs first. Students who received their first HPSL/PCL/LDS before July 1, 1993, are exempt from this requirement and may continue to borrow HPSL/PCL/LDS loans under their applicable health-related course of study.

L. Scholarships for Health Professions Students from Disadvantaged Backgrounds – Scholarships for Disadvantaged Students (SDS) (Assistance Listing 93.925)

The SDS program provides grants to eligible health professions and nursing institutions to award scholarships to financially needy full-time students from disadvantaged backgrounds who are attending institutions of medicine, osteopathic medicine, dentistry, nursing, pharmacy, podiatric medicine, optometry, veterinary medicine, public health, chiropractic, or allied health; institutions offering graduate programs in behavioral and mental health practice; or entities providing programs for the training of physician assistants. For purposes of this program, HHS defines disadvantaged as a student who (1) comes from an environment that has inhibited the individual from obtaining the knowledge, skills, and abilities required to enroll in and graduate from a health professions institution, or from a program providing education or training in an allied health profession; or (2) comes from a family with an annual income below a level based on low-income thresholds according to family size published by the US Bureau of the Census, adjusted annually for changes in the Consumer Price Index, and adjusted by the secretary of HHS for use in health professions and nursing programs.

Source of Governing Requirements

The ED programs are authorized by Title IV of the Higher Education Act (HEA) of 1965, as amended (20 USC 1001 et seq.). The regulations are found in 34 CFR 600 and 668-690.

The HHS programs in this cluster are authorized by the Public Health Service Act (PHS Act). The PHS Act was amended by the Health Professions Education Partnership Act of 1998, Pub. L. No. 105-392 and, for the NFLP, further amended by the Patient Protection and Affordable Care Act of 2010 (Affordable Care Act), Pub. L. No. 111-148, Section 5311.

Availability of Other Program Information

ED annually publishes the Federal Student Aid Handbook (*FSA Handbook*), which provides detailed guidance on administering the Title IV programs. This handbook and other guidance material are available at <https://fsapartners.ed.gov/knowledge-center/fsa-handbook>.

HHS publishes the Student Financial Aid Guidelines, which provide detailed guidance on administering the Title VII and VIII programs. This and other materials are available at <https://bhw.hrsa.gov/funding/schools-manage-loan-programs>.

III. COMPLIANCE REQUIREMENTS

In developing the audit procedures to test compliance with the requirements for this federal program, the auditor must determine, from the following summary (also included in Part 2, “Matrix of Compliance Requirements”), which of the 12 types of compliance requirements have been identified as subject to the audit (noted with a “Y” in the summary matrix below), and then determine which of the compliance requirements that are subject to the audit are likely to have a direct and material effect on the federal program at the auditee. For each such compliance

requirement subject to the audit, the auditor must use Part 3 (which includes generic details about each compliance requirement other than Special Tests and Provisions) and this program supplement (which includes any program-specific requirements) to perform the audit. When a compliance requirement is shown in the summary below as “N,” it has been identified as not being subject to the audit. Auditors are not expected to test requirements that have been noted with an “N.” See the Safe Harbor Status discussion in Part 1 for additional information.

A	B	C	E	F	G	H	I	J	L	M	N
Activities Allowed or Unallowed	Allowable Costs/Cost Principles	Cash Management	Eligibility	Equipment and Real Property Management	Matching, Level of Effort, Earmarking	Period Of Performance	Procurement and Suspension and Debarment	Program Income	Reporting	Subrecipient Monitoring	Special Tests and Provisions
Y	N	Y	Y	N	N	N	N	N	Y	N	Y

Sampling for Audits of Institutions for which SFA is Identified as a Major Program

For institutions where SFA is identified as a major program, when drawing sample items for testing compliance in student populations of 250 items or greater for Eligibility, Verification, Disbursements to or on Behalf of Students and Return of Title IV Funds, auditors must draw samples using a sampling methodology that incorporates a desired level of assurance (confidence level) and expected exception rate. If student-level sampling is performed for Cash Management, samples from student populations of 250 items or greater must also be drawn using a sampling methodology that incorporates a desired level of assurance (confidence level) and expected exception rate. Examples of acceptable methodologies can be found in the AICPA Audit Guide (Guide) *Government Auditing Standards and Single Audits*, among other sources, along with examples of sampling approaches for population of less than 250. See further information about this Guide and other sources in Part 8, Appendix VII, item VI – Audit Sampling of the Compliance Supplement. Samples should be representative of the populations from which they are selected and thus the results can be projected to the population and used to draw conclusions.

Required Information for the Pell Grant and Direct Loan Programs

The Pell Grant and Direct Loan programs have been designated as programs susceptible to significant improper payments. As such, ED needs information concerning the audit sample to understand more fully the results of the audit and identify ways that ED can work with institutions to reduce improper payments. ED has concluded that the audit access provisions in 2 CFR 200.517(b) and Title IV regulations at 34 CFR 668.23(e)(1)(ii) give it the authority to collect certain information from the single audit in order for ED to carry out its oversight responsibilities with regard to improper payments. Therefore, when auditors are testing the SFA cluster as a major program, auditors must prepare the information described below in

items 1, 2, and 3. See specific guidance below related to ED's request for the information in item 4.

Auditors must provide this information directly to Federal Student Aid, Director, Financial Management Group, at FSAPellandDLReporting@ed.gov, no later than 60 days after the Data Collection Form and reporting package are submitted to the Federal Audit Clearinghouse. A template is available on the following ED website to facilitate communication of this information:

<https://www2.ed.gov/about/offices/list/ocfo/fipao/improper-payments.html>.

1. For audit procedures related to tests that may identify improper payments disbursements and returns of Pell funds (i.e., tests related to Eligibility, Cash Management, Verification, Disbursements to or on Behalf of Students, and Return of Title IV Funds), the auditor must provide the following if these procedures are tested at the student-level:
 - a. A description of each sample drawn and details of the sample, including the number of sampled students that received Pell funds and amount of Pell funds disbursed to these sampled students for the period tested;
 - b. The number of students that received Pell funds and amount of Pell funds disbursed for the population from which the sample was drawn for the period tested by sample drawn.

If these procedures (i.e., tests related to Eligibility, Cash Management, Verification Disbursements to or on Behalf of Students, and Return of Title IV Funds), are **not** tested at the student-level, the auditor must provide the following:

- a. A description of each sample drawn and details of the sample, including the amount of Pell funds sampled for the period tested;
- b. The amount of Pell funds disbursed for the population from which the sample was drawn for the period tested by sample drawn.

For samples and populations related to Return of Title IV Funds, the total Pell disbursed to the students is required even though the Return of Title IV Funds questioned costs identified from testing of the sample are based on the refunds.

If samples were drawn by Office of Postsecondary Education Identification (OPEID) number, provide the sample and population details by OPEID number (an eight-digit number). If this information is not available by OPEID, provide the aggregated sample and population amounts for the institution as a whole.

			Sample (s)	Sample(s)	Population for Each Sample	Population for Each Sample
Sample Description	Related Compliance Requirement(s)	OPEID	Students Receiving Pell (#)	Pell Disbursed (\$)	Students Receiving Pell (#)	Pell Disbursed (\$)

2. For audit procedures related to tests that may identify improper payment disbursements and returns of Direct Loan funds (i.e., tests related to Eligibility, Cash Management, Verification, Disbursements to or on Behalf of Students, and Return of Title IV Funds), the auditor must provide the following if these procedures are tested at the student-level:

- a. A description of each sample drawn and details of the sample, including the number of sampled students that received Direct Loan funds and amount of Direct Loan funds disbursed to these sampled students for the period tested;
- b. The number of students that received Direct Loan funds and amount of Direct Loan funds disbursed for the population from which the sample was drawn for the period tested by sample drawn.

If these procedures (i.e., tests related to Eligibility, Cash Management, Verification Disbursements to or on Behalf of Students, and Return of Title IV Funds), are **not** tested at the student-level, the auditor must provide the following:

- a. A description of each sample drawn and details of the sample, including the amount of Direct Loan funds sampled for the period tested;
- b. The amount of Direct Loan funds disbursed for the population from which the sample was drawn for the period tested by sample drawn.

For samples and populations related to Return of Title IV Funds, the total Direct Loan funds disbursed to the students is required even though the Return of Title IV Funds questioned costs identified from testing of the sample are based on the returns.

If samples were drawn by OPEID number, provide the sample and population details by OPEID number (an eight-digit number). If this information is not available by OPEID, provide the aggregated sample and population amounts for the institution as a whole.

			Sample(s)	Sample(s)	Population For Each Sample	Population For Each Sample
Sample Description	Related Compliance Requirement	OPEID	Students Receiving Direct Loan (#)	Direct Loan Disbursed (\$)	Students Receiving Direct Loan (#)	Direct Loan Disbursed (\$)

3. For each finding related to disbursements or returns of Pell and/or Direct Loans, the auditor must provide the following, by unique sampled student and OPEID combination:
 - a. The amount of Pell and/or Direct Loans that were disbursed to each student identified in the finding.
 - b. The difference between the amount of Pell and/or Direct Loan funds that should have been disbursed or returned (i.e., an overpayment or underpayment) and the actual amount of funds disbursed or returned, regardless of whether the noncompliance was subsequently corrected by the institution after the error was identified as part of the audit. Also, provide the amount of Pell and Direct Loans disbursed to the students in question.

Note: For #3, if there were no Pell and/or Direct Loan overpayments or underpayments, enter \$0 in the overpayment and underpayment columns and enter the Pell and/or Direct Loan disbursement amounts in the disbursement columns.

Assign a unique identifier for each student (e.g., Student 1, Student 2) identified. Do not use the institutionally assigned number or Social Security Number.

Finding Number, and Related Sample	Related Compliance Audit Requirement	Student Identifier	OPEID	Pell Disbursed (\$)	Pell Under-payment (\$)	Pell Over-payment (\$)	Direct Loan Disbursed (\$)	Direct Loan Under-payment (\$)	Direct Loan Over-payment (\$)

Although auditors are not required to report all noncompliance as audit findings for amounts below \$25,000, ED requests that the following information also be provided for noncompliance that was not reported as an audit finding. Although providing this information is optional, including it may reduce the potential for subsequent information requests in accordance with Uniform Guidance 2 CFR 200.517(b) and Title IV regulations at 34 CFR 668.23(e)(1)(ii). This information should be sent to FSAPellandDLReporting@ed.gov.

If any instances of noncompliance relating to disbursements or returns of Pell and/or Direct Loan funds are identified but not reported as audit findings, because they did not meet the reporting thresholds at 2 CFR 200.516(a)(3), provide a summary of the noncompliance and amount of over or underpayment of Pell and/or Direct Loan by student using instructions in item three above.

Finding Number, and Related Sample	Related Compliance Audit Requirement	Student Identifier	OPEID	Pell Disbursed (\$)	Pell Under-payment (\$)	Pell Over-payment (\$)	Direct Loan Disbursed (\$)	Direct Loan Under-payment (\$)	Direct Loan Over-payment (\$)

A. Activities Allowed or Unallowed

1. *Health Professions Student Loans/Primary Care Loans /Loans for Disadvantaged Students (Assistance Listing 93.342) and Nursing Student Loans (NSL) (Assistance Listing 93.364)*

Funds from both programs may also be used for capital distribution as provided in sections 728 and 839, or, as agreed to by the secretary of HHS for costs of litigation; costs associated with membership in credit bureaus and, to the extent specifically approved by the secretary, for other collection costs that exceed the usual expenses incurred in the collection of loan funds (HPSL/PCL/LDS, 42 CFR 57.205(a); NSL, 42 CFR 57.305(a)).

2. *Nurse Faculty Loan Program (NFLP) (Assistance Listing 93.264)*

Funds may be used for capital distribution under Section 846A of the PHS Act, Title VIII, as further amended by the Patient Protection and Affordable Care Act of 2010, Pub. L. No. 111-148, Section 5311 or, as agreed to by the secretary of HHS for costs of litigation; costs associated with membership in credit bureaus and, to the extent specifically approved by the secretary, for other collection costs that exceed the usual expenses incurred in the collection of NFLP loan funds.

C. Cash Management

SFA Title IV Programs: An institution requests funds from ED under the advance, reimbursement, or heightened cash monitoring payment methods. An institution's Program Participation Agreement will indicate whether the institution has been placed on the reimbursement or heightened cash monitoring payment method. An institution could have had more than one Program Participation Agreement during a given payment period in that it could have been placed on or taken off of the reimbursement or heightened cash monitoring payment method at any point during the fiscal year. Many institutions on the Advance method of payment elect to post Title IV disbursements prior to drawing funds from the G5 system. This is an acceptable practice and does not constitute the institution being on the Heightened Cash Monitoring (HCM) or Reimbursement. ED publishes a list of institutions on heightened cash monitoring or reimbursement by quarter at: [Heightened Cash Monitoring | Federal Student Aid](#).

For purposes of determining compliance with cash management requirements to minimize time between funds transfer and disbursement, a disbursement of funds occurs on the date an institution credits a student's account or pays a student or parent directly with either Title IV funds or institutional funds used in advance of drawing down federal funds(34 CFR 668.164(a)(1)(i) & (ii)).

The payment methods and associated cash management requirements are listed below.

- *Advance Payment Method:* An institution submits a drawdown request for funds utilizing ED's electronic grants management system, known as G5, that may not exceed the amount of funds needed to make immediate disbursements to eligible

students and parents. If the request is accepted, ED initiates an electronic funds transfer to the institution's account. The institution must then disburse the requested funds no later than three business days following receipt of those funds from ED.

For institutions on the Advance Payment Method, any amount of Title IV funds not disbursed to recipients by the end of the third business day is considered excess cash. ED allows an institution to retain, for up to seven days, excess cash that does not exceed one percent of the total amount of funds drawn by the institution in the prior award year. The institution must return to ED any excess cash over the tolerable amount (one percent) and any amount remaining after the tolerance period (seven days). Questioned costs would be those in excess of the one percent threshold.

- *Heightened Cash Monitoring (HCM) Payment Methods:* An institution must credit a student's account for the amount of Title IV funds the student is eligible to receive and pay the amount of any credit balance due before the institution submits a request for funds or seeks reimbursement. In other words, the "costs" that must be paid prior to a request for funds (HCM1) or a reimbursement (HCM2) are the amounts of the eligible disbursement and any credit balance. An institution's request may not exceed the amount of the disbursements the institution made to the students included in that request. While HCM is an ED prescribed payment method, for purposes of testing in using Part 3 of the Compliance Supplement, it would fall generally under the Reimbursement Payment method since the school must disburse funds before ED makes a payment.
 - *HCM1 Payment Method:* After making a disbursement to eligible students from institutional funds and submitting disbursement records to the Common Origination and Disbursement (COD) system, the institution draws down funds to cover those disbursements through G5 the same way as an institution on the Advance Payment Method. **Note:** Due to the effects of the COVID-19 pandemic, in a December 2020 Federal Register Notice, ED permitted institutions on the HCM1 payment method to submit a request for funds without first paying credit balances due, as long as the institution pays the credit balances no later than three calendar days after receiving the funds for those students. This flexibility goes through the end of the payment period that begins after the date that the COVID-19 national emergency ends. Assuming the emergency ends on May 11, 2023, the flexibility would extend through the end of the payment period that begins after that date. For example: Spring Semester ends on May 20, 2023 and Summer begins on June 5, 2023. The flexibility ends on the last day of the Summer.
 - *HCM2 Payment Method:* After making disbursements to eligible students from institutional funds, a reimbursement payment request must be submitted for those funds the same way as an institution on the Reimbursement Payment Method (see Reimbursement Payment Method below). HCM2 differs from Reimbursement only to the extent that ED may modify the documentation required and the review procedures used to review the payment request.

- *Reimbursement Payment Method:* An institution must credit a student's account for the amount of Title IV funds the student is eligible to receive and pay the amount of any credit balances due before the institution seeks reimbursement from ED for those disbursements. The reimbursement request must include supporting documentation for the disbursements. After the reimbursement request is approved, ED initiates an electronic funds transfer to the institution's account.

G5 is the system through which institutions request and return Title IV funds. The G5 External Award Activity Report is a statement for an institution's G5 awards that displays both cumulative and detailed information on drawdown activity, refunds, adjustments, available balances, and authorization changes for each award.

Cash Management Program Requirements for Direct Loans – Monthly Reconciliations

To assist institutions in reconciling their internal accounting records with the G5 System, using their Unique Entity Identifier (UEI), institutions can obtain a G5 External Award Activity Report (<https://www.g5.gov/>; under the "Payment" tab) showing cumulative and detail information for each award. The External Award Activity Report can be created with date parameters (Start and End Dates) and viewed on-line. To view each draw per award, the G5 user may click on the award number to view a display of individual draws for that award.

HHS Programs

For the HHS programs, requests for new FCC must only be made when needed. Any monies associated with the fund must be deposited in an income-producing account and all excess cash, including interest earned in excess of \$500 in the aggregate, must be returned to HHS.

For Health Professions Student Loans (HPSL)/Primary Care Loans (PCL)/Loans for Disadvantaged Students (LDS), and Nursing Student Loans (NSL), the institution must maintain all monies relating to each individual fund in interest bearing accounts. If the institution integrates the funds with other institution resources for investment purpose, the institution must maintain separate accountability and reimburse the funds for any losses that occur (HPSL/PCL/LDS 42 CFR 57.203 and 57.205; NSL, 42 CFR 57.303 and 57.305).

For NFLP (Assistance Listing 93.294), the institution must maintain all monies relating to each individual fund in interest-bearing accounts. Any monies associated with the fund must be deposited in an income-producing account and all excess cash, including any interest earned in excess of \$500 in the aggregate, must be returned to HHS. Unused loan funds should be retained in the loan fund for making additional loans. However, unused NFLP funds must be used within 18 calendar months from the end of the NFLP designated budget period. The unused accumulation (cash balance) in the NFLP fund must be reported annually. The NFLP loan fund may be voluntarily or involuntarily terminated if the unused accumulation is deemed excessive. If an institution is determined to have an excessive unused accumulation, future awards may be affected (Program Guidance, Overview of Institutional Management of NFLP Funds <https://bhw.hrsa.gov/funding/schools-manage-loan-programs>).

E. Eligibility

1. Eligibility for Individuals

- a. Most of the requirements for student eligibility are contained in Appendix A (located after Section IV, “Other Information,” of this Part 5).

In the process of a student applying for ED federal financial aid, an ISIR is sent electronically to the institution and a SAR, or information on how to access the SAR, is sent to the student. The original ISIR or SAR for an award year may contain codes that relate to student eligibility requirements numbers 2, 4, 5, 9, 10, and 12 in Appendix A. If the original ISIR or SAR does not contain codes relating to those eligibility requirements, and the institution has no information indicating otherwise, the student can be considered to have met them. The *ISIR Guide* contains all the ISIR and SAR codes and is available at [The ISIR Guide, 2022-2023 \(ed.gov\)](https://www.ed.gov/isa). The ISIR Guide changes annually and should be obtained and reviewed for the period under audit.

(1) *Calculation of Benefits*

In addition to the requirements and limits described below, awards must be coordinated among the various programs and with other federal and nonfederal aid (need and non-need based aid) to ensure that total aid is not awarded in excess of the student’s financial need or cost of attendance (34 CFR 668.42, FWS, and FSEOG, 34 CFR 673.5 and 673.6; Direct Loan, 34 CFR 685.301). The TEACH Grant is a non-need-based grant and may replace a student’s EFC, but the amount of the grant that exceeds the student’s EFC is considered estimated financial assistance (34 CFR 686.21(d)). An IASG-eligible student who has an EFC that does not meet the need-based criteria for a Pell grant can receive a non-need-based IASG, but the (1) award may not exceed the student’s cost of attendance (COA) and (2) IASG is not considered estimated financial assistance (20 USC 1070h).

The determination of need-based SFA award amounts is based on financial need. Financial need is defined as the student’s COA minus the student’s EFC (as computed by the central processor and included on the student’s SAR/ISIR). Once a student is awarded any financial aid, to find remaining financial need one would use the following formula -- COA minus EFC minus Estimated Financial Assistance (EFA) (§ 668.2) = remaining need. To avoid overpayments, need-based SFA awards cannot exceed the student’s overall financial need. f.

Non need-based SFA awards are not limited to financial need but cannot exceed the student's COA. To determine non need-based SFA awards (unsubsidized aid) one would use the following formula – COA minus EFA.

An institution may (1) exclude from both estimated financial assistance and the COA, financial assistance provided by a state if that assistance is designated by the state to offset a specific component of the COA; (2) include the one-time cost of a student obtaining his or her first professional license or certificate (please note that starting in the 2023-24 award year the inclusion of costs associated with obtaining a first professional license or certificate is no longer restricted to a one-time allowance and is no longer optional if part of a student's program or occupation); and (3) include a limited allowance for room and board in a student's COA for students who are less than half-time students. In this context, a limited allowance for room and board is an allowance for up to three semesters (or equivalent), with no more than two of the semesters being consecutive at any one institution (sections 480(j)(3), 472(13), and 472(4)(C) of HEA; [20 USC 1087vv(j)(3), 20 USC 1087ll(13) and (4)(C)]).

For Title IV programs, the COA is generally the sum of the following: tuition and fees; an allowance for books, supplies, transportation, and miscellaneous personal expenses; an allowance for room and board; when applicable, allowances for costs for dependent care; costs associated with study abroad and cooperative education; costs related to disabilities; and fees charged for student loans. There are exceptions for students attending less than half-time, correspondence students, and incarcerated students. The financial aid administrator also has authority to use professional judgment to adjust the COA or alter the data elements used to calculate the EFC on a case-by-case basis to allow for special circumstances.

A crossover payment period is one that includes both June 30 and July 1 overlapping two award years. If a student enrolls in a crossover payment period, the institution must consider the crossover payment period to occur entirely within one award year and must have a valid SAR or valid ISIR for the selected award year. The choice of which award year the institution assigns to a crossover payment period ("header" or "trailer") must be outlined in the institution's Pell Grant crossover payment period policy and can be made on a student-by-student basis. The crossover payment period may be assigned to a different award year for Pell Grant purposes than the award year used for the student's other Title IV

aid for that period. See Volume 3 of the *FSA Handbook* for additional information on crossover payment periods.

Additional program specific individual eligibility requirements can be found at the following: *20 USC 1087ll-1087mm; FWS, 34 CFR section 675.9; FSEOG, 34 CFR section 676.9; Direct Loan, 34 CFR sections 685.200 and 301; Pell, 34 CFR section 690.75; HPSL/PCL/LDS, 42 USC 293a(d)(2); 42 CFR section 57.206(b); NSL, 42 USC 297n-1(c)(2); 42 CFR section 57.306(b); NFLP, Affordable Care Act, Section 5311 and Program Guidance.*

(2) *Federal Pell Grant (Assistance Listing 84.063)*

Each year, based on the maximum Pell Grant established by Congress, ED provides to institutions Payment and Disbursement Schedules for determining Pell awards. The Payment Schedule provides the maximum scheduled award a student would receive for a full academic year as a full-time student based on their EFC and COA. The Disbursement Schedules are used to determine annual awards for full-time, three-quarter time, half-time, and less-than-half-time students. All Schedules, however, are based on the COA of a full-time student for a full academic year (see Chapter 3 in Volume 3, Calculating Pell and Iraq & Afghanistan Service Grant Awards, of the *FSA Handbook* for the year(s) being audited for guidance on selecting formulas for calculating cost of attendance, prorating costs for programs less or greater than an academic year, and determining payment periods). Disbursement schedules for 2021–2022 and 2022-2023 award year can be found at the following link: [2021-2022 Federal Pell Grant Payment and Disbursement Schedules | Knowledge Center](#) ; and <https://fsapartners.ed.gov/knowledge-center/library/dear-colleague-letters/2022-03-24/revised-2022-2023-federal-pell-grant-payment-and-disbursement-schedules>. Students that receive Pell or IASG may not receive more than six Scheduled Awards (12 semesters, or the equivalent) as measured by the percentage of “lifetime eligibility used” (LEU) field in COD (tracked by ED) (20 USC 1070a(c)(5)). The LEU maximum percentage for student eligibility is 600 percent.

The steps to determine Pell awards that an institution must perform are as follows:

- (a) Determine the student’s enrollment status (full-time, three-quarter time, half-time, or less than-half-time) in accordance with the requirements under definitions of those terms in 34 CFR 668.2(b). Note that for nonterm credit and clock hour programs, students are always considered to be

full-time for Pell Grant purposes except to the extent that fewer cost of attendance components are included in the calculation of a Pell Grant award for less-than-half-time students (see Chapter 3 in Volume 3, *Calculating Pell and Iraq & Afghanistan Service Grant Awards*, of the *FSA Handbook* for more information). There are also special considerations for determining enrollment status for students enrolled in correspondence courses, as described under 34 CFR 690.8.

- (b) Calculate the cost of attendance. This is always based on the cost for a full-time enrollment status for a full academic year. If the student is enrolled in a program or enrollment period that is longer or shorter than an academic year, the costs must be prorated so that they apply to one full academic year. There are two allowable proration methods. Costs can be on an actual cost-per-student basis or an average cost for groups of similar students. If the student is enrolled less than half-time, the only allowable cost components are tuition and fees, allowance for books, and supplies, transportation allowance, allowance for dependent care, and room and board for a limited duration.
- (c) Determine the annual award, based on the cost of attendance calculated above and the EFC, from the Payment and Disbursement Schedule for the student's enrollment status (i.e., full-time, three quarter-time, half-time, or less than half-time).
- (d) Determine the payment period. For term programs , standard or nonstandard, the payment period is the term.
- (e) Calculate the payment for the payment periods. The calculation of the payment for the payment period may vary depending on the formula used, the length of the program compared to the academic year, and whether the institution uses an alternative calculation for students who attend summer terms or for students enrolled in correspondence courses (34 CFR 690.62 through 690.66. Also see Chapter 3 in Volume 3, *Calculating Pell and Iraq & Afghanistan Service Grant Awards*, of the *FSA Handbook*).
- (f) Disburse funds at prescribed times (this is tested under III.N. 2, "Special Tests and Provisions - Disbursements To or On Behalf of Students") (34 CFR 690.61 through 690.66, and 690.75 through 690.76; Pell Grant Payment

Schedules; General Provisions regulations, part 668, subpart K, and *FSA Handbook*).

Additional Pell Grant Award Eligibility

Under the Year Round Pell Grant provisions, to be eligible for the additional Pell Grant funds, the student must be otherwise eligible to receive Pell Grant funds for the payment period and must be enrolled at least half-time, in accordance with 34 CFR 668.2(b), in the payment period(s) for which the student receives the additional Pell Grant funds in excess of 100 percent of the student's Pell Grant Scheduled Award.

For a student who is eligible for the additional Pell Grant funds, the institution must pay the student all of the student's eligible Pell Grant funds, up to 150 percent of the student's Pell Grant Scheduled Award for the award year. Note that the provisions of the law state that any Pell Grant received will be included in determining the student's Pell Grant duration of eligibility and Lifetime Eligibility Used (LEU) in accordance with section 401(c)(5) of the HEA (also see Dear Colleague Letter GEN-13-14 at <https://fsapartners.ed.gov/knowledge-center/library/dear-colleague-letters/2013-05-16/gen-13-14-subject-federal-pell-grant-duration-eligibility-and-lifetime-eligibility-used>).

- (3) *Postsecondary Education Scholarships for Veteran's Dependents (Iraq and Afghanistan Service Grant) (Assistance Listing 84.408)*

A non-Pell eligible student whose parent or guardian died as a result of US military service in Iraq or Afghanistan after September 11, 2001, can receive an IASG grant. The student must have been less than 24 years old or, if 24 years old or older, enrolled in an institution of higher education when the parent or guardian died. The amount of the grant is specified by ED annually. All other Pell requirements apply but, unlike Pell Grants, these non-need-based grants do not count as estimated financial assistance (20 USC 1070h; *FSA Handbook*, Volume 1, Chapter 6; and electronic announcement dated November 6, 2009 (<https://fsapartners.ed.gov/knowledge-center/library/electronic-announcements/2009-11-06/general-subject-operational-implementation-increased-title-iv-student-assistance-children-certain-deceased-members-us-military>)).

- (4) *Campus-Based Programs (FWS, FSEOG) (Assistance Listing 84.033, Assistance Listing 84.007)*

The maximum amount that can be awarded under the campus-based programs is equal to the student's financial need (COA minus EFC) minus aid from other SFA programs and other resources. For programs of study or enrollment periods less than or greater than an academic year, the COA for campus-based aid is based on the student's actual costs for the period for which need is being analyzed, rather than being prorated to the costs for a full-time student for a full academic year. The financial aid administrator has discretion in awarding amounts from each program, subject to certain limitations.

The FSEOG program provides grants to eligible undergraduate students who have not previously earned a bachelor's or first professional degree. Priority is given to Pell Grant recipients who have the lowest expected family contributions. The institution decides the amount of the grant, which can be up to \$4,000 but not less than \$100, for an academic year. The maximum amount may be increased to \$4,400 for a student participating in a study abroad program that is approved for credit by the student's home institution (34 CFR 676.10 and 676.20).

(5) *TEACH Grants (Assistance Listing 84.379)*

The TEACH Grant is a non-need-based grant that provides annual grants of up to \$4,000 to eligible undergraduate and graduate students who agree to teach specified high-need subjects at an elementary school, secondary school, or educational service agency serving primarily disadvantaged populations for four years within eight years of ceasing enrollment at the institution where they received their TEACH Grants. The aggregate amount of TEACH Grants that a student may receive for undergraduate or post-baccalaureate study may not exceed \$16,000. The aggregate amount that a graduate student may receive may not exceed \$8,000. If the student is enrolled less than full-time, including less than half-time, the amount of the annual TEACH Grant that he or she may receive must be reduced in accordance with 34 CFR 686.21. The amount of the TEACH Grant, in combination with other assistance the student may receive, may not exceed the cost of attendance. If the TEACH Grant and other aid exceeds the cost of attendance for an academic year, the student's aid package must be reduced. The TEACH Grant may replace a student's EFC, but the amount of the grant that exceeds the student's EFC is considered estimated financial assistance (34 CFR 686.21).

- Note: Under the Budget Control Act of 2011 sequester required reductions to TEACH Grant award amounts remain in effect for the 2022-2023 award year (awards first disbursed on or after

October 1, 2022, and before October 1, 2023). The Federal FY 2023 Sequester reduction is 5.70% from the TEACH Grant statutory maximum award amount of \$4,000. This is a dollar reduction of \$228, resulting in an adjusted maximum award amount of \$3,772.

(6) *Direct Loans (Assistance Listing 84.268)*

In determining loan amounts for Direct Subsidized Loans, the financial aid administrator subtracts from the COA, the EFC, and the EFA for the period of enrollment that the student (or parent on behalf of the student) will receive from federal, state, institutional or other sources. Direct Unsubsidized Loans, Direct PLUS Loans, TEACH Grants, loans made by an institution to assist the student, and state-sponsored loans may be used to replace the EFC (34 CFR 685.102(b)). A financial aid administrator may use professional judgment to offer dependent-level Direct Unsubsidized Loans (but no other Title IV aid) to a dependent student whose parents do not support the student and who refuse to complete a FAFSA (20 USC 1087(a)).

The annual loan limits apply to the length of the institution's academic year. Except for Direct PLUS loans and Direct Unsubsidized Loans made to graduate or professional students, proration of the annual loan limit is required when a program is less than an academic year as measured in either clock hours or credit hours or number of weeks; or when a program exceeds an academic year but the remaining portion of the program is less than an academic year in length. For the purpose of determining annual loan limits for a borrower who received an associate or bachelor's degree and has re-enrolled in another eligible program for which the prior degree is a prerequisite, the grade level determination includes the number of years that a student has completed in the previously completed program of undergraduate study.

Annual Limits for Direct Subsidized Loans and Direct Unsubsidized Loans

Direct Subsidized Loans and Direct Unsubsidized Loans have annual loan limits that vary based on the student's grade level and (for Direct Unsubsidized Loans) dependency status (34 CFR 685.203). The annual loan limit is the maximum amount that a student may receive for an academic year.

For undergraduate students there is a combined annual loan limit for Direct Subsidized Loans and Direct Unsubsidized Loans, of

which not more than a specified amount may be comprised of Direct Subsidized Loans (“annual subsidized maximum”).

For dependent undergraduate students (excluding dependent undergraduates whose parents are unable to borrow Direct PLUS Loans), the combined Direct Subsidized Loan and Direct Unsubsidized Loan annual loan limits are (34 CFR 685.203(a) and (b):

- \$5,500 for **dependent first-year undergraduates**, not more than \$3,500 of which may be subsidized;
- \$6,500 for **dependent second-year undergraduates**, not more than \$4,500 of which may be subsidized; and
- \$7,500 for **dependent third-, fourth-, and fifth-year undergraduates**, not more than \$5,500 of which may be subsidized.

For independent undergraduate students (and for dependent undergraduate students whose parents are unable to obtain Direct PLUS Loans), the annual loan limits are (34 CFR 685.203(a) and (c):

- \$9,500 for **independent first-year undergraduates**, not more than \$3,500 of which may be subsidized;
- \$10,500 for **independent second-year undergraduates**, not more than \$4,500 of which may be subsidized; and
- \$12,500 for **independent third-, fourth-, and fifth-year undergraduates**, not more than \$5,500 of which may be subsidized.

Note that the annual subsidized maximum is the same for both dependent and independent undergraduate students. However, the combined subsidized/unsubsidized annual loan limits are higher for independent undergraduates and for dependent undergraduates whose parents are unable to borrow Direct PLUS Loans.

An undergraduate student who is not eligible for a Direct Subsidized Loan may receive up to the total combined subsidized/unsubsidized annual loan limit in Direct Unsubsidized Loans.

For undergraduate students, the annual loan limit must be prorated if the student is enrolled in a program (or in the remaining portion of a program) that is less than an academic year in length. (For

details on loan proration requirements, see Volume 3, Chapter 5, of the *FSA Handbook*. The *FSA Handbook* is available at <https://fsapartners.ed.gov/knowledge-center/fsa-handbook>.)

For graduate and professional degree students, there is an annual loan limit only for Direct Unsubsidized Loans (graduate and professional students are not eligible to receive Direct Subsidized Loans). The annual loan limit for graduate and professional students is \$20,500 in Direct Unsubsidized Loans (34 CFR 685.203(b)(2)(iii) and 685.203(c)(2)(v)).

There are higher Direct Unsubsidized Loan annual loan limits for graduate and professional students who are enrolled in certain health professions programs. (For details on the increased annual loan limits for certain health professions students, see Volume 3, Chapter 5, of the *FSA Handbook*. The *FSA Handbook* is available at <https://fsapartners.ed.gov/knowledge-center/fsa-handbook>.)

Aggregate Loan Limits for Direct Subsidized Loans and Direct Unsubsidized Loans

Under 34 CFR 685.203(d) and (e) the aggregate loan limits for Direct Subsidized Loans and Direct Unsubsidized Loans (a borrower's maximum allowable outstanding loan debt, excluding capitalized interest, but including amounts borrowed under the Federal Family Education Loan program prior to 2010) are:

- \$31,000 for **dependent undergraduate students** (except for dependent students whose parents are unable to borrow Direct PLUS Loans), not more than \$23,000 of which may be subsidized;
- \$57,500 for **independent undergraduate students** (and for dependent students whose parents are unable to borrow Direct PLUS Loans, not more than \$23,000 of which may be subsidized; and
- \$138,500 for **graduate and professional students**, not more than \$65,500 of which may be subsidized. The total \$138,500 limit includes loans for undergraduate study. The \$65,500 subsidized maximum includes subsidized loans received for undergraduate study and subsidized loans received by graduate and professional students for periods of enrollment beginning before July 1, 2012, when graduate and professional students were eligible to receive subsidized loans.

Direct PLUS (PLUS)

Direct PLUS Loans are available to parents of dependent undergraduate students and to graduate and professional students (34 CFR 685.200(b) and (c)(2)). A parent or graduate/professional student with an adverse credit history is prohibited from obtaining a Direct PLUS Loan unless he or she meets additional criteria. A parent must meet the same citizenship and residency requirements as a student. Similarly, a parent who owes a refund on an SFA grant or is in default on an SFA loan is ineligible for a PLUS loan unless satisfactory arrangements have been made to repay the grant or loan.

There are no fixed annual or aggregate loan limits for Direct PLUS Loans. A Direct PLUS loan may not exceed the student's cost of attendance minus other financial aid awarded during the period of enrollment for that student (34 CFR 685.101(b), 685.200, and 34 CFR 685.203(f), (g), (h) and (j) also apply).

b. *HHS Programs*

In determining the financial resources available for the HHS programs, the institution must use one of the need analysis systems or any other procedures approved by the secretary of education. The institution must also take into account other information that it has regarding the student's financial status. For the HHS programs, the costs reasonably necessary for the student's attendance include any special needs and obligations which directly affect the student's ability to attend the institution. The institution must document the criteria used for determining these costs (HPSL, PCL, and LDS, 42 CFR 57.206; NSL, 42 CFR 57.306(b)); NFLP, Affordable Care Act, Section 5311, and Program Guidance).

Health Professions Student Loans/Primary Care Loans/Loans for Disadvantaged Students (Assistance Listing 93.342), Nursing Student Loans (Assistance Listing 93.364)

For periods prior to November 13, 1998, the total amount of HPSL/PCL/LDS loans made to a student for a school year may not exceed \$2,500 plus the cost of tuition (42 CFR 57.207). For students who are applying for a HPSL/PCL/LDS loan, the institution must make its selection based on the order of greatest financial need, taking into consideration the other resources available to the student. The resources may include summer earnings, educational loans, veteran (GI) Benefits, and earnings during the institution year (HPSL/PCL/LDS, 42 CFR 57.206(c)). For periods after November 13, 1998, the total amounts of HPSL/PCL/LDS loans to a student for an institution year may not exceed the cost of attendance (including tuition, other reasonable educational

expenses, and reasonable living expenses). The amount of the loan may, in the case of the third or fourth year of a student at an institution of medicine or osteopathic medicine, be increased to pay balances of loans that were made to the individual for attendance at the institution (42 CFR 57.210; Pub. L. No. 105-392, 134 (1) and (2)). The total amount of NSL loans made to a student for an academic year may not exceed \$3,300 except that for each of the final two academic years of the program the total must not exceed \$5,200. The total of all NSL loans may not exceed \$17,000 (Section 5202 (a) of the Affordable Care Act).

(1) *Nurse Faculty Loan Program (NFLP) (Assistance Listing 93.264)*

The total amount of NFLP loans made to a student for an institution year may not exceed \$35,500 for a maximum of five years to support the cost of tuition, fees, books, laboratory expenses and other reasonable education expenses. NFLP loans do not include stipend support (i.e., living expenses, student transportation cost, room/board, personal expenses). For students who are applying for a NFLP loan, the student must be enrolled full-time or part-time in an eligible graduate (master's and doctoral) nursing education program at the institution. The institution must make its selection of NFLP student applicants to receive loan funds by taking into consideration the other resources available to the student. Section 847(f) added a funding priority for sections 847 and 846A of the PHS Act. This funding priority is awarded to the institution of nursing student loan funds that support doctoral nursing students. Institutions that receive the doctoral funding priority should fund new doctoral student applicants ahead of new master's student applicants (Title VIII, Section 846A, PHS Act, as amended by the Patient Protection and Affordable Care Act of 2010, Pub. L. No.111-148, Section 5311).

(2) *Scholarships for Disadvantaged Students (Assistance Listing 93.925)*

Individual student awards must be at least 50 percent of the student's annual tuition costs. The maximum amount of \$30,000 must be awarded for students whose tuition is more than \$60,000; however, no student can be awarded SDS funds greater than \$30,000 in a given year. Scholarships will be awarded by institutions to any full-time student who is from a disadvantaged background; has a financial need for a scholarship; and is enrolled (or accepted for enrollment) in a program leading to a degree in a health profession or nursing. Such scholarships may be expended only for tuition expenses, other reasonable educational expenses, and reasonable living expenses incurred in the attendance of such institution (42 USC 293a; Section 737, PHS Act).

L. Reporting**1. Financial Reporting**

- a. *SF-270, Request for Advance or Reimbursement (Form 270, Request for Title IV Reimbursement or Heightened Cash Monitoring 2 [OMB No. 1845-0089])* – Not Applicable..
- b. *SF-271, Outlay Report and Request for Reimbursement for Construction Programs* – Not Applicable
- c. *SF-425, Federal Financial Report* – Not Applicable
- d. *Common Origination and Disbursement (COD) System (OMB No. 1845-0039).*

SFA – Title IV Programs

Institutions submit Direct Loan, Pell Grant, TEACH Grant, and IASG origination records and disbursement records to the COD system. Origination records can be sent well in advance of any disbursements, as early as the institution chooses to submit them for any student the institution reasonably believes will be eligible for a payment. An institution follows up with a disbursement record for that student no earlier than (1) seven calendar days prior to the disbursement date under the Advance or Heightened Cash Monitoring 1 payment methods, or (2) the date of the disbursement under the Reimbursement or Heightened Cash Monitoring 2 Payment Method (see [Federal Register, Volume 86, Number 119, June 24, 2021](#)). The disbursement record reports the actual disbursement date and the amount of the disbursement. ED processes origination and/or disbursement records and returns acknowledgments to the institution. The acknowledgments identify the processing status of each record: Rejected, Accepted with Corrections, or Accepted. In testing the origination and disbursement data, the auditor should be most concerned with the data ED has categorized as accepted or accepted with corrections. Institutions must report student disbursement data within 15 calendar days after the institution makes a disbursement or becomes aware of the need to make an adjustment to previously reported student disbursement data or expected student disbursement data. Institutions may do this by reporting once every 15 calendar days, bi-weekly or weekly, or may set up their own system to ensure that changes are reported in a timely manner.

Key items to test on origination records, if applicable, are: Social Security number, award amount, enrollment date, verification status code (when the applicant is selected for verification), transaction number, cost of attendance, and the “Academic Start Date” and “Academic End Date”. Key items to test on disbursement records are disbursement date and amount. The information may be accessed by the institution for the auditor (34 CFR 690.83; *FSA Handbook*, technical references on obtaining reports for each award year are located at <https://fsapartners.ed.gov/knowledge-center/library/system-technical-references/2020-11-24/2021-2022-cod-technical-reference> COD Technical Reference; choose the award year, Volume VI, appendices, Section 7).

2. Performance Reporting

Not Applicable

3. Special Reporting

ED Form 646-1, Fiscal Operations Report and Application to Participate (FISAP) (OMB No. 1845-0030) – This electronic report is submitted annually to receive funds for the campus-based programs. The institution uses the *Fiscal Operations Report* portion to report its expenditures in the previous award year and the *Application to Participate* portion to apply for the following year. By October 1, 2022, the institution should submit its FISAP that includes the *Fiscal Operations Report* for the award year 2021–2022 and the *Application to Participate* for the 2022–2023 award year (FWS, FSEOG 34 CFR 673.3; *Fiscal Operations Report and Application to Participate Instructions*).

Key Line Items – The following line items contain critical information:

Part I, Identifying Information, Certification, and Warning

Part II, Application to Participate

- Information on enrollment
- Assessments and expenditures
- Information on eligible aid applicants

Part III, Fiscal Operations Report

- All sections

Part IV, Fiscal Operations Report Federal Supplemental Educational Opportunity Grant (FSEOG) Program

- All sections

Part V, Fiscal Operations Report Federal Work-Study (FWS) Program

- All sections

Part VI, Program Summary for Award Year

- Distribution of Program Recipients and Expenditures by Type of Student (trace a sample of line items)

4. Special Reporting for Federal Funding Accountability and Transparency Act

Not Applicable

N. Special Tests and Provisions

1. Verification

Compliance Requirements An institution is required to establish written policies and procedures that incorporate the provisions of 34 CFR 668.51 through 668.61 for verifying applicant information for those applicants selected for verification by ED. The institution shall require each applicant whose application is selected by ED to verify the information required for the Verification Tracking Group to which the applicant is assigned.

However, certain applicants are excluded from the verification process as listed in 34 CFR 668.54(b). A menu of potential verification items for each award year is published in the *Federal Register*, and the items to verify for a given application are selected by ED from that menu and indicated on the student's output documents. Verification tracking groups and verification items for each award year can also be found in the annual *FSA Handbook*, Application and Verification Guide, Chapter 4. The institution shall also require applicants to verify any information used to calculate an applicant's EFC that the institution has reason to believe is inaccurate and provide an accurate code for the individual's verification status in the COD system. (34 CFR 668.54(a); *FSA Handbook* Application and Verification Guide, Chapter 4).

Note: For the 2022-2023 award year, the requirement for verification of most FAFSA[®]/ISIR information was again waived by ED due to the COVID-19 national emergency, except for Identity/Statement of Educational Purpose and High School Completion Status under Verification Tracking Groups V4 and V5, as outlined in Dear Colleague Letter [GEN-22-06](#). However, this waiver does not exempt institutions from resolving conflicting information if concerns arise. For 2023-2024, the same waiver was not extended, but there were some modifications for incarcerated students as outlined in [GEN-22-09](#).

Audit Objectives Determine whether the institution established policies and procedures to verify information in student aid applications for students selected for verification by ED.

Determine whether the institution conducted verifications of selected applications, made corrections, and reported the verification status in COD, as applicable, in accordance with the requirements.

Suggested Audit Procedures

- a. Review the institution's policies and procedures for verifying student applications selected for verification by ED and verify that they meet the requirements of 34 CFR 668.53.
- b. Select a sample of applications that were selected for verification by ED and review the student aid files for those applications to ascertain that the institution (1) obtained acceptable documentation to verify the information required for the Verification Tracking Group to which the applicant is assigned; (2) matched information on the documentation to the student aid application; (3) if necessary, submitted data corrections to the central processor and recalculated awards and (4) correctly coded the student's verification status in COD for Pell Grants.

2. Disbursements to or on Behalf of Students

With the exception of FWS, disbursements are made on a payment period basis and the disbursement must be made during the current payment period (34 CFR 668.164(b)(1)). For purposes of testing Title IV deadlines or timeframes, "days" refers to calendar days unless the requirement specifies "business days."

An Institution must define the payment period for each program. There are three types of payment periods that an institution may use—payment periods that measure progress in credit hours and use standard terms; payment periods that measure progress in credit hours and use non-standard terms; and payment periods that measure progress in credit hours and do not have academic terms or for a program that measures progress in clock hours (34 CFR 668.4 Payment period). An institution may make early or late disbursements under limited circumstances provided for at 34 CFR 668.164 sections (i), (j), and (k).

A standard or non-standard program can also be a subscription-based program. A subscription-based program is a standard or nonstandard term program in which the institution charges a student for each term on a subscription basis with the expectation that the student will complete a specified number of credit hours (or the equivalent) during that term. However, classes in a subscription-based program are not required to begin or end within a specific timeframe in each term. Students must complete a cumulative number of credit hours (or the equivalent) during or following the end of each term before receiving subsequent disbursements of title IV, HEA program funds. An institution establishes an enrollment status (for example, full-time or half-time) that will apply to a student throughout the student's enrollment in the program, except that a student may change his or her enrollment status no more often than once per academic year.

Except for the fact that classes are not required to start and end within a term, the rules and requirements for term-based programs that are not subscription-based also apply to subscription-based programs. For more information about subscription-based programs, please see the FSA Handbook, Volume 3.

An institution may credit a student's ledger for only allowable costs and, unless on the reimbursement or Heightened Cash Monitoring 1 or 2 payment method, with the student or parent's authorization, retain a credit balance for each disbursement. An institution on the reimbursement or Heightened Cash Monitoring 1 or 2 payment method must disburse credit balances to students whether or not the institution has an authorization to hold the credit balance and must disburse the credit balance to the student prior to requesting funds from ED.

Note: Due to COVID-19, IHEs that are on HCM1 under section 668.162(d)(1), the secretary temporarily modified the cash management requirements to permit those institutions to submit a request for funds without first paying the credit balances due to the students for whom those funds were requested. This flexibility extends through the end of the payment period that begins after the date on which the federally declared national emergency related to COVID-19 is rescinded.

- a. The payment period for a student enrolled in an eligible program that measures progress in credit hours and has standard academic terms (semesters, trimesters, or quarters), or has non-standard terms that are substantially equal in length, is the academic term (34 CFR 668.4(a)). (Non-standard terms are substantially equal in length if no term is more than two weeks of instructional time longer than any other term (34 CFR 668.4(h)).
- b. The payment period for a student enrolled in an eligible program that measures progress in credit hours and uses non-standard terms that are not substantially equal in length is as follows (34 CFR 668.4(b)):
 - (1) For Pell Grant, IASG, FSEOG, and TEACH Grants, the payment period is the academic term.
 - (2) For Direct Loans,
 - (a) If the program is one academic year or less in length (i) the first payment period is the period of time in which the student successfully completes half the number of credit hours in the program and half the number of weeks of instructional time in the program, and (ii) the second payment period is the period of time in which the student completes the program.
 - (b) If the program is more than one academic year in length—
 - (i) For the first academic year and any subsequent full academic year:

- (A) The first payment period is the period of time in which the student successfully completes half the number of credit hours in the academic year and half the number of weeks of instructional time in the academic year; and
 - (B) The second payment period is the period of time in which the student completes the academic year.
- (ii) For any remaining portion of an eligible program that is more than half, but less than a full, academic year in length:
- (A) The first payment period is the period of time in which the student successfully completes half the number of credit hours in the remaining portion of the program and half the number of weeks of instructional time in the remaining portion of the program; and
 - (B) The second payment period is the period of time in which the student successfully completes the remainder of the program.

Please note: for a remaining portion to be more than half of an academic year, both measurements (hours and weeks) must exceed half of the institution's academic year definition.

- (iii) For any remaining portion of an eligible program that is not more than half an academic year, the payment period is the remainder of the program. In order for a remaining portion to be more than half of an academic year, both measurements (hours and weeks) must exceed half of the institution's academic year definition. If only one measurement (or neither) exceed half of the institution's academic year definition, the remaining portion is the final payment period.
- c. The payment period for a student enrolled in an eligible program that measures progress in credit hours and does not have academic terms or for a program that measures progress in clock hours (34 CFR 668.4(c)):
- (1) If the program is one academic year or less in length (a) the first payment period is the period of time in which the student successfully completes half the number of credit or clock hours in the program and half the number of weeks instructional time in the program; and (b) the second payment period is the period of time in which the student successfully completes the program.

- (2) If the program is more than one academic year in length—
- (a) For the first academic year and any subsequent full academic year (i) the first payment period is the period of time in which the student successfully completes half the number of credit or clock hours in the academic year and half the number of weeks of instructional time in the academic year, and (ii) the second payment period is the period of time in which the student successfully completes the academic year.
 - (b) For any remaining portion of an eligible program that is more than half (both measurements of hours and weeks exceed the institution's academic year definition) but less than a full academic year in length (i) the first payment period is the period of time in which the student successfully completes half the number of credit or clock hours in the remaining portion of the program and half the number of weeks of instructional time in the remaining portion of the program, and (ii) the second payment period is the period of time in which the student successfully completes the remainder of the program.
 - (c) For any remaining portion of an eligible program that is not more than half an academic year (only one or neither measurement of hours and weeks exceed the institution's academic year definition), the final payment period is the remainder of the program.

If an institution is unable to determine when a student has successfully completed half of the credit hours in a program, academic year, or remainder of a program, the student is considered to begin the second payment period of the program, academic year, or remainder of a program at the later of (i) the date the institution determines the student has completed half of the academic coursework in the program, academic year, or remainder of the program; or (ii) half the number of weeks of instructional time in the program, academic year, or remainder of the program (34 CFR 668.4(c)(3)).

If a student withdraws from a credit-hour program that does not have academic terms or a clock-hour program during a payment period and reenters the same program within 180 days, the student remains in that same payment period upon reentry and is eligible to receive, subject to conditions established by ED, any Title IV funds for which they were eligible for prior to withdrawal, including funds returned as a result of a Return of Title IV Aid calculation (34 CFR 668.4(f)).

If a student withdraws from a credit-hour program that does not have academic terms or a clock-hour program during a payment period and reenters the same program after 180 days or transfers into another program (either at the same institution or at a different institution) at any time, the student generally starts a new payment period (34 CFR 668.4(g)). (See exception to this general rule in 34 CFR 668.4(g)(3).)

Timing and Appropriateness of Disbursements

As described in 34 C.F.R. § 668.164(c), institutions may credit (charge) a student's ledger account with Title IV funds to pay for allowable charges associated with the payment period and prior year charges of not more than \$200, in accordance with the timeframes described below. A prior year is any loan period or award year prior to the current loan period or award year, as applicable. Institutions may include the cost of books and supplies as allowable charges, provided that the requirements in 34 C.F.R. § 668.164(c)(2) are met.

Except as discussed below, the earliest an institution may disburse SFA funds (other than FWS) (either by paying the student directly or crediting the student's account) is:

- For students enrolled in credit-hour programs with terms that are substantially equal in length (excluding subscription-based programs), 10 days before the first day of classes of the payment period or module for which the disbursement is intended (34 CFR 668.164(i)(1)(i)).
- For students enrolled in credit-hour programs with terms that are not substantially equal in length (excluding subscription-based programs), non-term credit-hour programs, or clock-hour programs, the later of:
 - 10 days before the first day of classes of a payment period, or
 - The date the student completed the previous payment period for which they received Title IV funds.
- For students enrolled in subscription-based programs, the later of:
 - 10 days before the first day of classes of a payment period, or
 - The date the student completed the cumulative number of credit hours associated with the student's enrollment status in all prior terms that the student attended under the definition of a subscription-based program in 34 CFR 668.2.

If an institution credits a student's account with its own funds (i.e., funds not drawn down from ED) earlier than 10 days before the first day of classes, ED considers that the institution made that disbursement on the tenth day before the first day of classes (34 CFR 668.164(a)(2)(ii)).

There are exceptions to this 10-day rule for Direct Loans and FWS:

- An institution may not make a disbursement of a Direct Loan to a first-year undergraduate who is a first-time borrower until 30 days after the first day of classes of the payment period (34 CFR 668.164(i)(2)(i) and 34 CFR 685.303(b)(5)). However, an institution is not subject to this delayed disbursement requirement for first-year, first-time borrowers if:

- The institution has a cohort default rate of less than 15 percent for each of the three most recent fiscal years for which data are available does not have to wait the 30 days, or
- The institution is an eligible home institution originating a loan to cover the student's cost of attendance in a study-abroad program and has a cohort default rate of less than 5 percent for the single most recent fiscal year for which data are available does not have to wait the 30 days (34 CFR 685.303(b)(5)(i)(A) and (B)).

If an institution credits the account of a student who is subject to the 30-day delayed disbursement requirement for Direct Loans with its own funds (i.e., funds not drawn down from ED) earlier than 30 days before the first day after the beginning of the payment period, ED considers that the institution made that disbursement on the 30th day after the beginning of the payment period (34 CFR 668.164(a)(2)(i)).

- An institution may not compensate a student employed under the FWS program until the student earns that compensation (34 CFR 675.16(a)(5)).

Notification of Disbursements

Prior to making a disbursement, the school must notify students of the amount and type of Title IV funds they are expected to receive, and how and when those disbursements will be made (often referred to as an award letter or college financing plan) (34 CFR 668.165(a)(1)).

Additionally, when Direct Loans or TEACH funds are being credited to a student's account, the institution must notify the student, or parent, in writing of (1) the date and amount of the disbursement; (2) the student's right, or parent's right, to cancel all or a portion of that loan or loan disbursement and have the loan proceeds returned to the holder of that loan or the TEACH Grant payments returned to ED; and (3) the procedure and time by which the student or parent must notify the institution that he or she wishes to cancel the loan, TEACH Grant, or TEACH Grant disbursement (a minimum of 14 or 30 days depending on confirmation process). The notification requirement for loan funds applies only if the funds are disbursed by EFT payment or master check (34 CFR 668.165). Institutions that implement an affirmative confirmation process (as described in 34 CFR 668.165 (a)(6)(i)) must make this notification to the student or parent no earlier than 30 days before, and no later than 30 days after, crediting the student's account at the institution with Direct Loan or TEACH Grants. Institutions that do not implement an affirmative confirmation process must notify a student no earlier than 30 days before, but no later than seven days after, crediting the student's account and must give the student 30 days (instead of 14) to cancel all or part of the loan.

Credit Balances

When Title IV funds are credited to a student account and they exceed the amount of tuition and fees, room and board, and other authorized charges assessed the student, a credit balance is created. The institution must pay the resulting credit balance directly to the student or parent borrower within 14 days after (1) the first day of class of a payment period if the credit balance occurred on or before that day, or (2) the balance occurred if that was after the first day of class.

An institution is permitted to hold credit balances if it obtains a voluntary authorization from the student. Regardless of any authorization obtained by the institution, the institution must pay any remaining loan balance by the end of the loan period and any other remaining Title IV funds by the end of the last payment period in the award year for which the funds were awarded.

Institutions on reimbursement or heightened cash monitoring payment methods generally cannot maintain credit balances, even with written authorization. However, because of the COVID-19 pandemic, ED temporarily permitted institutions on the HCM1 payment method to submit a request for funds without first paying credit balances due. This flexibility goes through the end of the payment period that begins after the date that the COVID-19 national emergency ends.

Returning Funds After 240 Days

Note: As outlined under 34 CFR 668.164(1), an institution must have a process that ensures SFA funds never escheat to a state or revert to the institution or any other third party. A failure to have such a process in place would call into question an institution's administrative capability, its fiscal responsibility, and its system of internal controls required under the FSA regulations.

Pell

To disburse Pell funds, the institution must have received a valid ISIR from the central processor by the earlier of the student's last date of enrollment or the deadline date established by the secretary in a notice published in the *Federal Register* (the deadline date is normally in the month of September following the end of the award year). Late disbursements of Pell for students that are now ineligible (e.g., no longer enrolled) are allowed if, before the date the student became ineligible, an ISIR or SAR was processed that contained an official EFC. The institution has discretion in disbursing funds within a payment period, but generally must disburse the full amount before the end of the payment period.

When making a late disbursement or retroactive payment of Pell for a completed period, an institution determines a student's enrollment status for the completed period based only on the hours completed by the student for that period (34 CFR 690.76(b)).

The institution must review and document the student's eligibility before it disburses funds each payment period (34 CFR 690.61, 690.75, 690.76, and 668.164(b)(3)). (Requirements for student eligibility are found in Appendix A.)

IASG

IASG disbursements follow Federal Pell Grant regulations (20 USC 1070h). (Requirements for student eligibility are found in Appendix A.)

TEACH Grant

To disburse TEACH Grant funds, the institution must ensure that the student (a) is eligible (per 34 CFR 686.11), (b) has completed the initial or subsequent counseling (required by 34 CFR 686.32), (c) has signed an agreement to serve or repay (required by 34 CFR 686.12), (d) is enrolled in a TEACH Grant-eligible program, and (e) if enrolled in a credit-hour program without terms or a clock-hour program, has completed the payment period, as defined in 34 CFR 668.4, for which he or she will be paid a grant (34 CFR 686.31). (Requirements for student eligibility are found in Appendix A.)

When making a late disbursement or retroactive payment of TEACH Grant funds for a previously completed period, an institution determines a student's enrollment status for the completed period based only on the hours completed by the student for that period (34 CFR 686.33(b)).

Direct Loan

Except in the case of an allowable late disbursement (34 CFR 685.303(d)), before disbursing the loan proceeds, the institution must determine that the student maintained continuous eligibility from the beginning of the loan period. In order for an institution to disburse Direct Loan funds to a student, the student must generally be enrolled at least half-time as a regular student. However, a student may be eligible to receive Direct Loan funds if the student is enrolled at least half-time in preparatory coursework for no longer than a 12-month consecutive period under 668.32(a)(1)(ii) and 685.203(a)(6). Students may also be eligible for Direct Loan funds if they are enrolled at least half-time in teacher certification coursework under 34 CFR 685.203(a)(7).

An institution under the advance payment method may not disburse loan proceeds until they have obtained a legally enforceable promissory note. An institution under reimbursement or cash monitoring payment method must have obtained a legally enforceable promissory note and may request funds only for those that they have already disbursed funds to students (34 CFR 685.301 and 685.303). (See III.C, "Cash Management," for discussion of payment methods.) (Requirements for student eligibility are found in Appendix A.)

FWS

The student's wages are earned when the work is performed. The institution shall ensure that the student is paid at least once per month. The federal share must be paid by check

or similar instrument the student can cash on his or her endorsement, or as authorized by the student, by crediting FWS funds to a student's account or by EFT to a bank account designated by the student. The institution may only credit the account for tuition, fees, institutional room and board, and other institution-provided goods and services (34 CFR 675.16). (Requirements for student eligibility are found in Appendix A.)

HHS Programs

HPSL/PCL/LDS and NSL

Student loans may be paid to or on behalf of student borrowers in installments considered appropriate by the school, except that a school may not pay to or on behalf of any borrowers more than the school determines the student needs for any given installment period (e.g., semester, term, or quarter). However, the amount of the loan may be increased in the case of the third or fourth year of a student at a school of medicine or osteopathic medicine to pay balances of loans that were made to the individual for attendance at the school (42 USC 292r(a)(2); Section 722r(a)(2) of the PHS Act; Pub. L. No. 105-392, Section 134(a)(2)). At the time of payment, a HPSL/PCL/LDS borrower must be a full-time student, a NSL borrower must be at least a half-time student (HPSL/PCL/LDS, 42 CFR 57.209; NSL, 42 CFR 57.309). Each student loan must be evidenced by a properly executed promissory note (HPSL/PCL/LDS, 42 CFR 57.208; NSL, 42 CFR 57.308).

Nurse Faculty Loan Program (NFLP) (Assistance Listing 93.264)

NFLP loans may be paid to or on behalf of student borrowers in installments considered appropriate by the school, except that a school may not pay to or on behalf of any borrowers more than the school determines the student needs for any given installment period (e.g., semester, term, or quarter). At the time of payment, a NFLP borrower must be enrolled full-time or part-time. Each student loan must be evidenced by a properly executed promissory note (Program Guidance, Repayment Provision).

Audit Objectives Determine if the institution (1) followed ED requirements for timing and appropriateness of disbursements, (2) made appropriate and timely disbursement notifications, (3) complied with requirements for returning credit balances, and (4) returned to ED funds that it attempted to disburse after 240 days.

Determine whether disbursements to students were made or returned to HHS in accordance with required time frames; and whether required reviews were made and required documents and approvals were obtained before disbursing HHS funds.

Suggested Audit Procedures

For ED programs

- a. For a sample of student disbursements, identify the student's payment period and each disbursement date. Ascertain if the disbursement was made in accordance with the disbursement timing requirements and if the amount credited (charged)

to student ledger accounts complied with the requirements for allowable current year and prior year charges.

- b. For the disbursements selected in step a., determine whether the institution provided notification to the student of the amount and type of Title IV funds they are expected to receive and how and when those disbursements will be made.
- c. For Direct Loan or TEACH grant disbursements selected in step a., determine if the institution provided timely notification to the student of the (1) the date and amount of the disbursement; (2) the student/parent's right to cancel; and (3) the procedure and time by which the student or parent must notify the institution that he or she wishes to cancel.
- d. For the disbursements selected in step a., that created a credit balance, determine if the credit balance was paid to the student or parent borrower (1) within 14 days or (2) if the institution obtained an authorization to hold credit balances and was not on the reimbursement or heightened cash monitoring payment methods (except for HCM1 institutions for the period covered by the COVID-19 flexibilities), by the end of the loan period or last payment period in the award year for which the funds were awarded.

For HHS Programs

- e. Review loan or other files to verify that the institution performed required procedures and obtained required documents prior to disbursing funds.

3. Using a Servicer or Financial Institution to Deliver Title IV Credit Balances to a Card or Other Access Device

Compliance Requirements: An institution may enter into an arrangement with a servicer or a financial institution to make a direct payment of FSA credit balances to students through electronic funds transfer to a bank account designated by a student or parent, to issue a check payment to the student or to use an access device such as a debit, demand, or smart card provided by the servicer or its financial partner.

Regulations at 34 CFR 668.164(e) and (f) establish two different types of arrangements between schools and financial account providers: Tier One arrangements and Tier Two arrangements. The type of arrangement determines the provisions that are applicable to the school.

Tier One Arrangement

A Tier One arrangement is an arrangement between a school and a third-party servicer, under which the servicer performs one or more of the functions associated with processing direct payments of Title IV funds on behalf of the school, and the school or third-party servicer makes payments to one of the following:

- One or more financial accounts that are offered to students under the contract;
- A financial account where information about the account is communicated directly to students by the third-party servicer, or the school on behalf of or in conjunction with the third-party servicer; or
- A financial account where information about the account is communicated directly to students by an entity contracted or affiliated with the third-party servicer. (34 CFR 668.164(e)(1)).

Examples of functions associated with processing direct payments of Title IV funds on behalf of the school include: receiving Title IV funds; posting Title IV funds to student accounts; calculating a student's Title IV credit balance; processing documents for direct payment to students; and disbursing or delivering FSA funds.

Tier Two Arrangement

A Tier Two arrangement is an arrangement between a school and a financial institution, or entity that offers financial accounts through a financial institution, under which financial accounts are offered and marketed directly to students (34 CFR 668.164(f)(1)). ED considers that a financial account is marketed directly if: (a) the school communicates information directly to its students about the financial account and how it may be opened; (b) the financial account or access device is cobranded with the school's name, logo, mascot, or other affiliation and is marketed principally to students at the institution; or (c) a card or tool that is provided to the student for school purposes, such as a student ID card, is validated, enabling the student to use the device to access a financial account (34 CFR 668.164(f)(3)).

The requirements applicable to schools with Tier Two arrangements differ depending on whether the school meets certain thresholds. If, in the school's prior three award years, the school had an average 500 or more students, or an average of 5 percent or more of its enrollment, receiving credit balances, then the school must comply with additional provisions (34 CFR 668.164(f)(2)(i) and (ii)).

Required Disclosures

A school must disclose conspicuously on its Web site the contract(s) establishing the Tier One or Tier Two arrangement, except for any portions that, if disclosed, would compromise personal privacy, proprietary information technology, or the security of information technology or of physical facilities (34 CFR 668.164(e)(2)(vi) and 668.164(f)(4)(iii)).

Schools with Tier One arrangements or Tier Two arrangements above the threshold must also disclose on their Web site: (a) the total consideration for the year, monetary and non-monetary, paid or received by the parties under the terms of the contract; (b) for any year in which the school's enrolled students open 30 or more financial accounts under the arrangement, (i) the number of students who had financial accounts under the contract at

any time during the most recently completed award year, and (ii) the mean and median of the actual costs incurred by those account holders. This disclosure must be updated within 60 days after the end of each award year.

A school must also provide to ED an up-to-date URL for the contract for publication in a centralized database accessible to the public. Unless the school has a Tier Two arrangement under the threshold, the URL must also include the contract data described in the paragraph above (34 CFR 668.164(e)(2)(viii); 668.164(f)(4)(iii)(B); 668.164(f)(4)(v)).

For additional details, see [Electronic Announcement Dated July 1, 2016](#); Cash Management Electronic Announcement #2: Posting Contract Information and Providing Contract URL to the Department of Education and [Electronic Announcement Dated June 16, 2017](#); Cash Management Electronic Announcement #7: Tier One and Tier Two Contract Data Reporting Format

Other Requirements of Tier One and Tier Two Arrangements

Schools have a series of obligations to ensure that students are protected when they enter into a Tier One or Tier Two arrangement:

- *Student Choice*: All Tier One and Tier Two schools must establish a selection process under which the student chooses one of several options for receiving payments by electronic funds transfer. (34 CFR 668.164(d)(4)(i))
- *Student Consent*: All Tier One and Tier Two schools must ensure that the student's consent to open the financial account is obtained before an access device, or any representation of an access device, is sent to the student, except that a school may send the student an access device that is a card provided to the student for school purposes, such as a student ID card, so long as the school or financial institution obtains the student's consent before validating the device to enable the student to access the financial account (34 CFR 668.164(e)(2)(i) and 668.164(f)(4)(i)(B)).
- *Terms and Conditions*: All Tier One and Tier Two schools must inform the student of the terms and conditions of the financial account before the financial account is opened (34 CFR 668.164(e)(2)(iii) and (f)(4)(ii)).
- *Credit Cards and Extending Credit*: All Tier One and Tier Two schools must ensure that financial accounts are not marketed or portrayed as, or converted into, credit cards. (34 CFR 668.164(e)(2)(v) and (f)(4)(vii)). Tier One schools must also ensure that no credit is extended or associated with the financial account (34 CFR 668.164(e)(2)(v)(B)).
- *Student Costs*: All Tier One and Tier Two schools must ensure that the student does not incur any cost for opening the financial account or initially receiving an access device. (34 CFR 668.164(e)(2)(iv)(B)(1) and (f)(4)(x)). Tier One schools

must also ensure that the student does not incur costs for conducting point-of-sale transactions in a State or conducting a balance inquiry or withdrawal of funds at an ATM in a State that belongs to the surcharge-free regional or national network (34 CFR 668.164(e)(2)(iv)(B)). Tier One schools must also ensure no fee is charged to the student for any transaction or withdrawal that exceeds the balance in the financial account or on the access device, except that a transaction or withdrawal that exceeds the balance may be permitted only for an inadvertently authorized overdraft, so long as no fee is charged to the student for such inadvertently authorized overdraft (34 CFR 668.164(e)(2)(v)(B)).

- *Student Access:* Tier One schools and any Tier Two schools above the threshold must ensure that the student has access to the funds in the financial account through a surcharge-free Automated Teller Machines (ATMs) sufficient in number and housed and serviced such that Title IV funds are reasonably available to students, including at the times the school or its third-party servicer makes direct payments into them (34 CFR 164(e)(2)(iv)(A) and (f)(4)(vi)). Tier One schools must also ensure that the student is provided convenient access to funds in part and in full up to the account balance via domestic withdrawals and transfers without charge, during the student's entire period of enrollment following the date that such title IV, HEA program funds are deposited or transferred to the financial account (34 CFR 668.164(e)(2)(v)(C)).
- *Best Financial Interest of Students:* Tier One schools and any Tier Two schools above the threshold must ensure that the terms of the accounts offered pursuant to the arrangement are not inconsistent with the best financial interests of the students opening them. ED considers this requirement to be met if (a) the school documents that it conducts reasonable due diligence reviews at least every two years to ascertain whether the fees imposed under the arrangement are, considered as a whole, consistent with or below prevailing market rates; and (b) all contracts for the marketing or offering of accounts pursuant to the arrangement to the school's students make provision for termination of the arrangement by the school based on (i) complaints received from students or (ii) a determination by the school that the fees assessed under the arrangement are not consistent with or are higher than prevailing market rates. (34 CFR 164(e)(2)(ix and (f)(4)(vii)).

These schools must take affirmative steps, by way of contractual arrangements with the third-party servicer as necessary, to ensure that requirements for these arrangements are met with respect to all accounts offered pursuant to the arrangement (34 CFR 668.164(e)(2)(x) and (f)(4)(ix)).

Additional guidance on Tier One and Tier Two arrangements can be found in Dear Colleague Letter [GEN-22-14](#); Volume 4, Chapter 2 of the FSA Handbook; and the [Cash Management Q&A](#).

Audit Objective: Determine if the institution uses a servicer or a financial institution to deliver Title IV credit balance refunds (or to make direct payments of FSA credit balances) and if the institution is following applicable ED requirements.

Suggested Audit Procedures

- a. For any arrangements that the institution has with an outside entity to make direct payments of Title IV credit balances by EFT, obtain the full contract (including all attachments, appendices, affiliation agreements, and addendums) and any promotional material provided by the entity to the school and to students and parents. Determine whether the arrangement is a Tier One Arrangement or a Tier Two Arrangement. *Note: As you are reviewing these records, you should be alert to evidence that the entity is performing functions associated with processing direct payments, which would be indicative of a Tier One Arrangement, especially the following functions provided by ED as examples: receiving Title IV funds; posting Title IV funds to student accounts; calculating a student's Title IV credit balance; processing documents for direct payment to students; and disbursing or delivering FSA funds.* If the entity is not associated with processing direct payments of Title IV funds on behalf of the institution and a Tier Two arrangement exists, obtain information about the population of students receiving credit balances in the prior three award years and determine whether the institution was below or above the credit balance threshold.
- b. For institutions with any Tier One or Tier Two arrangement, (1) determine whether the school established a selection process under which the student chooses an option for receiving payments by electronic funds transfer; (2) for sample of students for whom a financial account under the arrangement was opened, determine whether the school informed the student of the terms and conditions of the financial account and obtained the student's consent to open the financial account; (3) through review of the contract between the school and servicer determine that (a) the financial account or access device is not marketed or portrayed as, or converted into, a credit card and (b) the student would not incur costs for opening the account or receiving the access device; (4) determine whether the school contract(s) establishing the arrangement between the school and financial account provider exist on the school's website; and (5) obtain documentation to determine if the school provided a URL for the contract to ED for publication in the Cash Management Contracts Database. (You may check the database directly at [Cash Management Contracts | Federal Student Aid](#))
- c. For institutions with any Tier One arrangement or a Tier Two arrangement above the threshold, (1) through review of the contract between the school and servicer, (a) determine that students would have access to the funds through surcharge-free ATMs, including at the times payments are made; and (b) determine that the contracts make provisions for termination of the arrangement by the school based on i) complaints received from students or ii) a determination by the school that the fees assessed under the arrangement are not consistent with or are higher than prevailing market rates; (2) through review of the latest due diligence review, determine that the school is performing such reviews at least every two years to ascertain whether the fees imposed under the arrangement are consistent with or below prevailing market rates; (3) determine whether all required cost information

related to the arrangement existed on the school's website and that the cost information was updated within 60 days after the end of each award year; and (4) obtain documentation to determine if the school provided a URL for the cost information to ED for publication in the Cash Management Contracts Database. (You may check the database directly at [Cash Management Contracts | Federal Student Aid](#))

- d. For institutions with any Tier One arrangement, through review of the contract between the school and servicer, determine that the student (1) would not be extended any credit with the financial account; (2) would not incur costs for conducting point-of-sale transactions and balance inquiries, or as overdraft fees; and (3) would be provided access to funds up to the account balance without charge during the student's entire period of enrollment.

4. Return of Title IV Funds

SFA - Title IV Programs

Compliance Requirements: When a recipient of Title IV grant or loan assistance withdraws from an institution during a payment period or period of enrollment in which the recipient began attendance, the institution must determine the amount of Title IV aid earned by the student as of the student's withdrawal date. If the total amount of Title IV assistance earned by the student is less than the amount that was disbursed to the student or on his or her behalf as of the date of the institution's determination that the student withdrew, the difference must be returned to the Title IV programs as outlined in this section and no additional disbursements may be made to the student for the payment period or period of enrollment. If the amount the student earned is greater than the amount disbursed, the difference between the amounts must be treated as a post-withdrawal disbursement (34 CFR 668.22(a)(1) through (a)(5)).

A student is considered to have withdrawn from a payment period or period of enrollment (34 CFR 668.22(a)(2)) if the student does not meet one of the withdrawal exemptions and:

- For credit hour programs, a student is considered to have withdrawn if the student does not complete all the scheduled days in the payment period or period of enrollment.
- For clock hour programs, a student is considered to have withdrawn if the student does not complete all the clock hours and weeks of instructional time in the payment period or period of enrollment.
- For a student in a standard or non-standard-term program, excluding a subscription-based program, is considered to have withdrawn if he or she is not scheduled to begin another course within a payment period or period of enrollment for more than 45 calendar days after the end of the module the student ceased attending unless the student is on an approved leave of absence.

- For a student in a subscription-based or a non-term program, the student is unable to resume attendance within a payment period or period of enrollment for more than 60 days after ceasing attendance, unless the student is on approved leave of absence.

Under the September 2, 2020, final regulations, ED revised the definition of a program “offered in modules” for Title IV purposes to only include a program that uses a standard term or nonstandard-term academic calendar, is not a subscription-based program, and has a course or courses in the program that do not span the entire length of the payment period or period of enrollment (34 CFR 668.22(l)). A student is not considered to have withdrawn from a program offered in modules if the institution obtains written confirmation from the student, at the time that otherwise would have been a withdrawal, of the date that he or she will attend a module that begins later in the same payment period or period of enrollment and, for standard and non-standard-term programs offered in modules, excluding subscription-based programs, that module begins no later than 45 calendar days after the end of the module the student ceased attending.

For a subscription-based program, a student is not considered to have withdrawn if the institution obtains written confirmation from the student at the time that otherwise would have been a withdrawal, of the date that he or she will resume attendance, and that date occurs within the same payment period or period of enrollment and is no later than 60 calendar days after the student ceased attendance.

For a non-term program, a student is not considered to have withdrawn if the institution obtains written confirmation from the student at the time that otherwise would have been a withdrawal, of the date that he or she will resume attendance, and that date is no later than 60 calendar days after the student ceased attendance.

If the institution obtains the written confirmation, but the student does not return as scheduled, the student is considered to have withdrawn. The student’s withdrawal date and the total number of calendar days in the payment period or period of enrollment are the date and days that would have applied had the student not provided written confirmation of future attendance (34 CFR 668.22(a)(2)(ii)(C)).

R2T4 Withdrawal Exemptions

Under 34 CFR 668.22(a)(2)(ii)(A), ED established withdrawal exemption criteria which, if met, allows a student who has withdrawn or otherwise ceased attendance to not be considered a withdrawn student for Title IV purposes, which means that no R2T4 calculation is necessary for that student. Prior to conducting an R2T4 calculation for a student who has ceased attendance during a payment period or period of enrollment, an institution should review the student’s circumstances to see if the student qualifies for any of the R2T4 withdrawal exemptions.

The withdrawal exemption categories are as follows:

- a. Withdrawal exemption for graduates/completers

- A student who completes all the requirements for graduation from his or her program before completing the days or hours in the period that he or she was scheduled to complete is not considered to have withdrawn

Note: Institutions with clock-hour programs in which a student graduates without successfully completing all of the established hours in the program must re-prorate the amount of Title IV aid and only pay the student for the hours successfully completed. See the 2022–2023 *FSA Handbook*, Volume 3 for more information and examples.

- b. Withdrawal exemptions for programs offered in modules
- (1) A student is not considered to have withdrawn if the student successfully completes one module that includes 49 percent or more of the number of days in the payment period, excluding scheduled breaks of five or more consecutive days and all days between modules
 - (2) A student is not considered to have withdrawn if the student successfully completes a combination of modules that when combined contain 49 percent or more of the number of days in the payment period, excluding scheduled breaks of five or more consecutive days and all days between modules
 - (3) A student is not considered to have withdrawn if the student successfully completes coursework equal to or greater than the coursework required for the institution's definition of a half-time student under section 668.2 for the payment period

For additional information and examples regarding withdrawal exemptions, please see the 2022–2023 *FSA Handbook*, Volume 5, Chapter 1.

Post-withdrawal Disbursements

Post-withdrawal disbursements must be made from available grant funds before available loan funds (34 CFR 668.22(a)(6)). Post-withdrawal disbursements of grant funds may be credited to the student's account, without the student's authorization, for current-year outstanding charges for tuition, fees, and room and board (if contracted with the institution) on the student's account, up to the amount of those outstanding charges. For current-year outstanding charges other than tuition, fees, and room and board (if contracted with the institution), the institution must have the student's authorization to credit the student's account with grant funds. Any grant funds not disbursed to the student's account must be disbursed to the student no later than 45 days after the date of the institution's determination that the student withdrew (34 CFR 668.22(a)(6)(ii)(B)(1)).

Post-withdrawal disbursements of loan funds may be credited to the student's account if current-year outstanding charges exist on the student's account, up to the amount of the

current-year outstanding charges only after obtaining confirmation from the student, or parent in the case of a parent PLUS loan, that he or she still wishes to have some or all of the loan funds disbursed.

If the institution wishes to credit the student's account with a post-withdrawal disbursement of loan funds or wishes to pay a post-withdrawal disbursement of loan funds directly to the student, or parent in the case of a parent PLUS loan, the institution must, within 30 days of the date the institution determines that the student withdrew, send a written notification to the student, or parent in the case of a parent PLUS loan, that

- a. Asks the student or parent if he or she wants a post-withdrawal disbursement of some or all of the loan funds credited to the student's account, or a post-withdrawal disbursement of some or all of the loan funds as a direct disbursement;
- b. Explains that, if the borrower does not want the loan funds credited to the student's account, it is up to the institution to decide whether it will disburse the loan funds as a direct disbursement to the borrower;
- c. Explains the obligation of the borrower to repay any loan funds disbursed; and
- d. Explains that no post-withdrawal disbursement will be made (other than a credit of grant funds to the student's account for tuition and fees and room and board, if contracted for with the institution, or a credit of grant funds for other institutional charges for which the institution has the student's authorization or a direct disbursement of grant funds) unless the student or parent responds within 14 days of the date the institution sent the notification (or a later time frame set by the institution), or the institution chooses to make a post-withdrawal disbursement based on a late response (34 CFR 668.22(a)(6) and 668.164(c)).

If a student or parent accepts a post-withdrawal disbursement of loan funds, the institution must make the disbursement within 180 days after the date of the institution's determination that the student withdrew and in accordance with the request of the recipient (34 CFR 668.22(a)(6)(iii)(C) and 668.164(c)(1), (c)(2), (c)(3), and (j)).

Subject to the above, an institution may credit a student's account for minor prior-award-year charges, if not more than \$200 (34 CFR 668.164(c)(3)).

Withdrawal Date

If an institution is required to take attendance, the withdrawal date is the last date of academic attendance, as determined by the institution from its attendance records. An institution is required to take attendance if:

- a. The institution is required to take attendance for some or all of its students by an entity outside of the institution (such as the institution's accrediting agency or state agency);

- b. The institution itself has a requirement that its instructors take attendance; or
- c. The institution or an outside entity has a requirement that can only be met by taking attendance or a comparable process, including, but not limited to, requiring that students in a program demonstrate attendance in the classes of that program or a portion of that program (34 CFR 668.22(b)(3)).

Note: As provided in the [Department's Program Integrity Q&As for Return of Title IV Funds](#), the monitoring of whether online students log into classes does not by itself result in an institution being an institution that is required to take attendance for Title IV, HEA program purposes because monitoring logins alone is not monitoring academic engagement (as defined under 34 CFR 600.2). However, an institution that collects and maintains information about students' online activities for the purpose of tracking academic engagement is considered to be an institution that is required to take attendance for programs involving such tracking if that tracking:

- (1) Involves monitoring student attendance in a synchronous class, lecture, recitation, or field or laboratory activity, physically or online via a distance education platform, where there is an opportunity for interaction between the instructor and students; or
- (2) Is used to administratively withdraw students or to enforce an institutional attendance policy.

If an institution is not required to take attendance, the withdrawal date is (1) the date, as determined by the institution, that the student began the withdrawal process prescribed by the institution; (2) the date, as determined by the institution, that the student otherwise provided official notification to the institution, in writing or orally, of his or her intent to withdraw; (3) if the student ceases attendance without providing official notification to the institution of his or her withdrawal, the midpoint of the payment period or, if applicable, the period of enrollment; (4) if the institution determines that a student did not begin the withdrawal process or otherwise notify the institution of the intent to withdraw due to illness, accident, grievous personal loss or other circumstances beyond the student's control, the date the institution determines is related to that circumstance; (5) if a student does not return from an approved leave of absence, the date that the institution determines the student began the leave of absence; or (6) if the student takes an unapproved leave of absence, the date that the student began the leave of absence. Notwithstanding the above, an institution that is not required to take attendance may use as the withdrawal date, the last date of attendance at an academically related activity as documented by the institution (34 CFR 668.22(c) and (l)).

Title IV funds may be expended only towards the education of the students who can be proven to have been in attendance at the institution. In a distance education context, documenting that a student has logged into an online distance education platform or system is not sufficient, by itself, to demonstrate attendance by the student. To avoid returning all funds for a student that did not begin attendance, an institution must be able to document "attendance at any class." To qualify as a last date of attendance for Return

of Title IV purposes, an institution must demonstrate that a student participated in class or was otherwise engaged in an academically related activity, such as by contributing to an online discussion or initiating contact with a faculty member to ask a course-related question.

An institution that requires attendance be taken on only one specified day (e.g., to meet a census reporting requirement), is not considered an institution required to take attendance (34 CFR 668.22(b)(3)(iv)).

Calculation of the Amount of Title IV Assistance Earned

The amount of earned Title IV grant or loan assistance is calculated by determining the percentage of Title IV grant or loan assistance that has been earned by the student and applying that percentage to the total amount of Title IV grant or loan assistance that was or could have been disbursed to the student for the payment period or period of enrollment as of the student's withdrawal date. A student earns 100 percent if his or her withdrawal date is after the completion of 60 percent of (1) the calendar days in the payment period or period of enrollment for a program measured in credit hours, or (2) the clock hours scheduled to be completed for the payment period or period of enrollment for a program measured in clock hours (34 CFR 668.22(e)(2)). Otherwise, the percentage earned by the student is equal to the percentage (60 percent or less) of the payment period or period of enrollment that was completed as of the student's withdrawal date. The percentage of Title IV grant or loan assistance that has not been earned by the student is the complement of one of these calculations. Standard term-based institutions must always use the payment period as the basis for the determination.

The unearned amount of Title IV assistance to be returned is calculated by subtracting the amount of Title IV assistance earned by the student from the amount of Title IV aid that was disbursed to the student as of the date of the institution's determination that the student withdrew (34 CFR 668.22(e)).

Use of Payment Period or Period of Enrollment

The treatment of Title IV grant or loan funds if a student withdraws must be determined on a payment period basis for a student who attended a standard term-based (semester, trimester, or quarter) educational program. The treatment of Title IV grant or loan funds if a student withdraws may be determined on either a payment period basis or a period of enrollment basis for a student who attended a non-term based or a non-standard term-based educational program. The institution must use the chosen period consistently for all students in the program, except that an institution may make a separate selection of payment period or period of enrollment for students that transfer to the institution or reenter the institution for students who attend a non-term-based or non-standard term-based program (34 CFR 668.22(e)(5)). An institution must use the payment period that ends later to calculate a "Return of Title IV Funds" when a student withdraws from a non-standard term credit hour program with terms that are not substantially equal in length, and the student was disbursed or could have been disbursed Title IV aid under more than one payment period definition (34 CFR 668.22(e)(5)(iii)).

Percentage of Payment Period or Period of Enrollment Completed

The percentage of the payment period completed or period of enrollment completed is determined in the case of a program that is measured in (1) credit hours, by dividing the total number of calendar days in the payment period or period of enrollment into the number of calendar days completed in that period as of the student's withdrawal date; or (2) clock hours, by dividing the total number of clock hours in the payment period or period of enrollment into the number of clock hours scheduled to be completed as of the student's withdrawal date. The total number of calendar days in a payment or enrollment period includes all days within the period, except that institutionally scheduled breaks of at least five consecutive calendar days (including module programs that a student is not required to attend for five consecutive calendar days) and days in which the student was on an approved leave of absence are excluded from the total number of calendar days in a payment period or period of enrollment and the number of calendar days completed in that period (34 CFR 668.22(f)).

The September 2, 2020, final regulations added a definition of the number of days a student was scheduled to complete in a module by indicating under 34 CFR 668.22(1)(9) that a student in a program offered in modules is scheduled to complete the days in a module if the student's coursework in that module was used to determine the amount of the student's eligibility for title IV, HEA funds for the payment period or period of enrollment.

When a student enrolls in a module during a payment period or period of enrollment, the student is considered to be enrolled in a program offered in modules and the institution must determine the number of days in the denominator of the R2T4 calculation based on whether the coursework, including full-term courses, was used to determine the amount of eligibility for Title IV aid. This determination will depend on several factors:

- Whether the institution uses an R2T4 Freeze Date;
- The Title IV programs for which the student was eligible; and
- Which modules/courses the student attended during the period.

An R2T4 Freeze Date is an optional (not required) policy that uses the student's enrollment schedule at a fixed calendar point to determine the number of days the student is scheduled to attend during the period for R2T4 purposes. If the institution uses an R2T4 Freeze Date, the days in a module/course are included in the R2T4 calculation if the student attends the module/course or is enrolled in the module/course on the R2T4 Freeze Date, regardless of the types of Title IV aid awarded.

Institutions that choose to not establish an R2T4 Freeze Date will monitor changes in the student's enrollment throughout the period and which module/course days to include in the R2T4 calculation will, in part, depend on the type of Title IV aid awarded.

If the student is only eligible for Pell Grant, Iraq-Afghanistan Service Grant, and/or TEACH Grant funds during the period and the institution does not use an R2T4 Freeze Date, the days in a module/course must be included in the denominator of the R2T4 calculation only if the student actually attends the module/course.

If the student is eligible for Direct Loan or FSEOG funds during the period (regardless of eligibility for other Title IV programs) and does not use an R2T4 Freeze Date, the days in a module/course must be included in the R2T4 calculation if the student was enrolled in the module/course on the first day of the period or enrolled in the module/course at any time during the period.

For additional information, please review the 2022–2023 *FSA Handbook*, Volume 5, Chapter 2.

Institution's Return of Unearned Aid

The institution must return the lesser of (1) the total amount of unearned Title IV assistance to be returned as described above, or (2) an amount equal to the total institutional charges incurred by the student for the payment period or period of enrollment multiplied by the percentage of Title IV grant or loan assistance that has not been earned by the student. If, for a non-term program an institution chooses to calculate the treatment of Title IV assistance on a payment period basis, but the institution charges for a period that is longer than the payment period, “total institutional charges incurred by the student for the payment period” is the greater of (1) the prorated amount of institutional charges for the longer period, or (2) the amount of Title IV assistance retained for institutional charges as of the student’s withdrawal date (34 CFR 668.22(g)).

CARES Act R2T4 Waiver and Reporting

Note: Section 3508 of the CARES Act waives Return of Title IV Funds (R2T4) requirements for students whose withdrawals were related to the novel coronavirus disease (COVID-19). The CARES Act also provides that, for those students: (1) Direct Loan and TEACH Grant funds received for the period will be cancelled (Sec. 3508); (2) The period will not count toward the student’s Subsidized Loan usage for purposes of the 150 percent Direct Subsidized Loan Limit (Sec. 3506); and (3) Pell Grant funds received for the period will be excluded from the student’s Lifetime Eligibility Used (Sec. 3507).

Note: The *FAFSA Simplification Act* eliminated the Subsidized Loan usage requirements for all loans that were first disbursed on or after July 1, 2021.

These waivers apply to payment periods that include March 13, 2020, through the last date of the COVID-19 national emergency. For institutions basing R2T4 calculations on a period of enrollment, the waiver may apply to a student who begins attendance in a payment period that includes the last date that the national emergency is in effect and withdraws after the conclusion of that payment period but within the applicable period of

enrollment. (See Electronic Announcement 2020-05-15 UPDATED Guidance for interruptions of study related to Coronavirus (COVID-19) (Updated June 16, 2020)

For COVID-19 related guidance, including waivers and exemptions to Title IV rules, please see the following webpages:

- The Department of Education’s COVID-19 Information and Resources for Schools and School Personnel: <https://www.ed.gov/coronavirus/program-information>
- Office of Postsecondary Education COVID-19 Title IV FAQ: <https://www2.ed.gov/about/offices/list/ope/covid19faq.html>

The CARES Act requires institutions to report to ED information specific to each student for whom it was not required to return Title IV funds under the waiver exception (and for each student for which Title IV funds were previously returned and are now being redrawn). The law also requires institutions to report to ED the total amount of Title IV grant or loan assistance that was not returned as a result of the CARES Act provisions.

To implement this CARES Act relief for each student who withdraws as a result of the COVID-19 national emergency, ED requires the institution to:

- a. Use the Coronavirus Indicator checkbox in the COD System to indicate that an aid recipient’s actual disbursement(s) qualifies for Direct Loan cancellation (and the exclusion from the Direct Loan annual limits and Subsidized Loan usage calculations), or the exclusion from Pell Grant LEU calculations and TEACH Grant award limits.
- b. Report the amount of SFA funds not returned under Section 3508 of the CARES Act, either by adding a Coronavirus Indicator to calculations using the R2T4 Tool for each withdrawn student who qualifies for CARES Act relief, or by reporting the total amount of funds not returned at the institution level. Both of these types of reporting are performed in the COD System. The COD System allows institutions to produce a report that lists all the disbursements that have been marked with the Coronavirus Indicator. Additional information can be found at [092320CODSystemImpInfoAddCODSysChangesSupCARESActPhaseTwoAttac h.pdf \(ed.gov\)](#). That report 1) identifies students who have been flagged as qualifying for CARES Act relief and 2) ensures that none of those funds were returned. Additional information and examples of how to identify students who have withdrawn due to COVID-19 can be found in an [Electronic Announcement published on March 19, 2021](#).

Student’s Return of Unearned Aid

The amount a student is responsible for returning is calculated by subtracting the amount of unearned aid that the institution is required to return from the total amount of unearned Title IV assistance to be returned. However, the student need only return 50 percent of

the total grant assistance that was disbursed (and that could have been disbursed) for the payment period or period of enrollment. After the 50 percent rule is applied, a student does not have to return an overpayment amount of \$50 or less.

In addition, the secretary may waive grant overpayments that students are required to return if the students who withdrew were residing in, employed in, or attending an institution located in an area where the President has declared that a major disaster exists (34 CFR 668.22(g), 668.22(h)(3), and 668.22(h)(5)).

Allocation of Return of Title IV Funds

Returns of Title IV funds must be distributed in the order prescribed below. The prescribed order must be followed regardless of the institution's agreements with other state agencies or private agencies (34 CFR 668.22(i)).

- a. Unsubsidized Federal Direct Stafford Loans
- b. Subsidized Federal Direct Stafford Loans
- c. Federal Direct PLUS
- d. Federal Pell Grant
- e. Iraq and Afghanistan Service Grant
- f. Federal Supplemental Educational Opportunity Grants
- g. Teacher Education Assistance for College and Higher Education Grants

Timing of Return of Title IV Funds

Returns of Title IV funds are required to be deposited or transferred into the SFA account or electronic fund transfers initiated to ED as soon as possible, but no later than 45 days after the date the institution determines that the student withdrew. Returns by check are late if the check is issued more than 45 days after the institution determined the student withdrew or the date on the canceled check shows the check was endorsed more than 60 days after the date the institution determined that the student withdrew (34 CFR 668.173(b)).

An institution that is not required to take attendance must determine the withdrawal date for a student who withdraws without providing notification to the institution no later than 30 days after the end of the earlier of the (1) payment period or period of enrollment, (2) academic year in which the student withdrew, or (3) educational program from which the student withdrew (34 CFR 668.22(j)). The institution must also notify the recipient of Title IV loans returned (34 CFR 685.306(a)(2)).

Compliance Requirements Applicable for a Student Who Does Not Begin Attendance When a recipient of Title IV grant or loan assistance does not begin

attendance at an institution during a payment period or period of enrollment, all disbursed Title IV grant and loan funds must be returned. The institution must determine which Title IV funds it must return or if it has to notify the lender or the secretary to issue a final demand letter (34 CFR 668.21).

Not beginning attendance

A student is considered to have not begun attendance in a payment period or period of enrollment if the institution is unable to document the student's attendance at any class during the payment period or period of enrollment (34 CFR 668.21(c)).

FSEOG, TEACH Grants, Pell Grant, and IASG program funds

If a student does not begin attendance, the institution must return all FSEOG, TEACH Grants, Pell Grant, and IASG program funds that were credited to the student's account or disbursed directly to the student for that payment period or period of enrollment (34 CFR 668.21(a)(1)).

Direct Loan Funds

The institution must return all Direct Loan funds that were

- a. Credited to the student's account for that payment period or period of enrollment;
- b. Payments made directly by or on behalf of the student to the institution for that payment period or period of enrollment, up to the total amount of the loan funds disbursed; or
- c. Disbursed directly to the student if the institution knew that a student would not begin attendance prior to disbursing the funds directly to the student for that payment period or period of enrollment (e.g., the student notified the institution that he or she would not attend, or the institution expelled the student).

For remaining amounts of Direct Loan funds disbursed directly to the student for the payment period or period of enrollment (including funds disbursed directly to the student by the lender for a study-abroad program or for a student enrolled in a foreign institution), the institution must immediately notify the lender or the secretary, as appropriate, when it becomes aware that the student will not or has not begun attendance so that the lender or the secretary will issue a final demand letter to the borrower in accordance with 34 CFR 685.211 (34 CFR 668.21(a)(2)).

Note: Under the HEROES Act waivers outlined in the December 11, 2020 Federal Register, ED waived the requirement for institutions to notify the Direct Loan servicer where Direct Loan funds for living expenses are paid directly to a student who does not begin attendance. This COVID-19 waiver is applicable through the end of the payment period that begins after the date on which the federally declared national emergency related to COVID-19 is rescinded.

Deadline for return of funds by the institution

The institution must return those funds for which it is responsible as soon as possible, but no later than 30 days after the date that the institution becomes aware that the student will not or has not begun attendance (34 CFR 668.21(b)).

Timely return of funds by the institution

An institution returns Title IV funds timely if:

- a. The institution deposits or transfers the funds into the bank account it maintains under 34 CFR 668.163 as soon as possible, but no later than 30 days after the date that the institution becomes aware that the student will not or has not begun attendance;
- b. The institution initiates an EFT as soon as possible, but no later than 30 days after the date that the institution becomes aware that the student will not or has not begun attendance;
- c. The institution initiates an electronic transaction, as soon as possible, but no later than 30 days after the date that the institution becomes aware that the student will not or has not begun attendance, that informs the lender to adjust the borrower's loan account for the amount returned; or
- d. The institution issues a check as soon as possible, but no later than 30 days after the date that the institution becomes aware that the student will not or has not begun attendance; an institution does not satisfy this requirement if
 - (1) The institution's records show that the check was issued more than 30 days after the date that the institution becomes aware that the student will not or has not begun attendance; or
 - (2) The date on the cancelled check shows that the bank used by the secretary endorsed that check more than 45 days after the date that the institution becomes aware that the student will not or has not begun attendance (34 CFR 668.21(d)).

Audit Objectives Determine if the institution—

Accurately calculated return of Title IV funds for withdrawn students who began attendance, allocated the return of Title IV funds as required, returned Title IV funds timely (unless the student qualified for R2T4 relief under the CARES Act or met one of the R2T4 withdrawal exemptions) , and notified borrowers of returned loans;

Timely returned all Title IV funds when a student did not begin attendance as required;

Followed the requirements for post-withdrawal disbursements as applicable; and

For returns not made due to withdrawals as a result of COVID-19 related circumstances, (a) determined that students qualified for R2T4 relief under the CARES Act and (b) met the reporting requirements for students who qualified for R2T4 relief.

Suggested Audit Procedures

- a. Using a sample of students who ceased attendance during a payment period or period of enrollment (including those who met one of the withdrawal exemptions), dropped, on a leave of absence, never began attendance or terminated during the audit period ascertain if returns of Title IV funds were properly calculated. Obtain and inspect student academic and financial aid files, student ledger accounts, financial records, and, if applicable, attendance records. Ensure that for students enrolled in distance education courses, documented attendance includes academic engagement, not merely logging in to an online platform; when applicable to the determination of last day of attendance (See the discussion under *FSA Handbook*, Volume 5, Chapter 2: Documenting attendance when students are enrolled in distance education courses). From the records determine:
 - (1) If the student's enrollment status is correct (official or unofficial withdrawal or enrolled or graduated only if the student met the requirements for one of the withdrawal exemptions).
 - (2) Whether the calculation is calculated accurately. Calculating return of Title IV funds may be made using the worksheets found in the Appendix to Volume 5 of the *FSA Handbook*.
- b. For instances in the sample tested in procedure a. above where a return of Title IV was required, trace the return of Title IV funds to disbursement and accounting records (including canceled checks to ED and students) to verify that returned Title IV funds were applied to programs in the required order and were timely. Ascertain that within 45 days (or within 30 days for students that never began attendance) of becoming aware that the student had withdrawn, deposits or transfers were made into the federal funds account, electronic transfers were initiated, or checks were issued. When an institution issues a check, the return of Title IV is not timely if the institution's records show that the check was issued more than 45 days after the institution becomes aware that the student withdrew (or more than 30 days for students that never began attendance) or the date on the cancelled check shows that the bank used by ED endorsed the check more than 60 days after the institution becomes aware that the student withdrew (or more than 45 days for students that never began attendance).
- c. For a sample of students who received Title IV assistance, for which no return of Title IV funds were made, review academic and enrollment records (including class attendance records if they are required) to ascertain whether the students sufficiently completed the payment or enrollment period to earn the Title IV funds received (earned 100% of Title IV funds received if completed more than 60% of

the payment period/period of enrollment) or met one of the withdrawal exemptions. When doing this, for students who received all failing and/or all incomplete grades, review records to ascertain whether the students had attended the institution or had attended but withdrawn (unofficial withdrawals). Ensure that for students enrolled in distance education courses, documented attendance includes academic engagement, not merely logging in to an online platform.

- d. For instances in the sample tested in procedure a. above where the student or parent was eligible for a post-withdrawal disbursement, ascertain if appropriate notification of the post-withdrawal disbursement was given to the student or parent. Review evidence of the student or parent's acceptance or rejection of the post-withdrawal disbursement. Determine if the institution followed the student or parent's instructions regarding the post-withdrawal disbursement.
- e. For instances in the sample tested in procedure a. above where the institution did not return Title IV funds due to withdrawals as a result of COVID-19 related circumstances, determine that (a) the student began attendance in a payment period or period of enrollment that includes March 13, 2020, or began between March 13, 2020 and the last date of the national emergency, and (b) qualified for R2T4 relief under the CARES Act (either because the student was enrolled in an affected program or provided a written attestation explaining why the withdrawal was the result of the COVID-19 emergency).
- f. For instances in the sample tested in procedure a. above where the institution did not return Title IV funds due to withdrawals as a result of COVID-19 related circumstances, determine that the institution reported to ED (a) information specific to each student that qualified for the R2T4 relief and, if the institution chose to report the amount of R2T4 relief received under the CARES Act on a student-by-student basis, (b) the total amount of Title IV grant or loan assistance that was not returned for each student as a result of the CARES Act R2T4 relief.

5. Enrollment Reporting

Compliance Requirements Institutions are required to report enrollment information under the Pell grant and the Direct and FFEL loan programs via the NSLDS (*OMB No. 1845-0035*), although FFEL loans are no longer made or a part of the SFA Cluster, a student may have a FFEL loan from previous years that would require enrollment reporting for that student (Pell, 34 CFR 690.83(b)(2); FFEL, 34 CFR 682.610; Direct Loan, 34 CFR 685.309; Perkins 34 CFR 674.19(f)). The administration of the Title IV programs depends heavily on the accuracy and timeliness of the enrollment information reported by institutions. Institutions must review, update, and certify student enrollment statuses, program information, and effective dates that appear on the Enrollment Reporting Roster file or on the Enrollment Maintenance page of the NSLDS Professional Access (NSLDSFAP) website which the financial aid administrator can access for the auditor. The data on the institution's Enrollment Reporting Roster, or Enrollment Maintenance page, is what NSLDS has as the most recently certified enrollment. There are two categories of enrollment information, "Campus Level" and "Program Level,"

both of which need to be reported accurately and have separate record types. The *NSLDS Enrollment Reporting Guide* provides the requirements and guidance for reporting enrollment details using the NSLDS Enrollment Reporting Process. The guide can be accessed at https://fsapartners.ed.gov/knowledge-center/library/resource-type/NSLDS%20User%20Resources?nslds_type=NSLDS%20User%20Documentation.

Institutions are responsible for accurately reporting all Campus-Level Record data elements. ED considers the following data elements to be high risk:

- OPEID Number – This is the OPEID for the location that the student is actually attending.
- Enrollment Effective Date – The date that the current enrollment status reported for a student was first effective. (See 4.4.2 of the *NSLDS Enrollment Reporting Guide* for the specific requirements for reporting the Enrollment Effective Date. Also see 4.4.3 of the *NSLDS Enrollment Reporting Guide* for additional guidance on effective dates for Withdrawal versus Graduation and Electronic Announcement titled – *NSLDS Enrollment Reporting – Submission Dates, Effective Dates and Certification Dates*, dated April 20, 2017, for additional information and examples at <https://fsapartners.ed.gov/knowledge-center/library/electronic-announcements/2017-04-20/general-subject-nslds-enrollment-reporting-submission-dates-effective-dates-and-certification-dates>.)
- Enrollment Status – The student’s enrollment status as of the reporting date; full-time (F), three-quarter time (Q), half-time (H), less than half-time (L), leave of absence (A), graduated (G), withdrawn (W), deceased (D), never attended (X) and record not found (Z). (See 4.4.4 of the *NSLDS Enrollment Reporting Guide* for additional guidance on reporting graduated and withdrawn for the Campus-Level Record versus the Program Level Record and 4.4.10 for further guidance on Enrollment Status reporting at the Campus-Level Record and the Program-Level Record.)
- Certification Date – The Date enrollment certified by institution. At a minimum, institutions are required to certify enrollment every 60 days or every other month.

Institutions are responsible for accurately reporting all Program-Level Record data elements. ED considers the following data elements to be high risk:

- OPEID Number – This is the OPEID for the location that the student is actually attending.
- CIP Code – The Classification of Instructional Programs (CIP) is a set of codes that define fields of study. CIP Codes are maintained by ED's National Center for Education Statistics (NCES). They were most recently updated in 2020 and are usually updated every ten years. A listing of current CIP codes is available at: <https://nces.ed.gov/ipeds/cipcode/resources.aspx?y=56>.

- CIP Year – Year for the corresponding CIP code. The CIP Year for the codes currently used by NSLDS is 2020.
- Credential Level – Indicates the level of a credential the student will receive for the program the student is attending, for example undergraduate certificate, associate degree, or bachelor’s degree. (See 4.4.7 of the *NSLDS Enrollment Reporting Guide* for additional guidance on reporting the Credential Level.)
- Published Program Length Measurement – The institution identifies whether the Published Program Length is in days, weeks, or years.
- Published Program Length - Published Program Length should be reported based on the definition of “normal time” to completion in the regulations at 34 CFR 668.41(a), as follows:

If the institution has published, in its catalog, on its website, or in any promotional materials, the length of the program in weeks, months, or years, the program length reported must be the same as the program length that the institution has published.

If the institution has not published a program length and the program is an associate or bachelor’s degree program, the program length to be reported should be two years (associate) or four years (bachelor), respectively, unless the academic design of the program makes it longer or shorter than the typical program length.

For all other programs for which the institution has not published a program length, the program length is based on the institution’s determination of how long, in weeks, months, or years, the program is designed for a full-time student to complete.

(See 4.4.6 of the *NSLDS Enrollment Reporting Guide* for additional guidance.)

- Program Begin Date – The Program Begin Date is the date the student first began attending the program being reported. Typically, this would be the first day of the term in which the student began enrollment in the program, unless the student enrolled in the program on an earlier date. (See 4.4.8 of the *NSLDS Enrollment Reporting Guide* for additional guidance.)
- Program Enrollment Status – The student’s enrollment status as of the reporting date; full-time (F), three-quarter time (Q), half-time (H), less than half-time (L), leave of absence (A), graduated (G), withdrawn (W), deceased (D), never attended (X) and record not found (Z). (See 4.4.4 of the *NSLDS Enrollment Reporting Guide* for additional guidance on reporting graduated and withdrawn for the Campus-Level Record versus the Program Level Record and 4.4.10 for further guidance on Enrollment Status reporting at the Campus-Level Record and the Program-Level Record.)

- Program Enrollment Effective Date – The date when the student's current program status first took effect..

Institutions are responsible for timely reporting, whether they report directly or via a third-party servicer. Institutions must complete and return within 15 days the Enrollment Reporting roster file placed in their Student Aid Internet Gateway (SAIG) (*OMB No. 1845-0002*) mailboxes sent by ED via NSLDS. An institution determines how often it receives the Enrollment Reporting roster file with the default set at a minimum of every 60 days. Once received, the institution must update for changes in the data elements for the Campus Record and the Program Record identified above, and submit the changes electronically through the batch method, spreadsheet submittal, or the NSLDS website (Pell, 34 CFR 690.83(b)(2); FFEL, 34 CFR 682.610; Direct Loan, 34 CFR 685.309; Perkins 34 CFR 674.19(f)). (Note: The automated processes and required reporting are described in the *NSLDS Enrollment Reporting Guide*. After the institution sends the Enrollment Reporting Roster Submittal to NSLDS, NSLDS evaluates the Enrollment Reporting Roster Submittal and provides the institution an Error/Acknowledgement file. If errors are identified, institutions have 10 days to correct the errors and resubmit to NSLDS.)

NSLDS will send a Late Enrollment Reporting notification e-mail if no updates are received by batch or online within 22 days after the date the roster was sent to the institution. Institutions that receive a Late Enrollment Reporting notification are not in compliance with the requirement to complete and return the Enrollment Reporting Roster Submittal file within 15 days. However, since institutions are required to complete and return the Enrollment Reporting Roster Submittal within 15 days (not 22 days), the notification email (or lack thereof) should not be used to measure compliance. The Enrollment Submittal File Tracking Report (SCHET1) shows enrollment submittal information based on the processed date, which represents when NSLDS transmitted the Roster or Submittal File (which could be 24–48 hours after a batch is submitted, depending on processing times, online submittals are processed in real time).

When a Direct Loan was made to or on behalf of a student who was enrolled or accepted for enrollment at the institution, and the student ceased to be enrolled on at least a half-time basis or failed to enroll on at least a half-time basis for the period for which the loan was intended; or a student who is enrolled at the institution and who received a loan under Title IV has changed his or her permanent address, the institution must report the change in its next updated Enrollment Reporting Roster file (due within 60 days of the change).

Issues with NSLDS Modernization

As FSA prepared for the retirement of the current NSLDS website and the launch of the enhanced website, FSA temporarily paused data reporting to NSLDS. Batch reporting was accepted until July 19, 2022, and online updates and submittal spreadsheets were accepted until July 20, 2022. Due to issues encountered following the conversion, data reporting and data processing did not resume as scheduled, which impacted institutions' ability to comply with enrollment reporting requirements through at least February 2023.

Institutions were expected to be in compliance with the enrollment reporting requirements for all other periods within their fiscal year. See [Electronic Announcement General-23-04](#) for additional information.

Auditors are not expected to include any enrollment reporting data due from July 19, 2022, through Feb. 28, 2023, in their evaluation of the institution's compliance with the enrollment reporting requirements.

Audit Objectives Determine whether the institution is notifying ED of changes in student enrollment information at the Campus Level and Program Level in a timely and accurate manner, for periods during which the institution was required and able to comply with enrollment reporting requirements.

Suggested Audit Procedures

- a. Identify a population of Pell and Direct Loan students from the institution's records that had a reduction or increase in attendance levels impacting enrollment status, graduated, withdrew, dropped out, or enrolled but never attended during the audit period and for whom the institution was required to report such change in enrollment status from the beginning of the institution's fiscal year up to the last regularly scheduled Enrollment Roster prior to July 19, 2022 and/or from the last regularly scheduled Enrollment Roster after February 28, 2023 up to the fiscal year end. From the population identified, select a sample of students and compare the data in the student's NSLDS Enrollment Detail to the students' academic files and other institutional records and verify that the institution is accurately reporting the significant Campus-Level and Program-Level enrollment data elements that ED considers high risk.
- b. For instances in the sample tested in procedure a. above where a Direct loan was made to or on behalf of a student who was enrolled or accepted for enrollment at the institution, and the student ceased to be enrolled on at least a half-time basis or failed to enroll on at least a half-time basis for the period for which the loan was intended; or a student who is enrolled at the institution and who received a loan under Title IV has changed his or her permanent address, determine whether the institution reported the change in its next updated Enrollment Reporting Roster file.
- c. Have the institution access the NSLDS website and create the Enrollment Submittal File Tracking Report (SCHET1) or access the Enrollment Submittal Tracking Page. For regularly scheduled roster files during the audit period with "Date Sent" prior to July 5, 2022, and/or after February 28, 2023, compare the dates the roster files were sent to the return dates to verify that the institution returned the roster files within 15 days.

6. Student Loan Repayments (HPSL/PCL/LDS and NSL, and NFLP)

HHS Programs

Compliance Requirements HPSL/PCL/LDS and NSL loans made prior to November 13, 1998, including accrued interest, are repayable in equal or graduated periodic installments in amounts calculated on the basis of a 10-year repayment period. For HPSL/PCL/LDS loans the repayment period is not less than 10 and not more than 25 years, at the discretion of the institution. For NSL loans after November 13, 1998, the 10-year repayment period may be extended for ten years for any student borrower who, during the repayment period failed to make consecutive payments and who, during the last 12 months of the repayment period, has made at least 12 consecutive payments (42 USC 292r(c) and 297b(b)(8) (Sections 722(c) and 836(b)(8) of PHS Act); Pub. L. No. 105-392, Sections 133(a)(2) and 134(a)(3)). Except as required in 42 CFR 57.210(a), a repayment of a HPSL/PCL/LDS loan must begin one year after the student ceases to be a full-time student. For a NSL loan, repayment must begin nine months after the student ceases to be a full-time or half-time student, except as required in 42 CFR 57.310(a) .

For NFLP, loans are repayable in equal or graduated periodic installments in amounts calculated on the basis of a 10-year repayment period. Following graduation from the nursing program, up to 85 percent of the principal and interest of an NFLP loan can be cancelled if the student borrower serves as full-time nurse faculty for four years. For this program, “full-time” is defined as either (1) a full-time faculty member at an accredited institution of nursing; or (2) a part-time faculty member at an accredited institution of nursing, in combination with another part-time faculty position or part-time clinical preceptor position affiliated with an accredited institution of nursing that, together, equate to full-time employment. The loan cancellation over the four-year period is as follows: (1) the institution will cancel 20 percent of the principal and interest on the NFLP loan, as determined on the first day of employment, upon completion by the borrower of each of the first, second, and third years of full time employment as a faculty member in an institution of nursing; and (2) the institution will cancel 25 percent of the principal and interest on the NFLP loan, as determined on the first day of employment, upon completion of the fourth year of full-time employment as a faculty member in an institution of nursing. Repayment on the remaining 15 percent of the loan balance is postponed during the cancellation period. NFLP loans are repayable and/or cancelled over a 10-year repayment period. NFLP loans accrue interest at a rate of 3 percent per annum for loan recipients who establish employment as full-time nurse faculty (Funding Opportunity Announcements at <https://www.hrsa.gov/grants/find-funding?search=nflp&status=All&bureau=85>).

Loans under the HPSL/PCL/LDS, NSL, and NFLP programs may be cancelled only in the event that the borrower dies or becomes disabled (HPSL/PCL/LDS; 42 CFR 57.211 and 57.213a; NSL; 42 CFR 57.311 and 57.313a; and NFLP Administrative Guidelines, Disability and Death (<https://bhw.hrsa.gov/funding/schools-manage-loan-programs>)).

Institutions must exercise due care and diligence in the collection of loans (HPSL/PCL/LDS, NSL, and NFLP, 42 CFR 57.210(b) and 57.310(b), and NFLP Program Guidance, Institutional Responsibility in Repayment Process, respectively).

Audit Objectives Determine whether institutions are timely converting loans to repayment, establishing repayment plans, processing cancellation requests, and servicing loans as required.

Suggested Audit Procedures

Note: Many institutions engage third-party servicers for billing, collection, and processing deferment and cancellation requests. Although these institutions remain responsible for compliance, auditors of these institutions may exclude the audit procedures below for the compliance requirements performed by a third-party servicer.

- a. Select a sample of loans that entered repayment during the audit period and review loan records to verify that the conversion to repayment was timely, and that a repayment plan was established.
- b. Review the institution's requirements for applying for and documenting eligibility for loan cancellations. Select a sample of loans that were cancelled during the audit period and review documentation to ascertain whether the cancellations were adequately supported.
- c. Select a sample of loans that have defaulted during the year and review loan records to ascertain if the required interviews, contacts, billing procedures, and collection procedures were carried out.

7. Perkins Loan Recordkeeping and Record Retention

Compliance Requirements Institutions must retain promissory and master promissory notes (MPN), and repayment records for each Perkins Loan program loan (including Defense, NDSL, and Perkins Loans) made. . Institutions are required to keep original paper promissory notes or original paper MPNs and repayment schedules in a locked, fireproof container. The original promissory notes and repayment schedules must be kept until the loans are satisfied. If required to release original documents in order to enforce the loan, the institution must retain certified true copies of those documents. After the loan obligation is satisfied, the institution shall return the original or a true and exact copy of the note marked "paid in full" to the borrower, or otherwise notify the borrower in writing that the loan is paid in full and retain a copy for the prescribed period.

An institution shall retain repayment records, including cancellation and deferment requests for at least three years from the date on which a loan is assigned to the secretary, canceled, or repaid. An institution shall retain disbursement and electronic authentication and signature records for each loan made using an MPN for at least three years from the date the loan is canceled, repaid, or otherwise satisfied.

When an institution uses a third-party servicer for its Perkins Loan program, the institution must perform due diligence to ensure that the third-party servicer is in compliance with the requirements for the functions the third-party servicer is performing

for the institution. Such due diligence could include obtaining and reviewing the third-party servicer's most recent Title IV compliance audit.

Audit Objectives Determine whether the institution has properly maintained its Perkins loan records in the manner set forth in 34 CFR 674.19.(e).

Suggested Audit Procedures

- a. When an institution uses a third-party servicer to perform requirements of the Perkins loan program, the auditor should determine which compliance requirements the third-party servicer performs for the institution and evaluate whether the institution performed appropriate due diligence to ensure the third-party servicer's compliance with the Perkins Loan functions it is performing. For those requirements not performed by a third-party servicer the auditor should include the testing below as appropriate.
- b. Through inquiry and observation, evaluate the institution's Perkins loan paper records storage location and whether it is in a locked, fireproof container.
- c. Test a sample of borrowers with open loans to verify that original promissory notes and/or MPNs, repayment records, cancellation and deferment requests, and if applicable, disbursement and electronic authentication records, are being properly maintained.
- d. Test a sample of borrowers with loans retired or assigned loans within the previous three fiscal years and current fiscal years to verify that appropriate records are being retained for at least three years from the date the loans were retired or assigned.

8. Incentive Compensation

SFA – Title IV Programs

Compliance Requirements According to 34 CFR 668.14(b)(22)(i), an institution agrees in its Program Participation Agreement that “[i]t will not provide any commission, bonus, or other incentive payment based in any part, directly or indirectly, upon success in securing enrollments or the award of financial aid, to any person or entity who is engaged in any student recruitment or admission activity, or in making decisions regarding the award of title IV, HEA program funds.” Dear Colleague Letter [GEN-11-05](#) includes a Q&A on Incentive Compensation that provides additional information.

Applicable definitions:

A commission, bonus, or other incentive payment is a sum of money or something of value, other than a fixed salary or wages, paid to or given to a person or an entity for services rendered (34 CFR 668.14(b)(22)(iii)(A)).

Enrollment is the admission or matriculation of a student into an eligible institution (34 CFR 668.14(b)(22)(iii)(D)).

Securing enrollments or the award of financial aid means activities that a person or entity engages in at any point in time through completion of an educational program for the purpose of the admission or matriculation of students for any period of time or the award of financial aid to students. Securing enrollments or the award of financial aid includes contact in any form with a prospective student, such as, but not limited to - contact through preadmission or advising activities, scheduling an appointment to visit the enrollment office or any other office of the institution, attendance at such an appointment, or involvement in a prospective student's signing of an enrollment agreement or financial aid application (34 CFR 668.14(b)(22)(iii)(B)(1)).

Securing enrollments or the award of financial aid does not include making a payment to a third party for the provision of student contact information for prospective students provided that such payment is not based on any additional conduct or action by the third party or the prospective students, such as participation in preadmission or advising activities, scheduling an appointment to visit the enrollment office or any other office of the institution or attendance at such an appointment, or the signing, or being involved in the signing, of a prospective student's enrollment agreement or financial aid application; or the number of students (calculated at any point in time of an educational program) who apply for enrollment, are awarded financial aid, or are enrolled for any period of time, including through completion of an educational program (34 CFR 668.14(b)(22)(iii)(B)(2)(i) and (ii)).

An entity or person engaged in any student recruitment or admission activity or in making decisions about the award of financial aid is-

- With respect to an entity engaged in any student recruitment or admission activity or in making decisions about the award of financial aid, any institution or organization that undertakes the recruiting or the admitting of students or that makes decisions about and awards title IV, HEA program funds; and
- With respect to a person engaged in any student recruitment or admission activity or in making decisions about the award of financial aid, any employee who undertakes recruiting or admitting of students or who makes decisions about and awards title IV, HEA program funds, and any higher level employee with responsibility for recruitment or admission of students, or making decisions about awarding title IV, HEA program funds (34 CFR 668.14(b)(22)(iii)(C)(1) and (2)).

Although the definitions refer to recruiter enrollment activities that may occur “through completion,” ED clarified that it does not interpret the regulations to ban compensation for recruiters that is based upon students’ graduation from, or completion of, educational programs (see [80 FR 73991 \(Nov. 27, 2015\)](#)).

Merit-based adjustments

The regulation specifies in 34 CFR 668.14(b)(22)(ii) that, notwithstanding 34 CFR 668.14(b)(22)(i), eligible institutions, organizations that are contractors to eligible institutions, and other entities may make merit-based adjustments to employee compensation provided that such adjustments are not based in any part, directly or indirectly, upon success in securing enrollments or the award of financial aid; and profit-sharing payments so long as such payments are not provided to any person or entity engaged in student recruitment or admission activity or in making decisions regarding the award of title IV, HEA program funds.

In [GEN-11-05](#), ED has stated that incentive payments in the form of tuition sharing with entities may be permitted in limited circumstances when an unrelated third party provides recruiting services as part of a bundle of services.

Applicability to Title IV and non-Title IV educational offerings

Section 487(a)(20) of the HEA provides that compensation may not be based upon success in securing enrollments whether the students receive title IV, HEA funds, or some other form of student financial assistance (Federal Register, Volume 75, Number 117, Page 34817). Thus, the prohibition on the provision of any commission, bonus, or other incentive payment based in any part, directly or indirectly, upon success in securing enrollments or the award of financial aid, to any person or entity who is engaged in any student recruitment or admission activity, or in making decisions regarding the award of title IV, HEA program funds applies to all educational offerings that an institution provides whether or not those educational offerings are eligible for title IV, HEA program funds.

Applicability to contractors and employees of contractors used for covered services

Many institutions offer programs that may or may not be eligible for title IV, HEA program funds that are managed by organizations that are contractors to the institution and the prohibition on the provision of any commission, bonus, or other incentive payment would apply to any agreement between the institution and any organization it contracts with for any educational offerings provided for in the contract. The Government Accountability Office issued a report on one such type of agreement known as Online Program Manager (OPM) agreements, where prohibited commissions, bonuses, or incentive payments were included in the agreements and not identified by either the institution or the institution's auditor (GAO-22-104463). When identifying entities that institutions may utilize for recruiting and other activities, in addition to agreements such as OPM agreements, auditors should be aware of contractors used to identify and provide prospective students to institutions, which may be referred to as "lead generators" or "aggregators."

Even though an institution may have a contract with an organization that is free from any commission, bonus or other incentive payment on its face, the organization the institution

is contracting with may be providing commissions, bonuses, or other incentive payments to its employees in violation of the prohibition on commissions, bonuses, or other incentive payments. The prohibition on commissions, bonuses or other incentive payments extends to any individual involved in securing enrollment or the awarding of financial aid and the organization that the institution is contracting with is prohibited from such commissions, bonuses or other incentive payments to individuals performing under the contract.

Audit Objectives Determine if the institution complied with the ban on incentive payments to any person in the admissions/recruiting, financial aid, and registrar offices (or the equivalent of those offices) that the institution relies on to recruit, admit, and/or enroll its students, or to award Title IV funds or any contracted entity engaged in any student recruitment, enrollment, or admission activity or in making decisions regarding the award of Title IV funds.

Suggested Audit Procedures

- a. Make inquiries of management about whether (1) the institution contracts for services related to recruitment or admissions activities or services related to securing financial aid, including OPM agreements and (2) staff involved in recruitment, admissions, or securing financial aid activities are eligible for any incentive programs or are subject to any exceptions to general employment agreements.
- b. Obtain from the institution a list of institution employees in the institution's admissions/recruiting, financial aid, and registrar offices (or the equivalent of those offices) that the institution relies on to recruit, admit, and/or enroll its students, or to award Title IV funds. For a sample of identified individuals, (1) obtain performance, compensation, and payment records (such as compensation plans, employment contracts, performance or tracking reports, performance evaluations, individual performance agreements, wage or salary adjustment records, personnel files, payroll records, and other records or payments); (2) review the records for adjustments to employee compensation, profit-sharing payments, bonuses, commissions, the provision of anything of value, or other incentive payments; and (3) determine whether such compensation or payment was based on success in securing enrollment or awarding Title IV funds.
- c. Obtain from the institution a list of entities that the institution enters into a contractual agreement with to admit, and/or enroll its students, or to award Title IV funds. For all identified entities, (1) obtain contractual, performance, compensation, and payment records (such as entity compensation plans, contracts between the school and entity, invoices, accounts payable, and other records or payments); (2) review a sample of payments for adjustments to entity compensation, profit-sharing payments, or other incentive payments; and (3) determine whether such compensation or payment was based on success in securing enrollment or awarding Title IV funds.

- d. If the institution has tuition sharing with an entity that provides recruiting services as part of a bundle of services, review the institution's records identified in procedure c for evidence that the contracted entity is related to the institution.

9. Satisfactory Academic Progress

SFA - Title IV Programs

Compliance Requirements Institutions must establish and publish reasonable standards for measuring whether eligible students are maintaining satisfactory academic progress (SAP) in their educational program. The institution's standards are considered reasonable, by 34 CFR 668.16(e) and 668.34, if the SAP policy:

- (1) Is the same as or stricter than the policy for a student enrolled in the same program that is not receiving Title IV student financial aid;
- (2) Provides for consistent application of standards to all students within categories of students and educational programs;
- (3) Provides for the student's academic progress to be evaluated
 - (a) at the end of each payment period if the educational program is either one academic year in length or shorter than an academic year; or
 - (b) for all other educational programs, at the end of each payment period or at least annually to correspond with the end of a payment period;
- (4) Includes a qualitative component, which generally consists of grades that are measurable against a norm, and a quantitative component (where applicable) that consists of a maximum time frame for completion of the educational program. For credit hour programs, the maximum time frame can be measured in credit hours or expressed in calendar time. The maximum time frame must, for an undergraduate program, be no longer than 150 percent of the published length of the educational program ([see Federal Register, Final Rule, September 2, 2020](#)) Under 34 CFR 668.34(a)(5), the quantitative measurement (pace of progression) is no longer required for subscription-based programs, nonterm programs and clock hour programs.
- (5) Provide a policy that, if at the time of each evaluation, the student has not achieved the required GPA, is not successfully completing their program of study at the required pace (if required), or has not completed the program within the maximum time frame, they no longer are eligible for Title IV aid;

- (6) Provides specific procedures for disbursements to students on financial aid warning status or financial aid probation status;
- (7) If the institution permits the student to appeal a determination, provides specific procedures how the student may reestablish eligibility to receive Title IV; basis on which a student may file an appeal; and information that the student must submit regarding why they failed satisfactory academic progress and how they have changed that will now allow the student to make satisfactory academic progress at the next evaluation;
- (8) If the institution does not permit the student to appeal a determination, describes how a student may reestablish their eligibility to receive Title IV assistance; and
- (9) Provides for notification to the students of their results of an evaluation that impacts their eligibility for Title IV.

Note: Due to the COVID-19 national emergency, attempted credits a student was unable to complete as the result of a COVID-19 related circumstance may be excluded from the quantitative (pace) component of SAP. This flexibility is applicable for SAP assessments made for payment periods that include or begin after March 13, 2020, through the end of the payment period that includes the last date that the national emergency is in effect (section 3509 of the CARES Act. May 15, 2020 electronic announcement).

Audit Objectives: Determine whether the institution's satisfactory academic progress standards meet the regulatory requirements to be considered reasonable.

Suggested Audit Procedures

- a. Ascertain from a review of the institution's published satisfactory academic progress policy whether it contains the required elements to be considered reasonable.

10. Additional Locations

Compliance Requirements: The *Eligibility and Certification Approval Report* (ECAR) that ED sends to the institution lists locations where students are eligible for Title IV funds. (Title IV program eligibility for an institution and its programs does not automatically include separate locations and extensions.) If, after receipt of the ECAR, an institution wishes to add a location at which at least 50 percent of an educational program is offered that is licensed and accredited, it must notify ED (34 CFR 600.10(b)).

All institutions are required to report (using the *Electronic Application for Approval to Participate in the Federal Student Aid Programs* or E-App) to ED when adding an additional accredited and licensed location where they will be offering 50 percent or more of an eligible program if the institution wants to disburse FSA program funds to students enrolled at that location.

Institutions must not disburse FSA program funds to students at a new location before the institution has reported that location and submitted any required supporting documents to ED. Once it has reported a new licensed and accredited location, unless it is an institution that is required to apply for approval for a new location under 34 CFR 600.20(c), an institution may disburse FSA program funds to students enrolled at that location.

An institution must report and obtain approval for an additional location where 50 percent or more of an eligible program will be offered if any of the following apply to the institution and/or the additional location—

The institution is provisionally certified.

The institution is on the heightened cash monitoring or reimbursement system of payment.

The institution has acquired the assets of another institution that provided educational programs at that location during the preceding year, and the other institution participated in the FSA programs during that year.

The institution would be subject to a loss of eligibility under the cohort default rate regulations if it adds that location.

The institution was previously notified by ED that it must apply for approval of an additional location.

Note: For any additional location not meeting the approval requirements above, none of the students at that location are eligible for Title IV program funds and all funds disbursed to students at that location are questioned costs.

Audit Objectives Determine if the institution's locations have been approved as eligible for participation in Title IV programs and if the institution submitted notice or an application for approval of additional locations as required.

Suggested Audit Procedures

- a. Through inquiries of management, observation, and review of State and accrediting agency approval documents and school marketing material, identify all locations of the school. Ascertain which locations were designated as eligible locations on the ECAR that was in effect for the audit period.
- b. Ascertain if the institution is offering more than 50 percent of an eligible program at any locations not on the ECAR. If so, determine if the institution notified ED of the additional location or submitted an application for approval of the additional location as required.

11. Program Eligibility

SFA - Title IV Programs

Compliance Requirements: An Educational program is a legally authorized postsecondary program of organized instruction or study that leads to an academic, professional, or vocational degree, or certificate, or other recognized educational credential, or is a comprehensive transition and postsecondary program.

Program eligibility is evaluated based on two measures: intensity of content (clock hours and credit hours) and time (academic years and weeks of instructional time). Measurement of content and time depends on how a program is delivered. ED recognizes four modes of delivering education to students: classroom, distance education, correspondence, and direct assessment.

Mode of Delivery

Classroom

Delivery of education in the classroom is not defined specifically in the regulations, but is in-person contact between a student and an institution's staff at a location controlled by the institution. A location controlled by the institution can include a lab, location of an internship or externship, studio, or other physical location where academic work is required.

Distance Education

Delivery of education through distance education has a number of requirements for this mode of delivery to be acceptable. If a course is offered where students are separated from the instructor and are not being taught in the same physical space, the course is considered a correspondence course if it does not meet the requirements for distance education.

Distance education uses one or more technologies including the internet; one-way and two-way transmissions through open broadcast, closed circuit, cable, microwave, broadband lines, fiber optics, satellite, or wireless communications devices; audio conference; or a combination of technologies with other media used in a course to deliver instruction to students who are separated from the instructor or instructors and to support regular and substantive interaction between the students and the instructor or instructors, either synchronously or asynchronously (34 CFR 600.2 Distance education (1) and (2)).

For purposes of distance education, an instructor is an individual responsible for delivering course content and who meets the qualifications for instruction established by an institution's accrediting agency (34 CFR 600.2 Distance education (3)).

A course offered through distance education must support regular and substantive interaction between the students and the instructor or instructors, either synchronously or asynchronously. An institution demonstrates that a course supports regular interaction

between a student and an instructor or instructors by, prior to the student's completion of a course or competency:

- Providing the opportunity for substantive interactions with the student on a predictable and scheduled basis commensurate with the length of time and the amount of content in the course or competency; and
- monitoring the student's academic engagement and success and ensuring that an instructor is responsible for promptly and proactively engaging in substantive interaction with the student when needed on the basis of such monitoring, or upon request by the student (34 CFR 600.2 Distance education (5)).

Substantive interaction for education delivered through distance education is engaging students in teaching, learning, and assessment, consistent with the content under discussion. In order for a course to be considered offered through distance education, substantive interaction must include at least two of the following -

- Providing direct instruction;
- Assessing or providing feedback on a student's coursework;
- Providing information or responding to questions about the content of a course or competency;
- Facilitating a group discussion regarding the content of a course or competency; or
- Other instructional activities approved by the institution's or program's accrediting agency (34 CFR 600.2 Distance education (4)).

Academic engagement is active participation by a student in an instructional activity related to the student's course of study that is defined by the institution in accordance with any applicable requirements of its State or accrediting agency. In evaluating academic engagement, the regulations provide that it includes, but is not limited to -

- Attending a synchronous class, lecture, recitation, or field or laboratory activity, physically or online, where there is an opportunity for interaction between the instructor and students;
- Submitting an academic assignment;
- Taking an assessment or an exam;
- Participating in an interactive tutorial, webinar, or other interactive computer-assisted instruction;
- Participating in a study group, group project, or an online discussion that is assigned by the institution; or
- Interacting with an instructor about academic matters (34 CFR 600.2 Academic engagement (1) and (2))

The regulations also provide examples of what academic engagement does not include such as living in institutional housing; participating in the institution's meal plan; logging into an online class or tutorial without any further participation; or participating in academic counseling or advisement (34 CFR 600.2 Academic Engagement (3)).

A course delivered through distance education that does not have a mechanism in place to document regular and substantive interaction between a student and instructor or instructors and academic engagement would be considered a correspondence course regardless how the institution classifies the course or program (34 CFR 600.2 Correspondence course (3)).

Correspondence courses

A course offered through correspondence is a course in which the institution provides instructional materials, by mail or electronic transmission, including examinations on the materials, to students who are separated from the instructors. Interaction between instructors and students in a correspondence course is limited, is not regular and substantive, and is primarily initiated by the student. If a course is part correspondence and part residential training, the Secretary considers the course to be a correspondence course. A correspondence course is not considered distance education (34 CFR 600.2 Correspondence Course).

Whether or not an institution offers correspondence courses is important because an institution is not considered eligible for the Title IV, HEA programs if 50 percent of its courses are offered through correspondence or if 50 percent of its students are correspondence students (34 CFR 600.7(a)(1)(i) and (ii)). As noted above, an institution may be offering online courses it believes are distance education courses, but if the courses do not meet the requirements for distance education, they are correspondence courses and will impact the calculation of the proportion of correspondence courses and students offered by the institution for that award year.

Direct assessment

A direct assessment program is a program that, in lieu of credit or clock hours as the measure of student learning, utilizes direct assessment of student learning, or recognizes the direct assessment of student learning by others. The assessment must be consistent with the accreditation of the institution or program utilizing the results of the assessment. ED must approve the first direct assessment program offered at each credential level (34 CFR 600.10(c)(1)(ii) and the institution must report to ED all subsequent direct assessment programs at the same credential level (34 CFR 600.21(a)(12)). (Note: If the institution did not receive approval to offer its first program at each credential level through direct assessment, none of the programs at that credential level offered through direct assessment are eligible programs.) Requirements for direct assessment programs are described under 34 CFR 668.10.

Content

The content of a program for purposes of the Title IV programs is measured in either clock hours or credit hours. It is important to understand the definitions of both credit hours and clock hours because some programs may state that they are measured in credit hours, but in certain circumstances the regulations require those programs be measured and evaluated for program eligibility and student eligibility based on clock hours.

Clock Hours

A clock hour offered in a classroom setting is a period of time consisting of a 50- to 60-minute class, lecture, or recitation in a 60-minute period (34 CFR 600.2 Clock hour (1)(i)). A clock hour in a faculty supervised laboratory, shop training, or internship is 50 to 60 minutes in a 60-minute period (34 CFR 600.2 Clock hour (1)(ii)). A clock hour for a program offered through correspondence is sixty minutes of preparation. in a correspondence course (34 CFR 600.2 Clock Hour (1)(iii)).

For a program offered through distance education a clock hour is 50 to 60 minutes in a 60-minute period of attendance in a synchronous or asynchronous class, lecture, or recitation where there is opportunity for direct interaction between the instructor and students; or an asynchronous learning activity involving academic engagement in which the student interacts with technology that can monitor and document the amount of time that the student participates in the activity. A clock hour in a distance education program does not meet the requirements of this definition if it does not meet all accrediting agency and State requirements or if it exceeds an agency's or State's restrictions on the number of clock hours in a program that may be offered through distance education (34 CFR 600.2 Clock Hour: (1)(iv) and (2)).

No matter how a program measured in clock hours is delivered an institution must be capable of monitoring a student's attendance in 50 out of 60 minutes for each clock hour under this definition (34 CFR 600.2 Clock Hour: (3)).

NOTE: Programs offered through direct assessment are not measured in clock hours. For traditional on ground programs, a clock hour is a period of time consisting of a 50- to 60-minute class, lecture, or recitation in a 60-minute period; or a 50- to 60-minute faculty-supervised laboratory, shop training, or internship in a 60-minute period (34 CFR 600.02 Clock Hour: (1)(i) and (ii)).

Credit Hours

Unless a program is required to use the clock to credit hour conversion, a credit hour is an amount of student work defined by an institution, as approved by the institution's accrediting agency or State approval agency, that is consistent with commonly accepted practice in postsecondary education. A credit hour reasonably approximates not less than one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different period of time; or at least an equivalent amount of work for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours (34 CFR 600.2 *Credit Hour* (1)(i) and (ii)).

The regulations also permit an institution, in determining the amount of work associated with a credit hour, to take into account a variety of delivery methods, measurements of student work, academic calendars, disciplines, and degree levels.

For programs that lead to an associate, bachelor's, professional, or graduate degree, the content and length of the programs is established by state agencies and accrediting agencies. ED generally accepts the content and length established for those programs.

Time

The length of a program, the amount of time to complete the program, is measured in academic years and weeks of instructional time.

Academic Year

An academic year for a credit hour program must include a minimum of 30 weeks of instructional time (34 CFR 668.3(a)(1)(i)) during which a full-time undergraduate student is expected to complete a minimum of 24 semester or trimester credit hours or 36 quarter credit hours (34 CFR 668.3(a)(2)(i)). For a clock-hour program an academic year must include a minimum of 26 weeks of instructional time (34 CFR 668.3(a)(1)(ii)) during which a full-time undergraduate student is expected to complete a minimum of 900 clock-hours (34 CFR 668.3(a)(2)(ii)).

Week of Instructional Time

A week of instructional time for other than distance education or correspondence programs is a week in which at least one day of regularly scheduled instruction or examinations occurs, or, after the last scheduled day of classes for a term or payment period, at least one day of study for final examinations occurs (34 CFR 668.3(b)(2)(i)).

For a program using asynchronous coursework offered through distance education or correspondence, a week of instructional time is a week in which the institution makes available the instructional materials, other resources, and instructor support necessary for academic engagement and completion of course objectives (34 CFR 668.3(b)(2)(ii)(A)); and for asynchronous coursework through distance education, the institution expects enrolled students to perform educational activities demonstrating academic engagement during the week (34 CFR 668.3(b)(2)(ii)(B)).

Eligible Programs

A program is Title IV-eligible if it is provided by an institution that participates in one or more of the Title IV programs and meets the requirements described in 34 CFR 668.8. The first and most important requirement for an eligible program is that it must be included in an institution's accreditation and authorized by the State. Once that requirement is met, if the program is offered by a public or nonprofit institution of higher education and leads to an associate, bachelor's professional, or graduate degree, or is at least two academic years in length and fully acceptable for full credit toward a bachelor's degree, it is an eligible program. (Note: Programs that lead to an associate, bachelor's professional, or graduate degree are generally considered eligible programs.)

If the program does not lead to a degree and is not at least two academic years in length, it must lead to a certificate or other non-degree recognized credential provided by the

institution, provide training that prepares a student for gainful employment in a recognized occupation, and meet ED's minimum program length requirements.

The regulations at 34 CFR 668.8(d) allow an institution to offer three types of programs offered in clock-hours, semester or trimester credit hours, or quarter credit hours (668.8(d)(1) and (2)).

The first type of program must require a minimum of 15 weeks of instruction; must be at least 600 clock hours, 16 semester or trimester hours or 24 quarter hours and may admit as regular students persons who have not completed the equivalent of an associate degree (34 CFR 668.8(d)(1)).

The second type of program must require a minimum of 10 weeks of instruction, must be at least 300 clock hours, 8 semester or trimester hours, or 12 quarter hours and must either be a graduate or professional program or admit as regular students only persons who have completed the equivalent of an associate degree (34 CFR 668.8(d)(2)).

The regulations also allow an institution to offer a "short-term" program that includes fewer than 600 clock hours and admits students who have not completed the equivalent of an associate degree. Such programs qualify only for Direct Loan funds. These programs may only be offered in clock-hours and cannot be offered using semester credit hours or quarter credit hours. They require a minimum of 10 weeks of instruction, beginning on the first day of classes and ending on the last day of classes or examinations and must be at least 300 clock hours but less than 600 clock hours and provide undergraduate training that prepares a student for gainful employment in a recognized occupation.

In addition, short-term programs must meet 70 percent completion and 70 percent placement rate requirements (34 CFR 668.8(d)(3)(v)) described in more detail below.

Appendix B provides a flowchart of the process for determining program eligibility.

Other Programs

A small number of institutions offer approved comprehensive transition and postsecondary programs and teacher certification programs where the institution does not award a credential. Please see the Federal Student Aid Handbook, Volume 2 for more information about these types of programs.

Programs Requiring an Evaluation of Credit Hours and Clock-to-Credit Conversion

Under the regulations, if an institution offers an undergraduate educational program in credit hours, the appropriate conversion formula must be applied unless: 1) The program is at least two academic years in length (a minimum of 60 weeks of instructional time) and provides an associate degree, a bachelor's degree, a professional degree, or an equivalent as determined by the Department; or 2) Each course within the program is acceptable for full credit toward a single associate degree, bachelor's degree, or professional degree provided by that institution, or equivalent degree as determined by

the Department, provided that the institution's degree requires at least two academic years of study and the institution can demonstrate that students enroll in, and graduate from the degree program.

(34 CFR 668.8(k)). If the appropriate number of credit hours have not been assigned to a program, all aid to students in those programs must be recalculated based on the correct conversion supported by clock hours.

For a program offered in semester or trimester credit hours without an exemption, each credit hour must include at least 30 clock hours of instruction (34 CFR 668.8(l)(1)). Programs offered in quarter credit hours without an exemption must include at least 20 clock hours of instruction (34 CFR 668.8(l)(2)). The institution must perform this conversion on a course-by-course basis and must award Title IV aid to students using the correct conversion calculation. More information on the clock-to-credit conversion calculation is available in the Federal Student Aid Handbook, Volume 2, Chapter 2, under "Determining Program Eligibility and Clock-Hour to Credit-Hour Conversions."

Minimum Program Completion and Placement Rates

A "short-term" program that is a minimum of 10 weeks of instruction, beginning on the first day of classes and ending on the last day of classes or examinations; is at least 300 clock hours but less than 600 clock hours; provides undergraduate training that prepares a student for gainful employment in a recognized occupation; and admits as regular students some persons who have not completed the equivalent of an associate degree must have a substantiated completion rate of at least 70 percent and a substantiated placement rate of at least 70 percent (34 CFR 668.8(e)(1)(i) and (ii)).

To calculate its completion rate, the institution must -

1. Determine the number of regular students who were enrolled in the program during the award year.
2. Subtract from the number of students enrolled in the program during the award year, the number of regular students who, during that award year, withdrew from, dropped out of, or were expelled from the program and were entitled to and actually received, in a timely manner a refund of 100 percent of their tuition and fees.
3. Subtract from the total obtained in 2 above the number of students who were enrolled in the program at the end of that award year.
4. Determine the number of regular students who, during that award year, received within 150 percent of the published length of the educational program the degree, certificate, or other recognized educational credential awarded for successfully completing the program.
5. Divide the number determined under 4 above by the total obtained under 3 above of this section (34 C.F.R., 668.8(f)).

To calculate its placement rate, the institution must –

1. Determine the number of students who, during the award year, received the degree, certificate, or other recognized educational credential awarded for successfully completing the program.
2. Of the total obtained who completed the program determined in 1 above, determine the number of students who, within 180 days of the day they received their degree, certificate, or other recognized educational credential, obtained gainful employment in the recognized occupation for which they were trained or in a related comparable recognized occupation and, on the date of this calculation, are employed, or have been employed, for at least 13 weeks following receipt of the credential from the institution.
3. Divide the number of students determined under 2 above by the total obtained under 1 above 34 C.F.R. 668.8(g)(1).

An institution must document that each student determined to have obtained gainful employment in a recognized occupation used in the placement rate calculation obtained gainful employment in a recognized occupation. Examples of satisfactory documentation of a student's gainful employment include, but are not limited to -

- A written statement from the student's employer;
- Signed copies of State or Federal income tax forms; and
- Written evidence of payments of Social Security taxes.

Audit Objective: Determine whether the programs offered by the institution are eligible programs.

Suggested Audit Procedures

- a. Through inquiries of management, observations, and review of State and accrediting agency approval documents and school marketing material, identify any direct assessment programs offered by the institution. Review approval letter to determine whether ED has approved the institution's first direct assessment program at each credential level.
- b. Through inquiries of management, observations, and review of State and accrediting agency approval documents and school marketing material, identify any program offered in credit hours that is not at least two academic years in length (a minimum of 60 weeks of instructional time) and leads to an associate degree, a bachelor's degree, a professional degree, or an equivalent as determined by the ED; or each course within the program is acceptable for full credit toward a single associate degree, bachelor's degree, or professional degree provided by that institution, or equivalent degree as determined by the ED, provided that the institution's degree requires at least two academic years of study and the institution can demonstrate that students enroll in, and graduate from the degree program. Select a sample of these programs that includes coverage of all available modes of delivery (classroom, distance, and correspondence) and apply the appropriate clock to credit hour conversion formula on each course in the

program to verify that the institution applied the appropriate clock to credit hour conversion formula.

- c. For the sample of programs identified in procedure b, using the correct number of credit hours (as determined in procedure b), evaluate each program's eligibility, using Appendix B as a guide, considering the students allowed to be admitted to the program, mode of delivery requirements for content, and mode of delivery requirements for time.
- d. Through review of ED approvals, identify any short-term programs (at least 300 clock hours but less than 600 clock hours) and substantiate the school's calculation of its completion and placement rates by (1) selecting a random sample of the regular students who were enrolled during the award year for which the most recent completion rate was calculated and testing to verify if each student in the sample was included appropriately in each step of the rate's calculation, as described in 34 C.F.R. 668.8(f); and (2) selecting a random sample of the students who graduated during the award year for which the most recent placement rate was calculated and testing to verify if each student in the sample was included appropriately in each step of the rate's calculation, as described in 34 CFR 668.8(g).

12. Gramm-Leach-Bliley Act–Student Information Security

SFA - Title IV Programs

Compliance Requirements The Gramm-Leach-Bliley Act (Pub. L. No. 106-102) (GLBA) requires financial institutions to explain their information-sharing practices to their customers and to safeguard sensitive data (16 CFR 314). The Federal Trade Commission considers Title IV-eligible institutions that participate in Title IV Educational Assistance Programs as “financial institutions” and subject to the Gramm-Leach-Bliley Act because they appear to be significantly engaged in wiring funds to consumers (16 CFR 313.3(k)(2)(vi)). Institutions agree to comply with GLBA in their Program Participation Agreement with ED. Institutions must protect student financial aid information, with particular attention to information provided to institutions by ED or otherwise obtained in support of the administration of the Federal student financial aid programs (16 CFR 314.3; HEA 483(a)(3)(E) and HEA 485B(d)(2)). ED provides additional information about cybersecurity requirements at <https://studentprivacy.ed.gov/security>. ED also issued an Electronic Announcement on GLBA compliance that can be found at [Updates to the Gramm-Leach-Bliley Act Cybersecurity Requirements | Knowledge Center](#).

On December 9, 2021, the FTC issued final regulations for 16 CFR Part 314 to implement the GLBA information safeguarding standards that institutions must implement. These regulations significantly modified the requirements that institutions must meet under GLBA. The regulations established minimum standards that institutions must meet. The FTC stated that it “believes many of the requirements set forth in the

Final Rule are so fundamental to any information security program that the information security programs of many financial institutions will already include them if those programs are in compliance with the current Safeguards Rule.” Institutions are required to be in compliance with the revised requirements no later than June 9, 2023.

Institutions are required to develop, implement, and maintain a comprehensive information security program that is written in one or more readily accessible parts. The regulations require the written information security program to include nine elements for institutions with 5,000 or more customers, (16 CFR 314.3(a)). The written information security program for institutions with fewer than 5,000 customers must address seven elements (16 CFR 314.3(a) and 16 CFR 314.6). In the preamble to the Final Rule, the FTC stated, “Proposed § 314.4 [Elements] altered the current Rule’s required elements of an information security program and added several new elements.” The FTC also stated, “[t]he elements for the information security programs set forth in this section [16 CFR 314.4] are high-level principles that set forth basic issues the programs must address, and do not prescribe how they will be addressed.” The elements that an institution must address in its written information security program are at 16 CFR 314.4. At a minimum, an institution’s written information security program –

- Designates a qualified individual responsible for overseeing and implementing the institution’s information security program and enforcing the information security program in compliance (16 CFR 314.4(a)).
- Provides for the information security program to be based on a risk assessment that identifies reasonably foreseeable internal and external risks to the security, confidentiality, and integrity of customer information (as the term customer information applies to the institution) that could result in the unauthorized disclosure, misuse, alteration, destruction, or other compromise of such information, and assesses the sufficiency of any safeguards in place to control these risks (16 CFR 314.4(b)).
- Provides for the design and implementation of safeguards to control the risks the institution identifies through its risk assessment (16 CFR 314.4(c)). At a minimum, the institution’s written information security program must address the implementation of the minimum safeguards identified in 16 CFR 314.4(c)(1) through (8). The eight minimum safeguards that the written information security program must address are summarized as follows:
 - Implement and periodically review access controls. .
 - Conduct a periodic inventory of data, noting where it’s collected, stored, or transmitted.
 - Encrypt customer information on the institution’s system and when it’s in transit.
 - Assess apps developed by the institution
 - Implement multi-factor authentication for anyone accessing customer information on the institution’s system
 - Dispose of customer information securely
 - Anticipate and evaluate changes to the information system or network.
 - Maintain a log of authorized users’ activity and keep an eye out for unauthorized access.

- Provides for the institution to regularly test or otherwise monitor the effectiveness of the safeguards it has implemented (16 CFR 314.4(d)).
- Provides for the implementation of policies and procedures to ensure that personnel are able to enact the information security program (16 CFR 314.4(e)(1)).
- Addresses how the institution will oversee its information system service providers (16 CFR 314.4(f)).
- Provides for the evaluation and adjustment of its information security program in light of the results of the required testing and monitoring; any material changes to its operations or business arrangements; the results of the required risk assessments; or any other circumstances that it knows or has reason to know may have a material impact the institution's information security program (16 CFR 314.4(g)).

The first element that an institution's written information security program must address is the designation of an individual with responsibility for implementing and enforcing an institution's written information security program. The regulations refer to this individual as the Qualified Individual. If an institution has not designated a Qualified Individual, it is not in compliance with the GLBA requirements. The Qualified Individual, has ultimate responsibility and accountability for implementing and enforcing the institution's information security program (16 CFR 314.4(a)). The regulations do provide for an institution to use a service provider as the Qualified Individual. In cases where an institution uses a service provider as the Qualified Individual, the institution must –

- Retain responsibility for compliance with GLBA;
- Designate a senior member of its personnel responsible for direction and oversight of the Qualified Individual; and
- Require the service provider or affiliate to maintain an information security program that protects the institution in accordance with the requirements of the regulations at 16 CFR Part 314(a)(1) through (3).

Because the written information security program may be in one or more readily accessible parts and the Qualified Individual is responsible for implementing and monitoring the information security program, it is ED's expectation that the Qualified Individual would be able to provide the written information security program that addresses the elements required for the written information security program to the auditors.

Audit Objectives Determine whether the institution designated a Qualified Individual responsible for implementing and monitoring the institution's information security program.

Determine whether the institution's written information security program addresses the required minimum seven elements.

Suggested Audit Procedures

- a. Verify that the institution has designated a Qualified Individual responsible for implementing and monitoring the institution's information security program.
- b. Verify that the institution has a written information security program and that the written information security program addresses the remaining six required minimum elements.

13. Federal Perkins Loan Liquidation*SFA - Title IV Programs*

Compliance Requirements For an institution that decided to stop participating in the Federal Perkins Loan program (Perkins) (Assistance Listing 84.038), the institution is responsible for returning any unspent funds (34 CFR section 668.14(b)(25)). The institution must perform the end-of-participation procedures in which it must (a) notify ED of the intent to stop participating in Perkins (34 CFR section 668.26(b)(1)); (b) purchase any outstanding loans left in its Perkins portfolios or assign them to ED (34 CFR sections 674.8(d), 674.17(a)(2), and 674.45(d)(2)); and (c) maintain program and fiscal records of all Perkins funds since the most recent Fiscal Operations Report (FISAP) was submitted, and reconcile this information at least monthly (34 CFR section 674.19(d)). The FISAP form is available at <https://fsapartners.ed.gov/knowledge-center/topics/campus-based-processing-information/fisap-form-and-instructions>.

ED has compiled its guidance on the Perkins loan program wind-down, liquidation, and related issues at <https://fsapartners.ed.gov/knowledge-center/library/program/Perkins%20Loan>. In addition to the Guide, the website also includes a [Federal Perkins Loan Frequently Asked Questions | Knowledge Center](#) and other information. The website is updated by ED as additional guidance is developed.

Audit Objectives Determine whether the institution ceasing to participate in the Perkins loan program has properly performed end-of-participation procedures.

Suggested Audit Procedures

- a. Review, evaluate, and document procedures that the institution used to notify ED of its intent to liquidate its Perkins loan portfolios.
- b. If the institution has completed the liquidation of its Perkins loan portfolio, ascertain that the institution has either purchased or assigned to ED any Perkins loans with outstanding balances.
- c. If the process of liquidating outstanding loans has not been completed, verify that the institution has begun to assign those loans to ED.

- d. Ascertain that the institution, as part of its procedures for maintaining program and fiscal records for all transactions that occurred after the most recent FISAP was filed, reconciled the following information:
- (1) All loans for the total number of borrowers that make up the portfolio have been accounted for, including retired loans (including loans purchased) and loans assigned to ED (including validation of the computed accumulated interest charged on the loans);
 - (2) Service cancellation data that will be counted in Part III, *Fiscal Report* (Section A, lines 7–25 and 35–52), and all of the data that will be in Part III, *Cumulative Repayment Information* (Section C, lines 1.1–5.4);
 - (3) The Federal Capital Contribution (FCC) that will be reported at the end of fiscal year under *Fund Activity* (Section B, lines 1–4);
 - (4) The Institutional Capital Contribution (ICC) that will be reported at the end of fiscal year under *Fund Activity* (Section B, line 6); and
 - (5) Overall cash-on-hand or excess cash amounts (this overall cash-on-hand amount would include payment to the Perkins fund for any loans the institution may have purchased) (Section A, Line 1.1).
- e. If the liquidation process is complete, validate that the distributional shares of the final capital distribution are calculated using the Over-time Calculation provided in page nine of the Perkins Liquidation Procedures and that the federal portion is returned to the US Treasury.

IV. OTHER INFORMATION

While the programs included in this cluster are generally similar in their intent, administration, documentation, etc., there are differences among them. Because of space considerations, this cluster supplement does not list all of the differences, exceptions to general rules or nuances pertaining to specific programs. Auditors should use regulations and guidance applicable to the year(s) being audited when auditing the SFA programs.

SFA - Title IV Programs

Several waivers related to the COVID-19 national emergency apply at least as long as the national emergency persists. The COVID-19 national emergency began in March of 2020 and is set to expire on March 1, 2023 if President Biden does not publish in the Federal Register a notice continuing the emergency declaration. At the time this supplement was drafted, the Biden Administration had communicated its plans to extend the national emergency declaration to May 11, 2023, and then end the emergency on that date. Auditors should review the Federal Register for any notice on the continuation or end of the COVID-19 national emergency. Because the national emergency was in effect for at least part of the period covered by this Compliance

Supplement, institutions remain obligated to comply with requirements related to such waivers. More information about sunset dates for COVID-19 waivers and flexibilities can be found in an [Electronic Announcement published January 15, 2021](#).

Pell Payment Data

All Pell Payment Data for an award year must be submitted by September 30 after the award year. Adjustments for Pell grants not claimed by September 30 can be made if the first audit report for the period in which the unclaimed Pell grants were made contains a finding that the institution made proper Pell awards for which it has not received either reimbursement or credit.

APPENDIX A

STUDENT FINANCIAL ASSISTANCE PROGRAMS

STUDENT ELIGIBILITY COMPLIANCE REQUIREMENTS

Requirements	PELL	IASG	FWS	FSEOG	TEACH	DIRECT LOAN	HSPL/PCL /LDS	NSL/NFLP	SDS
1. A regular student enrolled or accepted for enrollment in an eligible program (34 CFR 600.2, 668.32(a)(1)(i), 690.75, 675.9, 676.9, 685.200, 686.11, 20 USC 1070h; 42 CFR 57.206(a) and 57.306(a), 42 USC 293a(d)(2)) ¹ unless meeting an exception.	x	x	x	x	x	x	x	x	
2. U.S. Citizen, National, or provides evidence from the U.S. Citizenship and Immigration Services that he or she is a permanent resident or in the U.S. with the intention of becoming a citizen or permanent resident (eligible noncitizen) (34 CFR 668.32(d), 668.33(a), 690.75, 675.9, 676.9, , 685.200, 686.11, and 20 USC 1070h) and, for HPL/PCL/LDS, an alien lawfully admitted for permanent residence in the U.S. or a citizen of the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Republic of the Marshall Islands, or of the Federated States of Micronesia (42 CFR 57.206(a) and 57.306(a))	x	x	x	x	x	x	x	x	
3. Has financial need and total awards do not exceed need (34 CFR 675.9(c), 676.9(c), 685.200(a)(2)(i), 690.63, 20 USC 1070a, 42 CFR 57.206(b) and 57.306(b); 42 USC 293a(d)(2)); 42 USC 297n-1(c)(2))	x ²		x	x		x ³	x	x	x
4. Does not owe a Title IV grant overpayment(34 CFRs 668.32(g)(4), 690.75, 675.9, 676.9, , 685.200, 686.11, 20 USC 1070h; 42 CFRs 57.206 and 57.306)	x	x	x	x	x	x			
5. Not in default on any student loans (34 CFRs 668.32(g)(1), 690.75, 675.9, 676.9, 685.200, 686.11, 20 USC 1070h; 42 CFRs 57.206 and 57.306)	x	x	x	x	x	x	x		
6. Has not obtained loan amounts that exceed annual or aggregate loan limits (34 CFR 668.32(g) (2))	x	x	x	x	x	x	x		
7. Does not have property subject to a judgment lien for a debt owed to the United States (34 CFR 668.32(g)(3))	x	x	x	x	x	x			
8. Must maintain good standing, or satisfactory academic progress (34 CFRs 668.16, 668.32(f), 668.34, 690.75, 675.9, 676.9, 685.200, 686.11, 20 USC 1070h; 42 CFR 57.306; 42 USC 293a(d)(2))	x	x	x	x	x	x	x	x	
9. Has a valid Social Security Number ⁴ (34 CFRs 668.32(i), 668.36, 675.9, 676.9, , 685.200, 686.11, 20 USC 1070h)	x	x	x	x	x	x			
10. Has a high school diploma, its recognized equivalent, or another indication of high school completion status, or qualifies for one of the ability-to-benefit (ATB) alternatives(34 CFR 668.32(e), 690.75, 675.9, 676.9, 685.200, 686.11, 20 USC 1070h)	x	x	x	x	x	x			

Requirements	PELL	IASG	FWS	FSEOG	TEACH	DIRECT LOAN	HSPL/PCL /LDS	NSL/NFLP	SDS
11. Is not enrolled in either an elementary or secondary school (34 CFR 668.32(b))	x	x	x	x	x	x			
12. In the case of a student who has been convicted of, or has pled nolo contendere or guilty to, a crime involving Title IV funds, has completed the repayment of such assistance (34 CFR 668.32(m))	x	x	x	x	x	x			
13. For an undergraduate student, has not completed coursework for a first baccalaureate (34 CFR 668.32(c)) ⁵	x	x		x	x				
14. An undergraduate student has received for award year, a SAR or determination of eligibility or ineligibility for a Federal Pell Grant (34 CFR 676.10, 685.200(a)(1)(iii), 690.75, 20 USC 1070h)	x	x		x		x			
15. Is enrolled or accepted for enrollment as an undergraduate student at the institution (34 CFR 676.9(b), 690.75(a)(2))	x	x		x					
16. Is not incarcerated (34 CFR 600.2, 668.32(c)(2)(ii) and (c)(3))	x ⁶	x				x			
17. If the student is not a regular student enrolled or accepted for enrollment in an eligible program (see item 1 above), the student is enrolled in preparatory coursework necessary for enrollment in an eligible program for not longer than one consecutive 12-month period (34 CFR 668.32(a)(1)(ii), 685.203(a)(6))						x			
18. If the student is not a regular student enrolled or accepted for enrollment in an eligible program (see item 1 above), the student is enrolled or accepted for enrollment as at least a half-time student (except for TEACH) at an eligible institution in a program necessary for a professional credential or certification from a state that is required for employment as a teacher in an elementary or secondary school in that state (34 CFR 668.32(a)(1)(iii))	x	x	x		x	x			
19. Is an undergraduate student enrolled or accepted for enrollment at the institution (34 CFR 668.32(a), 675.9(b), and 685.101(b))	x	x	x	x	x	x			
20. Is a graduate or professional student enrolled or accepted for enrollment at the institution (34 CFR 668.32(a), 675.9(b), and 685.101(b))			x		x	x			
21. Is enrolled or accepted for enrollment, on at least a half-time basis in an institution that participates in the Direct Loan Program (34 CFR 668.32(a)(2), 685.200(a)(1)(i))						x			
22. Parents can receive a PLUS loan if the parent does not have an adverse credit history and conditions in items 2, 4, 5, 10, and 14 above are met by the parent and the student otherwise meets all student eligibility requirements (34 CFR 668.32 and 685.200(c)(2))						x			
23. Students met FSEOG selection criteria (34 CFR 676.10)				x					

Requirements	PELL	IASG	FWS	FSEOG	TEACH	DIRECT LOAN	HSPL/PCL /LDS	NSL/NFLP	SDS
24. Has signed a TEACH Grant agreement to serve or repay (34 CFR 686.11(a)(1)(ii) and 668.12)					x				
25. Is enrolled in a TEACH Grant-eligible institution in a TEACH Grant-eligible program (34 CFR 686.11(a)(1)(iii))					x				
26. Is completing coursework and other requirements necessary to begin a career in teaching or plans to complete such coursework and requirements prior to graduating (34 CFR 686.11(a)(1)(iv))					x				
27. For the purposes of a student in a first post-baccalaureate program, has not completed the requirements for a post-baccalaureate program as described in 34 CFR 686.2(d) (34 CFR 668.32(c)(4)(ii))					x				
28. If in the first year of an undergraduate program, the student has a final cumulative secondary school GPA upon graduation of at least a 3.25; a cumulative GPA of at least 3.25 based on courses taken at the institution through the most-recently completed payment period; or a score above the 75 th percentile (for that period the test was taken) on at least one of the nationally-normed standardized undergraduate admissions test, which may not include a placement test (34 CFR 686.11(a)(1)(v)(A) and (E))					x				
29. If beyond the first year of an undergraduate program, the student has a cumulative GPA of at least 3.25 as determined by the institution, through the most recently completed payment period; or a score above the 75 th percentile (for that period the test was taken) on at least one of the nationally-normed standardized undergraduate, admissions test, which may not include a placement test (34 CFR 686.11(a)(1)(v)(B) and (E))					x				
30. If the student is a graduate student during the first payment period, a cumulative undergraduate GPA of at least 3.25; if the student is a graduate student beyond the first payment period, a cumulative graduate GPA of at least 3.25 through the most-recently completed payment period; or a score above the 75 th percentile (for that period the test was taken) on at least one of the nationally-normed standardized undergraduate, graduate, or post-baccalaureate admissions test, which may not include a placement test (34 CFR 686.11(a)(1)(v)(C), (D), and (E))					x				
31. If the student is a current or former teacher or a retiree, the student is applying for a grant to obtain a master's degree or pursuing certification through a high-quality alternative certification route (34 CFR 686.11(b)(2))					x				

Requirements	PELL	IASG	FWS	FSEOG	TEACH	DIRECT LOAN	HSPL/PCL /LDS	NSL/NFLP	SDS
32. The student is eligible if he or she was less than 24 years old when the covered parent or guardian died, or if 24 years old and over, was enrolled at an institution of higher education at the time of the covered parent or guardian's death (20 USC 1070h)		x							

Notes:

¹ An otherwise-eligible student who is not enrolled as a regular student may be eligible to receive Direct Loan funds if the student is enrolled in preparatory coursework under 668.32(a)(1)(ii) and 685.203(a)(6). Similarly, students who are not enrolled as regular student in programs leading to a degree or certificate may receive Pell and TEACH Grants through enrollment in an eligible postbaccalaureate teacher certification program under limited circumstances under 34 CFR 690.6(c) and 686.3(a).

² The Pell Grant is calculated based on COA and EFC and in accordance with the Pell Payment and Disbursement Schedules published annually by ED, but it is not adjusted to account for other resources or estimated financial assistance.

³ Does not apply to unsubsidized loans and parent loans.

⁴ The requirement for a Social Security Number does not apply to students who are residents of the Federated States of Micronesia, Republic of the Marshall Islands, or Republic of Palau.

⁵ There is an exception for Pell and TEACH Grants if the student meets alternative requirements through enrollment in a postbaccalaureate teacher certification or licensing program under 690.6(c) and 686.3(a).

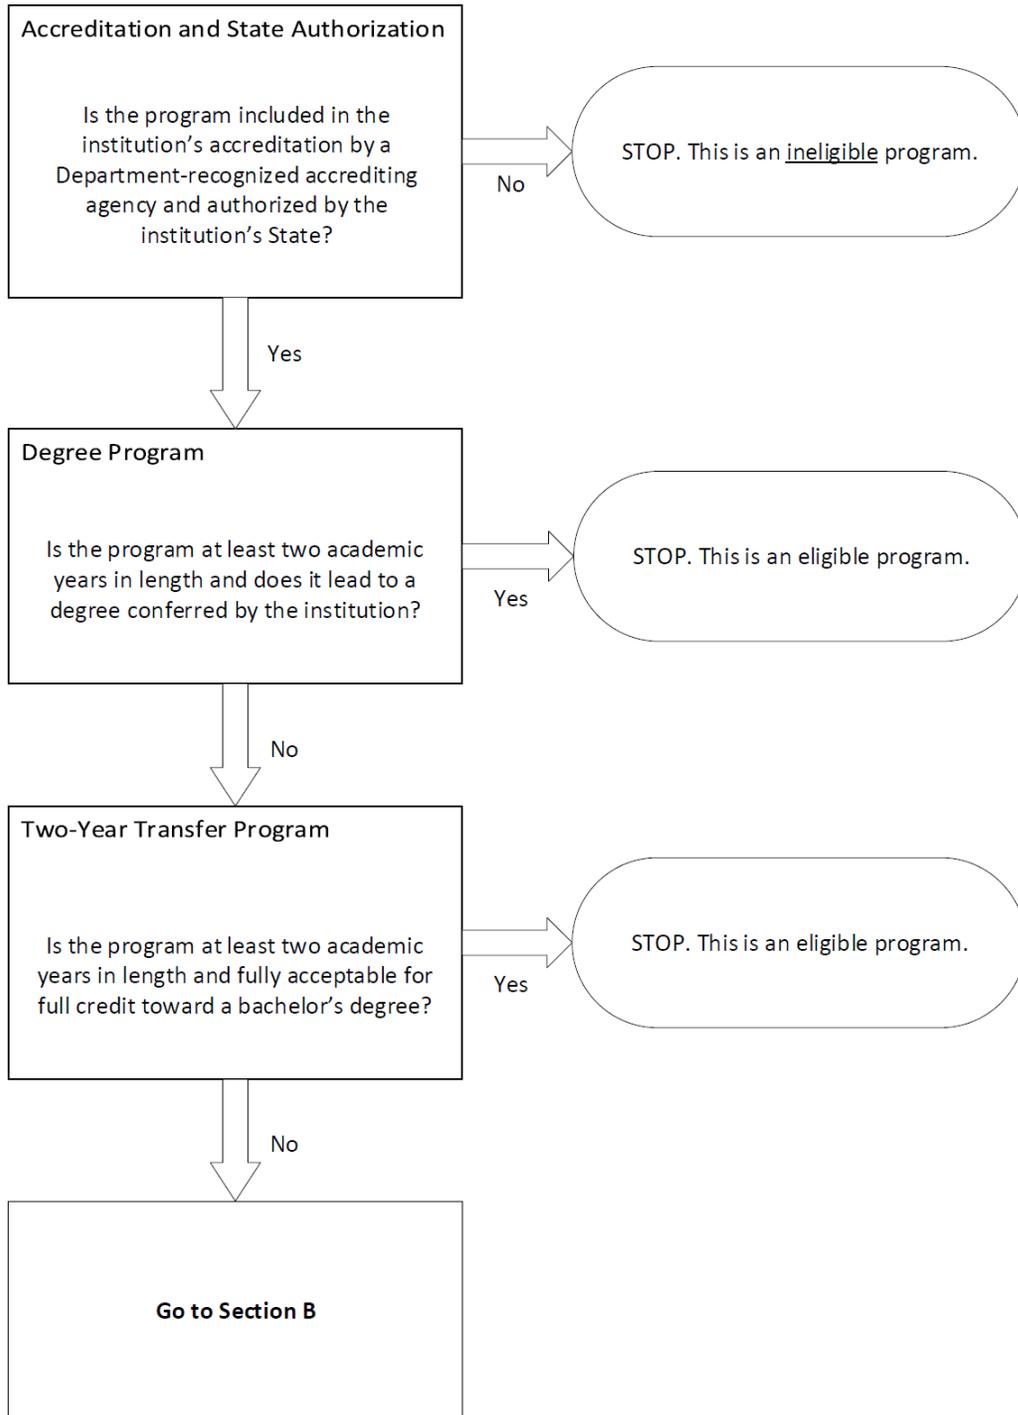

⁶ Students incarcerated in federal and state penal institutions are not eligible for Pell Grants, but those incarcerated in local penal institutions are eligible.

PART 6 - INTERNAL CONTROL

The focus of this part is on internal control over compliance requirements for federal awards (sometimes referred to as internal control over compliance). It is intended for the consideration of both non-federal entities and auditors and includes the following:

- A summary of the requirements for internal control for both non-federal entities receiving federal awards (also referred to as auditee management) and auditors performing audits under 2 CFR section 200 (i.e., the Uniform Guidance);
- A background discussion on important internal control concepts; and
- Appendices that include illustrations of entity-wide internal controls over federal awards (Appendix 1), as well as illustrations of internal controls specific to each type of compliance requirement (Appendix 2).

Uniform Guidance Internal Control Requirements

The 2 CFR section 200.303 requires that non-federal entities receiving federal awards establish and maintain internal control over the federal awards that provides reasonable assurance that the non-federal entity is managing the federal awards in compliance with federal statutes, regulations, and the terms and conditions of the federal awards. The 2 CFR section 200.514 requires auditors to obtain an understanding of the non-federal entity's internal control over federal programs sufficient to plan the audit to support a low assessed level of control risk of noncompliance for major programs, and, unless internal control is likely to be ineffective, plan the testing of internal control over major programs to support a low assessed level of control risk for the assertions relevant to the compliance requirements for each major program and perform testing of internal control as planned.

Note: When internal control is likely to be ineffective in preventing and detecting noncompliance, 2 CFR section 200.514 requires the auditor to report a significant deficiency or material weakness, assess control risk at the maximum, and consider whether additional compliance tests are required because of the ineffective internal control.

The objectives of internal control over compliance as found in 2 CFR section 200.1, are as follows:

1. Transactions are properly recorded and accounted for in order to:
 - a) Permit the preparation of reliable financial statements and federal reports;
 - b) Maintain accountability over assets; and
 - c) Demonstrate compliance with federal statutes, regulations, and the terms and conditions of the federal award;
2. Transactions are executed in compliance with:
 - a) Federal statutes, regulations, and the terms and conditions of the federal award that could have a direct and material effect on a federal program; and

- b) Any other federal statutes and regulations that are identified in the Compliance Supplement; and
3. Funds, property, and other assets are safeguarded against loss from unauthorized use or disposition.

The 2 CFR section 200.303 indicates that the internal controls required to be established by a non-federal entity receiving federal awards “should” be in compliance with guidance in “Standards for Internal Control in the Federal Government,” issued by the Comptroller General of the United States (the Green Book) or the “Internal Control Integrated Framework” (revised in 2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The 2 CFR 200.101 (b) states that “throughout this part when the word “must” is used it indicates a requirement. Whereas use of the word “should” or “may” indicates a best practice or recommended approach rather than a requirement and permits discretion. Therefore the Uniform Guidance is recommending that non-federal entities use either the Green Book or COSO internal control frameworks but does not require it. Q-67 indicates that, while non-federal entities must have effective internal control, there is no expectation or requirement that the non-federal entity document or evaluate internal controls prescriptively in accordance with COSO, the Green Book, or this part of the Supplement, or that the non-federal entity or auditor reconcile technical differences between them. Q-67 goes on to say that non-federal entities and their auditors will need to exercise judgment in determining the most appropriate and cost-effective internal control in a given environment or circumstance to provide reasonable assurance for compliance with federal program requirements.

However, non-federal entities and auditors should be aware that the Uniform Guidance also includes requirements for non-federal entities to have written policies or procedures supporting compliance with certain compliance requirements. The areas of procurement and subrecipient monitoring are examples of compliance requirements that contain such requirements.

COSO/Green Book Concepts Relevant to Internal Control Over Compliance

The following is a summary level discussion of internal control concepts covered in both the COSO and Green Book frameworks that are relevant to internal control over compliance. Non-federal entities and auditors should review COSO and the Green Book in their entirety to ensure an appropriate understanding of these concepts.

Internal control is generally defined as a process effected by an entity’s oversight body, management, and other personnel that provides reasonable assurance that the objectives of an entity will be achieved.

With respect to federal awards, a system of internal control is expected to provide a non-federal entity with reasonable assurance that the entity’s objectives relating to compliance with federal statutes, regulations, and the terms and conditions of federal awards will be achieved.

Internal control is not one event or circumstance, but a dynamic and iterative process—actions that permeate an entity’s activities and that are an integral part of the way auditee management runs the entity. Embedded within this process are controls consisting of policies and procedures.

These policies reflect auditee management or oversight body statements of what should be done to effect internal control. Procedures consist of actions that implement a policy.

Processes, which are conducted within or across operating units or functional areas, are managed through the fundamental auditee management activities, such as planning, executing, and checking. Internal control is integrated with these processes. Internal control embedded within these processes and activities are likely more effective and efficient than stand-alone controls.

Internal control provides many benefits to an entity. It provides auditee management with added confidence regarding the achievement of objectives, provides feedback on how effectively an entity is operating, and helps reduce risks affecting the achievement of the entity's compliance objectives.

Auditee management exercises judgment in balancing the cost and benefit of designing, implementing, and operating internal controls. In exercising that judgment, management considers both qualitative and quantitative factors, as well as the specific risks of their federal awards and operations.

The Green Book and COSO are both organized by five components of internal control as shown in the table below. COSO identifies 17 principles related to the five components of internal control, each of which has important attributes which explain the principles in greater detail. The Green Book adapts these principles for a government environment.

Summary of Green Book and COSO Components and Principles of Internal Control

Components of Internal Control	Principles
Control Environment	<ol style="list-style-type: none"> 1. Demonstrate Commitment to Integrity and Ethical Values 2. Exercise Oversight Responsibility 3. Establish Structure, Responsibility, and Authority 4. Demonstrate Commitment to Competence 5. Enforce Accountability
Risk Assessment	<ol style="list-style-type: none"> 6. Define Objectives and Risk Tolerances 7. Identify, Analyze, and Respond to Risks 8. Assess Fraud Risk 9. Identify, Analyze, and Respond to Change
Control Activities	<ol style="list-style-type: none"> 10. Design Control Activities 11. Design Activities for the Information System 12. Implement Control Activities
Information and Communication	<ol style="list-style-type: none"> 13. Use Quality Information 14. Communicate Internally 15. Communicate Externally
Monitoring	<ol style="list-style-type: none"> 16. Perform Monitoring Activities 17. Evaluate Issues and Remediate Deficiencies

To determine if an internal control system is effective, auditee management assesses the design, implementation, and operating effectiveness of the five components and 17 principles. If a principle or component is not effective, or the components are not operating together in an integrated manner, then an internal control system cannot be effective.

Because both COSO and the Green Book have the same components of internal control and similar principles, for consistency, this part and its appendices are primarily based on the Green Book.

Illustrative Internal Controls Appendices

The section in this part, “Uniform Guidance Internal Control Requirements,” describes the auditor’s responsibility for internal control under the Uniform Guidance. The appendices to this part are intended to illustrate internal controls for each of the five components of internal control to assist non-federal entities and their auditors in complying with their respective requirements.

Appendix 1 provides illustrative entity-wide controls over compliance for four of the five above described components of internal control as follows: control environment, risk assessment, information and communication, and monitoring. For this purpose, entity-wide controls are considered governance controls that apply to most, if not all, types of compliance requirements for one or more federal programs. See Appendix 1 for more information about entity-wide controls.

Appendix 2 provides illustrative specific controls for control activities, the remaining component of internal control, for each type of compliance requirement. For this purpose, specific controls are considered operational-level controls that apply to individual types of compliance requirements. See Appendix 2 for more information about specific controls.

Important Note: Auditors are cautioned that the approach taken in the appendices to present four of the five control components as being subject to entity-wide controls and the remaining component as being subject to specific controls may not reflect how a particular entity designs and implements internal control.

For example:

- Some entities may establish specific controls (versus entity-wide controls) relating to certain of the control components discussed in Appendix 1 as typically having entity-wide controls.
- Federal programs may also be administered under multiple internal control structures. This occurs when multiple organizational units (for example, locations or branches) are involved in the administration of federal programs such as a university that has several campuses administering a federal program, each having differing internal control structures.

In these situations, auditors should obtain an understanding of controls and test controls at a level that reflects the way management designs and implements internal control, as well as prepare related audit documentation at that level.

Finally, the illustrative controls in the appendices to this part are not intended to be all-inclusive or a checklist of required internal control characteristics. That is, non-federal entities could have adequate internal control even though some or all of the illustrative controls are not present. Further, non-federal entities could have other appropriate internal controls operating effectively that have not been included among the illustrations. Non-federal entities need to exercise judgment in determining the most appropriate and cost-effective internal control in a given environment or circumstance, to provide reasonable assurance of compliance with federal program requirements.

Appendix 1 - Illustrative Entity-Wide Controls

This appendix provides illustrative entity-wide controls over compliance for four of the five components of internal control as follows: control environment, risk assessment, information and communication, and monitoring. It is organized this way because many non-federal entities consider and implement internal control in this manner.

For this purpose, entity-wide controls are considered governance controls that apply to most, if not all, types of compliance requirements for one or more federal programs. Entity-wide controls are generally governance controls established at the entity-wide level versus at the federal program or type of compliance requirement level. For example, an entity may establish controls related to the control environment for all types of compliance requirements for an individual federal program or even across all federal programs. When non-federal entities implement internal controls in this manner, auditors may obtain an understanding of controls and test controls at the entity-wide level, as well as prepare related documentation at that level.

Green Book Principles

The Green Book includes a description of the five components of internal control and their related principles. The descriptions of the components and principles for control environment, risk assessment, information, and communication, and monitoring below are taken directly from the Green Book.

Note: The following provides illustrative entity-wide controls for four of the five components of internal control as follows: control environment, risk assessment, information and communication, and monitoring. It is not intended to be used as a checklist of required internal control characteristics. In addition, caution should be used as the entity-wide control approach used below may not reflect the way management considers and implements internal control. Refer to the introduction to this appendix above to ensure an appropriate understanding of this appendix and how to use it. Importantly, as noted in both the Green Book and COSO, all five components of internal control have to be present and functioning for internal control to be designed effectively.

See Appendix 2 for illustrative specific controls for control activities, the remaining component of internal control, for each type of compliance requirement.

Control Environment Component

The foundation for an internal control system. It provides the discipline and structure, which affect the overall quality of internal control. It influences how objectives are defined and how control activities are structured. The oversight body and management establish and maintain an environment throughout the entity that sets a positive attitude toward internal control.

Principle 1. The oversight body and management should demonstrate a commitment to integrity and ethical values.

Illustrative Controls for Principle 1:

- A code of conduct is developed, documented, communicated and periodically updated
- A code of conduct explicitly prohibits inappropriate management override of established controls
- Conflict of interest statements are obtained periodically from those charged with governance (TCWG) and key management

Principle 2. The oversight body should oversee the entity's internal control system.

Illustrative Controls for Principle 2:

- TCWG have the requisite skills and knowledge to provide effective oversight pertaining to federal award compliance issues and related risk
- TCWG periodically review ethical and moral conduct violations including stakeholder complaints regarding issues of federal award compliance with senior management
- A whistle blower submission process exists to receive and evaluate concerns by employees regarding questionable practices inclusive of issues impacting federal award compliance/non-compliance
- An audit committee charter exists and addresses federal compliance oversight
- The effectiveness and performance of the audit committee is evaluated annually
- TCWG have effective two-way communication with external and internal auditors
- TCWG review risk assessments including the risks of fraud for impact on federal compliance objectives

Principle 3. Management should establish an organizational structure, assign responsibility, and delegate authority to achieve the entity's objectives.

Illustrative Controls for Principle 3:

- Policies, procedures and organizational charts provide for segregation of duties within and among processes and controls
- Policies and procedures are in place to ensure that compliance responsibilities are assigned to particular positions

Principle 4. Management should demonstrate a commitment to recruit, develop, and retain competent individuals.

Illustrative Controls for Principle 4:

- Job descriptions include appropriate knowledge and skill requirements
- Appropriate training is provided that is relevant to responsibilities over compliance objectives
- Personnel with federal award compliance responsibilities are properly trained on their responsibilities

Principle 5. Management should evaluate performance and hold individuals accountable for their internal control responsibilities.

Illustrative Controls for Principle 5:

- Appropriate performance evaluations are provided that establish goals, accountability, and feedback
- Violations of the code of conduct result in remedial actions to deter others
- Consequences for noncompliance with the code of conduct are communicated and enforced
- Penalties for inappropriate behavior are adequate and publicized

Risk Assessment Component

Having established an effective control environment, management assesses the risks facing the entity as it seeks to achieve its objectives. This assessment provides the basis for developing appropriate risk responses. Management assesses the risks the entity faces from both external and internal sources.

Principle 6. Management should define objectives clearly to enable the identification of risks and define risk tolerances.

Illustrative Controls for Principle 6:

- Management establishes an effective risk assessment process that includes the use of a specific risk matrix
- Management identifies key compliance objectives for types of compliance requirements
- Management identifies and evaluates risk tolerances related for controls over compliance

Principle 7. Management should identify, analyze, and respond to risks related to achieving the defined objectives.

Illustrative Controls for Principle 7:

- Management analyzes and identifies compliance risks
- TCWG have oversight over significant areas of risks
- Employees receive appropriate training to address identified risks
- Risk mitigation strategies are implemented by management

Principle 8. Management should consider the potential for fraud when identifying, analyzing, and responding to risks.

Illustrative Controls for Principle 8:

- Management reviews audit findings to identify fraud risks

- If an internal audit function exists, it reviews fraud risks and the internal control structure
- Management reviews the internal control structure for potential fraud risks
- TCWG periodically review a report of the potential fraud risks identified and actions taken in response to those risks during the period

Principle 9. Management should identify, analyze, and respond to significant changes that could impact the internal control system.

Illustrative Controls for Principle 9:

- Management identifies changes such as new personnel, new technology, expanded operations, rapid growth, or changes in the operating environment and adjusts risk assessments to address those changes
- Management analyzes compliance requirement modifications to properly adjust risk
- A communication process with regulators is in place to identify changes in compliance requirements
- Changes in philosophies or employee turnover are evaluated by management for any potential impact on related controls

Control Activities Component – See Appendix 2 for this component and related principles 10, 11, and 12.

Information and Communication Component

Management uses quality information to support the internal control system. Effective information and communication are vital for an entity to achieve its objectives. Entity management needs access to relevant and reliable communication related to internal as well as external events.

Principle 13. Management should use quality information to achieve the entity's objectives.

Illustrative Controls for Principle 13:

- Financial and programmatic systems capture, accurately process, and timely report pertinent information
- The accounting system provides for separate identification of federal and non-federal transactions
- Adequate source documentation exists to support amounts and items reported
- Reports are provided timely to managers for review and appropriate action
- Management verifies the sources and reliability of information used in making management decisions and executes monitoring controls
- When information is derived from the organization's information technology (IT) systems:
 - Security administration
 - Written policies and procedures regarding IT security exist

- Regarding managing user access rights, (1) rights are approved and granted based on job responsibilities; (2) rights, including super user access, are reviewed periodically; and (3) access is revoked in a timely manner
- Duties of security personnel do not include performing compliance processes or controls, programming, or IT management
- Remote and third party access rights are managed to include timely revocation of rights
- Program maintenance
 - Policies around the change management process are documented, approved, and communicated
 - Segregation of duties exists between development, testing, and production
 - Changes to productions are logged and reviewed
- Program execution
 - Policies around the program execution process are documented, approved, and communicated
 - Production job scheduling change requests are approved by appropriate IT personnel
 - The scheduling system is restricted from accessing anything that is not in the production library (applications and databases)
 - Schedule exceptions are monitored to determine if they are properly resolved

Principle 14. Management should internally communicate the necessary quality information to achieve the entity's objectives.

Illustrative Controls for Principle 14:

- Relevant internal and external information is communicated and delivered to employees responsible for federal award compliance on a timely basis
- Effective channels for communication throughout the organization exist

Principle 15. Management should externally communicate the necessary quality information to achieve the entity's objectives.

Illustrative Controls for Principle 15:

- Relevant information is communicated to external parties including subrecipients, vendors, federal granting agencies, and third party processors on a timely basis
- Effective channels exist for communications with federal granting agencies, oversight agencies and cognizant agencies

Monitoring Component

Activities management establishes and operates to assess the quality of performance over time and promptly resolves the findings of audits and other reviews.

Principle 16. Management should establish and operate monitoring activities to monitor the internal control system and evaluate the results

Illustrative Controls for Principle 16:

- Management monitors the effective operation of critical control activities
- Management monitors the use of effective self-review procedures in critical compliance areas
- Management monitors the effective review of timely and reliable metrics or key performance indicators, including reconciliation with data from financial or other reporting systems to ensure its accuracy and completeness
- Management monitors the reconciliation of key performance indicators with data from financial or other reporting systems, including reconciliation with data from financial or other reporting systems to ensure its accuracy
- If an internal audit function exists, it is staffed with qualified and competent personnel and it reports directly to TCWG
- If an internal audit function exists, its responsibilities and audit plans are aligned to the organization's risk assessment

Principle 17. Management should remediate identified internal control deficiencies on a timely basis.

Illustrative Controls for Principle 17:

- Findings, recommendations and other observations by independent auditors, internal auditors, and federal auditors are distributed and reviewed by those individuals responsible for compliance with federal requirements.
- Control deficiencies and instances of noncompliance are reported to and evaluated by management and TCWG, if applicable, for resolution on a timely basis
- Management periodically monitors the corrective action plans related to known noncompliance and control deficiencies and the organization's progress to remediating the findings

Appendix 2 – Illustrative Specific Controls for Control Activities

While Appendix 1 includes illustrative entity-wide controls over compliance for four of the five components of internal control (i.e., control environment, risk assessment, information and communication, and monitoring), this appendix provides illustrative specific controls over compliance for control activities, the remaining component of internal control. It is organized this way because many non-federal entities consider and implement internal control in this manner.

For this purpose, specific controls are considered operational-level controls that apply to individual types of compliance requirements. For example, an entity may establish controls related to control activities at the applicable type of compliance requirement level (e.g., allowable costs, eligibility, reporting) for the federal programs that it participates in. When non-federal entities implement internal controls in this manner, auditors should obtain the understanding of controls and test specific controls related to control activities and prepare related documentation at that level.

Control Activities Component

The actions management establishes through policies and procedures to achieve objectives and respond to risks in the internal control system, which includes the entity's information system. The Green Book includes the following three principles for control activities:

- Principle 10. Design Control Activities – management should design control activities to achieve objectives and respond to risks
- Principle 11. Design Activities for the Information System – management should design the entity's information system and related control activities over technology to achieve objectives and respond to risks
- Principle 12. Implement Control Activities – management should implement control activities through policies

Understanding a Process vs. Controls

A process is a series of actions that lead to a particular result—for example, charging costs to a federal award. The process is where noncompliance with allowable costs/cost principles or other requirements could occur. Often the potential noncompliance is referred to as a “what-could-go-wrong” (WCGW). A control is designed to prevent or timely detect noncompliance. However, a control does not itself introduce noncompliance into a process. When identifying controls, it is important to first consider the processes and the resulting WCGWs. As controls should be designed, implemented, and maintained to be responsive to risk and WCGWs, it is difficult to determine the appropriateness of specific controls without understanding the process and the WCGWs.

Controls may be viewed as part of a process and the flow of transactions, but controls need to be separately identified. When it is difficult to identify the difference between the process and controls, there is often a missing control. Several important related considerations follow:

- Process owners are often referred to as the doers and the control owner is often referred to as the reviewer.
- A well-designed system of internal control assigns a control to each WCGW. An entity could have one control that addresses one WCGW, a suite of controls that address one WCGW, or one control that addresses multiple WCGWs.
- Controls are often described in terms of a control category, such as authorization, management review, segregation of duties, or system access.

Understanding Controls Activities

Control activities may be preventative or detective. A preventive control is designed to avoid an unintended event or result at the time of the transaction while a detective control is designed to discover an unintended event or result after the initial processing has occurred but before the ultimate objective has concluded. Entities usually employ a mix of both.

Controls need to be designed such that they *would* prevent or detect a WCGW—not just that they *could* prevent or detect a WCGW. Controls also need to be evaluated for the precision of their efforts. Generally, management has a greater need for precision and redundancy than do auditors. That is, external auditors are focused on material noncompliance, whereas management is focused on compliance.

Importantly, as noted in both the Green Book and COSO, all five components of internal control have to be present and functioning for internal control to be designed effectively—that is, control activities on their own are not an effective system of internal controls. Even within control activities, controls rely on the effective design and operation of other controls. For example, a management review control generally uses information produced by the entity. Therefore, the management review control is only effective if there are controls over the information used in the review. Also, general IT controls, typically designed and implemented as entity-wide controls described in Appendix 1, are necessary for the effective operation of application IT controls.

Note: The following provides illustrative specific controls for control activities (one of the five components of internal control) for each type of compliance requirement. It is not intended to be used as a checklist of required internal control characteristics. In addition, caution should be used as the specific control approach used below only for control activities may not reflect the way management considers and implements internal control. Refer to the introduction to this appendix above to ensure an appropriate understanding of this appendix and how to use it. Importantly, as noted in both the Green Book and COSO, all five components of internal control have to be present and functioning for internal control to be designed effectively.

See Appendix 1 for illustrative entity-wide controls for the other four components of internal control (i.e., control environment, risk assessment, information and communication, and monitoring).

PART 6 – APPENDIX 2

Illustrative Specific Controls – Control Activities (excerpted from Greenbook).

Principle 10. Design Control Activities: management should design control activities to achieve objectives and respond to risks.

A. ACTIVITIES ALLOWED OR UNALLOWED B. ALLOWABLE COSTS/COST PRINCIPLES	C. CASH MANAGEMENT	E. ELIGIBILITY	F. EQUIPMENT AND REAL PROPERTY MANAGEMENT
<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as miscoding, inappropriate cost transfers, budget overages, segregation of duties concerns, unauthorized changes to system configurations, fraud, unauthorized payments, etc.</p>	<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as time lapses between funds transfer and disbursement, fraud, liquidity pressures, inherent risks with subrecipients, etc.</p>	<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as providing benefits to ineligible individuals, calculating amounts to be received for or on behalf of individuals incorrectly, unauthorized changes to system configurations, fraud, unauthorized payments, etc.</p>	<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process for equipment and real property, such as inaccurate or incomplete recordkeeping, inappropriate use, unidentified dispositions, segregation of duties concerns, fraud, loss, damage, theft, etc.</p>
<p>Management reviews applicable award agreements or contracts for specific allowable activities requirements, budget parameters, indirect rates, fringe benefit rates, and those activities/costs that require pre-approval by the awarding agency and documents such features into a grant approval form which is submitted to accounting personnel for review and approval before being input into the system as the profile for the grant.</p>	<p>Management reviews applicable award agreements or contracts to determine applicability of drawdown method (advance or reimbursement) to develop its own control activities and to inform its establishment of a method for subrecipients, as applicable.</p>	<p>Management reviews applicable award agreements or contracts and identifies specific eligibility requirements including benefits to be paid.</p>	<p>Management reviews applicable award agreements or contracts and identifies specific equipment and real property requirements.</p>

A. ACTIVITIES ALLOWED OR UNALLOWED B. ALLOWABLE COSTS/COST PRINCIPLES	C. CASH MANAGEMENT	E. ELIGIBILITY	F. EQUIPMENT AND REAL PROPERTY MANAGEMENT
<p>Supervisors review and approve invoices, cost allocations, efforts of personnel, fringe benefits and indirect charges for allowability, adherence to cost principles, accuracy, and completeness.</p>	<p>Requests for reimbursement are reviewed/authorized prior to submission by reviewing supporting documents/schedules/reports to ensure amounts have been paid with the organization's funds prior to the reimbursement request. (Reimbursement)</p>	<p>Accuracy and completeness of data used to determine eligibility requirements are reviewed and agreed to support as necessary by staff and reviewed by knowledgeable supervisor.</p>	<p>Property additions purchased with grant funds are recorded timely and compared to source documents for accurate and complete recording.</p>
<p>Chart of accounts segregates unallowable costs/activities into discrete accounts to help ensure they are not coded to federal awards; directly or indirectly.</p>	<p>Cash flow statements/forecasts are prepared and reviewed to determine the immediate cash needs of the federal program. (Advance)</p>	<p>Manual checklists or automated processes used when making eligibility determinations are reviewed and approved by a knowledgeable supervisor.</p>	<p>Title/deeds associated with real property purchased with grant funds is maintained in a secure location and access is limited to authorized personnel.</p>
<p>On a monthly basis, the grant supervisor reviews the budget vs. actual report investigating unusual or unexpected variances and documents results of follow-up work performed.</p>		<p>Calculations of amounts to be received for or on behalf of participants are reperfomed by supervisor.</p>	
<p>For changes in indirect rates due to new Negotiated Indirect Cost Rate Agreements (NICRAs) or reconciliations between provisional and actual indirect rates, the grant supervisor reviews the journal entry adjusting those costs by re-performing the calculation.</p>	<p>Drawdowns are reviewed/authorized by supervisors to ensure that amount requested minimizes the time elapsing between the transfer of funds from the US Treasury/Pass-Through Entity and their disbursement. (Advance)</p>	<p>Exception/edit reports are reviewed timely to identify potential ineligible participants/payments.</p>	<p>Leases associated with leasehold improvements purchased with grant funds have appropriate language identifying the improvements as federal property.</p>
<p>Journal entries to transfer costs from one project to another are reviewed for appropriateness and approved.</p>	<p>Drawdowns are reviewed by supervisors to ensure available program income, rebates, refunds, contract settlements, audit</p>	<p>Management periodically reviews documents/files/reports to ensure benefits are discontinued timely when eligibility requirements are no</p>	<p>Property and equipment listings associated with federal funds are reviewed periodically by knowledgeable officials to ensure completeness and accuracy.</p>

A. ACTIVITIES ALLOWED OR UNALLOWED B. ALLOWABLE COSTS/COST PRINCIPLES	C. CASH MANAGEMENT	E. ELIGIBILITY	F. EQUIPMENT AND REAL PROPERTY MANAGEMENT
	recoveries, and interest earned is disbursed prior to requesting additional federal funds. (Advance)	longer met, or period of eligibility expires.	
	End of award close-out reconciliations are performed over cumulative program expenditures and requests for federal funds to ensure completeness and accuracy of draws.		Annual analysis of property and equipment dispositions is documented and reviewed for adherence to federal regulations by knowledgeable supervisors.
	Periodic reconciliations of excess draws and interest to be remitted are reperformed by supervisory personnel.		A sample of physical inventory counts are reperformed by a supervisor to ensure accuracy.
	Templates for subrecipient agreements include standard provisions for cash management methodology requirements.		
Individuals who initiate transactions are different from those approving the transactions and those recording the transactions in the general ledger.	Segregation of duties exists between those responsible for processing program expenditures and those processing drawdown/reimbursement requests.	Segregation of duties exists between those determining a participant's eligibility and those reviewing/approving eligibility.	Segregation of duties exists between those accounting for property and those responsible for safeguarding the property.
Where segregation of duties is not practical, management selects and develops alternative control activities.	Where segregation of duties is not practical, management selects and develops alternative control activities.	Where segregation of duties is not practical, management selects and develops alternative control activities.	Where segregation of duties is not practical, management selects and develops alternative control activities.

Principle 10. Design Control Activities: management should design control activities to achieve objectives and respond to risks.

G. MATCHING, LEVEL OF EFFORT, EARMARKING	H. PERIOD OF PERFORMANCE	I. PROCUREMENT AND SUSPENSION AND DEBARMENT	J. PROGRAM INCOME
<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as unallowable funding sources for amounts claimed as match, unsupported or unreasonable valuations of in-kind contributions, unallowable activities/costs, unsupported effort indicators, use of unapplied indirect costs as match without pre-approval, utilization of same data for more than one match when prohibited, failure to track minimum or maximum earmarking criteria, segregation of duties concerns, fraud, etc.</p>	<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as miscoding, in appropriate cost transfers or adjustments for transactions outside the award period, segregation of duties concerns, unauthorized changes to system configurations, fraud, failure to secure approvals or extensions for coding costs outside the original performance period, etc.</p>	<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as unidentified or unaddressed conflicts of interest, fraud, segregation of duties concerns, unauthorized procurements, unauthorized changes to vendor master file, failure to follow documented policies, failure to document history of procurement, failure to document cost/price analysis, inappropriate procurement method used, suspended or debarred vendor/subrecipient contracted with, etc.</p>	<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as failure to identify and use program income, use of incorrect method to use program income, fraud, segregation of duties concerns, etc.</p>
<p>Management reviews applicable award agreements or contracts for specific matching, level of effort, and earmarking requirements including any unique requirements (such as pre-approval by the granting agency to recoup unapplied indirect costs as matching) and documents such features into a grant approval or other grant summary form which is submitted to accounting and/or programmatic personnel, as appropriate for review and approval before being input in the financial system to set up a grant match record or other programmatic tracking system as a profile for the grant.</p>	<p>Management reviews applicable award agreements or contracts for specific period of performance requirements, including any unique provisions about pre-award spending, extensions, and refunds of unobligated cash.</p>	<p>Management creates and requires the use of standard forms and templates for purchase orders, contracts, requests for proposals/bids, cost/price analyses, bid evaluation, etc. Standard documentation protocol for the history of procurements exists including rationale for the method of procurement (micro-purchase, small purchase, sealed bid, competitive proposal, or noncompetitive proposal), selection of the contract type (fixed price, cost reimbursement, etc.), cost/price analysis, basis for contractor selection/rejection, etc.</p>	<p>Management reviews applicable award agreements or contracts for provisions specific to program income, including identifying likely program income based on award purpose and the use of Deduction, Addition, or Cost Sharing/Matching methods for using program income and documents such features into a grant approval form which is submitted to accounting personnel for review and approval before being input into the system as the profile for the grant.</p>
<p>Supervisory review ensures matching contributions are supported by 3rd party evidence, or other procedures are</p>	<p>Supervisors review and approve invoices, cost allocations, efforts of personnel, fringe benefits and</p>	<p>Supervisors review and approve procurement and contracting decisions</p>	<p>On a monthly basis, supervisors review application of program income to the award to ensure that</p>

G. MATCHING, LEVEL OF EFFORT, EARMARKING	H. PERIOD OF PERFORMANCE	I. PROCUREMENT AND SUSPENSION AND DEBARMENT	J. PROGRAM INCOME
performed to ensure they are from non-federal sources and were not used as match for another federally assisted program.	indirect charges to ensure they were incurred during the period of performance.	for compliance with federal and organizational policies.	the proper method was used (Deduction, Addition, or Cost Sharing/Matching), applied correctly and was supported by program income records.
		Management reviews applicable award agreements, contracts, budgets, and other appropriate sources to identify potential covered transactions. Standard forms or templates are used to document verification that parties are not suspended or debarred.	Chart of accounts segregates program income from other income accounts to ensure it is captured completely and accurately.
Supervisors review monthly reporting of cumulative matching, level of effort and earmarking data and resolution of deficiencies, variances or unexpected results is documented.	At the beginning and ending of the period of performance, the grant supervisor reviews activity posted to the federal award investigating any unusual postings, adjustments or variances and documented results of follow-up work performed.		On a monthly basis, recorded program income is reconciled with supporting documentation such as invoices, registration logs, loan ledgers, rent rolls, etc. by a supervisor.
	Journal entries or other adjustments to transfers cost into the federal award costs are reviewed for appropriateness and to ensure costs are within the period of performance.		
		Responsible officials reconcile goods/services received with those procured including evaluating performance in accordance with terms, conditions and specifications of contracts or purchase orders.	
		Responsible officials review and resolve conflicts of interest on a regular basis.	
Segregation of duties exists between those accounting for match, level of effort, and earmarking requirements	Individuals who initiative transactions are different from those approving the transactions	Individuals who initiate procurements are different from those recording the	Individuals who collect cash or other receipts are different from those who deposit receipts, generate

G. MATCHING, LEVEL OF EFFORT, EARMARKING	H. PERIOD OF PERFORMANCE	I. PROCUREMENT AND SUSPENSION AND DEBARMENT	J. PROGRAM INCOME
and those reviewing and approving the reporting of such.	and those recording the transaction in the general ledger.	resulting transactions in the general ledger or making disbursements.	invoices, record general ledger activity, and reconcile the bank statement.
Where segregation of duties is not practical, management selects and develops alternative control activities.	Where segregation of duties is not practical, management selects and develops alternative control activities.	Where segregation of duties is not practical, management selects and develops alternative control activities.	Where segregation of duties is not practical, management selects and develops alternative control activities.

Principle 10. Design Control Activities: management should design control activities to achieve objectives and respond to risks.

L. REPORTING	M. SUBRECIPIENT MONITORING	N. SPECIAL TESTS AND PROVISIONS
<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as lack of current knowledge of reporting requirements, data input errors, segregation of duties concerns, fraud, inconsistent application of accounting standards, lack of documented bridge between source data and final reports for any reconciling items and lack of or inappropriate source data or analysis used as the basis of performance or special reporting.</p>	<p>Management identifies and puts into effect actions needed to carry out specific responses to risks identified in the risk assessment process, such as missing federal and pass-through entity requirements in subawards, risks inherent with specific subrecipients, inappropriate/ineffective subrecipient monitoring, etc.</p>	<p>Illustrative internal controls cannot be provided because special tests and provisions are unique to the various federal programs.</p>
<p>Management reviews applicable award agreements or contracts for specific reporting requirements and establishes a reporting calendar for review and approval.</p>	<p>Subrecipient agreements are reviewed and approved by knowledgeable supervisors to ensure all compliance requirements are captured, that information is consistent between pass-through entity records and the subaward, and that all required elements are included.</p>	
	<p>Management tracks subaward notifications and maintains an inventory of executed subrecipient agreements.</p>	
<p>Knowledgeable supervisors review and approve reports for completeness and accuracy, including comparing to source documentation (general ledger, third party evidence or other reliable records) and any reconciliations between source data to final reporting.</p>	<p>Knowledgeable supervisor reviews subrecipient risk assessments to ensure they address compliance risks and Uniform Guidance requirements and approves individual subrecipient monitoring plans.</p>	
<p>Management periodically reviews the completeness and accuracy of and adherence to the reporting calendar.</p>	<p>Management requires the use of a standard template for use for all sub recipient agreements inclusive of all required elements outlined in Uniform Guidance.</p>	
	<p>Documentation and conclusions of results of subrecipient oversight activities including the items below are review by supervisory personnel:</p> <ul style="list-style-type: none"> • Award authorization • Site visits • Financial performance, monitoring, and/or audit reports • Grant budgets and advance or reimbursement requests 	

L. REPORTING	M. SUBRECIPIENT MONITORING	N. SPECIAL TESTS AND PROVISIONS
	<ul style="list-style-type: none"> • Technical assistance provided • Assessment of findings, corrective action, and management's decision as applicable 	
	Supervisors periodically reconcile subrecipient monitoring calendar and planed monitoring activities to actual monitoring activities to ensure monitoring is taking place as planned.	
Segregation of duties exists between those preparing and those reviewing and filing required reports	Segregation of duties exist between those performing the monitoring and those approving the conclusions made about the subrecipient' s compliance.	
Where segregation of duties is not practical, management selects and develops alternative control activities.	Where segregation of duties is not practical, management selects and develops alternative control activities.	

Principle 11. Design Activities for the Information System: management should design the entity’s information system and related control activities over technology to achieve objectives and respond to risks.

A. ACTIVITIES ALLOWED OR UNALLOWED B. ALLOWABLE COSTS/COST PRINCIPLES	C. CASH MANAGEMENT	E. ELIGIBILITY	F. EQUIPMENT AND REAL PROPERTY MANAGEMENT
The information system configuration prevents expenditures from being recorded to the expenditure categories in excess of the budget without appropriate review and approval.		The information system configuration prevents a participant from being approved as eligible until all criteria required by the program requirements are input.	
The information system configuration is set up such that invoices, payroll authorization forms and time sheets are only routed to personnel who have the authority to approve them for coding and payment.		The information system is configured so that amounts to be received for or on behalf of a participant conform with minimums, maximums and other criteria as set forth by the grant or contract.	The information system is configured to track federal property and equipment separate from non-federal property and equipment.
The information system is configured to only allow transactions posted to the project account that are coded to pre-selected expense categories.		The information system is set up such that the approval of a participants’ eligibility is routed to personnel who have the authority to approve.	
			Periodic reconciliation of assets within the information system is performed between the general ledger/inventory records.
Access to processes and control activities in information systems specific to allowable activities/costs is limited to authorized individuals.	Access to the external electronic drawdown information system(s) is (are) restricted to authorized individuals.	Access to processes and control activities in information systems specific to eligibility is limited to authorized individuals.	Access to information systems used to track property is limited to authorized individuals.
Changes to the grant profile within the system are restricted to authorized personnel.			

Principle 11. Design Activities for the Information System: management should design the entity’s information system and related control activities over technology to achieve objectives and respond to risks.

G. MATCHING, LEVEL OF EFFORT, EARMARKING	H. PERIOD OF PERFORMANCE	I. PROCUREMENT AND SUSPENSION AND DEBARMENT	J. PROGRAM INCOME
The information system configuration prevents amounts or other data from being applied as match for more than one federal funding source.	The information system configuration prevents expenditures from being recorded to the federal award outside the period of performance.		
	The information system configuration is set up such that invoices, payroll authorization forms and time sheets are routed only to personnel who have the authority to approve them for coding and payment.	The information system (procurement card system, purchase order system, etc.) is configured for purchasing/approval hierarchy and any quantity or monetary limits depending on the purchasing authority of the user.	
The information system is configured such that the grant match expense record is linked to original grant expense record and only allows transactions posted to the same pre-selected expense categories.		The information system is configured to only allow use of pre-approved vendors in a vendor master file.	The information system is configured to only allow application of program income based on the method outlined in the grant approval form.
Access to information system used to track matching, matching and level of effort is limited to authorized individuals.	Access to processes and control activities in information systems specific to period of performance is limited to authorized individuals.	Access to processes and control activities in information systems specific to procurement such as the vendor master file is limited to authorized individuals.	Access to processes and control activities in information systems specific to applying program income to grants and capturing program income are restricted to authorized personnel.
Changes to the grant profile within the system are restricted to authorized personnel.	Changes to the grant profile within the system are restricted to authorized personnel.	Changes to the vendor master file are restricted to authorized personnel.	Changes to the grant profile within the system are restricted to authorized personnel.

Principle 11. Design Activities for the Information System: management should design the entity’s information system and related control activities over technology to achieve objectives and respond to risks.

L. REPORTING	M. SUBRECIPIENT MONITORING	N. SPECIAL TESTS AND PROVISIONS
Access to processes and control activities information in systems specific to gathering information for reporting is limited to authorized individuals.		
Access to external information systems used to report is limited to those preparing and reviewing reports.		

Principle 12. Implement Control Activities: management should implement control activities through policies.

A. ACTIVITIES ALLOWED OR UNALLOWED B. ALLOWABLE COSTS/COST PRINCIPLES	C. CASH MANAGEMENT	E. ELIGIBILITY	F. EQUIPMENT AND REAL PROPERTY MANAGEMENT
<p>Written policies/procedures exist outlining processes and control activities for costs coded to federal awards (award set- up, cost of personnel and fringe, direct costs other than personnel, indirect costs, etc.).</p>	<p>Written policies/procedures exist outlining processes and control activities for requesting advances/reimbursement, ensuring program income and other refunds/rebates are utilized before drawing down funds, monthly reconciliations are performed and monitoring subrecipients for cash management compliance.</p>	<p>Written policies/procedures exist outlining processes and control activities for determining eligibility of participants and amounts awarded, as applicable.</p>	<p>Written policies/procedures exist outlining processes and control activities for: (1) acquiring, safeguarding, maintaining, and disposing of federal equipment and real property; (2) ensuring all property acquired with federal awards, including capitalized leasehold improvements, is detailed including the source of funds used to purchase the property (including the Federal Award Identification Number or FAIN), date of acquisition, cost, date of disposition, a description of the property (including serial number), the condition of the property, and the location of the property; (3) ensuring reconciliations of physical property to the federal award agreements is performed at least annually; and (4) identifying dispositions and to ensure compliance with disposition instructions during the award and upon close out.</p>

Written policies/procedures exist outlining processes and control activities specific to matching, level of effort and earmarking and including acceptance support for in-kind contributions used as match and an adherence to an organization's processes and control activities for Activities Allowed or Unallowed and Allowable Costs/Cost Principles, as appropriate.	Written policies/procedures exist outlining process and control activities for costs coded to federal awards ensuring that such costs are applied within the period of performance including the process/controls for securing approvals for pre-award spending, as applicable, and the process/controls to ensure that liquidation (payments) made at the end of the period are made within the allowed time period.	Written policies/procedures exist to address Uniform Guidance requirements such as conflict of interests, free and open competition regulations, and solicitation procedures. With respect to suspension and debarment, written policies exist outlining processes and control activities to verify organizations are not contracting or sub-awarding under covered transactions with parties who are suspended or debarred. Policies outline the frequency with which verification takes places, how that verification is documented and the acceptable methods of verification (checking the EPLS system, collecting a certification from the party or adding a clause/condition to the covered transaction with the party).	Written policies/procedures exist outlining processes and control activities for program income inclusive of identifying the proper method (Deduction, Addition, or Cost Sharing/Matching), recording program income completely and accurately and using program income in accordance with the specified method.

PART 7 - GUIDANCE FOR AUDITING PROGRAMS NOT INCLUDED IN THIS COMPLIANCE SUPPLEMENT

Purpose

The 2 CFR section 200.514(d)(3) states that for those federal programs not covered in the compliance supplement, the auditor must use the types of compliance requirements (see 12 types of compliance requirements described in Part 3) contained in the compliance supplement (this Supplement) as guidance for identifying the types of compliance requirements to test, and determine the requirements governing the federal program by reviewing the provisions of the federal award, and the laws and regulations referred in such awards.

The purpose of this Part is to provide the auditor with guidance on how to identify the applicable compliance requirements for programs not included in this Supplement for single audits and for program-specific audits when a program-specific audit guide is not available. This Supplement includes only the largest and/or riskiest federal programs. However, more than 1,500 assistance programs are currently funded by the federal government. Therefore, it is likely that the auditor will encounter programs that the auditor is required to test as major programs that are not included in this Supplement. For this reason, the following guidance is provided for the auditor to identify those compliance requirements that should be tested.

Organization of this Supplement

First, a review of how this Supplement is organized will be helpful since the auditor must consider several parts of the Supplement in identifying compliance requirements to be tested. This Supplement comprises the following parts:

Part 1 - Background, Purpose, and Applicability

Part 2 - Matrix of Compliance Requirements

Part 3 - Compliance Requirements

Part 4 - Agency Program Requirements

Part 5 - Clusters of Programs

Part 6 - Internal Control

Part 7 - Guidance for Auditing Programs Not Included in This Compliance Supplement

Appendices

In determining the compliance requirements to test for programs not included in this Supplement, the auditor must refer to parts 3 and 5. Part 3 identifies and describes the 12 types of compliance requirements where noncompliance may have a direct and material effect on a federal program and provides audit objectives and suggested audit procedures. The 12 types of compliance requirements are:

- A. Activities Allowed or Unallowed
- B. Allowable Costs/Cost Principles
- C. Cash Management
- D. (Reserved) (Note: Some agencies have made Davis-Bacon Act (Wage Rate Requirements) a Special Test and Provision; see 20.001 in Part 4 for a cross-cutting section addressing Wage Rate Requirements.)
- E. Eligibility
- F. Equipment and Real Property Management
- G. Matching, Level of Effort, Earmarking
- H. Period of Performance
- I. Procurement and Suspension and Debarment
- J. Program Income
- K. (Reserved)
- L. Reporting
- M. Subrecipient Monitoring
- N. Special Tests and Provisions

Part 5 enumerates those programs that are considered to be clusters of programs as defined in 2 CFR section 200.1. A cluster of programs means federal programs with different Assistance Listing (CFDA) numbers that are defined as a cluster of programs because they are closely related programs and share compliance requirements. Part 5 identifies research and development (R&D) and Student Financial Assistance (SFA) as clusters, as well as certain other clusters.

For programs not included in this Supplement, the auditor must determine the applicable compliance requirements. While a federal program may have many compliance requirements, normally there are only a few key compliance requirements that could have a direct and material effect on the program. Since the single audit process is not intended to cover every compliance requirement, the auditor's focus must be on the 12 types of compliance requirements enumerated in Part 3 of the Supplement. The following are suggested procedures to assist the auditor in making this determination.

Although the focus of this Supplement is on compliance requirements that could have a direct and material effect on a major program, auditors also have responsibility under *Generally Accepted Government Auditing Standards* (GAGAS) for other requirements when specific information comes to the auditors' attention that provides evidence concerning the existence of possible noncompliance that could have a material indirect effect on a major program.

Steps for Identifying Compliance Requirements

Determining what compliance requirements to test involves several steps. The auditor should address the following questions:

1. *What are the program objectives, program procedures, and compliance requirements for a specific program?*

The first step is to gain an understanding of how the program works (e.g., the program objectives and procedures) and determine what laws, regulations, and provisions of the federal award (compliance requirements) apply to the program. The auditor should consider the following steps:

- a. Discuss the program with the non-federal entity and, if necessary, the federal agency or, in the case of a subrecipient, the pass-through entity.
- b. Review the federal award and referenced laws and regulations applicable to the program, including any amendments or closeout agreements. The documents or agreements may identify the name and telephone number of a federal contact person or, if a subaward, the contact person for the pass-through entity whom the auditor may wish to contact for additional information.

Note: The auditor should be aware that a particular non-federal entity or federal award may be subject to provisions that are unique to that entity or award. For example, previous noncompliance by a non-federal entity may result in additional requirements to which the non-federal entity must adhere, in order to continue its participation in the federal program. Such provisions generally would not be based on laws and regulations applicable to all awards under the federal program. Reasonable procedures to identify such compliance requirements would be inquiry of non-federal entity management and review of the federal award. Any such requirements identified that could have a direct and material effect on a major program must be included in the audit.

- c. Review the Assistance Listing. The Assistance Listing provides summary information about each program and includes the name and telephone number of a federal contact person. A searchable copy of the Assistance Listing is available at [SAM.gov](https://www.sam.gov) | [Home](#).
- d. If there is a program-specific audit guide or other audit guidance issued by the federal agency's Office of the Inspector General (OIG), the auditor may consider that guidance in identifying the program objectives, program procedures, and compliance requirements. See Part 8 – Appendix 6 of the Supplement for the availability of program-specific audit guides.

- e. Consider other audit guidance, including previously issued guidance, pertaining to the program that has continuing relevance.

2. *Which of the compliance requirements could have a direct and material effect on the program?*

Generally Accepted Government Auditing Standards require that the auditor plan the audit to provide reasonable assurance that the financial statements are free of material misstatement resulting from violations of laws and regulations that have a direct and material effect on the determination of financial statement amounts. The 2 CFR section 200.514(d) requires the auditor to perform procedures to determine whether the non-federal entity has complied with laws, regulations, and the provisions of the federal award that could have a direct and material effect on each major program. Therefore, the auditor must determine which compliance requirements could have a direct and material effect on each major program.

In assessing materiality, the auditor should consider that materiality is based on qualitative as well as quantitative aspects. Also, the auditor should consider whether to set materiality at lower levels in audits of federal programs than private sector audits of financial statements due to the visibility and sensitivity of such programs. Examples of characteristics indicative of compliance requirements that could have a direct and material effect on a major program include:

- a. Noncompliance could likely result in questioned costs.
- b. The requirement affects a large part of the federal program (e.g., a material amount of program dollars).
- c. Noncompliance could cause the federal agency, or pass-through entity, in the case of a subrecipient, to take action, such as seeking reimbursement of all or a part of the award and suspending the recipient's or subrecipient's participation in the program.

3. *Which of the compliance requirements are susceptible to testing by the auditor?*

The auditor is expected to test compliance only for those requirements that are susceptible to testing by the auditor (i.e., the requirements can be evaluated against objective criteria, and the auditor can reasonably be expected to have sufficient basis for recognizing noncompliance). Further, the auditor would not be expected to test for compliance with requirements that the federal agency should have the ability to verify in the normal course of administering the program (e.g., if the requirement is that the non-federal entity must file a report by a certain date, the federal agency should know whether it received the report on time). Characteristics of compliance requirements that auditors are typically expected to test include those:

- a. That are practical to test.
- b. With objective criteria available for the auditor to assess compliance.

- c. Where an audit objective can be written that supports an opinion on compliance.
 - d. When testing adds value, for example:
 - (1) It is likely that the auditor could document the noncompliance in a manner that (a) permits the federal or pass-through entity to take action, or (b) gives the federal or pass-through entity an early warning to initiate a monitoring visit or other contact with the non-federal entity.
 - (2) The federal or pass-through entity does not otherwise have information that verifies compliance.
4. *Into which of the 12 types of compliance requirements does each compliance requirement fall?*

Note: In performing this step, the auditor may find it helpful to prepare a matrix similar to the matrix included in Part 2 for programs included in this Supplement.

The auditor must use the 12 types of compliance requirements listed for identifying which requirements applicable to the program are subject to testing. Not all compliance requirements apply to all programs. Conversely, certain types almost always apply.

- A. **Activities Allowed or Unallowed** almost always applies to federal programs. The auditor should look at the program requirements and federal award documents for what constitutes allowable or unallowable activities.
- B. **Allowable Costs/Cost Principles** almost always applies since most federal programs have charges for goods or services. However, if a program only involves benefits to eligible recipients, with no administrative costs, purchases of goods or services (including salaries and overhead), or allocated costs, then allowable costs may not apply.
- C. **Cash Management** almost always applies to federal programs.
- E. **Eligibility** applies to most federal programs which provide benefits to individuals, groups of individuals, or make subawards. For programs with eligibility requirements, the auditor should review the program laws, regulations, and provisions of federal awards to determine the specific eligibility requirements. Eligibility involves not only individuals but also possibly groups of individuals, geographical areas, or subrecipients. Additionally, the auditor should consider whether continuing, as well as initial, eligibility requirements apply. Furthermore, eligibility involves both who is eligible and the amount of benefits provided to those who are eligible.
- F. **Equipment and Real Property Management** requirements apply to federal programs that allow for purchase equipment or real property.

- G. **Matching, Level of Effort, Earmarking** is not universal, and, if applicable, would be specific to the federal program and often the non-federal entity. Therefore, the auditor will have to review the laws, regulations, and federal awards applicable to the program to determine specific requirements for matching, level of effort, and/or earmarking.
- H. **Period of Performance** almost always applies to federal programs. The federal award often indicates the period during which the funds are available for obligation under the program. The auditor should also look for program requirements regarding carry-over of unused funds to future funding periods, and whether pre-award costs are allowable, to what extent, and under what circumstances.
- I. **Procurement and Suspension and Debarment** applies, in the case of procurement, any time the entity procures goods or services. Suspension and debarment applies to certain procurements and to all subawards.
- J. **Program Income** applies to any program that generates program income (primarily related to the disposition of the income). Program regulations or the federal award may specify additional criteria.
- L. **Reporting** almost always applies to federal programs. The standard financial reports are described in Part 3; however, the federal agency or the pass-through entity may have developed its own forms for financial reporting. These forms may be in addition to or in lieu of the standard federal financial reports and may include electronic submissions. The auditor should determine whether the standard reports are used, and if not, whether other forms are used to report the same or similar information. Information collections (which, as defined in 5 CFR section 1320.3(c), involve 10 or more respondents) by federal agencies must be approved by OMB in accordance with the Paperwork Reduction Act of 1995 (44 USC 3501-3520) and assigned an OMB control number. A federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a valid control number.

For performance reporting and special reporting, if there is a program in this Supplement funded by the same federal agency that requires the same performance or special reporting required by the program for which the auditor is seeking to identify compliance requirements, and this Supplement requires testing of those data, then the auditor should use such guidance in identifying compliance requirements to test. Otherwise, the auditor is only required to test financial reporting. When applicable, the auditor is required to test compliance with the subaward reporting requirement under the Federal Funding Accountability and Transparency Act (FFATA).

- M. **Subrecipient Monitoring** applies when federal awards are passed through to a subrecipient. If the entity is not a pass-through entity, this requirement does not apply.

- N. **Special Tests and Provisions** include those compliance requirements that do not fit the description of the types of compliance requirements discussed above. These will generally be the most difficult type of compliance requirement to identify because, by definition, with the exception of Wage Rate Requirements (previously the Davis-Bacon Act), they are unique to each program. In addition to reviewing the program's federal awards and referenced laws and regulations, the auditor also should make inquiries of the non-federal entity to help identify and understand Special Tests and Provisions.

For each of the types of compliance requirements listed above, except for Special Tests and Provisions, the auditor must consider the compliance requirements and related audit objectives in Part 3. In making a determination not to test a compliance requirement, the auditor must conclude that the requirement either does not apply to the particular non-federal entity or that noncompliance with the requirement could not have a direct and material effect on a major program (e.g., the auditor would not be expected to test Procurement if the non-federal entity charges only small amounts of purchases to a major program). The suggested audit procedures in Part 3 are provided to assist auditors in planning and performing tests of non-federal entity compliance with the requirements of federal programs. Auditor judgment is necessary to determine whether the suggested audit procedures are sufficient to achieve the stated audit objective and whether additional or alternative audit procedures are needed.

Internal Control – Consistent with the requirements of 2 CFR Part 200, Subpart F, 200.514 (c) Part 6 includes audit objectives and suggested audit procedures to test internal control. However, the auditor must determine the specific procedures to test internal control on a case by case basis considering factors such as the non-federal entity's internal control, the compliance requirements, the audit objectives for compliance, the auditor's assessment of control risk, and the audit requirement to test internal control as prescribed in 2 CFR Part 200, Subpart F.

5. *For Special Tests and Provisions, what are the applicable audit objectives and audit procedures?*

For each of the types of compliance requirements discussed above, Part 3 includes audit objectives and suggested audit procedures, except for Special Tests and Provisions. As noted above, Special Tests and Provisions (except for Wage Rate Requirements) are sufficiently unique to every program that including audit objectives and suggested audit procedures is not practicable. Therefore, the auditor will have to develop audit objectives and audit procedures for each identified Special Test and Provision (other than those related to Wage Rate Requirements, which are found in Part 4, 20.001 Wage Rates Cross Cutting Section)) using the guidance described in Part 3 under Special Tests and Provisions.

APPENDIX I

FEDERAL PROGRAMS EXCLUDED FROM THE FORMER A-102 COMMON RULE AND PORTIONS OF 2 CFR PART 200

Background

Certain grant programs (block grant programs enacted under the Omnibus Budget Reconciliation Act of 1981, one special program, open-ended entitlement programs, and other specified programs) were originally exempted from the provisions of the former A-102 Common Rule and current 2 CFR 200. On September 8, 2003 (68 FR 52843-52844), the Department of Health and Human Services (HHS) amended its implementation of the A-102 Common Rule at 45 CFR Part 92 to eliminate the exemption for all of its programs other than the HHS block grants under the Omnibus Budget Reconciliation Act of 1981. The Department of Agriculture previously included its entitlement grants in its implementation of the A-102 Common Rule.

Administrative Requirements

The programs that remain exempt from the former A-102 Common Rule and the administrative requirements in 2 CFR Part 200 are listed below. These exemptions from the administrative requirements in the former A-102 Common Rule were carried forward into 2 CFR Part 200 (2 CFR Part 200, Subpart D), with the exception of 2 CFR sections 200.330 through 200.332. Consult Part 4 - Agency Program Requirements, II, "Program Procedures - Source of Governing Requirements," for the governing requirements for these programs.

Note that, in some cases, the administrative requirements for entitlement programs in federal agency regulations are not identical to those in the former A-102 Common Rule/2 CFR Part 200. Rather than identify for testing each instance where the requirements differ, this Supplement addresses only those differences that warrant special attention. One difference is in the area of procurement (see below). With respect to all other administrative requirements, the auditor must rely on the provisions of the former A-102 Common Rule/2 CFR Part 200 and agency program requirements (see Part 4).

Differences Pertaining to Procurement

Subpart F of 45 CFR Part 95, ADP equipment and services, applies to certain HHS programs as specified in Part 4 of this Supplement. Subpart F requires prior federal written approval for the acquisition of ADP equipment and services of \$5 million or more when the federal government funds at regular matching rates and prior written approval for all ADP acquisitions when the federal government funds at enhanced matching rates. In addition, the rules require prior federal written approval for sole-source contracts between \$1 million and \$5 million when the federal government funds at regular matching rates and for certain requests for proposals (RFPs), contracts, and amendments.

Cost Principles

The programs listed below also are exempt from the provisions of the OMB cost principles circulars and their successor guidance in 2 CFR Part 200, Subpart E. State cost principles requirements apply to these programs (including their subrecipients). The HHS September 8,

2003 rulemaking did not affect the applicability of the cost principles for the HHS entitlement programs. The entitlement programs and the other listed programs are subject to the provisions of the OMB cost principles circulars/2 CFR Part 200, Subpart E.

Programs Excluded from the Requirements of the Former A-102 Common Rule and Portions of 2 CFR Part 200

Some programs (both those included in the Supplement and others) are exempted from the former A-102 Common Rule and specified portions of 2 CFR Part 200.

The following list provides the Assistance Listing number and program name as listed in the current Assistance Listing. A notation is included with the program name to indicate when only part of the awards under a Assistance Listing number are excluded from the former A-102 Common Rule/portions of 2 CFR Part 200 or to provide other clarifications.

Except for the requirement to provide public notice of federal financial assistance programs in 2 CFR section 200.202 and the requirements in 2 CFR sections 200.330 through 200.332, the guidance in 2 CFR Part 200, subparts C, D, and E, as implemented by the federal agency, does not apply to the following programs:

Section __.4(a)(2)/2 CFR section 200.101(d)(1)

The Omnibus Budget Reconciliation Act of 1981 (including Community Services):

- 93.568 Low-Income Home Energy Assistance
- 93.569 Community Services Block Grant (except to the extent that the OMB cost principles apply to subrecipients of these funds pursuant to 42 USC 9916(a)(1)(B)).
- 93.667 Social Services Block Grant
- 93.958 Block Grants for Community Mental Health Services
- 93.959 Block Grants for Prevention and Treatment of Substance Abuse
- 93.991 Preventive Health and Health Services Block Grant (not included in the Supplement)
- 93.994 Maternal and Child Health Services Block Grant to the States

- 14.228 Community Development Block Grants/State's Program and Non-Entitlement Grants in Hawaii (Note: Awards to non-entitlement counties in Hawaii are not considered "block grants" for this purpose.)

Section __.4(a)(9)/2 CFR section 200.101(d)(2)

Grants to local education agencies under the following sections of the Impact Aid program:

Section 8002, 20 USC 7702 (federal property payments), Section 8003(b), 20 USC 7703(b) (Basic support payments).

84.041 (excluding payments for children with disabilities and payments for construction)

Section ____ .4(a)(10)/2 CFR section 200.101(d)(3)

Payments under the Veterans Administration's State Home Per Diem Program (38 USC 1741):

- 64.014 Veterans State Domiciliary Care
- 64.015 Veterans State Nursing Home Care
- 64.016 Veterans State Hospital Care

2 CFR section 200.101(d)(4)

Grants authorized under the Child Care and Development Block Grant Act of 1990, as amended:

- 93.575 Child Care and Development Block Grant
- 93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund

APPENDIX II

Notes:

1. Abbreviations used for the following independent agencies: African Development Foundation (ADF), Agency for International Development (AID), Broadcasting Board of Governors (BBG), Corporation for National and Community Service (CNCS), Environmental Protection Agency (EPA), Export-Import Bank of the United States (EX-IM), Federal Emergency Management Agency (FEMA) (now part of the Department of Homeland Security), Federal Mediation and Conciliation Service (FMCS), General Services Administration (GSA), Gulf Coast Ecosystem Restoration Council (GCERC), Institute of Museum and Library Services (IMLS), Inter-American Foundation (IAF), National Aeronautics and Space Administration (NASA), National Archives and Records Administration (NARA), National Endowment for the Arts (NEA), National Endowment for the Humanities (NEH), National Science Foundation (NSF), Office of National Drug Control Policy (ONDCP), Office of Personnel Management (OPM), Small Business Administration (SBA), and Social Security Administration (SSA).
2. The list of exceptions in department and agency regulatory adoption/implementation of 2 CFR Part 200 approved by OMB on December 19, 2014, is available at <https://www.cfo.gov/wp-content/uploads/2014/12/Agency-Exceptions.pdf>. This document provides links to the applicable language in the department/agency rule.
3. The *Federal Register* (<https://www.federalregister.gov/>) for the date shown includes the preamble language for the final rule, which explains any changes from the interim final rule published on December 19, 2014.
4. The 2 CFR was revised on August 13, 2020 (85 FR 19506). The agencies that have adopted the 2014 2 CFR without any exceptions are not required to update their regulations (i.e., Commerce, Homeland Security, GCERC, Housing and Urban Development, IMLS, NEA, NEH, ONDCP, SSA, and Veterans Affairs). When the two dates are shown in this column, the agency has adopted the effective date of August 13, 2020 for the two sections to which it applies (§2 CFR 200.216 and §2 CFR 200.340) and November 12, 2020 for the rest of the revisions. “N/A” in this column means that agency is working on revisions to its 2 CFR sections (mostly technical amendments for section references), and the auditor must check the award’s terms and conditions for applicability of the revisions.
5. The OMB guidance on nonprocurement suspension and debarment is found at 2 CFR Part 180.

**APPENDIX III
FEDERAL AGENCY SINGLE AUDIT, KEY MANAGEMENT LIAISON, AND
PROGRAM CONTACTS**

This appendix provides federal agency single audit contacts (starts on page 8-III-2), key management liaisons (starts on page 8-III-10), and program contacts (starts on page 8-III-11) for each program/cluster included in the Supplement. For the single audit contacts a table is provided for each federal agency identifying who can answer technical audit questions. The table includes contact information and the geographical area each federal contact is responsible for overseeing. A list of key management liaisons, who are the contacts for questions related to the administrative requirements applicable to an agency program(s), and their e-mail addresses follows the single audit contact information. Last, program contacts, who can answer programmatic questions, and their contact information, are listed by agency and Assistance Listing number.

APPENDIX IV INTERNAL REFERENCE TABLES

INTRODUCTION

This Appendix includes a listing of programs with a “higher risk” designation and describes how that designation impacts the major program determination process. It also includes a list of programs in Part 4, which have requirements defined in IV, Other Information.

PROGRAMS WITH “HIGHER RISK” DESIGNATION

Uniform Guidance section 200.519(c)(2) states that “Federal agencies, with the concurrence of OMB, may identify Federal programs that are higher risk. It also states that OMB will provide this identification in the Compliance Supplement.”

As a result of the COVID-19 pandemic, many new federal programs were established and funding was added to existing federal programs from the following Acts:

- Coronavirus Preparedness and Response Supplemental Appropriations Act
- Families First Coronavirus Response Act
- Coronavirus Aid, Relief, and Economic Security Act (CARES Act)
- Coronavirus Response and Relief Supplemental Appropriations Act (CRRSAA)
- American Rescue Plan Act (ARP)

Funding arising from these sources is referred to as “COVID-19 funding,” or “COVID-19 programs”.

On November 15, 2021, the Infrastructure Investment and Jobs Act (IIJA) was signed into law. It established new programs and provided additional funding for existing programs. Funding arising from the IIJA is referred to as “IIJA funding” or “IIJA program”. The 2023 higher risk list includes one program that includes IIJA funding.

The following table includes a complete list of programs that have been identified as “higher risk” for audits subject to the 2023 Compliance Supplement either because of COVID-19 funding, IIJA funding, or because a Federal agency has identified the program to be higher risk.

Agency	Assistance Listing (CFDA) Number	Title
Education*	84.425	Education Stabilization Fund
HHS*	93.498	Provider Relief Fund and American Rescue Plan (ARP) Rural Distribution
HHS**	93.778/93.777/93.775	Medicaid Cluster
Treasury*	21.023	Emergency Rental Assistance

Treasury*	21.026	Homeowner Assistance Fund
Treasury*	21.027	Coronavirus State and Local Fiscal Recovery Funds
Treasury*	21.029	Coronavirus Capital Projects Fund
Interior **	15.252	Abandoned Mine Land Reclamation (AMLR)
Social Security	96.001/96.006	Disability Insurance/Supplemental Security Income

Note:

* These programs were created by one of the laws cited at the beginning of this section and are thus considered 100% COVID-19 funding.

** These programs were existing programs that received additional COVID-19 funding from one or more of the laws cited at the beginning of this section or IJA funding.

Impact of “Higher Risk” Status on Major Program Determination

Type A Program Considerations

A “higher risk” designation will often result in a Type A program or other cluster being audited as a major program. However, an auditor is not precluded from determining that a “higher risk” Type A program or other cluster qualifies as a low risk Type A program if both of the following criteria are met:

1. the program otherwise meets the criteria for a low risk Type A program in section 200.518 of the Uniform Guidance; and
2. the percentage of COVID-19 funding or IJA funding in the program or other cluster during the non-federal entity’s fiscal year is not material to the program or other cluster as a whole. For example, a recipient’s schedule of expenditures of federal awards may include the Medicaid Cluster but the expenditures relevant to COVID-19 funding included in the program during the June 30, 2023, fiscal year end is not material. Alternatively, a recipient’s schedule of expenditures of federal awards may include Education Stabilization Fund expenditures for the June 30, 2023, fiscal year end, which would be considered material because COVID-19 funding comprises the entire program.

Note that the inclusion of COVID-19 funding or IJA funding within the Research & Development (R&D) cluster does not create a “higher risk” designation for the R&D cluster.

Auditors should prepare audit documentation supporting the risk considerations and conclusions for “higher risk” programs.

Type B Program Considerations

Under section 200.518 of the Uniform Guidance, in certain circumstances the auditor must identify Type B programs that are high risk using professional judgment and the criteria in section 200.519 of the Uniform Guidance, which includes consideration of whether a program has been identified as “higher risk” by a Federal agency with the concurrence of OMB. Thus,

there are no changes to the normal risk assessment process for Type B programs identified as “higher risk.” That is, the “higher risk” identification must be considered with the other factors in section 200.519.

Further, the auditor is not required to prioritize the assessment of risk for “higher risk” Type B programs over other Type B programs.

PROGRAMS WITH “OTHER INFORMATION” IN PART 4

The following is a list of programs in Part 4 that have requirements defined in IV, “Other Information.” Other Information sections are included to communicate additional information concerning the program. For example, when a program allows funds to be transferred to another program, the “Other Information” section provides guidance on how those funds are to be treated on the Schedule of Expenditures of Federal Awards and in major program determinations. Note that if the listing is a cluster, all program numbers are shown, but only the primary program name is presented.

10.551/10.561	Supplemental Nutrition Assistance Program (SNAP)
10.553/10.555/10.556/10.559	School Breakfast Program (SBP)
10.557	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)
10.558	Child and Adult Care Food Program (CACFP)
10.760	Water and Waste Disposal Systems for Rural Communities
10.766/10.780	Community Facilities Loans and Grants
11.300/11.307	Investments for Public Works and Economic Development
14.157	Supportive Housing for the Elderly (Section 202)
14.181	Supportive Housing for Persons with Disabilities (Section 811)
14.218/14.225	Community Development Block Grants/Entitlement Grants and Non-Entitlement Counties in Hawaii
14.228	Community Development Block Grants/State’s Program and Non-Entitlement Grants in Hawaii
14.239	Home Investment Partnerships Program
14.256	Neighborhood Stabilization Program (Recovery Act Funded)
14.850	Public and Indian Housing
14.862	Indian Community Development Block Grant Program
14.867	Indian Housing Block Grants
14.871/14.879	Section 8 Housing Choice Vouchers
14.872	Public Housing Capital Fund (CFP)
14.873	Native Hawaiian Housing Block Grant
14.881	Moving to Work Demonstration Program
14.888	Lead-based Paint Capital Fund Program and Housing-Related Hazards Capital Fund
15.022	Tribal Self-Governance
15.025/15.026/15.113/	
15.114/15.130	Services to Indian Children, Elderly and Families (477 Cluster)
16.710	Public Safety Partnership and Community Policing Grants

17.225	Unemployment Insurance (UI)
17.265	Native American Employment and Training
20.106	Airport Improvement Program
20.223	Transportation Infrastructure Finance and Innovation Act (TIFIA) Program
21.012	Native Initiatives (New)
21.016	Equitable Sharing Program
21.020	Community Development Financial Institutions Program
21.027	Coronavirus State and Local Fiscal Recovery Funds
66.458/66.482	Capitalization Grants for Clean Water State Revolving Funds
66.468/66.483	Capitalization Grants for Drinking Water State Revolving Funds
81.041	State Energy Program
84.000	Cross-Cutting Section
84.002	Adult Education-Basic Grants to States
84.010	Title I Grants to Local Educational Agencies
84.011	Migrant Education -State Grant Program (Title I, Part C of ESEA)
84.027/84.173	Special Education-Grants to States (IDEA, Part B)
84.032-G	Federal Family Education Loans-(Guaranty Agencies)
84.032-L	Federal Family Education Loans-(Lenders)
84.041	Impact Aid (Title VII of ESEA)
84.042/84.044/84.047/ 84.066/84.217	Student Support Services
84.048	Career and Technical Education-Basic Grants to States (Perkins IV)
84.181	Special Education-Grants for Infants and Families
84.282	Charter Schools
84.287	Twenty-First Century Community Learning Centers
84.367	Supporting Effective Instruction State Grants (formerly Improving Teacher Quality State Grants)
84.424	Student Support and Academic Enrichment Program
84.938	Hurricane Education Recovery
93.044/93.045/93.053	Special Programs for the Aging-Title III, Part B-Grants for Supportive Services and Senior Centers and CARES Act for Supportive Services Under Title III-B of the Older Americans Act
93.095/93.096	HHS Programs for Disaster Relief Appropriations Act-Non-Construction
93.268	Immunization Cooperative Agreements
93.461	HRSA COVID-19 Uninsured Program
93.498	Provider Relief Fund
93.499	Low-Income Household Water Assistance Program
93.545	Consumer Operated and Oriented Plan (CO-OP) Program
93.558	Temporary Assistance for Needy Families (TANF)
93.566	Refugee and Entrant Assistance—State-Administered Programs
93.569	Community Services Block Grant

93.575/93.596/93.489	Child Care and Development Block Grant
93.600/93.356	Head Start
93.667	Social Services Block Grant
93.778/775/777	Medical Assistance Program (Medicaid; Title XIX)
93.959	Block Grants for Prevention and Treatment of Substance Abuse
93.994	Maternal and Child Health Services Block Grant to the States
97.036	Disaster Grants-Public Assistance (Presidentially Declared Disasters)
97.039	Hazard Mitigation Grant Program (HMGP)
97.067	Homeland Security Grant Program (HSGP)

Part 5.3 also has requirements defined in IV, “Other Information.”

APPENDIX V

LIST OF CHANGES FOR THE 2023 COMPLIANCE SUPPLEMENT

This appendix provides a list of changes from the 2023 Supplement dated May 2023. Please note that changes in the Matrix of Compliance Requirements are reflected in Part 2 of this supplement and are not reflected in this appendix.

Table of Contents

The Table of Contents has been updated to show additions and deletions.

Part 1 – Background, Purpose, and Applicability

- Updated for the effective date of Supplement, streamlined language in Background, Purpose, Applicability and How to Obtain Additional Guidance sections, included information on the FAC transition and Single Audit Extensions within the Other Audit Advisories section.

Part 2 – Matrix of Compliance Requirements

- Matrix of Compliance changes and corrections were made for 2023. Changes are shown in yellow highlights.

Part 3 – Compliance Requirements

- Updated Introduction for the effective date of the Supplement, updated Cash Management, and included BABAA requirement to Procurement and Suspension and Debarment.

Part 4 – Agency Program Requirements

Changes were made to the following programs and clusters:

- 10.512-Agriculture Extension at 1890 Land-Grant Institutions Program
- 10.515-Renewable Resources Extension Act (RREA) and National Focus Funds (RREA-NFF)
- 10.551/10.561-Supplemental Nutrition Assistance Program (SNAP) Cluster
- 10.553/10.555/10.566/10.559/10.582-Child Nutrition Cluster
- 10.606-Food for Progress Program
- 10.607-Section 416(b) Program
- 10.766/10.780-Community Facilities Loans and Grants Cluster

- 11.300/11.307- Economic Development Cluster
- 11.611-Hollings Manufacturing Extension Partnership (NIST)
- 14.157-Supportive Housing for the Elderly (Section 202)
- 14.182/14.195/14.249/14.856-Section 8 Project-Based Cluster
- 14.269/14.272- Community Development Block Grant-Disaster Recovery Grant (CDBG-DR) Cluster
- 14.866/14.889- HOPE VI Cluster
- 14.867-Indian Housing Block Grants
- 14.871/14.879- Housing Voucher Cluster
- 14.872-Public Housing Capital Fund (CFP)
- 14.873-Native Hawaiian Housing Block Grant
- 14.881-Moving to Work Demonstration Program
- 14.888-Lead-Based Paint & Housing-Related Hazards
- 15.252-Abandoned Mine Land Reclamation
- 15.605/15.611/15.626-Fish and Wildlife Cluster
- 16.034-Coronavirus Emergency Supplemental Funding
- 16.710-Public Safety Partnership and Community Policing Grants
- 16.738-Edward Byrne Memorial Justice Assistance Grant Program
- 16.922-Equitable Sharing Program
- 17.207/17.801-Employment Service Cluster
- 17.225-Unemployment Insurance (UI)
- 17.235-Senior Community Service Employment Program
- 17.245-Trade Adjustment Assistance
- 17.258/17.259/17.278-WIOA Cluster
- 17.264-National Farmworker Jobs Program

- 17.265-Native American Employment and Training
- 20.001-Wage Rate Requirements Cross-Cutting Section
- 20.205-Highway Planning and Construction (Federal-Aid Highway Program) (decoupled program)
- 20.218-Motor Carrier Safety Assistance Program
- 20.219-Recreational Trails Program (decoupled program)
- 20.223-Transportation Infrastructure Finance and Innovation Act (TIFIA) Program
- 20.224-Federal Lands Access Program (decoupled program)
- 20.315 – National Railroad Passenger Corporation Grants
- 20.327-Railroad Crossing Elimination (new)
- 20.500/20.507/20.525/20.526-Federal Transit Cluster
- 20.509-Formula Grants for Rural Areas
- 20.532-Passenger Ferry Grant Program, Electric or Low Emitting Ferry Pilot Program, and Ferry Service for Rural Communities Program (new)
- 20.533-All Stations Accessibility Program (new)
- 20.534-Community Project Funding Congressionally Directed Spending (new)
- 20.600/20.611/20.616- Highway Safety Cluster
- 20.708-Natural Gas Distribution Infrastructure Safety and Modernization Grant Program(new)
- 20.816-Maritime Administration Marine Highway Grant Program
- 20.823-Maritime Administration – Port Infrastructure Development Program
- 21.011 – Capital Magnet Fund (new)
- 21.012 – Native Initiatives (new)
- 21.015-Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States (Gulf RESTORE)
- 21.019-Coronavirus Relief Fund

- 21.020-Community Development Financial Institutions Program
- 21.023 - Emergency Rental Assistance Program
- 21.024 – Rapid Response Program (new)
- 21.025 -Small Dollar Loan Program (new)
- 21.026 - Homeowner Assistance Fund
- 21.027 - Coronavirus State and Local Fiscal Recovery Funds
- 21.029 - Coronavirus Capital Projects Fund Program
- 21.032- Local Assistance and Tribal Consistency Fund (new)
- 23.003-Appalachian Development Highway System (decoupled)
- 32.006-COVID-19 Telehealth Program
- 32.009- Emergency Connectivity Fund Program
- 45.129-Promotion of the Humanities-Federal/State Partnership
- 81.041-State Energy Program
- 81.042-Weatherization Assistance for Low-Income Persons
- 84.000-Cross-Cutting Section
- 84.010-Title I Grants to Local Educational Agencies (Title I, Part A of the ESEA)
- 84.011-Migrant Education-State Grant Program (Title I, Part C of ESEA)
- 84.027/84.173- Special Education Cluster (IDEA)
- 84.041-Impact Aid (Title VII of ESEA)
- 84.048-Career and Technical Education-Basic Grants to States (Perkins V)
- 84.181-Special Education-Grants for Infants and Families
- 84.282-Charter Schools
- 84.365-English Language Acquisition State Grants
- 84.367-Supporting Effective Instruction State Grants (formerly Improving Teacher Quality State Grants)

- 84.425-Education Stabilization Fund (ESF)
- 93.044/93.045/93.053-Aging Cluster
- 93.090-Guardianship Assistance
- 93.153-Coordinated Services and Access to Research for Women, Infants, Children, and Youth (Ryan White HIV/AIDS Program Part D Women, Infants, Children and Youth WICY Program)
- 93.210-Tribal Self-Governance Program-IHS Compacts/Funding Agreements
- 93.217-Family Planning-Services
- 93.224/93.527-Health Center Program Cluster
- 93.423-Waivers for State Innovation for Section 1332 of the Patient Protection and Affordable Care Act (PPACA)
- 93.461-HRSA COVID-19 Uninsured Program
- 93.498-Provider Relief Fund and American Rescue Plan (ARP) Rural Distribution
- 93.499 – Low Income Household Water Assistance Program
- 93.545-Consumer Operated and Oriented Plan (CO-OP) Program
- 93.556-Promoting Safe and Stable Families
- 93.558-Temporary Assistance for Needy Families (TANF)
- 93.563-Child Support Enforcement
- 93.566-Refugee and Entrant Assistance-State-Administered Programs
- 93.568-Low-Income Home Energy Assistance
- 93.575/93.596/93.489- Child Care and Development Fund Cluster
- 93.600/93.356-Head Start Cluster
- 93.645-Stephanie Tubbs Jones Child Welfare Services Program
- 93.658-Foster Care-Title IV-E
- 93.659-Adoption Assistance-Title IV-E
- 93.667-Social Services Block Grant

- 93.671-Family Violence Prevention and Services Act
- 93.686-Ending the HIV Epidemic: A Plan for America
- 93.767-Children’s Health Insurance Program (CHIP)
- 93.778/93.777/93.775-Medical Cluster
- 93.914-HIV Emergency Relief Project Grants (Ryan White HIV/AIDS Program Part A)
- 93.917-HIV Care Formula Grants (Ryan White HIV/AIDS Program Part B)
- 93.918-Grants to Provide Outpatient Early Intervention Services with Respect to HIV Disease (Ryan White HIV/AIDS Program Part C)
- 93.958-Block Grants for Community Mental Health Services
- 93.994-Maternal and Child Health Services Block Grant to the States
- 96.001/96.006-Disability Insurance/SSI Cluster
- 97.036-Disaster Grants-Public Assistance (Presidentially Declared Disasters)
- 97.067-Homeland Security Grant Program (HSGP)

Part 5 – Clusters of Programs

- Part 5.1 - No Change.
- Part 5.2 – No Change.
- Part 5.3 – Updated for the effective date of Supplement, changes within Activities Allowable/Unallowed, Cash Management, Eligibility, Reporting and Special Tests.
- Part 5.4 – Removed the Highway Planning and Construction Cluster.

Part 6 – Internal Control

- No Change.

Part 7 – Guidance for Auditing Programs Not Included in This Compliance Supplement

- No Change.

Part 8 – Appendixes**Appendix I – Federal Programs Excluded from the A-102 Common Rule and Portions of 2 CFR Part 200**

- No Change.

Appendix II – Federal Agency Codification of Governmentwide Requirements and Guidance for Grants and Cooperative Agreements

- No Change.

Appendix III – Federal Agency Single Audit, Key Management Liaison, and Program Contacts

- Updated for this year’s program contacts.

Appendix IV – Internal Reference Tables

- Updated the list of programs currently designated as high risk.
- Updated the list of programs with requirements defined in IV, “Other Information.”

Appendix V – List of Changes for the 2022 Compliance Supplement

- List updated with changes to the programs and appendixes for 2023.

Appendix VI – Program-Specific Audit Guides

- No Changes.

Appendix VII – Other Audit Advisories

- Updated for the effective date of the Supplement, included FAC transition information and Single Audit Extensions.

Appendix VIII – Examinations of EBT Service Organizations

- No Change.

Appendix IX – Compliance Supplement Core Team

- Updated the list of team members for 2023.

APPENDIX VI PROGRAM-SPECIFIC AUDIT GUIDES

This appendix lists program-specific audit guides for use by auditors. The listing includes the title of the guide, the date of issuance or latest update, and where to obtain a copy.

Department of Education

- Audit Guides for Student Aid Programs (<https://www2.ed.gov/about/offices/list/oig/nonfed/index.html>)

Department of Housing and Urban Development

- HUD Consolidated Audit Guide ([HUD Consolidated Audit Guide | Office of Inspector General, Department of Housing and Urban Development \(hudoig.gov\)](#))

APPENDIX VII OTHER AUDIT ADVISORIES

I. Novel Coronavirus (COVID-19)

This section provides guidance to the following areas affecting single audits arising due to COVID-19:

- Definition of COVID-19 funding
- Treatment of donated personal protective equipment (PPE) on the Schedule of Expenditures of Federal Awards (SEFA)
- Agency Guidance Document References
- Identification of COVID-19 related awards and single audit applicability
- Identification of COVID-19 related awards on the SEFA and SF-SAC
- Identification of COVID-19 related awards in audit findings
- Identification of compliance requirements for COVID-19 related awards
- Responsibilities for informing subrecipients
- Alternative Compliance Examination Engagement for Eligible SLFRF Recipients

Definition of COVID-19 Funding

As a result of the COVID-19 pandemic, many new federal programs have been established and funding has been added to existing federal programs from the following Acts:

Coronavirus Preparedness and Response Supplemental Appropriations Act

Families First Coronavirus Response Act

Coronavirus Aid, Relief, and Economic Security Act (CARES Act)

Coronavirus Response and Relief Supplemental Appropriations Act (CRRSAA)

American Rescue Plan Act (ARP)

Funding arising from these sources, both to new and existing programs, is referred to as “COVID-19 funding,” “COVID-19 programs,” or “COVID-19 related awards” throughout this section. Refer also to Appendix IV, Internal Reference Tables, for a listing of programs with a “higher risk” designation, many of which involve COVID-19 funding, and for information about how that designation impacts the major program determination process.

Donated Personal Protective Equipment (PPE)

During the emergency period of COVID-19 pandemic and as allowed under OMB Memorandum M-20-20 (April 9, 2020), federal agencies and recipients can donate PPE purchased with federal assistance funds to various entities for the COVID-19 response. The donated PPE were mostly provided without any compliance or reporting requirements or Assistance Listing information from the donors. As such, the non-federal entities that received donated PPE should provide the fair market value of the PPE at the time of receipt as a stand-alone footnote accompanying their SEFA. The amount of donated PPE should not be counted for purposes of determining the threshold for a single audit or determining the type A/B threshold for major programs and is not required to be audited as a major program. Because donated PPE has no bearing on the single audit, the donated PPE footnote may be marked “unaudited.”

As a reminder, the above only relates to donated PPE provided without any compliance or reporting requirements or assistance listing from donors. There could be some PPE that must appear on the SEFA as a federal program (e.g., when the recipient uses funds provided under an Assistance Listing to purchase PPE).

Agency Guidance Document References for COVID-19 Programs

The COVID-19 pandemic has led many federal agencies to issue implementing guidance (e.g., frequently asked questions, memos) outside of the normal regulatory process for new and existing programs receiving COVID-19 funding. Such guidance is issued to communicate an agency’s understanding of how the relevant statutes, regulations, or the terms and conditions of the federal awards and apply to a particular circumstance, but it does not create new compliance requirements. Due to the evolving nature of the pandemic environment, it has been common for federal agencies to update, change, or delete their specific guidance over time.

The Part 4 sections for COVID-19 programs often refer auditors to agency guidance documents to obtain a better understanding of statutory and regulatory compliance requirements subject to audit. When evaluating a non-federal entity’s compliance, auditors must consider provisions of federal statutes, regulations, and the terms and conditions of federal awards. However, auditors may also consider guidance documents in effect during the period to understand the program requirements. An auditor may conclude whether the non-federal entity is in compliance with a type of compliance requirement based on consideration of applicable implementing guidance in effect at the time of the activity or transaction.

When citing criteria for audit findings, 2 CFR 200.516(b)(2) states that the following information must be included in finding detail: “The criteria or specific requirement upon which the finding is based, including the Federal statutes, regulations, or the terms and conditions of the Federal awards.” Therefore, auditors should refer to a statute, regulation, or term and condition as criteria for the audit finding.

Identification of COVID-19 Related Awards and Single Audit Applicability

Federal agencies may have incorporated COVID-19 funding into an existing program and Assistance Listing number or set up a separate COVID-19 program with a unique Assistance

Listing number. Federal agencies are required to specifically identify COVID-19 related awards, regardless of whether the funding is provided under a new or existing Assistance Listing number. However, in the early days of the crisis caused by the COVID-19 pandemic with the need to respond quickly, in some cases cash was sent to non-federal entities without application or Assistance Listing number. The non-federal entity was required to either agree to the terms and conditions or return the funds.

When COVID-19 funding is subawarded by a pass-through entity from an existing program, the information furnished to subrecipients should distinguish the subawards of incremental COVID-19 funding included in the subawards from non-COVID-19 funding.

In order to assist recipients and auditors in the identification of all the COVID-19 funds and their related program Assistance Listing numbers, OMB has issued several summaries of federal programs that were created by COVID-19 funding and also existing programs that received COVID-19 funding. A summary of programs that received funding under the CARES Act (and other earlier COVID-19 legislation) as of May 20, 2020, can be accessed at: https://www.cfo.gov/wp-content/uploads/2020/07/M-20-21_FAQ_07312020_UPDATED.pdf. A summary of programs that received funding under the ARP Act as of October 29, 2021, can be found at: https://www.cfo.gov/assets/files/Revised-American-Rescue-Plan-Assistance-Listings_10-29-2021.pdf. Each summary includes program Assistance Listing numbers and an asterisk (*) next to Assistance Listing numbers denoting a new Assistance Listing number.

Identification of COVID-19 Related Awards on the SEFA and SF-SAC

As described in 2 CFR section 200.510(b), auditees must complete the SEFA and include Assistance Listing numbers when reporting their federal awards and subawards. To maximize the transparency and accountability of COVID-19 related award expenditures, OMB M-20-26 (June 18, 2020) instructed recipients and subrecipients to separately identify the COVID-19 Emergency Acts expenditures on the Schedules of Expenditures of Federal Awards. Therefore, non-federal entities should separately identify COVID-19 expenditures on the SEFA and SF-SAC. For existing programs that have both COVID-19 expenditures and non-COVID-19 expenditures, this may be accomplished by identifying COVID-19 expenditures on the:

- SEFA – On a separate line by Assistance Listing number with “COVID-19” as a prefix to the program name. For example:
 - COVID-19 – Temporary Assistance for Needy Families – 93.558 – \$1,000,000
 - Temporary Assistance for Needy Families – 93.558 – \$3,000,000
 - Total – Temporary Assistance for Needy Families – 93.558 – \$4,000,000
- SF-SAC – On a separate row by Assistance Listing number with “COVID-19” as the first characters in Part II, Item 1c, Additional Award Information. Example:

	a	b	c	d	e	f	g	h
	Assistance Listing #	Assistance Listing #						
Row Number (auto-generated)	Federal Awarding Agency Prefix	Assistance Listing Three-Digit Extension	Additional Award Identification	Federal Program Name	Amount Expended	Cluster Name	Federal Program Total (auto-generated)	Cluster Total (auto-generated)
					(\$)		(\$)	(\$)
1	93	558		TEMPORARY ASSISTANCE FOR NEEDY FAMILIES	\$3,000,000.00		\$4,000,000.00	
2	93	558	COVID-19	COVID-19 - TEMPORARY ASSISTANCE FOR NEEDY FAMILIES	\$1,000,000.00		\$4,000,000.00	
				Total Federal Awards Expended =	\$4,000,000.00			

Identification of COVID-19 Related Awards in Audit Findings

Consistent with identifying COVID-19 expenditures on the SEFA, auditors should include the COVID-19 identification for audit findings that are applicable to programs that are entirely COVID-19 funded and existing programs with COVID-19 funding.

Identification of Compliance Requirements for COVID-19 Related Awards

As noted in OMB Memorandum M-20-26 (June 18, 2020), federal awarding agencies are responsible for identifying COVID-19 related awards and communicating the applicable compliance requirements to the recipient. Similarly, pass-through entities are responsible for identifying COVID-19 related awards and communicating the applicable requirements to their subrecipients. Normally, this information would be in the award terms and conditions. However, for COVID-19 related awards, the compliance requirements may have been communicated through an agency website and the compliance requirements may have been modified or compliance requirements not included in original terms and conditions may have been added.

For new COVID-19 related programs that are not included in this Supplement, the auditor must use the framework provided by Part 7 of this Supplement. Part 7 includes procedures to determine which of the compliance requirements to test.

Responsibilities for Informing Subrecipients

As noted in OMB Memorandum M-20-26 (June 18, 2020), pass-through entities agree to separately identify to each subrecipient, and document at the time of subaward and at the time of disbursement of funds, the federal award number, Assistance Listing number, and amount of COVID-19 funds. When COVID-19 funds are subawarded for an existing program, the information furnished to subrecipients should distinguish the subawards of incremental COVID-19 funds from regular subawards under the existing program.

This information is needed to allow the pass-through entity to properly monitor subrecipient expenditures of COVID-19 funds, as well as for oversight by the federal awarding agencies, Federal Offices of Inspector General, and the Government Accountability Office.

Alternative Compliance Examination Engagement for Eligible SLFRF Recipients

The US Department of the Treasury (“Treasury”) recognizes that many recipients of Coronavirus State and Local Fiscal Recovery Funds (“SLFRF”) may now be required to complete a Single Audit or a Program-Specific Audit pursuant to the Single Audit Act and its implementing regulations, 2 CFR Part 200, Subpart F, due to their receipt of an SLFRF award, which may lead to them expending \$750,000 or more during their fiscal year in Federal awards. This may be because the recipient has not received federal financial assistance before, or the other federal financial assistance they expended did not exceed the \$750,000 audit threshold set forth 2 CFR 200.501(a). As a result, Treasury has developed an alternative approach which is available for SLFRF recipients that would otherwise not be required to undergo an audit pursuant to 2 CFR Part 200, Subpart F, if it was not for the expenditures of SLFRF funds directly awarded by Treasury.

Under its authority 2 CFR section 200.102(a), OMB is authorizing the use of an alternative compliance examination engagement in accordance with the Government Accountability Office’s Government Auditing Standards in lieu of a full single audit or program-specific audit as required per 2 CFR 200, Subpart F. The alternative approach along with the criteria for eligible recipients are detailed in the Part 4 – Section IV, “Other Information” of assistance listing 21.027 – Coronavirus State and Local Fiscal Recovery Funds.

This alternative is intended to reduce the burden of a full Single Audit or Program-Specific Audit on eligible recipients and practitioners, as well as uphold Treasury’s responsibility to be good stewards of federal funds.

II. Effect of Changes to Compliance Requirements and Other Clusters

Removal of Compliance Requirement from Part 2 Matrix

In any instance in which a compliance requirement has been removed from a program/cluster, as shown in the Part 2 matrix, if there was an audit finding related to that compliance requirement in an audit conducted using the prior year’s Supplement that finding must continue to be reported in the summary schedule of prior audit findings and considered in the major program determination under 2 CFR section 200.518. The procedures to assess the reasonableness of the summary schedule of prior year audit findings must include all prior audit findings included in the summary schedule, regardless of whether the current Part 2 matrix identified a requirement subject to audit. For example, if there was an audit finding relating to subrecipient monitoring in the prior year but the current year Part 2 matrix identified “M. Subrecipient Monitoring” as not subject to audit with a “No,” the auditor’s procedures to determine the reasonableness of the summary schedule of prior audit findings must include subrecipient monitoring. In any instance in which a compliance requirement was added to a program/cluster in the current year’s Supplement, auditors are not expected to have tested for that requirement under the prior year’s audit. This includes correction of an error, if any, as identified in Appendix V of the Supplement.

Addition of a New Program to an Other Cluster

One of the criteria for an “other cluster” to be considered a low-risk Type A program is that it must have been audited as a major program in at least one of the two most recent audit periods (“2-year look back” under 2 CFR section 200.518(c)(1)). In the year that this Supplement adds a new program to another cluster listed in Part 5, the determination of whether the resulting other cluster meets the 2-year look back criterion requires additional consideration. During that year, the other cluster cannot qualify as having been audited as a major program in one of the two most recent audit periods unless the auditee’s current-year expenditures for the newly added program were less than or equal to 25 percent (0.25) of the Type A threshold, or all of the programs included in the resulting other cluster met the “2-year look back” criterion. The additional criteria in 2 CFR section 200.518(c) must also be evaluated by the auditor to determine if the other cluster can be considered a low-risk Type A program in the current year.

In years after this Supplement adds a program to another cluster, such addition in a prior year does not require additional consideration for the 2-year look back criterion.

The following examples are intended to illustrate consideration of the addition of a new program to another cluster. They are illustrative only and not based on the contents of the current Supplement.

Background for Examples:

Type A threshold \$750,000.

Human Services existing other cluster (93.123, 93.125, and 93.127) was audited in 2015 with no audit findings.

Part 5 of the 2017 Compliance Supplement added Assistance Listing 93.129 to form the new other cluster with the following federal awards expended in 2017:

93.123: \$ 500,000

93.125: \$ 300,000

93.127: \$ 400,000

93.129: \$ 300,000

Considerations for 2017 major program determination using these facts:

Example 1

The Human Services cluster was audited in 2015. However, the auditee’s current year expenditures for newly added Assistance Listing 93.129 exceed 0.25 of the Type A threshold of \$750,000 or \$187,500; therefore, the resulting other cluster fails the 2-year look back criterion and cannot be considered a low-risk Type A program in 2017.

If, however, the auditee's expenditures for newly added Assistance Listing 93.129 were equal to or less than \$187,500, the other cluster would pass the 2-year look back criterion and could be considered to have been audited as a major program in one of the two prior years.

Example 2

The Human Services cluster was audited in 2015. The newly added program Assistance Listing 93.129 was audited in 2016. If both the cluster and the newly added program met all criteria in 2 CFR section 200.518(c) to be considered low-risk programs for 2017, the other cluster would be a low-risk Type A program in 2017.

III. Due Date for Submission of Audit Reports and Low-Risk Auditee Criteria

As provided in 2 CFR Part 200, Subpart F (2 CFR section 200.520), in order to meet the criteria for a low-risk auditee in the current year, the two prior years' audits must have met the specified criteria, including report submission to the Federal Audit Clearinghouse (FAC) by the due date.

The auditor may consider using the following steps to identify FAC submissions that do not meet the due date.

Suggested Steps

1. Inquire of entity management and review available prior-year financial reports and audits to ascertain if the entity had federal awards expended of \$750,000, in the prior two audit periods and, therefore, was required to have an audit under the uniform guidance and file with the FAC.
2. If the entity was below the \$750,000 threshold in either of the prior two audit periods, and an audit was not required under the uniform guidance obtain written representation from management to this fact and no further audit procedures are necessary as the entity does not qualify as a low-risk auditee.
3. If a prior-year audit was conducted, obtain a copy of the data collection form (Form SF-SAC) and the reporting package.
 - a. Calculate the "Nine Month Due Date" to file with the FAC as the date nine (9) months after the end of the audit period. For example, for audit periods ending June 30, 2022, the audit report would be due March 31, 2023.
 - b.. Access the FAC web page at <https://harvester.census.gov/facweb>.
 - Select the "Find Audit Information" option and using the "Federal Audit Clearinghouse IMS" and "Search for Single Audits" options for the audit year in question, locate the FAC record for the entity. Verify correct record by comparing both the entity name and Entity Identification Number (EIN) number from the entity's copy of the SF-SAC to the FAC web page.

- For this record, located on the FAC web page, compare the “Date Received” to the Nine Month Due Date to determine if the due date was met.

If the entity was not in compliance with the Nine Month Due Date or Extended Due Date (if applicable) or did not submit the required audit to the FAC for either of the prior two audit periods, then the entity does not qualify as a low-risk auditee.

4. Contact the FAC at govs.fac@census.gov or 866-306-8799 if additional information is needed on using the FAC website or determining the date the FAC accepted the report submission as complete.

IV. Treatment of National Science Foundation and National Institutes of Health Awards

National Science Foundation

All awards issued by the National Science Foundation (NSF) meet the definition of “Research and Development” at 2 CFR section 200.1. As such, auditees must identify NSF awards as part of the R&D cluster on the Schedule of Expenditures of Federal Awards (SEFA) and the auditor must use the Research and Development cluster in Part 5 when testing any of those awards. NSF recognizes that some awards may have another classification for purposes of reimbursement of indirect costs. The auditor is not required to report this difference in treatment (i.e., the award is classified as R&D for 2 CFR Part 200, Subpart F purposes, but non-research for indirect cost rate purposes), unless the auditee is charging indirect costs at a rate other than the rate(s) specified in the award document(s). This guidance complies with the NSF Proposal and Award Policies and Procedures Guide (PAPPG), the current and prior versions of which may be found at <http://www.nsf.gov/bfa/dias/policy/>.

National Institutes of Health

Effective for grants and cooperative agreements with budget periods beginning on or after December 26, 2014, and awards that receive supplemental funding on or after December 26, 2014, all awards issued by the National Institutes of Health (NIH) meet the definition of “Research and Development” at 45 CFR section 75.2. As such, auditees must identify NIH awards as part of the R&D cluster on the SEFA, and the auditor must use the Research and Development cluster in Part 5 when testing any of those awards. NIH recognizes that some awards may have another classification for purposes of reimbursement of indirect costs. The auditor is not required to report this disconnect (i.e., the award is classified as R&D for 2 CFR Part 200, Subpart F, purposes, but non-research for indirect cost rate purposes), unless the auditee is charging indirect costs at a rate other than the rate(s) specified in the award document(s). (See the NIH Grants Policy Statement, the current and prior versions of which may be found at <http://grants.nih.gov/grants/policy/policy.htm>.)

V. Exceptions to the Guidance in 2 CFR Part 200

OMB does not maintain a complete listing of approved agency exceptions to the uniform guidance in 2 CFR Part 200.

For programs included in the Supplement, the auditor should review the program supplement and, as necessary, agency regulations adopting/implementing the OMB uniform guidance in 2 CFR Part 200 to determine if there is any exception related to the compliance requirements that apply to the program. For programs not included in the Supplement that are audited using Part 7, the auditor should review agency regulations adopting/implementing 2 CFR Part 200 to determine if an exception applies to the program.

Questions about the agency-level rulemakings that adopt/implement 2 CFR Part 200 should be directed to the federal agency key management liaisons specified in Appendix III to the Supplement.

VI. Audit Sampling

Certain suggested audit procedures in this *Compliance Supplement* lend themselves to testing using sampling. Auditors are reminded that when performing an audit under generally accepted auditing standards (GAAS), including single audits, that AU-C section 530, *Audit Sampling*, <https://www.aicpa-cima.com/resources/download/aicpa-statements-on-auditing-standards-currently-effective>, provides auditor requirements and guidance related to an auditor's use of sampling. Failure to follow the standards, including the requirement to determine sample sizes that are sufficient to reduce sampling risk to an acceptably low level, may result in the audit being considered nonconforming by the federal cognizant agency for audit as part of a quality control review.

The guidance in AU-C section 530 primarily addresses sampling considerations when performing a financial statement audit. The AICPA Audit Guide, *Government Auditing Standards and Single Audits*, contains auditor guidance for, among other things, designing an audit approach that includes audit sampling to achieve both compliance and internal control over compliance related audit objectives in a single audit or program-specific audit performed in accordance with the Uniform Guidance. It also includes suggested minimum sample sizes for tests of controls over compliance and tests of compliance based on certain engagement-specific inputs.

Another AICPA Audit Guide, *Audit Sampling* also provides additional guidance and technical background, which forms the basis of the practical application of audit sampling to Uniform Guidance audits.

VII. Federal Audit Clearinghouse Transition from Census to GSA and Single Audit Extensions

Federal Audit Clearinghouse Transition from Census to GSA

The provider of the Federal Audit Clearinghouse (FAC) is scheduled to change from U.S. Census Bureau (Census) to the U.S. General Services Administration (GSA) on October 1,

2023. At that time, all submissions will need to be made through the new FAC hosted by GSA, including all single audits for entities with 2023 FYE dates. Any draft not fully submitted to the Census FAC before September 30, 2023, may need to be completely re-started at the new GSA FAC. The FAC Web site and up to date information on the transition is at www.fac.gov.

For any 2023 submissions with fiscal periods ending between January 1, 2023 and September 30, 2023, requirement 2 CFR 200.512(1) states that single audits are due to the Federal Audit Clearinghouse 30 days after receipt of the auditor's report(s), is waived. These audits will be considered on time if they are submitted within nine months after their fiscal period end date.

Single Audit Extensions

In 2022, there were two extensions for audit submission.

Single audits with a fiscal period ending in 2022 were scheduled to be submitted to the GSA FAC beginning on October 1, 2022. However, the transition to GSA was delayed for one year and rescheduled to October 1, 2023. Due to the delay in transition, the SF-SAC Data Collection Form used for the fiscal year 2022 audit submission was not available until October 6, 2022. Therefore, single audits with a fiscal period ending in 2022 could not be submitted before that date. The 2 CFR 200.512(1) states that single audits must be submitted within the earlier of 30 calendar days after receipt of the auditor's report(s), or nine months after the end of the audit period. For any 2022 submissions with fiscal periods ending between January 1, 2022 and October 31, 2022, the requirement in 2 CFR 200.512(1) stating that single audits are due to the Federal Audit Clearinghouse 30 days after receipt of the auditor's report(s), is waived. These audits will be considered on time if they are submitted within nine months after their fiscal period end date.

For example, a March 31, 2022, fiscal year-end single audit that was issued on June 30, 2022, would technically be due to the FAC on July 30, 2022 (i.e., 30 calendar days after the auditee's receipt of the auditor's reports). Because the SF-SAC Data Collection Form was not available until October 6, 2022, if the single audit was submitted to the FAC by October 31, 2022, it would be considered timely and have no impact on the low-risk auditee status of the auditee.

Hurricanes Fiona and Ian, and the Alaska flood and landslide

In September and October 2022, the President made the major disaster and emergency declarations under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 et seq. (the "Stafford Act") for the following: Hurricane Fiona (FEMA-4671-PR), the Alaska storm, flooding, and landslides (FEMA-4672-AK) and Hurricane Ian (FEMA-DR-4673-FL, FEMA-EM-3585-SC, FEMA-EM-3586-NC).

Consistent with these declarations and to assist the affected recipients during these emergencies, OMB granted a six (6) month extension for all single audits that cover recipients in the affected areas and had due dates between September 18, 2022 and December 31, 2022. The recipients in the less affected areas were encouraged to submit their reports as soon as possible. The extension is item 11 of the flexibilities listed in OMB Letter dated December 23, 2022 and

published on the CFO Council link at <https://www.cfo.gov/> ([Microsoft Word - 2022 Hurricanes Fiona Ian Alaska Flood Admin Relief \(cfo.gov\)](#))

APPENDIX VIII EXAMINATIONS OF EBT SERVICE ORGANIZATIONS

Background

States must obtain an examination report by an independent auditor of the state electronic benefits transfer (EBT) service providers (service organizations) regarding the issuance, redemption, and settlement of benefits under the Supplemental Nutrition Assistance Program (SNAP) (Assistance Listing 10.551) in accordance with the American Institute of Certified Public Accountants (AICPA) Statement on Standards for Attestation Engagements (AT) Section 801, *Reporting on Controls at a Service Organization*. Also, states are required to ensure that the service organization has these examinations performed at least annually, that the examinations cover the entire period since the previous examination period, and that the examination reports are submitted to the state within 90 days after the end of the examination period. The examination report must include a list of all states whose systems operate under the same control environment. The auditor of the service organization is required to issue a report on controls placed in operation and tests of operating effectiveness of controls, which is commonly referred to as a “service organization control (SOC) 1 type 2 report” (7 CFR section 274.1(i)).

In performing audits of SNAP under 2 CFR Part 200, Subpart F, an auditor may use these SOC 1 type 2 reports to gain an understanding of internal controls and obtain evidence about the operating effectiveness of controls.

A SOC 1 type 2 report includes (1) a description by the service organization’s management of its system of policies and procedures for providing services to user entities (including control objectives and related controls as they relate to the services provided) throughout the specified period of time; (2) a written assertion by the service organization’s management about whether, in all material respects and based on suitable criteria, (a) the aforementioned description fairly presents the system throughout the specified period, (b) the controls were suitably designed throughout the specified period to achieve the control objectives stated in that description, and (c) the controls operated effectively throughout the specified period to achieve those control objectives; and (3) the report of the service auditor, which (a) expresses an opinion on the matters covered in management’s written assertion, and (b) includes a description of the auditor’s tests of operating effectiveness of controls and the results of those tests.

This appendix is intended to assist service organizations and their auditors by describing illustrative control objectives and controls that service organizations may have in place. When such controls are present and operating effectively, they may enable auditors of user organizations to assess control risk below the maximum for financial statement assertions related to EBT transactions. The illustrative control objectives and controls in this appendix may not necessarily reflect how a specific service organization considers and implements internal control. Also, this appendix is not a checklist of required controls. Service organizations’ controls may be properly designed and operating effectively even though some of the controls included in this appendix are not present. Further, service organizations could have other controls operating effectively that have not been included in this appendix. Service organizations and their auditors will need to exercise professional judgment in determining the most appropriate and cost effective controls in a given environment or circumstance.

Many of the illustrative controls are stated in relation to the kinds of policies and procedures that are “established” or “in place” at an organization. It would be insufficient for such policies and procedures to merely exist on paper and not be implemented. To meet the criteria of a SOC 1 type 2 examination, the policies and procedures would need to be suitably designed, placed in operation, and operating effectively.

1. Control Environment

Illustrative Control Objective:

Controls provide reasonable assurance that the EBT system functions in a manner consistent with the service organization’s policies and complies with applicable laws and regulations (Food and Nutrition Act of 2008, as amended (7 USC 2011 et seq.) and (7 CFR section 277.18(p)).

Illustrative Controls:

- The service organization has written policies and procedures for the system processing EBT transactions.
- The organization identifies and analyzes relevant risks to the EBT process.
- Policies and procedures regarding acceptable employee practices, conflicts of interests, and codes of conduct have been established and communicated to employees with EBT responsibilities.
- Policies and procedures are established for performing background investigations of employees prior to employment.
- Policies and procedures have been established to segregate incompatible functions (e.g., application programming, systems and operation, financial duties, data storage, government reimbursement payment requests, transaction processing, and reconciliation) so no individual interacting with the system can exercise unilateral control over EBT transactions.
- Policies and procedures are in place for management to monitor the effectiveness of EBT controls and correct deficiencies or weaknesses when found.
- Policies and procedures are in place to prevent management or staff from overriding controls.

2. Systems Development and Maintenance

Illustrative Control Objective:

Controls provide reasonable assurance that changes (including emergency procedures) to EBT applications and system software are authorized, tested, approved, implemented, and documented.

Illustrative Controls:

- The service organization follows a system development methodology.
- System documentation for new and existing applications is current and complete in accordance with programming and documentation standards used by the service organization.
- Systems development staff are not responsible for system maintenance.

3. Access Controls

Illustrative Control Objective:

Controls provide reasonable assurance that the EBT system is protected against unauthorized physical and logical access.

Illustrative Controls:

- The responsibility for the development and enforcement of a security policy is at an organizational level that facilitates compliance by service organization personnel and enables enforcement of policies and procedures.
- Security policy and procedures are in place and are communicated to appropriate employees and contractors.
- Policies and procedures are in place for reporting security incidents or observed irregularities to an organizational level where such matters can be investigated and resolved.
- Policies and procedures are established for the security over filing, retention, and destruction of EBT system files.
- Policies and procedures are in place for conducting security system training.
- Policies and procedures are in place for discontinuing an employee or contractor's ability to access EBT hardware, software, and data when the employee is terminated or the employee's duties are changed.
- Access to EBT files or processes is limited based upon users' needs.

- Passwords control access to EBT files, personal identification numbers (PIN), and privacy data.
- A password change policy is in place and requires a password change at a specified interval, generally at least every 90 days.
- Firewalls or other procedures prevent unauthorized access to data from an external network.
- Policies and procedures are in place to prevent a state from reviewing or altering data for another state.

4. Computer Operations – Processing

Illustrative Control Objective:

Controls provide reasonable assurance that processing is scheduled and deviations from scheduling are identified and resolved.

5. Computer Operations – Data Transmission

Illustrative Control Objective:

Controls provide reasonable assurance that data transmissions are complete, accurate and secure.

Illustrative Controls:

- Policies and procedures require that PINs and data be encrypted throughout processing.
- Encryption keys are stored in a secure manner.
- Maintenance of encryption keys is performed by authorized service center staff.
- Policies and procedures of the service organization require proper identification, validation, and acceptance of EBT transactions processed.

6. Computer Operations – Output

Illustrative Control Objective:

Controls provide reasonable assurance that output data and documents are complete, accurate, and distributed to authorized recipients on a timely basis.

7. EBT Controls – Transactions Received from Authorized Sources**Illustrative Control Objective:**

Controls provide reasonable assurance that transactions are received only from authorized sources.

Illustrative Controls:

- Policies and procedures are in place to ensure that updates of point of sale (POS) device parameters are restricted to authorized personnel.
- Policies and procedures require that POS transactions be properly validated.
- Policies and procedures for direct data entry, such as adjustments, require proper review and approval.
- Policies and procedures are in place to approve voucher transactions.
- Policies and procedures for voucher transactions prevent unauthorized access to recipient or retailer accounts.

8. EBT Controls – Transaction Amounts and Recording**Illustrative Control Objective:**

Controls provide reasonable assurance that transactions are for authorized amounts and are recorded completely and accurately.

Illustrative Controls:

- Records identify the activity and events in client accounts (e.g., deposits, withdrawals, charges, and type of transactions).
- Records identify client accounts for which benefits have not been withdrawn or used beyond pre-established periods (i.e., identify inactive accounts for which deposits are still made).
- System edits prevent individual client accounts from being credited with benefits in excess of authorized amounts.

9. EBT Controls – Processing**Illustrative Control Objective:**

Controls provide reasonable assurance that transactions are processed completely and accurately.

Illustrative Controls:

- Policies and procedures of the service organization include controls to:
 - monitor and investigate any unsuccessful file transfers,
 - recover or reproduce lost or damaged data,
 - examine edit checks for unusual conditions,
 - reconcile input and output of transactions processed,
 - log and store transactions, and
 - monitor rejected transactions and account adjustment actions.

10. EBT Controls – Settlement**Illustrative Control Objective:**

Controls provide reasonable assurance that settlement of funds received from benefit providers and distributed to benefits acquirers for SNAP benefit purchases and withdrawals is performed timely and accurately.

Illustrative Controls:

- Policies and procedures are in place to perform reconciliations (at least weekly) of:
 - account balances,
 - net settlements, and
 - government funds.
- Policies and procedures are established for resolution of disputed transactions.
- Policies and procedures are established for requesting federal and state reimbursements.

11. Physical Environment**Illustrative Control Objective:**

Controls exist to provide reasonable assurance that physical assets are protected.

Illustrative Controls:

- Policies and procedures are established for environmental controls (e.g., maintenance schedules, fire suppression equipment, water detection and protection considerations, and the availability of an uninterruptable power system designed to protect and ensure continued operations).
- Policies and procedures call for periodic facility inspections.

- Policies and procedures for proper maintenance of hardware have been established.

12. Contingency Planning

Illustrative Control Objective:

Controls exist within the data center to provide reasonable assurance of continuity of operations.

Illustrative Controls:

- Disaster recovery and business continuity plans exist for the system processing EBT transactions.
- The business continuity plan provides for periodic testing at the backup facility and the service organization has performed such testing.
- The service organization has a contractually protected access right to the backup facility.
- Backup arrangements for key applications, processes, and files are in place.

13. Card Controls

Illustrative Control Objective:

Controls are established to provide reasonable assurance that users of EBT benefit cards are authorized.

Illustrative Controls:

- Each transaction is validated with a unique account number and PIN.
- For benefit card issuance services provided by the EBT service organization policies and procedures are in place to:
 - prevent unauthorized assignment and replacement of PINs;
 - properly deliver benefit cards to participants;
 - activate cards by only authorized users;
 - deactivate damaged, lost, or stolen cards;
 - record and destroy active cards returned to the service organization; and
 - control access to and inventory levels of pre-printed unused card stock.

APPENDIX IX
COMPLIANCE SUPPLEMENT CORE TEAM

The Compliance Supplement Core Team is responsible for the annual production of the Office of Management and Budget (OMB) Compliance Supplement. The Core Team is composed of audit and program representatives from the federal grant-making agencies, OMB, and the Census Bureau. The following is a list of team members (alphabetical by last name) responsible for the production of this Supplement:

Leticia Adu, Department of Health and Human Services
Morgan Aronson, Department of Interior
Brenna Berger, National Endowment for the Art
Connie Cox Bodner, Institute of Museum and Library Services
Dexter Brereton, Department of Education
Richard Brundage, National Endowment for the Humanities
Kimberly Butler, US Small Business Administration
Carole Clay, Department of State
Kevin Cone, Department of Veterans Affairs
Antanese Crank, National Aeronautics and Space Administration
Jason Day, Department of Defense
Mark Dixon, Census Bureau, Department of Commerce
Christopher Eck, National Archives and Records Administration
Caroline Fernandez, Corporation for National and Community Service
Beth Flowers, Denali Commission
John Geisen, Department of Commerce
David Gilliland, Gulf Coast Ecosystem Restoration Council
Joel Gonzalez, Department of Energy
Jeff Haley, Department of Justice
Kysha Holliday, Environmental Protection Agency
Siporah Jackson, Department of the Treasury
Sheela Kailasanath, Federal Communications Commission
Pamela Lynch, Department of Transportation
Mitzi Mayer, Office of Management and Budget
Lisa Newton, Office of National Drug Control Policy
Michael Pellegrino, Department of Homeland Security
Rochelle Ray, National Science Foundation
Steve Sigler, Gulf Coast Ecosystem Restoration Council
Trae Sommer, Social Security Administration
Shannon Steinbauer, Department of Housing and Urban Development
Steve Tashjian, US Agency for International Development
Latonya Torrence, Department of Labor
Seanne Weekes, Department of Agriculture
